The University of Georgia Graduate Bulletin

Directory

Note:
All numbers are in area code 706.

Graduate School:
Boyd Graduate Studies Research Center;
Graduate Admissions; 542-1787
Records & Graduation Office; 542-4803
Business Office; 542-4798

Bookstore, University:
Sanford Drive; 542-3171

Career Planning and Placement:
Clark Howell Hall; 542-3375

Fees Payment:
Business Services Building; 542-1625

Financial Aid:
220 Academic Building; 542-6147

Graduate Student Association:
542-4792

Health Service:
University Health Center; 542-1162

Housing Office:
Russell Hall; 542-1421

Libraries:
Main Library, North Campus; 542-7501
Science Library, Boyd Graduate Studies Research Center; 542-4535

Office of International Education
217 Barrow Hall; 542-7903

Parking Services:
Perimeter Parking Lot; 542-7275

Registrar:
105 Academic Building; 542-4040

Student Activities:
Tate Student Center; 542-7774

Student Affairs, Office of the Vice President for:
201 Academic Building; 542-3564

Tate Student Center:
Information; 542-3816

The UGA Graduate Bulletin 1999-2000

The University of Georgia: A Unit of the University System of Georgia

Pursuant to directives of the President of this institution, the University of Georgia continues its affirmative implementation of equal opportunity to employees, students, covered contractors and vendors, and applicants for employment, admission, or contractor/vendor status. The University of Georgia will act in matters of employment, admissions, programs, and services free of prohibited bias with regard to race, creed, color, sex, national origin, religion, age, veteran status, or disability. Further, the University of Georgia will not maintain racially segregated facilities.

Continuation of the above policies is consistent with applicable provisions of the Civil Rights Act of 1964, the Education Amendments of 1972, Executive Order 11246, Revised Order 4, the Vietnam Era Veterans Readjustment Act of 1974, the Rehabilitation Act of 1973, and The Americans with Disabilities Act of 1990, as revised and/or amended, with implementing regulations. Accordingly, this institution will not discriminate in employment, admissions, programs, or services with regard to any position for which the applicant, employee, or student is qualified and will make reasonable accommodation for physical and mental limitations.

The Affirmative Action Plan implementing the above body of law, regulation, and policy is administered by Claude-Leonard Davis, Director of the UGA Equal Opportunity Office at 3 Peabody Hall, Athens, Georgia 30602-1622. Telephone inquiries concerning this Plan may be directed to (706) 542-7912. Copies of this Plan are available for inspection in the Equal Opportunity Office and in the UGA Main Library during normal weekday working hours.

While every effort is made to provide accurate and current information, the University reserves the right to change, without notice, statements in the bulletin concerning rules, policies, fees, curricula, courses, calendar, or other matters. Students enrolled at the University agree to comply with the University's rules and regulations and to accommodate to any changes necessary. Further, the statements set forth in this bulletin are for informational purposes only and should not be construed as the basis of a contract between a student and the institution.

The University System of Georgia

The University System of Georgia includes 34 state-sponsored, public institutionslocated throughout Georgia 4 comprehensive and special purpose universities, 2 regional universities, 13 state universities and colleges, and 15 two-year colleges.

A 15-member constitutional Board of Regents one from each of the state's 11 Congressional Districts and five from the state-at-large governs the University System, which was established in 1932. Board members are appointed by the Governor, subject to state senate confirmation, for seven-year terms.

The Chairperson, the Vice Chairperson, and other officers of the Board are elected by its membership. The Chancellor, who is not a Board member, is the chief executive officer of the Board and chief administrative officer of the University System.

The overall programs and services of the University System are offered through three major components: Instruction, Public Service/Continuing Education, Research.

Board of Regents' policies for government, management, and control of the University System and the Chancellor's administrative actions provide institutions a high degree of autonomy. The President is the executive head of each institution and is recommended by the Chancellor and appointed by the Board.

The University System Advisory Council, with 34 committees, engenders continual dialogue on major academic and administrative matters and makes recommendations to the Chancellor, who transmits them to the Board as appropriate, regarding academic and administrative operations in the System. The Council consists of the Chancellor, the Vice Chancellor, and all Presidents as voting members. It includes other officials of institutions as nonvoting members. The Council's 21 academic and 13 administrative committees are composed of institutional representatives, typically one from each unit, and deal with matters of System-wide application.

Matriculation fees and nonresident tuition fees for students at all institutions are established by the Board of Regents. All students pay matriculation fees while out-of-state students pay nonresident tuition in addition. Other fees for student services and activities are established by institutions, subject to Board of Regents' approval. Non-mandatory fees established by institutions are subject to approval of the Board of Regents' office.

General University Information

General University Information

History

The University of Georgia

When the University of Georgia was incorporated by an act of the General Assembly on January 27, 1785, Georgia became the first state to charter a state-supported university. In 1784 the General Assembly had set aside 40,000 acres of land to endow a college or seminary of learning.

At the first meeting of the board of trustees, held in Augusta on February 13, 1786, Abraham Baldwin was selected president of the University. Baldwin, a native of Connecticut and a graduate of Yale University who had come to Georgia in 1784, drafted the charter adopted by the General Assembly.

The University was actually established in 1801 when a committee of the board of trustees selected a land site. John Milledge, later a governor of the state, purchased and gave to the board of trustees the chosen tract of 633 acres on the banks of the Oconee River in northeast Georgia.

Josiah Meigs was named president of the University and work was begun on the first building, originally called Franklin College in honor of Benjamin Franklin and now known as Old College. The University graduated its first class in 1804.

The curriculum of traditional classical studies was broadened in 1843 to include courses in law, and again in 1872 when the University received federal funds for instruction in agriculture and mechanical arts.

Thirteen schools and colleges, with auxiliary divisions, carry on the University's programs of teaching, research and service. These colleges and schools and the dates of their establishment as separate administrative units are: Franklin College of Arts and Sciences, 1801; College of Agricultural and Environmental Sciences, 1859; School of Law, 1859; College of Pharmacy, 1903; D. B. Warnell School of Forest Resources, 1906; College of Education, 1908; Graduate School, 1910; C. Herman and Mary Virginia Terry College of Business, 1912; Henry W. Grady College of Journalism and Mass Communication, 1915; College of Family and Consumer Sciences, 1933; College of Veterinary Medicine, 1946; School of Social Work, 1964; School of Environmental Design, 1969. The Division of General Extension, now the Georgia Center for Continuing Education, was incorporated into the University in 1947.

In 1931 the General Assembly of Georgia placed all state-supported institutions of higher education, including The University of Georgia, under the jurisdiction of a single board. This organization, known as the University System of Georgia, is governed by the Board of Regents. The Board of Regents' executive officer, the chancellor, exercises a general supervisory control over all institutions of the University System, with each institution having its own executive officers and faculty.

The Graduate School

Prior to the formal establishment of the Graduate School, courses of postgraduate status were offered under the control of a faculty committee on graduate studies. In 1910, the formal organization of graduate studies into a Graduate School was authorized. Dr. Willis H. Bocock served as the Graduate School's first dean and was succeeded by R. P. Stephens, George H. Boyd, Gerald B. Huff, Thomas H. Whitehead, Hardy M. Edwards, Jr., John C. Dowling, and the present dean, Gordhan L. Patel.

The Graduate School coordinates the graduate programs of all schools and colleges of the University. Matters of policy and procedure are determined by the graduate faculty through the graduate council. The graduate faculty consists of faculty members appointed by the President on the basis of productive research, effective teaching, and other creative activities.

The policies adopted by the graduate council are administered by the dean of the Graduate School.

The traditional degrees, Master of Arts and Master of Science, are offered in 26 and 41 disciplines, respectively. The Doctor of Philosophy degree is offered in 71 disciplines. The University also offers professional master's degrees in 22 areas, the Specialist in Education degree in 23 fields, and professional doctoral degrees in education, music, and public administration.

Mission

The University of Georgia, a land-grant and sea-grant university with state-wide commitments and responsibilities, is the state's oldest, most comprehensive, and most diversified institution of higher education. Its motto, "to teach, to serve, and to inquire into the nature of things," reflects the University's integral and unique role in the conservation and enhancement of state's and nation's intellectual, cultural, and environmental heritage.

The University of Georgia shares with the other research universities of the University System of Georgia the following core characteristics:

1. a statewide responsibility and commitment to excellence and academic achievements having national and international recognition;
2. a commitment to excellence in a teaching/learning environment dedicated to serve a diverse and well-prepared study body, to promote high levels of student achievement, and to provide appropriate academic support services;
3. a commitment to excellence in research, scholarship, and creative endeavors that are focused on organized programs to create, maintain, and apply new knowledge and theories; that promote instructional quality and effectiveness; and that enhance institutionally relevant faculty qualifications;
4. a commitment to excellence in public service, economic development, and technical assistance activities designed to address the strategic needs of the State of Georgia along with a comprehensive offering of continuing education designed to meet the needs of Georgia's citizens in life-long learning and professional education;
5. a wide range of academic and professional programming at the baccalaureate, master's and doctoral levels.

With its statewide mission and core characteristics, the University of Georgia endeavors to prepare the University community and the state for full participation in the global society of the twenty-first century. Through its programs and practices, it seeks to foster the understanding of and respect for cultural differences necessary for an enlightened and educated citizenry. It further provides for cultural, ethnic, gender, and racial diversity in the faculty, staff, and student body. The University is committed to preparing the University community to appreciate the critical importance of a quality environment to an interdependent global society.

As a comprehensive land-grant and sea-grant institution, the University of Georgia offers baccalaureate, master's, doctoral and professional degrees in the arts, humanities, social sciences, biological sciences, physical sciences, agricultural and environmental sciences, business, education, environmental design, family and consumer sciences, forest resources, journalism and mass communication, law, pharmacy, social work, and veterinary medicine.

The University attracts students nationally and internationally as well as from within Georgia. It offers the state's broadest array of possibilities in graduate and professional education, and thus a large minority of the student body is post-baccalaureate. The predominantly Georgian undergraduate student body is a mix of highly qualified students originally admitted as freshmen and selected transfer students principally from other University System institutions.

With original scholarship, basic and applied research, and creative activities constituting an essential core from which to draw, the impact of the land-grant and sea-grant mission is reflected throughout the state. Cooperative extension, continuing education, public service, experiment stations, and technology transfer are all designed to enhance the well-being of the citizens of Georgia through their roles in economic, social, and community development.

As it has been historically, the University of Georgia is responsive to the evolution of the state's educational, social, and economic needs. It aspires through its strategic planning to even closer contact and interaction with public and private institutions throughout the state as well as with the citizens it serves.

Accreditation

The University of Georgia is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award bachelor's, master's, the Specialist in Education, and doctoral degrees. In addition, a number of the University's 13 colleges and schools are further accredited by appropriate educational associations.

Admission

Correspondence concerning admission to the Graduate School should be addressed to the Office of Graduate Admissions, The University of Georgia, Athens, Georgia 30602-7402, Email gradadm@arches.uga. edu or WWW.gradsch. uga.edu/. Inquiries about facilities for advanced study and research, programs of study, and specific departmental requirements should be addressed to the appropriate department.

Persons holding a bachelor's degree from any institution accredited by the proper regional accrediting association are eligible to apply for admission to the Graduate School. Applicants should have ranked in the upper half of their undergraduate class and should have completed the equivalent of an undergraduate major in the field in which they propose to study. Applicants are responsible for providing for the submission of all application materials required for admission. These items include but are not limited to: the general application for admission, a $30 application-processing fee, transcripts, entrance test scores, letters of recommendation, and any supplemental material required by the department. The application-processing fee is non-refundable and will not be credited toward the matriculation fee. Materials submitted in support of an application will not be returned.

Applications and supporting credentials from domestic students must be received in the Office of Graduate Admissions by the following deadlines: Fall semester, July 1; Spring semester, November 15; Summer semester (pre- session), April 1; and Summer semester (all other sessions), May 1. Applicants are urged to apply as early as possible up to one year in advance of the desired matriculation date. All applicants should consult with the graduate coordinator of the specific program for which they are making application to ascertain if the program adheres to an earlier application deadline. For information concerning deadlines for international applications, refer to the section entitled International Applicants.

Each completed application, with supporting materials, is referred to the department in which the applicant proposes to study, where it is considered by the faculty of that department. No applicant will be admitted without the recommendation of an academic unit. Final consideration is given by the dean of the Graduate School.

An applicant is admitted for a specific semester. Applicants may not register unless they have been notified of their acceptance to the Graduate School by the Office of Graduate Admissions. Admission is valid only when the person registers for the specified semester. The applicant, however, may request the Office of Graduate Admissions to defer his/ her registration to another semester. Deferred applications are reconsidered by the applicant's department.

Entrance Tests

Entrance test scores appropriate for each application must be sent to the Office of Graduate Admissions directly by the responsible testing agency. All test scores are subject to a five-year time limitation.

Scores on the verbal and quantitative sections of the General Test of the Graduate Record Examinations (GRE) are required for admission as a prospective candidate for most graduate degrees. The Miller Analogies Test (MAT) may be used in lieu of scores on the GRE for admission to most Master of Education and Specialist in Education degree programs. The GMAT is required for applicants seeking admission as prospective candidates for the Master of Business Administration and the Master of Accountancy degrees. Applicants for the Master of Marketing Research degree may submit either the GMAT or the GRE. The Master of Arts and Doctor of Philosophy programs in business administration accept the GMAT or the GRE. The Master of Arts and Doctor of Philosophy programs in economics require the GRE. In all cases, applicants should consult the departments for specific information.

The Graduate Record Examinations and the Graduate Management Admission Test are offered at numerous testing centers in the United States and abroad. Advance registration is required. Registration forms and detailed information on the availability and character of each examination may be obtained by writing to the Educational Testing Service, Princeton, New Jersey 08541-6000 or at the following web address: www.ets.org. The Miller Analogies Test is given at various colleges and universities as ap-

proved by The Psychological Corporation. For information concerning the test as given at the University of Georgia, contact the Office of Testing and Evaluation, Clark Howell Hall, (706) 542-3183. For information concerning other approved testing centers, contact The Psychological Corporation, 555 Academic Court, San Antonio, Texas 78204-2498.

Retention of Records

Applications and supporting documents for those who were denied admission, who were accepted but failed to matriculate, or who did not complete the application procedure are retained in the Office of Graduate Admissions for a period of one year, after which they are discarded.

Applications submitted without the application fee are not processed. Such applications are retained for one year. Transcripts, test scores, and any other information submitted without an application are retained for a period of one year.

Immunization Requirements

All new students attending University System of Georgia institutions must show proof of immunization for measles, mumps, and rubella. Immunity may be verified by proof of (a) having had the disease, (b) having had the required immunizations, or (c) having had laboratory evidence of immune titer. In compliance with this policy, all new students must complete a University Health Center Report of Medical History form which will be sent by the Office of Graduate Admissions at the time of acceptance. This form should be returned to the University Health Center at least two weeks prior to registration. Questions related to the certificate of immunization and/or the immunization policy should be directed to: The Medical Records Department, University Health Center, The University of Georgia, Athens, GA 30602-1755; telephone (706) 542-8617.

International Applicants

Since several months may be required to process an application from abroad, foreign nationals are urged to submit complete application materials as early as possible, but no more than one year in advance. The application must include the application form, two official transcripts from all colleges and universities attended, two official copies of test scores on an approved entrance test, a $30 non-refundable application fee, and three letters of recommendation. Recommendations from teachers who are familiar with higher education programs in the United States are advantageous. International applicants, for whom English is not their native tongue, must submit Test of English as a Foreign Language (TOEFL) scores in addition to scores on an approved entrance examination. The application of a student from abroad, complete with supporting materials, must be in the Office of Graduate Admissions by the following deadlines: Fall semester, May 15; Spring semester, October 15; Summer semester (all sessions), February 15. Departments may have earlier application deadlines which take precedence over those established by the Graduate School. Applicants should consult the departments for their specific deadlines.

Application for Readmission

A student who has been out of school more than three semesters, including the summer semester, and wishes to return for the same admission classification and major must submit an application for readmission to the Office of Graduate Admissions. Note: Students who have not enrolled during the previous six years must submit an application for admission.

A student who has completed a graduate degree, and is applying for a second graduate degree, must submit an application for admission to the Office of Graduate Admissions.

A student who is not currently enrolled and wishes to apply for a degree program different from that for which originally admitted must submit an application for admission to the Office of Graduate Admissions.

A currently enrolled student applying for a second graduate degree must submit an application for admission to the Office of Graduate Admissions.

Applications for admission or readmission must be submitted by the established deadlines.

Change of Degree Objective

A student wishing to change his or her degree objective may do so with the approval of the departmental graduate coordinator and the dean of the Graduate School. A form requesting a change in degree objective may be submitted to the Graduate School if a student has registration eligibility and is 1) changing from provisional admission status to the status of a prospective candidate for a degree within the same department; 2) changing from one degree objective to another degree objective within the same department; and/or 3) changing from one major to another within the same department.

A nondegree student or a transient student is not eligible to request a change of degree objective and must apply for admission to be considered for a graduate degree program. A currently enrolled student wishing to change from one degree and department/college to another degree and department/college must apply for admission to the new department/college.

Classification of Graduate Students

At the discretion of individual schools or departments and with the approval of the dean of the Graduate School, applicants may be considered for admission to one of the following classifications:

1. *Prospective candidate for a degree.* Applicants who meet all requirements for admission to a degree program may apply as prospective candidates for a graduate degree. Applicants must submit the following to the Office of Graduate Admissions: the general application for admission, a $30 application-processing fee, two official copies of transcripts from each institution attended, except the University of Georgia, and two copies of official entrance test scores. Applicants also must submit three letters of recommendation directly to the department to which they are applying, as well as any supplemental information required by the department. Applicants are responsible for contacting the departmental graduate coordinator for information regarding any special requirements and any supplemental material which may be needed.

Applicants upon whom some condition has been placed by the major department and/or the Graduate School may be admitted provisionally to a degree program if recommended by the department and approved by the graduate dean. Applicants for the Specialist in Education degree are not eligible for provisional admission.

2. *Nondegree (ND).* Applicants who do not intend to pursue a degree but who wish to take courses for professional advancement, licensure, or certification purposes, and who hold a baccalaureate degree or higher degree from a regionally accredited institution, should apply for nondegree status. Applicants must submit the following to the Office of Graduate Admissions: the general application for admission, a $30 application-processing fee, two official copies of transcripts from the institution which awarded the highest degree, and a statement of purpose. Applicants are responsible for contacting the departmental graduate coordinator for information regarding any special requirements or supplemental material which may be needed.

Nondegree students who are later admitted as prospective degree candidates may apply a maximum of nine hours of course work taken in nondegree status toward a graduate degree program. The inclusion of such course work on a program of study is subject to the approval of the major professor, the departmental graduate coordinator, and the dean of the Graduate School. Courses taken in the nondegree status may not be included on a program of study for the Specialist in Education degree.

3. *Graduate Transient (TRANS).* Transient admission may be granted to students in good standing at regionally accredited graduate schools who wish to enroll for one semester at the University of Georgia. Applicants requesting this status must submit the following to the Office of Graduate Admissions: the general application for admission, a $30 application-processing fee, and certification of graduate standing in a regionally accredited institution. Additional information may be required by departments for admission to this classification; therefore, applicants should contact the appropriate department. Students admitted in this classification who later wish to enroll as prospective candidates for a degree must make formal application to the Graduate School as described in item 1 above.

Admission and Registration of Persons 62 Years of Age or Older

According to the provisions of an amendment to the Constitution of the State of Georgia, senior citizens who are residents of Georgia now have access to institutional services available through University System units at reduced cost. The rules adopted by the Board of Regents regarding admission and registration of persons 62 years of age or older in units of the University System are listed below:

1. Current or prospective students must be residents of Georgia, 62 years of age or older at the time of registration, and must present a birth certificate or other comparable written documentation of age to enable the registrar to determine eligibility.

2. Persons who have been accepted through regular admission procedures may enroll as regular students in courses offered for resident credit on a space available basis without payment of fees, other than supply, laboratory, shop, and transportation charges.

3. Prospective students must meet all system and institutional admission requirements to include official transcripts of all high school and/or college credit; entrance test scores, i.e., SAT, GRE, GMAT, etc.; letters of recommendation, and/or other materials as may be required.

4. Students will be provided access to all services available at any particular system unit which are applicable to the creation and maintenance of student and institutional records.

5. All degree-seeking students must meet all system, institutional, and legislated degree requirements such as the Regents' Test, major area examinations, preliminary and final oral and/or written examinations, and acceptable theses or dissertations.

6. Students may not enroll in dental, medical, veterinary, or law schools under the provisions of this policy.

The aforementioned rules became effective Fall 1977.

Registration

A graduate student using University facilities and/or staff time must register for a minimum of three hours of credit each semester. A student who holds an assistantship must register for a minimum of nine hours of credit each semester.

Complete registration instructions are included in the University of Georgia Schedule of Classes for each semester. The Schedule of Classes is available in the Office of the Registrar, departmental offices, and deans' offices the first week of the semester preceding the semester the student plans to register.

Course Load

A full-time course load is nine hours per semester during the academic year and six hours during the summer semester. The minimum/maximum course load for which a graduate student may enroll is governed by the following:

	Course Load (Sem. Hrs.)	
	Minimum	Maximum
Students who do not have an assistantship	3	15
Graduate Assistants:		
One-fourth (.25) time	9	12
One-third (.33) time	9	12
Four-ninths (.44) time	9	12
One-half (.50) time	9	12

To exceed the maximum course load, a student must obtain approval from his/her major professor and the dean of the Graduate School. The department head or the departmental graduate coordinator may sign the overload request in the absence of the student's major professor.

Generally, a request to exceed the maximum course load will not be approved unless the student satisfies the following guidelines: (1) is a prospective candidate (or candidate) for a graduate degree, (2) has a cumulative graduate average of 3.5 or higher, (3) has no incompletes on his/ her graduate record, and (4) is not a first-semester student.

The maximum course load for an eight-week summer session is 12 hours. Permission to exceed the maximum course load is not granted during the summer session.

Course Numbers

Courses numbered 8000-9999, taught by members of the graduate faculty, are advanced graduate courses and seminars which provide educational experiences at the highest level in a graduate student's program of study. Courses numbered 6000-6999 are fundamental knowledge courses; those numbered 7000-7999, except master's research (7000) and thesis (7300), are technique and professional courses. Courses numbered 6000-7999 are normally taken early in the graduate student's program of study. Joint undergraduate/graduate courses, numbered 4000-4999/6000- 6999 and 5000-5999/ 7000-7999, in which undergraduate and graduate students are simultaneously enrolled are not normally used to provide the core requirements of a graduate degree program. Such courses may be used as electives and as service courses taken in other departments.

Enrollment in Graduate Courses—Law/Undergraduate Students

Students enrolled in the School of Law, who hold a bachelor's degree from an accredited university/college and who are in good standing, may enroll in graduate courses with approval of their advisor and the dean of the Graduate School. An approval form may be obtained in the School of Law.

Undergraduate students in good standing who are participating in the Honors Program may register for graduate courses with approval of their advisor and the dean of the Graduate

School. An approval form may be obtained in the Honors Program Office.

Undergraduate students, having received prior approval, may enroll for up to six semester hours of credit to be included in a graduate program of study if they are within three hours of completing requirements for the undergraduate degree. They may enroll for three hours of such credit if they are within six hours of completing degree requirements. This credit must be in courses numbered 4000-5999 which also have 6000-7999 listings. If work in the 4000-5999 numbered courses is satisfactory, credit at the graduate level will be granted after admission and registration in the Graduate School of the University of Georgia. A form to request prior approval may be obtained in the Graduate School.

Irregular Students

A student registered in the University as an irregular student cannot register for graduate courses. Course work taken in this classification cannot be counted for credit toward any graduate degree.

Grade Reporting System

The grade scale for graduate students is as follows:

A Excellent
B Good
C Satisfactory
D Passing
F Failure

WF This designation indicates that the student was permitted to withdraw from a course while doing unsatisfactory work or withdrew after the midpoint of the grading period. The dropping of a course under these circumstances is equivalent to a failure. The symbol W will be assigned for withdrawals after the midpoint of a grading period in cases of a hardship. A determination that a hardship exists must be made by the Office of the Vice President for Student Affairs and communicated to the Graduate School.

S This symbol indicates that credit has been given for completion of degree requirements other than academic course work. The grade of S must be assigned in thesis and dissertation courses (7300, 9300), where student performance or progress is satisfactory. The use of this symbol is approved for seminars, applied projects, problems, internships, practicums, and research courses. Credit earned with an S grade will become part of cumulative hours earned, but the grade will not be included in the calculation of academic averages.

U This symbol indicates unsatisfactory performance or progress in an attempt to complete degree requirements other than academic course work. The grade of U must be assigned in thesis and dissertation courses (7300, 9300), where student performance or progress is unsatisfactory. The use of this symbol has been approved for seminars, applied projects, problems, internships, practicums, and research courses. No credit is earned by a U grade. The grade is not included in the calculation of academic averages.

Once earned and recorded, a U grade cannot be changed to another grade. The grade of U is not acceptable as a terminal grade for thesis, problem, and dissertation courses.

A/S This symbol indicates that both A-F and S/U grading systems are permitted in a course. Such courses are identified in their course description and are limited in number. The instructor should explain the conditions for the use of both grading systems at the beginning of the course.

If a student does not receive a grade in a course for which he/she enrolled, one of the following designations must be placed on the student's record:

I This letter indicates that a student was doing satisfactory work, but for nonacademic reasons beyond his/her control, was unable to meet full requirements of the course. When an incomplete is not removed within two semesters, the I automatically becomes an F.

W This designation indicates that the student was permitted to withdraw from a course without penalty. Withdrawals without penalty will not be permitted after the midpoint of the total grading period except in cases of hardship. A determination that a hardship exists must be made by the Office of the Vice President for Student Affairs and communicated to the Graduate School.

V This designation indicates an audit. No credit is given for an audit. Students may not transfer from audit to credit status or vice versa after the closing of the drop/add period of each semester.

ER This symbol indicates an error in reporting. If not removed after one semester, the ER becomes a grade of WF. Upon receiving a grade of ER, the student should consult with the course instructor.

All grade appeals must be initiated within one calendar year from the end of the term in which the grade was recorded.

For purposes of computing semester, yearly, and cumulative grade point averages, letter grades must be converted into numerical equivalents. The equivalents are:

A	4.0	WF	0
B	3.0	I	*
C	2.0	S	*
D	1.0	U	*
F	0	V	*

**Not computed*

Special Instructional Programs

Combined Degree Programs

The Graduate School offers certain combined degrees with other schools and colleges in the University.

Selected students in the College of Arts and Sciences may be eligible for completion of combined AB and MA or BS and MS programs in a four-year period. Students in the College may also be allowed to complete AB and MBA or BS and MBA programs in five years. Students interested in these degree objectives should contact the University Honors Program.

Certain students in the College of Family and Consumer Sciences may be eligible to pursue the combined degrees of BSHE and MBA; in the College of Journalism and Mass Communication students may be allowed to pursue combined programs leading to the ABJ and MBA degrees; and in the Terry College of Business students may be eligible to pursue combined programs leading to the BBA and MAcc degrees. All of these combined degree programs are designed to be completed in five years.

Students interested in the JD and MBA or JD and MAcc four-year combined degree programs should contact the School of Law and the Terry College of Business.

Selected pharmacy students may enter a combined degree program in which they receive the BS degree in pharmacy at the end of their third professional year and the MS degree in pharmacy at the end of one additional year.

Study Abroad/Exchange Programs

The various schools/colleges and departments of the University sponsor a number of study abroad programs. These include study in such countries as Belgium (international law), Italy (art, classics, Romance languages, journalism, and drama), England (international business and British history, politics, literature, and culture), Brazil (Romance languages), and France (international business). Other opportunities for study overseas are available through the University System of Georgia institutions, through programs offered by other educational institutions, and through UGA exchange programs in Argentina, France, England, the Netherlands, and Germany.

A student should receive verification in writing from the major professor, graduate coordinator, and dean of the Graduate School that credit earned through a study abroad or exchange program may be applied to the program of study for the graduate degree. Students should also complete a Study Abroad Credit Approval Form, especially if they wish to apply student financial aid funds toward study abroad. This form may be obtained from the Office of International Education.

If the study abroad or exchange program offers courses through UGA inservice/off-campus credit or through the REGT Studies Abroad Curriculum, the credit earned will be recorded as resident credit, otherwise the credit earned will be recorded as transfer credit. Students are advised to contact the Graduate School about policies related to transfer credit.

To explore the many programs for study, work, research, travel, internships, teaching, and/or volunteering overseas, contact the Office of International Education, The University of Georgia, 201 Barrow Hall, Athens, Georgia 30602-2407, (706) 542-7903.

Cortona Program

The University of Georgia sponsors an interdisciplinary study abroad program year-round (fall,

spring, summer) located in Cortona (Tuscany), Italy. The areas of study are art history, studio arts (book arts, ceramics, design, drawing, interior design, jewelry and metalsmithing, painting, papermaking, photography, printmaking, sculpture, and watercolor), landscape architecture, Italian, Italian culture, classics, philosophy, and women studies. Extensive travel to major sites (Rome, Pompeii, Siena, Urbino, Florence, Venice, etc.) are part of the itinerary. The program offers courses for undergraduate and graduate credit.

For more information concerning this program, contact Studies Abroad Cortona Program, School of Art, Bishop House, Room #1, (706) 542-7011.

Volcani Program for Graduate Students from the College of Agricultural and Environmental Sciences

A 1987 agreement between the University of Georgia and the Israeli Agricultural Research Organization, Volcani Center, provides for cooperative educational and research activities in the agricultural sciences and related topics. Graduate studies are available to University of Georgia students interested in conducting research in arid and semi-arid zones, leading to an advanced degree; to Israeli graduate students and to candidates from developing countries interested in international training, experience in Israel and a graduate degree from the University.

Cooperative Education

Cooperative Education (Co-op) is a structured educational plan alternating periods of work with periods of academic study. Cooperative Education helps students to relate career and academic goals and to develop skills systematically in both areas. Employment is salaried, related to the field of study, regular, continuing, increasing in difficulty and responsibility, and usually paralleling the academic curriculum.

University of Georgia cooperative education takes place in a variety of business, industrial, and federal government settings in many states throughout the country. Opportunities are available to graduate students at the master's level in a variety of academic fields. For information, write the Career Planning and Placement Center, Clark Howell Hall, or call (706) 542-3375.

Academic Regulations and Procedures

Statements set forth in this bulletin are for informational purposes only and should not be construed as the basis of a contract between a student and the institution. While every effort is made to provide accurate and current information, the University reserves the right to change, without notice, statements in the bulletin concerning rules, policies, fees, curricula, courses, calendar, or other matters. Students enrolled at the University agree to comply with the University's rules and regulations and to accommodate to any changes necessary.

Students have the responsibility for keeping themselves apprised of current graduation requirements for their particular degree program.

Use of Credit

Course and resident credit used to satisfy the requirements of one degree cannot be used to satisfy the requirements of another degree.

Cumulative Graduate Average

To be eligible for admission to candidacy and graduation, a student must maintain an average of 3.0 (B) on all graduate courses taken and on all courses on the program of study. No grade below C (2.0) will be accepted as part of a program of study for a graduate degree.

When a graduate course is repeated, the last grade received will be used in calculating the cumulative graduate average that is used for probation, dismissal, admission to candidacy, and graduation. Grades received in all graduate courses will be included in the graduate cumulative average.

Extension and Correspondence

Graduate credit is not allowed for work done in extension or by correspondence.

Resident Credit in Graduate Centers

I. For course work leading to a professional master's degree, credit on a resident basis will be granted for graduate courses taken at a graduate center approved by the Board of Regents, provided:

1. the student has been admitted to the Graduate School of the University of Georgia prior to taking the course;

2. the physical facilities such as classrooms, library, and teaching aids are adequate as determined by a site visit of at least three persons, one appointed by the dean of the school or college offering the course, one appointed by the Director of Libraries, and one appointed by the dean of the Graduate School; and
3. the instructor is the same one who teaches the course on campus, or is approved by the dean of the school or college offering the course and the dean of the Graduate School.

II. Resident credit will be granted for course work or research leading to degrees other than professional master's degrees offered at off-campus locations provided:

1. the student has been admitted to the Graduate School prior to taking the course;
2. the requirement of two consecutive semesters of full-time work on campus in Athens for all doctoral students is satisfied;
3. the requirement of two semesters of full-time work on campus in Athens (which need not be consecutive) is, in general, satisfied for all candidates for MA and MS degrees. An exception to the above may be made for students who prefer to spend one semester of full-time work abroad in a program of study approved by the University of Georgia or the Board of Regents. Such study shall be counted as resident credit; and
4. the instructor is the same one who teaches the course or directs the research on campus, or is approved by the dean of the school or college offering the work and the dean of the Graduate School.

III. Residence or nonresidence credit for Studies Abroad is determined by the department from which a student is seeking a degree.

Application for Graduation

An application for graduation must be filed with the Graduate School no later than Friday of the first full week of classes two semesters prior to the anticipated graduation date. Application forms may be obtained from the Graduate School. Candidates for graduate degrees should check periodically with the Graduate School concerning dates for filing applications as these dates and fees are subject to change.

Final Registration Requirement

Students must be registered at the University of Georgia for a minimum of three hours of credit the semester in which they complete all degree requirements. Once degree requirements have been completed, no further registration is required, even if the official graduation date is in a following semester.

A graduate course, GRSC 9270 (Graduate Study Completion), is designed for students completing degree requirements who will be using staff time or University facilities and for whom no regular course is appropriate. Permission to register for this course must be granted by the Graduate School.

Students will not be approved for graduation if they have a grade of I or ER which, when changed to a recorded grade, could cause the graduate grade point average to fall below the minimum required for graduation.

Graduation Exercises

Formal commencement exercises are held in June and December. Students who graduated in August may participate in the December commencement exercises if they wish to do so. Candidates for degrees are urged to participate in graduation exercises, but they are not required to attend.

Awarding Doctoral Degrees—University Faculty

No member of the faculty of the University of Georgia above the rank of instructor will be awarded a doctoral degree by the University.

Probation and Dismissal

Students may be dismissed by their department at the end of any semester if they have not made sufficient academic progress to warrant continuance of study. Termination of students will follow policies and procedures adopted by the department and reported to the Graduate School. Dismissal by an academic department may be appealed to the dean of the Graduate School after all avenues of appeal have been exhausted at the departmental level. When students are terminated by a department, but not simultaneously by the Graduate School, they may apply for admission to another graduate program if they wish to do so.

Students with a cumulative graduate course average below 3.0 for two consecutive terms are placed on academic probation by the Graduate School. They then must make a 3.0 or higher semester graduate average each succeeding semester that their overall cumulative graduate average is below 3.0. These students are no

longer on probation when their cumulative graduate average is 3.0 or above. If they make below a 3.0 semester graduate average while on probation, they are dismissed. When students repeat a graduate course, the last grade will be utilized to calculate the cumulative graduate average that is used for probation, dismissal, admission to candidacy and graduation. Grades of S, U, I, and V will not be used in calculating the cumulative graduate average. When students are dismissed under the terms of this policy, they may not apply for admission to another graduate program offered by the University.

Students who are dismissed by the Graduate School for academic reasons may appeal the dismissal to the dean of the Graduate School. The appeal must be submitted to the dean within 10 working days following receipt of notice of dismissal. Information concerning the appeal process may be obtained in the Graduate School.

Appeals

University of Georgia students have the right to appeal academic decisions. Usually the appeal goes first to the unit responsible for the decision (for example, grades or departmental requirements to the department; college or school requirements to the school; university requirements to the Educational Affairs Committee). An unfavorable ruling at one level can be appealed to the successive levels (viz. a department ruling can be appealed to the college in which the institutional unit is located; a college-level ruling can be appealed to the University Council Educational Affairs Committee; the Educational Affairs Committee ruling can be appealed to the President of the University; and the President's ruling can be appealed to the Board of Regents). Additional details on appeals of academic matters can be obtained from the Office of Academic Affairs, 110 Old College, telephone (706) 542-8947. Policies regarding appeals in the Graduate School may be obtained from the Office of the Dean, Room 516, Boyd Graduate Studies Research Center, or by phoning (706) 542-4795.

Student Education Records

The federal Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They include the following:

(1) The right to inspect and review the student's education records, subject to certain specific exceptions. A student wishing to review his/her education records should submit to the registrar, academic dean or other appropriate official a written request that identifies the records he/she wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official will advise the student of the correct official to whom the request should be addressed.

(2) The right to request the amendment of the student's education records. A student may ask the University to amend a record that he/she believes is inaccurate or misleading. The student should write the University official responsible for the record, clearly identifying the part of the record he/she wants changed and specifying how it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his/her right to a hearing as well as the hearing procedures.

(3) The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without the student's consent. One exception is disclosure to other University officials who have been determined to have a legitimate educational interest in the information.

Upon request, the University also discloses education records without the student's consent to officials of another school in which a student seeks or intends to enroll. In addition, directory information may be disclosed without a student's consent unless the student has advised the registrar in writing and he/she wishes to restrict access to this information. "Directory information" includes, but is not limited to, the student's name, address, telephone listing, e-mail address, date and place of birth, major field of study, participation in officially recognized activities and sports, dates of attendance, degrees and awards received and the most recent previous educational agency or institution attended by the student, as well as the weight and height of members of athletic teams.

(4) The right to file a complaint with the U.S. Department of Education concerning the University's alleged failure to comply with FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-4605.

Copies of the complete University policy statement regarding FERPA may be obtained from the Office of the Registrar.

Academic Honesty

Academic integrity is an adherence to a high standard of values regarding life and work in an academic community. Pursuit of knowledge and the creation of an atmosphere conducive to learning are both definite aspects of academic integrity, but its basis lies in the standard of honesty.

Students at the University of Georgia are responsible for maintaining and adhering to the strictest standards of honesty and integrity in every aspect of their lives. Honesty in academic matters is a large part of this obligation. Specific regulations governing student academic conduct are contained in the Student Handbook, and these should be read to avoid any misunderstanding.

Students and faculty who suspect that an act of academic dishonesty has taken place should contact the Office of the Vice President for Academic Affairs.

Research with Human Participants

As a matter of University policy, research projects involving human participants must not be carried out until an application describing the project has been submitted and approved by the Institutional Review Board in the Office of the Vice President for Research. This policy applies to all research, regardless of whether internal, external, or no funding is involved. Failure to obtain this approval for research is a violation of University and federal regulations. Human participation is considered to be involved any time data are collected on individuals even if there is no contact with the participants. The policy extends to all projects involving faculty, staff, students, or facilities of the University, including research performed by students as part of their degree or class requirements. The major professor is responsible for seeing that student projects are approved. Approval is necessary for any type of research in any area of study. Some, but not all, examples include marketing research, behavioral or psychological studies, research involving children in classrooms, and on-the-street interviews.

The detailed guidelines of this policy and the application forms necessary to obtain approval of a research protocol are available on the world-wide-web at http://www.ovpr.uga.edu/hso/ starthso.html. Questions concerning these guidelines may be directed to that office at (706) 542-3199. Projects involving no risk to subjects can usually be approved expeditiously, but it is recommended that the forms be submitted well in advance of the date you would like to begin the research and, if applicable, prior to submitting a proposal for external funding.

Student Services

Housing

There are 17 residence halls on campus which provide a variety of living options to accommodate the housing and academic needs of graduate and professional students.

While the majority of the residence halls operate according to the University's academic schedule, there are four housing facilities that provide continuous occupancy during academic recesses. Morris Hall, which houses 146 male students, Payne Hall, which houses 197 female students, and Reed Hall, which is a co-ed building that houses 296 students, are available to accommodate year-round housing requests. McWhorter Hall, which houses 227 male students, is open continuously during the academic year.

Sixteen of the residence facilities are air-conditioned and Cable TV and local telephone service is provided in every room. Applications for on-campus housing wil be accepted after students have been admitted to the University. Contact the Department of Housing, Russell Hall, The University of Georgia, Athens, Georgia 30602-5575, (706) 542-1421, for additional information.

Additionally, the Family and Graduate Housing Complex at the University of Georgia offers 579 one- and two-bedroom furnished and unfurnished apartments. While these locations are typically occupied by University students who have children or are married, there are a limited number of one-bedroom accommodations available for single graduate and professional students. Applications and additional information may be obtained by writing or calling the Family Housing Office, The University of Georgia, 710 East Campus Road, Athens, Georgia 30602-4622, (706) 542-1473.

Food Services

University Food Services operates four food service facilities for general student use: Bolton Hall, Oglethorpe Hall, Snelling Hall, and the Tate Student Center. With the exception of the Tate Student Center, which operates under a cash only policy, students may pay for each meal on a cash basis or may purchase meal plans on an academic year contract basis. Students who purchase the meal plan enjoy the privilege of unlimited access and unlimited servings as well as the choice of eating in any of the cafeterias. Students are also eligible to participate in special events offered by Food Services. In addition to the major facilities, Food Services provides various cash food outlets throughout the campus. For further information, write the Food Services Business Office, Snelling Hall, The University of Georgia, Athens, Georgia 30602-3772, call (706) 542-1256, or visit the Food Services web site at www.uga.edu/~food-serv.

Transportation

The Campus Transit System, which is funded each semester by a transportation fee paid by all students, provides bus service on a no-fare basis. The buses run on a regular schedule to all parts of the campus and in adjacent residential areas. Furthermore, the City of Athens and the University of Georgia have an arrangement that permits students to ride any Athens Transit System bus without charge upon presentation of University of Georgia identification card. The transportation fee includes a parking permit. All students are allowed to register cars on campus.

University Health Center

Before their arrival on campus, students must complete and return to the University Health Center the University Health Center Report of Medical History which includes a record of their immunizations. Students may not register for classes without documentation for the immunization requirements for new students mandated by the Board of Regents.

The University Health Center offers a comprehensive outpatient health care program to all students who are registered in classes. The Health Center, with its 14 full-time physicians and a complete clinical staff, has regular medical clinics as well as special clinics in acute care, women's health, dentistry, sports medicine, physical therapy, and allergy and travel medicine. Additionally, the Department of Health Promotion offers students preventive health and counseling programs in areas that include: alcohol, tobacco and other substances, campus safety, nutrition, sexual health, and stress management. The department also offers an anonymous HIV counseling and testing program. The Mental Health Clinic offers individual, couples, and group therapy, a comprehensive eating disorders program, a relaxation therapy training room, and consultation, evaluation, and testing services. Supplemental health insurance is available to help cover costs of medical emergencies away from campus or beyond the scope of care available at the Health Center. For more information, write the University Health Center, The University of Georgia, Athens, Georgia 30602-1755, or call (706) 542-1162.

Career Planning and Placement

The Office of Career Planning and Placement in Clark Howell Hall assists students in exploring career opportunities and in formulating a job search campaign. It offers a comprehensive placement service, including campus interviews with prospective employers, job vacancy listings and referrals, credentials files, and continuing career counseling for students and alumni. In conjunction with these efforts, schools and departments have their own services which put students in touch with prospective employers in specific fields of study.

Students may contact the Student Employment Service in Clark Howell Hall for help in finding part-time work on campus, employment in the Athens community, and summer or vacation work. Assistance from this office is also available in finding full-time employment for students' spouses. For information, call (706) 542-3375.

Non-academic employment at the University is handled through the Employment and Employee Relations Department, Human Resources Building, S. Jackson Street, The University of Georgia, Athens, Georgia 30602-4135. For information, call (706) 542-2623.

Disability Services

The mission of Disability Services (DS) is to create an accessible academic, social, and physical environment for students with disabilities at the University of Georgia. DS seeks to eliminate attitudinal barriers that exist on campus and serves as an advocate for students with disabilities. DS also encourages students to develop in-

dependence and responsibility as they participate in university life.

DS provides services to students who have either a physical or mental impairment which substantially limits one or more major life activities, ie. ADD/ADHD, cerebral palsy, hearing impairments, psychological disorders, quadriplegia, acquired brain injuries, cardiac disease, deafness and blindness. To qualify for services, student must have a verifiable disability by providing current documentation from a qualified health professional.

DS provides a variety of academic and support services to ensure equal access to university programs and activities. DS also provides assistive devices and state-of-the-art adaptive computer equipment specifically designed for people with disabilities.

Centrally located on the first floor of Clark Howell Hall, DS is open M-F from 8 am to 5 pm. For more information, call (706) 542-8719 or visit our web site at: http://iris. dissvcs.uga.edu/~web/.

Campus Security

Each year the University of Georgia publishes a campus security report. This report contains information on campus safety programs as well as advice on crime prevention and the procedures to follow in reporting crimes. The report also contains statistics about crimes on campus during the last three calendar years. This report is available upon request from the Office of Graduate Admissions, The University of Georgia, Athens, Georgia 30602-7402, (706) 542-1787.

Financial Information

Expenses

The University of Georgia converted from the quarter system to the semester system beginning Fall 1998. Matriculation fees for the semester system are determined in April of each year, after the printing of this bulletin. For semester fee information, visit the Graduate School web site at http://www.gradsch.uga.edu or call the Banking and Trust Department, (706) 542-1625. The web site will be updated with semester information as it becomes available.

The current (1998-99) estimate cost of education for a Georgia resident is $12,510 per academic year. This estimate includes tuition and fees, books and supplies, room and board, insurance, and personal expenses. An additional out-of-state fee assessed of all non-Georgia residents increases this estimate to $20,390. These estimates do not include travel.

Students who hold a graduate assistantship pay a matriculation fee of $50 per academic year of two semesters, payable $25 at the beginning of each semester. This figure is based on the minimum registration for a graduate assistant of nine hours each semester. Nonresident fees are waived for these graduate assistants. Students holding graduate assistantships must also pay the activity, athletic, transportation, and health fees.

The doctoral candidate must pay a $50 microfilm fee. Those students pursuing degrees requiring a thesis or dissertation must also pay a binding fee of at least $19.95 for the three copies retained by the university.

Agencies sponsoring regularly enrolled students who receive special academic programming or administrative services are expected to pay fees in addition to those normally charged for the usual administrative services. While rates charged will be determined by contract arrangements, the scheduled fees for such services will be $125 per semester, payable in U.S. dollars only.

All fees at the University are subject to change at any time as approved by the Board of Regents.

Fee Refunds/Repayments

In order to receive a refund of fees due to withdrawal from school, students must contact the Office of the Vice President for Students Affairs and formally withdraw. (Note: Withdrawal from school cannot be accomplished through drop/add after the first day of class). Students who formally withdraw from the University on or before the first day of class are entitled to a refund of 100 percent of fees paid for that term; withdrawal after the first day of class but before the end of the first 10 percent (in time) of the period of enrollment, 90 percent; withdrawal after the first 10 percent (in time) of the period of enrollment but before the end of the first 25 percent (in time) of the period of enrollment, 50 percent; withdrawal after the first 25 percent (in time) of the period of enrollment but before the end of the first 50 percent (in time) of the period of enrollment, 25 percent. Refunds will be made at the end of the term. No refunds for reduction in hours after the drop/add period are allowed unless such reduction is the fault of the University.

The following are not entitled to any refund of fees paid: students who withdraw after the first 50 percent (in time) of the period of enrollment, students suspended for disciplinary reasons, students who leave the University when disciplinary action is pending, or students who do not formally withdraw.

Students attending the University for the first time who receive assistance under Title IV of the Higher Education Act of 1965 as amended are entitled to a pro-rata refund of that portion of the tuition, fees, room and board, and other charges assessed the student by the institution equal to that portion of the period of enrollment for which the student has been charged that remains on the last day of attendance by the student up to the sixty percent point in time in the period of enrollment. In the event a student receives Title IV aid and fails to complete registration and/or fee payment for the academic term for which financial assistance was awarded, the full amount of the Title IV aid received must be repaid immediately. In the event a student receives Title IV aid, completes registration, and subsequently reduces his/her enrollment status or withdraws, the amount of funds to be returned to the Title IV programs will be in accordance with federal regulations concerning refunds and repayments to the Title IV programs.

All refunds, up to the amount of the aid received for the term, will be returned to the Title IV programs according to the following priority:

1. Federal Family Educational Loans
2. Federal Direct Student Loans
3. Federal Perkins Loans
4. Other federal sources of aid
5. Other state, private, or institutional aid
6. Student

All repayments, up to the amount of the aid received for the term, will be returned to the Title IV programs according to the following priority:

1. Federal Perkins Loans
2. Other federal sources of aid
3. Other state, private, or institutional aid

Academic Common Market

The University of Georgia participates in the Academic Common Market, an agreement among states in the southern region for sharing unique academic programs. Residents of the participating states who qualify for full (unconditional) admission to the specified graduate degree program and who are approved by their state coordinator may enroll at the University of Georgia on an in-state tuition basis.

To qualify for waiver of the non-resident fee, a student must establish eligibility for participation in the Academic Common Market by the midpoint of each semester. Eligibility is not retroactive to previous academic terms.

For further information about the Academic Common Market, persons should contact the Graduate School (706) 542-4795, or the Southern Regional Education Board, 1340 Spring Street, N.W., Atlanta, Georgia 30309.

Classification of Students for Tuition Purposes

With respect to resident/nonresident student classification, University System policies provide:

1. (a) If a person is 18 years or age or older, he or she may register as an in-state student only upon a showing that he or she had been a legal resident of Georgia for a period of at least twelve months immediately preceding the date of registration.
   (b) No emancipated minor or other person 18 years of age or older shall be deemed to have gained or acquired in-state status for tuition purposes while attending any educational institution in this State, in the absence of a clear demonstration that he or she has in fact established legal residence in this State.
2. If a person is under 18 years of age, he or she may register as an in-state student only upon a showing that his or her supporting parent or guardian has been a legal resident of Georgia for a period of at least twelve months immediately preceding the date of registration.
3. If a parent or legal guardian of a minor changes his or her legal residence to another state following a period of legal residence in Georgia, the minor may continue to take courses for a period of twelve consecutive months on the payment of in-state tuition. After the expiration of the twelve-month period, the student may continue his or her registration only upon the payment of fees at the out-of-state rate.
4. In the event that a legal resident of Georgia is appointed as guardian of a nonresident minor, such minor will not be permitted to register as an in-state student until the expiration of one year from the date of court appointment, and then only upon a proper

showing that such appointment was not made to avoid payment of the out-of-state fees.

5. Aliens shall be classified as nonresident students; provided, however, that an alien who is living in this country under an immigration document permitting indefinite or permanent residence shall have the same privilege of qualifying for in-state tuition as a citizen of the United States.
6. Waivers: An institution may waive out-of-state tuition for:
   (a) nonresident students who are financially dependent upon a parent, parents, or spouse who has been a legal resident of Georgia for at least twelve consecutive months immediately preceding the date of registration; provided, however, that such financial dependence shall have existed for at least twelve consecutive months immediately preceding the date of registration;
   (b) international students, selected by the institutional president or his authorized representative, provided that the number of such waivers in effect does not exceed one percent of the equivalent full-time students enrolled at the institution in the fall semester immediately preceding the semester for which the out-of-state tuition is to be waived;
   (c) full-time employees of the University System, their spouses, and their dependent children;
   (d) medical and dental residents and medical and dental interns at the Medical College of Georgia;
   (e) full-time teachers in the public schools of Georgia or in the programs of the State Board of Technical and Adult Education and their dependent children. Teachers employed full-time on military bases in Georgia shall also qualify for this waiver;
   (f) career consular officers and their dependents who are citizens of the foreign nation which their consular office represents, and who are stationed and living in Georgia under orders of their respective governments. This waiver shall apply only to those consular officers whose nations operate on the principle of educational reciprocity with the United States;
   (g) military personnel and their dependents stationed in Georgia and on active duty unless such military personnel are assigned as students to System institutions for educational purposes;
   (h) selected graduate students at University-level institutions;
   (i) students who are legal residents of out-of-state counties bordering on Georgia counties in which an institution of the University System is located and who are enrolled in said institution.
7. A student is responsible for registering under the proper residency classification. A student classified as a nonresident who believes that he/she is entitled to be classified as a legal resident may petition the Registrar for a change in status. The petition must be filed no later than sixty (60) days after the semester begins in order for the student to be considered for reclassification for that semester. If the petition is granted, reclassification will not be retroactive to prior semesters. The necessary forms for this purpose are available in the Registrar's office.
8. Questions concerning classification for fee-payment purposes should be directed to one of the following persons:
   Graduate applicants for admission:
   Director of Graduate Admissions
   534 Boyd Graduate Studies
   Research Center
   Currently enrolled students:
   Assistant Registrar
   105 Academic Building

Financial Assistance and Awards

More than 2,800 graduate students receive some form of financial assistance from the University. Persons holding an assistantship pay a reduced matriculation fee of only $25 and a modest activity fee (currently $310) each semester. Recipients of these awards must be fully admitted to the Graduate School in a degree-seeking status. For additional information and application procedures, contact the graduate coordinator of the department.

General University Awards

Graduate School Assistantships

The Graduate School each year selects university-wide graduate assistants from a list of highly qualified students who are nominated by their major departments. Each nominee is evaluated by a faculty panel in early March. Selections are based on the applicant's academic

record, test scores, recommendations, and other pertinent information.

Predoctoral Assistantships
Predoctoral assistantships are awarded on a competitive basis to faculty members of Georgia colleges upon nomination by the president of the college in which they are teaching. The stipend is approximately $12,600 per academic year. Recipients are expected to have no work obligation to their home institution and enroll for full-time graduate work. Nominations should be made to the Director of the Institute of Higher Education, The University of Georgia, by February 15 of each year.

Regents' Waivers of Out-of-State Tuition
The Graduate School awards out-of-state tuition waivers to students who are classified as nonresidents of the State of Georgia. The awards are based upon applicants' academic records and the recommendations of their major departments. The waiver renews each semester contingent upon recipients earning at least a 3.50 graduate grade point average on 12 hours of graduate course work. These awards waive only the nonresident portion of a student's tuition. Students interested in being nominated for this award should contact the graduate coordinator in their major department.

Regents' Opportunity Scholarships
The Regents' Opportunity Scholarships were established by the Georgia General Assembly in 1978 to assist certain economically disadvantaged students who have been accepted for admission as incoming graduate or professional students enrolled in institutions of the University System. Students must be residents of the State of Georgia. The scholarships are awarded in the amount of $5,000 per year and are renewable. Students must maintain good academic standing and full-time status. Priority is given to renewals. Application must be made by April 1. Applicants should contact the dean of the appropriate academic college/school for additional information.

Departmental Assistantships and Awards

A variety of fellowships, scholarships, and assistantships are awarded by the various departments and divisions of the University. The amount of the award and the expected work required vary from department to department. Deadlines for submitting applications for departmental assistantships also vary among departments. Students holding graduate assistantships that require nine hours of work per week must register for a minimum of nine hours of course work to be eligible for the reduced matriculation fee. For information concerning these awards contact the appropriate department.

Teaching or Research Assistantships
These assistantships carry stipends ranging from $4,000 to $13,350 depending on the qualifications of the applicant, period of appointment, and the amount of work specified. Application should be made to the student's major department.

Academy of American Poets Prize
This award is given annually to a student in the Department of English whose poetry is deemed by a faculty committee to be outstanding. It is made as part of the University and College Prize Program, founded in 1955, established to encourage interest in poetry and writing among college students. At The University of Gerogia, the prize is given in memory of Virginia R. Walter, an undergraduate English major from Savannah. The prize has a value of $100.

The Gilles and Bernadette Allard Geology Award Fund
This fund was established at the University of Georgia Foundation to provide awards to support geology graduate students for field related research expenses. The fund was initiated by Dr. Jeff Reid (PhD, UGA, 1981) upon the retirement of Professor Allard. The award is given each spring to a geology graduate student by the department head, based on the recommendation of the Geology Admissions and Awards Committee. Students must apply for the award by submitting a one-page project description along with a faculty letter of support.

School of Art Scholarships
Betty Cabin Scholarship. This scholarship is designated to assist a worthy student majoring in any program of the school. In most instances, it is awarded to an undergraduate, but in exceptional cases, it may be awarded to a graduate student.

Vince Dooley Scholarship. This scholarship is awarded to assist a worthy student majoring in any program of the school. In most instances, it is awarded to an undergraduate, but in excep-

tional cases, it may be awarded to a graduate student.

Mary Rosenblatt Graduate Award. This scholarship was established primarily to assist students who are planning a career in teaching; however, it is not limited to students majoring in art education.

Dorothy H. McRae Ceramic Arts Scholarship. The purpose is to provide scholarships to outstanding graduate students in the ceramic area based on excellence of work and academic record.

When sufficient earnings are available in any of the scholarship funds, the school may offer more than one award.

The Dolores E. Artau Scholarship in Romance Languages
Two awards of approximately $1,000 are given annually to doctoral students enrolled in the Department of Romance Languages.

Best Student Paper Award—Institute of Ecology
Papers must have been accepted for publication in a professional journal. There are two categories, basic ecology and applied ecology, and one award ($150) is given for each category. The names of winners are engraved on a plaque in the Institute of Ecology.

Kathryn S. Bigham Scholarship Fund
The purpose is to provide scholarship awards to graduate students and prospective graduate students with financial need. Special consideration will be given to international students. Applicantions should be made to the dean of the School of Social Work.

Biological and Agricultural Engineering Graduate Assistantship Enhancement Award
The award is given to distinguished students who have demonstrated outstanding creativity and innovation, academic preparedness, and leadership in professional, extra-curricular and co-curricular activities. The award provides an enhancement to assistantship at $100.00 or $150.00 or $250.00 per month starting on September 1 for a maximum period of twelve months. A recipient may be renominated for the following year. Nominations are due on August 1 to the Graduate Coordinator, Biological and Agricultural Engineering Department. Contact the Graduate Coordinator for additional information at <gradprog@bae.uga.edu>.

The Alvin B. Biscoe Fellowship
This fellowship was established in 1967 by Mrs. Helen Biscoe in memory of her husband. Dr. Biscoe served as dean of the Terry College of Business from 1945 to 1949 and later as dean of Faculties of the University. This fellowship is awarded annually to two outstanding entering doctoral students in the Terry College of Business. Awards are based on scholastic achievements and professional potential.

Coral Jo Bishop Fellowship
(The Little Red School House for Special Children, Inc.)

The purpose of this fund is to create the Coral Jo Bishop Fellowship, which shall be an annual fellowship to one or more students who are candidates for the Master of Education degree in the Department of Special Education, College of Education.

Teresa and Robert Blumberg Scholarship
This scholarship was established to recognize students for academic achievement and professional potential. The scholarship is awarded annually to an outstanding MBA assistantship recipient. The award is based on scholastic achievements and is a supplement to the assistantship stipend.

William K. Boardman Memorial Award
This award was established by Dr. Katherine B. Boardman in memory of her husband, who was Professor of Psychology. An outstanding advanced student in the Clinical Psychology Program is selected each year. The award includes a cash prize of $100.

Ray E. Bruce Academic Support Fund
The purpose of this fund is to provide study grants each year to students who are enrolled in the Department of Educational Leadership to support research activities. Awards are made by the department head, in consultation with other faculty, on the basis of academic excellence and the promise of the study making a significant contribution to the field of education. Further information concerning procedures for application can be obtained from the Department of Educational Leadership.

Glenn and Helen Burton Feeding the Hungry Scholarship
The College of Family and Consumer Sciences offers this scholarship to doctoral students holding assistantships whose research involves

human nutrition, or crop breeding for food or feed. The scholarship has a value of $2,500 and is renewable.

James L. Carmon Scholarship
This scholarship honors the late Dr. James L. Carmon, who was assistant to the president of the university for computing activities and assistant vice chancellor for computing systems in the University System of Georgia. The Carmon Scholarship is awarded in the fall semester to a graduate student in the arts, humanities, or sciences whose thesis/dissertation research involves an innovative use of computers. The scholarship will provide a $2,000 stipend for one academic year. Recipients of the award are eligible to apply in subsequent years. Only full-time graduate students in good standing at either the master's or doctoral level are eligible. The recipient must have completed three semesters of graduate school and have selected a thesis research project. Further information may be obtained by contacting the Office of the Vice President for Research, (706) 542-6512.

Elmer Jackson Carson Memorial Scholarship Fund
Through a gift from Mr. and Mrs. Charles Ferdinand Carson, Jr., an academic year scholarship will be awarded for graduate study in the area of reading education. The scholarship will be awarded each academic year in the amount of $750. The award will be paid to the recipient at the beginning of each semester. A letter of application, including three (3) letters of recommendation from persons who can attest to the applicant's academic potential and commitment to reading education must be submitted to the department.

Department of Chemistry—Outstanding Teaching Assistant Awards
These awards are supported by a gift from Dr. Kenneth W. Whitten. $1,000 is awarded to outstanding teaching assistants in the Department of Chemistry each year.

Department of Classics Summer Tuition Reductions and Scholarships for Latin Teachers
Limited scholarship assistance is available to Latin teachers enrolled in the department's Georgia Classics Summer Institute; in addition, teachers from out of state are awarded waivers reducing tuition for the Institute to the in-state level. Inquiries should be sent, no later than February 1, directly to the Department of Classics.

Jerome L. Clutter Memorial Fellowship
This fellowship was established in 1983 by the Clutter Family and the University of Georgia in memory of the late Dr. Jerome L. Clutter. The purpose of this fellowship is to encourage superior students to pursue a graduate program in forest biometrics or timber management. The stipend is $5,000 for the academic year. Application information is available from the Office of the Associate Dean, School of Forest Resources. Applications must be received prior to July 1.

The Edward T. Comer Fellowships
The Comer Fellowships of $2,000 are awarded on a competitive basis to new and current PhD students in business administration. Students are nominated by their departments for these non-service fellowships, and selection is based on merit.

Thomas F. Comer Scholarship
This scholarship is available to a master's degree student who will be offered an assistantship. Applicants must have been accepted in the College of Family and Consumer Sciences, have a minimum GPA of 3.0 and have a minimum GRE score of 1000. A written statement about the applicant's professional goals and the need for financial assistance to achieve them must accompany the application. The scholarship has a value of $500.

Charles L. Darby Award
This award is given annually for excellence in instruction to the outstanding graduate teaching assistant in the Department of Psychology.

Maurice Doan Memorial Scholarship
The Maurice Doan Memorial Scholarship was established by friends and former students of the late Maurice Doan, a University of Georgia doctoral student in Risk Management and Insurance. Up to $500 per year can be awarded to a current Insurance doctoral student who exhibits outstanding teaching abilities and concern for students.

Distinguished Teaching Award—Institute of Ecology
Graduate teaching assistants are nominated by their students for this award. One award of $100

is gven each year. Their name is engraved on a plaque in the Institute of Ecology.

Dowden Center for New Media Studies Doctoral Dissertation Grant
This program is open to any student currently enrolled in a doctoral program at an accredited university or college which requires a dissertation to complete degree requirements. The program will consider research proposals dealing with the economic, social, political, legal, business, or historical aspects of cable television and other related technologies. A $500 award will be given to defray expenses incurred while doing dissertation research. Proposals must be received by May 15. Applications are available in the Director's Office, Dowden Center for New Media Studies, College of Journalism and Mass Communication.

A.S. Edwards Award
The student is chosen for excellence of scholarship, meritorious conduct, service to the Psychology Department, and future promise as a scholar. This award was established by the University of Georgia Chapter of Psi Chi to honor Austin Southwick Edwards, Head, Department of Psychology, 1916 to 1951. The award includes a cash prize of $200.

Faculty Development in Georgia
The Faculty Development in Georgia program assists in the professional development of faculty members in Georgia s colleges and universities. Assistantships and tuition waiver are awarded on a competitive basis for full-time doctoral study at the University of Georgia. To participate, an applicant must be nominated by their college president, receive a year's leave of absence from the home institution, and be accepted to a doctoral program of study at the University of Georgia. Faculty members of public and private institutions are eligible for the award. Each semester recipients participate in a seminar focusing on teaching and learning offered by the Institute of Higher Education. For additional information, contact the Institute of Higher Education, (706) 542-3464 or (706) 542-2316.

June and Bill Flatt Nutrition Excellence Scholarship
This scholarship is presented to a graduate student in Foods and Nutrition who has excelled academically, possesses strong research interests, and shows promise of leadership in the field. Recipients will have demonstrated service and involvement in extracurricular activities. Value $1250.

Food Science and Technology Special Awards
In addition to normal graduate research and teaching assistantships, two graduate scholarships are available from the Department of Food Science and Technology. The Association of American Candy Technologists scholarship offers $1,000-$2,000 to students interested in a career in candy technology. Applications are due by April 1. The John J. Powers scholarships ($1,000-$2,000) are for food science graduate students displaying leadership character. These applications are due April 1. Exceptional graduate students also may apply through the department head for fellowships ($1,000-$10,000) from the Institute of Food Technologists.

Hazel and Gene Franklin Scholarships
Three scholarships are available. Applicants must be registered in the College of Family and Consumer Sciences and have at least two semesters remaining in their degree programs. Evidence of academic excellence and professional commitment must be presented by the applicant. These scholarships have a value of $500 each.

Gamma Iota Sigma Scholarships
Various members of the Georgia Insurance industry have contributed to the Gamma Iota Sigma Scholarship. Up to five $600 scholarships are awarded each year. The risk management and insurance faculty, at its discretion, may supplement this scholarship for an additional $400. The maximum award is $1,000.

Genetics Predoctoral Training Grant, National Institutes of Health
These fellowships for graduate study in the area of genetics carry a stipend of $14,040 for a twelve-month period and, in addition, include provisions for reimbursement of tuition and fees, certain travel expenses, and limited funds for research support. Application should be made to the Graduate Coordinator, Department of Genetics.

Georgia Bankers' Association Scholarship
This scholarship was established in 1978 by the Georgia Bankers' Association to recognize academic achievement and potential in a banking career. Students holding a master's level assistantship through the Terry College of Business

and specializing in the field of banking and finance are invited to apply for the $500 scholarship. Application should be made to the Director of Graduate Programs, Terry College of Business. Selection of recipients is made by a faculty committee.

Georgia Feed and Grain Association Graduate Fellowship in Animal Nutrition
This fellowship of $2,000 is awarded annually to a U.S. citizen who is a graduate student in animal nutrition or in animal and dairy science, poultry science, or crop and soil sciences. Funds for the award are provided by the Georgia Feed and Grain Association. This nonrenewable fellowship is in addition to and independent of any other financial support.

Georgia Review Editorial Assistantship
Awarded annually to an outstanding graduate in the Department of English, this nine-month assistantship pays a monthly stipend and includes a waiver of tuition. The assistant works with the staff of the Georgia Review and assists in various editorial duties. One third-time service is required, with a maximum course load each semester of nine hours. The competition for this award occurs each winter, and the winner is selected by the editor and staff of the Review.

O. William Gottlieb Scholarship
This scholarship was established by O. William Gottlieb to recognize academic achievement in business administration. The scholarship is awarded annually to an MBA assistantship recipient based on scholastic achievements.

Donald L. Grant Award
This award is given annually to the graduate student chosen for the outstanding master's thesis in the applied psychology program.

Martin J. Hillenbrand Graduate Fellowship
The Martin J. Hillenbrand Graduate Fellowship in the Department of Political Science at the University of Georgia is given to a student who does research within the scope of international relations, global studies, or comparative politics on the subject of transatlantic relations (United States-Germany or United States - European Union). This award, for an incoming student, carries a $10,000 stipend and a tuition and fee waiver.

Department of History Awards
The Thomas Pleasant Vincent, Sr., Award. Up to $1,500 for "distinguished students of history at the undergraduate or graduate level" with "an expressed interest in Georgia history." This award may be given to students in fields other U.S. history, but it does require an "expressed interest" in Georgia history.

The Warner-Fite Award. Up to $1,200, limited to students in American history.

In some years, the Vincent, Sr., award and the Warner-Fite award may be divided among two recipients.

Carl Vipperman Awards for Outstanding Teaching Assistants. $100 apiece (2 or 3 awards per year) for graduate teaching assistantships for outstanding performance in teaching undergraduates.

Nominations from the faculty for these awards are solicited in early May, the deadline for nominations are in late May, and awards are presented in early June. For further information, please contact the graduate coordinator in history at (706) 542-2053.

James D. Horne Scholarship Fund
The purpose is to provide a scholarship to an undergraduate or graduate student in the School of Social Work, selected by the dean and a funding committee, with preference given, but not limited to a student whose major emphasis or practicum is the homeless.

Almonte Howell Fellowship Award
This award was established in memory of Almonte C. Howell, Jr., research professor of music, by his wife, Kathryn, and friends. Its purpose is to provide research support for outstanding and deserving graduate students in musicology. Nominations are initiated by the School of Music and the Almonte Howell Fellowship Committee. The value of the award is $1,000.

Nancy Hailey Hunt and Mary Strickland Hailey Scholarship
This scholarship is available to a master's degree candidate in the College of Family and Consumer Sciences, who has a minimum of 18 semester hours remaining to complete the degree program. Preference will be given to applicants with an expressed financial need. This scholarship has a value of $500.

Ivy-Smyth Entrepreneurial Scholarship
This scholarship is renewable for up to two semesters in the amount equal to fees and tuition for an in-state graduate or undergraduate student. The applicant must work a minimum of 10

hours a week to support their education and have an entrepreneurial spirit.

Martha Jo Walker Johnson Memorial Fund
This fund was established in 1973 by Dr. Richard E. Johnson in memory of his wife. This fund is to provide one or more annual awards to graduate students majoring in social psychology who need financial assistance to complete research projects. Preference is to be given to female students, to be selected by a committee composed of the social psychology program faculty. The award includes a cash prize of $250.

Wilbur P. Jones Scholarship
This scholarship in memory of Wilbur P. Jones is awarded yearly to one or more black students in the School of Social Work who have demonstrated academic excellence and need for financial assistance. Maximum award for a Master of Social Work student is $750 during the first through fourth semesters of enrollment. Maximum award for a Bachelor of Social Work student is $750 in either the junior or senior year of enrollment. Application should be made to Wilbur Jones Scholarship Committee, School of Social Work.

Virginia Wilbanks Kilgore Scholarship
This scholarship is available to either undergraduate or graduate students. GRE scores and cumulative averages in previous work must be documented. To be eligible, applicants must have at least 1100 on the GRE or have a 3.5 grade point average. Value of $2000 first year, renewable at $1000 second year. Six awards are available.

Rosabelle Carr Koelsche Scholarship
This award is open to both undergraduate and graduate students enrolled in the College of Family and Consumer Sciences. Undergraduate applicants should have at least 60 hours of course work remaining in which to complete their program; graduate applicants should have a minimum of 18 hours remaining. These scholarships have a value of $500.

Leisure Careers Foundation Scholarship/Loan Program
The Leisure Careers Foundation, a non-profit organization of the Georgia Recreation and Park Association, awards low interest loans to upperclass undergraduates and graduate students who are pursuing a degree in recreation and leisure studies. Repayment of the loan is cancelled if graduates become employed in Georgia in the field of parks or recreation within one year of graduation. Applications must be full-time students who are pursuing a degree in recreation and leisure studies. Application deadline is May 15. Contact the Department of Recreation and Leisure Studies for further information.

John Sanford Levy Memorial Award in Marine Geology
A fund was established in 1980 in memory of John Sanford Levy, an outstanding graduate student in marine geology, by his wife, Elizabeth, and by his parents, Dr. and Mrs. Alvin Thomas Levy. The income from this fund is used to support graduate students in the Department of Geology in the specific area of marine sciences. In recent years, individual awards have been as much as $1,000. Application should be made to the Department of Geology, through the Marine Geology Committee.

Pauline Lide Scholarship
This fund, established in honor of a retired associate dean, is used to provide financial aid to needy and superior graduate students in the School of Social Work. Applications should be made to the dean of the School of Social Work.

Dean Lindholm Memorial Award
This award provides $300 towards travel to field sites. The name of the recipient is engraved on a plaque in the Institute of Ecology.

H.O. Lund Scholarship
These funds are awarded to recognize excellence in academics and research in entomology. They may include financial enhancement awards.

Martha Love May Memorial Scholarship
This scholarship was established in 1986 by Professor Emeritus Jack T. May in memory of his wife. The stipend of $1,500 is awarded annually to a female student in the School of Forest Resources. The student may be undergraduate or graduate and must have displayed outstanding scholarship in her chosen area of study. Applications must be received by March 1 in the Office of the Associate Dean of the School of Forest Resources.

Carroll Wade McGuffey Scholarship
The purpose of the fund is to provide a scholarship to be awarded to a doctoral student(s) in educational leadership, whose studies will include

research into the impact of the school's physical environment on teacher behavior, pupil behavior and/or pupil learning. Further information concerning procedures for application can be obtained from the Department of Educational Leadership.

The Mekis Scholarship
The Mekis Scholarship is available to outstanding students who wish to pursue graduate study in political philosophy at The University of Georgia. The amount and frequency of the award depend upon the selection committee's judgment of the qualifications of candidates and upon the income produced annually by the Mekis bequest. The amount awarded most recently was $1,000. It is expected that the Mekis Scholarship will be offered in conjunction with other fellowships or assistantships for which the recipient is competitive. For more information contact the Department of Political Science.

David J. Mullen Scholarship
This scholarship fund was established by the family, friends, and students of Dr. David J. Mullen, Sr. The purpose of the fund is to provide scholarship assistance to a doctoral candidate preparing for a public school position in the Department of Educational Leadership. This $1,000 scholarship is non-renewable and is to be awarded during the year of writing the doctoral dissertation. Further information concerning eligibility and procedures for application can be obtained from the Department of Educational Leadership.

Gwendolyn Brooks O'Connell Scholarship
This award will be presented annually to a graduate student with outstanding performance who shows most promise in the instructional area. The candidates must be nominated from their departments and must have been enrolled in the College of Family and Consumer Sciences for at least one semester. The value of the award is $500.

Robert E. Parks Essay Award
This award is given each year to a graduate student in English whose essay is selected by the department faculty as the most distinguished graduate essay of the academic year. The award carries a value of $300.

Archie E. Patterson Scholarship Fund
This scholarship fund was established in 1987 by T&S Hardwoods, Inc., of Milledgeville, in honor of Professor Emeritus Archie E. Patterson. The award recognizes superior scholarship and is available to juniors, seniors, and graduate students enrolled in the School of Forest Resources. The stipend is for the amount of one year's in-state tuition. Applications must be received by March 1 in the Office of the Associate Dean of the School of Forest Resources.

Joe and Diane Perno Memorial Fund
This fund was established by the Perno family in memory of Joe and Diane Perno. The purpose of these awards is to recognize superior students in the School of Social Work. Awards include tuition supplements and research awards. Application should be made to the School of Social Work.

Perryco Fellowships
Perryco Fellowships are available for doctoral students in insurance. These awards are made by the Department of Insurance, Legal Studies, Real Estate and Management Sciences and are available for incoming PhD students.

Phelps-Stokes Graduate Fellowship
The holder of this fellowship must pursue studies in one of the following departments: economics, education, history, political science, social work, or sociology. The recipient must make a scientific study of the role of blacks in American civilization. The value of this scholarship at present is $1,500 a year. Application should be made to the student's major department in the university.

Emily Quinn Pou and Joe (J.W.) Pou Scholarship
This scholarship is open to undergraduate or graduate students currently enrolled in the College of Family and Consumer Sciences having at least two semesters remaining in their degree program. A minimum GPA of 3.0 is required for consideration. A written statement about the applicant's professional goals and how the scholarship may assist in the achievement of these goals must accompany the application. The value of the award is $500.

Charles M. Rose Scholarship
Watt Publishing Company sponsors a scholarship in the name of Mr. Charles M. Rose. This scholarship is made annually to a graduate or undergraduate student in poultry science. Selection is based on scholarship, professional and extracurricular activities, and departmental and

university service. The stipend is $1,000 each year.

Elizabeth T. Sheerer Graduate Scholarship
Available to a deserving graduate student in the Department of Child and Family Development who has excelled academically, has strong research interests and competencies, and shows promise for leadership in the field of Family and Consumer Sciences. The scholarship has a value of $750.

Robert A. Sheldon Scholarship
This award is made yearly to a student in the Institute of Ecology for graduate student summer research. The stipend is approximately $750 each year. Application should be made to the head of the Institute of Ecology.

Gene M. Simons Fellowship Award
The purpose of the fund is to provide fellowship and research support to outstanding and deserving graduate students whose major field of study is music education. Preference will be given to graduate students whose professional and research interests lie in one or more of the following areas: (a) music in early childhood, (b) research in early childhood music; and (c) choral music education. Nominations are initiated by the School of Music faculty and the Gene M. Simons Fellowship Committee.

Martin Reynolds Smith Fund
By the gift of $2,000, Mr. J. Warren Smith established this fund in memory of his son, Martin Reynolds Smith. The interest from this investment is to be used as prizes for excellence in research in chemistry. Applications should be directed to the head of the Department of Chemistry

Charles D. Smock Memorial Award
This award is given annualy to the most promising senior graduate student in the Developmental Psychology Program.

Solitary Glove Award
This award is given to a student in ecology with distinguished contribution to community service. The award is for $500 and the recipient's name is engraved on a plaque in the Institute of Ecology.

Mary Ella Lunday Soule Award
A memorial fund was established in 1979 to honor Mary Ella Lunday Soule, who was head of the Women's Physical Education Department from 1925 to 1960. These funds are awarded to outstanding women students enrolled in the Department of Physical Education and Sport Studies based upon scholastic achievement and professional contributions. Monetary awards are given each year to an undergraduate student, to a master's student, and to a doctoral student.

Tull Teaching Assistantships
Recipients are responsible for teaching accounting principles courses each semester. Guidance is provided by the School of Accounting faculty. The stipend is $4,500. Recipients must be enrolled for a minimum of nine hours.

The Miriam Watts-Wheeler Scholarship Fund
The Miriam Watts-Wheeler Scholarship Fund was established in 1996 by the late, Mr. Harold Elton Wheeler in honor of his wife, the late Miriam Watts Wheeler. The Wheelers were Doner-Friends of the University. Mrs. Wheeler's life long interest in rocks and minerals gave them many years of pleasure as they traveled throughout the United States and abroad gathering specimens for her collection. Mrs. Wheeler was very impressed by University of Georgia and Mr. Wheeler established this fund in her memory. The purpose of the fund is to support graduate students in the Department of Geology, including but not limited to, scholarships, summer stipend support, travel, equipment, and related research expenses. In the past few years, individual awards have been as much as $1,500. Application should be made to the Department of Geology, through the department head and Geology Admission and Awards Committee.

Robert H. West Scholarship
This award is presented annually to an outstanding student working towards a graduate degree in English. It is given in memory of the late Dr. Robert H. West, a member of the department from 1936 to 1974, and department head from 1962 to 1972. The award is made by the faculty of the Department of English.

Karin E. Willis Scholarship
This scholarship is open to both undergraduate and graduate students enrolled in the College of Family and Consumer Sciences. Applicants must have a minimum GPA of 2.75 and the scholarship is renewable. Preference will be given to student athletes, including cheerleaders and twirlers. The value of the award is $500.

Heather Christina Wright Memorial Scholarship Fund
This School of Social Work scholarship fund was established by family and friends in memory of Heather Christina Wright. The purpose of these awards is to recognize students who exemplify the character and enthusiastic spirit of Heather and the desire to dedicate their lives to serving and helping cancer patients and their families.

Florene M. Young Award
Two students are chosen who best represent the ideals of Dr. Florene M. Young. The award process emphasizes both clear merit in the applied science of clinical psychology as well as a strong commitment to helping others. The award was established in 1989 by the clinical psychology program, the Department of Psychology, and the many admirers of Dr. Young in recognition of her pivotal role in establishing a nationally recognized, empirically oriented clinical psychology program at the University of Georgia. Each award includes a cash prize of $300.

The Herbert Zimmer Scholar Awards
Each year an outstanding third- or fourth-year graduate student in each area of specialization in the Department of Psychology is selected to receive a Herbert Zimmer Scholar in Psychology Award. These awards recognize outstanding potential for research and include a cash prize of $100.

Graduate Research Facilities

Centers and Institutes

Artificial Intelligence Center
Director: Dr. Donald Nute, (706) 542-0358.
The Artificial Intelligence Center is a multidisciplinary group dedicated to basic and applied artificial intelligence research, especialy in knowledge representation, expert systems, natural language processing, neural nets, and genetic algorithms. The Center currently administers a master of science program in artificial intelligence. Fellows include faculty from the Franklin College of Arts and Sciences, the Terry College of Business, the College of Agricultural and Environmental Sciences, and the College of Education. The Center has additional Fellows from institutions in North America, Europe, and Australia. Visiting appointments are available to researchers with sabbatical or other support. The Center has a Worldwide Web page at www.ai.uga.edu. For further information, contact the Director, Artificial Intelligence Center, 111 Boyd Graduate Studies Research Center, The University of Georgia, Athens, GA 30602-7415 (dnute@ai.uga.edu). For information about the graduate program, contact Dr. Walter D. Potter at the same address (potter@pollux.cs.uga.edu) or Angie Paul (aspaul@uga.cc.uga.edu).

Center for Advanced Ultrastructural Research
Director: Dr. Mark A. Farmer, (706) 542-4080.
The Center for Advanced Ultrastructural Research serves the University System by providing a repository of facilities and expertise to assist in pursuing research and instructional needs employing light, fluorescence, and electron microscopy. Facilities include two TEMs, a Field Emission SEM, two confocal microscopes, X-ray microanalysis, and image processing and analysis workstations. Formal courses in microscopy are offered through the Division of Biological Sciences.

Center for Applied Isotope Studies
Director: Dr. John E. Noakes, (706) 542-1395.
The Center for Applied Isotope Studies is a multidisciplinary self-supporting research facility focusing on the application of nuclear analytical technology to critical contemporary problems. An emphasis is placed on innovative applied research, including the development of improved methods for low-level and ultra low-level measurement of radioisotopes, a stable isotope program for food/flavor and hydrologic research, an aquatic survey program for environmental and mineral resource applications, development of remote sensing systems for environmental monitoring, and a geohydrology research program. One of the highest priorities of the CAIS is to direct its efforts toward environmental problems and issues with the application of these new analytical methods and technologies. The CAIS also provides analytical services on a fee basis, including radiocarbon dating, stable isotope measurements, trace element determinations, 60Co gamma irradiation of samples, and low-level detection of tritium and other radionuclides for environmental monitoring and assessment. The CAIS plays a strong support role on the UGA campus, assisting academic departments, research units, and individuals with problems related to instrumentation, methods, and techniques in isotopic analysis. Offices and

laboratories are located at 120 Riverbend Road in the CAIS Building.

Center for Archaeological Sciences
Director: Dr. George A. Brook, (706) 542-2354.
The Center for Archaeological Sciences promotes research between the humanities archaeology, anthropology, and art history and the sciences geology, geography, geochemistry, chemistry, and biology. The Center coordinates the research of university scholars in fields relating to archaeology and art history, facilitates collaboration with experts outside the university, serves as a resource center of laboratory equipment and technical support for archaeologists, art historians, and museums worldwide, and coordinates interdisciplinary undergraduate and graduate degree programs in the archaeological sciences.

Center for Asian Studies
Co-Directors: Dr. Thomas Ganschow, (706) 542-2479, and Dr. Shanta Ratnayaka, (706) 542-5356. E-mail: zapem@arches.uga.edu.
The Center for Asian Studies exists to nurture and guide academic programs and exchanges on Asia for students, faculty, and appropriate staff members. While these programs focus on language and area studies, they also involve students and faculty from law, business, agriculture, education, journalism, veterinary medicine, as well as the arts and sciences. Specific purposes and programs focus on (1) curriculum planning, review, and development in modern Asian languages and related area studies; (2) a speakers' and visitors' program of distinguished Asianists to address and exchange ideas with students, faculty, and community on Asian topics; (3) student and faculty exchange agreements such as the ones recently concluded with Kansai Gaidai and Yokohama University in Japan and the established one at Kagoshima University in Japan; (4) development of library and related instructional and research facilities necessary for a credible academic program in Asian studies; (5) planning and application for external funding for Asian Studies at UGA; and (6) research and research collaboration on East Asia. A certificate program in East Asian Studies based on concentration in either Chinese or Japanese is available for graduate students and is administered jointly by CAS and the Center for Global Policy Studies.

Center for Biological Resource Recovery
Director: Dr. Lars G. Ljungdahl, (706) 542-7640.
The Center for Biological Resource Recovery is comprised of investigators from the departments of biochemistry and molecular biology, botany, microbiology, and marine sciences at the university and from the Richard B. Russell Agricultural Research Center. The Center puts special emphasis on the use of enzymes and microorganisms in the pulp and paper industry and in agriculture, but it is also committed to extending the biotechnology required for the use of microorganisms and their enzymes as inexpensive and energy-efficient catalysts for converting our main renewable resource, biomass to desired products, such as fuel and industrial feedstock chemicals. Studies include the physiology, biochemistry, genetics and ecology of bacteria and fungi that are important for biotechnological industries.

Center for Computational Quantum Chemistry
Director: Dr. Henry F. Schaefer III, (706) 542-2067.
The Center for Computational Quantum Chemistry seeks to develop theoretical and computational methods through mathematical models for describing and understanding the movement and function of electrons in molecules and to apply the theoretical methods to significant problems of broad chemical interest. Some of the theoretical methods under development include the configuration interaction, coupled cluster, and Brueckner methods and associated analytic gradient techniques. Additional theoretical work involves density functional theory, the evaluation of electron repulsion integrals, and the treatment of relativistic effects. Currently applications to several areas of chemistry are of special concern: (1) the potential energy hypersurfaces that govern elementary gas phase chemical reactions, including systems pertinent to combustion; (2) fundamental problems in physical organic chemistry involving, for example, carbenes and other biradical species and systems such as the [n] paracyclophanes and [10] annulene; (3) organosilicon chemistry, specifically the prediction and understanding of the properties of silicon analogs of both common and unknown hydrocarbon compounds; (4) hydrogen bonding in systems as complicated as the guanine-cytosine base pair; and (5) the study of molecular anions, including systems pertinent to atmospheric and environmental chemistry.

Center for International Trade and Security
Director: Dr. Gary K. Bertsch, (706) 542-2985.
Center for International Trade and Security (CITS) (formerly the Center for East-West Trade Policy) is an interdisciplinary and inter-university research, teaching, and service project designed to contribute to enlightened trade and security policies. CITS strives to produce policy-relevant research on political, economic, and security issues related to international trade and technology transfer. The center encourages and coordinates collaborative research, teaching, and service-related activities within the university, the state, the nation, and overseas. CITS currently directs international research projects on trade and security issues in the new independent states of the former Soviet Union, in Asia, and in the Caribbean.

Center for Latin American and Caribbean Studies
Director: Dr. Brent Berlin, (706) 542-1452;
Associate Director: Dr. Fausto O. Sarmiento, (706) 542-9079.
FAX: (706) 542-8432; E-mail: clacs@arches.uga.edu; Web site: http://www.uga.edu/clacs/.
The Center coordinates interdisciplinary research, curriculum offerings, and public programs which deal with Latin America and the Caribbean. Through colloquia, conferences, small travel grants for students and faculty, and an undergraduate certificate program, the Center brings together researchers currently engaged in work in Latin America from all colleges and schools of the university.

Center for Metalloenzyme Studies
Co-Directors: Dr. Michael K. Johnson (706) 542-9378; Dr. Michael W. Adams, (706) 542-2060.
The Center for Metalloenzyme Studies was established to encourage interdisciplinary research to determine the roles of metals in biological systems and how metalloproteins are synthesized and regulated. Through collaborative research, discussions, and seminars, new insights are obtained concerning enzymes that catalyze life-supporting processes such as nitrogen fixation, respiration, photosynthesis, sulfur conversions, and hydrogen production. Use of the latest technologies and analytical equipment enables faculty of the center and its postdoctoral and graduate students to investigate the catalytic mechanisms of metalloenzymes at the molecular level. The center faculty organize state-of-the-art courses in inorganic biochemistry, biochemistry, enzymology, fermentation technology, as applied to metalloprotein production, structure, and function.

Center for Remote Sensing and Mapping Science
Director: Dr. Roy A. Welch, (706) 542-2359.
The Center for Remote Sensing and Mapping Science (CRMS) undertakes research and training in the fields of remote sensing, geographic information systems (GIS), photogrammetry, digital image processing, and computer graphics, particularly as applied to the physical and biological sciences. Typical research topics include quantitative methodologies for measuring soil erosion from agricultural lands by photogrammetric techniques, mapping environmental disturbances from aerial photographs and satellite images, development of integrated image processing/GIS software and advanced technologies for monitoring the earth's surface from digital image data. Close associations are maintained with remote sensing organizations and scientists in Canada, Europe, South America, and Asia. The CRMS provides technical assistance to universities and to local, state, and federal agencies.

Center for Simulational Physics
Director: Dr. David Landau, (706) 542-2909.
The Center for Simulational Physics functions as a center for research and training in simulational physics, with emphasis on the use of supercomputers and novel parallel architectures. Because of this work, close interaction with the University Computing and Networking Services is maintained, and collaborative research programs with major institutions in the United States and Europe are developed. The center's staff consists of research and adjunct professors, visiting research scientists, and postdoctoral associates.

Complex Carbohydrate Research Center
220 Riverbend Road; Tel.: (706) 542-4401; Fax: (706) 542-4412. Internet: http://www.ccrc.uga.edu.
Co-Directors: Dr. Peter Albersheim, (706) 542-4404; Dr. Alan Darvill, (706) 542-4411.
The Complex Carbohydrate Research Center (CCRC) includes a U.S. Department of Energy-funded Center for Plant and Microbial Complex Carbohydrates and a National Institutes of Health Resource Center for Biomedical Complex Carbohydrates. The Center's scientists study the structures and functions of the com-

plex carbohydrates of plants, microbes, and animals to determine the role of carbohydrates in growth and development, host-pathogen interactions, and disease processes. The CCRC's 68,000 sq. ft. building is specifically designed for the interdisciplinary and equipment-intensive nature of carbohydrate science. Scientists at the CCRC investigate the chemistry and the physiological, developmental, and molecular biology of complex carbohydrates having biological importance using advanced analytical techniques, including mass spectrometry, nuclear magnetic resonance (NMR) spectroscopy, computer modeling, artificial neural networks, tissue culture, monoclonal antibodies, and recombinant genetics. The CCRC provides analytical services to scientists, conducts four annual extramural hands-on laboratory training courses, and develops computer software to assist the study of complex carbohydrates. MS and PhD students in the Departments of Biochemistry and Molecular Biology, Botany, and Chemistry can apply to conduct their graduate research under the direction of a CCRC faculty member. The Complex Carbohydrate Structure Database and its search program, CarbBank, were written and developed by CCRC scientists under the direction of an international executive board. The database is available on the internet in a Windows95/NT format, currently contains more than 49,000 records, and is updated continuously. CCRC personnel are presently engaged in more than 134 collaborations with scientists in North and South America, Europe, and Japan.

James M. Cox, Jr., Center for International Mass Communication Training and Research

Director: Dr. Lee B. Becker, (706) 542-5023.

The James M. Cox, Jr., Center for International Mass Communication Training and Research serves to facilitate international mass communication training and research programs in which scholars from the United States and foreign countries, students, and mass communication professionals can cooperate. The center helps to coordinate efforts to improve the state of knowledge in the field and to encourage practical training, education, and service projects.

Housing and Demographics Research Center

Co-Directors: Dr. Anne L. Sweaney and Mr. Robert J. Cleveland, (706) 542-4877

The Housing and Demographics Research Center (HDRC) provides sound housing research, promotes a more rational regulatory environment for the building community, and disseminates research findings to policy-makers, interested parties, and the general public. The HDRC was created in partnership with the Research Center of the National Association of Home Builders and was officially recognized as a center in June of 1996. It is part of a network of housing research centers located regionally at major research universities. The faculty have garnered support from the Athens-Clarke County Government, Department of Community Affairs, Georgia Department of Human Resources, Georgia Department of Transportation, the National Association of Housing Counselors and Agencies, Inc., and SMART House Limited Partnership, Inc., among others.

Institute for Behavioral Research

Director: Dr. Rex L. Forehand, (706) 542-1806.

The Institute for Behavioral Research is a multidisciplinary research organization, the purpose of which is to encourage a pooling of the expertise of staff members and graduate students from various departments to attack significant social and behavioral problems at both basic and applied levels.

Staff members are assembled from a variety of departments from the College of Arts and Sciences, College of Education, College of Family and Consumer Sciences, and the School of Social Work. Staff members hold faculty rank in their respective departments and have a joint appointment in the Institute. Many hold research grants or contacts, and research assistants are appointed to further these and other ongoing research efforts. Current activities include research on the family, cognition, and deviance. IBR serves as an "umbrella" for several enterprises: the Survey Research Center, the Center for Research on Behavioral Health and Human Service Delivery, and the Center for Family Research. In addition, there is a Cognitive Studies Group and a Models and Methods Group.

The Institute is housed in Barrow Hall, with ready access to the University Computer Center, a technical library, and related facilities.

The Institute does not confer degrees; however, students interested in the Institute's activities may correspond with the graduate coordinator of any department collaborating with the Institute or with the Director, Institute for Behavioral Research, The University of Georgia, Athens, Georgia 30602-2401.

Institute of Ecology

Director: Dr. C. Ronald Carroll, (706) 542-2968.

The Institute of Ecology was founded in 1961 to promote interdisciplinary research in ecology. The Institute currently administers a master's and doctoral program in ecology and an interdisciplinary master of science program in conservation ecology and sustainable development. A core administrative, technical, and professional staff is supported by state funds. Most of the support for the large research projects and for graduate and post-doctoral students working on these projects comes from grants.

In addition to the faculty of the Institute, a larger affiliated membership represents many academic disciplines, coming from at least 20 University departments or schools. Besides these academic units, members are on the staffs of the Institute of Community and Area Development, the Institute of Government, the Savannah River Ecology Laboratory, and the Marine Science Program. Ecologists from the U.S. Forest Service and U.S. Environmental Protection Agency, who closely interact with Institute scientists, are also members.

The Institute has a long-standing and highly productive research and training relationship with the Savannah River Ecology Laboratory in Aiken, SC, and the U.S. Forest Service's Coweeta Hydrological Laboratory in Franklin, NC. The Institute also has research and academic relationships with the Joseph W. Jones Ecological Research Center in southwest Georgia. Additional field studies are also underway at Cumberland Island National Seashore, Sapelo Island, the Ogeechee River, the McGarity Wetlands, the Coastal Plains Experiment Station, Horseshoe Bend, and the Florida Keys; international field research sites include Costa Rica, Ecuador, Guatemala, Puerto Rico, the Philippines, and Burkina Faso. The Institute supports research in marine and freshwater ecology, radiation ecology, ecological toxicology, evolutionary ecology, conservation biology, landscape ecology, restoration ecology, agroecosystem ecology, and resource management. Graduate students participate in various Institute research projects. Their research usually contributes to their thesis or dissertation.

A special graduate student research program is offered through the University's Savannah River Ecology Laboratory (SREL). Funded by the U.S. Department of Energy, the laboratory is located on DOE's 250,000-acre Savannah River site. The site contains a variety of natural and disturbed habitats. Research is jointly supervised by the student's university research committee and SREL. Stipends are available. A pre-doctoral fellowship program is also available. All participants in SREL's educational program must be U.S. citizens.

Several researchers at the Jones Center hold faculty appointments in the Institute. For students working with these faculty, agreements to share student stipend costs have been made.

For additional information on the Institute of Ecology, contact Dr. C. Ronald Carroll, Institute of Ecology, The University of Georgia, Athens, Georgia 30602-2202. For additional information on the degree programs in ecology, contact Ms. Patsy Pittman, Ecology Program, Ecology Building, The University of Georgia, Athens, Georgia 30602-2202. Persons interested in SREL programs should contact Ms. Jannell Gregory, SREL, Drawer E, Aiken, South Carolina 29802.

Institute of Higher Education

Director: Dr. Cameron Fincher, (706) 542-3464.

Located in the historic and newly renovated Meigs Hall, the Institute of Higher Education is an instruction, service, and research agency of the University of Georgia and works closely with other educational agencies and institutions in cooperative programs dealing with planning, development, and evaluation. The Institute is involved in many activities related to the overall development of higher education and the improvement of institutions and programs. Staff members participate in statewide, regional, and national studies of institutional goals, program development, instructional improvement, and the professional development of administrators and faculty members. Another function includes cooperation with the Graduate School in helping faculty members of Georgia colleges continue their graduate education and to improve their teaching skills. As part of its efforts to analyze and interpret conceptual and operational trends in higher education, the Institute conducts numerous workshops, seminars, and conferences on the campuses of other institutions. Closely related to all Institute activities is a doctoral program specifically designed to study post-secondary education.

Inquiries should be addressed to: Admissions Committee, Institute of Higher Education, Meigs Hall, The University of Georgia, Athens, Georgia 30602-1772.

Institute for Natural Products Research
Director: Dr. S. William Pelletier, (706) 542-5800.
The Institute for Natural Products Research carries out a broad range of research on naturally occurring substances of plant origin, with particular attention to plant species of Georgia and the Southeast. Projects involve research on alkaloids, terpenes, antitumor agents, phytoalexins; the development of new synthetic methods; and the application of modern spectroscopic methods to structure elucidation problems. Research involves the isolation and elucidation of chemical structures of new compounds possibly useful as drugs for the treatment of human disease. The institute serves as a training center for visiting faculty and for postdoctorate and graduate students who are doing research in natural products.

Marine Facilities
Two units of the University of Georgia's School of Marine Programs, the Marine Extension Service and the Marine Institute on Sapelo Island operate extensive coastal facilities available for research and training in marine sciences. In addition, the School of Marine Programs' Department of Marine Sciences operates two freshwater research and educational facilities, one on Clarks Hill Lake at Mistletoe State Park and the other in the Okefenokee Swamp in collaboration with the Okefenokee National Wildlife Refuge.

The Marine Extension Service's education center and shellfish research laboratory are on Skidaway Island, near Savannah. The education center houses a 10,000-gallon teaching aquarium, educational exhibits, lecture rooms, four teaching laboratories, and two research laboratories. A 50-bed dormitory and dining room facility operate in support of the marine education program. The shellfish research laboratory has seawater and tank systems to hold brood stock, constant-temperature rooms to control spawning, and illuminated temperature-controlled chambers for maintaining stock algal cultures and mass algal culture systems. A modern, solar-efficient greenhouse was added in 1989 to produce algae. The Skidaway branch of the UGA Science Library occupies 6100 sq ft and has holdings of 18,000 volumes and 200 marine-related journal subscriptions. The Seadawg, a 42-ft converted lobster boat, makes about 300 short cruises a year in support of the education and research programs.

Other Marine Extension Service facilities include a fisheries research station on the waterfront in Brunswick. The 15,000-sq-ft Center for Fisheries Research was recently augmented with conference rooms and flexible space for conducting seminars and short courses, as well as additional laboratories for research addressing the problems of seafood processors and harvesters. The 73-ft research vessel, Georgia Bulldog, is based at the Center and used for gear research and marine biological sampling purposes.

The University of Georgia Marine Institute is located on Sapelo Island in a setting of diverse natural marine habitats. The Institute is a valuable resource, both in terms of research on the estuarine and nearshore environment and in implementing the training of students. Additional financial support is provided by the Sapelo Foundation, a private, charitable, nonprofit organization founded by the late Mr. R. J. Reynolds.

The Institute's resident staff consists of about 10 scientists, who hold appointments as adjunct professors in the Department of Marine Sciences, as well as a number of technical and support personnel. Members of the campus faculty and students, as well as scientists and students from other institutions, are in periodic residence at the Institute. Field trips and graduate research by campus-based groups are encouraged. Current research programs include energy flow, nutrient cycling, and factors regulating the metabolism of the salt marsh and nearshore ecosystems.

In 1976, under the Coastal Zone Management Act of 1972, the nation's second estuarine sanctuary was established encompassing the southern portion of Sapelo Island, the Duplin River, and adjacent wetlands and surrounding areas. The primary purpose of the sanctuary was to provide a natural area so that ecological relationships can be studied over the long term. The sanctuary is now known as the Sapelo Island National Estuarine Research Reserve and is managed by the Georgia Department of Natural Resources and funded by the National Oceanic and Atmospheric Administration.

In addition to the School of Marine Programs' coastal facilities, all of which are available for student research and training, the Department of Marine Sciences also maintains extensive research and instructional laboratory facilities on the main campus in Athens. These are equipped to conduct research on a wide range of marine-related physical, biological, chemical, and geological topics as well as on marine and coastal law and policy.

The department recently established an aquatic instructional and research station 90 minutes from Athens at Clarks Hill Lake, a large reservoir on the Savannah River near Augusta. The station has a 1000 sq. ft. instructional activities building, and is home base for small boats. The department also operates the 39 ft. research vessel Underdog, used to train students in marine and aquatic measurements and sampling techniques.

The Department of Marine Sciences maintains laboratory, office, and limited dormitory space in a modern modular building at the Okefenokee National Widlife Refuse near Folkston, GA. The facility is operated in collaboration with the U.S. Fisheries and Wildlife Service and provides access to a wide range of open water, marsh, swamp, and upland wilderness habitats in the Okefenokee Swamp Ecosystem.

McPhaul Child and Family Development Center

Curriculum Coordinator: Dr. Lily Paguio, (706) 542-4929.

The McPhaul Child and Family Development Center provides developmentally appropriate programs for both university and community families with children 6 months to 5 years. Both half- and full-day programs are available. Half-day programs are for infants, toddlers, two-year old children as well as four-year old children in the Head Start program. Full-day programs exist for three- and for four-year-old children in a state-funded Pre-Kindergarten classroom. Children with a disability are served throughout the Center. The purpose of the center's programs are: (1) to provide training opportunities for university students in the Department of Child and Family Development as well as other academic units to observe and interact with young children and their families; (2) to conduct research on the development of children and families and ways to optimize their development; and (3) to provide a quality developmental program for young children and to channel other resources of the College of Family and Consumer Sciences to families.

Poultry Diagnostic and Research Center

Director: Dr. Stanley H. Kleven, (706) 542-5644.

The Department of Avian Medicine carries out basic and applied research programs on the diseases which are of economic importance to the poultry industry of Georgia. Diagnostic, laboratory, and consultative services are provided to individuals and groups in all phases of poultry production.

Dean Rusk Center for International and Comparative Law

Director: Professor Thomas J. Schoenbaum, (706) 542-5140.

The Dean Rusk Center for International and Comparative Law was founded in 1977 as part of the School of Law to improve the effectiveness of relations among citizens, private sector entities, and government at the local, state, federal, and international levels. Using advanced electronic information-processing techniques, the center's professional staff and part-time researchers mobilize university, business, and governmental resources to develop theoretical and practical approaches to improve the efficiency of governance, trade, and investment. On occasion the center also helps implement the approaches by providing the private and public sectors with essential manpower and information. In the past the Dean Rusk Center has developed several major initiatives for federal action concerning North American cooperation and overseas trade regulation and representation. It also has analyzed new approaches for expanding Georgia agricultural exports. The center publishes research reports, holds conferences, and sponsors research for Georgia citizens that cover fiscal and monetary policy, international arrangements, and domestic affairs.

Torrance Center for Creative Studies

Director: Dr. Juanita Matthews-Morgan, (706) 542-5104.; e-mail: nitamm@arches. uga.edu; or www.coe.uga.edu/edpsych/ docs1/gifted/docs1/torrance.html.

The mission of the Torrance Center for Creative Studies is to promote scholarly inquiry into the study, development and evaluation of gifted and creative abilities in individuals from diverse age-groups, cultures, and economic backgrounds. Center activities are primarily designed to facilitate the completion of practica and internship requirements by graduate students majoring in gifted and creative education. To signify completion of practicum and internship requirements, graduate students develop portfolios that contain records of the balanced set of experiences they have had in teaching, basic and applied research, and outreach. University of Georgia faculty, both inside and outside the Department of Educational Psychology and other local, state, regional, national, and international scholars are also involved in the research, instructional, and outreach (ser-

vice) activities promoted through the Center. These activities include the Challenge Programs, the Future Problem Solving Program, and the E. Paul Torrance Lecture.

The Center maintains a comprehensive data base of information on giftedness, creativity, and futures studies from three major sources: (a) the clients who participate in Center programs and activities; (b) the work of Gifted and Creative Education faculty; and (c) the work of Dr. E. Paul Torrance, a pioneer in research on creativity, giftedness, and futures studies, and the person for whom the Center is named.

Research Organizations

Oak Ridge Associated Universities

Since 1948, students and faculty of the University of Georgia have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education, the DOE facility that ORAU manages, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the Resource Guide, which is available at the worldwide web at http://www.orau.gov/ orise/resgd/ htm, or by calling either of the contacts below.

ORAU's Office of Higher Education Initiatives seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Junior Faculty Enhancement Awards and the Visiting Industrial Scientist Program, and various services to chief research officers.

For more information about ORAU and its programs, contact Mr. Kirk D. Bertram, ORAU Council member, at (706) 542-3184; contact Monnie E. Champion, ORAU Corporate Secretary, at (423) 576-3306; or the ORAU home page at http://www.orau.gov.

Organization for Tropical Studies

The Organization for Tropical Studies (OTS), a nonprofit scientific and educational corporation, was formed in 1963 by a group of educational institutions that have a long history of interest in developing tropical science. The fifty-six member institutions, which include Universidad de Costa Rica, University of California, University of Connecticut, Duke University, University of Florida, The University of Georgia, Harvard University, University of Hawaii, Indiana University, University of Kansas, Louisiana State University, University of Miami, University of Michigan, Michigan State University, University of Missouri, North Carolina State University, University of Ohio, Stanford University, Smithsonian Institution, University of South Carolina, Texas Technological College, University of Washington, and University of Wisconsin, are dedicated to the purpose of developing a sound educational and research program with adequate facilities and support to provide the base support for a massive effort in solving problems in tropical science. Initial emphasis was placed on biological sciences and closely allied fields, but activities have been expanded gradually to include other fields in which study may be most effectively carried out in the tropics.

The initial objectives of the OTS are:

1. to provide a sound formal educational base in tropical biology available to all interested students and scientists in the Americas;
2. to contribute to the education of students and scientists by providing basic background and facilities for tropical research;
3. to develop an educational center that will provide fundamental insight into the principles of tropical biology;
4. to develop an educational center that will provide an intellectual resource in science for the hemisphere; and

5. to stimulate and assist programs of education and research throughout the tropics, primarily through the education of competent tropical scientists.

To implement these objectives, OTS has established an educational center for tropical studies in Costa Rica. Central headsemesters are in San Jose in association with the campus of the Universidad de Costa Rica, but the entire republic serves as a classroom and laboratory. Establishment of a network of field stations in appropriate tropical habitats where classes may meet continuously from one to several weeks is an integral feature of OTS planning. OTS is committed to the concept that in order to solve the problems of tropical education and meet the goals of the organization it is necessary to maintain a continuing program of course work presented in a rigorous and organized manner. Coordinated with the course program must also be a program of research to ensure maximum intellectual challenge.

Enrollment in OTS courses is based on national competition, with graduate students and recent postdoctoral faculty selected on the basis of academic record and interest in tropical studies. Descriptions of regularly presented courses and their prerequisites are given under listings in biology, forestry, and geography.

The University of Georgia Tropical Studies Group, with about 50 members in 19 departments, sponsors seminars and workshops on the campus in support of the OTS field program. Membership is open to graduate students and faculty.

Interested persons should contact Dr. Cathy Pringle, Institute of Ecology, or Dr. James L. Hamrick, Department of Botany, who serve on behalf of the University as members of the OTS Board of Directors.

Veterinary Medical Experiment Station

Director: Dr. Harry W. Dickerson, (706) 542-5734.

The Veterinary Medical Experiment Station coordinates and conducts research on disease problems of food- and fiber-producing animals, including poultry and fish. Companion animals, horses, and wildlife are also included. The research programs, which have applied, basic, and comparative medical orientation, are divided broadly into four main categories: infectious diseases, noninfectious diseases, diagnostic techniques, and therapeutic procedures. Research facilities are located at the College of Veterinary Medicine, the Poultry Diagnostic and Research Center, and the Veterinary Diagnostic Laboratories in Athens and Tifton. Opportunities for graduate training in the biomedical sciences are provided by the station's research programs.

Libraries

University Librarian: Dr. William Gray Potter, (706) 542-0621.

The University of Georgia Libraries are composed of three major on-campus libraries: the Main Library, Science Library and the Law Library, administered by the School of Law. There are several small collections such as those at the Curriculum Materials Center (Education), the Georgia Center for Continuing Education Library, the Veterinary Medicine reading room, and various lab collections. The UGA Libraries' system also includes libraries at the experiment stations in Griffin and Tifton and the marine stations at Sapelo and Skidaway.

The UGA Library is the largest library in the State of Georgia and serves as the Regional Depository for federal government publications for the state of Georgia. It is a member of the prestigious Association of Research Libraries, consisting of the largest research libraries in North America and ranks in the top third of these libraries.

The libraries contain more than 3.4 million books, serials, and documents, plus many other items including manuscripts, photographs, drawings, music scores, audio/video materials, and newspapers. The map collection incorporates nearly 600,000 items, and the microform collection numbers more than 5.6 million. The collections support the instructional, research, and public service activities of the university and are available to library users both on the campus and across the state.

An outstanding feature of the Main Library is the Hargrett Rare Book and Manuscript Library, a repository of rare and priceless relics. Among the special collections are the works and memorabilia of Erskine Caldwell and Margaret Mitchell, the original Confederate Constitution, Confederate imprints, a notable Georgiana collection, many Southern historical manuscripts, and the sheet music of many well-known musicians.

The Richard B. Russell Library for Political Research and Studies, an annex to the Main Library, houses the papers and memorabilia of the late Senator Russell, as well as the papers of former Secretary of State Dean Rusk, Senator Herman E. Talmadge, and many other elected

officials and government appointees. The archives of the Peabody Award house over 40,000 radio and television programs representing the best in broadcasting.

The University Libraries offer a variety of electronic databases for use by the campus community. In addition to the main catalog, the online system GALIN supports an electronic encyclopedia and indexes to the journal literature of a number of disciplines. GALIN is readily available in the Libraries, across the campus network, or through dial access. Other databases are available through LIBRA, a Novell based file server that is connected to the campus network. Statistical databases are available through the Data Services unit on the 6th floor of the Main Library. Many government produced databases can be found in the Government Documents Department in the Main Library. Additional databases, full text of journals and reference sources, are available through GALILEO, a statewide electronic library service.

More than 460,000 volumes are housed in the University's Law Library. It has a complete collection of American legal resources and one of the finest foreign and international collections in the country.

Special services of particular interest for graduate students include tours of the libraries and orientation to their services and collections; individual reference conferences for persons undertaking a major research paper, thesis, or dissertation; and access to information in over 200 computer databases through searching done either by the user or with assistance by librarians.

For additional information on Libraries collections and services, contact the Office of the Director, Libraries, The University of Georgia, Athens, Georgia 30602-1641, (706) 542-0621.

Museums

The Georgia Museum of Art

Director: Dr. William U. Eiland, (706) 542-4662.

The Georgia Museum of Art, founded by Alfred H. Holbrook in 1948, serves the university, the community, and the state. In recognition of the museum's statewide significance and growing national prominence, the Georgia General Assembly designated it the official State Museum of Art in 1982. The permanent collection of the museum now numbers over 7,000 works, with primary emphasis on 19th- and early 20th-century American paintings and American and European prints and drawings from the 16th through the 20th century. The building is located in the Performing and Visual Arts Complex. Works in the collection and curatorial files are available for study by students and scholars. An active publications program includes a quarterly museum newsletter and catalogues for selected exhibitions organized by the museum. The museum features highlights of its permanent collection and major traveling exhibitions as well as temporary exhibitions of other works from its collection. Lectures, gallery talks, films, family days, and other events are scheduled to complement these exhibitions. The Museum Shop offers a variety of books, cards, and arts-related gifts.

The University of Georgia Museum of Natural History

Director: Dr. Elizabeth J. Reitz, (706) 542-1663.

The University of Georgia Museum of Natural History contains the most extensive collection of Georgia natural history artifacts and specimens and is one of the largest natural history museums in the Southeast. It ranks within the top 50 in the nation in terms of the size of its collections and the scope of its research and service programs. The museum comprises twelve separate collection areas: Archaeology Collection (3.5 million artifacts), Botany Herbarium (200,000 plant specimens), Arthropod Collections (500,000+ pinned insects, 100,000 alcohol-preserved insects), Geology Collections (10,000 economic geology ore specimens, 10,000 mineral specimens, and 10,000 invertebrate and vertebrate fossils), Julian H. Miller Mycological Herbarium (25,000 fungi), Pollen and Plant Microspores Laboratory (a worldwide collection of fossil pollen samples), Zooarchaeology Collection (4,800 comparative reference skeletons), Herpetology (37,000 specimens), Ichthyology (325,000 specimens), Invertebrates (34,000 specimens) Mammalogy (27,000 specimens), and Ornithology (5,200 specimens).

The Museum's collections are crucial to quality education in over 20 specialized graduate and undergraduate courses in the natural sciences at the University. The educational role of the Museum extends well beyond the campus. Each year the Museum provides loans of educational materials and access to its collections to other institutions and the individuals within the University System, primary and secondary schools, and state agencies. Also, through specialized educational programs, lecture series, and short courses, the Museum reaches thousands of individuals and groups throughout Georgia each year.

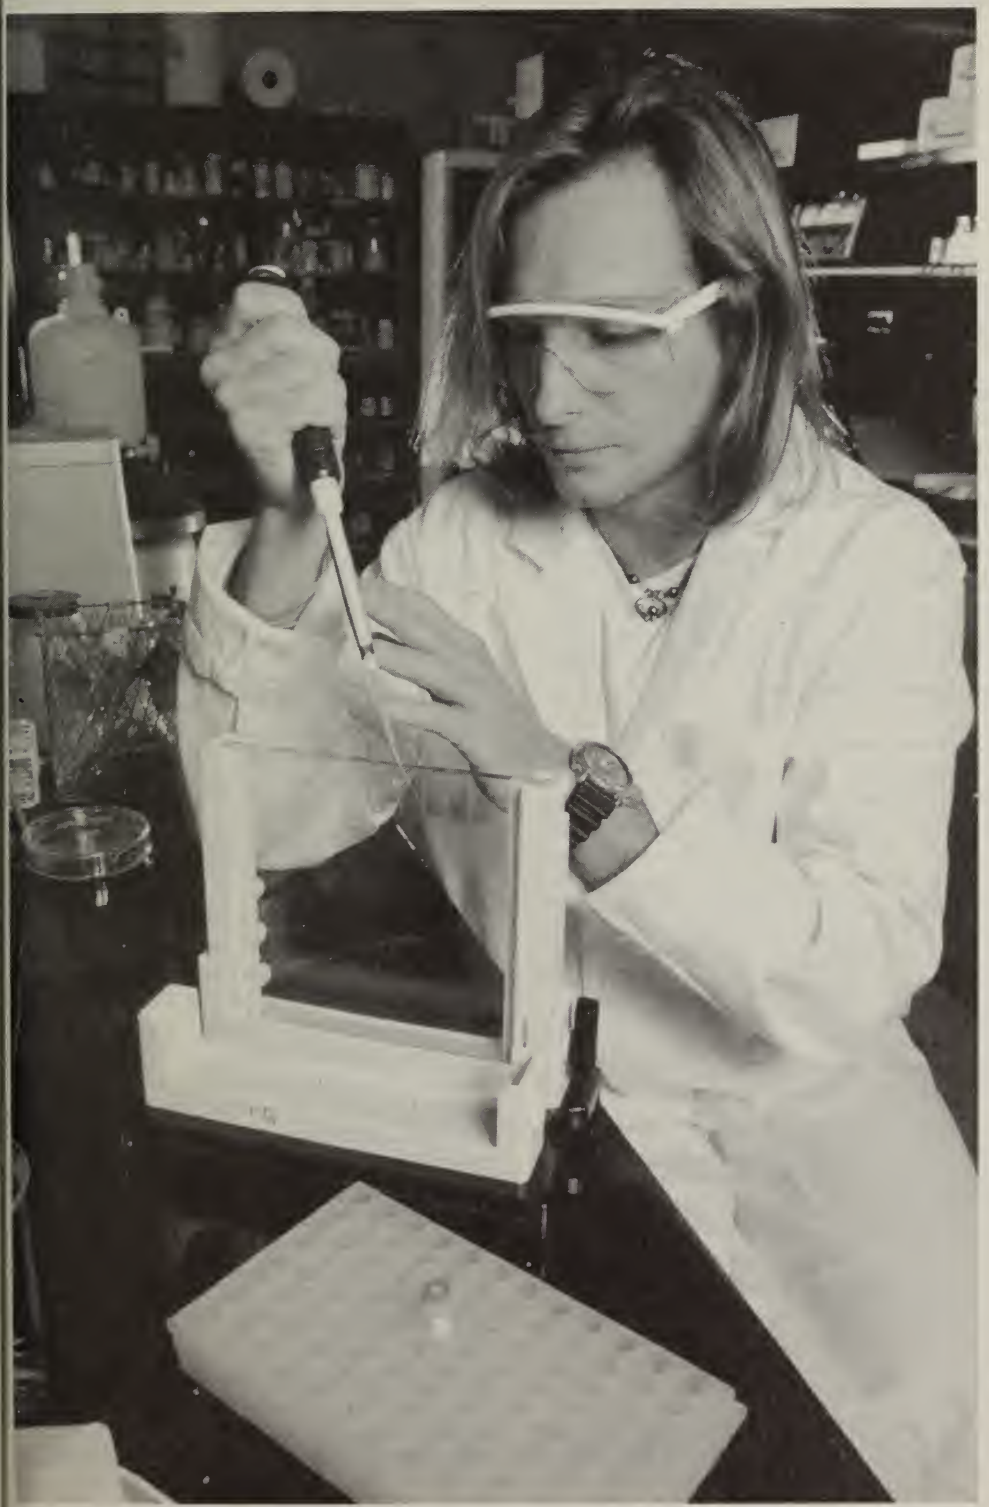
The State Botanical Garden of Georgia

Director: Dr. A. Jefferson Lewis, III, (706) 542-1244; http://www.uga.edu/botgarden.

The State Botanical Garden is a public educational facility under the auspices of the University of Georgia. Its mission is to acquire and disseminate botanical knowledge and to foster appreciation, understanding, and stewardship of plants and nature through research, educational programs, plant collections, and horticultural displays. The Garden is located two miles south of campus. Founded in 1968, it now encompasses more than 300 acres, much of which borders the Middle Oconee River. The Garden features a number of specialty Gardens and collections plus five miles of nature trails. The modern Visitor Center/Conservatory features a permanent display of tropical and semitropical plants along with classrooms, a gift shop, cafe, and other visitor facilities. The adjacent International Garden includes an herb and physic garden, a bog garden, a collection of endangered plants of the southeastern United States, as well as representative species from the floras of the Mediterranean region, Latin America, China, and the southeastern states. The nearly 2,500 types of plants in the accessioned collections are about equally divided between species and cultivated varieties.

The Garden is a living laboratory for university teaching and research. Students and faculty utilize the collections and natural plant communities for studies in a variety of disciplines, including plant reproductive biology, vegetation analysis, ecosystem studies, plant pathology, animal behavior, taxonomy, plant physiology, horticultural trials, museum studies, and anthropology. Conservation programs at the Garden focus on rare and endangered species of Georgia and adjacent states. The Garden is a member of the Georgia Plant Conservation Alliance (GPCA), the American Association of Botanical Gardens and Arboreta (AABGA) and Botanic Gardens Conservation International (BGCI), the latter a worldwide network of botanical gardens and arboreta committed to conservation education and research. A computerized geographic information system (GIS) is under development to facilitate and promote research activities. Students and faculty are encouraged to contact the Director of Research at (706) 542-6144 for further information concerning academic use of the Garden facilities.

General Degrees



General Degrees

Master of Arts (MA) and Master of Science (MS)

Master of Arts

The Master of Arts degree will be conferred upon candidates who have met the requirements of this degree with major study in one of the following fields: anthropology, art history, business administration, classics, comparative literature, economics, education, English, French, geography, German, Greek, history, journalism, Latin, linguistics, mathematics, mathematics non-thesis, music, philosophy, political science, religion, Romance languages, sociology, Spanish, and speech communication.

Master of Science

The Master of Science degree will be conferred upon candidates who have met prescribed requirements, with major study in one of the following fields: agricultural economics; agricultural engineering; agronomy; anatomy (veterinary); animal science; artificial intelligence; biochemistry and molecular biology; biological engineering; botany; cellular biology; chemistry; child and family development; computer science; conservation ecology and sustainable development; dairy science; ecology; entomology; environmental economics; environmental health; food science; foods and nutrition; forest resources; genetics; geology; horticulture; housing and consumer economics; marine sciences, medical microbiology; microbiology; pharmacology (veterinary); pharmacy; physics; physiology (veterinary); plant pathology; poultry science; psychology; statistics; textiles, merchandising, and interiors; toxicology; veterinary parasitology; and veterinary pathology.

Requirements

1. *Admission.* An applicant may be admitted as a prospective candidate for the Master of Arts or Master of Science degree upon recommendation of the major department and approval of the dean of the Graduate School.

2. *Residence.* The minimum residence requirement is one academic year (two semesters of full-time study).

3. *Time Limit.* All requirements for the degree must be completed within six years beginning with the first registration for graduate courses on the program of study. An extension of time may be granted only for conditions beyond the control of the individual.

4. *Research Skills Requirements.* Upon the option of the student's major department, a reading knowledge of a modern foreign language or other research skills may be required of a candidate for the Master of Arts or the Master of Science degrees. A prospective student should request information concerning the research skills requirements from the departmental graduate coordinator if the requirements are not described under the departmental heading in this bulletin.

5. *Advisory Committee.* Before the end of the first semester of residence and upon the recommendation of the departmental graduate coordinator, the dean of the Graduate School shall appoint an advisory committee for the student. The committee will consist of a major professor, as chairman, and two additional members. The major professor and at least one of the other members of the committee must be members or provisional members of the graduate faculty. Only faculty members of the rank of assistant professor or above, or the equivalent, are permitted to serve as committee members. The committee will be recommended to the dean of the Graduate School by the graduate coordinator after consultation with the student and faculty members involved.

The advisory committee, in consultation with the student, is charged with planning the student's program of study. It is also charged with approving the program of study, reading and ap-

proving the thesis, and administering the final examination.

6. *Program of Study.* A student must complete a program of study which constitutes a logical whole. Master of Arts and Master of Science degrees require a minimum of 30 semester hours consisting of at least 24 hours of course work and 6 hours of thesis and related research. Of the 24 hours of course work, at least one-half of this credit must be in University of Georgia courses open only to graduate students. The requirement of at least 12 semester hours of credit open only to graduate students may not be reduced by credit in 7000 (Master's Research). A maximum of six semester hours of 7000 may be included on the program of study.

The program of study must be submitted on the proper form with approval by the student's major professor, the departmental graduate coordinator, and the dean of the Graduate School. This step should be completed during the student's second semester of residence and must be done before the student is admitted to candidacy for a degree.

7. *Acceptance of Credit by Transfer.* If graduate credit earned at an accredited institution constitutes a logical part of the student's program, transfer of credit may be allowed when recommended by the student's major professor and graduate coordinator, and when approved by the dean of the Graduate School. Such transfer of credit cannot exceed six semester hours and must fall within the time limit of the degree. No grade below B may be transferred. The courses to be transferred may not have been used in a degree program at another institution. Transfer grades are not used in calculating cumulative averages. All requests for transfer credit, with accompanying official transcripts, must be in the Graduate School at least 30 days prior to the time the student plans to graduate.

8. *Admission to Candidacy.* The student is responsible for initiating an application for admission to candidacy so that it is filed with the dean of the Graduate School by Friday of the first full week of classes of the semester in which the courses on the program of study are completed. This application is a certification by the student's major department that the student has demonstrated the ability to do acceptable graduate work in his or her field and that:

(1) all prerequisites set as a condition to admission have been satisfactorily completed;
(2) research skills requirements, if applicable, have been met;
(3) the program of study has been approved by the major professor, the graduate coordinator, and the dean of the Graduate School; and
(4) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed courses on the program of study (no course with a grade below C may be placed on the program of study).

9. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

10. *Thesis.* A candidate must submit a thesis which shows independent judgment in developing a problem from primary sources. (In the Departments of Mathematics and Statistics, the thesis requirement may be replaced by nine semester hours of graduate work in 8000-level courses.) The thesis shall be written under the direction of the student's major professor. The thesis must be approved by the major professor, who will distribute copies to the remaining members of the advisory committee and schedule a final examination. Written assent of two of the three committee members will be required before a thesis will be approved as ready for a final defense.

The thesis, signed by the major professor, must be submitted to the dean of the Graduate School for his approval no later than two weeks prior to graduation.

A candidate must register for at least three semester hours of thesis under the course number 7300. Instructions for typing the thesis may be obtained in the Graduate School.

Once a student has been admitted to candidacy, the department has an ethical responsibility to ensure that appropriate faculty mentorship is provided to the candidate for completion of the degree.

11. *Final Examination.* A final examination on both the program of study and the thesis is required of all Master of Arts and Master of Science candidates. That part of the examination dealing with the program of study may be written or oral; that part concerned with the thesis must be an oral examination. The final examination will be administered by the advisory committee, with the major professor serving as chairman. All members of the advisory committee must be present.

12. *Binding the Thesis.* Three copies of the thesis must be deposited with the University Library for binding. Each copy must carry a cer-

tificate of approval signed by the major professor and the dean of the Graduate School.

13. *Final Clearance.* All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation. A student must enroll for a minimum of three hours of credit the semester in which he/she completes degree requirements.

Doctor of Philosophy (PhD)

The University established this degree for the purpose of providing properly qualified students with the opportunity to pursue research and other scholarly activities beyond the point that is possible in programs for the master's degree. At present, opportunity for such advanced graduate work is provided in adult education, agricultural economics, agronomy, animal and dairy science, animal nutrition, anthropology, art, biochemistry and molecular biology, biological and agricultural engineering, botany, business administration, cellular biology, chemistry, child and family development, communication sciences and disorders, comparative literature, computer science, counseling and student personnel services, counseling psychology, drama, ecology, economics, educational psychology, English, entomology, exercise science, food science, foods and nutrition, forest resources, genetics, geography, geology, health promotion and behavior, higher education, history, horticulture, housing and consumer economics, instructional technology, language education, linguistics, marine sciences, mass communication, mathematics, mathematics education, medical microbiology, microbiology, middle school education, music, pharmacology (veterinary), pharmacy, philosophy, physical education, physics, physiology (veterinary), plant pathology, political science, poultry science, psychology, reading education, Romance languages, science education, social foundations of education, social science education, social work, sociology, special education, speech communication, statistics, textile sciences, toxicology, veterinary parasitology, and veterinary pathology.

This degree will be granted in recognition of proficiency in research, breadth and soundness of scholarship, and thorough acquaintance with a specific field of knowledge, not upon completion of any definite amount of work prescribed in advance. Evidence of such attainment must be provided through the presentation of an acceptable dissertation based upon independent research and the passing of such written and oral examinations as may be prescribed.

Departments that have been approved to offer the Doctor of Philosophy degree may implement this degree program by the adoption of appropriate rules and regulations. Departmental rules and regulations may not, however, conflict with the policies, rules, and regulations of the Graduate School.

Requirements

1. *Admission.* An applicant may be admitted as a prospective candidate for the Doctor of Philosophy degree upon certification by the major department that he or she is a person of proper attainment and promise, that appropriate courses may be adequately given, and that the student's research can be adequately supported and directed. Such admission must be to an authorized field and must be approved by the dean of the Graduate School.

2. *Residence.* The granting of this degree presupposes a minimum of three full years of study beyond the bachelor's degree. At least two consecutive semesters of full-time work (i.e., enrollment for a minimum of 30 hours of consecutive course work included on the program of study) must be spent in resident study on this campus. Undergraduate courses taken either to fulfill research skills requirements or to remove deficiencies may not be calculated in the 30 consecutive hours of resident credit.

3. *Time Limit.* All requirements for this degree, except the dissertation and final oral examination, must be completed within a period of six years. This time requirement dates from the first registration for graduate courses on a student's program of study.

A candidate for the doctoral degree who fails to complete all degree requirements within five years after passing the comprehensive examination, and being admitted to candidacy, will be required to take the comprehensive examinations again and be admitted to candidacy a second time.*

4. *Research Skills Requirements.* To pursue research effectively a student must develop a facility with certain research skills or tools such as statistics, computer science, or foreign languages. The student's major department determines the skill or skills required of candidates for the Doctor of Philosophy degree. A prospective student should request information concerning research skills

**When a candidate for a doctoral degree, who was admitted to candidacy prior to September, 1973, is readmitted to the Graduate School, he/she will have five years from the date of first readmission to complete all degree requirements.*

requirements from the departmental graduate coordinator if the requirements are not described under the departmental heading in this bulletin.

5. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

6. *Advisory Committee.* Before the end of the first year of residence of a prospective candidate for the Doctor of Philosophy degree and upon the recommendation of the departmental graduate coordinator, the dean of the Graduate School shall appoint an advisory committee for the student. The committee will consist of a major professor, as chairman, and four additional members. The major professor and at least two of the other members of the committee must be appointed members of the graduate faculty. The committee will be recommended to the dean of the Graduate School by the graduate coordinator after consultation with the student and faculty members involved.

The advisory committee, in consultation with the student, is charged with planning the student's program of study. It is also charged with approving the program of study, arranging the comprehensive written and oral examinations, approving a subject for the dissertation, and approving the student's defense of his or her research. The committee should advise the student of required research skills and other requirements.

Departmental recommendations for the advisory committee, and any replacements, shall be determined by procedures approved by a majority of the graduate faculty of that department.

7. *Programs of Study.* A preliminary program of study, developed by the major professor and the doctoral student and approved by a majority of the advisory committee, will be submitted to the graduate coordinator by the end of the student's first year of residence. The program of study should constitute a logical whole and consist primarily of 8000- and 9000-level courses in addition to research and independent study.

A final program of study will be submitted to the Graduate School prior to application for admission to candidacy. This program of study must be submitted on the proper form for approval by the advisory committee, the graduate coordinator, and the dean of the Graduate School. The final program of study must show all graduate courses relevant to the doctoral program (including courses from the master's degree and courses transferred from other universities), and not just courses satisfying the minimum degree requirement. A minimum of three hours of 9300, doctoral dissertation, must be included on the program of study.

Each department should evaluate carefully and fully each doctoral student's progress and qualifications at the end of the first year of study in order to advise the student whether or not to continue in the program.

8. *Comprehensive Examinations.* A student must pass formal, comprehensive written and oral examinations before being admitted to candidacy for the degree. These examinations are administered by the student's advisory committee.

The written comprehensive examination, although administered by the advisory committee, may be prepared and graded according to the procedures and policies in effect in the student's department. The oral comprehensive examination will be an inclusive examination within the student's field of study. An examination of the student's dissertation prospectus may precede or follow the oral comprehensive examination but may not take the place of the oral comprehensive examination. All members of the student's advisory committee must be present for the entire period of both oral examinations.

The oral comprehensive examination is open to all members of the faculty and shall be announced by the Graduate School. The graduate coordinator must notify the Graduate School of the time and place of this examination at least two weeks before the date of the examination. This notice must be in writing.

Following each examination, written and oral, each member of the advisory committee will cast a written vote of pass or fail on the examination. At least four out of a possible five positive votes are requires to pass each examination. The results of both examinations will be reported to the Graduate School.

9. *Admission to Candidacy.* The student is responsible for initiating an application for admission to candidacy so that it is filed with the dean of the Graduate School at least two semesters before the date of graduation. This application is a certification by the student's major department that the student has demonstrated ability to do acceptable graduate work in the chosen field of study and that:

(1) all prerequisites set as a condition to admission have been satisfactorily completed;
(2) research skills requirements, if applicable, have been met;
(3) the final program of study has been approved by the advisory committee, the

graduate coordinator, and the dean of the Graduate School;

(4) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed graduate courses on the program of study (no course with a grade below C may be placed on the final program of study);

(5) written and oral comprehensive examinations have been passed and reported to the Graduate School;

(6) the advisory committee, including any necessary changes in the membership, is confirmed and all its members have been notified of the appointment; and

(7) the residence requirement has been met.

After admission to candidacy, a student must register for at least two additional semesters and a total minimum of ten hours of dissertation or other appropriate credit. A student must register for a minimum of three hours of credit in any semester when using University facilities and/or staff time.

Once a student has been admitted to candidacy, the department has an ethical responsibility to ensure that appropriate faculty mentorship is provided to the candidate for completion of the degree.

10. *Dissertation Planning.* A student pursuing this degree must present a dissertation on some subject connected with his or her major field of study. The dissertation must represent originality in research, independent thinking, scholarly ability, and technical mastery of a field of study. The conclusions must be logical, the literary form must be acceptable, and the contribution to knowledge merit publication.

Persons who serve on the advisory committee at the time the dissertation research is undertaken must be faculty members knowledgeable in the areas of the student's research. They should be selected irrespective of their departmental affiliation. Sometimes membership of the advisory committee will remain unchanged during a student's entire doctoral program, while at other times changes in the original committee will be necessary.

The major professor has the primary responsibility for guiding research, but the student should consult all members of the advisory committee to draw upon their expertise in relevant areas.

The major professor and advisory committee shall guide the student in planning the dissertation. The student will prepare a dissertation prospectus. When the major professor certifies that the dissertation prospectus is satisfactory, it must be formally considered by the advisory committee in a meeting with the student. This formal consideration may not take the place of the comprehensive oral examination.

Approval of the dissertation prospectus signifies that members of the advisory committee believe that it proposes a satisfactory research study. Approval of the prospectus requires the agreement of at least four of the five members of the advisory committee as evidenced by their signing an appropriate form, which, together with the approved prospectus, is filed with the graduate coordinator.

11. *Dissertation Approval and Defense.* When the major professor is satisfied with the completed dissertation, he or she will certify that it has his or her approval and is ready to be read. The major professor will then distribute copies of the dissertation to the remaining members of the advisory committee, schedule a final oral defense, and notify the Graduate School. Subsequently, the Graduate School will announce the time and place of the defense of the dissertation to the University community. The committee members will have three weeks to read and evaluate the completed dissertation.

Written assent of three of the four committee members (other than the major professor) will be required before a dissertation will be approved as ready for a final defense. If the advisory committee declines to approve the dissertation as ready for the final defense, the major professor will notify the student and the Graduate School.

The defense of the dissertation will be chaired by the student's major professor and attended by all members of the advisory committee. Four of the five members of the advisory committee must approve the student's dissertation and defense and must certify their approval in writing. The results of the defense of the dissertation must be reported to the Graduate School at least one week prior to graduation.

Once the dissertation has been approved by the advisory committee and the final oral examination has been passed, the dissertation must be submitted to the Graduate School for final approval no later than the last day of classes of the following semester. Dissertations which are not submitted by this deadline must be defended again and approved by the Advisory Committee before they will be considered by the Graduate School for final approval.

12. *Binding the Dissertation.* Three official copies of the dissertation must be filed in the

University Library for binding. Each copy must carry a certificate of approval signed by the major professor and the dean of the Graduate School.

13. *Other Requirements.* Before the degree will be awarded, the student must file a copy of the abstract of the dissertation (not more than 350 words) with the Graduate School and the library. At the same time, the student must submit a receipt showing that he or she has deposited with the treasurer of the University the amount of $50 to cover the cost of microfilming the dissertation. If the student desires to have the dissertation copyrighted, an additional charge of $35 must be paid. This fee must be presented at the University Library in the form of a certified check or money order made payable to University Microfilms.

All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation. A student must enroll for a minimum of three hours of credit the semester in which graduation requirements are completed.

Interdisciplinary Program

Toxicology

Cham E. Dallas, *Director and Chair of Coordinating Committee*

Raghubir Sharma, *Graduate Coordinator, 542-2788*

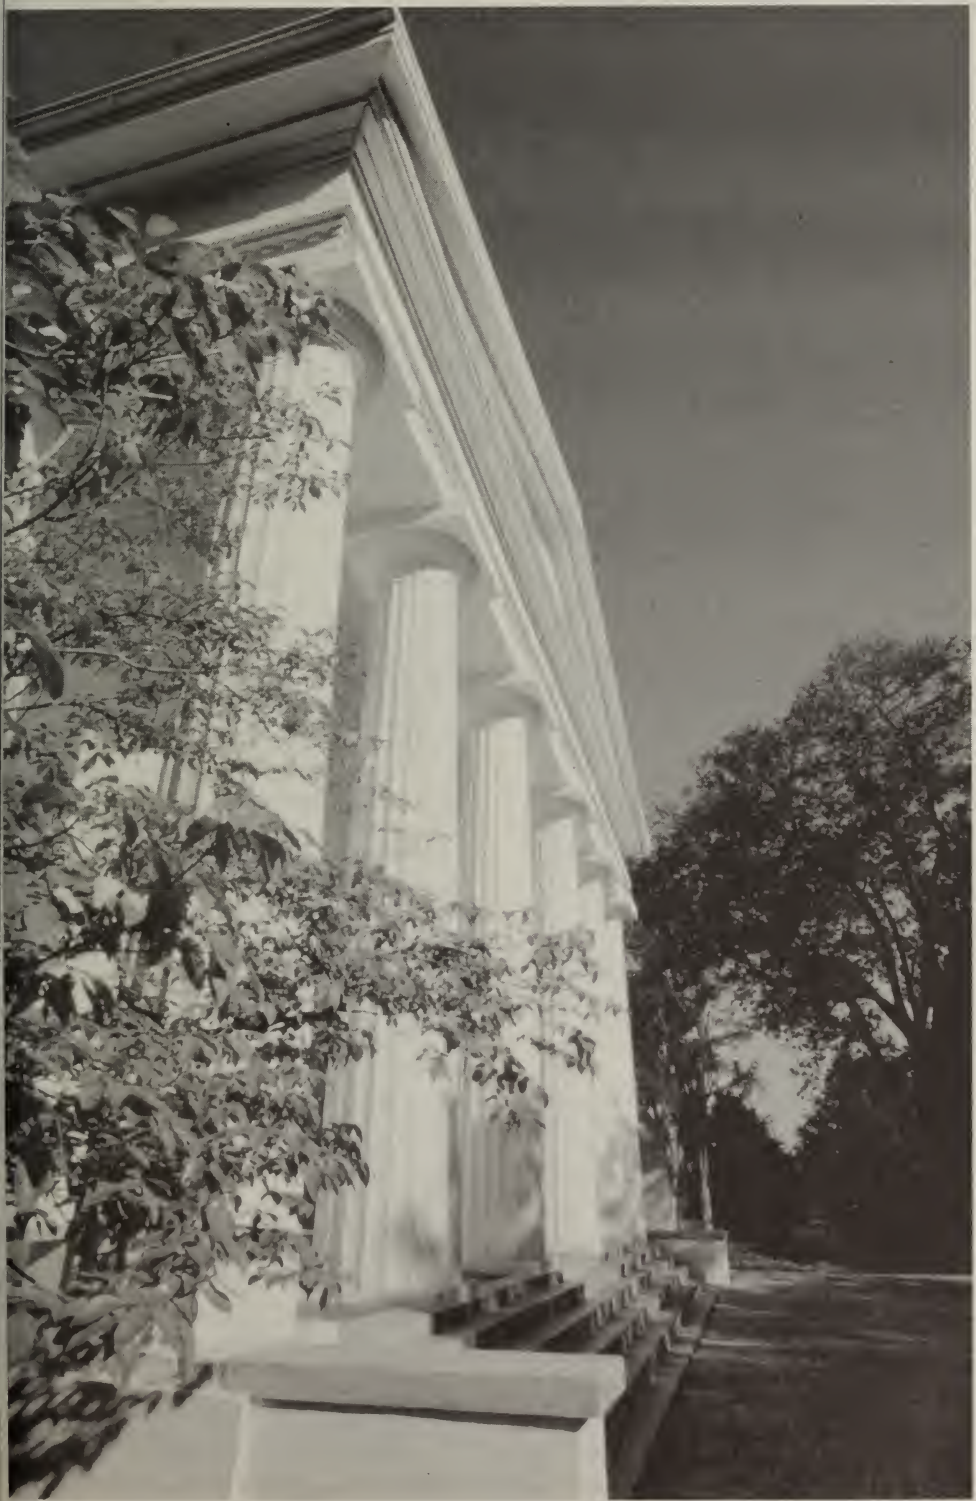
(Veterinary Medicine Building)

The Toxicology Program is an interdisciplinary program designed to train students to assume positions as toxicologists in academia, industry and government. The faculty participants come from a number of departments to which persons may apply for admission. These include ecology, environmental health science, foods and nutrition, forest resources, medical microbiology, pathology, pharmaceutical and biomedical sciences, physiology and pharmacology, and poultry science. The Toxicology Faculty cooperate both in graduate training and in collaborative research. Thus, graduate students interact with scientists from different disciplines and have the opportunity to specialize in one of a number of areas.

Toxicology is the study of harmful effects of chemicals on humans and other living organisms. It is inherently a broad, multi-disciplinary field requiring expertise in a number of biological sciences. In recognition of this breadth, the program has two parallel tracks: (a) human and animal toxicology; and (b) environmental toxicology. The focus of each track is different, but there is overlap of prerequisites and core course requirements. Courses listed under a number of departments are available for the program. Required courses for the human and animal track include biochemistry, physiology and pathology. Requirements for the environmental track include biochemistry, environmental chemistry, and population and ecosystem ecology. Principles of toxicology, chemical toxicology, and graduate seminar are required courses for both tracks. Other core courses for the environmental tract are aquatic toxicology and quantitative ecological toxicology. Two organ systems toxicology courses are required for the human and animal track. Students may select from a variety of electives according to their own interests and program of study.

Graduate students may obtain a Master of Science or Doctor of Philosophy, with a major in toxicology. Individuals can initially contact the Graduate Coordinator of the Interdisciplinary Graduate Program in Toxicology for information. Visits will be set up with faculty working in a person's area(s) of interest. Applications for admission can be made to either to the toxicology program or the home department of the faculty member with whom the applicant wants to work. The student is assisted in selecting a program of study and research topic by an advisory committee chaired by the major professor. Each student must pass a written and an oral qualifying examination. After being admitted to candidacy, a thesis or dissertation must be completed. The successful candidate who majors in toxicology will receive a master's or doctorate degree through the home department of his/her major professor.

Professional Degrees



Professional Degrees

Master's Degrees

General Requirements

Listed below are the general requirements governing professional master's degree programs. For policies pertaining to the Master of Laws (LLM) degree, which deviate from these general requirements, see the LLM program description.

1. *Admission.* An applicant may be admitted as a prospective candidate for a professional degree upon the recommendation of the major department and approval of the dean of the Graduate School.

2. *Residence.* The minimum residence requirement for most professional master's degrees is two semesters, which do not have to be consecutive. See the following program descriptions for specific requirements.

3. *Time Limit.* All requirements for a professional master's degree must be completed within six years beginning with the first registration for courses on the student's program of study. An extension of time may be granted only on conditions beyond the control of the student.

4. *Language Requirement.* A candidate for a professional master's degree is required to show correctness and good taste in the use of both written and spoken English.

5. *Program of Study.* A program of study should be prepared by the student and the major professor by the beginning of the student's second semester in residence. This program must be submitted to the Graduate School on application for admission to candidacy forms and must be approved by the major professor, the graduate coordinator, and the dean of the Graduate School.

6. *In-Service Credit.* A maximum of 18 hours of graduate in-service course credit taken at nonresident centers may be included in certain programs. This maximum will be reduced by any credit transferred from another institution. A student is responsible for contacting the department in which he or she is enrolled to ascertain if in-service courses are acceptable on the program of study.

7. *Accepting Credit by Transfer.* Graduate work taken at an accredited institution which constitutes a logical part of a student's program of study may be transferred if recommended by the student's major professor and graduate coordinator and approved by the dean of the Graduate School. Such transfer of credit cannot exceed six semester hours, cannot reduce residence requirements, and must fall within the time limit of the degree. No grade below B may be transferred. The courses to be transferred may not have been used as part of the requirements for another degree. Transfer grades are not used in calculating semesterly and cumulative averages. All requests for transfer credit, with accompanying official transcripts, must be in the Graduate School at least 30 days prior to the date the student plans to graduate. A combination of in-service and transfer credit may not exceed 18 semester hours on any program of study.

8. *Admission to Candidacy.* It is the responsibility of the student to see that an application for admission to candidacy is filed with the dean of the Graduate School by Friday of the first full week of classes of the semester in which the courses on the program of study are to be completed. This application is a certification by the student's major department that the student has demonstrated the ability to do acceptable graduate work and that normal progress had been made toward earning a degree. The student's major professor and graduate coordinator must certify that the following specific requirements for admission to candidacy have been met:

(1) all prerequisites set as a condition to admission have been completed;
(2) the program of study has been approved by the major professor, the graduate coordinator, and the dean of the Graduate School;
(3) an average of 3.0 (B) has been maintained on all graduate courses taken and

on all completed courses on the program of study (no course with a grade below C may be placed on the program of study).

9. *Thesis.* If a thesis is required for a professional master's degree, inquiry should be made to the appropriate department concerning procedures to be followed.

10. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

11. *Final Examination.* The candidate must pass a final examination administered by the department. If an oral examination is given, it must be administered by a committee of no fewer than three faculty members. The results of this examination must be reported to the Graduate School by the major professor. This requirement has been waived for degrees offered in the Terry College of Business.

12. *Registration Requirement.* A student must be registered at the University of Georgia for a minimum of three hours of credit the semester in which all degree requirements are completed.

13. *Final Clearance.* All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation.

Program Descriptions

Master of Accountancy (MAcc)

There are two graduate accounting programs: the Master of Accountancy (MAcc) and the Five-Year Program (BBA/MAcc). Each evaluates students based on a review of accounting grades, overall grades, test scores, letters of recommendation and other factors that indicate success in the accounting profession. The graduate course requirements for both programs are the same. Request an application/information packet for the latest statement on the minimum requirements to be considered for admission.

The MAcc program is a standard, post-baccalaureate degree. Students must have completed an undergraduate degree from an accredited institution before enrolling in the MAcc program. Students applying for admission to the MAcc program are expected to complete a foundation of business and accounting courses.

The Five-Year Program allows outstanding UGA accounting students to begin Graduate School during their fourth (senior) year. Students complete their final two years of study as graduate students and hence may be considered for a graduate assistantship during their enrollment. Please contact the Program Coordinator for details.

Based on a student's intended area of specialization, the MAcc program consists of the following courses beyond the basic accounting and business prerequisites. Guidance is provided by the school regarding specific prerequisites and requirements.

Audit, Systems, or Managerial Track

- ACCT 7030 Advanced Financial I
- ACCT 7410 Tax II
- ACCT 7740 Accounting Policy & Research
- ACCT 8100 Cost II **or** ACCT 8200, Audit/Systems III
- Six hours from: ACCT 8050, Financial Statement Analysis and ACCT 8100, Cost II
  ACCT 8200, Audit/Systems III
  ACCT 7800, Internship (maximum of 6 hours)
- Twelve hours of MBA Electives as determined by the chosen track.

Tax Track

- ACCT 7030 Advanced Financial I
- ACCT 7420 Partnership Tax
- ACCT 7430 Estate & Gift Tax
- ACCT 7440 Corporate Tax I
- ACCT 7730 Tax Policy & Research
- Six hours from
  either: ACCT 8440 Corporate Tax II
  and 3 hours from: ACCT 8200, Audit/Systems III
  ACCT 8050, Financial Statement Analysis
  ACCT 8100, Cost II
  or: ACCT 7800, Internship (maximum of 6 hours)
- Nine hours of MBA Electives as determined for the tax track.

Master of Agricultural Economics (MAE)

This degree is designed for students who wish to acquire specialized training in agribusiness. The program blends business and economics with the applied science of agriculture, providing methods for solving real-world problems. An in-

ternship and technical report are required in lieu of a thesis.

Master of Agricultural Extension (MAExt)

This degree is designed especially for cooperative extension workers, agricultural educators, and other continuing educational professionals engaged in informal educational settings. In addition to general Graduate School requirements, a baccalaureate degree appropriate to one's work and one year of field experience in cooperative extension, or its equivalent, is desired before a prospective candidate may begin the program. Candidates must complete an approved program of 36 semester hours of graduate work.

A master's report or thesis is required. The content of the problem or analysis must relate to needs within the field of extension education.

Master of Applied Mathematical Science (MAMS)

The Master of Applied Mathematical Science is a terminal degree program designed for students who seek a broad training in applied quantitative methods as preparation for professional employment in business, government, or industry. For such students, this program will provide a structure that blends various applied mathematical sciences with particular reference to their application to real-world problems.

The program of study includes 30 semester credit hours of graduate courses. In lieu of a thesis, students in the program are required to prepare a technical report. The preparation of the technical report will provide the student with an opportunity to apply the tools of the mathematical sciences to one or several problems of interest, by developing appropriate models, obtaining needed data, and analyzing the results for their decision implications. The technical report must be filed with the student's department.

Four distinct options, at four different locations on campus, are available to accommodate students with different career goals. A student may apply for MAMS study with concentrations in: (1) applied mathematics in the Department of Mathematics, (2) quantitative methods in business in the Management Science Program in the Terry College of Business, (3) statistical analysis in the Department of Statistics, (4) or computer science in the Department of Computer Science. All candidates for the degree must satisfy as prerequisites one year of calculus, a course in linear algebra, an introductory course in statistical methods, and two in computer programming. Additional prerequisites are required for some options. If the student has not completed all prerequisites, he or she must complete them early in the program. Courses taken to meet prerequisites may be graduate or undergraduate courses, but may not be applied to the program of study for the degree.

Master of Art Education (MAEd)

The Master of Art Education degree is designed for art teachers and supervisors of art with course work in curriculum, instructional methodology, and educational research along with theoretical, historical, and psychological foundations of art in education. Students may select courses in studio, art history, aesthetics, and criticism as part of their program. The program requires 33 semester hours of course work, including ARED 7650, Applied Project in Art Education. Prerequisite for admission is a bachelor's degree in art or art education. (See MEd degree description for details.)

Master of Arts for Teachers (MAT)

The Master of Arts for Teachers program is designed to prepare teachers for employment in secondary schools and junior colleges. The degree may be earned in English, French, German, Romance languages, and Spanish. There is no thesis or language requirement.

In general, admission requirements for programs leading to the Master of Arts for Teachers degree are the same as admission requirements for programs leading to the Master of Arts degree. Applicants should contact the department in which they plan to enroll for information concerning admission to specific programs. In addition to departmental admission requirements, all applicants for the MAT program must hold a baccalaureate degree from an accredited college or university, with an undergraduate major of at least 35 semester hours in the appropriate field of study.

Each student will be required to meet the following program requirements before being granted the MAT degree:

(1) complete 40 hours of graduate course work in the subject area, with approval of the student's academic department;

(2) complete 15 semester hours of graduate course work in education and related

fields, with approval of the appropriate department in the College of Education;

(3) pass a final comprehensive examination covering course work and a reading list; and

(4) receive training in methods of research in the appropriate subject field.

The Master of Arts for Teachers degree program has not been approved for certification by the State Department of Education in Georgia. Any question relating to certification for teaching in the public schools needs to be addressed to the Department of Education in the state in which employment is sought.

Master of Avian Medicine (MAM)

This degree is designed to provide veterinarians with specialized training in the diagnosis, treatment, and prevention of poultry diseases. The degree is open to students who hold the Doctor of Veterinary Medicine degree or its equivalent.

Candidates for this degree must complete a program of study which meets departmental and graduate school requirements. To complete requirements, the candidate must stand for an oral examination before the faculty of the department of Avian Medicine. No thesis or foreign language is required.

Master of Business Administration (MBA)

Applicants with baccalaureate degrees in any field of study are eligible to apply to the MBA program. Students with undergraduate business degrees from AACSB accredited institutions are eligible to apply to an accelerated one-year program consisting of a minimum of 41 semester hours. All other students are eligible to apply to the two-year program. All students must have completed at least one semester of calculus with a grade of C or better and are expected to enter the program computer proficient.

The one-year program begins in the summer. During summer all one-year students take a set of four required courses and two electives. During the regular academic year, the format of the one-year program is identical to the second year of the two-year program.

The first year of the two-year curriculum consists of required core course work. These courses provide the student with basic analytical tools as well as the functional and managerial skills necessary to deal with today's business problems. This background provides the student with a basic understanding of organizations and the role of managers in these organizations.

The second year consists of sequence and elective courses. Each department in the Terry College of Business offers sequences which students use to develop expertise in two or more areas. Students are required to complete two sequences of at least six hours each. Electives can be taken toward the goal of strengthening sequence areas or as a way to develop breadth across functional lines.

Two-Year Curriculum

First-Year Courses

Fall Semester:

Financial Accounting
Applied Business Statistics
Business Economics (Micro & Macro)
Management Information Systems
Business Ethics
Negotiation
Developing Leadership Skills

Spring Semester:

Finance Management
Marketing Management
Integrated Resource Mangement II
Legal & Regulatory Environment of Business
Strategic Management and Communication
Internal Uses of Accounting Information

Second Year Courses

Fall Semester:

Sequence 1, course 1
Sequence 2, course 1
Free elective or sequence 3 course
Free elective or sequence 4 course
Free elective or sequence 5 course
MBA P.L.U.S. activities

Spring Semester:

Sequence 1, course 2
Sequence 2, course 2
Free elective or sequence 3 course
Free elective or sequence 4 course
Free elective or sequence 5 course
MBA P.L.U.S. activities

One-Year Curriculum

The one-year MBA program is designed to meet the needs of students with an undergraduate degree in business. Entering students must have fulfilled the calculus requirement before they

matriculate and are expected to enter the program computer proficient.

Summer Term:

First 3½ weeks module:
Business Ethics*
Negotiation*
Business Statistics*

Second 3½ weeks module:

Marketing Management**
Financial Management**
Survey of Accounting**
Survey of Economics**
Integrated Resources Management I**
Management Information Systems Overview**
Strategic Management and Communication

* *Required course.*

** *Elective course—Students will take two of six, based on previous course work and planned sequences.*

Fall//Spring Semesters: Same as the second year of the Two-Year Program.

Note: The Business School requires applicants to submit information in addition to that required by The Graduate School. Files will not be reviewed by the Terry College of Business until they are complete. Inquiries concerning the MBA program may be made by writing or calling: MBA Program, Terry College of Business, 346 Brooks Hall, The University of Georgia, Athens, Georgia 30602-6264, (706) 542-5671. E-mail: ugamba@cba.uga.edu; internet: www.cba.uga.edu/mba.

Master of Education (MEd)

The Master of Education degree is designed for the student whose vocational objectives require preparation for teaching, supervision, counseling, and/or first line administration in grades P-12 and other educational or professional agencies.

This degree is offered in the following fields: adult education, agricultural education, business education, college student affairs administration, communication sciences and disorders, computer-based education, early childhood education, educational leadership, educational psychology, English education, exercise science, family and consumer sciences education, foreign language education, guidance and counseling, health promotion and behavior, human resource and organizational development, instructional technology, marketing education, mathematics education, middle school education, occupational studies, physical education, reading education, recreation and leisure studies (plan B), rehabilitation counseling, safety education, science education, social science education, special education, and technological studies.

Students who contemplate becoming candidates for this degree should contact the appropriate school, division, or department in the College of Education as to the program to be followed. This degree may be attained through either of the two following plans of work:

PLAN A

The requirements for the degree of Master of Education may be met by the completion of an approved program of a minimum of 33 semester hours of graduate course work. Under this plan, the following two courses must be included in the student's program: a research course and 7650-Applied Project in Education. A maximum of 15 hours of non-resident in-service credit is allowed on the program of study.

PLAN B

Under this option, the requirements for the Master of Education degree may be met by a minimum of 36 semester hours of approved graduate course work. A research course must be included in the student's program. A maximum of 18 hours of non-resident in-service credit is allowed on the program of study.

Master of Fine Arts (MFA)

The basic requirements for this degree are satisfactory completion of an approved program of graduate course work including a creative project or problem which will carry three hours credit.

In art, emphasis will be placed upon a high degree of technical and artistic accomplishment. The student must also have a general knowledge of art history and criticism. Current minimum course requirements are 57 semester hours of approved graduate course work plus 3 hours of ARST 9210, Graduate Exit Studio. ARST 9210 consists of an exhibition of creative work, a written report descriptive of the issues the candidate's work addresses, and a final oral examination. Concentrations are available in ceramics, drawing and painting, fabric design, interior design, jewelry and metalwork, photography, printmaking, and sculpture.The prerequisite for a program in art is the Bachelor of Fine Arts or its equivalent.

In drama, emphasis will be placed not only upon a high degree of technical and artistic accomplishment but also on a general knowledge of relevant history and literature. The program calls for a minimum of 60 semester hours. For persons already holding a master's degree in drama, up to six of these hours may be waived. Concentrations are available in acting, design/technical theater, dramatic writing, and dramatic media. The prerequisite for a program in drama is the Bachelor of Arts or its equivalent.

Master of Forest Resources (MFR)

This is a professional degree program. The Master of Forest Resources degree is an approved program of 33 semester hours of graduate credit. At least 12 of these hours must be in forest resources and form a logical major. At least 9 hours must be taken outside the field of forest resources. No thesis is required.

Master of Historic Preservation (MHP)

Consistent with the multi-disciplinary nature of historic preservation, persons with baccalaureate degrees in architecture, landscape architecture, urban planning or design, interior design, art history, social history, law, archaeology, real estate, economics, or related disciplines are eligible to apply to the MHP program. The MHP program is designed to prepare students for a wide range of careers in the conservation and management of historic resources in both the built and natural environments. The two-year course of study is structured to develop versatile, competent, and highly motivated professionals who can perceive preservation opportunities in the broadest sense and who can develop strategies ensuring the protection and use of cultural resources as a part of the fabric of urban and rural environments. The MHP program will provide students, from diverse academic backgrounds, a common concept of preservation philosophy and process through an intensive, community-oriented, practical educational experience which effects a balance between academic and professional training.

Master of Home Economics (MHE)

This program is available for students in the Department of Child and Family Development and the Department of Foods and Nutrition who are seeking master's level training that specifies that the training is in home economics. Basic admission requirements are essentially the same as those required for admission to the Master of Science programs of either department. The minimum requirement for the degree of Master of Home Economics is an approved program of 36 semester hours with two semesters of resident study. The program of study must include the appropriate 7210 course on which an acceptable written report must be presented.

Master of Landscape Architecture (MLA)

The MLA program is professionally accredited and is designed to prepare students for professional practice at an advanced level. Applicants are accepted with previous degrees in the liberal arts and all specialized disciplines.

Program lengths are determined with consideration for academic backgrounds and related experience. Candidates not holding a bachelor's degree in landscape architecture enter the three-year program; their program requires 78 graduate semester credits. Students with the BLA degree complete two years of study; their program requires 52 credits. Practicing landscape architects with over 10 years responsible experience may be considered for an accelerated one-year program that emphasizes specialization.

All students complete a thesis that addresses a contemporary need in a specific topic area.

The MLA Catalog, Information for Applicants, describes curriculum, courses, faculty, admission procedures, and allied programs in detail. A copy is available from the School of Environmental Design, Graduate Studies Office, (706) 542-4720.

Master of Laws (LLM)

The Master of Laws program combines intensive supervised work in a particular area of law with the taking of courses in related fields.

A minimum of two semesters of resident study is required, with a total of 27 semester hours of credit. In addition to the Graduate Seminar (2-hour required course in the Fall semester and 2-hour required course in the Spring semester) at least 12 hours of credit must be earned in courses at the Law School, and 7 hours of credit must be devoted to thesis preparation. The remaining 4 hours of credit may be earned either in course work at the Law School or other Fac-

ulty of the University, if appropriate to the student's plan of study, or in further thesis research. The student must maintain a cumulative average of 2.3 or C+, or above, in accordance with the Law School's grading system, for all graded course work, and must prepare a thesis of publishable quality and form that deals with a legal topic approved by the Graduate Legal Studies Committee. The thesis grade must be B or 3.0 or above to satisfy the requirements for the LLM degree. The thesis will be prepared under the guidance of a Law School faculty member, who will act as the major professor, and who will determine the grade on the thesis. The thesis must be approved as to form and substance by the major professor and a second reader designated by the Director of Graduate Legal Studies. The second reader will be a faculty member of this or another university or otherwise a legal expert in the subject area of the thesis. Together, the major professor and the second reader shall constitute the reading committee for the thesis.

American law students who wish to pursue the Master of Laws degree must hold an AB degree or equivalent from an approved college and a JD degree or equivalent from a law school which is a member of the Association of American Law Schools, which is approved by the American Bar Association, or is a state-accredited law school.

Students from other countries who wish to apply for the LLM must hold a degree equivalent to the JD from a recognized law school with an academic record and study program acceptable to the Faculty of the Law School. Further, applicants from non-English speaking countries must possess proficiency in English as demonstrated on the Test of English as a Foreign Language (TOEFL).

Each student's record of legal studies must display high scholarly aptitude, and the data required in the LLM application form must reflect a well-conceived plan of specialized study and research.

For additional information and applications, please write Graduate Legal Studies, School of Law, The University of Georgia, Athens, Georgia 30602-6012.

Master of Marketing Research (MMR)

This degree program is designed to develop marketing research professionals with a solid understanding of business and marketing decision-making. The program, which begins each June, includes 39 semester hours of graduate work including two semesters (summer and fall) of internship. Students without prior business courses must complete foundation courses before entering the program. No thesis is required.

A Board of Advisors composed of the nation's leading marketing researchers works closely with faculty on program evaluation, instruction, and funding. Marketing Research Assistantships provide a stipend of $4,000 for each student. Admission is very selective.

Master of Mass Communication (MMC)

The Master of Mass Communication degree serves those students whose career goals indicate that additional course work will be more advantageous to them than the completion of the traditional thesis that is required for the Master of Arts degree. The additional course work provides an opportunity for more breadth and depth of exposure to areas which lay the foundations of career development whether in additional mass communication courses or in cognate courses that tie into the candidate's goals. A total of 33 semester hours of graduate course work is required to complete the program.

Master of Music (MM)

This degree offers major concentrations in performance, piano pedagogy, chamber music/accompanying, conducting, woodwinds, composition, and music literature. Each concentration requires an approved program with a minimum number of hours ranging from 30 to 36 semester hours depending on the concentration elected. Each program of study includes a final project that is satisfied by a recital, a large original composition, or an approved research project.

Master of Music Education (MMEd)

This degree offers a concentration in music education or music therapy. Completion of the program leads to the MMEd degree and Georgia teacher certification in music at the T-5 level. Those who complete the degree program with a concentration in music therapy and complete a six-month internship in music therapy are also academically qualified to become registered music therapists.

This degree may be obtained through either of two plans. Under either plan, A or B, an oral

and/or written comprehensive examination must be passed during the final semester of work.

PLAN A

The requirements for this degree may be met by completion of an approved program of study of 30 graduate hours in music, education, and music education, plus three semester hours in applied problems in music. This program must include at least 24 semester hours outside the field of education. A research course and other courses required by the department must be included in the student's program.

PLAN B

Under this option, the requirements may be met by completion of an approved program of 36 semester hours of graduate course work. These courses must include 30 semester hours outside the field of education. A research course and other courses required by the department must be included in the program.

Master of Plant Protection and Pest Management (MPPPM)

The Master of Plant Protection and Pest Management program is designed to prepare graduates with comprehensive, multi-disciplinary training in plant pathology, entomology, and weed science for employment by industrial, extension, or regulatory agencies.

Applicants for the Master of Plant Protection and Pest Management program must hold the baccalaureate degree from an accredited college or university. Basic admission requirements are essentially the same as those required for admission to Master of Science programs in each of the three university departments cooperating to offer the program. Final decisions on admittance are made by the MPPPM coordinating committee. Students who satisfy all basic admission requirements, but whose background in pertinent biological and agricultural sciences is inadequate, must enroll for selected undergraduate courses as a means of removing deficiencies. Inquiries concerning specific admission requirements and procedures should be addressed to: Coordinator of MPPPM Program, Department of Entomology, Biological Sciences Building, The University of Georgia, Athens, Georgia 30602-2603.

A total of 33 semester hours of graduate course work is required to complete the program. Students will normally complete one internship. The internship is designed to provide practical work experience in pest management, such as with an agricultural consultant, chemical company, or the Cooperative Extension Service. There is no thesis or language requirement. Each candidate for the degree must pass a final written and oral examination.

Master of Public Administration (MPA)

The purpose of the MPA degree is to educate students for administrative and managerial careers in the federal, state, and local levels of government. The prerequisites for the program include a baccalaureate degree, an undergraduate course in American government, and a course which includes work in accounting, computer science, or statistics. The program requires a minimum of 41 semester hours of course work. Twenty hours are required core courses or socialization courses while the remainder are devoted to elective specialties. An internship, full-time for three months or part-time for six months, is required for students not having administrative experience. It usually is served in a state, local, or federal government agency. Finally, the student must pass a comprehensive written examination in four fields of public administration.

Master of Social Work (MSW)

A program of the School of Social Work, this graduate professional degree typically requires four semesters of full-time study. Applicants from accredited BSW programs may receive advanced standing and earn the MSW degree in three semesters. Students who transfer from accredited graduate social work programs are required to take a minimum of 40 semester hours of study.

Academic work is divided between classroom and field instruction. Selected classes and field instruction are held in off-campus locations. Research is emphasized through evaluation of practice and an optional thesis.

In addition to meeting the general requirements of the Graduate School, applicants to the School of Social Work must have completed thirty semester or eighteen semester credit hours in the behavioral and social sciences that include content on the following: social, psychological, and biological determinants of human behavior; diverse cultures; social conditions; and social problems. The Master of Social Work program is

fully accredited by the Council on Social Work Education.

Specialist in Education (EdS)

The Specialist in Education degree is a self-contained degree program intermediate between the master's degree and the doctor's degree both in time and depth. It provides advanced study for those preparing for positions which call for a higher level of competence and specialization than that of the master's degree but without the heavy emphasis on research of the doctor's degree.

The degree is offered in the following fields: adult education, art education, communication sciences and disorders, early childhood education, educational leadership, educational psychology, English education, foreign language education, guidance and counseling, instructional technology, mathematics education, middle school education, music education, occupational studies, physical education, reading education, safety education, school psychology, science education, social science education, and special education.

Requirements

1. *Admission.* An applicant may be admitted as a prospective candidate for the Specialist in Education degree upon recommendation of the appropriate department/ division in the College of Education and approval of the dean of the Graduate School. To be admitted to this degree program, an applicant must hold a master's degree from a regionally accredited institution.

2. *Time Limit.* All requirements for the Specialist in Education degree must be completed within six years, beginning with the first registration for courses on the student's program of study. An extension of time may be granted only on conditions beyond the control of the student.

3. *Program of Study.* A program of study should be prepared by the student and the major professor during the first semester in residence. The program for the degree shall consist of a minimum of 30 semester hours of study at the graduate level beyond the master's degree. The program shall be planned as a logically organized whole, in light of the student's record in previous undergraduate and graduate courses, performance on standardized and non-standardized examinations, and the entire professional experience. The program of study, approved by the major professor and the graduate coordinator, is submitted to the Graduate School when the student applies for admission to candidacy. To be eligible for inclusion in a program of study, course work taken after January 1, 1977, must have been taken after the student was admitted as a prospective candidate for the Specialist in Education degree. A maximum of 15 hours of non-resident in-service credit is allowed on the program of study.

4. *Language Requirement.* All candidates for graduate degrees are required to show correctness and good taste in their use of both written and spoken English.

5. *Accepting Credit by Transfer.* A student fully accepted into a Specialist in Education degree program at an accredited institution may transfer six semester hours of graduate course work provided that the courses to be transferred constitute a logical part of the student's program of study and are approved by the student's major professor, the graduate coordinator, and the dean of the Graduate School. Such transfer of credit cannot exceed six semester hours, cannot reduce the residence requirement to fewer than 15 hours, and must fall within the time limit of the degree. The courses to be transferred may not have been used as part of the requirements for another degree. No grade below B (3.0) may be transferred. Transfer grades are not used in calculating semesterly and cumulative averages. All requests for transfer credit, with accompanying official transcripts, must be in the Graduate School at least 30 days prior to the time the student plans to graduate.

6. *In-Service Credit.* A maximum of 15 semester hours of graduate in-service credit taken at non-resident centers may be included in a program of study for the degree. This maximum will be reduced by any credit transferred from another institution.

7. *Admission to Candidacy.* On the completion of four or five courses, the student has the responsibility to see that an application for admission to candidacy is filed with the Graduate School. This application is a certification by the student's major department that the student has demonstrated the ability to do acceptable graduate work in the chosen field and has made normal progress toward the degree. The specific requirements for admission to candidacy are listed below:

(1) all prerequisites set as a condition to admission have been completed;
(2) the program of study has been approved by the major professor, the graduate co-

ordinator, and the dean of the Graduate School; and

(3) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed courses on the program of study (no course with a grade below C may be placed on the program of study).

8. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

9. *Final Examination.* The candidate must pass a written and/or oral comprehensive examination administered by the department. The results of the examination must be reported to the Graduate School.

10. *Registration Requirement.* A student must be registered at the University of Georgia for a minimum of three hours of credit the semester in which all degree requirements are completed.

11. *Final Clearance.* All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation.

Doctor of Education (EdD)

This degree provides advanced professional training for careers in teaching, administration, and other educational services. The degree is offered in the following fields of education: adult education, art education, early childhood education, education of gifted, educational leadership, educational psychology, elementary education, exercise science, higher education, instructional technology, mathematics education, music education, occupational studies, physical education, reading education, recreation and leisure studies, science education, social science education, and special education. Specialization in research training and in subject fields appropriate to elementary, secondary, and college teaching is provided.

Departments that have been approved to offer the Doctor of Education degree may implement this degree program by the adoption of appropriate rules and regulations. Departmental rules and regulations may not, however, conflict with the policies, rules, and regulations of the Graduate School.

Requirements

1. *Admission.* An applicant who desires to pursue advanced professional training in education beyond the master's degree, with a view to becoming a candidate for the Doctor of Education degree, will be expected to file formal application and present himself to the faculty of the appropriate department/division in the College of Education for special tests and interviews. Recommendation on admission will be made by the department only after its screening procedures have been carried out. Admission will be upon the recommendation of the graduate coordinator, or an authorized representative, and approval of the dean of the Graduate School.

2. *Residence.* The degree presupposes a minimum of three full years of study beyond the bachelor's degree and cannot be secured through summer work alone. At least two consecutive semesters (i.e., enrollment for a minimum of 20 hours of consecutive course work included on the program of study) must be spent in full-time resident study on the campus of the University of Georgia, one of which may be a summer semester.

3. *Time Limit.* All requirements for this degree, except the dissertation and final oral examination, must be completed within a period of six years. This time requirement begins with the first registration for graduate courses on the student's program of study.

A candidate for the Doctor of Education degree who fails to complete all degree requirements within five years after passing the comprehensive examinations and being admitted to candidacy will be required to take the comprehensive examinations again and be admitted to candidacy a second time.*

4. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

5. *Advisory Committee.* Before the end of the first year of residence of a prospective candidate for the Doctor of Education degree and upon the recommendation of the departmental graduate coordinator, the dean of the Graduate School shall appoint an advisory committee for the student. The committee will consist of a major professor, as chairman, and four additional members. The major professor and at least two of the other members of the committee must be appointed members of the graduate faculty. The

**When a candidate for a doctoral degree, who was admitted to candidacy prior to September, 1973, is readmitted to the Graduate School, he/she will have five years from the date of first readmission to complete all degree requirements.*

committee will be recommended to the dean of the Graduate School by the graduate coordinator after consultation with the student and faculty member involved.

The advisory committee, in consultation with the student, is charged with planning the student's program of study. It is also charged with approving the program of study, arranging the comprehensive written and oral examinations, approving a subject for the dissertation, approving the completed dissertation, and approving the student's defense of his/her research. The committee should advise the student of required research skills and other requirements.

Departmental recommendations for the advisory committee, and any replacements, shall be determined by procedures approved by a majority of the graduate faculty of that department.

6. *Programs of Study.* A preliminary program of study based on a minimum of 80 semester hours of course work beyond the baccalaureate degree, excluding dissertation credit, will be submitted to the graduate coordinator by the end of the student's first year of residence. The program of study must be developed by the major professor and the doctoral student and approved by a majority of the advisory committee. The program of study should constitute a logical whole and be significantly related to the student's vocational objectives. A minimum of 30 credit hours of course work, exclusive of dissertation credit, must be taken at the University of Georgia at the doctoral level; i.e., 40 total credit hours must be taken at the University of Georgia.

A final program of study will be submitted to the Graduate School prior to application for admission to candidacy. This program of study must be submitted on the proper form for approval by the advisory committee, the graduate coordinator, and the dean of the Graduate School. The final program of study must show all graduate courses relevant to the doctoral program (including courses from the master's degree and courses transferred from other universities), and not just courses satisfying the minimum degree requirement. A minimum of three hours of 9300, doctoral dissertation, must be included on the program of study.

Each department should evaluate carefully and fully each doctoral student's progress and qualifications at the end of each year of study in order to advise the student whether or not to continue in the program.

7. *Comprehensive Examinations.* A student must pass formal, comprehensive written and oral examinations before being admitted to candidacy for the degree. These examinations are administered by the student's advisory committee.

The written comprehensive examination, although administered by the advisory committee, may be prepared and graded according to the procedures and policies in effect in the student's department. The oral comprehensive examination will be an inclusive examination within the student's field of study. An examination of the student's dissertation prospectus may precede or follow the oral comprehensive examination but may not take the place of the oral comprehensive examination. All members of the student's advisory committee must be present for the entire period of both oral examinations.

The oral comprehensive examination is open to all members of the faculty and shall be announced by the Graduate School. The graduate coordinator must notify the Graduate School of the time and place of this examination at least two weeks before the date of the examination.

Following each examination, written and oral, each member of the advisory committee will cast a written vote of pass or fail on the examination. At least four out of a possible five positive votes are required to pass each examination. The results of both examinations will be reported to the Graduate School.

8. *Dissertation Planning.* The dissertation, being the most important single requirement for the Doctor of Education degree, should demonstrate the intelligent application of appropriate research procedures to the investigation of a problem in educational theory or practice. The dissertation problem must be conducted on some subject related to the student's major field of study and demonstrate evidence of scholarly ability and a thorough evaluation of relevant source materials. The conclusions must be logical, the literary form acceptable, and the contribution to education theory or practice substantial.

Persons who serve on the advisory committee at the time the dissertation research is undertaken must be faculty members knowledgeable in the areas of the student's research. They should be selected irrespective of their departmental affiliation. Usually membership of the advisory committee will remain unchanged during a student's entire doctoral program. However, if changes in the original committee are necessary, all parties are to be notified.

The major professor and advisory committee shall guide the student in planning the dissertation. The student will prepare a dissertation

prospectus. When the major professor certifies that the dissertation prospectus is satisfactory, it must be formally considered by the advisory committee in a meeting with the student. This formal consideration may not take the place of the comprehensive oral examination.

Approval of the dissertation prospectus signifies that members of the advisory committee believe that it proposes a satisfactory research study. Approval of the prospectus requires the agreement of at least four of the five members of the advisory committee as evidenced by their signing an appropriate form, which, together with the approved prospectus, is filed with the graduate coordinator.

9. *Admission to Candidacy.* The student is responsible for initiating an application for admission to candidacy so that it is filed with the dean of the Graduate School at least two semesters before the date of graduation. This application is a certification by the student's major department that the student has demonstrated ability to do acceptable graduate work in the chosen field of study and that:

(1) all prerequisites set as a condition to admission have been satisfactorily completed;
(2) research skills requirements, if applicable, have been met;
(3) the final program of study has been approved by the advisory committee, the graduate coordinator, and the dean of the Graduate School;
(4) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed courses on the program of study (no course with a grade below C may be placed on the final program of study);
(5) written and oral comprehensive examinations have been passed and reported to the Graduate School;
(6) a dissertation prospectus has been approved;
(7) the advisory committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointments; and
(8) the residence requirement has been met.

The major professor has the primary responsibility for guiding research, but the student should consult all members of the advisory committee to draw upon their expertise in relevant areas.

After admission to candidacy, a student must register for at least two additional semesters and a total minimum of 10 hours of dissertation or other appropriate credit. A student must register for a minimum of three hours of credit in any semester when using University facilities and/or staff time.

Once a student has been admitted to candidacy, the department has an ethical responsibility to ensure that appropriate faculty mentorship is provided to the candidate for completion of the degree.

10. *Dissertation Approval and Defense.* When the major professor is satisfied with the completed dissertation, he or she will certify that it has his or her approval and is ready to be read. The major professor will then distribute copies of the dissertation to the remaining members of the advisory committee, schedule a final oral defense, and notify the Graduate School. Subsequently, the Graduate School will announce the time and place of the defense of the dissertation to the University community. The committee members will have three weeks to read and evaluate the completed dissertation.

Written assent of three of the four committee members (other than the major professor) will be required before a dissertation will be approved as ready for the final defense. If the advisory committee declines to approve the dissertation as ready for the final defense, the major professor will notify the student and the Graduate School.

The defense of the dissertation will be chaired by the student's major professor and attended by all members of the advisory committee. It is open to all members of the University community. Four of the five members of the advisory committee must approve the student's dissertation and defense and must certify their approval in writing. The results of the defense of the dissertation must be reported to the Graduate School at least one week prior to graduation.

Once the dissertation has been approved by the advisory committee and the final oral examination has been passed, the dissertation must be submitted to the Graduate School for final approval no later than the last day of classes of the following semester. Dissertations which are not submitted by this deadline must be defended again and approved by the Advisory Committee before they will be considered by the Graduate School for final approval.

11. *Binding the Dissertation.* Three official copies of the dissertation must be filed in the University Library for binding. Each copy must carry a certificate of approval signed by the major professor and the dean of the Graduate School.

12. *Other Requirements.* Before the degree will be awarded, the student must file a copy of the abstract of the dissertation (not more than 350 words) with the Graduate School and the library. At the same time, the student must submit a receipt showing that he/she had deposited with the treasurer of the University the amount of $50 to cover the cost of microfilming the dissertation. If the student desires to have the dissertation copyrighted, an additional charge of $35 must be paid. This fee must be presented at the University Library in the form of a certified check or money order made payable to University Microfilms.

All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation. A student must enroll for at least three hours of credit in the semester in which graduation requirements are completed.

Cooperative Doctoral Programs

The University cooperates with State University of West Georgia to offer the Doctor of Education degree in educational leadership. The University also cooperates with Fort Valley State University to offer the Doctor of Education degree in the following areas: adult education, educational leadership, and occupational studies. For information concerning this program, please contact the Office of Graduate Admissions, The University of Georgia, Athens, Georgia 30602-7402.

Doctor of Musical Arts (DMA)

The program of study leading to the Doctor of Musical Arts degree provides advanced professional, academic, and research preparation for music careers in teaching, performing, composing, and conducting. Major concentrations are offered in music education, performance, composition, and choral conducting. The School of Music should be contacted regarding applied music options available within the performance area.

Requirements

1. *Admission.* In addition to meeting the general requirements for graduate admission to the University, an applicant must present evidence of potential for significant scholarly, artistic, and professional attainment in his or her intended major area of concentration. Such potential is normally documented through an assessment of the applicant's academic and professional background and standing; an audition; a portfolio review of musical compositions and performances; letters of recommendation; an interview; and other standard admission review procedures as appropriate to the intended major field of concentration. A recommendation for admission to the program from the School of Music must be approved by the dean of the Graduate School.

2. *Diagnostic Examinations.* Diagnostic examinations are administered prior to or during the initial term of enrollment. Information concerning the diagnostic examinations is available from the Office of Graduate Studies, School of Music.

3. *Residence.* The granting of this degree presupposes a minimum of three full years of study beyond the bachelor's degree. At least two consecutive semesters of full-time work (i.e., enrollment for a minimum of 20 hours of consecutive course work included on the program of study) must be spent in resident study on the campus of the University of Georgia.

4. *Time Limit.* All requirements for the degree except the dissertation or document* and final oral examination must be completed within a period of six years. This time requirement dates from the first enrollment for graduate course work applicable to the student's official program of study.

A candidate who fails to complete all degree requirements within five years after passing the comprehensive examinations and being admitted to candidacy will be required to take the comprehensive examinations again and reestablish degree candidacy.

5. *Research Skills Requirements.* The program of study requires research competencies appropriate to the elected major and minor fields of concentration. Research skills requirements will vary but may include such areas as statistics, computer science, music bibliography, diction, and foreign languages.

A student electing voice performance as the major field of concentration is required to demonstrate a reading knowledge of two foreign languages selected from Italian, German, or French. A student electing a major in either voice performance or choral conducting must demonstrate competence in German, French and Italian diction and pronunciation. For any other student, research skills are specified by the advisory committee as appropriate to the major or secondary field of concentration. Undergrad

uate course credit earned in the completion of language or other research skills requirements is not applicable to the minimum number of hours necessary for the awarding of the degree. Information concerning methods of satisfying research skills requirements may be obtained from the Office of Graduate Studies, School of Music.

6. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

7. *Advisory Committee.* The graduate coordinator of the School of Music serves as program advisor and recommends an advisory committee to be appointed by the dean of the Graduate School during the student's first year of enrollment. The major professor, program advisor, and three faculty members representing the second field of concentration and the areas of music history/literature and music theory comprise the membership of the advisory committee.

The advisory committee, in consultation with the student, is charged with planning the student's program of study, specifying research skills requirements, arranging for and administering the comprehensive examinations, approving the topic for the document or dissertation, approving and evaluating recital requirements, and approving the student's defense of his or her research.

Recommendations for advisory committee membership, and replacements should vacancies occur, must meet with the approval of the Graduate Studies Committee and the School of Music and the dean of the Graduate School.

8. *Programs of Study.* The program of study involves the completion of course work in five areas: major field; minor field; music history/literature and theory; music in higher education; and research/special requirements. A preliminary program of study is normally developed during the first year of residence. The program must be approved by a majority of the advisory committee.

A final program of study will be submitted to the Graduate School prior to application for admission to candidacy. The program of study must be submitted on the proper form for approval by the advisory committee, the graduate coordinator, and the dean of the Graduate School. The final program of study must show all graduate courses relevant to the doctoral program including courses from the master's degree, courses transferred from other universities, and those courses taken in residence stipulated as satisfying minimum degree requirements within the stated matriculation areas. A minimum of three hours of 9300, doctoral dissertation, must be included on the program of study.

The department should evaluate carefully and fully each doctoral student's progress and qualifications at the end of the first year of study in order to advise the student whether or not to continue in the program.

9. *Comprehensive Examinations.* The comprehensive examinations are designed to evaluate the student's ability to assimilate and integrate knowledge, apply historical and theoretical concepts, demonstrate skills, and draw conclusions. The examinations, consisting of written and oral segments, may include a practicum, and are normally scheduled at or near the completion of course work. They cover doctoral course work completed in meeting the requirements of each cognate area of study for the degree, graduate work completed at the master's level, and general musical knowledge acquired through independent study, research, and professional experience. The advisory committee prepares, administers, and evaluates the comprehensive examinations. The major professor reports the outcome to the dean of the Graduate School. At least four out of a possible five affirmative votes are required to pass both the written and oral examinations. Successful completion of the written examination is a prerequisite for scheduling the oral comprehensive examination. All members of the student's advisory committee must be present for the entire oral examination.

The oral comprehensive examination is open to all members of the faculty and shall be announced by the Graduate School. The graduate coordinator notifies the Graduate School of the time and place of the oral examination at least two weeks prior to its administration.

An examination of the student's dissertation prospectus may follow the oral comprehensive examination or be scheduled at a later date. The examination of the dissertation prospectus may not take the place of the oral comprehensive examination.

10. *Dissertation/Document.* A candidate electing music education as the major field of concentration must present a dissertation representing originality of research, independent thinking, scholarly ability, and technical mastery of the chosen topic of study. A candidate of performance, choral conducting, or composition is required to present a written document which, in conjunction with required recitals, is submitted in fulfillment of dissertation requirements. The

document is more limited in scope than the dissertation, though comparable in scholarship and its contribution to existing knowledge in the field.

The dissertation or document must demonstrate originality and scholarship, the conclusions must be quantified, the literary form consistent with normal standards for scholarly writing, and the contribution to knowledge meriting publication. A candidate whose major field of concentration is composition or conducting may elect a dissertation with the consent of the advisory committee. When composition is the major field, the dissertation or document normally will include one or more major original musical works. Scores as well as an accompanying analytical essay are required.

11. *Recitals.* A minimum of three public recitals is required for a student whose major concentration is performance. A student with a concentration in composition is required to present two public recitals. Four recital performances are required of a student majoring with a concentration in choral conducting and literature.

Programs for all recitals and performances must be approved two months in advance by the major professor and advisory committee. When a lecture-recital is to be given, an outline of the lecture must accompany the program proposal.

The first full recital must be presented prior to scheduling the written comprehensive examination; the last recital may not be scheduled until the oral comprehensive examination has been satisfactorily completed and degree candidacy established.

Recital projects presented in partial fulfillment of degree requirements will be evaluated by the full membership of the advisory committee. The committee will notify the major professor if the recital presentation is approved. Should the committee decline approval, the major professor and the dean of the Graduate School are so notified. The graduate coordinator of the School of Music, or an approved designate, will be responsible for coordinating the evaluation of recital project presentations.

12. *Dissertation/Document Planning and Approval.* The student is responsible for the development of a proposal for the dissertation or document. The proposal is developed with guidance provided by the major professor or designated chairman of the advisory committee. The advisory committee is to be consulted on a regular basis during the period of proposal development. Approval of the prospectus requires the agreement of at least four of the five members of the advisory committee as evidenced by their signing an approval sheet attached to the final draft of the prospectus. This action signifies that members of the advisory committee believe that the prospectus proposes a satisfactory research study. A copy of the approved prospectus is filed with the graduate coordinator.

13. *Admission to Candidacy.* The student is responsible for initiating an application for admission to candidacy so that it is filed with the dean of the Graduate School at least two semesters before the date of graduation. This application is a certification by the School of Music that the student has demonstrated ability to do acceptable graduate work in the major concentration and that:

(1) all prerequisites set as a condition to admission have been satisfactorily completed;
(2) research skills requirements have been met;
(3) the final program of study has been approved by the advisory committee, the graduate coordinator, and the dean of the Graduate School;
(4) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed graduate courses on the program of study (no course with a grade below C may be placed on the final program of study);
(5) written and oral comprehensive examinations have been passed and reported to the Graduate School;
(6) the advisory committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointment; and
(7) the residence requirement has been met.

After admission to candidacy, a student must register at least two additional semesters and a total minimum of 10 hours of dissertation or research credit. The student must register for a minimum of three hours of credit in any semester when using University facilities and/or staff time.

Once a student has been admitted to candidacy, the department has an ethical responsibility to ensure that appropriate faculty mentorship is provided to the candidate for completion of the degree.

14. *Dissertation Approval and Defense.* When the major professor is satisfied with the completed dissertation or document, he or she will certify that it has his or her approval and is

ready to be read. The major professor will then distribute copies of the manuscript to the remaining members of the advisory committee, schedule a final oral defense, and notify the dean of the Graduate School. Subsequently, the Graduate School will announce the time and place of the defense of the dissertation or document to the University community. The committee members will have three weeks to read and evaluate the completed manuscript.

Written assent of three of the four committee members (other than the major professor) will be required before a dissertation or document will be approved as ready for the final defense. If the advisory committee declines to approve the dissertation or document as ready for the final defense, the major professor will notify the student and the dean of the Graduate School.

The defense of the dissertation or document will be chaired by the student's major professor and attended by all members of the advisory committee. Four of the five members of the advisory committee must approve the student's dissertation or document and defense and must certify their approval in writing. The results of the defense of the dissertation or document must be reported to the Graduate School at least one week prior to graduation.

Once the dissertation has been approved by the advisory committee and the final oral examination has been passed, the dissertation must be submitted to the Graduate School for final approval no later than the last day of classes of the following semester. Dissertations which are not submitted by this deadline must be defended again and approved by the Advisory Committee before they will be considered by the Graduate School for final approval.

15. *Binding the Dissertation/Document.* Three official copies of the dissertation or document must be filed in the University Library for binding. Each copy must carry a certificate of approval signed by the major professor and the dean of the Graduate School.

16. *Other Requirements.* Before the degree will be awarded, the student must file a copy of the abstract of the dissertation or document (not more than 350 words) with the Graduate School and the library. At the same time, the student must submit a receipt showing that he or she has deposited with the treasurer of the University the amount of $50 to cover the cost of microfilming the dissertation or document. If the student desires to have the dissertation or document copyrighted, an additional charge of $35 must be paid. This fee must be presented at the University Library in the form of a certified check or money order made payable to University Microfilms.

All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation. A student must be registered for a minimum of three hours of credit the semester in which all degree requirements are completed.

Doctor of Public Administration (DPA)

The objective of the program is to provide doctoral-level training for several client groups. First, the program will prepare students to serve in executive or upper managerial levels in local, state, and federal jurisdictions. Second, the program will prepare students for a variety of institutional settings that have significant interfaces with public agencies. These include various institutes, private planning agencies, and consulting organizations. Third, the program will help prepare individuals for specialized research and teaching careers.

The department may implement this degree program by the adoption of appropriate rules and regulations. Departmental rules and regulations may not, however, conflict with the policies, rules, and regulations of the Graduate School.

Requirements

1. *Admission.* An applicant may be admitted as a prospective candidate for the Doctor of Public Administration degree upon certification by the major department that he or she is a person of proper attainment and promise. The department must certify that appropriate courses can be offered and required research adequately supported and directed. Admission must be approved by the dean of the Graduate School.

2. *Residence.* The granting of this degree presupposes a minimum of three full years of study beyond the bachelor's degree. At least two consecutive semesters of full-time work (i.e., enrollment for a minimum of 20 hours of consecutive course work included on the program of study) must be spent in resident study on this campus. If the student holds an assistantship or has other part-time duties, the residence requirement will be increased to provide the equivalent of two consecutive semesters of full-time study.

3. *Time Limit.* All requirements for the degree, except the dissertation and final oral examination, must be completed within a period of six years. This time requirement dates from the first registration for graduate courses on the program of study.

A candidate for the Doctor of Public Administration degree who fails to complete all degree requirements within five years after passing the comprehensive examinations and being admitted to candidacy will be required to take the comprehensive examinations again and be admitted to candidacy a second time.*

4. *Grade Average.* To be eligible for graduation, a student must maintain a 3.0 (B) average on all graduate courses taken and on all courses on the program of study.

5. *Advisory Committee.* Before the end of the first year of residence of a prospective candidate for the Doctor of Public Administration degree and upon the recommendation of the departmental graduate coordinator, the dean of the Graduate School shall appoint an advisory committee for the student. The committee will consist of a major professor, as chairman, and four additional members. The major professor and at least two of the other members of the committee must be appointed members of the graduate faculty. The committee will be recommended to the dean of the Graduate School by the graduate coordinator after consultation with the student and faculty members involved.

The advisory committee, in consultation with the student, is charged with planning the student's program of study. It is also charged with approving the program of study, arranging the comprehensive written and oral examinations, approving a subject for the dissertation, approving the completed dissertation, and approving the student's defense of his or her research. The committee should advise the student of required research skills and other requirements.

The department's recommendations for the advisory committee, and any replacements, shall be determined by procedures approved by a majority of the graduate faculty of the department.

6. *Programs of Study.* A preliminary program of study, developed by the major professor and the doctoral student and approved by a majority of the advisory committee, will be submitted to the graduate coordinator by the end of the student's first year of residence. The program of study should constitute a logical whole.

A final program of study will be submitted to the Graduate School prior to application for admission to candidacy. This program of study must be submitted on the proper form for approval by the advisory committee, the graduate coordinator, and the dean of the Graduate School. The final program of study must show all graduate courses relevant to the doctoral program (including courses from the master's degree and courses transferred from other universities), and not just courses satisfying the minimum degree requirement. A minimum of five hours of 9300, doctoral dissertation, must be included on the program of study.

The department should evaluate carefully and fully each doctoral student's progress and qualifications at the end of the first year of study in order to advise the student whether or not to continue in the program.

7. *Comprehensive Examinations.* A student must pass formal, comprehensive written and oral examinations before being admitted to candidacy for the degree. These examinations are administered by the student's advisory committee.

The written comprehensive examination, although administered by the advisory committee, may be prepared and graded according to the procedures and policies in effect in the student's department. The oral comprehensive examination will be an inclusive examination within the student's fields of study. An examination of the student's dissertation prospectus may precede or follow the oral comprehensive examination but may not take the place of the oral comprehensive examination. All members of the student's advisory committee must be present for the entire period of both oral examinations.

The oral comprehensive examination is open to all members of the faculty and shall be announced by the Graduate School. The graduate coordinator must notify the Graduate School of the time and place of this examination at least two weeks before the date of the examination.

Following each examination, written and oral, each member of the advisory committee will cast a written vote of pass or fail on the examination. At least four out of a possible five positive votes are required to pass each examination. The results of both examinations will be reported to the Graduate School.

8. *Admission to Candidacy.* The student is responsible for initiating an application for admis-

**When a candidate for a doctoral degree, who was admitted to candidacy prior to September, 1973, is readmitted to the Graduate School, he/she will have five years from the date of first readmission to complete all degree requirements.*

sion to candidacy so that it is filed with the dean of the Graduate School at least two semesters before the date of graduation. This application is a certification by the student's major department that the student has demonstrated ability to do acceptable graduate work in the chosen field of study and that:

(1) all prerequisites set as a condition to admission have been satisfactorily completed;
(2) research skills requirements have been met;
(3) the final program of study has been approved by the advisory committee, the graduate coordinator, and the dean of the Graduate School;
(4) an average of 3.0 (B) has been maintained on all graduate courses taken and on all completed courses on the program of study (no course with a grade below may be placed on the final program of study);
(5) written and oral comprehensive examinations have been passed and reported to the Graduate School;
(6) the advisory committee, including any necessary changes in the membership, is confirmed and all its members have been notified of their appointments; and
(7) the residence requirement has been met.

After admission to candidacy, a student must register for at least two additional semesters and a total minimum of 10 hours of dissertation or other appropriate credit. A student must register for a minimum of three hours of credit in any semester when using University facilities and/or staff time.

Once a student has been admitted to candidacy, the department has an ethical responsibility to ensure that appropriate faculty mentorship is provided to the candidate for completion of the degree.

9. *Dissertation Planning.* Students pursuing this degree must present a dissertation on some subject connected with their major field of study. The dissertation must represent originality in research, independent thinking, scholarly ability, and technical mastery of a field of study. The conclusions must be logical, the literary form acceptable, and the contribution to knowledge meriting publication.

Persons who serve on the advisory committee at the time the dissertation research is undertaken must be faculty members knowledgeable in the areas of the student's research. They should be selected irrespective of their departmental affiliation. Usually membership of the advisory committee will remain unchanged during a student's entire doctoral program, while at other times changes in the original committee will be necessary.

The major professor has the primary responsibility for guiding research, but the student should consult all members of the advisory committee to draw upon their expertise in relevant areas.

The major professor and advisory committee shall guide the student in planning the dissertation. The student will prepare a dissertation prospectus. When the major professor certifies that the dissertation prospectus is satisfactory, it must be formally considered by the advisory committee in a meeting with the student.

Approval of the dissertation prospectus signifies that members of the advisory committee believe that it proposes a satisfactory research study. Approval of the prospectus requires the agreement of at least four of the five members of the advisory committee as evidenced by their signing an appropriate form, which, together with the approved prospectus, is filed with the graduate coordinator.

10. *Dissertation Approval and Defense.* When the major professor is satisfied with the completed dissertation, he or she will certify that it has his or her approval and is ready to be read. The major professor will then distribute copies of the dissertation to the remaining members of the advisory committee, schedule a final oral defense, and notify the Graduate School. Subsequently, the Graduate School will announce the time and place of the defense of the dissertation to the University community. The committee members will have three weeks to read and evaluate the completed dissertation.

Written assent of three of the four committee members (other than the major professor) will be required before a dissertation will be approved as ready for a final defense. If the advisory committee declines to approve the dissertation as ready for the final defense, the major professor will notify the student and the Graduate School.

The defense of the dissertation will be chaired by the student's major professor and attended by all members of the advisory committee. Four of the five members of the advisory committee must approve the student's dissertation and defense and must certify their approval in writing. The results of the defense of the dissertation must be reported to the Graduate School at least one week prior to graduation.

Once the dissertation has been approved by the advisory committee and the final oral examination has been passed, the dissertation must be submitted to the Graduate School for final approval no later than the last day of classes of the following semester. Dissertations which are not submitted by this deadline must be defended again and approved by the Advisory Committee before they will be considered by the Graduate School for final approval.

11. *Binding the Dissertation.* Three official copies of the dissertation must be filed in the University Library for binding. Each copy must carry a certificate of approval signed by the major professor and the dean of the Graduate School.

12. *Other Requirements.* Before the degree will be awarded, the student must file a copy of the abstract of the dissertation (not more than 350 words) with the Graduate School and the library. At the same time, the student must submit a receipt showing that he or she has deposited with the treasurer of the university the amount of $50 to cover the cost of microfilming the dissertation. If the student desires to have the dissertation copyrighted, an additional charge of $35 must be paid. This fee must be presented at the University Library in the form of a certified check or money order made payable to University Microfilms.

All requirements for the degree must be completed and reported to the Graduate School no later than one week prior to graduation. A student must enroll for at least three hours of credit in the semester in which graduation requirements are completed.

Certification of Professional Personnel

The University of Georgia offers graduate programs leading to professional personnel certification at the master's, specialist, and doctoral levels in some 40 different teaching, administrative, supervisory, and school service fields.

The degrees Master of Education and Master of Arts (Education) include both teaching and professional courses for fifth-year certification. Students who complete a Master of Arts degree may meet certification requirements by taking professional courses in education.

A 48 semester-hour program leading to Level 5 certification is available for students holding a baccalaureate degree which meets the teaching field requirements at the Level 4 level in art education, social science education, science education, and language education. The program allows two options, one leading to Level 4 certification upon completion of Phase I courses and subsequently to Level 5 certification, and the other leading directly to Level 5 certification upon completion of the entire program.

Specific course requirements for graduate certification may be obtained by contacting the appropriate department within the College of Education. In addition to completing prescribed academic work, individuals applying for initial teacher certification beginning March 1, 1999, must present passing scores on Praxis I academic skills test in reading, mathematics, and writing. Individuals are exempt from this requirement if they have earned qualifying scores on any of these tests: SAT total score 1000 (with at least 480V and 520M); GRE total score 1030 (with at least 490V and 540Q); or ACT total score 22 (with at leat 21V and 22M). An applicant must also earn satisfactory scores on the Praxis II (Subject Assessment) in the appropriate subject areas before an application can be submitted. Applications for evaluation, professional certificates, and Praxis I and II registration packets and study guides are available from the Associate Dean s Office, G-10 Aderhold Hall.

Certificate Programs

Conservation Ecology and Sustainable Development

The University of Georgia offers a certificate in conservation ecology and sustainable development through the Institute of Ecology. Students who earn this certificate will receive interdisciplinary preparation to handle the unique, multidisciplinary problems associated with working in the area of conservation and sustainable development. Students in the natural sciences will add a social science perspective to their understanding of the ecology of development, and students in the social sciences will learn ecological principles so that their decisions can be grounded in biological fact.

The graduate certificate program requires a student to complete at least 20 hours of credit. The program of study must include four core courses: ECOL 6080, *Principles of Conservation and Sustainable Development I* (3 hrs.); ECOL 6140, *Principles of Conservation and Sustainable Development II* (3 hrs.); a semina

elective in conservation and sustainable development (2 hrs.); and ECOL 8400, *Perspectives on Conservation Ecology and Sustainable Development* (1 hr., repeated two times). The remaining hours of credit (at least 10) will be made up by elective courses selected from a list of approved courses. One or more of these courses may jointly fulfill the requirements in the graduate degree program of their department or school. The graduate student and his/her advisor in the student's academic department plan the program of study to fulfill the requirements of the certificate program.

Any graduate student in a natural science or a social science degree program at the University of Georgia is eligible to apply for admission to the certificate program. Application to the program should be made by filling out an application form available from the Coordinator of the Conservation Ecology and Sustainable Development Program. Applications may be received and acted upon at any time. Acceptance is provisional until the candidate's proposed program of study is approved.

For more information about the program, contact the graduate coordinator in the Institute of Ecology, Ecology Building, (706) 542-2968.

Environmental Ethics

The University of Georgia has a Faculty of Environmental Ethics; a certificate program at the graduate level; and a variety of courses devoted partially or entirely to issues of values and the environment.

The Certificate in Environmental Ethics. This certificate is awarded to graduate students meeting the following requirements: The completion of at least 18 hours of graduate work, including at least 14 hours of graduate course work in approved courses along with an approved research paper in environmental ethics designated for at least three hours of graduate credit. All candidates are required to take the following courses: EETH/PHIL 6220, *Environmental Ethics*; EETH/ECOL 6200, *Ecological Concepts;* EETH/PHIL 6250, *Technology and Values* or EETH/JURI 7870, *Environmental Dispute Resolution;* and EETH 6000, *Environmental Ethics Seminar,* as a common core. In addition, all candidates are required to pass an oral exam.

Other courses may be chosen by the student, with the approval of the graduate coordinator, from a list provided, according to his or her individual interest and career objectives, with the provision that no more than nine hours of course work for credit toward the certificate may be applied from any one academic field. Work on the certificate may be undertaken by any graduate student at the university.

To be admitted to the certificate program, the student must be admitted to the University as a prospective candidate for a graduate degree, a professional degree, or as a nondegree candidate (see General Regulations of the Graduate School Bulletin), and then make application to the graduate coordinator of the Faculty of Environmental Ethics. The nondegree candidate status applies to the person who already holds a master's or doctor's degree from an accredited institution and who wishes to take graduate courses without becoming a candidate for a degree. All prospective recipients of the certificate should be admitted to a school or college of the University and be assigned an advisor. The student and his or her advisor can then plan the program of study that will be a part of the student's application for acceptance into the environmental ethics program. The current graduate coordinator of the Faculty of Environmental Ethics is Dr. Peter G. Hartel, Department of Crop and Soil Sciences, (706) 542-0898.

Geographic Information Science

The University of Georgia offers a graduate certificate in geographic information science. The field of geographic information science has grown rapidly with the development of powerful and versatile computing environments since the early 1980's. This field comprises all phases of processing spatially-referenced data, including data acquisition (remote sensing, global positioning systems), data analysis (vector- and raster-based representational media, photogrammetry, spatial statistics), data interpretation, and data display (cartography). Since employment opportunities for people trained in geographic information science have proliferated, the University of Georgia has developed this graduate certification program. The Geography Department offers coursework and related training in fundamental topics of geographic information science with other departments and organizational units, such as Anthropology, the Institute of Ecology, School of Forestry, School of Environmental Design, and the College of Agriculture and Environmental Science, offering coursework and training in applications of geographic information science. The curriculum structure is drawn primarily from Geography

courses which are heavily enrolled with students from other units at UGA. The requirements were developed by an interdisciplinary committee.

The Graduate Geographic Information Science Certificate Program is designed with three components: a set of prerequisite skills necessary to gain entry into the program, a set of courses required of all students enrolled in the program, and a set of elective courses that permit exploration of more advanced themes in geographic information science. The prerequisite training, considered to be essential background for the certificate program, includes competence in elementary calculus, computer science, statistics, photo interpretation, and cartography. The three required courses include introductory GIS, an advanced GIS class focused on analysis, and a graduate level seminar in GIS. Elective courses include cartography, engineering surveying with the Global Positioning System (GPS), photogrammetry, remote sensing, and advanced remote sensing with GIS applications, with a formal requirement of at least one 8000-level seminar. A final requirement is the development of individual research projects or internships in geographic information science. Together the required and elective courses in the certificate program total 17 semester credits. Students are awarded the Graduate Certificate in Geographic Information Science upon completion of all certificate requirements and completion of a University of Georgia graduate degree.

Gerontology

The University of Georgia has a strong commitment to gerontology training. Graduate training in gerontology is directed through the Gerontology Center located in Candler Hall. A graduate certificate of gerontology is awarded by the Gerontology Center. The Georgia Center for Continuing Education also has a gerontology program which provides training in gerontology for continuing education credits.

The Gerontology Center. The major purpose of the Gerontology Center is to coordinate and promote activities throughout the University relating to aging. The center's primary responsibilities are to coordinate graduate training and research and to promote faculty development in gerontology. There is a Faculty of Gerontology associated with the Gerontology Center from 29 departments in 10 colleges and schools on campus. Additionally, the center has a full-time director, Dr. Leonard W. Poon, and Assistant Directors Dr. Everett Lee and Dr. Roger W. Morrell. The Faculty of Gerontology, chaired by Dr. Poon, oversees pre- and post-doctoral training, research and service in the process of aging, as well as the application of knowledge to practice. The center also serves as a liaison between the activities and resources of the University and federal, state, and local funding agencies and interest groups. The Gerontology Center coordinates the Georgia Gerontology Consortium which is composed of four programs: The Distance Learning Partnership in Gerontology, The Southern Regional Student Convention on Gerontology and Geriatrics, The Georgia Gerontology Consortium Seed Grant Program, and The Faculty Instruction, Research, and Outreach Development Program. The Center also regularly sponsors conferences and speakers on a broad range of topics at the national, regional, and local level.

Graduate Certificate in Gerontology. The Gerontology Center awards a Certificate in Gerontology to graduate students meeting certain requirements. Students will complete a total of 18 hours of graduate level courses to meet the requirements of the Certificate Program. Twelve of these hours must be taken from the four categories of required courses. Three hours must be fulfilled to meet a research/practicum requirement. The remaining three hours may be chosen from the list of electives that can be provided by the Assistant Director of the Gerontology Center.

Required Course: GRNT 6000 - *Seminar in Aging* (three hours). All students are required to complete GRNT 6000 - *Seminar in Aging.* This course should be completed at the beginning of the program of study. The purpose of the seminar is to provide students with an overview of gerontology and introduce students to several gerontology faculty members who will be guest lecturers in the course. The various content included in this seminar course should be helpful in deciding what Certificate courses are most relevant to a student s individualized plan for study.

Other Required Courses: *The Psychology, Sociology, and Biology of Aging* (a total of nine hours). All students are required to complete at least one course on the biology, sociology, and psychology of aging from a list of courses that can be provided by the Assistant Director of the Gerontology Center.

Research/Practicum. All students are required to complete three hours in a research or practicum experience. Students whose discipline is focused on research may submit a thesis or

dissertation which they completed to fulfill master's or doctoral requirements within their academic department or they may complete an individual research project for not less than three hours of credit. The thesis, dissertation, or research project must focus on some aspect of aging, and the project must be approved in writing by the Gerontology Center s Director or Assistant Director prior to development of the project in order to qualify for the Certificate.

Students whose discipline has a practitioners emphasis may complete an approved practicum in a gerontological setting for not less than three hours. The practicum experience must also be approved in writing prior by the Gerontology Center's Director or Assistant Director before beginning.

Work on the certificate may be undertaken by any graduate student at the university. Courses that may be applied toward the certificate are found in the following academic units: adult education; cellular biology; child and family development; foods and nutrition; health promotion and behavior; housing and consumer economics; pharmacy; psychology; recreation and leisure studies; social work; and sociology.

To be admitted to the certification program, the student must be admitted to a department of the university at the graduate level either as a prospective candidate for a graduate degree or as a nondegree candidate and then make application to the Assistant Director of Gerontology Center. The nondegree candidate status applies to the person who meets requirements for admission to the Graduate School but who wishes to take graduate courses without becoming a candidate for a degree. The prospective recipient of the certificate should be admitted to a department of the university and be assigned an advisor. The student and his/her advisor can then plan the program of study that will be a part of the student's application for acceptance into the gerontology program.

For further information concerning the Gerontology Center contact Dr. Leonard W. Poon, Chairman of the Faculty of Gerontology and Director of the Gerontology Center. For information about the certificate program or courses available for credit, contact Dr. Roger W. Morrell, Assistant Director of the Gerontology Center. Both individuals may be reached at The Gerontology Center, 100 Candler Hall, University of Georgia, Athens, GA 30602-1775; phone (706) 542-3954; FAX: (706) 542-4805. Poon email: lpoon@geron.uga.edu; Morrell email: rmorrell@geron.uga.edu.

Global Policy Studies

The University of Georgia has a Center for the Study of Global Issues (GLOBIS) which offers a certificate in global policy studies at the graduate level.

GLOBIS explores and develops interdisciplinary and interprofessional programs of instruction, research, and service on a wide range of global issues. It administers undergraduate and graduate certificate programs in global policy studies; sponsors instructional and research-oriented symposia, seminars, lectures, and publications; and serves as a focal point for those interested in foreign languages and international studies both inside and outside the university.

The certificate program in global policy studies is designed to provide students with an international perspective as well as specialized, technical knowledge and skills. Graduate students earn the certificate as a supplement to a regular degree program. The certificate program blends well with disciplines which have traditionally prepared individuals for international service, e.g., business, economics, foreign languages, history, law, and political science. It is also designed for individuals in fields which have not traditionally offered international curricula, such as accounting, agriculture, education, forestry, journalism, nutrition, and plant sciences.

Most new students enrolled in a degree or professional program will find that they can satisfy the certificate requirements with few, if any, additions to their regular program of study. Many departments offer courses which simultaneously meet both certificate and degree requirements. Students applying to the university who are interested in the certificate program should contact GLOBIS for assistance in processing their application.

The requirements for the certificate include 24 semester hours of course work, including a nine-hour core sequence, a nine-hour substantive specialty, a six-hour skill requirement, an internship, and a paper requirement. Certificate students must take a minimum of 18 semester hours of this course work in residence at the University of Georgia.

The core sequence consists of three courses: (1) a course with global scope in the discipline in which the individual plans to develop his or her substantive specialty; (2) a relevant course in a foreign area or region, such as Africa, Asia, Europe, Latin America, or the Middle East (students who are doing their substantive specialty

in a foreign area or region should take this course in a cognate discipline instead); and (3) GPST 6000. This course will cover the planning, implementation, and evaluation of policies designed to deal with global problems, especially development.

The substantive specialty is composed of three courses that constitute a coherent area of concentration relevant to global policy studies. Many of these substantive specialties are identified by discipline, issue, or region, such as economics, development, or African affairs.

The professional skill requirement refers to competence in a foreign language or other relevant research or policy skill. Six hours in a foreign language beyond the 2001 level at the University of Georgia or the equivalent as determined by standardized proficiency tests is required.

The internship requirement consists of practical work experience in a student's chosen area. This requirement may be satisfied by an actual internship course or an equivalent field experience.

There is also a requirement for a substantial paper on a global subject. This paper may be a master's thesis, a doctoral dissertation, or a paper suitable for presentation at a professional meeting.

Finally, certificate students must have at least one of these courses in a second or cognate discipline in addition to the interdisciplinary course in global policy analysis.

For further information concerning the certificate program, write Dr. Markus M. L. Crepaz, Coordinator, The Center for the Study of Global Issues, The University of Georgia, 113 Franklin House, Athens, GA 30602-4240, or call (706) 542-2947, or e-mail mcrepaz@arches.uga.edu.

Historic Preservation Studies

With the passage of the National Historic Preservation Act of 1966, Congress declared historic preservation a part of national policy and authorized various programs to assist in the identification and perpetuation of those cultural resources which represent our national patrimony. Over the past 30 years much progress has been made in the documentation and preservation of our heritage. This progress has stimulated increased interest in the cultural environment as well as a desire, among many, to achieve a greater understanding of which elements constitute our heritage and how they may be protected for future generations.

Objectives of the Program:

(a) To develop within students an awareness of the contributions which historic resources make to the quality of environments and to the quality of life available to the general populace.

(b) To foster an understanding of historic preservation needs, problems, and opportunities and the role which individual citizens can play in the protection and perpetuation of historic resources.

(c) To prepare students, as citizens within their respective communities, to serve as volunteer members of citizen preservation organizations and/ or government commissions and to provide informed leadership to these and any other community preservation efforts.

(d) To provide students an opportunity to study historic preservation as a part of their academic program or as a supplemental educational opportunity available to graduates.

Curriculum: The certificate program requires a student to complete 18 hours of credit. These must include the nine hours of certificate core requirements with the remaining nine hours to be selected from the historic preservation curriculum. Three hours of the certificate requirements may be satisfied by a preservation-related thesis in the student's academic department. The proposal for these theses must be jointly approved by the graduate coordinator, or major professor, of the student's degree program and the Director of Graduate Studies in Historic Preservation.

For additional information contact John C. Waters, Director of Graduate Studies in Historic Preservation, (706) 542-4706.

Marriage and Family Therapy

The Pre-Professional Graduate Certificate Program in Marriage and Family Therapy is designed to provide an interdisciplinary program for graduate students interested in the applied field of marriage and family therapy. The certificate program involves three units of the University of Georgia: the College of Education, the College of Family and Consumer Sciences, and the School of Social Work. Completion of the requirements for the certificate program will provide a strong academic basis preparing the student to undertake further supervised clinical training in marriage and family therapy. The certificate program is not intended to provide all the

training necessary to function as an independent professional nor to meet all the requirements for (a) state licensure as a marriage and family therapist or (b) clinical membership in the American Association for Marriage and Family Therapy. Graduate courses that may be used to fulfill requirements for the certificate program are offered in several units of the University of Georgia including the Department of Child and Family Development, the Department of Counseling and Human Development, and the School of Social Work.

Any graduate student in the previously mentioned or related programs at the University is eligible to apply for admission to the certificate program.

To be admitted to the Certificate Program in Marriage and Family Therapy, the student must be admitted to the department of the university at the graduate level and then make an application to the Coordinator of the Faculty of Marriage and Family Therapy Certificate Program. The graduate student and his/her advisor in the student's academic department plan the program of study to fulfill the requirements of the certificate program. With appropriate approval, courses in the certificate program may also apply to the degree program in the student's academic department. For master's degree students, the certificate will be awarded upon completion of the certificate requirements and completion of the master's degree program in which the student in enrolled. For students already holding a master's degree, the certificate will be awarded at the end of the semester in which the certificate requirements are satisfied.

For further information concerning the certificate program, contact the Coordinator, MFT Certificate Program, School of Social Work, University of Georgia, Athens, GA 30602-7016.

Women's Studies

The Women's Studies Program offers a 15-hour graduate certificate in women's studies. The certificate is available to those students who are pursuing a graduate degree in any of the university's schools or colleges or to those who already hold a graduate degree. The purpose of the certificate is to expose students to the rapidly expanding interdisciplinary scholarship on women which might otherwise be neglected in their traditional curricula.

All certificate candidates are required to take the two following courses: WMST 6010, *Introduction to Feminist Theories,* 3 hours, and WMST 7010, *Women and the Construction of Knowledge,* 3 hours (prerequisite: WMST 6010). A student who has done extensive undergraduate or graduate course work in feminist theory may waive WMST 6010, without credit, and substitute another approved course by petitioning the program. The nine remaining hours may be drawn from the WMST courses listed below, or from courses in other cooperating departments which have been approved by the program:

WMST 6120	Biology and Politics of Women's Reproduction. 3 hours.
WMST 6250	Special Topics in Women's Studies. 3 hours.
WMST 7050	The Political Economy of Gender in Third World Societies. 3 hours.
WMST 7060	Black Women's Narratives. 3 hours.
WMST 7100	Lesbian and Gay Studies. 3 hours.
WMST 7950	Directed Research in Women's Studies. 1-3 hours.
WMST 8020	Seminar in Advanced Feminist Theory. 1-3 hours.

For a complete listing of certificate courses in women's studies and for an application to the certificate program, contact Dr. Patricia Del Rey, Director of Women's Studies or Heather Kleiner, Associate Director, 230K Main Library, Athens, GA 30602-1647, (706) 542-2846.

Course Listings

The College of Agricultural and Environmental Sciences

Gale A. Buchanan, Dean
(Conner Hall)

The research and academic programs in the College of Agricultural and Environmental Sciences focus on training students to meet the needs of agriculture and environmental protection on a regional, national, and international level. The departments within the College offer graduate degrees at the masters and doctorate levels in a variety of fields; additional professional degrees are offered by some departments. These graduate degree programs offer considerable flexibility to meet individual students' interests and backgrounds, so that students can prepare for careers in industry, government, or academia. General information regarding degree programs is available from the College of Agricultural and Environmental Sciences. Details about specific admission or program requirements and options should be discussed with the appropriate department or graduate coordinator listed in this Bulletin..

Agricultural and Applied Economics

Fred C. White, *Acting Head*
Jack E. Houston, *Graduate Coordinator, 542-0755*
(Conner Hall)

Graduate study is offered at both the masters and doctoral levels. The Master of Science (MS) in agricultural economics and the Master of Science (MS) in environmental economics degrees require 27 hours minimum of course work and three hours of thesis. A Master of Agricultural Economics (MAE) degree consists of a minimum of 36 hours of course work including a technical report in lieu of a formal thesis. The Doctor of Philosophy (PhD) degree consists of a minimum of 63 hours of course work beyond the bachelor's degree, satisfactory performance on written and oral examinations, and a formal dissertation.

Graduate instruction and research may be undertaken in the following areas of specialization: agricultural marketing and consumer demand, agricultural business management, production economics, natural resources and environmental economics, and international trade and development.

Graduate research is coordinated with the department's overall research program. Students may select a research topic related to the department's current research projects or an approved area of sponsored research. Exceptional computer facilities, software, and support are available for departmental research.

Financial assistance is available to graduate students on a competitive basis in the form of departmental research assistantships. Paid internships are also available from regional and national agribusiness firms.

AAEC 4210/6210. Production Economics: Theory with Applications. 3 hours.
Prerequisite: Undergraduate level only: AAEC 3580-3580L.
Fundamental economic principles in determining efficient adjustments in agricultural resource use consistent with economic growth, and changing technology and economic conditions.

AAEC 4510/6510. Farm Appraisal. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
The models of appraisal to farm property, including factors influencing farm land and building values, such as land use, soils, crops, livestock, and buildings.

AAEC 4710/6710. Rural Economic Development and Growth. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Inputs and outputs between agriculture and agricultural businesses; analysis of factors affecting development and economic growth in developing areas.

AAEC 4800/6800-4800L/6800L. Water Resource Economics. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
The economic aspects of the use, supply, development, and management of water resources with special em-

phasis on river basin and project planning, benefit-cost analyses, water demands, and multiple use management of water resources.

AAEC(FINA) 4870/6870. Futures and Option Markets. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Development, functions, and importance of futures and option markets. Futures and option contracts; issues such as speculation, the roles of commission houses, commodity exchanges, and clearinghouses; and the use of future contracts as instruments for financing business activities. Technical and fundamental trading theories.

AAEC 4930/6930. Environmental Law and Governmental Regulation. 3 hours.
Not open to students with credit in AAEC(EHSC) 4250.
Regulatory theory, externalities and market failures, definition of key regulations affecting agribusiness, overview of local government law, and delineation of environmental laws relating to agriculture. Current environmental issues are related to statutory, administrative, and regulatory authorities.

AAEC 4980/6980. Agribusiness Management. 3 hours.
Prerequisite: Undergraduate level only: (AAEC 2110 or ACCT 2101) and (AAEC 3040 or AAEC 3100).
The basic skills needed to be an effective manager of an agribusiness; applying and integrating these skills into a workable approach to management; provides a step-by-step approach to the application of basic practical management skills in marketing, demand analysis, forecasting, finance, plant operations, and personnel.

AAEC 6580-6580L. Microeconomics: Theory with Applications. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AAEC 3580 -3580L or permission of major.
Partial and general equilibrium analyses in the study of efficient resource allocation among households and firms. Perfect and imperfect output and input markets are investigated in terms of economic efficiency.

AAEC 6610. Quantitative Techniques in Agricultural Economics. 3 hours.
Prerequisite: STAT 4210 or STAT 6210 or permission of major.
Basic quantitative techniques in agricultural economic theory, emphasizing basic models used in the study of prices, marketing, and production.

AAEC 6630. Decision Theory for Resource Allocation. 3 hours.
Prerequisite: AAEC 6580-6580L.
Application of decision theory to natural and economic resources. Linear, nonlinear, and dynamic programming techniques for problems in economic and natural resource allocation.

AAEC 6760. Intermediate Agricultural Prices. 3 hours.
Prerequisite: AAEC 6580-6580L and AAEC 6610.
Price theory and statistical techniques that allow the student to advance beyond the introductory level of analyzing agricultural prices.

AAEC 6960. International Agricultural Trade. 3 hours.
Prerequisite: AAEC 6580-6580L.
Trade theory and an analysis of agricultural policies among nations.

AAEC 7000. Master's Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

AAEC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

AAEC 7600. Environmental Economics and Policy Analysis. 3 hours.
Not open to students with credit in AAEC 4650.
Environmental policy in both mathematical and intuitive economics, including externalities, policy instruments, and implementation. Concepts are applied to United States environmental policy toward air and water pollution, hazardous substances, and implementation of environmental law.

(AAEC)FORS 7860. Resource Economics and Management. 3 hours.
Prerequisite: AAEC 6580-6580L or ECON 8000.
Economic and physical concepts of scarcity, the impact of market and social factors on resource use, and the optimal management of renewable and nonrenewable resources.

AAEC 8000. Special Readings in Agricultural Economics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Literature, the concepts and analytical tools for production economics, marketing, or resource economics.

AAEC 8010. Seminar in Agricultural and Applied Economics. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: AAEC 6580-6580L.
Agricultural policy, production, marketing, development, trade, agribusiness management or natural resources. Theoretical and methodological issues, empirical analyses, and firm/industry/academic policy and other research issues. Non-Traditional Format: Graduate seminar course.

AAEC 8020. Topics in Agricultural and Applied Economics. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Agricultural policy, production, marketing, development, trade, agribusiness management or natural resources. Theoretical and methodological issues, empirical analyses, firm/industry policy, and other issues. Non-Traditional Format: Directed study.

AAEC 8080. Production Economics: Theory and Application. 3 hours.
Prerequisite: AAEC 6580-6580L and AAEC 6610.
Economic theory of production, duality, applications, and modeling.

AAEC 8100. Applied Resource Policy and Project Analysis. 3 hours.
Prerequisite: AAEC 6580-6580L.
Economic analysis of contemporary rural natural resources, environmental policies, and agricultural policies and projects. Application of theory and techniques to local, state, and national problems and issues, particularly those affecting rural areas.

(AAEC)EHSC 8120. Roles and Responsibilities of Environmental Policy Makers. 2 hours.
Prerequisite: Permission of department.
Roles of science, engineering, law, journalism, economics, grass roots activism, and the legislative and regulatory process in the development of environmental policy.

AAEC 8140. Consumer Demand Theory. 3 hours.
Prerequisite: AAEC 6580-6580L and (STAT 4220 or STAT 6220).
Theoretical treatment of consumer demand. Utility theory and its assumptions, consumer behavior theory, and problems of application in agricultural and applied economics.

AAEC 8210. Agricultural Programs and Policy. 3 hours.
Alternative governmental programs and policies as they relate to the solution of specific agricultural problems.

AAEC 8300. Agricultural Economics Research. 2 hours.
Methodology, techniques, and guidance for individual research in problems of agricultural economics.

AAEC 8400. Agricultural Market Structure and Analysis. 3 hours.
Prerequisite: AAEC 6580-6580L.
The market in economic development and evaluation of structure, conduct, and performance in the United States agribusiness sector. Problems of market coordination and associated policy issues.

(AAEC)ECOL 8700. Environmental Policy and Management. 3 hours.
Evolution, form, and substance of United States federal policies and programs that address ecological problems, focusing on the nature of problems and alternatives for effective resolution.

AAEC 8710. Advanced Agricultural Development and Growth. 3 hours.
Prerequisite: AAEC 6580-6580L or ECON 8010.
Major economic problems of the agricultural sector of developing countries and a study of policy instruments which have been used to resolve these problems.

AAEC 8750. Natural Resource and Environmental Economics. 3 hours.
Prerequisite: AAEC 6580-6580L.
Management of natural and environmental resources. Major theoretical concepts will provide a basis for examination of efficient production and consumption allocation decisions related to natural resources. Emphasis will center on economic, institutional, and legal aspects which prevent private markets from efficiently valuing resources.

AAEC 8760. Topics in Natural Resource and Environmental Economics. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: AAEC 6580-6580L.
Classical and contemporary topics in natural resource and environmental economics following a seminar/discussion format.

AAEC 8800. Dynamic Optimization in Agricultural and Resource Economics. 3 hours.
Prerequisite: AAEC 6580-6580L and ECON 8000 and ECON 8110.
Dynamic optimization and optimal control techniques relevant to agricultural and resource economics. Calculus of variations, the maximum principle, dynamic programming, and both open-loop and closed-loop optimal control.

AAEC 8850. Risk and Uncertainty in Agricultural Decision Making. 3 hours.
Prerequisite: ECON 8020.
Applications of microeconomic theory to measure and assess the impact of risk on firm, consumer, and market decisions and welfare. Evaluation of main sources of risk, including price, production, and technological uncertainty. Identification of firm responses to risk in financing, marketing, insurance, and contractual arrangements.

AAEC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

AAEC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Agricultural Extension

F. Richard Rohs, *Program Head and Graduate Coordinator, 542-8935 (109 Four Towers)*

The purpose of the graduate program in agricultural extension is to provide an opportunity for Cooperative Extension Service personnel and others to broaden and strengthen their base of technical knowledge and add the dimension of human and social relations that is essential if one is to perform effectively the duties of a general adult/youth educator within the context of the public service function of the University.

The curriculum leading to the Master of Agricultural Extension (MAEXT) degree focuses on understanding the Cooperative Extension Service and how it works. Individual programs are built around the candidate's need for additional training in appropriate subject matter, human relations, communications, management, Cooperative Extension Service organization and methods, and informal teaching-learning.

Opportunities for study and research are offered in the Department of Agricultural Leadership, Education and Communication, College of Agricultural and Environmental Sciences, other departments and divisions in the College of Agricultural and Environmental Sciences, College of Family and Consumer Sciences, School of Forest Resources, other schools and colleges in the University and in the Cooperative Extension Service.

AEXT 7000. Master's Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

AEXT 7020. Program Evaluation. 3 hours.
Identifying and selecting evaluation models, planning an evaluation, collecting and analyzing evaluation data using various qualitative and quantitative methods relating evaluation to program change for agricultural and extension educational programs.

AEXT 7040. Creative Programming for 4-H and Youth. 3 hours.
History, philosophy, and organizational structure of Cooperative Extension 4-H and Youth Education; emphasis upon the needs of youth, teaching, program planning and evaluation methods, the management of volunteers, volunteer leader development, and program and financial resources necessary for 4-H youth work.

AEXT 7050. Communication for Agricultural and Extension Educators. 3 hours.
Not open to students with credit in AGRI 5050.
Basic communication processes in diverse professional settings: personal interaction, small group, organizational, media.

AEXT 7070. Program Development for Agricultural and Extension Educators. 3 hours.
Basic problems, principles, and procedures involved in agricultural and extension program development. Needs assessment, citizen involvement techniques, and instructional design elements.

AEXT 7080. Agricultural and Extension Administration. 3 hours.
Administration and management of agricultural and extension educational programs and people. Four major domains of managerial activity; administrative, communications, supervision, and cognitive areas.

AEXT 7100. Practicum in Cooperative Extension. 3 hours. Repeatable for maximum 6 hours credit. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Students gain experience in leadership roles in the Cooperative Extension Service by working with current leaders in a learning laboratory situation.

AEXT 7110. Special Problems in Agricultural Extension Education. 3 hours.
Prerequisite: Permission of department.
Specialized problems and training appropriate to the needs of the individual and associated with agricultural extension education will be studied to develop greater facility in the application of specific agricultural subject matter.

AEXT 7210. Problem Analysis in Agricultural Extension Work. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
A topic or problem in Cooperative Extension significant to the candidate's area of work. Non-Traditional Format: Special problems course; faculty and students meet as needed.

Agriculture

(AGRI)EETH 4190/6190. Agricultural Ethics. 1 hour. 1 lab period of 2 hours each per week.
Ethical issues in agriculture. Topics include animal rights/animal welfare, agriculture as a business/agriculture as a way of life, sustainable agriculture, (bio)technology, migrant farm workers, foreign aid, world hunger, and related topics.

Animal and Dairy Science

Larry L. Benyshek, *Head*
George B. Rampacek, *Graduate Coordinator, 542-1852*
(Animal & Dairy Science Complex)

The Doctor of Philosophy degree in animal and dairy science is offered with the opportunity to specialize in animal breeding, nutrition, physiology of reproduction, meats and muscle biology, and animal production. The program leading to the PhD degree in animal nutrition is also available to animal and dairy science students.

Graduate programs leading to the Master of Science degree in either animal science or dairy science are offered in all general areas of animal and dairy science. These programs are flexible enough to interest students who may want to consider the MS degree as a terminal degree and are also designed to accommodate those graduates who want to use the MS degree as a preparatory step toward the PhD degree. Courses in the department and appropriate courses in poultry science, biochemistry, statistics, microbiology, veterinary physiology, and other departments provide in-depth training and laboratory experience. Amino acid analyzers, gas-liquid chromatographs, a flame spectrophotometer, a gas flow Gieger tube detector, a whole body counter, an atomic absorption spectrophotometer, a sonoscope, a high pressure liquid chromatograph, liquid scintillation counters, gamma counters, ultracentrifuge, enzyme kinetic spectrophotometer, scanning and transmission electron microscopes, electrophoresis equipment, tissue culture incubators and other equipment are available for use in teaching and research. Research facilities include laboratories equipped to handle radioisotopes and many chemical and biological analyses, small and large animal metabolism rooms and equipment, large animal surgery laboratory, and research facilities on swine, horse, beef cattle, and dairy cattle farms located near the campus and in the state. Service of the University Computer Center is available for data processing.

Prospective students who desire financial aid may apply for assistance directly to the animal and dairy science department. A limited number of teaching and research assistantships for training students in both research and teaching and assistance to the faculty are available. Other assistantships are available through the Graduate School and application for these should be made directly to the graduate coordinator. Additional courses related to animal nutrition are listed under animal nutrition.

ADSC 4100/6100. Advanced Genetics of Livestock Improvement. 3 hours.
Prerequisite: ADSC 3110 or permission of department.
The development of practical and genetically sound programs involving the study and application of genetic principles underlying selection, systems of mating, and performance testing. Major emphasis will be on characters of economic importance in meat animals.

(ADSC)FDST 4140/6140-4140L/6140L. Advanced Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L and FDST 4040/6040-4040L/6040L.
Meat processing and technology, scientific basis for meat as a food, USDA and FDA regulations governing meat processing, and the latest innovations in commercial meat processing.

ADSC 4150/6150. Microbial Ecology of the Rumen. 3 hours.
Prerequisite: BCMB 4020/6020 or MIBO 4090/6090 or permission of department.
The rumen microbial ecosystem that will examine the biochemistry, ecology, nutrition, physiology, and taxonomy of rumen microorganisms. The symbiotic relationship between rumen microorganisms and the nutrition of the ruminant animal. Manipulation of rumen fermentation to maximize host-animal production.

(ADSC)ANNU 4360/6360. Ruminant Nutrition. 3 hours.
Prerequisite: ADSC 3300-3300L and BCMB(BIOL)(CHEM) 3100.
Digestive physiology and metabolism of the rumen. Treats systematically the diversity of function, complex symbiotic relationships of the rumen microflora/microfauna, and the physiology and metabolism of the rumen as related to digestion, absorption, and utilization of nutrients.

(ADSC)ANNU(POUL) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM) 3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

ADSC 4400/6400-4400L/6400L. Applied Reproduction in the Horse. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ADSC 3400-3400L.
Management of reproduction in the horse for efficient production. Application of reproductive management systems.

ADSC 4410/6410-4410L/6410L. Applied Reproductive Management in Cattle and Swine. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ADSC 3400-3400L.
Management of reproduction in farm animals for efficient livestock production. Application of reproductive management, principles associated with artificial insemination, embryo transfer, pregnancy detection, semen collection, and reproductive record management.

ADSC 6110-6110L. Experimental Methods in Animal Biotechnology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or MIBO 3500 or permission of department.
Laboratory methods in molecular biology stressing recombinant DNA techniques. Experiments will include recombination, cloning, restriction analysis techniques, and optional experiments chosen by students.

ADSC(FDST) 6170-6170L. Experimental Techniques in Meat Science and Muscle Biology. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or STAT 4220 or STAT 6220 or permission of department.
Basic methods in laboratory techniques in meat science. Experiments will familiarize students from a wide variety of backgrounds with a number of laboratory techniques, including lipogenesis, muscle histology, enzyme kinetics, and muscle metabolism.

ADSC(FDST) 6890. Advanced Meat Science. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or permission of department.
The theories and methods used in meat science in determination of tissue growth; compositional techniques; muscle protein and lipid organization, structure, and function; biochemical conversion of muscle to meat, and its impact on meat quality and palatability in meat animals.

ADSC 7000. Master's Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ADSC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ADSC 8090. Introduction to Quantitative Genetics of Livestock Improvement. 2 hours.
Prerequisite: ADSC 3110 and (STAT 4220 or STAT 6220).
The population genetic theory associated with livestock populations and their quantitative genetic improvement.

ADSC 8100. Statistical Methods in Animal and Dairy Science. 3 hours.
Prerequisite: [(STAT 4220 or STAT 6220) and ADSC 8110] or permission of department.
Experimental designs and statistical procedures particularly applicable to animal research with emphasis on multiple regression and least squares analysis.

ADSC 8110. Advanced Quantitative Genetics of Livestock Improvement. 3 hours.
Prerequisite: STAT 4220 or STAT 6220.
Advanced study of population and quantitative genetics.

ADSC 8200. Computational Techniques in Animal Breeding. 3 hours.
Prerequisite: ADSC 8100 or permission of department.
Computing algorithms useful for analysis of very large data sets in animal breeding. Class involves several programming projects and case studies on field data sets.

ADSC 8210. Advanced Statistical Methods in Animal Breeding. 3 hours.
Prerequisite: ADSC 8200 or permission of department.
Latest statistical and computing procedures useful in animal breeding. Includes nonlinear models, Bayesian methods, and methods useful for analysis of molecular marker information.

ADSC 8400. Advanced Animal Reproduction. 3 hours.
Prerequisite: ADSC 3400-3400L.
Physiological mechanisms associated with reproduction in farm animals, including the reproductive endocrine system, the mechanism of hormone action and hormone measurement, and follicular development through parturition.

ADSC 8700. Special Problems in Animal and Dairy Science I. 3 hours.
Prerequisite: Permission of department.
Library and laboratory problems dealing with different phases of livestock production. Non-Traditional Format: This course provides the students opportunities to work with professors at non-scheduled hours.

ADSC 8710. Special Problems in Animal and Dairy Science II. 3 hours.
Prerequisite: Permission of department.
Library and laboratory problems dealing with different phases of livestock production. Non-Traditional Format: This course provides students the opportunity to work with professors at non-scheduled hours.

ADSC 8800. Graduate Seminar. 1 hour. Repeatable for maximum 4 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Weekly meetings devoted to discussion of research problems.

ADSC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional

Format: Independent research under the direction of a faculty member.

ADSC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Animal Nutrition

Gene M. Pesti, *Graduate Coordinator, 542-1351*
(Livestock-Poultry Building)

This program is interdepartmental, including the Departments of Animal and Dairy Science, and Poultry Science. It embraces both the basic and applied phases of nutrition including the metabolism, biochemistry, and physiology of minerals, lipids, carbohydrates, proteins, vitamins, etc., in monogastric and ruminant animals. Strong collateral support, through course offerings and research cooperation, also is available in the areas of biochemistry, physiology, genetics, statistics, veterinary medicine, and microbiology. Facilities for research include adequately equipped nutritional, biochemical, and physiological laboratories, experimental animal quarters for many farm and laboratory species and instrumentation for many types of metabolic studies including, for example, the use of isotopes. The goal is to provide a challenging program, supplying opportunity for students to develop their creative ability to the point where their knowledge and motivation will enable them to make major contributions and assume leadership in the nutrition profession.

ANNU(ADSC) 4360/6360. Ruminant Nutrition. 3 hours.
Prerequisite: ADSC 3300-3300L and BCMB(BIOL)(CHEM) 3100.
Digestive physiology and metabolism of the rumen. Treats systematically the diversity of function, complex symbiotic relationships of the rumen microflora/microfauna, and the physiology and metabolism of the rumen as related to digestion, absorption, and utilization of nutrients.

ANNU(ADSC)(POUL) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM) 3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

ANNU 8310. Bioenergetics in Animal Nutrition. 2 hours.
Prerequisite: BCMB 4010/6010.
Energy transformations in animals including application of thermodynamic principles to the conservation and conversion of energy in animals. The energy values of feedstuffs as determined by various methods will be evaluated.

ANNU 8320. Vitamins in Animal Nutrition. 2 hours.
Prerequisite: BCMB 4010/6010.
The chemistry and physiology of the vitamins and their roles in animal metabolism including cellular biochemistry and physiology of the vitamins.

ANNU 8330. Minerals in Animal Nutrition. 2 hours.
Prerequisite: BCMB 4010/6010.
Significance of minerals in animal nutrition with emphasis on the physical and chemical principles and dynamic behavior and function of individual elements in the organisms as a whole.

ANNU 8340. Proteins and Amino Acids in Animal Nutrition. 2 hours.
Prerequisite: BCMB 4010/6010.
Metabolism and utilization of dietary proteins and amino acids; methods of supplying amino acids for efficient utilization for maintenance, growth and the production products; evaluation of the quality of proteins to meet requirements; methods for separation of proteins, amino acid analysis and determination of protein quality will be studied.

ANNU 8350. Carbohydrates and Lipids in Animal Nutrition. 2 hours.
Prerequisite: BCMB 4010/6010.
The utilization and metabolism of carbohydrates and lipids by animals; biological properties of carbohydrate and lipid foods and their effects on absorption and metabolism of the nutrients of the animal diet will be evaluated.

ANNU 8380. Experimental Methods in Animal Nutrition. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite: CHEM 2211 and CHEM 2211L.
Biochemical nutrition methodology and its utilization in performing experiments, recording and interpreting data, and writing scientific reports.

ANNU 8390. Nutrition Seminar. 1 hour. Repeatable for maximum 4 hours credit. 1 lab period of 1 hour each per week.
Current problems and papers of scientific work in animal nutrition.

ANNU 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ANNU 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Biological and Agricultural Engineering

E. Dale Threadgill, *Head*
Brahm P. Verma, *Graduate Coordinator,*
542-0860
(Driftmier Engineering Center)

The Department of Biological and Agricultural Engineering offers programs of study leading to three degrees: MS with major in biological engineering, MS with major in agricultural engineering and PhD in biological and agricultural engineering. Students can focus on several fields of interest that include biochemical engineering, enzyme engineering, biosensors, biomechanics, bioprocessing, image analysis, artificial intelligence applications, decision support systems, electronics and controls, X-ray computed tomography, NMR spectroscopy, postharvest engineering, applied electronics, food engineering, crop modeling, agro-meteorology, environmental quality, water quality, soil and water engineering, bioresource conversion, and precision farming.

The department has 38 full-time faculty and more than 50 research projects housed in three units located at the Athens, Griffin, and Tifton campuses of the University. The principal facilities for academic instruction are located in the Driftmier Engineering Center on the Athens campus. Excellent research facilities and specialized modern laboratories are available not only on the Athens campus but also at the Griffin and Tifton campuses. The three locations provide exceptional opportunities for laboratory and field research under diverse environmental conditions. In addition, the department has aggressive interdisciplinary research programs with other departments in the College of Agricultural & Environmental Sciences, Division of Biological Sciences and College of Veterinary Medicine.

The department accepts applications from graduates with a BS or a MS degree in engineering, physics, chemistry, biological sciences, mathematics, food science, and agricultural sciences. Qualified applicants with a non-engineering degree are required to complete a prescribed set of undergraduate engineering science courses.

A candidate for a MS degree is required to complete 24 semester hours of course credit and 6 hours of thesis research. The primary goal of this course of study is to have the candidate acquire a) deeper understanding in the selected field of knowledge, b) ability to synthesize knowledge, c) rational problem solving skills, and d) confidence in conducting independent work.

The PhD course of study is designed to achieve proficiency in unifying the diverse knowledge bases of the biological, agricultural, physical, social, and engineering sciences to enable the student to lead in the discovery of engineering solutions critical to the development of complex biological and agricultural systems. The department places high value on advanced proficiency in mathematics, statistics, selected area(s) of science, and knowledge of research methods. The selection of courses must be guided to have the student acquire a) in-depth knowledge in selected area(s) of science, b) ability to integrate diverse knowledge, c) creative thinking ability for defining problems, and d) ability to conduct original research.

The department provides research and teaching assistantships to qualified candidates based on availability of funds. Applicants desiring financial assistance should apply directly to the Graduate Coordinator of the department by January 31. Applications from under-represented groups are highly encouraged.

ENGR 4210/6210. Linear Systems. 3 hours.
Prerequisite: ENGR 3250.
Corequisite: MIBO 3500 and BCMB(BIOL)(CHEM) 3100.
Time and frequency domain analysis of linear systems, convolution, fourier series, and fourier transforms with applications.

ENGR 4220/6220. Feedback Control Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
The analysis and design of continuous and discrete time, and linear feedback control systems.

ENGR 4230/6230. Sensors and Transducers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
Fundamentals of the sensing process, transducers and their environments and the measurement problem.

Transducer types and modeling. Displacement, motion, pressure, fluid-flow, temperature measurements.

ENGR 4250/6250. Advanced Microcontrollers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3270 and ENGR 4240.
Using the MC68HCII to solve practical engineering monitoring and control problems. A project-oriented course.

ENGR 4280/6280. Measurement Automation and Control. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 1140 and ENGR 2170.
The analysis, design, and programming of systems used for automatic data acquisition, measurement, and control.

ENGR 4350/6350. Introduction to Finite Element Analysis. 3 hours.
Prerequisite: ENGR 2140 and MATH 2700.
Fundamental finite element theory for the solution of engineering problems. Geometrical modelling techniques, element selection, and tests for accuracy. Emphasis on problems in structural mechanics and elasticity.

ENGR 4360/6360. Advanced Topics in CAD/CAM. 3 hours.
Prerequisite: ENGR 3300.
The use of computer aided design/computer aided manufacturing. Computer modeling of solid objects, advanced mechanism modelling, rapid prototyping and virtual reality.

ENGR 4370/6370. Material Science and Experimental Stress Analysis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3300.
Properties and selection of engineering materials. Structure of solids and the effects of solidification, forming and heat treating operations on material properties. Measurement of stresses in materials using strain gage and photoelastic technology.

ENGR 4420/6420. Industrial Ventilation Design and Control. 3 hours.
Prerequisite: ENGR 2150 and ENGR 3150.
Engineering design of industrial ventilation systems including selection of fans, ductwork, diffusers, hoods, air cleaners, and humidifiers.

ENGR 4440/6440. Environmental Engineering I. 3 hours.
Prerequisite: ENGR 3410 and ENGR 3440.
Engineering science and design related to treatment of drinking water and wastewater as well as the treatment and ultimate disposal of the sludges created during water treatment.

ENGR 4450/6450. Environmental Engineering II. 3 hours.
Prerequisite: ENGR 3520 and ENGR 4440/6440 and ENGR 4480/6480.
Engineering science and design related to environmental modeling, solid waste management, and hazardous waste management. Concepts of risk assessment will also be introduced.

ENGR 4480/6480. Instrumentation for Environmental Quality. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MATH 2700 and PHYS 1212-1212L.
Operation of instrumentation used to measure physical variables which determine environmental quality. The engineering design and application of measuring systems for airborne particulates, gaseous atmospheric contaminants, solar and environmental radiation, and noise will be emphasized.

ENGR 4510/6510. Engineering and Design of Biological Process I. 3 hours.
Prerequisite: ENGR 3520 and BCMB 4010/6010 and MIBO 3500.
Design and analysis of enzymatic and microbial biological reaction systems.

ENGR 4520/6520. Engineering and Design of Biological Processes II. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGR 4510/6510.
Unit operations used for biological processing including filtration, centrifugation, cell disruption, isolation, purification, and polishing.

ENGR 4530/6530. Monitoring and Control of Biological Processes. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGR 4510/6510.
Concepts of biological process controls; modern control techniques and optimization of batch, fed-batch and continuous bioreactors, and other biological systems.

ENGR 4540/6540. Applied Machine Vision. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Automated vision systems to identification, measurement and quality control. Electromagnetic spectrum, illumination design, imaging sensor election, vision system calibration. Implementation of image processing algorithms for object recognition and classification.

ENGR 4550/6550. Processing Plant Design. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3540.
Design of systems for processing, primarily based upon unit operations processes. Process simulation or modelling for optimization purposes will be applied to processing systems. Plant layout required for processing will be included.

ENGR 4740/6740. Biomaterials. 3 hours.
Prerequisite: BIOL 1108-1108L and ENGR 2140.
Biomaterials and groundwork for topics such as mechanical, chemical, and thermal properties of replacement materials and tissues. Implantation of materials in the body is studied for the biological point of view.

ENGR 4760/6760. Biomechanics. 3 hours.
Prerequisite: BIOL 1108-1108L and ENGR 2130 and ENGR 2140.
The application of engineering principles to body dynamics is discussed. The student should understand the mechanics of the musculoskeletal system. A term design project is required.

ENGR 5930/7930. GPS with Engineering and GIS Applications. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 1120 or GEOG 4370/6370-4370L/6370L.
The Global Positioning System, Differential GPS, and Real Time Kinematic GPS. Applications of GPS to engineering and geographic information systems.

ENGR 6110. Momentum and Heat Transport Processes. 3 hours.
Prerequisite: (ENGR 3140 and ENGR 3150 and MATH 2700) or permission of major.
Transport processes with an emphasis on fluid mechanics and heat transfer, transport of momentum and energy in continuous media, introduction to approximate solutions.

ENGR 6130. Bioengineering Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (MATH 2700 and PHYS 1212-1212L) or permission of major.
Integrating physics, mathematics, engineering, and chemical and biological principles for analysis of plant and animal systems.

ENGR 6410. Open Channel Hydraulics and Sediment Transport. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Fundamental mass, energy, and momentum transport relations in water flows open to the atmosphere. Channel design and measurement of flows in natural channel. Sediment transport relations are introduced.

ENGR 6580. Directed Readings in Bioconversion Engineering. 3 hours. 2 lab periods of 2 hours each per week.
Prerequisite: (CHEM 2100 and CHEM 2100L and MIBO 3500 and MATH 2700 and ENGR 3140) or permission of major.
Quantitative description of aerobic, facultative, and anaerobic fungal/microbial modes for biotransformation of organic compounds in natural and controlled environments, with emphasis on mathematical representation of mechanisms involved and mechanisms manipulation. Non-Traditional Format: Independent study. Students will work in the bioconversion lab for two hours per week and they will meet and lecture weekly on weekly topics.

ENGR 6630. Advanced Strength of Materials. 3 hours.
Prerequisite: ENGR 2140.
Advanced topics in strength of materials. Determining the stress and strain on members under non-linear loading.

ENGR 6910. Research Methods. 2 hours.
Prerequisite: Permission of department.
The philosophy of engineering research, research methodology, review of the departmental research programs, and writing and presenting thesis and dissertation proposals and grant proposals.

ENGR 6920. Engineering Design. 3 hours. 1 lab period of 4 hours each per week.
Prerequisite: Permission of department.
Fundamentals of engineering design, problem selection, and application of design principles to a supervised project. Non-Traditional Format: A detailed design project will be required. Students will conduct hands-on activities for experimenting and the fabrication of design.

ENGR 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENGR 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ENGR 7430. Nonpoint Source Modeling. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L and PHYS 1111-1111L and CHEM 1212 and CHEM 1212L.
Watershed systems, hydrologic processes and pollutant transport processes; structure and capabilities of current watershed computer models; "hands-on" use of some current watershed models; and written and oral reports on the model application to an example watershed.

ENGR 8250. Advanced Control Systems. 3 hours.
Prerequisite: ENGR 4220/6220 or permission of major.
Advanced control techniques. Practical aspects of control design.

ENGR 8290. Advanced Instrumentation. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ENGR 4230/6230 or permission of major.
The use of sensors and advanced instrumentation in engineering research applications.

ENGR 8420. Theory of Drainage - Saturated Flow. 3 hours.
Prerequisite: (MATH 2700 and CRSS 4600/6600-4600L/6600L) or permission of department.
The theory of saturated water flow in porous media. Steady and unsteady flow will be considered. Applications to agricultural drainage and well hydraulics will be discussed.

ENGR 8550. Non-Destructive Characterization of Biological Materials. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 6130.
Techniques for non-destructive characterization of biological materials or systems. Topics may vary from year to year.

ENGR 8580. Compost Facility Engineering. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 6580 or permission of major.
Factors impacting the design and operation of large scale composting facilities.

ENGR 8930. System Simulation. 3 hours.
Prerequisite: Permission of department.
Solution of engineering/management problems in biological and agricultural systems through computer modeling and simulation of continuous-time and discrete-event systems. Deterministic and stochastic systems will be considered. Introduction to system stability and optimization concepts.

(ENGR)CSCI 8940. Computational Intelligence. 4 hours.
Prerequisite: CSCI(PHIL) 4550/6550 or permission of department.
Programs that solve complex problems in a particular domain, typically independent of knowledge used to direct the search for an optimal solution. Approaches include simulated annealing, genetic algorithms, neural networks.

ENGR 8950. Graduate Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Presentations/discussions related to engineering research, teaching, design, and service presented by students, faculty, and industry leaders.

ENGR 8980. Advanced Topics in Biological Engineering. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Advanced directed readings in special topics in biological engineering in an area(s) of interest to the student. Non-Traditional Format: Students will be required to study advanced topics on the area and provide written and oral summaries. Additionally, students will be given special assignments such as leading several discussion sessions and extended written and oral reports on the state-of-the-art knowledge of a topic.

ENGR 8990. Advanced Topics in Agricultural Engineering. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Advanced directed readings in special topics in agricultural engineering in an area of interest to the student. Non-Traditional Format: Students will be required to study advanced topics on the area and provide written and oral summaries. Additionally, students will be given special assignments such as leading several discussion sessions and extended written and oral reports on the state-of-the-art knowledge of a topic.

ENGR 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENGR 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Crop and Soil Sciences

Albert E. Smith, Jr., *Head*
David E. Radcliffe, *Graduate Coordinator, 542-0897*
(Plant Sciences Building)

Graduate training leading to the MS and PhD degrees is available in all phases of crop and soil sciences including international and sustainable agriculture. In-depth instruction and research are emphasized in both crop and soil science. Areas of major specialization in crop science are: plant breeding and genetics, physiology, weed control, crop production and management, and forage quality and utilization. Areas of major specialization in soils are: chemistry, physics, environmental physics, classification and genesis, soil erosion and conservation, fertility and plant nutrition, microbiology and mineralogy. A range of environmentally-oriented research opportunities are available within the crop and soil science areas. Facilities for graduate training include three well-equipped Experiment Stations (housing modern analytical equipment, growth chambers, greenhouses and field plot facilities), along with seven field research centers located throughout the state. Cooperative studies are encouraged with other departments at the University, with the Institute of Ecology and the Savannah River Ecology Laboratory, and with federal research laboratories in the area (USDA/ARS, EPA). Cooperative projects with

scientists at the Volcani Center in Israel are also available.

Departmental requirements include attendance at graduate seminars. Coursework and research topics are individually determined in consultation with the student's advisory committee.

Students with strong backgrounds in biological, geological, physical, chemical, or environmental sciences are encouraged to apply as prospective candidates for graduate training.

CRSS 4040/6040. Plant Breeding. 3 hours.
Prerequisite: PGEN 3580-3580L or permission of major.
Fundamental principles and theories utilized in the science of plant breeding and cultivar development and the role breeding plays in crop improvement.

CRSS 4220/6220. Topics in Crop and Soil Sciences. 1-3 hours. Repeatable for maximum 12 hours credit.
Topics and methods in Crop and Soil Sciences with a different timely topic each semester, including new areas of inquiry in crop and soil sciences. Non-Traditional Format: This course provides students with exposure to evolving areas of crop and soil sciences. Credit hours are variable based upon topic covered in a particular semester.

(CRSS)ENTO 4250/6250-4250L/6250L. Pesticide Management and Utilization. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L and [(CHEM 2100 and CHEM 2100L) or (CHEM 2211 and CHEM 2211L)].
Practical management and utilization of pesticides in urban and agricultural environments. Subject areas include classification of insecticides, herbicides, and fungicides, etc., their general chemical and toxicological properties, deployment philosophy, hazards and environmental impact, formulation and application, safety and disposal, and management of pesticide resistance.

CRSS 4260/6260. Forage Management and Utilization. 3 hours.
Prerequisite: CRSS 2010-2010L or permission of department.
Characteristics of forage species; establishment, physiology, and morphology effects on management; forage quality and utilization by livestock; grazing management; hay and silage; forages for wildlife and conservation.

CRSS 4300/6300. Crop Production and Management. 3 hours.
Prerequisite: (CRSS 3050-3050L and CRSS 3300) or permission of department.
Conventional and alternative crop management systems, principles, and practices of crop science are used in discussion of management problems related to agronomic crops grown in Georgia.

CRSS 4340/6340. Weed Science. 3 hours.
Prerequisite: (BIOL 1107-1107L and CHEM 1211 and CHEM 1211L) or permission of department.
Fundamentals of weed biology; cultural and chemical weed control; properties and uses of herbicides and herbicide application equipment; and current systems for weed management in cropping programs.

CRSS 4340L/6340L. Weed Science Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Corequisite: CRSS 4340/6340.
Weed identification; symptomology of herbicide action; calibration of herbicide application equipment.

CRSS 4370/6370. Heavy Metals in the Environment. 1 hour.
Prerequisite: [CHEM 1212 and CHEM 1212L and (CRSS 3050-3050L or CRSS(FORS)3060-3060L)] or permission of major.
The natural level and sources of, and human activity affecting, the heavy metal composition of soils and plants, and their potential hazards to plant life and introduction into the food chain.

CRSS 4400/6400. Crop Ecology. 3 hours.
Prerequisite: CRSS 2010-2010L or BTNY 1210-1210L or permission of major.
World population growth and food production problems; origin, distribution, and adaptation of tropical, subtropical, and temperate crop plants as influenced by environment with emphasis on climatic factors.

(CRSS)BTNY(BIOL) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

CRSS 4520/6520. Field Soil and Site Assessment. 3 hours.
Prerequisite: (CRSS 4540/6540-4540L/6540L and CRSS 4600/6600-4600L/6600L) or permission of department.
How to assess a site to determine if the soil places any limitations on land use. Topics covered include soil sampling, soil landscapes, wetland and hydric soils, septic systems, and land application of waste.

CRSS 4540/6540-4540L/6540L. Pedology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L or permission of department.
Soils as a natural component of the ecosystem, including morphology, landscape distribution, formation, identification of diagnostic horizons and features, and classification. Non-Traditional Format: A one-day trip to North Georgia and a two-day trip to the Coastal Plain will be required at student's expense.

CRSS 4590/6590-4590L/6590L. Soil Fertility. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L or permission of major.
Soil conditions affecting availability of plant nutrients; methods of determining soil fertility and insufficiency of plant nutrients in soils, and interpretation of chemical and biological measurements as related to fertility maintenance and good soil management.

CRSS 4600/6600-4600L/6600L. Soil Physics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: [(CRSS 3050-3050L or CRSS(FORS) 3060-3060L) and MATH 2200 and MATH 2200L and (PHYS 1111-1111L or PHYS 1211-1211L)] or permission of major.
Physical properties and process of soils. Water, heat, and solute movement in soils.

CRSS(MIBO) 4610/6610-4610L/6610L. Soil Microbiology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Microorganisms in soil and their effect on nutrient recycling, especially as it relates to environmental quality and crop production.

CRSS 4660/6660-4660L/6660L. Chemical Analysis of Environmental Samples. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 2300 and CHEM 2300L.
Analysis of soils, sediment, rocks, water for important organic and inorganic contaminants. Chromatography, atomic adsorption, and plasma emission spectroscopy, field sampling and measurements. Quality assurance/quality control, data reporting, computer use in analysis.

CRSS 4670/6670. Environmental Soil Chemistry. 3 hours.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L or permission of department.
Environmental soil chemistry applies and extends the concepts of chemistry and physics to the investigation of problems related to the physical, chemical, and biological characteristics of soil and their importance in relation to the management of contaminants, pesticides, and production inputs.

CRSS 4670L/6670L. Environmental Soil Chemistry Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: (CRSS 3050-3050L or CRSS(FORS) 3060-3060L) and CHEM 2300 and CHEM 2300L.
Corequisite: CRSS 4670/6670.
Laboratory evaluation of soil chemical properties.

CRSS(HORT)(ANTH) 4930/6930. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

CRSS(HORT)(ANTH) 4940/6940. Agriculture and Ecology in Tropical America Field Trip. 3 hours. Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4930/6930.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country. Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

(CRSS)ECOL 6650-6650L. Soil Biology and Ecology. 4 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or CRSS 4590/6590-4590L/6590L or CRSS(MIBO) 4610/ 6610-4610L/6610L.
Organisms in the soil environment, with emphasis on macrobiota and their functional roles in food webs and ecosystem processes.

CRSS 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a masters degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CRSS 7050. Principles of Field Crop Production. 3 hours.
Prerequisite: [CRSS 3300 and CRSS 4300/6300] or permission of department.
Effect of environment and heredity on crop production, including light, temperature, water, fertility, and other factors affecting plant growth and management.

CRSS 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CRSS 8000. Soil Physical Chemistry. 3 hours.
Prerequisite: [CHEM 3100 or (CHEM 2300 and CHEM 2300L)] and [CRSS(FORS) 3060-3060L or GEOL 1250-1250L] or permission of department.
Physical and surface chemistry applied to soil-water systems. Topics include precipitation-dissolution, redox chemistry, complexation, structure of soil-water interface, adsorption mechanisms, use of computer models to simulate soil chemical reactions, and environmental applications.

CRSS 8010. Research Methods. 3 hours.
Scientific method, thesis and journal article preparation, manuscript review, seminar presentation, grant applications, and computer use related to these topics.

CRSS 8100. Advanced Crop and Soil Science Seminar. 1 hour. Repeatable for maximum 2 hours credit. Instruction and practice in oral scientific presentations. A literature search within a general topic area unrelated to degree research, and a formal seminar on the subject, are required.

CRSS 8210. Special Problems in Crop and Soil Science. 1-3 hours. Repeatable for maximum 3 hours credit.
The planning, completion, and reporting of short-term projects in crop and soil sciences, other than thesis or dissertation, conducted in the laboratory, greenhouse, or field. Non-Traditional Format: This course will provide graduate students credit for conducting a research problem under the direction of a faculty member in Crop and Soil Sciences. Credit is variable dependent upon the scope of the research project.

CRSS 8220. Advanced Topics in Crop and Soil Sciences. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Advanced topics and methods in Crop and Soil Science, including tropical soil management, application of geographic information systems to crop production, GRIS analysis, advanced analytical methods, microclimatology, crop modeling, and other timely topics.

CRSS 8280-8280L. Crop Response to Microclimate. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BTNY 3830-3830L or permission of department.
Relationships between the microclimate and growth of crop plant communities. Physiological and morphological factors involving response of crops to microclimate are discussed along with application of the principles to crop production.

CRSS 8330-8330L. Physiology of Herbicide Action. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: CRSS 4340/6340-4340L/6340L or permission of department.
Herbicide action in crops and weeds, including uptake through roots, penetration through leaves, and translocation in the plant; mechanism and mode of action of individual herbicides as well as metabolism of xenobiotics in the plant. Laboratory component consists of research techniques used in herbicide physiology research.

CRSS 8340-8340L. Environmental Aspects of Herbicide Use. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: CRSS 4340/6340-4340L/6340L or permission of department.
Behavior of herbicides in soil, water, and air; transfer and transformation processes affecting herbicides. Laboratory introduces research techniques necessary to examine herbicide transfer and transformation.

CRSS 8350. Weed Ecology. 2 hours.
Prerequisite: CRSS 4340/6340-4340L/6340L or permission of department.
Weed succession and development in crops, weed-crop interference, and physiological aspects of weed-crop interactions with an emphasis on modeling.

CRSS 8520. Advanced Soil Fertility. 3 hours.
Prerequisite: (CRSS 4590/6590-4590L/6590L and CHEM 2300 and CHEM 2300L) or permission of department.
Physical, chemical, and biological properties of soil; plant mineral nutrient availability; theory and use of modern soil testing methods. Includes soil, environmental, and management factors that control crop use of applied chemical fertilizers and other sources of plant nutrients.

CRSS 8540-8540L. Soil Mineralogy. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: CRSS 4540/6540-4540L/6540L or CRSS 4670/6670 or GEOL 4300/6300 or permission of department.
Mineral structure, properties, weathering, formation, and identification as related to soil behavior, distribution, and genesis. Application of laboratory techniques for identification and quantification of minerals in soils and sediments.

CRSS 8600. Advanced Soil Physics: Numerical Method. 3 hours.
Prerequisite: [MATH 2210 and MATH 2210L and CRSS 4600/6600-4600L/6600L] or permission of department.
Numerical approach to solving water and solute transport equations. Two-dimensional water and solute movement in unsaturated soils and shallow groundwater are examined by solving the governing partial differential equations using a finite difference numerical technique.

CRSS 8610. Advanced Soil Physics: Analytical Method. 3 hours.
Prerequisite: [MATH 2210 and MATH 2210L and CRSS 4600/6600-4600L/6600L] or permission of department.
Analytical approach to solving solute transport equations using Laplace transforms. One dimensional deterministic and stochastic transport models for solute movement through unsaturated soil are expressed in terms of transfer functions and compared.

CRSS(ECOL) 8650. Nutrient Cycling Models. 3 hours.
Prerequisite: [CSCI 7010 and CRSS(MIBO) 4610/6610-4610L/6610L] or permission of department.
Structure, function, and performance of current nutrient cycling models used to simulate carbon, nitrogen, phosphorus, and sulfur transformations in the soil.

(CRSS)GEOL 8760. Organic Contaminant Hydrogeology. 3 hours.
Prerequisite: (CHEM 2100 and CHEM 2100L) or (CHEM 2212 and CHEM 2212L) or permission of department.
Physical and chemical processes controlling the mobility and fate of organic contaminants in soils, sediments, surface, and ground waters. Processes include biotic and abiotic (hydrolysis, volatilization, sorption, redox, and photochemical) reactions in the natural systems. Relationships between chemical structure and reactivity in the environment.

CRSS 8880. Quantitative Aspects of Plant Breeding. 3 hours.
Prerequisite: [CRSS 4040/6040 and STAT 6220] or permission of department.
Quantitative and population plant genetics and their interrelationship with plant breeding. Genetic and environmental variation and how they relate to selection procedures and choice of type of variety.

CRSS 8890-8890L. Plant Cytogenetics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BTNY 8100 or permission of department.
Classical and molecular cytogenetics are integrated to explain the reproductive behavior of angiosperms, the applications of cytogenetics to plant improvement, and the study of plant genetics.

CRSS(BTNY) 8900. Advanced Plant Genetics. 3 hours.
Prerequisite: BTNY 8100 or CRSS 8890-8890L or permission of department.
Recent developments in plant genetics: sexual incompatibilities and somatic hybridization, genetic engineering; RFLPs and other molecular markers, linkage and mapping: cytoplasmic genetics; and classic papers.

CRSS 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CRSS 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Entomology

Ray Noblet, *Head*
Kenneth G. Ross, *Graduate Coordinator, 542-7699*
(Biological Sciences Building)

Requirements for the PhD include completion of research skills requirement in statistics, computer science, foreign language or comparable skill.

The Department of Entomology offers graduate work leading to the professional MPPPM (Master of Plant Protection and Pest Management) degree, and the MS and PhD degrees. The MPPPM is a non-thesis degree requiring specified graduate level course work, two semesters of internship, plus selected graduate level electives. The MS and PhD are research degrees requiring course work plus original research leading to a thesis or dissertation. Students holding the baccalaureate degree are normally admitted at the MS level but may petition to bypass this degree and work towards the PhD after meeting specific departmental requirements.

In addition to the faculty at the Athens campus, students may carry out research under the direction of faculty at the Experiment Station at Griffin or at Tifton, Georgia. Facilities and opportunities for studies on applied aspects of entomological problems and integrated pest management are emphasized at the stations. On the Athens campus, faculty joint staffed with the Departments of Ecology, Genetics, Biochemistry and Molecular Biology, Biological Sciences Division, the Museum of Natural History, and the interdisciplinary toxicology program enable students to earn a degree in entomology with training in related disciplines.

Facilities outside the department include electron transmission and scanning microscopes, cell sorter, monoclonal and sequencing labs, computer facilities, nine agricultural research farms, forest research areas, the Museum of Natural History, and the U.S.D.A., U.S.E.P.A., and Forestry laboratories. Particularly good library facilities in entomology are available at the Athens campus.

Departmental teaching and research assistantships are available from the department. Other financial aid is available through the Graduate School, but applications should be submitted to the Department of Entomology.

Students without previous courses in entomology, genetics, or biochemistry may be required to make up deficiencies.

ENTO 4000/6000-4000L/6000L. General Entomology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1107-1107L and BIOL 1108-1108L.
Functional anatomy and physiology, behavior, ecology, insects as vectors of pathogens, chemical and biological control of pests. Laboratory sessions are devoted primarily to collecting and the identification of major families of insects.

ENTO 4010/6010-4010L/6010L. Insect Taxonomy. 3 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Insect identification, classification, and phylogeny; collection and preparation techniques for insect specimens; introduction to theoretical and practical aspects of systematics.

ENTO(CRSS) 4250/6250-4250L/6250L. Pesticide Management and Utilization. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L and [(CHEM 2100 and CHEM 2100L) or (CHEM 2211 and CHEM 2211L)].
Practical management and utilization of pesticides in urban and agricultural environments. Subject areas include classification of insecticides, herbicides, and fungicides, etc., their general chemical and toxicological properties, deployment philosophy, hazards and environmental impact, formulation and application, safety and disposal, and management of pesticide resistance.

ENTO 4400/6400-4400L/6400L. Insect Behavior. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L.
Principles of behavior; communication, sexual behavior, anti-predator adaptations, insect-plant interactions, and insect sociality.

ENTO 4740/6740-4740L/6740L. Insect Pest Management. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENTO 3740-3740L or permission of department.
Major applied insect control techniques; the advantages and limitations of these tactics including practicality, economics, environmental impact, etc. Integrated control systems for development of a pest management program.

ENTO 4820/6820-4820L/6820L. Entomology in Natural Resources Management. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or permission of department.
Arthropods important in management of forest resources including timber, wildlife, and recreation.

ENTO 5730/7730-5730L/7730L. Entomology for Teachers. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Insects and related forms, their identification, and life habits, with emphasis on their use in pre-college life science curricula.

ENTO 6130. Internship in Crop Protection and Pest Management. 1 hour.
Prerequisite: Permission of department.
Working experience with public or private agencies concerned with pest management. Non-Traditional Format: Working experience of approximately one semester in length with public or private agencies concerned with pest management.

ENTO 6150. Insect Physiology. 3 hours.
Prerequisite: ENTO 4000/6000-4000L/6000L and [BCMB(BIOL)(CHEM) 3100 or CBIO(BIOL) 3400].
Organization and function of organ systems in insects, emphasizing evolutionary and molecular perspectives.

ENTO 6500-6500L. Insect Ecology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Special ecology of insects in natural and managed ecosystems.

ENTO 6600-6600L. Insect Morphology. 3 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: ENTO 4010/6010-4010L/6010L or permission of department.
Form and function of insect anatomy in phylogenetic context; techniques for dissection, preparation and illustration of insect morphology.

ENTO(MIBO) 6670-6670L. Insect Pathogens. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Insect pathology, including history, classification of diseases, insect response to pathogens, normal insect/microbe ecology, and the production and use of insect pathogens for pest control.

ENTO 6940-6940L. Aquatic Entomology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Ecology, life history, biology, and taxonomy of aquatic insects, their role in ecosystems and biological monitoring.

ENTO 7000. Master's Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENTO 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ENTO 8000. Entomology Seminar. 1-2 hours. Repeatable for maximum 15 hours credit.
Entomology, both fundamental and applied, including literature reviews and discussion of recent events.

ENTO 8050. Principles of Systematics. 2 hours. 1 lab period of 3 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
History and philosophy of systematics, the science of biological classification, with special reference to insects. Methods of analysis and types of data in systematic biology.

ENTO 8080. Topics in Insect Physiology and Biochemistry. 2 hours. Repeatable for maximum 6 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: ENTO 6150 or permission of department.
Special topics in insect physiology and biochemistry.

ENTO 8100. Evolution of Insects. 2 hours. 1 lab period of 3 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Organic evolution, the history of evolutionary thought, methods for studying evolution, and contemporary topics in evolutionary theory with a special emphasis on insects.

(ENTO)ECOL(BIOL) 8150. Wetland Ecology. 3 hours.
Prerequisite: Permission of department.
Principles of ecology, elemental cycling, hydrology, policy and management of marine and freshwater wetlands.

(ENTO)ECOL(BTNY) 8150L. Wetland Ecology Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Prerequisite: ECOL(ENTO)(BTNY) 8150 or permission of department.
Techniques for the study of marine and freshwater wetlands. Optional weekend field trips will explore distant wetland sites.

ENTO 8310. Insect/Plant Interactions. 2 hours.
Prerequisite: ENTO 6150 or permission of department.
Chemical and physical description of insect/plant interactions. Emphasis placed on the plant surface and its role in insect behavior.

ENTO 8340. Social Insect Biology. 2 hours. 1 lab period of 3 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Social insects and their physiology, ecology, behavior, and evolution.

ENTO 8570. Molecular Entomology. 2 hours.
Prerequisite: ENTO 6150 or permission of department.
Contemporary issues in insect physiology, development, behavior, and control, with an emphasis on the latest molecular information.

ENTO 8650. Vector Biology. 3 hours. Repeatable for maximum 6 hours credit.
Identification, ecology, physiology, and biochemistry of ticks and associated disease-causing parasites, vector-host and vector-parasite interactions. Current research topics.

ENTO 8710-8710L. Immature Insects. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Classification, identification, biology, and economic significance of insect larvae.

ENTO 8820. Biological Control. 3 hours.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Biological control of arthropod pests and weeds; biology of parasitoids and predators; historical perspective, ecological basis and implementation in traditional and alternative agricultural systems; integration with other pest management tactics.

ENTO 8900. Problems in Entomology. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special problems and topics in entomology. Non-Traditional Format: Course requirements are individually negotiated between the student and instructor.

ENTO 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENTO 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Environmental Health Science

Harold M. Barnhart, *Acting Head*
Phillip L. Williams, *Graduate Coordinator*
542-0606
Environmental Health Building)

The Department of Environmental Health Science offers three graduate programs: MS in environmental health; MS in toxicology; and PhD in toxicology. The MS degree in environmental health is offered with the opportunity to specialize in environmental protection, industrial hygiene, or public health and may be completed as a terminal degree or as a preparatory step toward a PhD degree. The two toxicology degrees are offered through the University's Interdisciplinary Toxicology Program (see the section in this bulletin entitled, General Degrees: Interdisciplinary Programs) and students can pursue an emphasis in environmental or mammalian toxicology.

Faculty within the Department of Environmental Health Science have expertise in several fundamental and applied disciplines affording a diverse selection of courses and research programs. Courses in environmental air and water quality, risk assessment, industrial hygiene, toxicology, environmental epidemiology, and statistics provide in-depth training for employment in commercial concerns, governmental agencies and academic institutions. Research facilities include laboratories equipped to handle a wide-range of chemical analyses, toxicological bioassays, air or water quality assessments, microbiological and environmental issues.

Prospective students who desire financial aid may apply for assistance directly to the Department of Environmental Health Science. A limited number of research and teaching assistantships are available through individual faculty members. Other assistantships are available through the Graduate School and application for these should be made through the Environmental Health Science Graduate Coordinator.

EHSC 4080/6080. Environmental Air Quality. 2 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
Sources and control of community air pollution; effects of air pollutants on human health and the environment; regulatory and public policy issues.

EHSC 4100/6100-4100L/6100L. Industrial Hygiene. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 2211 and CHEM 2211L.
The anticipation, recognition, evaluation, and control of those environmental factors, arising in or from the workplace, which can cause sickness, impaired health and well-being, or significant discomfort and inefficiency among workers or among community citizens.

EHSC 4150/6150. Solid and Hazardous Waste Management. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and MATH 1113 and STAT 2000.
Regulatory, chemical, and engineering aspects of solid and hazardous waste management, including RCRA, CERCLA, landfill and incinerator design, pollutant transport and fate, and potential for human health impacts.

(EHSC)FDST(MIBO) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

(EHSC)FDST(MIBO) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

EHSC 4350/6350-4350L/6350L. Environmental Chemistry. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EHSC 4150/6150.
Chemical principles of environmental processes which result from natural or human-generated phenomena; air, water, and soil chemical reactions involving pollutants and wastes; measurement of pollutants in the environment.

EHSC 4490/6490. Environmental Toxicology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and (BIOL 1104-1104L or BIOL 1108-1108L).
Extent and significance of toxic agents in the environment, and the physical, chemical, and biological processes which determine their behavior, fate, and ultimate effect on human health.

EHSC 4590/6590-4590L/6590L. Water and Wastewater. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Chemistry and microbial life of water and wastewater, domestic and industrial, with scrutiny of current treatment processes. Sampling methods will be demon-

strated. Effects of different types of waste on microbial population of rivers and streams.

EHSC 4610/6610. Water Pollution and Human Health. 3 hours.
Prerequisite: EHSC 3060.
Prerequisite or corequisite: CHEM 2211 and CHEM 2211L.
Human health issues related to water consumption and use, focusing on water contamination from municipal, industrial, and agricultural practices.

EHSC 6010. Proseminar in Environmental Health. 1 hour.
Prerequisite: Permission of department.
Research methods with an emphasis on presentation and instructional techniques.

EHSC 7000. Master's Research. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EHSC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

EHSC 8100. Current Topics in Environmental Health Science. 2 hours.
Public health, industrial hygiene, environmental protection, hazardous waste management, and environmental/occupational toxicology.

EHSC(AAEC) 8120. Roles and Responsibilities of Environmental Policy Makers. 2 hours.
Prerequisite: Permission of department.
Roles of science, engineering, law, journalism, economics, grass roots activism, and the legislative and regulatory process in the development of environmental policy.

EHSC 8150. Environmental Health Seminar. 1 hour.
Prerequisite: Permission of department.
Selected topics in environmental health.

EHSC 8510-8510L. Environmental Risk Assessment and Communication. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EHSC 4490/6490 or PHRM(VPHY) 6910 or PHRM(VPHY)(POUL)(EHSC) 8930 or permission of department.
Assessment of risks related to environmental exposures; government agency definition and conduct of risk assessments; public communication of environmental exposure risks.

EHSC(ECOL) 8610. Aquatic Toxicology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and [EHSC 4490/6490 or PHRM(VPHY) 6910 or PHRM(VPHY)(POUL)(EHSC) 8920].
Toxicological effects of aquatic pollution focusing on fate and transport of xenobiotics; xenobiotic accumulation, dynamics, and toxicity in aquatic organisms; the analysis and modeling of the effects of aquatic pollution on organisms; and the determination of related risks to aquatic ecosystems and human populations.

(EHSC)ECOL 8630-8630L. Quantitative Ecological Toxicology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and (STAT 4220 or STAT 6220).
Principles and quantitative methods for the analysis of ecotoxicological data.

(EHSC)PHRM(VPHY)(POUL) 8930. Chemical Toxicology. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Chemical contamination of air, water, and food by major agricultural and industrial chemicals. Emphasis will be placed on sources of contamination, fate of chemicals in the environment, target species, health effects, chemical analyses, and contamination control.

Food Science and Technology

Michael P. Doyle, *Head*
Philip E. Koehler, *Graduate Coordinator, 542-1099*
(Food Science Building)

Programs of study leading to both the Master of Science and Doctor of Philosophy degrees in food science are offered in the various fields of interest in the Division of Food Science and Technology.

Since the application of science and engineering is important in properly selecting, preparing, processing, packaging, distributing and utilizing foods, students selecting this field must be able to delve into problems involving chemistry, microbiology, engineering, and other sciences as well as in the more applied problems concerned with food production, stability, or toxicology. Individuals whose baccalaureate degree is in other fields of science often enter this graduate program because of the important challenges of supplying food to mankind and the opportunities that this field provides to those with advanced degrees. Programs of study are designed for each individual to best utilize his/her prior training and his/her career objectives. The food science and technology division occupies the food

science building and the food processing laboratory in the University of Georgia Science Complex on South Campus in Athens and the food science building at the Georgia Agricultural Experiment Station in Griffin. All three buildings are well-equipped with modern instrumentation, pilot plants, and other facilities necessary for graduate research in food processing, food chemistry, food microbiology, food engineering, sensory evaluation, food biotechnology, food toxicology, product development, and nutrient analyses. Faculty in the division are scientists and engineers with expertise in several fundamental and applied disciplines offering a diverse selection of courses and research programs.

FDST 4010/6010. Principles of Food Processing. 3 hours.
Prerequisite: MIBO 3500 and CHEM 2100 and CHEM 2100L and (FDST 2010 or FDST 3000).
Principles of food preservation by chilling, freezing, dehydration, fermentation, and thermal processing.

FDST 4020/6020. Processing Methods in Food Science. 2 hours. 2 lab periods of 3 hours each per week.
Prerequisite: FDST 4010/6010.
Processing methods to control microbial and enzymatic activity and to minimize chemical and physical deterioration of foods.

FDST(MIBO) 4030/6030-4030L/6030L. Food Microbiology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Interactions of microorganisms with food and the implications of these interactions for food preservation, safety, and fermentations. Pathogenic microorganisms associated with food. Analysis of foods for the presence of microorganisms.

FDST 4040/6040-4040L/6040L. Food Chemistry. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and (FDST 3000 or FDST 4010/6010).
Chemical, physical, and functional properties of food constituents and ingredients.

FDST 4050/6050-4050L/6050L. Food Engineering Fundamentals. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PHYS 1111-1111L and MATH 2210 and MATH 2210L.
Prerequisite or corequisite: FDST 4010/6010.
Mass and energy balance, fluid flow, heat transfer, and refrigeration in food plant operations. The theory, calculations and design practices, and equipment used in these operations, as well as the physical, chemical, and microbial changes that can occur in foods in processes employing these operations.

FDST 4060/6060-4060L/6060L. Food Engineering Fundamentals. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FDST 4050/6050-4050L/6050L or permission of department.
Phase equilibria in foods, psychrometrics, water activity, freezing, dehydration, evaporation, membrane separations, extrusion, and process control.

FDST 4070/6070. Nutritional Quality and the Effect of Technology. 3 hours.
Prerequisite: FDST 4040/6040-4040L/6040L or BCMB(BIOL)(CHEM) 3100.
The nutritional properties of food and the effects of modern technology on nutritional quality.

FDST 4080/6080-4080L/6080L. Instrumental Methods of Food Analysis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 2100 and CHEM 2100L.
Spectrophotometric, colormetric, chromatographic, and potentiometric methods of analysis as applied to food. Emphasis will be placed upon correlation and interpretation of results.

FDST 4090/6090-4090L/6090L. Food Quality Control. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: [FDST 2010 or FDST 3000] and STAT 2000.
Designing and implementing food quality and process control programs. Monitoring and controlling process specifications and capabilities. Developing food attribute and variable control charts. Examining food sampling plans and verifying HACCP food safety plans.

FDST 4100/6100. Governmental Regulation of Food Safety and Quality. 2 hours.
Role of mandatory and optional food laws and regulations exercised by state, federal and international agencies on food quality, safety, wholesomeness, and nutrition.

FDST 4110/6110-4110L/6110L. Food Packaging. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST 3000.
Raw materials, processes, and machinery used in the transportation, storage, and marketing of packaged food products. The relationship between packaging materials, food processing operations, and product quality. Evaluation of chemical and physical properties of food package materials.

FDST(MIBO) 4120/6120-4120L/6120L. Food Fermentations. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Microbial and technical aspects of dairy, vegetable, meat, grain, and fruit fermentations. Products studied include cheese, sausage, beer, wine, and soy sauce.

FDST 4130/6130. Food Biotechnology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or permission of department.
Recombinant DNA in food and enzyme biotechnology, tissue culture, and microbial transformations. Applications and regulations of biotechnology in the fats and oils industry.

FDST(ADSC) 4140/6140-4140L/6140L. Advanced Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L and FDST 4040/6040-4040L/6040L.
Meat processing and technology, scientific basis for meat as a food, USDA and FDA regulations governing meat processing, and the latest innovations in commercial meat processing.

FDST 4250/6250-4250L/6250L. New Food Product Development. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (FDST 4010/6010 and FDST 4040/6040-4040L/6040L) or permission of department.
New food product development, food constituents and functionality, ingredient functions and selection, sensory evaluation/application, dietary guidelines and food regulations affecting product development, new product development project management, protecting innovations, market testing.

FDST(EHSC)(MIBO) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

FDST(EHSC)(MIBO) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

FDST 5010/7010-5010D/7010D. Food Formulation and Preservation. 3 hours. 1 hour lecture and 1 discussion period of 4 hours each per week.
Not open to students with credit in FDST 4010/6010.
Food preservation by chilling, freezing, fermentation, canning, and dehydration. Formulation of food products and interactions of food ingredients. Applications of principles to experiments in food science.

(FDST)ADSC 6170-6170L. Experimental Techniques in Meat Science and Muscle Biology. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or STAT 4220 or STAT 6220 or permission of department.
Basic methods in laboratory techniques in meat science. Experiments will familiarize students from a wide variety of backgrounds with a number of laboratory techniques, including lipogenesis, muscle histology, enzyme kinetics, and muscle metabolism.

FDST 6500. Proseminar in Food Science. 1 hour.
Seminar on research methods with an emphasis on presentation and instructional techniques; required of all new Food Science graduate students.

(FDST)ADSC 6890. Advanced Meat Science. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or permission of department.
The theories and methods used in meat science in determination of tissue growth; compositional techniques; muscle protein and lipid organization, structure, and function; biochemical conversion of muscle to meat, and its impact on meat quality and palatability in meat animals.

FDST 7000. Master's Research. 1-10 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FDST 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

FDST 8010. Food Lipids. 3 hours.
Prerequisite: FDST 4040/6040-4040L/6040L or BCMB(BIOL)(CHEM) 3100 or permission of department.
Structure, composition, preservation, deterioration, analysis, nutritional qualities, functional properties, and biotechnological modification of lipids. Fat substitutes in foods.

FDST 8020-8020L. Flavor Chemistry and Evaluation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (STAT 4210 or STAT 6210) and CHEM 2100 and CHEM 2100L.
Sensory methods of evaluating flavor and physical or chemical methods of measuring flavor components; the flavor characteristics of various chemicals, especially as influenced by concentration and interaction with other compounds; flavor formulation; and the stability of flavor substances during processing and storage.

FDST 8030. Seafood Technology. 3 hours.
Prerequisite: (FDST 4010/6010 and FDST 4040/6040-4040L/6040L) or permission of department.
Fishery resources and availability as food, nutritive composition, postharvest biochemical and microbial changes, fishing and handling technology, chilling and freezing, dehydration/smoking/salting, fermentation,

canning, minced fish technology, aquaculture, quality and safety evaluation, distribution and marketing.

FDST 8040. Food Colorants. 3 hours.
The chemical, biochemical, and nutritive properties of natural and artificial food colorants. Methods used for their isolation and study are demonstrated.

FDST 8050. Food Toxicology. 3 hours.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L.
Principles and problems in evaluating the wholesomeness and safety of foods, food components, and intentional or incidental additives. Consideration of selective toxicity, detoxication mechanisms, structure and biological activity; basic concepts and techniques of safety evaluation, interpretation of biological data.

FDST 8060-8060L. Advanced Food Processes. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST 4050-4050L.
The principles and basis for recently developed food processes. Analysis of equipment requirements and cost comparisons with conventional systems. Production of novel foods and ingredients using advanced technology. Plant simulation and optimization of processes.

FDST 8070. Food Proteins and Enzymes. 3 hours.
Prerequisite: FDST 4040/6040-4040L/6040L or BCMB 4010/6010.
Biochemistry of structure and function of proteins and enzymes important in food applications and as food ingredients.

FDST 8080-8080L. Food Texture. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST 4040/6040-4040L/6040L and FDST 4050/6050-4050L/6050L.
Food texture and rheology. Viscoelastic models of food systems. Instrumental and sensory methods of analysis. Factors affecting food texture. Texture of specific systems including liquids, gels, emulsions, and solids.

FDST 8090. Advanced Food Microbiology. 3 hours.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L.
Physiology and biochemistry of food-borne microorganisms; microbial control in food systems; advanced analytical techniques in food microbiology.

FDST 8100. Food Carbohydrates. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or permission of department.
The classes, structure, composition, properties, reactions, uses in food, biotechnological modification and analysis of carbohydrates.

FDST 8110. Food Research and the Scientific Method. 2 hours.
Prerequisite: Permission of major.
Research as a process that transforms ideas into accessible knowledge. Unit operations include idea generation, problem definition, critical evaluation of literature, method selection, experimental design, data collection, processing and analysis, and knowledge dissemination. Additional aspects include philosophy, grantsmanship, planning, laboratory set-up and management, and career development.

FDST 8120-8120L. Food Structure and Properties. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FDST 4040/6040-4040L/6040L and FDST 4050/6050-4050L/6050L.
Structural and microstructural aspects of foods. Methods for analyzing food structure. Food polymer and colloid systems. Aspects of structure which determine mechanical, thermal, and dielectric properties of foods.

FDST 8500. Food Science Seminar. 1 hour. Repeatable for maximum 2 hours credit.
Discussion of selected topics in food science.

FDST 8800. Special Problems in Food Science. 1-3 hours. Repeatable for maximum 6 hours credit.
Selected problems associated with food science will be studied to develop greater facility in the application of scientific methods to the solution of problems. The student will work closely with an advisor to plan and complete a research project. Non-Traditional Format: Research in an area of interest under the direction of a faculty member.

FDST 8900. Topics in Food Science. 1-3 hours. Repeatable for maximum 6 hours credit.
Analysis of emerging issues and developing technologies in Food Science.

FDST 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FDST 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Horticulture

Darrell Sparks, *Acting Head*
William M. Randle, *Graduate Coordinator, 542-2471*
(Plant Sciences Building)

The Department of Horticulture offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees. Active teaching

and research programs are being conducted in ornamental horticulture, floriculture, fruits, vegetables, and nut crops. Students can focus on areas of specialization that include plant breeding, physiology, plant development, biotechnology, postharvest physiology, nutrition, biochemistry, integrated pest management, weed control, water relations, crop production and management, and product utilization. The department has about 40 full-time faculty members located at the Athens, Tifton and Griffin campuses, and various other locations in the state. The facilities available for graduate training include three well-equipped Experiment stations, the State Botanical Garden, and several field research centers that represent the climatic areas of the state. The department has strong interdisciplinary research programs with other departments in the University. Cooperative work is available with three federal research laboratories.

Graduate work in Horticulture is designed to develop a high order of independent thought, broad knowledge, and technical skills. The emphasis in graduate work is placed on research, supplemented by courses and seminars.

The program for either graduate degree is planned on an individual basis by the student and his/her advisory committee to complement previous experience and career objectives. Admission status, credit requirements, transfer credits accepted, academic standards, residence requirements, and time limits conform to regulations as given by the Graduate School and the College of Agricultural and Environmental Sciences. Students with strong backgrounds in the biological and/or plant sciences are encouraged to apply. For further information see the Horticulture web site at http://www.uga.edu/hort.

HORT 4010/6010-4010L/6010L. Olericulture. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HORT 3010.
Current cultural practice of and environmental influence on vegetable crop production.

HORT 4020/6020-4020L/6020L. Pomology. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HORT 3020 or permission of department.
Culture and management of orchard crops, including site selection, cultivar and rootstock selection, pruning and training, propagation, integrated pest management, physiology of flowering and fruiting, harvest and postharvest procedures. Laboratory provides hands-on experience pruning, training, and budding trees, and using/calibrating equipment needed for managing orchards.

HORT 4050/6050. Greenhouse Management. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1103-1103L or BTNY 1210-1210L.
Commercial greenhouse crop production practice with emphasis on plant nutrition, growth regulators, pest control, and postharvest handling.

HORT 4070/6070. Special Problems in Horticulture I. 1-5 hours.
Research on special problem under direction of faculty. Non-Traditional Format: As arranged under the direction of faculty.

HORT 4080/6080. Special Problems in Horticulture II. 1-5 hours.
Advanced research on problem of special interest under direction of faculty. Non-Traditional Format: As arranged under the direction of faculty.

HORT 4110/6110. Plant Nutrition. 3 hours.
Prerequisite: CRSS 3050-3050L.
Mineral nutrition of higher green plants.

HORT 4210/6210. Postharvest Physiology of Horticultural and Agronomic Crops. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1107-1107L or BTNY 1210-1210L or (CHEM 1212 and CHEM 1212L).
Catabolic and anabolic metabolism, and anatomical and pathological responses of harvested fruits, vegetables, nuts, seeds, cut flowers, and intact plants. Transportation, refrigeration, controlled atmospheric storage, drying, and packaging of harvested products.

HORT 4440/6440-4440L/6440L. Environmental Physiology in Horticulture. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BTNY 4850/6850-4850L/6850L or BTNY 8890-8890L or CRSS 3300.
Prerequisite: (BIOL 1103-1103L and BIOL 1104-1104L) or (BIOL 1107-1107L and BIOL 1108-1108L) or (BTNY 1210-1210L and BTNY 1220-1220L).
Effects of environmental factors on growth and physiology of horticultural plants and modification of the plant's environment to improve crop production.

HORT 4890/6890. Biodiversity and the World's Food Crops. 3 hours.
Molecular, organismal, ecological, and sociocultural aspects of biodiversity. Independent research project required.

(HORT)CRSS(ANTH) 4930/6930. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

(HORT)CRSS(ANTH) 4940/6940. Agriculture and Ecology in Tropical America Field Trip. 3 hours. Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4930/6930.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country. Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

HORT 7000. Master's Research. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HORT 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

HORT 8000. Horticultural Seminar. 1 hour. Repeatable for maximum 2 hours credit.
Papers on selected topics to be presented by advanced students, faculty members, and guest speakers.

HORT 8080. Horticulture Research. 1-10 hours.
This course is designed for graduate students who wish to carry out advanced research not covered in their thesis topic under the supervision of a faculty member. Non- Traditional Format: As arranged under the supervision of a faculty member.

HORT 8130. Advanced Plant Nutrition. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (HORT 4110/6110 and BTNY 3830-3830L) or permission of department.
The principles of plant nutrition, with emphasis on the theories of ion absorption, function of nutrient ions, and nutrient effects on plant composition.

HORT 8150. Growth and Development of Horticultural Crops. 3 hours.
Prerequisite: BTNY 3830-3830L or permission of department.
Growth and development of economic plants. The physiological processes of growth, translocation, growth regulators, juvenility, maturity, senescence. Floral initiation and development of economic plants, with emphasis on the physiological processes of growth, translocation, growth regulators, juvenility, maturity, senescence, floral initiation and development, fruiting, tuber and bulb formation, vernalization, dormancy, rest, and seed germination.

HORT 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 35 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HORT 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Plant Pathology

John L. Sherwood, *Head*
Charles W. Mims, *Graduate Coordinator, 542-1291*
(Plant Sciences Building)

Plant pathology offers three graduate programs: MS, PhD, and a professional Master of Plant Protection and Pest Management degree (MPPPM). The department has a strong tradition in scholarship and has an international reputation for research on diseases of apples, cotton, cowpeas, peaches, peanuts, pecans, small grains, soybeans, tobacco, and vegetables. Currently, active research and teaching programs are being conducted in all major areas of plant pathology involving many different crops.

The MS and PhD degrees are traditional academic degree programs which demand creative scholarship, technologic skill, and philosophic soundness. These programs emphasize the development of scientists who have the ability to fill positions of leadership in teaching, research, and administration. To achieve such goals of excellence, the student must be highly motivated and must make a commitment to the understanding of plant pathology so that biological principles can be developed and applied. Students may specialize in general plant pathology, mycology, bacteriology, nematology, virology, physiology, genetics, or epidemiology.

The MPPPM program is designed to produce graduates with comprehensive, multidisciplinary training in plant pathology, entomology, and agronomy.

Doctoral research skills requirement: one of the three following options, with a decision of which option to require being left to the discretion of the student's advisory committee, (1) sta-

tistics, (2) computer science, and (3) reading knowledge of a foreign language.

The Department of Plant Pathology has faculty located in Athens, Tifton and Griffin. All three locations are well equipped with modern instrumentation, greenhouses, and other facilities for graduate research. Land for field studies is located at main and branch experiment stations at several locations throughout Georgia in different climatic regions and major crop growing areas. A Plant Disease Clinic operated by the Extension Plant Pathology Department is used to give students practical training in disease diagnosis and control.

Prospective students who are interested in financial aid should file an application with the department; they will be considered for any Graduate School, College of Agricultural and Environmental Sciences, or department assistantship for which they are eligible.

PATH(BTNY) 4200/6200-4200L/6200L. Introductory Mycology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Morphology, biology, and taxonomy of fungi. Representatives of all major groups of fungi are considered.

PATH 4280/6280-4280L/6280L. Diagnosis and Management of Plant Diseases. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH 3530-3530L.
Development of fundamental and practical knowledge for identification and management of plant diseases.

PATH 6130. Internship in Plant Protection and Pest Management. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Students will be involved and become familiar with the applied aspects of plant protection and pest management. Non-Traditional Format: The student will spend the semester in either a university or industry setting obtaining hands-on experience in the applied aspects of plant pathology/pest management.

PATH 6250-6250L. Plant Nematology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PATH 3530-3530L.
Morphology and biology of plant parasitic nematodes. An introduction to nematology, with an emphasis on nematode morphology, nematode disease of plants, and nematode management.

PATH 6290-6290L. Plant Pathogenic Bacteria. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH 3530-3530L or MIBO 3500.
Isolation, identification, inoculation, biology, and control of plant pathogenic bacteria.

PATH 6350-6350L. Plant Virology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH 3530-3530L and BTNY(CRSS)(BIOL) 4500/6500.
Nature of plant viruses, replication and gene expression, movement and host range, purification, serology, control, and resistance.

PATH 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PATH 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PATH 8000. Field Plant Pathology. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: PATH 3530-3530L.
Four day long field trip to various parts of the state to see and collect examples of plant diseases in the field on economically important crops in Georgia. Non-Traditional Format: The student will spend four days in the field examining and collecting diseased plants in various parts of Georgia and surrounding states.

PATH 8150. Plant Pathology Graduate Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Presentation of thesis and dissertation results and discussion of papers and research topics in plant pathology.

PATH 8160. Special Topics in Plant Pathology. 1-3 hours. Repeatable for maximum 6 hours credit.
Advanced topics of current interest and importance in plant pathology.

PATH 8200. Applied Mycology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Fungi collected from various sources in nature will be brought into the laboratory for culture and/or preservation and subsequent identification using current taxonomic literature.

PATH(BTNY) 8210-8210L. Biology of Ascomycetes. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Comparative morphology of ascomycetes and their asexual stages; principles of taxonomy and training in identification.

PATH 8310-8310L. Epidemiology of Plant Diseases. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH 3530-3530L.
Factors altering the course of disease epidemics in

plant populations. Techniques for qualitative and quantitative measures of such factors will be emphasized.

(PATH)BTNY 8320-8320L. Zoosporic Fungi and Slime Molds. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Comparative biology of zoosporic fungi and slime molds as organisms. Topics include current research in morphology and development, phylogeny, physiology, ecology and the use of selected organisms as model systems. Laboratory will emphasize isolation and cultivation of these organisms and demonstration of their reproductive stages.

(PATH)BTNY 8340-8340L. Experimental Mycology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Fungal biology and ecology and the use of fungi as experimental organisms in the study of development and molecular biology and genetics.

PATH 8400. Host-Pathogen Interactions. 3 hours.
Prerequisite: PATH 3530-3530L and PGEN 3580-3580L and (BCMB 4020/6020 or BTNY(CRSS)(BIOL) 4500/6500).
Principles of physiology and genetics of parasitism and disease resistance. Emphasis is placed upon how the genetic basis for host-pathogen compatibility and incompatibility is related to structural, physiological, and biochemical responses in diseased plants and to mechanisms of resistance.

PATH 8410. Advanced Plant Disease Management. 3 hours.
Prerequisite: PATH 3530-3530L.
Chemical controls and application methods, biological control and ecology of plant pathogens, host resistance, cultural practices, pesticide resistance, disease forecasting and other decision aids, integrated disease management, and economic aspects of disease management.

(PATH)BTNY(GENE)(BCMB) 8960. Fungal Genetics. 3 hours.
Prerequisite: Permission of department.
The genetics of the fungi emphasizing classical and modern molecular approaches.

PATH 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PATH 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Poultry Science

Henry L. Marks, *Head*
Birkett Howarth, *Graduate Coordinator, 542-1369*
(Livestock-Poultry Building)

The Department of Poultry Science offers excellent opportunities for graduate study for qualified students with degrees in biology, chemistry, economics and poultry science. Graduate programs leading to the MS and PhD degrees are offered in the fields of poultry products, nutrition, microbiology, molecular biology, mycotoxicology, genetics, physiology, management and parasitology. Facilities for graduate training include laboratories with the latest equipment for studies in lipid and mineral metabolism, environmental and reproductive physiology, physiological and population genetics and in avian diseases and parasites.

Equipment is available for electrophoretic and chromatographic separation, fractionation procedures, and use of radioactive isotopes, including a whole body counter. Specialized equipment includes liquid scintillation detectors, infrared, ultraviolet and dual spectrometers, ultracentrifuge, amino acid analyzer, gas-liquid chromatograph, and numerous other modern instruments.

Experimental poultry facilities are also available for studies, where large numbers of birds are required for research in the various areas of specialization in the graduate program, including a controlled temperature house for work in environmental physiology.

Superior students are encouraged to apply for graduate assistantships and fellowships which are available through the department.

The 8000 numbered courses in nutrition are listed in the offerings of animal nutrition.

For a description of the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin entitled, "General Degrees: Interdisciplinary Program."

POUL 4050/6050. Advanced Poultry Breeding. 3 hours.
Prerequisite: POUL 3720.
The development of practical poultry breeding programs. The mode of inheritance and relative heritability of various characteristics of economic importance and criteria for effective selection toward their improvement.

POUL 4060/6060-4060L/6060L. Physiology of Avian Reproduction. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Lectures emphasize the reproductive physiology of poultry and integrate this information into management programs directed toward maximizing reproductive efficiency. Laboratories will emphasize the acquisition of skills and techniques in reproductive management, including the collection, preservation, and evaluation of semen, fertility evaluation, and proper incubation practices.

POUL 4330/6330. Basic Mycotoxicology. 3 hours.
Prerequisite: BIOL 1108-1108L and CHEM 2100 and CHEM 2100L.
Various mycotoxins which occur in feedstuffs as they relate to agricultural production. Fungal producers, chemical and physical properties of the toxins, prevalence and distribution in nature, biological effects and mode(s) of action, and means of control.

(POUL)ANNU(ADSC) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM) 3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

POUL 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

POUL 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

POUL 8010-8010L. Avian Physiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
The physiology of all organ systems of birds other than the reproductive system. In-depth study of avian systems will be done using current scientific literature and review articles as source material.

POUL 8100. Poultry Science Seminar. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Reading, reports, and discussions of problems related to the field of poultry.

POUL 8120. Scientific Writing and Literature Retrieval. 3 hours.
Prerequisite: Permission of department.
Scientific writing and literature retrieval techniques in the life sciences. Library resources and their use through manual and automated retrieval systems and on practical aspects of oral and written communications of scientific information.

POUL 8150. Poultry Nutrition with Application to Avian Medicine. 1 hour.
Prerequisite: POUL 3750 or ADSC 3300-3300L.
The practical aspects of poultry nutrition and the relationship of nutritional programs in poultry production to disease problems.

POUL 8510. Problems in Poultry Science. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Selected problems in the specialized areas of poultry nutrition, genetics, physiology, poultry products technology, pathology, parasitology, and management. Non-Traditional Format: Course format established by major advisor.

(POUL)CBIO(PARA) 8560. Seminar in Parasitology. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Weekly discussion of parasitological topics.

(POUL)PHRM(VPHY) 8920. Organ Systems Toxicology II. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Mechanisms of injury of biological systems produced by chemical exposure. Adverse effects of chemicals on major bodily organs and organ systems including the liver, carcinogenesis/mutagenesis, immune system, reproductive system, skin, and eyes.

(POUL)PHRM(VPHY)(EHSC) 8930. Chemical Toxicology. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Chemical contamination of air, water, and food by major agricultural and industrial chemicals. Emphasis will be placed on sources of contamination, fate of chemicals in the environment, target species, health effects, chemical analyses, and contamination control.

POUL 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

POUL 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

The Franklin College of Arts and Sciences

Wyatt W. Anderson, Dean
(New College)

The Franklin College of Arts and Sciences, the oldest of the schools and colleges which make up the University of Georgia, offers masters and doctoral degrees in more than forty disciplines or areas of study within the humanities, fine arts, social sciences, and natural sciences. The degree offerings include Master of Arts, Master of Science, Master of Applied Mathematical Science, Master of Arts for Teachers, Master of Fine Arts, Master of Music, Master of Public Administration, Doctor of Musical Arts, Doctor of Public Administration, and Doctor of Philosophy. Additionally, graduate certificates are available in conservation ecology and sustainable development, environmental ethics, geographic information science, global policy studies, and women's studies.

Applications must be submitted to the Office of Graduate Admissions for these programs, but students should also seek information regarding entrance requirements, faculty research specialties within departments or programs, and graduate assistantships from the graduate coordinator(s) of any program(s) in which they have interest. The names of the department heads and graduate coordinators, course offerings and additional information are also found in this bulletin.

African American Studies

R. Baxter Miller, *Director*
Institute for African American Studies, 542-5197
(Psychology Building)

The Institute currently arranges for collaborative graduate work with the departments of adult education, comparative literature, drama, English, history, political science, psychology, Romance languages, and sociology. Please consult any joint listings in the areas. Flexibly coherent programs should demonstrate disciplinary rigor along with brave new inquiries into fresh methods of scholarly integration. The Institute works especially to facilitate and authorize interdisciplinary options for diverse African Americanists of all kinds.

(AFAM)HIST 4055/6055. Historical Survey of African American Thought. 3 hours.
This course examines representative works of such nineteenth- and twentieth-century social, cultural, and political thinkers as Frederick Douglass, Cornel West, Anna J. Cooper, and Angela Davis among other outstanding women and men who have contributed significantly to the intellectual life of the African American community.

(AFAM)RELI 4201/6201. African American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The religious traditions of African Americans from Colonial times to the present; major religious movements, personalities, and ideas and their relationship to various aspects of American culture.

(AFAM)RELI 4202/6202. Southern Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The origins, growth, and current practices of religion in the American South. The interaction between religion and other aspects of Southern culture, such as racial and gender concerns, education, Darwinian science, temperance, and politics.

(AFAM)RELI 4203/6203. The Bible in the Black Church. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Biblical interpretation in black America from 1865 to the present.

AFAM(DRAM) 4490/6490. African American Women in Cinema: Image and Aesthetics. 3 hours.
Prerequisite: Permission of department.
Selected films by and about African and African American women. A historical/critical overview of the presentation of these women in cinema with emphasis on contemporary African and African American women film makers.

AFAM(PSYC) 4500/6500. Psychology of Prejudice. 3 hours.
Prerequisite: (PSYC 1101 or SOCI 1101) and senior standing.
Motivational, cognitive, social, and cultural factors that lead to discrimination in our society and various perspectives found in the research on discrimination.

AFAM(PSYC) 4550/6550. Classic Studies in Black Psychology. 3 hours.
Prerequisite: AFAM(PSYC) 3150 or permission of department.
Studies which have had major social or scientific impact on the lives of Black Americans and the way black people have been viewed within psychology. Approach is historical and interdisciplinary.

AFAM(ROML) 4860/6860. Topics in Afro-Hispanic Identity. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Representations of Africa and African American culture in Hispanic Literature by writers of African descent. By covering a variety of genres, the course will provide discussion about a cultural identity that is constantly in dialogue with dominant discourses. The course will incorporate critical texts.

(AFAM)ENGL(LING) 6040. Language Use in the African American Community. 3 hours.
Prerequisite: Permission of department.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

(AFAM)SOCI 6370. Sociology of Race and Ethnicity. 3 hours.
The relationships of racial and ethnic groups with each other and with social institutions and processes.

(AFAM)ENGL 6770. Topics in African American Literature. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics in African American literature, such as autobiography, the Harlem Renaissance, Gwendolyn Brooks and Richard Wright, Black American literature and aesthetics.

(AFAM)ENGL 8720. Seminar in African American Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A detailed examination of selected forms and ideas in the African American tradition.

AFAM 8960. Directed Reading in African American Studies. 3-9 hours. Repeatable for maximum 9 hours credit.
Independent directed reading course for graduate students whose programs of study require courses not available in the regular schedule. It makes the interdisciplinary study of African American culture and theory accessible to students who in traditional departments need to ground their inquiry in a broader context. Non-Traditional Format: The course will usually require a 20-25 page paper of publishable quality. The reading list will be approximately eight full-length books and 6-25 journal articles and chapters.

Anthropology

Stephen A. Kowalewski, *Head*
David J. Hally, *Graduate Coordinator, 542-3962*
(Baldwin Hall)

The Department of Anthropology offers programs leading to the degrees of Master of Arts and Doctor of Philosophy in anthropology. These graduate programs reflect training in basic anthropological knowledge and the department's focus on environmental and ecological anthropology.

Admission is only to the PhD program. Students may complete the requirements for an MA degree en route to the PhD or as the terminal degree in their program. Students are admitted and begin the PhD program only during Fall semester. No new admissions are permitted in the Spring semester.

Training focuses on the role of anthropology as a discipline in understanding the human-environment interface, both past and present, and from a cross-cultural perspective. The doctoral program also provides students with the flexibility to attain interdisciplinary training in other academic areas relevant to understanding issues of sustainable human ecosystems. Relevant academic areas for coursework within the university may include those offered in conjunction with the Institute of Ecology, the Environmental Ethics Program, the College of Agricultural and Environmental Sciences, the School of Forest Resources, and allied disciplines in the College of Arts and Sciences. Graduates of the program should be qualified for teaching, research, or applied employment opportunities. Requirements for the PhD degree include satisfactory performance on written and oral comprehensive examinations, fulfillment of a research skills requirement, and an approved dissertation which reflects the student's specialization and the departmental focus.

Prospective students must complete the application process by January 1.

(Please contact the graduate coordinator for current course offerings.)

ANTH 4000/6000. Anthropology of Economic Systems. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Models and methods used by anthropologists to study production, distribution, and consumption of goods in subsistence and market economies. Topics from the ethnographic literature include feasting, money, managing commons, pre-capitalist markets, and capitalist penetration of subsistence economies.

ANTH 4020/6020. Indians of North America. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
North American Indian cultures at the time of European contact. Additional topics include origin and development of Indian culture, impact of European contact on native cultures, and problems faced by Native Americans today.

ANTH 4040/6040. Visual Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Anthropological uses of film, video, and photographs in field research and in the presentation of research results, especially in relation to portrayal of indigenous people.

ANTH 4050/6050. Cultural Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
The analysis and cross-cultural comparison of human institutions.

ANTH(LING) 4090/6090. Cognitive Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Folk systems of knowledge, with an emphasis on how people in different societies culturally identify, define, label, and classify phenomena such as color terms, plants, animals, and other environmental resources.

ANTH 4200/6200. Field Methods in Archaeology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Corequisite: ANTH 4240/6240.
Archaeological reconnaissance, survey, excavation, laboratory preparation and analysis of collected materials. Non-Traditional Format: This course is taught in the field at an archaeological site, followed by laboratory preparation and analysis of collected materials. Contact hours exceed the average of three hours per week.

ANTH(ECOL) 4210/6210. Zooarchaeology. 3 hours.
Prerequisite: ANTH 1102 or BIOL 1104-1104L or BIOL 1108-1108L or permission of major.
Animal remains recovered from archaeological sites, studied in light of zoological and archaeological methods and theories and interpreted in terms of human and animal behavior.

ANTH 4240/6240. Laboratory Methods in Archaeology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Corequisite: ANTH 4200/6200.
Environmental, chronological, preservational, and analytical methods and techniques of archaeological research. Non-Traditional Format: This course is taught in the field at an archaeological site. Many more contact hours are involved beyond an average of three per week.

ANTH(ECOL) 4290/6290. Environmental Archaeology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of major.
Prehistoric and historic human subsistence patterns through the methods and techniques of zooarchaeology, paleobotany, and paleonutrition. Theories of environmental reconstruction.

ANTH(BTNY) 4300/6300-4300L/6300L. Ethnobotany. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
Ethnobotanical research, with focus on knowledge and utilization of the plant world in traditional societies. Comparisons of societies in tropical forest ecosystems and evaluation of issues relating to intellectual property rights and traditional peoples' knowledge of plant species with potential economic value.

ANTH 4310/6310. Archaeology of Eastern North America. 3 hours.
Prerequisite: ANTH 3220 or permission of major.
Prehistoric and early historic aboriginal cultural variation in Eastern North America.

(ANTH)GEOL 4340/6340. Archaeometry. 3 hours.
Prerequisite: GEOL(ANTH) 4700/6700.
Methods of archaeometric analysis including chronometric and instrumental techniques. Absolute age dating and characterization of archaeological materials by physico-chemical analysis.

ANTH 4540/6540-4540L/6540L. Environment and Health. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Bio-cultural medical anthropology focusing on the interaction among environment, biology, culture, and society as determinants of health and health problems.

ANTH 4550/6550. Ethnohistory. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
The methods used by anthropologists to reconstruct the history of preliterate societies from archaeological evidence, documentary evidence, and oral traditions. The ethnohistory of southeastern United States.

ANTH 4560/6560. Anthropology of Development. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Relationships among development, culture and environment from the world system perspective. Concepts of dependence, hegemony, inequality, and resistance are brought to bear in exploring interlinkages between (and among) underdevelopment, resource exploitation, and local autonomy and self-reliance.

ANTH 4570/6570. Maritime Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Coastal and marine regions of the world in terms of human occupation, resource utilization, social organization, and human-environmental relationships. Identification of issues in traditional and contemporary management of coastal and marine ecosystems.

ANTH 4580/6580-4580L/6580L. Ecology of Food, Diet, and Nutrition. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
The impact of cultural behavior on the acquisition, preparation, and consumption of potentially edible natural resources.

ANTH 4590/6590. Ecology and Evolution of Human Disease. 3 hours.
Prerequisite: Undergraduate level only: (ANTH 1102 and BIOL 1104-1104L) or permission of major; Graduate level only: ECOL(BIOL) 3500-3500L or permission of major.
Ecological, evolutionary, and biocultural aspects of human disease. Subjects include the ecology of infectious/parasitic disease pathogens and their human hosts, the evolution of human host-pathogen interactions, the impact of cultural and demographic change in human populations, and the effects of global environmental change on human disease patterns.

ANTH 4630/6630. Field Methods in Cultural Anthropology. 6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ANTH 1102 and permission of major.
Supervised research projects in a field setting. Individual projects related to a central problem or issue, using research methods and techniques in cultural anthropology; interviews, surveys, participant-observation, and questionnaires are included. Non-Traditional Format: Since research projects are supervised in a field setting, the amount of contact hours varies. Contact hours exceed the minimum.

(ANTH)RELI 4640/6640. Anthropology of Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Anthropological approaches to the world's major religions as they relate to complex societies.

(ANTH)GEOL 4700/6700. Archaeological Geology. 3 hours.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Archaeological geology examines the use of earth science methods and theories in the study of archaeological sites and their contents. The four major areas covered include: (1) the archaeological site and geology; (2) age determination techniques; (3) exploration techniques; (4) artifact characterization.

ANTH 4710/6710-4710L/6710L. Human Origins. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 and permission of major.
The evolutionary history of the human species through examination of the fossil record. The fossil record is introduced using precision casts of fossil specimens. Scientific methods are developed by rediscovering major findings. The influence of changing interpretations on the culture of science is demonstrated.

ANTH 4790/6790. Human Adaptation. 3 hours.
Prerequisite: Undergraduate level only: ANTH 1102 and permission of major; Graduate level only: Permission of major.
Human diversity as response to environmental stress, from both a biological and cultural perspective. Topics include adaptation to heat, cold, altitude, malnutrition, and infectious disease; the impact of westernization and technological advancement on human biological function; and growth and development of the individual under environmental stress.

(ANTH)LING 4860/6860. Sociolinguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The study of language as a cultural and social phenomenon. Topics include language and meaning, language and world view, language and social behavior, and language and social issues.

ANTH 4900/6900. Special Topics in Anthropology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ANTH 1102 or permission of major.
Current topics in anthropology.

(ANTH)CRSS(HORT) 4930/6930. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

(ANTH)CRSS(HORT) 4940/6940. Agriculture and Ecology in Tropical America Field Trip. 3 hours. Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4930/6930.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country. Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

(ANTH)ECOL(FORS) 6140. Principles of Conservation Ecology and Sustainable Development II. 3 hours.
Prerequisite: ECOL 6080.
Social science dimensions of conservation and sus-

tainable development; social, economic, and political considerations in managing natural resources; policy-level aspects to project implementation.

(ANTH)SOCI 6450. Sociopolitical Ecology. 3 hours. The relationship between humans and the environment; ecological and social theories about environmental policies and problems.

ANTH 6490. Foundations of Ecological Anthropology. 3 hours.
Prerequisite: Permission of major.
Human-environment interaction in anthropological perspective from the eighteenth century to the present.

ANTH 6520. History of Anthropological Theory. 3 hours.
Prerequisite: Permission of major.
The development of anthropological theory.

ANTH 6600. Microcomputers for Anthropological Research. 1 hour.
Prerequisite: Permission of major.
Microcomputer hardware and software packages for anthropological research. These include word processing, data management programs, and packages designed specifically for anthropology.

ANTH 6610. Introduction to Research Methods. 3 hours.
Prerequisite: Permission of major.
Central issues, underlying assumptions, and basic premises of anthropology. Course provides the requisite skills and knowledge for designing an original research project in anthropology.

ANTH 6620. Methods in Sociocultural Anthropology. 3 hours.
Prerequisite: Permission of major.
Research methods and techniques used in sociocultural anthropology, with emphasis on ethnographic field research, including observation, participant observation, interviewing, questionnaires, testing, and mapping. Methods of data organization, storage, retrieval, and preliminary analyses.

ANTH 6920. Advanced Archaeology. 3 hours.
Prerequisite: Permission of major.
Fundamental issues in modern archaeology.

ANTH 6950. Advanced Cultural Anthropology. 3 hours.
Prerequisite: Permission of major.
Cultural and social anthropology.

ANTH 6980. Advanced Biological Anthropology. 3 hours.
Prerequisite: Permission of major.
Current trends in bioanthropology.

ANTH 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

(ANTH)EFND 7150. Anthropology of Education. 3 hours.
Cultural aspects of educational processes, institutions, and issues in societies around the world organized around comparative analysis. Topics include education as cultural process and social function, as sociocultural structure, as cultural transaction, and as cultural product.

ANTH 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ANTH 8000. Special Topics in Anthropology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Intensive study on an individual basis in the field of the graduate student's major interest. Non-Traditional Format: Faculty and student will meet regularly to develop and discuss topic.

ANTH 8040. Seminar in Anthropology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Selected topics in Anthropology. Non-Traditional Format: Number of contact hours depends upon number of credit hours.

ANTH 8060. Primate and Human Ecology. 3 hours.
Prerequisite: Permission of major.
Interrelationships among biology, social organization, cultural diversity, and the physical environment. Emphasis is placed on the ecology of human and primate societies that affect and constrain biocultural adaptation.

(ANTH)ECOL 8110. Tropical Ecological and Cultural Systems. 2 hours.
Prerequisite: ECOL(FORS)(ANTH) 6140.
Characteristics of tropical ecosystems, tropical biological communities, and human cultures in the tropics; how they differ from those in the temperate zone, and the implications for conservation and development.

ANTH 8200. Seminar in Archaeology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Areas of special interest in the field of archaeology. Topics to be selected according to need.

(ANTH)MARS 8210. Topics in Coastal Marine Policy. 3 hours.
Prerequisite: ECOL(BIOL) 3500-3500L or permission of department.
Coastal marine policy approached from scientific, legal, and anthropological perspectives. This interdisciplinary course provides a general background in coastal policy, and uses a case study approach to examine current topics in marine resource management.

Topics include: coastal zone management, coastal groundwater supply, coastal fisheries, development in the coastal zone.

ANTH 8400. Advanced Ecological Anthropology I. 5 hours.
Prerequisite: ANTH 6490 or permission of department.
Concepts and issues relevant to an ecological analysis of human populations and social groups, considering cultural, biological, evolutionary, and prehistorical/historical perspectives. Course is offered only as a two-semester sequence.

ANTH 8410. Advanced Ecological Anthropology II. 5 hours.
Prerequisite: ANTH 8400.
A continuation of Advanced Ecological Anthropology I. Concepts and issues relevant to an ecological analysis of human populations and social groups, considering cultural, biological, evolutionary, and prehistorical/historical perspectives. Course is offered only as a two-semester sequence.

ANTH 8420. Human Ecosystem Evolution. 3 hours.
Prerequisite: ANTH 6490 or permission of major.
Evolutionary perspectives on the biocultural mediation of human-environment relations from the Plio-Pleistocene through the Holocene, analyzed in terms of human ecosystem structures and functions, including cybernetics and flows of energy/matter and information; persistence and change as evolutionary and ecological concepts.

ANTH 8500. Seminar in Ecological Anthropology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ANTH 6490 or permission of major.
Topics in human environmental and ecological systems, including factors that contribute to emergence and maintenance of those systems.

ANTH 8570. Economic Development and Health. 3 hours.
Prerequisite: Permission of major.
Interrelationship of development and medical pluralism on international health from the colonial era to the present.

ANTH 8590. Ecology of Health Research. 3 hours.
Prerequisite: Permission of major.
Anthropological contributions to understanding health and disease within a human ecological framework.

ANTH 8610. Field Methods in Ecological Anthropology. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of major.
Methods of anthropological research in field settings on environmental and ecological questions and problems, including ethnography, surveys, and formal measurement of resources. Non-Traditional Format: Since research projects are supervised in a field setting, the amount of contact hours varies. Contact hours exceed the minimum.

ANTH 8620. Anthropological Data Analysis. 3 hours.
Prerequisite: ANTH 6610.
Procedures and techniques of analysis on anthropological data, including microcomputer software data analysis packages, with focus on issues in qualitative research, including text analysis, pattern recognition, matrix displays, and data graphics, and on issues in quantitative research, including hypothesis and model testing.

ANTH(LING) 8880. Field Methods in Linguistics. 3 hours.
Prerequisite: Permission of major.
The techniques of recording and analyzing a foreign language by working directly with a native speaker.

ANTH 9000. Doctoral Research. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ANTH 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Art

Carmon Colangelo, *Director*
Joe E. Sanders, *Graduate Coordinator, 542-1624*
(Visual Arts Building)

The Lamar Dodd School of Art offers programs for the Doctor of Philosophy in art, Master of Fine Arts, and Master of Art in art history, all organized to develop the student's creative independence and professional capability as a producing artist, designer, and scholar in a total environment of living art. In conjunction with the College of Education, the School of Art offers programs in art education leading to the Master of Art Education, Specialist in Education, and Doctor of Education degrees. The school's philosophy particularly stresses that the above goals be met for the art educator who must attain professional standards in the graduate studio as well as in the classroom.

Candidates for the PhD in art are required to demonstrate competence in either history of art or art education. When appropriate, a candidate's program of study may include courses in

the theory and criticism of art and relevant areas of study outside the School of Art. The research skills requirement, in the history of art emphasis, is a reading knowledge of two foreign languages. In the art education emphasis, the research skills requirement may be met by completing a minimum of three of the specified research courses. Satisfactory completion of written and oral preliminary examinations, a dissertation demonstrating original research, and a final oral defense before an examining committee of the faculty are also required.

Students in the MA program in art history must demonstrate a reading knowledge of a foreign language, pass a written general examination in art history, submit a thesis, and pass a final oral examination.

Applicants are admitted to all semesters. However, priority will be given to those applications completed no later than January 1st for the following three semesters. Applications for assistantships should be made to the graduate coordinator of the School of Art by January 1st for the fall semester. Information on additional fellowships may be obtained from the Office of Student Financial Aid.

The Georgia Museum of Art is a significant resource for the School of Art. It has a major collection of American paintings and over 5000 works on paper from all periods. The museum sponsors a full schedule of in-house and traveling exhibitions each year.

The following review and evaluation procedures apply to all students enrolled in a program leading to the MFA degree in studio art:

Upon completion of 18 semester hours of resident graduate work, the student must pass an oral examination which, with supporting creative studio work, will constitute an evaluation of his/her capability for continued enrollment in the MFA degree program. The evaluation will be conducted by a duly appointed faculty committee, which will determine if the student will be (1) continued in the regular MFA program, or (2) required to complete additional work beyond the regular MFA requirements, for the specific purpose of improving his/her skills, or (3) counseled to withdraw from the MFA program and consider alternative educational goals.

Students who successfully meet the requirements for continued enrollment in the MFA degree program, will be required to arrange a public exhibition of creative studio work during the final semester of residence. The exhibition will be evaluated by faculty, who will determine if the exhibited work represents a satisfactory level of professional accomplishment by the candidate. Faculty approval of the exhibition is a requirement for graduation.

Although some courses listed below have specific prerequisites, instructors for graduate courses may waive some prerequisites if the student can demonstrate adequate training or experience. Likewise, the instructor may advise a student to withdraw from the class due to inadequate preparation or motivation.

Art

ARTS 4920/6920. Seminar in Contemporary Art. 3 hours.
Contemporary art from the point of view of studio artists.

ARTS 7990. Teaching Practicum. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Pedagogical readings related to art.

ARTS 8100. Graduate Seminar in Art. 3 hours. 1 lab period of 3 hours each per week.
Consideration of current issues in art practice and theory.

ARTS 8350. Aesthetics and Art Criticism. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
The theory and practice of analyzing, interpreting, and appraising.

ARTS 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ARTS 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Art History

ARHI 4000/6000. Early Greek Art. 3 hours.
Prerequisite: Permission of department.
Vase painting, sculpture, and architecture from the Geometric through the Archaic periods.

ARHI 4010/6010. Classical and Hellenistic Greek Art. 3 hours.
Prerequisite: Permission of department.
Sculpture, architecture, and some vase painting from the Classical and Hellenistic periods emphasizing

major monuments, including the Temple of Zeus at Olympia, the Parthenon, and the Great Altar of Zeus and Athena at Pergamon.

ARHI 4020/6020. Roman Art and Architecture. 3 hours.
Prerequisite: Permission of department.
Buildings and wall painting of Pompeii, Roman Republican portraiture, Imperial portraiture, and major buildings and their associated architectural sculpture located in Rome and other sites within the Empire.

ARHI 4030/6030. Classical Tradition in the Visual Arts. 3 hours.
Prerequisite: Permission of department.
The influence of classical antiquity on the art and architecture of post-classical eras tracing formal affinities and the myths of classical gods and heroes.

ARHI 4100/6100. Early Medieval Art. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting in Western Europe from the seventh through the eleventh centuries.

ARHI 4110/6110. Romanesque Art. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting in Western Europe of the eleventh and twelfth centuries with particular emphasis on France.

ARHI 4120/6120. Gothic Art. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting of the twelfth and thirteenth centuries in Europe with special emphasis on France.

ARHI 4130/6130. Late Gothic Art in Italy. 3 hours.
Prerequisite: Permission of department.
Principal monuments and artists of the thirteenth and fourteenth centuries in Italy emphasizing figures such as Giotto, Duccio, Simone Martini, and Ambrogio Lorenzetti.

ARHI 4200/6200. Early Renaissance in Italy. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting of the fifteenth century focusing on Tuscany, and the emergence and development of the new art principles in Florence represented in the work of such artists as Masaccio, Brunelleschi, Donatello, Alberti, Fra Angelico, Filippo Lippi, Ghirlandaio, Pollaiuolo, and Botticelli.

ARHI 4210/6210. High Renaissance and Mannerism in Italy. 3 hours.
Prerequisite: Permission of department.
The climactic period of the Renaissance in Italy with special emphasis on such key figures as Leonardo, Michelangelo, Raphael, Protormo, Rosso Fiorentino, and Bronzino.

ARHI 4220/6220. Northern Renaissance. 3 hours.
Prerequisite: Permission of department.
Painting north of the Alps, primarily in Flanders and Germany from the fourteenth to the sixteenth century, with special attention to the van Eycks, van der Weyden, Bosch, Durer, and Grunewald.

ARHI 4290/6290. Renaissance and Baroque Sculpture. 3 hours.
Prerequisite: Permission of department.
The development of period styles and an analysis of the role of function and tradition in European sculpture for ca. 1260-1700, with special attention to the work of Donatello, Michelangelo, and Bernini.

ARHI 4300/6300. Italian Baroque Art and Architecture. 3 hours.
Prerequisite: Permission of department.
Baroque art and architecture in Italy, with special emphasis on Rome, and such important figures as the Carracci, Caravaggio, Bernini, and Borromini.

ARHI 4310/6310. Northern Baroque Art. 3 hours.
Prerequisite: Permission of department.
French and Dutch art of the seventeenth century with emphasis on such key figures as Rubens, Velasquez, Rembrandt, and Poussin.

ARHI 4350/6350. Art and Architecture of the City of Rome. 3 hours.
Prerequisite: Permission of department.
The continuity of an artistic tradition in relation to the history of the seat of the Roman Empire, the Catholic Church, and modern Italy. Attention is given to specific sites, artistic types, and public processions.

ARHI 4400/6400. Romanticism and Neoclassicism. 3 hours.
Prerequisite: Permission of department.
European art and architecture from ca. 1760 through 1865 including the sublime, the beautiful, the picturesque, historical revivalism, exoticism, rationalism, and eclecticism.

ARHI 4410/6410. American Art from Colonial Settlement through the Civil War. 3 hours.
Prerequisite: Permission of department.
The formation of a national identity and assimilation of European styles in painting, sculpture, and cultural artifacts such as photographs and popular illustrations. Artists include, Copley, Peale, Allston, Cole, Church, Quidor, Mount, Bingham, Heade, Bierstadt, and Homer.

ARHI 4420/6420. American Art of the Fin de Sie`cle 1876-1913. 3 hours.
Prerequisite: Permission of department.
The transition in American art from Victorianism to early Modernism in an age of science, progress and decay, tradition and ethnicity, motherhood and the "new woman." A key cultural referent will be the World's Columbian Exposition of 1893.

ARHI 4440/6440. American Modernism 1900-1946. 3 hours.
Prerequisite: Permission of department.
The creation of radical forms of artistic expression, and their seeming rejection by the Regionalists in relation to two world wars, the modern city, the depression, and revolutions in space, time, and technology. Special emphasis will be placed on the diverse group of artists mentored by Alfred Stieglitz.

ARHI 4500/6500. Realism and Impressionism. 3 hours.
Prerequisite: Permission of department.
The rise and development of naturalism in mid-nineteenth-century art in Europe.

ARHI 4510/6510. Modern Art in Europe from 1886 to 1918. 3 hours.
Prerequisite: Permission of department.
Painting and sculpture from Post-Impressionism to the end of World War I, the Cubo-Futurist revolution and approaches to expressionism and abstraction.

ARHI 4520/6520. Spirituality in Modern Art. 3 hours.
Prerequisite: ARHI 3050 or ARHI 3060 or ARHI 3070 or permission of department.
Myth and spirituality in the abstract art of the late nineteenth and twentieth centuries, as exemplified in Gauguin, Kandinsky, Klee, Brancusi, Pollock, and Rothko, among others.

ARHI 4540/6540. European Art Between the Great Wars. 3 hours.
Prerequisite: Permission of department.
High modernism in the twentieth century. Topics include Dada, Constructivism, Surrealism, the Bauhaus, and other major trends between the two World Wars.

ARHI 4550/6550. Art Since 1945. 3 hours.
Prerequisite: Permission of department.
Major artists and movements in art after 1945.

ARHI 4600/6600. Art of India. 3 hours.
Prerequisite: ARHI 3040 or permission of department.
Traditional art of India from the Indus valley civilization to the Muslim conquest. Major monuments of architecture, sculpture, and painting are investigated in the context of political and religious developments in the Indian subcontinent, including influences of the Indic religions of Buddhism, Hinduism, and Jainism.

ARHI 4610/6610. Arts of China. 3 hours.
Prerequisite: ARHI 3040 or permission of department.
Major trends in the arts of China from the Neolithic age to the eve of the modern period, ca. 2500 BCE to the nineteenth century CE. Factors affecting important developments in style and subject matter will be studied in the context of contemporary cultural phenomena.

ARHI 4620/6620. Japanese Art. 3 hours.
Prerequisite: ARHI 3040 or permission of department.
History of Japanese art of the proto-historic period to the exposure of Japan to the West in the mid-nineteenth century. The Buddhist arts of Japan during the imperial period, the evolution of Japanese pictorial art, religious and secular architecture, and Shinto-influenced arts.

ARHI 4700/6700. Guided Foreign Study. 3 hours.
Prerequisite: Permission of department.
Travel to selected works in foreign collections, and sites. Local library, archival resources used. Preparatory and on-site lecture and discussion.

ARHI 4710/6710. Guided Foreign Study. 3 hours.
Prerequisite: ARHI 4500/6500.
Various topics related to Italian art.

ARHI 4900/6900. Topics in Ancient and Medieval Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in Ancient and Medieval art and architecture treated in depth.

ARHI 4910/6910. Topics in Renaissance and Baroque Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in Renaissance and Baroque art and architecture treated in depth.

ARHI 4920/6920. Topics in Modern Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in modern art and architecture from Europe or America treated in depth.

ARHI 4930/6930. Topics in Asian or Non-Western Art. 3 hours.
Prerequisite: ARHI 4600/6600 or ARHI 4610/6610 or ARHI 4620/6620 or permission of department.
Particular topics in Asian and non-western art and architecture treated in depth.

ARHI 4940/6940. Gender Issues and Art History. 3 hours.
Prerequisite: Permission of department.
The impact of feminist theory and gay and lesbian studies on recent art historical scholarship.

ARHI 4950/6950. Independent Study. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Special projects in fields in which the student has demonstrated the ability to conduct research and write a fully and correctly annotated paper.

ARHI 7000. Master's Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ARHI 7040. Art History Methodology. 1 hour.
Prerequisite: Permission of department.
Art historical methodologies as they developed from the Renaissance to the present and as they are currently employed in the diverse fields and periods of art history. Students will work with the entire art history faculty in the presentation of different methodologies. Non-Traditional Format: The course will be team-taught by all members of the faculty, who will meet with the students for one two-hour period. Eight such meetings are envisioned. There will also be a beginning and concluding discussion.

ARHI 7300. Master's Thesis. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ARHI 8110. Special Problems in Art History. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Individual research and/or group presentation and discussion of specific problems.

ARHI 8120. Directed Study in Art History. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Individual research related to specific problems. Non-Traditional Format: Directed study.

ARHI 8580. Seminar in Renaissance Art. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems in European art during the Renaissance. May include topics oriented toward a single major figure, a genre, or a school. Problems concern a major branch of art history, e.g., connoisseurship or iconography.

ARHI 8600. Seminar in Italian Baroque Art. 3 hours. Repeatable for maximum 6 hours credit.
Focus on a single Italian Baroque artist, or on a regional school. Works of art and relevant literature provide materials for training in how to solve art historical problems using techniques developed in connisseurship, iconography, and source material interpretation.

ARHI 8700. Seminar in Greco-Roman Art. 3 hours. Repeatable for maximum 6 hours credit.
Focus on a single genre of Greco-Roman art (e.g., freestanding Greek sculpture from the sixth century B.C.), or on a single aspect (e.g., Roman historical reliefs).

ARHI 8870. Seminar in Asian Art. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research topics may include Hindu iconography, Chinese painting, pan-Asian Buddhist iconography, the Hindu temple, and others.

ARHI 8910. Seminar in Nineteenth-Century European Art History. 3 hours. Repeatable for maximum 9 hours credit.
Issues relating to the visual arts. Studies of major artists or movements, and thematically directed projects.

ARHI 8920. Seminar in Twentieth-Century Art History. 3 hours. Repeatable for maximum 9 hours credit.
Issues relating to the visual arts. Topical studies of major artists or movements, and thematically directed projects.

ARHI 8990. Seminar in the American Art. 3 hours. Repeatable for maximum 9 hours credit.
Topical studies of major artists, exhibitions, movements, or cultural productions significant to the development of American art.

Art Interior Design

ARID 4150/6150. Special Topics in Interior Design. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ARID 3110 and ARID 3310 and ARID 3410 and permission of major.
Special topics for advanced students with a formal written and/or graphic presentation of the results. Non-Traditional Format: Only to be taken by students who have indicated that they can handle directed studies responsibility.

ARID 4350/6350. Interior Design Practicum. 1-3 hours.
Prerequisite: ARID 3110 and ARID 3310 and ARID 3410 and permission of major.
Individualized projects arranged with clients to explore various aspects of the interior design profession. Non-Traditional Format: Only to be taken by students who have indicated that they can handle directed studies responsibility.

ARID 7890. Interior Design I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Special problems in the planning of architectural spaces for public and residential uses. Non-Traditional Format: Directed study.

ARID 7900. Interior Design II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The designing of special equipment: furniture, built-in equipment, special lighting, and custom design. Non-Traditional Format: Directed study.

ARID 7910. Interior Design III. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Individual creative problems and coordination of special aspects of interiors from concept to construction documentation and presentation. Non-Traditional Format: Directed study.

ARID 7920. Procedures in Interior Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The procedures and practice of interior design problem-solving with emphasis on research methodologies. Non-Traditional Format: Directed study.

Studio Art

ARST 4800/6800. Special Topics in Computer Art. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Computer-generated art and design including advanced computer generated imaging, computer aided drafting, scanned image manipulation, animation, desktop publishing and presentation, and two-dimensional and three-dimensional representation of fiber and sculpture arts.

ARST 4810/6810. Three-Dimensional Computer Art. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 4800/6800 and permission of major.
Three-dimensional, computer-generated art using modelling, rendering, animation, and output technique.

ARST 4820/6820. Computer Aided Design. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 4800/6800.
Contemporary concepts and trends in art computing. The development and presentation of a substantial body of individual imagery is a major aspect of the course.

ARST 4910/6910. Aspects of Folk Culture. 3 hours. Art of folk, self-taught, and visionary artists as distinct from mainstream and academic traditions.

ARST 6020. Figure Drawing/Anatomy. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3000.
Figure drawing with consideration of the human skeletal and muscular systems, surface anatomy, and biomechanical concerns.

ARST 6160. Painting Materials and Techniques. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3110.
Historical techniques such as egg tempera, fresco, encaustic, and Venetian mode oil painting as they apply to contemporary needs; modern materials such as alkyd and polymer resins are introduced. Consideration is given to the properties of pigments, binders, grounds, and supports.

ARST 6210. Color Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3200.
Fundamentals of color photography, including color theory, color temperature, lighting, and color printing. Concepts are presented in the context of contemporary trends and practices.

ARST 6220. Medium and Large Format. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3200.
Medium and large format cameras using roll, pack, and sheet films. Techniques of advanced camera handling, lighting, film processing, and refined printing. Historical and contemporary practices considered.

ARST 6230. Internship in Photography. 2-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ARST 2200.
Practical experience with professionals, including photographers, designers, and computer specialists. Independent projects and research with editors, curators, teachers, and historians. Assist photography faculty in creative work with emphasis on studio and lab production. Non-Traditional Format: Internship.

ARST 7000. Master's Research. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ARST 7020. Drawing and Composition. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Projects in drawing including individual and group critiques.

ARST 7030. Drawing and Composition. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7020.
A continuation of Drawing and Composition. Projects in drawing, including individual and group critiques.

ARST 7040. Drawing and Composition. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7030.
Studio work in drawing, with consideration of relationship of principles to picture structure. Readings in art history and criticism.

ARST 7110. Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Projects in painting, including individual and group critiques.

ARST 7120. Painting. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7110.
A continuation of Painting. Projects in painting, individual and group critiques.

ARST 7130. Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Studio work in painting with consideration of theoretical issues. Readings in art criticism and aesthetics.

ARST 7200. Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 6210 and ARST 6220.
Advanced applications of the medium. Experimental camera handling and laboratory work is emphasized. Intensive practice of traditional and new technologies from the phoram to the electronic image.

ARST 7210. Special Topics in Photography. 3 hours. 2 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: ARST 6210 and ARST 6220.
Major historical movements in photography, including comparative studies of contemporary trends and criticism with an emphasis on research and the development of library archives.

ARST 7230. Graduate Photography I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 7200.
Practice of the photographic medium. Emphasis is placed on learning advanced techniques in the context of artistic expression.

ARST 7240. Graduate Photography II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 7230.
A continuation of Graduate Photography I. Emphasis is placed on the proposal of art projects to be worked on in preparation for graduate exit studio.

ARST 7300. Master's Thesis. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ARST 7310. Book Art and Papermaking. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Hand papermaking as a support for other media and as a creative medium in two- or three-dimensional form. The book is examined in structure and content with skills learned in various binding techniques.

ARST 7320. Book Art and Letterpress. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7310.
Hand printing and letterpress synthesizing text and image in a narrative, serial, sequential, or experimental fashion. The book as a multiple is examined in structure and content with skills learned in binding and printing techniques.

ARST 7330. Advanced Printmaking. 3 hours. Repeatable for maximum 18 hours credit. 3 lab periods of 2 hours each per week.
Advanced work in printmaking media, including the traditional intaglio processes; the various relief and planographic processes, and the combination of these various processes.

ARST 7370. Book Art and Papermaking. 3 hours. 3 lab periods of 2 hours each per week.
Exploration of hand papermaking. Book is explored as an art form.

ARST 7410. Advanced Figure and Portrait Study in Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Advanced figure modeling. Working from the model, emphasizing the structural and sculptural aspects of form. Anatomy and anatomical forms stressed.

ARST 7420. Sculpture Materials. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Formal three-dimensional concepts of sculpture applied to material or combinations of materials. In-depth work in cast bronze, cast cement, direct plaster, direct cement, fire clay, welded metal, stone, and wood.

ARST 7430. Construction Composition-Advanced Techniques in Metalcasting. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Production of wax models, venting, investing, casting, chasing, and mounting of finished work. Independent experimentation and study in cast bronze sculpture.

ARST 7500. Ceramics. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Experimentation with ceramic forms, glazes, and firing techniques.

ARST 7510. Technical Problems in Ceramics. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7500.
Individual research in clay, glaze, and firing techniques directed towards personal style.

ARST 7520. Individual Research in Ceramics. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7510.
Second year student begins to focus on individual style and cohesive, unified statement. Innovation in ceramic forms, glazes, and firing techniques.

ARST 7530. Individual Research in Ceramics. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7520.
Refinement of ceramic techniques in form and surface elaboration with emphasis on individual style work that will become the M.F.A. final exhibition.

ARST 7620. Jewelry and Metalwork. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.

Properties of various metals and how they relate to processes and function of form and aesthetics.

ARST 7630. Jewelry. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Jewelry making processes and development of individual interpretations of those processes and products.

ARST 7640. Metalwork. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Problems in design, forming, and constructing of metals, including copper, silver, and gold. Independent study and research for solutions to design problems.

ARST 7650. Metalwork. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7640.
Design problems related to form and function with attention to surface embellishment and forming techniques.

ARST 7700. Fabric Design-Structure. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Problems in fabric structure for independent study. Research combining process with design.

ARST 7710. Fabric Design-Surface. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Problems in fabric decoration for independent study. Research technology combining dye, fiber, and application process with design and function or selection.

ARST 7750. History of Fabric Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Development of the fabric arts from prehistoric periods to the present in conjunction with studio projects.

ARST 7760. Japanese Fabrics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Japanese fabrics in a historical and cultural context and their application to contemporary fiber art in conjunction with studio projects.

ARST 7770. Peruvian Fabrics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Peruvian fabrics in historical and cultural context and their application to contemporary fiber art in conjunction with studio projects.

ARST 7980. Directed Study in Major Studio Area. 3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Individual studio projects and investigation of specific problems under the direction of faculty members. Course may be taken through UGA Studies Abroad program in Cortona. Non-Traditional Format: Directed study.

ARST 8000. General Art. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 7980 and permission of department.
Individual projects in drawing, painting, sculpture, jewelry and metalwork, fabric design, ceramics, and/or mixed media. Non-Traditional Format: Individual projects in art.

ARST 8010. General Art. 3 hours.
Prerequisite: ARST 7980 and permission of department.
Individual projects in drawing, painting, sculpture, jewelry and metalwork, fabric design, ceramics, and/or mixed media. Non-Traditional Format: Individual projects in art.

ARST 9210. Graduate Exit Studio. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Project of original creative works of high professional standards, together with a written report in which use is made of photographs or drawings or both and a comprehensive exhibition of creative work. Non-Traditional Format: Independent creative work for master's exhibition.

Artificial Intelligence

Donald E. Nute, Jr., *Program Director*
Walter D. Potter, *Graduate Coordinator, 542-0361*
(Boyd Graduate Studies Building)

The interdisciplinary Master of Science program in artificial intelligence is intended to prepare students for careers as developers of artificial intelligence applications or for further graduate work in artificial intelligence or related areas. The program includes foundational courses in computer science, linguistics, logic, philosophy, and psychology as well as specialized courses in artificial intelligence programming languages and techniques. Seminars emphasize knowledge based systems, natural language understanding, and logic programming.

Students are admitted to the program with degrees in many areas including business, computer science, education, linguistics, philosophy, and psychology. A liberal undergraduate education with some previous experience in computing is desirable. Most students must take a few undergraduate courses to satisfy prerequisites for required graduate courses. The required

graduate courses are listed under their respective departments. Typically, required courses include: symbolic programming, artificial intelligence, symbolic logic, logic programming, and any two from knowledge based systems, computational intelligence, natural language processing, and computer vision/pattern recognition. Additional course requirements are satisfied by selecting optional courses. It normally takes two years to complete all prerequisites, all required courses, and the thesis.

A limited number of research assistantships are available. Prospective students who desire financial aid should apply to the graduate coordinator.

(ARTI)CSCI 4540/6540. Symbolic Programming. 3 hours.
Prerequisite: CSCI 1302 or permission of department.
Prerequisite or corequisite: CSCI(PHIL) 4550/6550.
Programming in LISP and PROLOG, with emphasis on artificial intelligence techniques. Other languages used for artificial intelligence work will be presented more briefly.

ARTI 7000. Master's Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ARTI 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ARTI 8000. Topics in Artificial Intelligence. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special topics in artificial intelligence. Topics will vary. Consult the program director for the specific topics to be offered in a given year. Non-Traditional Format: Topics course.

ARTI 8800. Directed Readings in Artificial Intelligence. 1-5 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed reading and research in artificial intelligence in area of student's special interest. Non-Traditional Format: Directed study.

Biochemistry and Molecular Biology

J. David Puett, *Head*
Alan E. Przybyla, *Graduate Coordinator, 542-1728*
(Life Sciences Building)

The Department of Biochemistry and Molecular Biology is in the Franklin College of Arts and Sciences. It functions largely as a graduate department with programs of study leading to the MS and PhD degrees. There are 20 large research laboratories for biochemistry and molecular biology in the Life Sciences Building, a $36 million facility completed in 1991. The building houses a fermentation plant with facilities for the large-scale production and processing of microorganisms, animal quarters and a large suite of plant growth chambers giving the department facilities to work with any type organism. Several faculty members have labs in the Complex Carbohydrate Research Center, which is housed in a $10 million research building and is currently composed of six faculty members and 100 support personnel.

The research laboratories are equipped with most of the specialized equipment required for modern biochemical research including automated amino acid analyzers, analytical and preparative ultracentrifuges, liquid scintillation counters, recording spectrophotometers, spectrofluorimeters and stopped-flow devices, electron paramagnetic resonance spectrometers, x-ray diffraction facilities, mass spectrometers, protein sequenators, DNA synthesizers, HPLCs, mini-computers and other specialized equipment.

Graduate students are usually admitted at the beginning of fall semester, but in special cases a student with previous experience may be admitted in January. Deadline for most fellowships and assistantships is January 15, but exceptional qualifications may lead to awards at other times.

In addition to the courses listed below, a number of interdisciplinary courses such as Nucleic Acids (GENE 8920) and Molecular Genetics (GENE 8930) are offered to interested students in the biochemistry and molecular biology graduate program. The listings in biology, botany, cellular biology, genetics, and microbiology should be consulted to determine the range of

courses available to graduate students majoring in biochemistry and molecular biology. One year of a foreign language at the high school or college level is required for a master or doctoral degree.

BCMB 4010/6010. Biochemistry and Molecular Biology I. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
A comprehensive treatment of biochemistry and molecular biology stressing structures of biological molecules, including proteins, nucleic acids, carbohydrates, and lipids, enzymology and selected aspects of metabolism and bioenergetics.

BCMB 4020/6020. Biochemistry and Molecular Biology II. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
A comprehensive treatment of biochemistry and molecular biology stressing aspects of metabolism, metabolic regulation, bioenergetics, and recombinant DNA methodologies.

BCMB 4030L/6030L. Laboratory Techniques in Biochemistry and Molecular Biology. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Basic techniques in biochemistry and molecular biology, including enzyme assays and purification, nucleic acid purification and characterization, chromatography, spectroscopy, and other modern methods.

BCMB(CHEM) 4110/6110. Physical Biochemistry. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM)3100.
Prerequisite or corequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
The principles of physical chemistry applied to biological molecules and systems, including current approaches in structural biology.

BCMB 4120/6120. Human Biochemistry and Disease. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Integrated treatment of human biochemistry and selected topics on the biochemical basis of human disease. Examples will be given of inheritable and acquired disorders.

BCMB 4130/6130. Biotechnology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Applied aspects of biochemistry and molecular biology in various fields, with emphasis on the use of recombinant DNA methods and protein engineering.

BCMB 6000. General Biochemistry and Molecular Biology. 3 hours.
Not open to students with credit in BCMB 4010/6010 or BCMB 4020/6020 or BCMB 8010 or BCMB 8020.
Prerequisite: CHEM 2212 and CHEM 2212L.
Beginning intensive one-semester graduate-level course in biochemistry and molecular biology covering the structure and function of biological molecules, enzymology, metabolism, bioenergetics, and recombinant DNA technology.

BCMB 7000. Master's Research. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

BCMB 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

BCMB 8010. Advanced Biochemistry and Molecular Biology I. 4 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Advanced biochemistry and molecular biology stressing thermodynamic principles in biochemistry, structural biology, enzymology, and aspects of metabolism and bioenergetics.

BCMB 8020. Advanced Biochemistry and Molecular Biology II. 4 hours.
Prerequisite: BCMB 8010.
Advanced biochemistry and molecular biology stressing metabolism and bioenergetics, replication, transcription, RNA processing, genetic codes, translation, membrane transport, and signal transduction.

BCMB 8030. Introduction to Research in Biochemistry and Molecular Biology. 3 hours.
Prerequisite: Permission of department.
Overview of current departmental research and introduction to research facilities. Training and practical experience in oral presentation, scientific writing, and grant preparation.

BCMB(CHEM) 8040. Advanced Physical Biochemistry. 3 hours.
Prerequisite: Permission of department.
Principles in physical chemistry and biophysics to biological macromolecules, including structural biology, hydrodynamics, electronic and magnetic resonance spectroscopy, and crystallography.

BCMB 8050. Cellular and Molecular Biochemistry. 1 hour. Repeatable for maximum 5 hours credit.
Prerequisite: BCMB 8020 or permission of department.
Advanced molecular and cellular biochemistry, including structure, biosynthesis, and assembly of cell proteins and nucleic acids. Non-Traditional Format: Selected readings and meetings with speakers in the annual BMB Symposium.

BCMB 8060. Biochemistry and Molecular Biology Seminar. 2 hours. Repeatable for maximum 20 hours credit.
Prerequisite: BCMB 8020.
Seminar dealing with various topics in current biochemistry and molecular biology. Non-Traditional Format: Grading of A-F will be used when the student presents a seminar; grading of S/U will be used when attendance is required but a seminar is not given.

BCMB 8070. Research Seminar in Biochemistry and Molecular Biology. 1 hour. Repeatable for maximum 10 hours credit.
Prerequisite: BCMB 8010 or permission of department.
Seminar focused on current research in biochemistry and molecular biology.

BCMB 8080. Current Literature in Biochemistry and Molecular Biology. 1 hour. Repeatable for maximum 6 hours credit.
Prerequisite: BCMB 8020.
Journal club in selected topics in cell and molecular biochemistry.

BCMB 8100. Advanced Topics in Biochemistry and Molecular Biology. 1 hour. Repeatable for maximum 10 hours credit.
Prerequisite: BCMB 8020.
Selected areas in current molecular and cell biochemistry. Topics will change on a regular basis.

BCMB(CHEM) 8110. Advanced Topics in Protein Structure-Function Relationships. 3 hours.
Prerequisite: BCMB 8010.
The relationship of protein structure to biological function, including protein folding, conformation, stability, and enzyme mechanisms.

BCMB 8120. Advanced Topics in Gene Expression. 2 hours.
Prerequisite: BCMB 8010.
Biochemistry and molecular biology of nucleic acids, with emphasis on biosynthesis, structure, and function.

BCMB 8130. Advanced Topics in Glycobiology. 2 hours.
Prerequisite: BCMB 8010.
Complex carbohydrates and glycoconjugates, including biosynthesis, structure, and biological function.

BCMB 8140. Advanced Topics in Genomics and Bioinformatics. 2 hours.
Prerequisite: BCMB 8010.
Contemporary approaches in the genomics of bacteria, archaea and eucarya, including computer applications on the use of various data bases.

BCMB 8150. Advanced Topics in Cellular Communication and Regulation. 2 hours.
Prerequisite: BCMB 8010.
Molecular mechanisms of intra- and inter-cellular communication, including the role of hormones, cytokines, neurotransmitters and receptors.

BCMB 8160. Advanced Topics in the Biochemical Basis of Human Disease. 2 hours.
Prerequisite: BCMB 8010.
The molecular and cellular basis of human disease with emphasis on genetic and acquired disorders.

BCMB 8170. Advanced Topics in Plant Biochemistry and Molecular Biology. 2 hours.
Prerequisite: BCMB 8010.
Advanced treatment of plant biochemistry and molecular biology, including photosynthesis and nitrogen fixation.

BCMB(CHEM) 8180. X-Ray Crystallography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BCMB 8010 and BCMB 8040.
The basic principles of x-ray crystallography with major application to protein structure determination, including laboratories on crystallization techniques and data collection.

BCMB(CHEM) 8190. NMR Spectroscopy of Biomolecules. 3 hours.
Prerequisite: BCMB 8010 and BCMB 8040.
NMR spectroscopy with applications to proteins and other biopolymers. Special attention will be given to methods of structure determination.

BCMB(CHEM) 8200. Molecular Modeling and Structure Computations. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BCMB 8010 or permission of department.
Modern biomolecular modeling and structure computations with emphasis on the application of molecular dynamics simulations to proteins, carbohydrates, and protein-ligand complexes. Lectures will be complemented with laboratory sections on the use of modeling software and computer hardware.

(BCMB)CHEM 8220. Physical Methods in Inorganic and Bioinorganic Chemistry. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 8210.
Physical methods used in inorganic and bioinorganic chemical research including UV/visible/near IR absorption spectroscopy, (magnetic) circular dichroism, electron paramagnetic resonance, nuclear magnetic resonance, Mossbauer and X-ray absorption spectroscopies, single crystal x-ray diffraction, and magnetochemistry.

(BCMB)CHEM 8250. Bioinorganic Chemistry. 3 hours.
Prerequisite or corequisite: BCMB 6000 or BCMB 8010 or CHEM 6400 or permission of department.
Biological processes and molecules, mainly proteins and nucleic acids, which incorporate metal ions. Topics include metal binding to biopolymers, the roles of metal ions in biological processes such as electron transfer, atom or group transfer, and the use of metal complexes as therapeutic agents.

(BCMB)CHEM 8330. Molecular Modeling. 3 hours. Computational studies to calculate the structures of organic molecules. Specific training is given in the application of the molecular mechanics method and the MM-3 software package, ab initio calculations using the Gaussian software package, and other computational schemes. Evaluation of computational results.

(BCMB)CBIO(MIBO) 8520. Topics in Biochemistry and Molecular Genetics of Parasites. 3 hours. Repeatable for maximum 6 hours credit. 1 hour lecture and 2 lab periods of 1 hour each per week.
Prerequisite: BCMB 8020 and GENE 8930.
Parasite cellular biochemistry and molecular genetics with potential for rational drug design. Topics include DNA replication, RNA editing, nucleic acid salvage pathways, polyamine metabolism, and glycosylphosphatidylinositol (GPI) anchors.

(BCMB)CHEM 8810. Mass Spectrometry. 3 hours. Modern methods of mass spectrometry covering fundamental principles, instrumentation, and data interpretation. New techniques for the structural analysis of biomolecules.

(BCMB)BTNY(GENE)(PATH) 8960. Fungal Genetics. 3 hours.
Prerequisite: Permission of department.
The genetics of the fungi emphasizing classical and modern molecular approaches.

BCMB 8990. Problems in Biochemistry and Molecular Biology. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Focused research, advanced readings, and tutorials with faculty members. Non-Traditional Format: Students will meet with faculty members on a regular basis.

BCMB 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

BCMB 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Biology

Daniel V. DerVartanian, *Chairman*
(Biological Sciences Building)

The Division of Biological Sciences consists of the Departments of Biochemistry and Molecular Biology, Botany, Cellular Biology, Entomology, Genetics, Marine Sciences, Microbiology, the Institute of Ecology, and the Faculty of Cell and Developmental Biology. Degrees are granted only through the departments.

(BIOL)GENE 4200/6200. Advanced Genetics. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Prokaryotic, fungal, and mammalian genetic systems which form the basis of our understanding of molecular genetics. Techniques used in the analysis of the structure and function of viral and eukaryotic genomes.

(BIOL)BTNY(CRSS) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

(BIOL)GENE 4600/6600. Evolutionary Biology. 3 hours.
Prerequisite: BIOL 1108-1108L.
An introduction to the processes of evolution. Topics include population genetics, speciation, systematics, coevolution, chemical origin of life, history of life, geological record, and evolution of humans.

BIOL(CBIO)(VPAT) 5040/7040. Electron Microscopy. 3 hours.
Prerequisite: [(CHEM 1212 and CHEM 1212L) or (CHEM 1412 and CHEM 1412L)] and PHYS 1112-1112L.
Instrument theory and theory of specimen preparation for both transmission and scanning electron microscopy. Fundamentals of X-ray microanalysis, image processing, and image analysis.

BIOL(CBIO) 5050L/7050L. Electron Microscopy Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: BIOL(CBIO)(VPAT) 5040/7040 or permission of department.
Operation of both transmission (TEM) and scanning electron microscopes (SEM). Preparation of specimens (ultramicrotomy, critical point drying, negative staining) for examination in both TEM and SEM. Basics of X-ray microanalysis.

BIOL 8000. Tropical Biology. 5-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Biological concepts pertaining to the tropics through intensive field study. Non-Traditional Format: This eight-week course meets seven days a week, fourteen hours a day; applications usually required before November 1 or April 1.

(BIOL)ECOL(ENTO) 8150. Wetland Ecology. 3 hours.
Prerequisite: Permission of department.
Principles of ecology, elemental cycling, hydrology, policy and management of marine and freshwater wetlands.

Botany

Alan J. Jaworski, *Head*
Gary D. Kochert, *Graduate Coordinator, 542-1871*
(Plant Sciences Building)

Graduate work leading to the MS or PhD degree in botany may be undertaken by qualified students. Within specifications set by the Graduate School (see General Degrees), all degree requirements are determined by the major professor and student in consultation with an advisory committee. Inquiries by prospective students should be addressed to: Graduate Coordinator, Department of Botany.

Facilities for graduate training in botany include greenhouses, growth chambers, field plots, a herbarium, culture collection of algae and fungi, electron microscope laboratory, molecular cytology facility, monoclonal antibody facility, fully equipped computer facilities, and modern research laboratories. Research opportunities are also offered in the University Computer Center, the Electron Microscopy Laboratory, the Institute of Ecology, and the Molecular Genetics Instrumental facility.

Field work may be done at the university marine laboratories at Sapelo and Skidaway Islands, The Savannah River Ecology Laboratory, and several inland sites ranging from the coastal plains to the Blue Ridge Mountains.

(BTNY)PATH 4200/6200-4200L/6200L. Introductory Mycology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Morphology, biology, and taxonomy of fungi. Representatives of all major groups of fungi are considered.

(BTNY)GEOG 4220/6220. Ecological Biogeography. 3 hours.
Prerequisite: GEOG 3210 or ECOL(BIOL) 3500-3500L.
Patterns of plant distribution in contemporary landscapes and underlying processes, including vegetation dynamics, disturbance ecology, biogeomorphology, dendrochronology, and environmental history.

BTNY 4230/6230-4230L/6230L. Plant Anatomy. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or (BTNY 1220-1220L and CBIO(BIOL) 3400) or permission of department.
Structure and growth of meristems; development and structure of cells, tissues, and tissue systems; comparative anatomy of stems, roots, leaves, flowers, and fruits; survey of recent advances in study of growth and development of form and emphasis on experimental approaches. Assumes elementary knowledge of cell and tissue structure.

(BTNY)GEOG 4240/6240. Plant Geography. 3 hours.
Prerequisite: BIOL 1104-1104L and (GEOG 1112 and GEOG 1112L) and [GEOG 3210 or ECOL(BIOL) 3500-3500L].
Phytogeographical zonation, plant-geographic processes, and current potential natural vegetation. Includes physical and environmental factors, plant-environment relationships, plant roles and types, vegetation dynamics, geographic responses to disturbance, and vegetation of main world biomes. Emphasis on global-scale patterns and relationships.

BTNY 4250/6250. Biology of Natural Plant Products. 3 hours.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L or permission of department.
The biological/ecological role of natural plant products or metabolites such as alkaloids, terpenes, and pigments in relationships and interactions among plants and between plants and animals.

(BTNY)ANTH 4300/6300-4300L/6300L. Ethnobotany. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
Ethnobotanical research, with focus on knowledge and utilization of the plant world in traditional societies. Comparisons of societies in tropical forest ecosystems and evaluation of issues relating to intellectual property rights and traditional peoples' knowledge of plant species with potential economic value.

BTNY(CRSS)(BIOL) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

(BTNY)CBIO 4600/6600-4600L/6600L. Biology of Protists. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Protists (algae, protozoa, and zoosporic fungi) with an emphasis on cell structure, evolution, and life histories. Laboratories will concentrate on examination of living and fixed materials and will include methods of isolation and culturing of protists.

BTNY 4650/6650-4650L/6650L. Plant Taxonomy. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L or permission of department.
History of taxonomy, nomenclature, characters, identification principles, classification, taxonomic relationships, taxonomic literature, species biology, collecting and herbarium, floristic studies.

BTNY 4850/6850-4850L/6850L. Vegetation Analysis. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (ECOL(BIOL) 3500-3500L and STAT 6220) or permission of department.
Rationale and protocols for various methods of studying vegetation at the population, community and landscape levels. Both field sampling and data analysis techniques will be covered with introduction to several software packages.

BTNY 6350-6350L. Molecular Systematics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Phylogenetic analysis, molecular systematic methods, relationships within the higher plants, algae, and fungi based upon analyses of DNA sequences and DNA-derived markers from nuclear and organellar genomes. Labs: computer-assisted techniques for phylogenetic analysis of macromolecular data; individual projects involving the analysis of DNA sequence data.

BTNY 6710-6710L. Principles of Plant Systematics. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Systematics, nomenclature, rank and taxa, phylogenetic and phenetic methods, problem design, analytical procedures, data presentation, identification of special groups, classification, phylogenetic relationships, literature and bibliographic aids. Labs: morphology and arrangement of selected phylogenetically significant families; literature-based study of small genus or species complex.

BTNY 6720-6720L. Plant Variation and Evolution. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: GENE(BIOL) 4600/6600.
Variation and evolution in plants, genotypic and phenotypic patterns, genetic diversity, adaptation, breeding systems, polyploidy, hybridization, apomixis, evolutionary data in population genetics and systematics, literature, experimental design, population sampling. Variation analysis, breeding techniques, data presentation, population analysis, molecular evolution.

BTNY 6830. Plant Physiology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Plant physiology for students with cell physiology or biochemistry background. Water relations, mineral nutrition, transport of materials, respiration, photosynthesis, growth and development.

BTNY 7000. Master's Research. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

BTNY 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 14 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

BTNY 7360. Teaching Internship in Biological Sciences. 1-2 hours. Repeatable for maximum 10 hours credit. 1-2 lab periods of 1-2 hours each per week.
Classroom teaching experience in undergraduate courses under the direct supervision of a faculty member.

BTNY 8020. Introduction to Botanical Research. 1-2 hours.
Prerequisite: Permission of department.
The breadth of current botanical research with the facilities available for botanical research.

BTNY 8040. Botanical Research. 1-3 hours. Repeatable for maximum 6 hours credit. 1-3 lab periods of 3 hours each per week.
Faculty-directed, laboratory, or literature research of a botanical problem. Not for thesis or dissertation research.

BTNY 8100. Plant Molecular, Cellular, and Developmental Biology I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or GENE (BIOL) 3200.
Plant genetics, gene expression, and gene evolution. Structural, physiological, and genetic properties of organelles, membranes, and the cell wall. Topics are interrelated with those of Plant Molecular, Cellular, and Developmental Biology II.

BTNY 8110. Plant Molecular, Cellular, and Developmental Biology II. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BTNY 8100.
Plant cell structure, growth and development, reproduction and environmental responses. Topics are inter-

related with those in Plant Molecular, Cellular, and Developmental Biology I.

(BTNY)ECOL 8120-8120L. Plant Reproductive Ecology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Pollination ecology, breeding systems, patterns of gene flow via pollen and seed dispersal, flower arrangement and phenology, and implications of reproductive biology for demography. Group and individual laboratory projects.

BTNY 8140. Algal Ecology. 2 hours.
Prerequisite: CBIO(BTNY) 4600/6600-4600L/6600L or permission of department.
Physiological ecology of algae found in various habitats, including phytoplankton, benthic microalgae, seaweeds, and symbiotic associations.

(BTNY)ECOL(ENTO) 8150L. Wetland Ecology Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Prerequisite: ECOL(ENTO)(BTNY) 8150 or permission of department.
Techniques for the study of marine and freshwater wetlands. Optional weekend field trips will explore distant wetland sites.

(BTNY)PATH 8210-8210L. Biology of Ascomycetes. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Comparative morphology of ascomycetes and their asexual stages; principles of taxonomy and training in identification.

BTNY 8230. Monoclonal Antibodies as Research Tools. 5 hours. 2 hours lecture and 3 lab periods of 3 hours each per week.
Prerequisite: BCMB 6000.
The theoretical and practical aspects of antibodies as research tools in the life sciences. Production of both polyclonal and monoclonal antibodies will be considered, as well as their applications for immunovisualization, immunopurification, immunoquantitation, and other analytical applications.

(BTNY)ECOL(FORS) 8310. Population Ecology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and permission of department.
Advanced ecological theory to biological populations. Mathematical and evolutionary treatment of population growth and regulation, niche theory, foraging theory, predator-prey theory, habitat selection, and competition.

BTNY(PATH) 8320-8320L. Zoosporic Fungi and Slime Molds. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Comparative biology of zoosporic fungi and slime molds as organisms. Topics include current research in morphology and development, phylogeny, physiology, ecology and the use of selected organisms as model systems. Laboratory will emphasize isolation and cultivation of these organisms and demonstration of their reproductive stages.

BTNY(PATH) 8340-8340L. Experimental Mycology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
Fungal biology and ecology and the use of fungi as experimental organisms in the study of development and molecular biology and genetics.

BTNY 8360. Fungal Ecology. 3 hours.
Prerequisite: PATH(BTNY) 4200/6200-4200L/6200L.
The role of fungi in the environment. Topics include fungal populations; biotic interactions with plants, insects, and other fungi; decomposition and nutrient cycling; fungal biomass and productivity; fungi in extreme environments.

BTNY(FORS)(ECOL) 8410. Community Ecology. 4 hours.
Prerequisite: ECOL 4010/6010-4010L/6010L and STAT 4220.
The applicability of advanced theory to multi-species communities. Patterns and processes that influence species composition, diversity, and function. Topics include deterministic vs. stochastic regulation, succession, resource partitioning, patch dynamics, island biogeography, and food webs.

BTNY 8600. Aquatic Plants. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1103-1103L or BIOL 1104-1104L or BTNY 1210-1210L or BTNY 1220-1220L or permission of department.
Identification and biology of aquatic macrophytes with emphasis on field work. Non-Traditional Format: Local and over-night field trips required.

BTNY 8700. Plant Population and Biology Seminar. 1-2 hours. Repeatable for maximum 15 hours credit. 1-2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Seminar on current research topics in plant population biology.

BTNY 8770. Communities and Ecosystems. 3 hours.
Advanced synthesis of physiological, population, community, and ecosystem studies in the major terrestrial plant associations of the world.

BTNY 8800. Plant Systematics and Evolution Seminar. 1-2 hours. Repeatable for maximum 16 hours credit. 1-2 lab periods of 2 hours each per week.
Seminar on current botanical research topics.

BTNY 8810. Mycology Seminar. 1-2 hours. Repeatable for maximum 15 hours credit. 1-2 lab periods of 2 hours each per week.
Seminar on current botanical research topics.

BTNY 8820. Plant Physiology Seminar. 1-2 hours. Repeatable for maximum 15 hours credit. 1-2 lab periods of 2 hours each per week.
Seminar on current botanical research topics.

BTNY 8840. Plant Ecology Seminar. 1-2 hours. Repeatable for maximum 18 hours credit. 1-2 lab periods of 2 hours each per week.
Seminar on current plant ecology and related research topics.

BTNY 8850-8850L. Terrestrial Biogeochemical Cycling. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or STAT 4210 or STAT 4220.
Plant processes which mediate biogeochemical cycling on land. Includes survey of global element cycling, functions of essential elements, element acquisition, translocation and loss by plants, litter decomposition, and methods of estimating standing stocks of elements in and transfer rates of elements between ecosystem components.

BTNY 8860. Plant Anatomy, Morphology, and Cell Biology Seminar. 1-2 hours. Repeatable for maximum 18 hours credit. 1-2 lab periods of 2 hours each per week.
Seminar on current topics in plant anatomy, morphology, and cell biology.

BTNY 8890-8890L. Plant Physiological Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BTNY 6830.
Energy balances, water relations, stomatal physiology, gas exchange, environmental aspects of mineral nutrition, stress physiology, and productivity.

(BTNY)CRSS 8900. Advanced Plant Genetics. 3 hours.
Prerequisite: BTNY 8100 or CRSS 8890-8890L or permission of department.
Recent developments in plant genetics: sexual incompatibilities and somatic hybridization, genetic engineering; RFLPs and other molecular markers, linkage and mapping: cytoplasmic genetics; and classic papers.

BTNY(GENE)(PATH)(BCMB) 8960. Fungal Genetics. 3 hours.
Prerequisite: Permission of department.
The genetics of the fungi emphasizing classical and modern molecular approaches.

BTNY 8970. Current Topics in Research. 1-2 hours. Repeatable for maximum 15 hours credit. 1-2 lab periods of 2 hours each per week.
Subjects of current interest in plant research. Current literature and modern analysis of research results. Course is designed to meet the specific research needs of the student.

BTNY 8980. Special Topics in Botany. 1-2 hours. Repeatable for maximum 18 hours credit. 1-2 lab periods of 2 hours each per week.
Discussion of selected topics in plant biology.

BTNY 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

BTNY 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Cellular Biology

Raymond T. Ḍamian, *Head*
Charles H. Keith, *Graduate Coordinator, 542-3310*
(Biological Sciences Building)

The Department of Cellular Biology offers MS and PhD degrees. Requirements for the MS include 24 hours of course work, satisfactory performance on written and oral examinations, and an acceptable thesis embodying original research in a specialized area. Requirements for the PhD include satisfactory performance on written and oral examinations and an acceptable dissertation and defense thereof. Required core course work for both MS and PhD includes: Introduction to Research in Cellular Biology (CBIO 6130); Intermediate Cell Biology (CBIO 6400); Cellular Biology Research Techniques (Laboratory Rotations - CBIO 8920); and either Advanced Immunology (CBIO 8100), Advanced Developmental Biology (CBIO 8300), Advanced Cell Biology (CBIO 8400), or Biology of Parasitism (CBIO 8500). Additional coursework is as established by the student's committee.

The department's research strengths are in cell biology, developmental biology, and molecular parasitology. Facilities for graduate training include campus laboratories fully equipped with computers and modern instrumentation for cell sorting and image analysis, electron and confocal microscopy, molecular biology, and animal rooms equipped to handle multiple species. The department also has adjunct faculty at the Cen-

ters for Disease Control in Atlanta, and collaborative research in association with laboratories in Latin America.

Contact the Graduate Coordinator, Dr. Charles H. Keith, if you have questions regarding the graduate program or see the web site at http://www.uga.edu/cellbio.

CBIO(MIBO) 4100/6100. Immunology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and GENE (BIOL) 3200.
Immunology from an experimental perspective. Anatomy, development, and function of the immune system. Immune system in infectious diseases. Mechanisms and pathogenesis of immunological disorders. Evolution of immunological concepts.

CBIO 4340/6340. Biology of Aging. 3 hours.
Prerequisite: Permission of department.
Biological processes accompanying aging in human and other organisms. Emphasis on physiological decline; theoretical explanations; attempts to prolong life; and the utility and limitations of model systems used to analyze human aging.

CBIO 4500/6500-4500L/6500L. Medical Parasitology. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Major protozoan and metazoan endo- and ectoparasites of humans. Principles of parasitism and general biology of each parasite. Vector biology, epidemiology, control, and treatment of parasitic diseases are discussed. Laboratory stresses diagnosis and identification, and introduces pathology through the use of fixed and living material.

CBIO(BTNY) 4600/6600-4600L/6600L. Biology of Protists. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Protists (algae, protozoa, and zoosporic fungi) with an emphasis on cell structure, evolution, and life histories. Laboratories will concentrate on examination of living and fixed materials and will include methods of isolation and culturing of protists.

CBIO 4730/6730. Endocrinology. 3 hours.
Prerequisite: BIOL 1108-1108L or permission of department.
Vertebrate endocrinology and the principles of chemical integration, emphasizing the physiology of regulatory mechanisms and the cellular and molecular bases of hormone action.

(CBIO)BIOL(VPAT) 5040/7040. Electron Microscopy. 3 hours.
Prerequisite: [(CHEM 1212 and CHEM 1212L) or (CHEM 1412 and CHEM 1412L)] and PHYS 1112-1112L.
Instrument theory and theory of specimen preparation for both transmission and scanning electron microscopy. Fundamentals of X-ray microanalysis, image processing, and image analysis.

(CBIO)BIOL 5050L/7050L. Electron Microscopy Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: BIOL(CBIO)(VPAT) 5040/7040 or permission of department.
Operation of both transmission (TEM) and scanning electron microscopes (SEM). Preparation of specimens (ultramicrotomy, critical point drying, negative staining) for examination in both TEM and SEM. Basics of X-ray microanalysis.

CBIO 6130. Introduction to Research in Cellular Biology. 1 hour. 2 lab periods of 1 hour each per week.
Introduces new Cellular Biology graduate students to research in the department, to research facilities, to the Science Library, and to laboratory safety. Professional ethics and responsibilities.

CBIO 6400. Intermediate Cell Biology. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Beginning graduate-level cell biology. Experiments that have led to our current understanding of cellular architecture, cell cycle, cell signaling, nucleic acid and protein synthesis, membrane phenomena, organellogenesis, energy transductions, and cellular control mechanisms.

CBIO 7000. Master's Research. 1-15 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 7300. Master's Thesis. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CBIO 8050-8050L. Techniques in Modern Microscopy. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: (PHYS 1112-1112L or PHYS 3330-3330L) and permission of department.
Modern microscopical techniques: brightfield, phase, DIC, fluorescence, confocal, scanning tunneling, and scanning and transmission electron microscopy. Related techniques: X- ray microanalysis photomicrography, and image analysis and processing.

CBIO 8100. Advanced Immunology. 3 hours. 3 lab periods of 1 hour each per week.
Prerequisite: CBIO(MIBO) 4100/6100 or MMIB 4100/6100-4100L/6100L or permission of department.
Immunology with emphasis on underlying mechanisms of development and function of the immune system. Students will critically evaluate current literature and design experiments to test hypotheses.

CBIO 8300. Advanced Developmental Biology. 3 hours.
Prerequisite: [GENE(BIOL) 3200 and CBIO(BIOL) 3400] or permission of department.
Experimental analysis of invertebrate and vertebrate development.

CBIO 8400. Advanced Cell Biology. 3 hours.
Structure and function of living cells. Biological questions, molecular mechanisms, and experimental approaches.

CBIO 8480. Advanced Topics in Cell Biology. 1-5 hours. Repeatable for maximum 5 hours credit.
Current cell biological research using sources in the primary literature. Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 8490. Cell Biology Seminar. 1 hour. Repeatable for maximum 6 hours credit. 1 lab period of 1 hour each per week.
Weekly discussion of current research in cell biology. Student presentations and development of public speaking skills.

CBIO 8500. Biology of Parasitism. 4 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: [CBIO(MIBO) 4100/6100 and CBIO 4500/6500-4500L/6500L and BCMB 8020 and GENE 8920] or permission of department.
Parasitism and host-parasite interactions from cell biological, immunological, biochemical and molecular biological perspectives. Major protozoan and helminth parasites of humans, and unique aspects of immunity to parasites and parasite cellular biochemistry and molecular genetics. The control of parasites via vaccine development and chemotherapy.

CBIO(BCMB)(MIBO) 8520. Topics in Biochemistry and Molecular Genetics of Parasites. 3 hours. Repeatable for maximum 6 hours credit. 1 hour lecture and 2 lab periods of 1 hour each per week.
Prerequisite: BCMB 8020 and GENE 8930.
Parasite cellular biochemistry and molecular genetics with potential for rational drug design. Topics include DNA replication, RNA editing, nucleic acid salvage pathways, polyamine metabolism, and glycosylphosphatidylinositol (GPI) anchors.

CBIO(PARA)(POUL) 8560. Seminar in Parasitology. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Weekly discussion of parasitological topics.

CBIO 8580. Advanced Topics in Parasitology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CBIO 8500.
Topics in parasitology and host-parasite interactions. Either cell biological/immunological or biochemical/molecular genetic aspects of parasites.

CBIO 8700. Membrane Transporters—Pumps, Carriers, and Channels. 2 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Identification, mechanism, roles, and regulation of membrane transport pathways.

CBIO 8730. Advanced Cell and Molecular Endocrinology. 2 hours. Repeatable for maximum 8 hours credit. 2 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: CBIO 4730/6730 or permission of department.
Modern vertebrate endocrinology, emphasizing special topics in research of physiological regulatory mechanisms and the molecular bases for hormone actions.

CBIO 8920L. Cellular Biology Research Techniques. 1-2 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Corequisite: CBIO 6130.
Student rotations in the research laboratories of faculty members. Not for thesis or dissertation. Non-Traditional Format: By arrangement with faculty member.

CBIO 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 9010. Problems in Cellular Biology. 1-3 hours. Repeatable for maximum 15 hours credit. 1-3 lab periods of 2-6 hours each per week.
Approved problems in cellular biology.

CBIO 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Chemistry

Robert A. Scott, *Head*
Sherri D. Mauldin, *Graduate Coordinator,*
542-1936
(Chemistry Building)

The Department of Chemistry offers courses of study and research leading to the Master of Science and Doctor of Philosophy degrees. The candidate for the Master of Science degree must complete a program of study approved by his/her major professor, the graduate coordinator, and the dean of the Graduate School. The student must complete and defend a thesis based

upon his/her research. This research should involve contributions of a publishable quality.

The PhD applicant chooses a major concentration in analytical, inorganic, organic, or physical chemistry. A program of study including course work in the major field and the student's research objectives must be completed and approved by the major professor, the graduate coordinator, and the dean of the Graduate School. After satisfactorily completing his/her prescribed course of study and a comprehensive written and oral examination in his/her major field, the student is officially admitted to candidacy for the PhD degree. This degree is awarded for proficiency and scholarship in research and a thorough acquaintance with a specific field of knowledge which the candidate demonstrates by the presentation and defense of a dissertation based upon independent work which contributes significantly to knowledge in the student's field.

Unless otherwise specified, all laboratory periods are three hours.

(CHEM)BCMB 4110/6110. Physical Biochemistry. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM)3100.
Prerequisite or corequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
The principles of physical chemistry applied to biological molecules and systems, including current approaches in structural biology.

CHEM 4190/6190. Introduction to NMR Spectroscopy. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Instrumental aspects of NMR spectroscopy including pulsed Fourier transform techniques, proton and carbon-13 techniques used in the analysis of organic compounds, polypeptides and other small molecules. The focus is on the operation of NMR spectrometers presently available in the University of Georgia Chemistry Department.

CHEM 6400. Intermediate Inorganic Chemistry. 3 hours.
Modern theories of bonding, structure, reaction mechanisms, and synthetic methods in inorganic, organometallic, and bioinorganic chemistry.

CHEM 6911. Physical Chemistry I. 4 hours.
Fundamental principles of physical chemistry. Kinetic molecular theory, thermodynamics, equilibria, electrochemistry.

CHEM 6912. Physical Chemistry II. 4 hours.
Prerequisite: CHEM 6911.
Fundamental principles of physical chemistry. Reaction kinetics, quantum mechanics, and molecular spectroscopy.

CHEM 7000. Master's Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CHEM 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CHEM 7500L. Basics of Scientific Glass Blowing. 1 hour. 1 lab period of 2 hours each per week.
The fundamentals of scientific glass-blowing. Students will work 'hands-on' developing skills and techniques useful in constructing many glass laboratory items. Bending, sealing, blowing, and cutting Pyrex glass will be covered. Students will also be introduced to different types of glass, availability of materials, and safe handling and repair of glassware.

(CHEM)BCMB 8040. Advanced Physical Biochemistry. 3 hours.
Prerequisite: Permission of department.
Principles in physical chemistry and biophysics to biological macromolecules, including structural biology, hydrodynamics, electronic and magnetic resonance spectroscopy, and crystallography.

(CHEM)BCMB 8110. Advanced Topics in Protein Structure-Function Relationships. 3 hours.
Prerequisite: BCMB 8010.
The relationship of protein structure to biological function, including protein folding, conformation, stability, and enzyme mechanisms.

CHEM 8120. Inorganic Chemistry Graduate Seminar. 1 hour. Repeatable for maximum 10 hours credit.
Current topics in inorganic or bioinorganic chemistry. Training in oral and visual presentation of inorganic and bioinorganic chemical research. Non-Traditional Format: Grading system of A/S is required. Normally S/U grades are given for attendance and participation in discussion. A/F grades are given when a student makes a presentation.

CHEM 8130. Organic Chemistry Graduate Seminar. 1 hour. Repeatable for maximum 10 hours credit.
Current topics in organic chemistry. Presentations are given by visiting scientists, UGA faculty and students. Training is given in oral and visual presentations of organic chemistry research. Non-Traditional Format: Grading system of A/S is required. Normally S/U grades are given for attendance and participation in discussion. A/F grades are given when a student makes a presentation.

CHEM 8140. Physical Chemistry Graduate Seminar. 1 hour. Repeatable for maximum 10 hours credit.
Current topics in physical chemistry and chemical physics. Presentations will be given by visiting speak-

ers, by UGA chemistry faculty, and by students. Training will be provided in oral and visual presentations of physical chemistry research. Non-Traditional Format: Grading system of A/S is required. Normally S/U grades are given for attendance and participation in discussion. A/F grades are given when a student makes a presentation.

CHEM 8150. Analytical Chemistry Graduate Seminar. 1 hour. Repeatable for maximum 10 hours credit. Current topics in analytical chemistry. Presentations by visiting speakers, UGA faculty and students. Training in oral and visual presentations of analytical chemical research. Non-Traditional Format: Grading system of A/S is required. Normally S/U grades are given for attendance and participation in discussion. A/F grades are given when a student makes a presentation.

(CHEM)BCMB 8180. X-Ray Crystallography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BCMB 8010 and BCMB 8040.
The basic principles of x-ray crystallography with major application to protein structure determination, including laboratories on crystallization techniques and data collection.

(CHEM)BCMB 8190. NMR Spectroscopy of Biomolecules. 3 hours.
Prerequisite: BCMB 8010 and BCMB 8040.
NMR spectroscopy with applications to proteins and other biopolymers. Special attention will be given to methods of structure determination.

(CHEM)BCMB 8200. Molecular Modeling and Structure Computations. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BCMB 8010 or permission of department.
Modern biomolecular modeling and structure computations with emphasis on the application of molecular dynamics simulations to proteins, carbohydrates, and protein-ligand complexes. Lectures will be complemented with laboratory sections on the use of modeling software and computer hardware.

CHEM 8210. Chemical Applications of Group Theory. 3 hours.
The description of chemical bonding and other properties of organic and inorganic molecules in terms of group theory and symmetry. Topics include molecular symmetry and point groups, group theory and quantum mechanics, and symmetry aspects of molecular orbital theory, chemical reactions, ligand field theory and molecular vibrations.

CHEM(BCMB) 8220. Physical Methods in Inorganic and Bioinorganic Chemistry. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 8210.
Physical methods used in inorganic and bioinorganic chemical research including UV/visible/near IR absorption spectroscopy, (magnetic) circular dichroism, electron paramagnetic resonance, nuclear magnetic resonance, Mossbauer and X-ray absorption spectroscopies, single crystal x-ray diffraction, and magnetochemistry.

CHEM 8230. Main Group Inorganic Chemistry. 3 hours.
Prerequisite: CHEM 8210.
Descriptive and theoretical aspects of the structure and reactivity of the main group elements.

CHEM 8240. Transition Metal Chemistry. 3 hours.
Prerequisite: CHEM 8210.
Descriptive and theoretical aspects of the structure and reactivity of transition metal compounds, including coordination chemistry and organometallic chemistry.

CHEM(BCMB) 8250. Bioinorganic Chemistry. 3 hours.
Prerequisite or corequisite: BCMB 6000 or BCMB 8010 or CHEM 6400 or permission of department.
Biological processes and molecules, mainly proteins and nucleic acids, which incorporate metal ions. Topics include metal binding to biopolymers, the roles of metal ions in biological processes such as electron transfer, atom or group transfer, and the use of metal complexes as therapeutic agents.

CHEM 8290. Special Topics in Inorganic Chemistry. 1-4 hours. Repeatable for maximum 15 hours credit.
A selected specialized area of inorganic, organometallic or bioinorganic chemistry. Examples include photochemistry, organometallic chemistry, kinetics and mechanisms, etc.

CHEM 8300. Stereochemistry and Conformations. 3 hours.
Structures of organic molecules in terms of molecular orbitals, stereochemistry and conformational analysis. Three dimensional structures, isomeric structures and optical activity.

CHEM 8310. Reaction Mechanisms in Organic Chemistry. 3 hours.
Selected organic reactions are discussed in terms of modern electronic structure and bonding theories. Important mechanisms are presented in the context of modern mechanistic theories. Isotope effects and reaction rates.

CHEM 8320. Synthetic Organic Chemistry. 3 hours.
Established organic chemistry synthetic procedures as applied in selected important reactions. Synthetic strategies and methodologies and retrosynthetic analysis.

CHEM(BCMB) 8330. Molecular Modeling. 3 hours.
Computational studies to calculate the structures of organic molecules. Specific training is given in the application of the molecular mechanics method and the MM-3 software package, ab initio calculations using the Gaussian software package, and other computational schemes. Evaluation of computational results.

CHEM 8340. Organic Spectroscopic Analysis. 3 hours.
Ultraviolet, infrared, H- and C- nuclear magnetic resonance and mass spectrometry as tools for the characterization of the structure of organic molecules, with particular emphasis on identifying structures for representative sets of spectra.

CHEM 8350. Physical and Biological Organic Chemistry. 3 hours.
Topics at the interface of biological and organic chemistry, with emphasis on physical methods of characterization. Proteins and enzymes, with attention to reaction kinetics, structural characterization, and structure-function relationships.

CHEM 8390. Special Topics in Organic Chemistry. 1-4 hours. Repeatable for maximum 15 hours credit.
Specialized research topics in organic chemistry. Emphasis is given to recent literature descriptions of cutting edge research. Topics include X-ray crystallography, natural products, and heterocyclic chemistry.

CHEM(BCMB) 8810. Mass Spectrometry. 3 hours.
Modern methods of mass spectrometry covering fundamental principles, instrumentation, and data interpretation. New techniques for the structural analysis of biomolecules.

CHEM 8820. Electrochemistry. 3 hours.
Electrochemistry and electroanalytical chemistry, including the treatment of mass transport, interfacial and coupled chemical processes; the thermodynamics, kinetics and mechanisms of electron transfer processes; and electrochemical methodologies including controlled-potential or controlled-current methods under transient and steady-state conditions.

CHEM 8830. Electronics. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Analog and digital electronic circuit design and construction, as well as the interfacing of computers to laboratory instrumentation.

CHEM 8840. Surface and Thin Film Analysis. 3 hours.
Surfaces and thin films, including the construction and use of ultra-high vacuum apparatus. Various microscopy and elemental analysis techniques are investigated, including XRD, SEM, STM, AFM, LEED, Auger spectroscopy, XPS, EPMA and others.

CHEM 8850. Analytical Spectrometry. 3 hours.
The instrumentation and methods used for spectrometric measurements throughout the spectrum from gamma-radiation to radio frequencies. Attention is given to the uses, applications, and limitations of all methods studied.

CHEM 8860. Advanced Analytical Chemistry. 3 hours.
Selected principles of analytical chemistry such as: techniques of analytical separations, including liquid and gas chromatography and electrophoresis; sampling theory; and chemometrics, including experimental design, statistics and data evaluation.

CHEM 8890. Special Topics in Analytical Chemistry. 1-4 hours. Repeatable for maximum 15 hours credit.
A selected specialized area of analytical chemistry. Emphasis is on current topics in cutting edge research, as presented in recent journal literature. Representative topics include Fourier transform methods, etc.

CHEM 8920. Thermodynamics and Statistical Mechanics. 3 hours.
Classical and statistical thermodynamics applied to chemical reactions, phase equilibria and solutions. The thermodynamic properties of macroscopic matter in terms of the molecular properties. Boltzman, Bose-Einstein and Fermi-Dirac distributions and their applications to physical and chemical systems.

CHEM 8930. Introduction to Quantum Chemistry. 3 hours.
The principles of quantum mechanics and their application to chemical systems. The Schrodinger equation and strategies for solving it. Studies of exactly soluble model systems such as the particle in a box, harmonic oscillator, rigid rotor, and the hydrogen atom.

CHEM 8940. Chemical Kinetics and Dynamics. 3 hours.
Mechanisms and rates of chemical reactions in the gas phase and in solution. Fast time-resolved experimental techniques to measure reaction rates and reaction intermediates. Photochemical and crossed molecular beam studies of elementary reactions. Energy transfer and state-specific disposal of energy in simple reactions. Unimolecular and bimolecular rate theories.

CHEM 8950. Advanced Quantum Chemistry. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CHEM 8930.
Topics in quantum and computational chemistry including detailed studies of atomic and molecular electronic structure and bonding. Various strategies and methodologies for computations of molecular structure and bonding, including the evaluation of these strategies in the context of experimental data.

CHEM 8960. Molecular Spectroscopy. 3 hours.
Prerequisite: CHEM 8210 and CHEM 8930.
Optical absorption and emission spectroscopy of diatomic and polyatomic molecules and how the details of spectra can be used to determine molecular structure and intramolecular dynamics. Microwave, infrared, UV-visible, and photoelectron spectroscopy are studied with emphasis on the high resolution measurements possible with laser instruments.

CHEM 8990. Special Topics in Physical Chemistry. 1-4 hours. Repeatable for maximum 15 hours credit.
A selected specialized area of physical chemistry or chemical physics. Typical areas include interstellar chemistry, laser technology, ion chemistry, etc. The focus is on current literature and ongoing research in cutting edge areas.

CHEM 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CHEM 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Classics

Richard A. LaFleur, *Head*
Naomi J. Norman, *Graduate Coordinator, 542-2187*
(Park Hall)

Graduate work is offered in Greek, Latin, or classics leading to a Master of Arts degree. Requirements for the degree include 28 hours of course work, exclusive of thesis, of which 12 hours must be in the major language (for the degree in Latin or Greek), or 18 hours in Greek and Latin combined (for the classics degree), and the remainder in any of a variety of courses in Greek, Latin, classical civilization, ancient history, archaeology, art, philosophy, linguistics, or other related areas, to be chosen in consultation with the department. All candidates complete a thesis related to their major language and must pass both a reading list exam based on a list of readings in ancient authors and modern criticism and an oral examination on their thesis. All candidates must also demonstrate a reading knowledge of German, French, or Italian.

Master's candidates in classics may apply for admission to any of the University's doctoral programs in comparative literature, linguistics, art history, or philosophy. The University's College of Education provides courses that may be taken simultaneously with those in classics to obtain teacher certification (in Georgia, Certificates T-5, T-6 and D-7). The MEd, EdS, and PhD degrees in language education/Latin are also available.

Graduate credit is offered for summer semester participation in the University of Georgia Classics Studies Abroad Program in Rome.

Several teaching and non-teaching assistantships are available; application deadline is January 1.

All degrees, except the PhD and MA degrees in Greek and classics, may be earned on a summers-only basis; Latin teachers from out of state are awarded tuition waivers, reducing fees to the in-state level.

Classical Culture

CLAS 4010/6010. Archaic Greece. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1020 or HIST 3250 or HIST 4311/6311 or permission of department.
The expanding world of Greek culture in the period from 750 to 480 BC, including consideration of the many new and influential developments in art, literature, history, political science, and philosophy, and their interrelationships.

CLAS 4020/6020. Greek Sanctuaries and Festivals. 3 hours.
Prerequisite: CLAS 1000 or HIST 3250 or HIST 3310 or HIST 4311/6311 or HIST 4312/6312 or permission of department.
The major Greek sanctuaries and their physical remains, and the Greek religious calendar and its important festivals, including the Olympic Games and the Panathanaia.

CLAS 4030/6030. The Archaeology of the Greek Colonies. 3 hours.
Prerequisite: CLAS 1000 or HIST 2301 or HIST 3250 or HIST 4311/6311 or HIST 4312/6312 or ARST 2310 or permission of department.
The archaeology of the Greek colonies in Ionia, Magna Graecia, and the Black Sea area is examined to identify and explain the combination of Greek and indigenous cultures in these areas on the fringes of the Greek world.

CLAS 4040/6040. The Hellenistic World. 3 hours.
Prerequisite: CLAS 1000 or HIST 3250 or HIST 4311/6311 or HIST 4321/6321 or HIST 4322/6322 or permission of department.
Archaeology, art, culture, and history of Greece and the East from the rise of Alexander to Rome's annexation of Egypt.

CLAS 4100/6100. Ancient Cities of Greece and Rome. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or permission of department.
Selected Greek and Roman cities and their architecture; principles upon which they are planned and laid out. Theories of Hippodamus and others, and the writings of Vitruvius. Detailed study of the topography of Athens and Rome.

CLAS 4110/6110. The Etruscans and Early Rome. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or permission of department.
The art and culture of the people of Northern Italy known as the Etruscans, with special attention to their

relationship with the Greek world and their role in the development of Rome as a city.

CLAS 4120/6120. Pompeii and Herculaneum: The Buried Cities. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or permission of department.
Pompeii, Herculaneum, and the area destroyed by the eruption of Mt. Vesuvius. Concentration will be on political, social, religious, and economic life, combined with a study of the painting, sculpture, and architecture of the excavated cities and villas.

CLAS 4130/6130. The Archaeology of Rome's Provinces. 3 hours.
Prerequisite: CLAS 1010 or CLAS(ANTH) 2000 or permission of department.
The archaeology of the Western and/or Eastern provinces of the Roman Empire, concentrating on the major cities and sanctuaries and their physical remains.

CLAS 4140/6140. Archaeology of Punic and Roman Carthage. 3 hours.
Prerequisite: CLAS 1000 or CLAS(ANTH) 2000 or permission of department.
Corequisite: CLAS 4150/6150.
The civilization of Roman North Africa from the Punic period through the Arab Conquest, using the important city of Carthage as a model. Non-Traditional Format: Open only to students participating in the University's Carthage excavation.

CLAS 4150/6150. Practicum in Classical Archaeology. 3 hours.
Prerequisite: CLAS 1010 or CLAS(ANTH) 2000 or permission of department.
Corequisite: CLAS 4140/6140.
All aspects of modern field archaeology on a classical site, including excavation techniques, the keeping of field records, and the classification and conservation of finds from the moment of recovery to their final disposition in museums. Non-Traditional Format: Open only to students participating in the University's Carthage excavation.

CLAS 4200/6200. Ancient Comedy. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.
Ancient comedy in English translation, concentrating on fifth-century Athens, and tracing its changing focus through Menander to Plautus and Terence; also considered will be the theoretical basis of comedy as discussed by Aristotle and others, as well as the place of comedy within the history of genres.

CLAS 4210/6210. Ancient Tragedy. 3 hours.
Prerequisite: Permission of department.
The conventions of classical tragedy as exemplified in the plays (in English translation) of the Greek dramatists Aeschylus, Sophocles, and Euripides, as well as the Roman tragedian Seneca.

CLAS 4220/6220. Roman Epic Poetry. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or HIST 4322/6322 or permission of department.
The epic poetry of ancient Rome with special emphasis on Ennius, Vergil, and Lucan. The historical background of epic will be examined and the poems will be read in English translation, some attention being given to Renaissance and modern translations.

CLAS 4230/6230. Classical Rhetoric. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or SPCM 1100.
Classical rhetoric, with special attention to Plato, Aristotle, and Cicero.

CLAS 4240/6240. Theory and Analysis of Classical Mythology. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.
The interpretation and analysis of ancient myths, particularly those of Greece and Rome.

CLAS 4250/6250. Ancient Novel. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.
Ancient prose fiction (in English translation), including the Latin novels of Petronius and Apuleius and examples of the Greek novel. Topics include the relationship between the novel and other literary genres, the social and intellectual background of the authors, the themes of love, travel, and magic, and the novel's audience. Course may be taken through UGA Studies Abroad program in Classics in Rome.

CLAS 4300/6300. Selected Topics in Ancient Civilization. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CLAS 1000 or CLAS 1010 or permission of department.
Special topics in the civilization of Greece and Rome. Topics will vary as demand requires.

(CLAS)HIST 4311/6311. Greek History. 3 hours.
Greek history to the time of Alexander the Great.

(CLAS)HIST 4312/6312. The Hellenistic World. 3 hours.
Problems in Hellenistic history from 330 B.C. to the Roman conquest with emphasis on the Antigonid, Seleucid, and Ptolemaic dynasties.

(CLAS)HIST 4321/6321. The Roman Republic. 3 hours.
Roman history to the end of the republic.

(CLAS)HIST 4322/6322. The Roman Empire. 3 hours.
History of the Roman Empire from 27 B.C. to A.D. 337 with special emphasis on the government of Augustus, reasons for its decline, and the final attempt at unification of the empire under Constantine.

(CLAS)LING 4610/6610. Sanskrit I. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The phonology, morphology, and syntax of the classical Sanskrit language, emphasizing the position of Sanskrit within the Indo-European language family and its importance for Indo-European linguistics.

(CLAS)LING 4620/6620. Sanskrit II. 3 hours.
Prerequisite: LING(CLAS) 4610/6610.
Continued studies in both the synchronic and diachronic grammar of classical Sanskrit.

CLAS 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CLAS 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CLAS 8000. Proseminar in Classics: Bibliography and Methods of Research. 1 hour.
Methods, history, and bibliography in philology and other areas of the classics as a background to graduate study in Greek and/or Latin.

CLAS 8010. Greek Civilization. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Topics in Greek literature or civilization.

CLAS 8020. Roman Civilization. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Topics in Roman literature or civilization.

Greek

GREK 4010/6010. Homer. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selections from the Iliad and/or the Odyssey.

GREK 4020/6020. Hesiod. 3 hours.
Prerequisite: GREK 2002 or permission of department.
Study of Hesiod's two surviving poems, the Theogony and the Works and Days, with special attention to the relationship of his language and religious thinking to that of Homer.

GREK 4030/6030. Greek Lyric Poets. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected Greek elegy and lyric, with attention to its political and social background, and to the relation of these literary types to epic and dramatic poetry.

GREK 4040/6040. Thucydides. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
The Peloponnesian War through selected readings.

GREK 4050/6050. Aeschylus. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Aeschylus' plays, with emphasis on his theology and special uses of the Greek language.

GREK 4060/6060. Sophocles. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Sophocles' plays, with emphasis on the poet's religious and humanistic values and his dramatic style.

GREK 4070/6070. Euripides. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Euripides' plays, with emphasis on the poet's dramatic style and his treatment of social, political, and religious themes.

GREK 4080/6080. Aristophanes. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected comedies of Aristophanes. Emphasis is placed on language, style, and thought, and on the generic characteristics of Greek Old Comedy.

GREK 4090/6090. Advanced Readings: Plato. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
The dialogues of Plato. Emphasis is placed on the language, style, and philosophical thought of Plato.

GREK 4100/6100. Attic Orators. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Orations drawn from the works of Demosthenes, Lysias, and Aeschines, with emphasis on the function and techniques of persuasion in oratory and on the political and social contexts of these orations.

GREK(LATN)(LING) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo-European.

GREK 4200/6200. Readings in Selected Greek Authors. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected Greek authors to be chosen according to the interests of students and instructor.

GREK 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GREK 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

GREK 8010. Readings and Research in Greek Literature. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Intensive readings and research in Greek literature and pertinent critical readings; the topic examined will be determined by the student's prior training and interests.

Latin

LATN 4010/6010. Roman Rhetoric. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the orations and rhetorical writings of Cicero, Quintilian, Seneca Rhetor, and others.

LATN 4020/6020. Roman Epic Poetry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Latin epic poets Ennius, Vergil, Lucan, and others.

LATN 4030/6030. Roman Historians. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Roman historical writers such as Caesar, Sallust, Ammianus Marcellinus, and others.

LATN 4040/6040. Roman Elegy. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the elegiac works of Tibullus/Sulpicia, Propertius, and Ovid, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4050/6050. Roman Epistles. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the letters of Cicero, Seneca, Pliny the Younger, and others.

LATN 4060/6060. Roman Satire. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from such satirists as Horace, Juvenal, and others.

LATN 4070/6070. Roman Drama. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the comedies of Plautus and Terence, and the tragedies of Seneca, and others.

LATN 4080/6080. Roman Didactic Poetry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Lucretius' De Rerum Natura, Vergil's Georgics, and others. The poet as teacher; the manner in which poetic form and imagery express philosophy.

LATN 4090/6090. Latin of Later Antiquity and the Middle Ages. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Latin authors of late antiquity and the Middle Ages. Study of Latin vocabulary and style during late antiquity and the Middle Ages.

LATN 4100/6100. Roman Biography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Latin biographical authors such as Nepos, Suetonius, Tacitus, the Scriptores Historiae Augustae, and Einhard.

(LATN)GREK(LING) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo- European.

LATN 4200/6200. Catullus. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Carmina of Catullus, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4210/6210. Horace. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the works of Horace, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4220/6220. Ovid. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Metamorphoses and non-elegiac works of Ovid, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 4300/6300. Cicero and the Roman Republic. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the orations and other works of Cicero, and from the works of Caesar, Sallust, and other contemporary writers.

LATN 4310/6310. Livy. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Ab Urbe Condita of Livy, with attention to literary and historical issues surrounding the author and his works.

LATN 4320/6320. Tacitus. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Annales, Historiae, and/or minor works of Tacitus, with attention to literary and historical issues surrounding the author and his works.

LATN 4400/6400. Advanced Readings in Latin. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings in one or more Latin authors or genres. Topics to be selected on the basis of student needs.

LATN 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

LATN 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

LATN 7770. Latin Teaching Apprenticeship. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
The teaching of elementary Latin at the college level; an introduction to methods and materials. Observations and practice teaching are required.

LATN 8010. Readings and Research in Latin Prose. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Latin prose literature and pertinent critical writings. The topic, author, or genre covered will be determined by the student's previous training and interests.

LATN 8020. Readings and Research in Latin Poetry. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Latin poetic literature and pertinent critical writings. The topic, author, or genre covered will be determined by the student's previous training and interests.

Comparative Literature

Betty Jean Craige, *Acting Head*
James H. McGregor, *Graduate Coordinator, 542-0420*
(Joseph Brown Hall)

Foreign language requirements: MA, fluent reading knowledge of one foreign language and reading competence in a second; PhD, fluent reading knowledge of two foreign languages and reading competence in a third.

MA students are required to take five graduate courses (total 15 hours) in the Department of Comparative Literature and three graduate courses (total 9 hours) in other literature and language departments, for a total of 24 hours. PhD students are required to take six graduate courses (total 18 hours) in the Department of Comparative Literature and three graduate courses (total 9 hours) in other literature and language departments, plus CMLT 9300, for a total of 30 hours beyond the MA.

The department webpage is located at: http://www.uga.edu/~cml/.

CMLT 4050/6050. Literature and Ideas of Nature. 3 hours. Repeatable for maximum 6 hours credit.
Literary and philosophical texts of various historical periods that trace changes in how human beings understand their non-human environment.

CMLT 4070/6070. Renaissance European Literature. 3 hours.
Literature of Western Europe (Italian, French, Spanish, Germanic, and English) 1450-1600, with emphasis on literary types and prevailing ideas.

CMLT 4080/6080. Romantic European Literature. 3 hours.
The rise and development of Romanticism in the eighteenth and nineteenth centuries, with reading of selected literature and criticism.

CMLT 4090/6090. Poetry. 3 hours.
Lyric poetry from the mid-nineteenth century to the present.

CMLT 4100/6100. Mannerist and Baroque Literature. 3 hours.
Literary forms and issues in Europe ca. 1550-1700, with special attention to the intellectual background and the interrelationships between literature and other arts and sciences.

CMLT 4110/6110. Medieval European Literature. 3 hours.
The literatures of medieval Europe with emphasis on major literary genres and the philosophical and social presuppositions which inform them.

CMLT 4120/6120. Eighteenth-Century European Literature. 3 hours.
The literature of England, France, and Germany in the eighteenth century, with emphasis on literary types and prevailing ideas.

CMLT 4150/6150. The Novel. 3 hours.
The novel as a genre. Origins of prose fiction, theory of the novel, and representative readings of novels from the sixteenth through the twentieth centuries will be included.

CMLT 4200/6200. Literature and the Visual Arts. 3 hours.
Formal, philosophical, and thematic relationships between literature and one or more of the visual arts in a given period.

CMLT 4210/6210. Literature and Cinema. 3 hours. Repeatable for maximum 6 hours credit.
Formal, philosophical, and thematic relationships between literature and cinema.

CMLT 4220/6220. East Asian Cinema. 3 hours.
A survey of major works of East Asian cinema from literary, historical, cultural, and interdisciplinary perspectives.

CMLT 4250/6250. Drama. 3 hours.
Drama as a genre from its beginnings to the present.

CMLT 4300/6300. Modernism and Postmodernism. 3 hours.
Modernism and postmodernism as literary movements, with reading of selected literature and criticism.

CMLT 4350/6350. Nineteenth-Century Literature. 3 hours.
Readings in major writers and works of nineteenth-century European and world literature.

CMLT 4400/6400. East Central European Literature and Culture. 3 hours.
The works of major modern East Central European writers, with some attention to representative cinema.

CMLT 4510/6510. Literature and Music. 3 hours.
The forms, relationships, and aesthetics of music and literature.

CMLT 4600/6600. Survey of East Asian Literature I. 3 hours.
Poetry, prose, and drama in traditional China and Japan. The works will be in English translation.

CMLT 4610/6610. Survey of East Asian Literature II. 3 hours.
Poetry, prose, and drama in China and Japan from the nineteenth and twentieth centuries. The works will be in English translation.

CMLT 4620/6620. East Asian Novel. 3 hours.
The major/minor novelists and their works, especially those of the nineteenth and twentieth centuries. The novels are in English translation.

(CMLT)LING 4740/6740. Discourse Analysis. 3 hours.
Prerequisite: LING 2100 or permission of department.
An interdisciplinary study of language use, text analysis, and evaluation. The course will provide students with the ability to investigate and evaluate structural features of language and to identify the strategies used by different writers based on style and cultural backgrounds.

(CMLT)LING 4870/6870. Language, Gender, and Culture. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The role of language and culture in the formation of philosophical assumptions about gender differentiation in society.

CMLT 4880/6880. Survey of African Literature I. 3 hours.
African literature from its ancient oral traditions to the European colonial period based on works of African authors written in English and English translations of the African works.

CMLT 4890/6890. Survey of African Literature II. 3 hours.
African literature since the independence of the African people from European colonial rule.

CMLT 7000. Master's Research. 1-6 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CMLT 7300. Master's Thesis. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CMLT 8020. Seminar in Literary Periods. 3 hours. Repeatable for maximum 15 hours credit.
Specific literary period from an international perspective, with emphasis on theoretical problems in peri-

odization and the relationship of literature to other cultural institutions.

CMLT 8030. Seminar in Literary Genres. 3 hours. Repeatable for maximum 18 hours credit.
Major genre, the epic in the literatures of Europe and America, with particular attention to recent developments in genre theory.

CMLT 8040. Problems in Literary Translation. 3 hours. Repeatable for maximum 9 hours credit.
The problems and principles of literary translation, with emphasis on the practice of translation.

CMLT 8130. Seminar in Special Topics. 3 hours. Repeatable for maximum 15 hours credit.
Selected topics in comparative studies, to be determined by the course instructor.

CMLT 8280. Problems in the History of Literary Criticism I. 3 hours. Repeatable for maximum 6 hours credit.
Literary criticism from Classical Antiquity through the mid-eighteenth century with attention to the theoretical issues and assumptions underlying the specific critical problems.

CMLT 8290. Problems in the History of Literary Criticism II. 3 hours. Repeatable for maximum 6 hours credit.
Literary criticism from the late eighteenth century to the present. Particular attention will be paid to the theoretical issues and assumptions underlying the specific critical problems under investigation.

CMLT 8300. Seminar in Contemporary Literary Theory and Criticism. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Literary theory and critical method, as exemplified by diverse figures from a number of differing national and linguistic cultures.

CMLT 8310. Seminar in East Central European Studies. 3 hours.
Intellectual trends in their East Central European inflection. The philosophical and ideological underpinnings of the East Central European aesthetic and sociological thought and expression.

CMLT 8400. Literature and Science. 3 hours. Repeatable for maximum 6 hours credit.
Models of reality implicit in "scientific" and "literary" texts.

CMLT 8500. Literature and Philosophy. 3 hours. Repeatable for maximum 6 hours credit.
The relationships between literature and philosophy, and in the philosophical issues that literature examines.

(CMLT)ENGL 8850. Seminar in Criticism and Theory. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A problem in structuralism, poststructuralism, feminism, psychoanalysis, Marxism, New Historicism, gay and lesbian studies, postmodernism, postcolonialism, or cultural studies; or of a major literary theorist.

CMLT 8980. Readings in Comparative Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent reading with regular conferences and reports, in some aspects of comparative literature.

CMLT 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CMLT 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Japanese

JPNS 4500/6500. Readings in Japanese Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: JPNS 3020.
Selected readings of Japanese literature in the original language. Texts will vary, with focus on readings of works of literature and discussion of issues in literary criticism in Japanese.

Computer Science

E. Rodney Canfield, *Head*
John A. Miller, *Graduate Coordinator, 542-2911*
(Boyd Graduate Studies Research Center)

The Computer Science Department offers three distinct graduate programs: Doctor of Philosophy (PhD), Master of Science (MS), and Master of Applied Mathematical Sciences (MAMS). A closely affiliated program is offered by the Artificial Intelligence Center; please see their section in this bulletin. Financial aid possibilities for graduate students include departmental teaching assistantships, departmental research assistantships, and university-wide assistantships.

The PhD degree in computer science is an advanced, intensive program designed to take students to the frontier of knowledge in both the theory and practice of Computer Science. The program prepares students for careers in re-

search (at universities, government, or industrial research labs), teaching at colleges or universities, or advanced development at hardware or software companies. The department presently has active research groups in theory, distributed information systems, image processing, parallel processing, computational science, computational biology, artificial intelligence, computer architecture, and modeling and simulation. Admission to this program is highly selective: consideration for admission into the PhD program requires a baccalaureate degree or master's degree with a major in computer science or an allied discipline, Graduate Record Examination (GRE) test scores (including the subject test in computer science), three letters of recommendation, and a one-page personal statement outlining the applicant's background, achievements, and future goals. Students with insufficient background in computer science can apply for one of the master's level programs (MS or MAMS).

The MS degree in computer science is a comprehensive program of study intended to give qualified and motivated students a thorough foundation in the theory, methodology, and techniques of computer science. Students who successfully complete this program of study will have a grasp of the principles and foundations of computer science. They will be prepared to pursue higher academic goals, including the PhD degree. They will obtain skills and experience in up-to-date approaches to analysis, design, implementation, validation, and documentation of computer software and hardware. With these skills they will be well qualified for technical, professional, or managerial positions in government, business, industry, and education. Admission to this program is selective: consideration for admission into the MS program requires a baccalaureate degree preferably with a major in computer science or an allied discipline, Graduate Record Examination (GRE) test scores, three letters of recommendation, and a one-page personal statement outlining the applicant's background, achievements, and future goals. Though not required for admission, the subject test in computer science must be taken before completing the MS degree. Students with insufficient background in computer science must take undergraduate computer science courses in addition to their graduate program to remedy any deficiencies.

The MAMS is a professional master's degree program designed for students who seek a broad training in applied quantitative methods as preparation for professional employment in business, government, or industry. The student takes a core curriculum of courses from four participating departments: Computer Science, Mathematics, and Statistics in the Franklin College of Arts and Sciences; and Management Science in the Terry College of Business. The student may complete a degree with an interdisciplinary program of study which allows combination of expertise in computation with a chosen field of application. The degree is designed to meet the need for technical specialists who can use computation, applied mathematics, operations research, and statistics to solve complex, quantitative, real-world problems. Admission to the MAMS program is selective; applicants must have a baccalaureate degree in a quantitative discipline and have taken introductory courses in computer science, mathematics, and statistics. Applicants must submit the same information as applicants for the MS degree.

Please note that in addition to the requirements of the Department of Computer Science, applicants must satisfy all requirements of the Graduate School as noted in this bulletin.

CSCI 4050/6050. Software Engineering. 4 hours.
Prerequisite: CSCI 2720.
Full cycle of a software system development effort, including requirements definition, system analysis, design, implementation, and testing. Special emphasis is placed on system analysis and design. The design phase includes development of a user interface. A large term project incorporates the full software life cycle.

CSCI 4140/6140. Numerical Methods and Computing. 4 hours.
Prerequisite: CSCI 1302 and MATH 2210 and MATH 2210L.
Prerequisite or corequisite: MATH 3000.
Numerical methods and computing. Topics include: computer arithmetic; numerical solutions of nonlinear equations; polynomial interpolation; numerical differentiation and integration; numerical solutions of systems of linear equations, initial and boundary value problems, systems of ordinary differential equations, spline functions, and the method of least squares.

CSCI 4210/6210. Simulation and Modeling. 4 hours.
Prerequisite: CSCI 2720.
The modeling and simulation of existing or planned systems for the purpose of studying their correctness, reliability, or performance. Topics to be addressed include discrete-event simulation, continuous simulation, analysis and modeling methodologies, animation, virtual reality, and Web-based simulation.

CSCI 4350/6350. Global Information Systems. 4 hours.
Prerequisite: CSCI 4370/6370 or CSCI 4570/6570.

Provides intermediate to advanced understanding of the use of Internet, World Wide Web, and network computing (including Java) technologies for management (search, access, integration, presentation) of multimedia information. Topics discussed include key techniques, tools and technologies for creating such systems, developing novel applications, and their impact on business.

CSCI 4370/6370. Database Management. 4 hours.
Prerequisite: CSCI 2720.
The theory and practice of database management. Topics to be covered include efficient file access techniques, the relational data model as well as other data models, query languages, database design using entity-relationship diagrams and normalization theory, query optimization, and transaction processing.

CSCI 4470/6470. Algorithms. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Algorithms, covering basic analysis techniques, basic design techniques (divide-and-conquer, dynamic programming, greedy, and branch-and-bound), basic graph algorithms, and NP-completeness.

CSCI 4490/6490. Algorithms for Computational Biology. 4 hours.
Prerequisite: CSCI 4470/6470 or permission of department.
Application of discrete algorithms to computational problems in molecular biology. Topics are drawn from such areas as classical sequence comparison, multiple sequence alignment, DNA sequence assembly, DNA physical mapping, genome rearrangement, evolutionary tree construction, and protein folding. Background in molecular biology is not required.

CSCI 4500/6500. Programming Languages. 4 hours.
Prerequisite: CSCI 1302.
Prerequisite or corequisite: CSCI 2720.
Several modern programming languages and the paradigm — procedural programming, object-oriented programming, functional programming, and logic programming — that each strives to accommodate. Projects involve at least three languages.

CSCI 4520/6520. Functional Programming. 4 hours.
Prerequisite: CSCI 2720 and CSCI(MATH) 2610.
The functional programming paradigm: functions and types, type inference and polymorphism, higher order functions and recursion, evaluation strategies, abstract data types and modules, lists, trees, and lazy data structures, reasoning about functional programs.

CSCI(ARTI) 4540/6540. Symbolic Programming. 3 hours.
Prerequisite: CSCI 1302 or permission of department.
Prerequisite or corequisite: CSCI(PHIL) 4550/6550.
Programming in LISP and PROLOG, with emphasis on artificial intelligence techniques. Other languages used for artificial intelligence work will be presented more briefly.

CSCI(PHIL) 4550/6550. Artificial Intelligence. 3 hours.
Prerequisite: CSCI 1302 or [PHIL 2500 and (PHIL 3010 or PHIL 3020 or PHIL 3610)] or permission of department.
Prerequisite or corequisite: CSCI(ARTI) 4540/6540.
The artificial intelligence approach to modeling cognitive processes. Topics include an introduction to heuristic methods, problem representation and search methods, classic AI techniques, and a review of the controversial issues of the AI paradigm of cognition as computation.

CSCI 4570/6570. Compilers. 4 hours.
Prerequisite: CSCI 4720/6720.
Design and implementation of compilers for high-level programming languages. Topics include all phases of a typical compiler, including scanning, parsing, semantic analysis, intermediate code generation, code optimization, and code generation. Students design and develop a compiler for a small programming language. Emphasis is placed on using compiler development tools.

(CSCI)MATH 4630/6630. Mathematical Analysis of Computer Algorithms. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Discrete algorithms (number-theoretic, graph-theoretic, combinatorial, and algebraic) with an emphasis on techniques for their mathematical analysis.

(CSCI)MATH 4670/6670. Combinatorics. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Basic counting principles: permutations, combinations, probability, occupancy problems, and binomial coefficients. More sophisticated methods include generating functions, recurrence relations, inclusion/exclusion principle, and the pigeonhole principle. Additional topics include asymptotic enumeration, Polya counting theory, combinatorial designs, coding theory, and combinatorial optimization.

(CSCI)MATH 4690/6690. Graph Theory. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Elementary theory of graphs and digraphs. Topics include connectivity, reconstruction, trees, Euler's problem, hamiltonicity, network flows, planarity, node and edge colorings, tournaments, matchings, and extremal graphs. A number of algorithms and applications are included.

CSCI 4720/6720. Computer Architecture and Organization. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Structure and function of modern computing systems. Topics studied include combinational and sequential logic, number systems and computer arithmetic, hardware design and organization of CPU, I/O systems and memory systems, instruction set and assembly language design, and current trends and developments in computer architecture and organization.

CSCI 4730/6730. Operating Systems. 4 hours.
Prerequisite: CSCI 4720/6720.
Coverage of the key concepts in modern operating systems. Specific topics include process management, synchronization mechanisms, scheduling strategies, deadlock detection/avoidance, memory management, file systems, protection and security, and distributed systems. Concepts will be reinforced through programming projects using a realistic operating system.

CSCI 4760/6760. Computer Networks: Technology and Applications. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
In-depth coverage of computer networks, including: digital data transmission and encoding, layered protocol models, Internet protocol, Internet client-server software, and network design methodology. Topics also include discussion of recent network technologies, legal, corporate and public-interest aspects and case studies involving public and private enterprises.

CSCI 4810/6810. Computer Graphics. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Principles of two-dimensional and three-dimensional interactive raster graphics. Principles of scan conversion algorithms for two-dimensional and three-dimensional graphics primitives; data structures and modeling techniques for raster graphics; interaction, visual realism, animation and user interface design; ray tracing, illumination, shading, data storage/retrieval, software engineering and parallel computing for graphics.

CSCI 4900/6900. Special Topics in Computer Science. 1-4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Various advanced topics in Computer Science.

CSCI 4950/6950. Directed Study in Computer Science. 1-4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Content will vary in response to the interests, needs, and capability of the students and faculty involved. Individual, guided study in computer science. Non-Traditional Format: Directed study.

CSCI 5080/7080-5080L/7080L. Personal Computer System Administration. 4 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: CSCI 1100-1100L.
Management of Windows and Macintosh computer systems. Topics covered include configuration, backups, hardware and software troubleshooting, and setting up for Internet access. Hands-on laboratory emphasized.

CSCI 6610. Automata and Formal Languages. 4 hours.
Prerequisite: CSCI 2670.
The fundamental limitations on mechanized computation. In the first part of the course, the emphasis is on possible versus impossible computations. Three classes of languages are considered: regular, context-free, and recursively enumerable. In the second part of the course the emphasis shifts to possible versus feasible computations.

CSCI 7000. Master's Research. 1-5 hours. Repeatable for maximum 25 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CSCI 7010. Computer Programming. 4 hours.
Prerequisite: Permission of department.
Algorithms, programs, and computing systems. Topics studied include: fundamental techniques of program development and supportive software tools; and programming projects and applications in a structured computer language. Hands-on experience using microcomputers.

CSCI 7100. Technical Report. 1-5 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Preparation of a technical report to satisfy requirements for the MAMS degree. Non-Traditional Format: MAMS technical report hours.

CSCI 7300. Master's Thesis. 1-5 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CSCI 8050. Knowledge-Based Systems. 4 hours.
Prerequisite: CSCI(PHIL) 4550/6550 or CSCI(PHIL) 8650 or permission of department.
Theory and practice of knowledge-based system construction. Topics will include knowledge-based construction, inference engines, reasoning from incomplete or uncertain information, and user interfaces.

CSCI 8060. Advanced Software Engineering. 4 hours.
Prerequisite: CSCI 4050/6050 and CSCI 4370/6370.
Analysis of advanced methods in software engineering. Emphasis is placed on formal specification methods, advanced software testing, software reuse, distributed software design, and communication protocol specification. Studies include advanced software development tools and systems.

CSCI 8140. Parallel Processing and Computational Science. 4 hours.
Prerequisite: CSCI 4140/6140 and CSCI 4720/6720.
Topics include computer architectures, interconnection networks, basic concepts in parallel computing, parallel algorithms, matrix multiplications, solving systems of equations, parallel direct and iterative methods, programming on different parallel architectures, and applications.

CSCI 8350. Enterprise Integration. 4 hours.
Prerequisite: (CSCI 4370/6370 or CSCI 4570/6570) and permission of department.
Technical information management aspects of enterprise integration using recent advances in workflow management, database management, distributed systems, and information systems areas of computer science. Topics include federated/multidatabase architectures and systems for integration of distributed, heterogeneous, and autonomous databases, business process modeling and workflow automation. Large group project.

CSCI 8370. Advanced Database Systems. 4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: CSCI 4370/6370 and CSCI 4730/6730.
Advanced study of database systems. The course focuses on concepts, algorithms and technologies for relational, object-oriented and distributed database systems. Related technologies such as data warehouses and repositories will also be covered.

CSCI 8470. Advanced Algorithms. 4 hours.
Prerequisite: CSCI 4470/6470 and CSCI 6610.
Further study of fundamental algorithms. Topics covered include advanced data structures, graph algorithms, string algorithms, geometric algorithms, parallel algorithms, and approximation algorithms for NP-complete problems.

CSCI(LING) 8570. Natural Language Processing Techniques. 4 hours.
Prerequisite: CSCI(ARTI) 4540/6540 and LING 8150.
Human language from a computational point of view; algorithms and techniques for computer understanding of human-language input.

CSCI 8610. Topics in Theoretical Computer Science. 4 hours. Repeatable for maximum 12 hours credit.
Prerequisite: CSCI 4470/6470 and CSCI 6610.
Advanced topics in theoretical computer science. The selection of topics varies from year to year. Areas may include, but are not limited to, denotational semantics, complexity theory, recursion theory, and discrete algorithms.

CSCI(PHIL) 8650. Logic and Logic Programming. 4 hours.
Prerequisite: [CSCI(ARTI) 4540/6540 and PHIL (LING) 6430] or permission of department.
Theoretical foundations of automated reasoning and logic programming. Topics covered include propositional logic, predicate logic, first-order models, resolution principles, logic programming paradigms, nonmonotonic reasoning.

CSCI 8720. Advanced Computer Architecture. 4 hours.
Prerequisite: CSCI 4730/6730 or pemission of department.
Advanced and high-performance computer architecture. Topics covered include hierarchical memory design, cache memory design, pipelining, vector processing and parallel processing. Case studies of vector processors and multi-processor architectures: shared memory, distributed memory, data parallel (SIMD) and control parallel (MIMD) architectures, and heterogeneous parallel computing on a network of workstations.

CSCI 8730. Software Systems for Parallel and Distributed Computing. 4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: CSCI 4730/6730.
Software systems geared at supporting parallel and distributed computing. Programming language support will focus on simple and efficient ways to express parallel programs. Compiler and operating system support will focus on new optimizations to make parallel programs execute more efficiently.

CSCI 8750. Principles of VLSI Systems Design. 4 hours.
Prerequisite: CSCI 4370/6370 and CSCI 4720/6720.
Methods and computer tools used in the design of integrated electronics devices: layout, simulate, verify, and performance. Students will do a project design.

CSCI 8770. Computer-Aided Design. 4 hours.
Prerequisite: CSCI 8750.
Computer-aided design systems, with emphasis on designer-system interaction, Algorithms and systems for synthesis, analysis, optimization by criteria, simulation, and testing.

CSCI 8810. Image Processing and Computer Graphics. 4 hours.
Prerequisite: CSCI 4810/6810 or permission of department.
Image processing and computer graphics. Topics include: image representation, restoration, transformation, classification, compression, enhancement, segmentation, image filter, design, histogram techniques, sampling and quantization, Fast Fourier Transform, image data structures, parallel/distributed processing, illumination models and surface-rendering methods. A number of applications will be presented as case studies.

CSCI 8820. Computer Vision and Pattern Recognition. 4 hours.
Prerequisite: CSCI 4810/6810 or permission of department.
Low-level and high-level vision including edge detection, connected component labeling, boundary detection, segmentation, stereopsis, motion analysis, and object recognition. Knowledge representation, knowledge retrieval and reasoning techniques in computer vision. Parallel computing, parallel architectures and neural computing for computer vision.

CSCI(ENGR) 8940. Computational Intelligence. 4 hours.
Prerequisite: CSCI(PHIL) 4550/6550 or permission of department.
Programs that solve complex problems in a particular domain, typically independent of knowledge used to

direct the search for an optimal solution. Approaches include simulated annealing, genetic algorithms, neural networks.

CSCI 8990. Research Seminar. 1 hour.
Prerequisite: Permission of department.
Weekly research seminar. Students must attend and give at least one presentation at the seminar.

CSCI 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CSCI 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Drama and Theatre

Farley Richmond, *Head*
Franklin J. Hildy, *Graduate Coordinator, 542-2836*
(Fine Arts Building)

Graduate work in drama and theatre is offered in the areas of history and theory of theatre and the dramatic arts for the PhD degree and in the creative and technical aspects of stage, film, TV, and digital media for the MFA degree. Facilities include four theatres, video production and editing areas, and an exceptional computer animation/CAD laboratory. Extensive library facilities and cooperative research arrangements with cognate departments are available.

Prospective students who desire financial aid should complete their application with the Department of Drama and Theatre before February 15.

DRAM 4000/6000. Dramatic Writing I. 3 hours.
Prerequisite: DRAM 3020.
Planning, writing, and polishing the short script for performance.

DRAM 4250/6250. History of Cinema I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: DRAM 2120.
The development of the international film and of film theories from 1895 to 1945, with emphasis on cinema as a dramatic medium.

DRAM 4260/6260. History of Cinema II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: DRAM 2120.
The development of international film and film theories from 1945 to the present, with emphasis on cinema as a dramatic medium.

(DRAM)TXMI 4270/6270. History of Costume: Antiquity to Nineteenth Century. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationships of costume and social, cultural, political, and economic environments from antiquity to the nineteenth century.

DRAM 4280/6280. Women in Performance. 3 hours.
Women's contributions to the performing arts, focusing on contemporary American artists in such fields as theatre, film, dance, performance art, and other contemporary performance genres.

DRAM 4330/6330. Shakespeare. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3500 or permission of department.
Performance of Shakespeare's plays.

DRAM 4400/6400. Asian Theatre and Drama. 3 hours.
Genres of performance in India, China, Japan, and Southeast Asia. Focus on social and cultural significance of performances, including examples of Noh, Kabuki, Beijing Opera, Kathakali, Kutiyattam, Wayang Kulit, and Topeng.

DRAM 4460/6460. History of Dramatic Art in Italy. 3 hours.
Dramatic art in Italy and England from the Greek colonists to the present. Special emphasis on field trips to archaeological sites and special museums. Visits to contemporary performances. Non-Traditional Format: Must be registered in the Studies Abroad program and participate on-site.

DRAM 4480/6480. History of African American Drama and Theatre. 3 hours.
The emergence of a distinct and conscious African American theatre in the United States.

(DRAM)AFAM 4490/6490. African American Women in Cinema: Image and Aesthetics. 3 hours.
Prerequisite: Permission of department.
Selected films by and about African and African American women. A historical/critical overview of the presentation of these women in cinema with emphasis on contemporary African and African American women film makers.

DRAM 4800/6800. Topics in History. 3 hours. Repeatable for maximum 6 hours credit.
Topical issues in theatre or cinema, combining history and critical analysis of specific significant topics (e.g., national theatre or cinema, animation, authorship, genre).

DRAM 5110/7110. Stage Management. 3 hours.
Prerequisite: Permission of department.
A survey of the organization and practical application and execution of performance events.

DRAM 5310/7310. Technical Problems. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3340.
Special topics in advanced theory and techniques of performance technology, including scenery construction and rigging, costume construction, lighting technology, and sound.

DRAM 5320/7320. Computer-Aided Design for the Performance Arts. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300 and permission of department.
Techniques of computer-aided design and drafting in the performing arts.

DRAM 5330/7330. Costume Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300.
Costume design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5340/7340. History of Costume and Decor. 3 hours.
Prerequisite: DRAM 3300.
The styles of costuming, architecture, furnishing, and ornamentation in significant theatrical periods.

DRAM 5351/7351. Scenic Design for the Performance Arts. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: DRAM 3300.
Prerequisite or corequisite: DRAM 3300.
Scenic design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5352/7352. Lighting Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300.
Lighting design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5380/7380. Design Technology for the Performance Arts. 3 hours.
Prerequisite: DRAM 3300.
Basic technology for performance production. Costume materials and construction, scenery rigging and movement, lighting equipment and technology, and sound equipment and practices.

DRAM 5610/7610. Play Direction Laboratory. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5600.
The director's analysis of the script, the actor-director relationship, and theatrical style. Each student directs a one-act play or short film.

DRAM 5620/7620. Dramatic Writing II. 3 hours.
Prerequisite: DRAM 4000/6000.
Developing the full length script for performance.

DRAM 5630/7630. Producing the New Script. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Critical and practical work in producing new scripts for writers, actors, directors, and designers.

DRAM 5640/7640. Directing for the Cinema. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5600 or permission of department.
Theories and techniques of the dramatic cinema.

DRAM 5730/7730. Advanced Costume Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5330/7330.
Projects in costume design for the performing arts, emphasizing multi-character and highly complex designs using traditional and complex methods and technologies.

DRAM 5751/7751. Advanced Scenic Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5351/7351.
Advanced scenic design for the performing arts, emphasizing multi-character and highly complex designs using traditional and complex methods and technologies.

DRAM 5752/7752. Advanced Lighting Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5352/7352.
Projects in design (scenery, costume, lighting, sound) with an emphasis on multi-character, multi-setting and highly complex designs using current and advanced methods and technologies.

DRAM 5810/7810. Computer Animation for Dramatic Media I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300 and permission of department.
Computer animation in television, film, and theatre from the perspective of the director/animator. The hardware and software necessary to create computer animation is accompanied by the principles of kinetics and narrative story-telling in a visual medium.

DRAM 5820/7820. Computer Animation for Dramatic Media II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5810/7810 or permission of department.
Advanced computer animation techniques and digital compositing which integrate live action with computer generated environments.

DRAM 5830/7830. Computer Animation for Dramatic Media III. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5820/7820 or permission of department.
Preparation of a portfolio-quality computer animation project, including a narrative script story book, preproduction meetings, schedules and budgets, production and post-production.

DRAM 5860/7860. Interactive Multimedia as a Dramatic Medium. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Practice and theory of interactive multimedia as a dramatic medium. Multimedia hardware and software, principles of interactive design, and comparison of development tools and delivery systems including CD-ROM and the World Wide Web.

DRAM 5870/7870. Interactive Multimedia and Live Performance. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The use of computers to trigger and manipulate media events, including sound, lighting, digital images and video, and techniques allowing performers and spectators to interact with such media events in real time. Topics include sensors, motion capture, MIDI, and theoretical issues concerning the interaction between live performance and media.

DRAM 6100. Introduction to Critical Methods. 3 hours.
The nature of rigorous scholarship in the dramatic arts and the variety of current critical perspectives and methods.

DRAM 6200. Theatre History I. 3 hours.
Historiography, criticism, and theory of theatre from its beginnings to ca. 1800.

DRAM 6210. Theatre History II. 3 hours.
Historiography, criticism, and theory of theatre from ca. 1800 to the present.

DRAM 6290. Dramatic Analysis and Criticism. 3 hours.
Dramatic art applied to script analysis and performance criticism. Course may be taken through UGA Studies Abroad program in Parma.

DRAM 6510. Introduction to Graduate Studies in Drama. 1 hour.
Prerequisite: Permission of department.
Resources and methods for graduate level research in theatre and dramatic media.

DRAM 7050. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Individually assigned production and/or performance crew. Open only to drama majors.

DRAM 7060. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Individually assigned production and/or performance crew. Open only to drama majors.

DRAM 7070. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Individually assigned production and/or performance crew. Open only to drama majors.

DRAM 7210. MFA Project. 3 hours.
MFA thesis project. Non-Traditional Format: Independent research and thesis preparation.

DRAM 7370. Design Studio. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Methods of rendering designs, painting scenery, creating working drawings and models of scenery, costumes and lights for stage, film, and television.

DRAM 7511. Actor Training I: The Physical Actor I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Physical techniques for the actor.

DRAM 7512. Actor Training I: The Physical Actor II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 7511 and permission of department.
Physical techniques for the actor in dealing with the differing demands of stage, film, and electronic media.

DRAM 7521. Actor Training II: Voice for the Actor I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Voice techniques for the actor.

DRAM 7522. Actor Training II: Voice for the Actor II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 7521 and permission of department.
Voice techniques for the actor in relation to the needs of stage, film, and electronic media.

DRAM 7540. Characterization for the Actor. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: (DRAM 7512 or DRAM 7521) and permission of department.
Role analysis and the problems and techniques of creating subtext with special relation to text and improvisation.

DRAM 7550. Acting in Period Styles. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 7522 and permission of department.
Problems and techniques of acting in periods and styles through intensive scene study and performance.

DRAM 7560. Projects in Drama. 3 hours. Repeatable for maximum 6 hours credit. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Advanced projects in dramatic performance.

DRAM 7570. Acting for the Camera. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: (DRAM 7522 or DRAM 7540) and permission of department.
Applying theatre acting techniques to the demands of modern media. Practical work in class with emphasis on the vocal and physical demands of dramatic material designed for television and cinema.

DRAM 7580. Performance Topics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Selected performance topics and theories.

DRAM 7590. Realism in Performance. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Performance techniques and challenges in realistic drama.

DRAM 7970. Design Portfolio. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: Two of the following: DRAM 5730/7730 or DRAM 5751/7751 or DRAM 5752/7752.
Independent projects in scenery, costume, or lighting design, aimed at fully developing a presentation portfolio.

DRAM 8030. Seminar in Dramatic Writing. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Dramatic form and style concentrating on specific problems and writers.

DRAM 8200. Seminar in History of the Performance Arts. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems in the study of stage, cinema, and media history.

DRAM 8300. Seminar in Design for the Performance Arts. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Problems in visual design for the performing arts.

DRAM 8400. Seminar in Dramatic Theory and Criticism. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems in the study of dramatic theory and criticism for stage, cinema, and media.

DRAM 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree, under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

DRAM 9010. Research Seminar and Special Problems in the Performance Arts I. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Individually directed study under faculty supervision on research problems in drama, theatre, and media. Non-Traditional Format: Independent research under the direction of a faculty member.

DRAM 9020. Research Seminar and Special Problems in the Performance Arts II. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Individually directed study under faculty supervision on research problems in drama, theatre, and media. Non-Traditional Format: Independent research under the direction of a faculty member.

DRAM 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Ecology

C. Ronald Carroll, *Director*
William K. Fitt, *Graduate Coordinator, 542-3404*
(Ecology Building)

For more than thirty years, the Institute of Ecology has been a center for interdisciplinary team research which deals holistically with humans and the environment. Recently the School of Ecology was formed, and all degrees are now offered through this academic unit.

The PhD degree allows students to develop a broad background in ecology and related disciplines. All requirements for admission are the same as for the Graduate School with the exception of the GRE score. The minimum required GRE score for admission for the PhD degree is 1100. As part of the curriculum, students must take ECOL 8000, Topics in Modern Ecology, but the remainder of the program of study is designed to fit the individual needs of the student. Facilities of the Institute of Ecology, and at off-campus facilities such as the Savannah River Ecology Laboratory, the Joseph Jones Ecological Research Center, the Coweeta Hydrologic Laboratory, the University of Georgia Marine Institute, and elsewhere, provide students un-

usual opportunities for ecological training. The program has attracted outstanding students and produced exceptionally talented ecological scientists, many of whom are now leaders in the field.

A MS degree program in ecology was recently approved by the Board of Regents. It is focused on training in the natural environment, as well as the integration of natural and socioeconomic systems. Students address specially selected research topics which are amenable to a two-year training activity. These topics require that they learn research design and encourage the use of special skills, monitoring techniques, analysis, and interpretation of ecological/environmental data. Graduate students set their results into the context of ecological and human ecology.

Another degree offered is the MS in conservation ecology and sustainable development. This is an integrative training program which provides field experience and teaches skills and conceptual approaches that are essential to successful efforts in conservation and environmentally sustainable development. The principal components of the training program include: core courses to provide breadth in conceptual approaches; program flexibility to allow students the opportunity to emphasize social-economic aspects or natural science aspects without sacrificing either; active involvement in a seminar series that stresses multi-disciplinary efforts and collaboration on projects; and opportunities for field experience in addressing environmental problems. We expect that graduates of this program will be competitive for mid-level management positions in public and private stewardship organizations such as the National Park Service or the Nature Conservancy. The master's degree option also provides a sound interdisciplinary base for pursuing a more specialized doctoral program.

A certificate in Conservation Ecology and Sustainable Development is also offered. Students enrolled in other graduate programs at the University of Georgia are eligible to apply. This option is designed to meet the needs of professionals in such fields as law, forestry, and engineering who may wish to develop an environmental specialization in their professional field. This option includes the coursework that is available in the master's degree program but does not require fieldwork or research.

For a description of the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin entitled, "General Degrees: Interdisciplinary Program."

ECOL 4000/6000-4000L/6000L. Organismal, Population, and Community Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L.
The evolution, physiology, and diversity of organisms; the birth, death, and movement of organisms, with particular reference to population dynamics; the forces that structure communities of plants and animals.

ECOL 4010/6010-4010L/6010L. Ecosystem Ecology. 4 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L and STAT 4210 and senior standing.
Ecosystem structure and function with emphasis on energetic and biogeochemical processes in natural and managed ecosystems. Methodology of ecosystem analysis, including field, laboratory, and computer techniques. Non-Traditional Format: Weekend field trips.

ECOL 4020/6020-4020L/6020L. Field Systems Ecology. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L.
Ecology, field biology, and dynamic processes of terrestrial and aquatic ecosystems integrated by empirical monitoring and systems modeling within a campus watershed. Field trips to the Smoky Mountains and Georgia coast will extend the principles to a regional geographic scale. Non-Traditional Format: The projects will be conducted on an unscheduled basis, requiring open access to laboratory and computer facilities.

ECOL 4030/6030-4030L/6030L. Mammalogy. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L or permission of department.
Taxonomy, distribution, ecology, and evolution of mammals.

ECOL 4040/6040-4040L/6040L. Herpetology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Evolution, ecology, behavior, structure, and physiology of amphibians and reptiles.

ECOL 4050/6050-4050L/6050L. Ichthyology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L.
Taxonomy, distribution, ecology, evolution, and conservation of the marine and freshwater fishes.

ECOL 4060/6060-4060L/6060L. Ornithology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.
Identification, classification, life histories, evolution, and behavior of birds, with an emphasis on Georgia species.

ECOL 4070/6070-4070L/6070L. Invertebrate Zoology. 4 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.
Functional morphology, taxonomy, phylogeny, and general biology of invertebrates.

ECOL 4110/6110. Insect Diversity. 4 hours. 1 hour lecture and 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The biodiversity of tropical and temperate insects, including theoretical issues, natural history, and methods for study.

ECOL(EETH) 4200/6200-4200L/6200L. Ecological Concepts. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
A general ecology course for non-science majors, which is a core course for the environmental ethics certificate. Based on lectures, readings, and laboratories. The course is designed to examine ecological phenomena from global patterns to individual interactions.

(ECOL)ANTH 4210/6210. Zooarchaeology. 3 hours.
Prerequisite: ANTH 1102 or BIOL 1104-1104L or BIOL 1108-1108L or permission of major.
Animal remains recovered from archaeological sites, studied in light of zoological and archaeological methods and theories and interpreted in terms of human and animal behavior.

ECOL 4240/6240-4240L/6240L. Physiological Ecology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.
Physiological responses of organisms to environmental factors.

(ECOL)ANTH 4290/6290. Environmental Archaeology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of major.
Prehistoric and historic human subsistence patterns through the methods and techniques of zooarchaeology, paleobotany, and paleonutrition. Theories of environmental reconstruction.

ECOL(FORS) 4310/6310-4310L/6310L. Limnology. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or FORS 3300.
Aquatic ecosystems (lakes and streams) and their biota. Linkages between terrestrial and aquatic ecosystems.

ECOL 6080. Principles of Conservation Ecology and Sustainable Development I. 4 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or permission of department.
Ecological principles applied to conservation of habitats and biodiversity. Influence of human activity on population dynamics, genetics, and community structure.

ECOL(FORS)(ANTH) 6140. Principles of Conservation Ecology and Sustainable Development II. 3 hours.
Prerequisite: ECOL 6080.
Social science dimensions of conservation and sustainable development; social, economic, and political considerations in managing natural resources; policy-level aspects to project implementation.

ECOL(CRSS) 6650-6650L. Soil Biology and Ecology. 4 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or CRSS 4590/6590-4590L/6590L or CRSS(MIBO) 4610/6610-4610L/6610L.
Organisms in the soil environment, with emphasis on macrobiota and their functional roles in food webs and ecosystem processes.

ECOL 7000. Master's Research. 1-15 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ECOL 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ECOL 8000. Topics in Modern Ecology. 3 hours.
Prerequisite: Permission of department.
Research topics in modern ecology presented by faculty of ecology, with emphasis on research grants and proposal writing.

ECOL(ANTH) 8110. Tropical Ecological and Cultural Systems. 2 hours.
Prerequisite: ECOL(FORS)(ANTH) 6140.
Characteristics of tropical ecosystems, tropical biological communities, and human cultures in the tropics; how they differ from those in the temperate zone, and the implications for conservation and development.

ECOL(BTNY) 8120-8120L. Plant Reproductive Ecology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Pollination ecology, breeding systems, patterns of gene flow via pollen and seed dispersal, flower arrangement and phenology, and implications of re-

productive biology for demography. Group and individual laboratory projects.

ECOL(ENTO)(BIOL) 8150. Wetland Ecology. 3 hours.
Prerequisite: Permission of department.
Principles of ecology, elemental cycling, hydrology, policy and management of marine and freshwater wetlands.

ECOL(ENTO)(BTNY) 8150L. Wetland Ecology Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Prerequisite: ECOL(ENTO)(BTNY) 8150 or permission of department.
Techniques for the study of marine and freshwater wetlands. Optional weekend field trips will explore distant wetland sites.

ECOL 8170. Natural History of the Hymenoptera. 4 hours. 1 hour lecture and 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Natural history of the Hymenoptera, including evolution, ecology, and systematics. Identification of taxa of Hymenoptera and methods used in their study.

ECOL 8220. Stream Ecology. 2 hours. Repeatable for maximum 8 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Current topics and literature from the standpoints of objectives, experimental design, data analyses, results, assessment of results, and significance to general stream ecology.

ECOL 8230. Lake Ecology. 2 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Current topics and literature in the ecology of lakes, ponds, reservoirs, and wetlands.

ECOL 8300. Behavioral Ecology. 3 hours.
Prerequisite: Permission of department.
Ecological variation, natural selection, and other evolutionary processes; sexual selection and sexual conflict, mating systems, sex allocation, the causes and consequences of sexual behavior, evolution of sex, parental care, cooperation, competition, and punishment.

ECOL(BTNY)(FORS) 8310. Population Ecology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and permission of department.
Advanced ecological theory to biological populations. Mathematical and evolutionary treatment of population growth and regulation, niche theory, foraging theory, predator-prey theory, habitat selection, and competition.

ECOL 8400. Perspectives on Conservation Ecology and Sustainable Development. 1 hour.
Ecological issues of conservation and development.

(ECOL)BTNY(FORS) 8410. Community Ecology. 4 hours.
Prerequisite: ECOL 4010/6010-4010L/6010L and STAT 4220.
The applicability of advanced theory to multi-species communities. Patterns and processes that influence species composition, diversity, and function. Topics include deterministic vs. stochastic regulation, succession, resource partitioning, patch dynamics, island biogeography, and food webs.

ECOL 8420. Watershed Conservation. 2 hours.
Prerequisite: BIOL 1108-1108L and permission of department.
Environmental problems in freshwater systems over a variety of scales (local to global) from a conservation perspective. Systems examined include streams, rivers, lakes, wetlands, groundwater and coastal waters, with a strong focus on effective incorporation of ecological knowledge into resource management efforts.

ECOL 8440. Principles of Agroforestry/Agroecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or ECOL 4010/6010-4010L/6010L or permission of department.
Agricultural intercropping, mixed forestry plantation practices, and sustainable resource use.

ECOL 8500. Theoretical Ecology. 2 hours. Repeatable for maximum 8 hours credit. 1 lab period of 2 hours each per week.
Theoretical literature in population, community, and ecosystem ecology.

ECOL 8580-8580L. Theory of Systems Ecology. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Theory of complex systems applied to ecology and ecosystems. Team projects will be conducted in ecological modeling and systems analysis. Non-Traditional Format: Team projects will be conducted on an unscheduled basis, requiring open access to laboratory and computer facilities.

ECOL 8600. Nuclear Tracers in Ecology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
The use of stable and radioactive tracers in ecological research. Current use of nuclear tracers for carbon, nitrogen, phosphorus, and sulfur in soil, water, and terrestrial ecosystems.

(ECOL)EHSC 8610. Aquatic Toxicology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and [EHSC 4490/6490 or PHRM(VPHY) 6910 or PHRM (VPHY)(POUL)(EHSC) 8920].
Toxicological effects of aquatic pollution focusing on fate and transport of xenobiotics; xenobiotic accumulation, dynamics, and toxicity in aquatic organisms; the analysis and modeling of the effects of aquatic pollution on organisms; and the determination of related risks to aquatic ecosystems and human populations.

ECOL(EHSC) 8630-8630L. Quantitative Ecological Toxicology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and (STAT 4220 or STAT 6220).
Principles and quantitative methods for the analysis of ecotoxicological data.

(ECOL)CRSS 8650. Nutrient Cycling Models. 3 hours.
Prerequisite: [CSCI 7010 and CRSS(MIBO) 4610/6610-4610L/6610L] or permission of department.
Structure, function, and performance of current nutrient cycling models used to simulate carbon, nitrogen, phosphorus, and sulfur transformations in the soil.

ECOL(AAEC) 8700. Environmental Policy and Management. 3 hours.
Evolution, form, and substance of United States federal policies and programs that address ecological problems, focusing on the nature of problems and alternatives for effective resolution.

ECOL 8990. Problems in Ecology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Analysis of contemporary themes in ecology. Non-Traditional Format: Variable hours established by instructor.

ECOL 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ECOL 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

English

Anne Williams, *Head*
Nelson Hilton, *Graduate Coordinator, 542-2197*
(Park Hall)

For further information regarding courses, faculty, students, admissions, language, and other requirements for the MA, MAT, and PhD degrees, as well as our annual report, handbook, and initiatives in humanities computing, rhetoric and composition, and more, please visit our web site.

The English department also participates in MA and PhD programs in linguistics. Further information for these programs appears separately under Linguistics.

E-mail address for: Graduate Coordinator: gradco@english.uga.edu; web site: www.english.uga.edu/grad.

ENGL(LING) 4000/6000. History of the English Language. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of present English through the stages of Old English, Middle English, and early Modern English. Study of elementary phonetics, phonemics, sound change, and dialect variation.

ENGL(LING) 4010/6010. American English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The history, present status, and future prospects of American English, including standards and internal variation.

ENGL(LING) 4060/6060. Old English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The language and literature of England before the Norman Conquest, with reading of selected texts.

ENGL(LING) 4110/6110. English Grammar. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English grammar in the scholarly tradition of Curme and Jespersen.

ENGL(LING) 4170/6170. Second Language Acquisition. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Linguistic theories of second language acquisition, with emphasis on the acquisition of English. Topics include order of acquisition, sociocultural factors with linguistic bases, and neurolinguistic models.

ENGL(LING) 4180/6180. ESL Error Analysis. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Psycholinguistic theory applied to problems in second language learning, and the prediction of language behavior through the use of contrastive analysis.

ENGL 4210/6210. Old English Literature. 3 hours.
Prerequisite: ENGL(LING) 4060/6060 and two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Prose and poetry of the Old English period, exclusive of Beowulf, with emphasis on poetry. Works will be read in Old English, with supplementary translations.

ENGL 4220/6220. Beowulf. 3 hours.
Prerequisite: ENGL(LING) 4060/6060 and two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The poem in the original Old English, with attention to important critical studies.

ENGL 4240/6240. Chaucer. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Canterbury Tales, Troilus and Criseyde, and minor poems.

ENGL 4300/6300. Elizabethan Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Poetry of the earlier English Renaissance, such as works by Wyatt, Surrey, Sidney, Spenser, and Marlowe, and the sonnets of Shakespeare.

ENGL 4320/6320. Shakespeare: Part I. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The early plays of Shakespeare.

ENGL 4330/6330. Shakespeare: Part II. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The later plays of Shakespeare.

ENGL 4340/6340. Renaissance Drama. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English drama from 1576 to 1642, exclusive of Shakespeare, emphasizing dramatists such as Marlowe, Jonson, Webster, and Middleton.

ENGL 4350/6350. Seventeenth-Century Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Major English poets of the period, such as Donne, Jonson, Herbert, and Marvell.

ENGL 4400/6400. Restoration and Eighteenth-Century English Drama. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Outstanding dramatists of the period: Dryden, Wycherley, Addison, Goldsmith, Sheridan, and others.

ENGL 4420/6420. Early Eighteenth-Century Prose and Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Poetry and prose of the earlier eighteenth century, emphasizing Addison, Steele, Defoe, Swift, and Pope.

ENGL 4440/6440. The Age of Johnson. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English literature of the late eighteenth century, emphasizing Johnson, Boswell, and their group.

ENGL(AFAM)(LING) 6040. Language Use in the African American Community. 3 hours.
Prerequisite: Permission of department.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

ENGL(LING) 6070. Middle English. 3 hours.
Prerequisite: ENGL(LING) 4000/6000 or ENGL (LING) 4060/6060 or permission of department.
The English language of the Middle English period, including the development of the language from the end of the Old English period through the transition to Modern English.

ENGL 6190. Study of the English Language. 3 hours.
Prerequisite: Permission of department.
The nature, structure, and varieties of the English language in vocabulary, grammar, pronunciation, and semantics.

ENGL 6250. Medieval Drama. 3 hours.
Prerequisite: Permission of department.
English drama from its beginnings to the opening of the public theater in 1576.

ENGL 6260. Middle English Literature. 3 hours.
Prerequisite: Permission of department.
English literature of the thirteenth, fourteenth, and fifteenth centuries, exclusive of Chaucer and the drama.

ENGL 6290. Topics in Medieval Literature. 3 hours.
Repeatable for maximum 6 hours credit.
Special topics in Medieval literature to 1500.

ENGL 6310. Spenser. 3 hours.
Prerequisite: Permission of department.
A study of The Faerie Queene, The Shepheardes Calender, and the Amoretti, with attention to Spenser's other works and his literary context.

ENGL 6360. Renaissance Prose. 3 hours.
Prerequisite: Permission of department.
Prose of the sixteenth and seventeenth centuries, such as works by More, Sidney, Bacon, Donne, Browne, and Bunyan.

ENGL 6370. Milton. 3 hours.
Prerequisite: Permission of department.
The works and times of John Milton.

ENGL 6430. The Eighteenth-Century English Novel. 3 hours.
Prerequisite: Permission of department.
The English novel from Defoe to 1800, including novels by Richardson, Fielding, Smollet, and Sterne, the Gothic novel, and the novel of purpose.

ENGL 6450. William Blake. 3 hours.
Prerequisite: Permission of department.
The works, times, and critical heritage of William Blake.

ENGL 6500. Early Romantic Literature. 3 hours.
Prerequisite: Permission of department.
Wordsworth, Coleridge, and other writers.

ENGL 6510. Later Romantic Literature. 3 hours.
Prerequisite: Permission of department.
Byron, Shelley, Keats, and other writers.

ENGL 6520. The Nineteenth-Century British Novel. 3-6 hours.
Prerequisite: Permission of department.
The development of the British novel in the nineteenth century.

ENGL 6530. Victorian Literature I. 3 hours.
Prerequisite: Permission of department.
Selected prose and poetry of the early nineteenth century.

ENGL 6540. Victorian Literature II. 3 hours.
Prerequisite: Permission of department.
Selected prose and poetry of the later nineteenth century.

ENGL 6600. Issues in Feminist Theory and Criticism. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Study of topics and approaches in feminist criticism.

ENGL 6640. Film as Literature. 3 hours.
Prerequisite: Permission of department.
The interpretation of films, with emphasis on the relationships between motion pictures and British and American literature.

ENGL 6650. Modern Drama. 3 hours.
Prerequisite: Permission of department.
The drama of Europe and America from the realism of Ibsen and Strindberg to the present.

ENGL 6660. Twentieth-Century British Poetry. 3 hours.
Prerequisite: Permission of department.
British poetry since the 1890's.

ENGL 6670. The Twentieth-Century British Novel. 3 hours.
Prerequisite: Permission of department.
Fiction of such representative British novelists for the twentieth century as Bowen, Conrad, Forster, Joyce, Lawrence, Waugh, Woolf, and Greene.

ENGL 6680. Modern Irish Literature. 3 hours.
Prerequisite: Permission of department.
Fiction, poetry and drama of the Irish Renaissance and after.

ENGL 6700. Imperfect Unions: American Writing to 1820. 3 hours.
Prerequisite: Permission of department.
Literature of British North America and the new United States from William Bradford through the early work of Irving and Cooper. Writers may include Rowlandson, Bradstreet, Mather, Byrd, Woolman, Jefferson, Franklin, Equiano, Paine, Bartram, and Brown.

ENGL 6710. American Writing 1820-1865. 3 hours.
Prerequisite: Permission of department.
The writing that represents the achievement of American literature in the decades before the Civil War. Writers may include Emerson, Thoreau, Poe, Hawthorne, Stowe, Douglass, Melville, Whitman, and Dickinson.

ENGL 6720. American Writing 1865-1918. 3 hours.
Prerequisite: Permission of department.
The major fiction and poetry of the period, with some attention to literary movements as well as the impact of the Civil War on American literature. Writers may include Whitman, Dickinson, James, Twain, Chesnutt, Crane, Norris, Wharton, and Chopin.

ENGL 6730. American Fiction 1918-1960. 3 hours.
Prerequisite: Permission of department.
The development of ideas and forms in American fiction from the end of World War I to 1960. Writers may include Cather, Hemingway, Faulkner, Fitzgerald, Wright, Steinbeck, Porter, and Baldwin.

ENGL 6740. American Poetry 1918-1960. 3 hours.
Prerequisite: Permission of department.
Ideas and forms in American poetry from 1918 to 1960. Among the writers to be considered may be Eliot, Pound, H.D., Stein, Stevens, Moore, Williams, and Frost.

ENGL 6750. American Writing After 1960. 3 hours.
Prerequisite: Permission of department.
The ideas and artistic expression of contemporary American prose and poetry. Writers may include Heller, Morrison, O'Brien, Kincaid, Erdrich, Lowell, Plath, Sexton, Rich, Roethke, Forche, Harjo, Howe, Ashbery, Lorde, and Perlman.

ENGL(AFAM) 6770. Topics in African American Literature. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics in African American literature, such as autobiography, the Harlem Renaissance, Gwendolyn Brooks and Richard Wright, Black American literature and aesthetics.

ENGL 6780. Southern Writing. 3 hours.
Prerequisite: Permission of department.
The literary legacy of the American South. Writers may include Byrd, Poe, Simms, Cable, Chesnutt, Glasgow, Toomer, Faulkner, Porter, Hurston, Welty, O'Conner, and Percy.

ENGL 6790. Topics in American Literature. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Themes, literary traditions, and genres in American writing.

ENGL 6800. Topics in Forms and Craft. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Topics in and issues around the act of writing. Sample courses include The Art of Translation, The Art of the Book, The Novel Form, and Publishing and Editing.

ENGL 6810. History of Literary Criticism. 3 hours.
Prerequisite: Permission of department.
Literary theory from Plato to the early modern period, examining changing concepts of genre, style, and the social function of literature.

ENGL 6820. Contemporary Literary Theory. 3 hours.
Prerequisite: Permission of department.
Major themes and movements in twentieth-century criticism.

ENGL 6830. Topics in Criticism and Theory. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
A current critical problem, school, or approach, such as structuralism, poststructuralism, feminism, psychoanalysis, Marxism, New Historicism, gay and lesbian studies, postmodernism, or cultural studies.

ENGL 6840. Folklore Studies. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
One or more folk groups, folklore genres, or topics concerning folklore.

ENGL 6850. Topics in Multicultural Literature. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics focusing on one or more cultures and exploring a variety of literary forms with some attention to historical context and theoretical aspects of multiculturalism.

ENGL 6860. History of Rhetoric and Textuality. 3 hours.
Prerequisite: Permission of department.
The rhetorical tradition from antiquity to the present, emphasizing the development of writing and textuality.

ENGL 6870. Rhetoric and Textual Practice. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
The relationship between rhetorical theory and the practice of writing, both literary and non-literary.

ENGL 6880. College Composition Theory and Pedagogy. 3 hours.
Prerequisite: Permission of department.
Current theories of writing pedagogy and strategies for teaching writing at the college level. Topics include the composing process, invention, revision, and assessment of writing.

ENGL 6890. Bibliography and Methods of Research. 3 hours.
Prerequisite: Permission of department.
Bibliographical analysis and description and the study of research materials and methods.

ENGL 6900. Practicum in Electronic Textuality. 1-3 hours.
Electronic text resources; management of department-issued individual Unix-shell account (files; file transfer; telnet; mail; newsgroups); use of various browsers on the World- Wide Web; home access; elementary text manipulation (concording); basic text and image editing; fundamentals of "markup" language (HTML, SGML).

ENGL 6910. Apprenticeship in College English. 1 hour. Repeatable for maximum 3 hours credit.
An apprenticeship in the teaching of freshman composition and of sophomore literature.

ENGL 7000. Master's Research. 3-6 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENGL 7300. Master's Thesis. 3-6 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ENGL 8100. Seminar in English Language Studies. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special topics in English linguistics.

ENGL 8200. Seminar in Medieval Topics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special topics in Medieval literature.

ENGL 8300. Seminar in Literature of the English Renaissance. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special topics in English literature from More through Milton. Topics will vary.

ENGL 8400. Seminar in Eighteenth-Century Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Swift, Pope, Johnson, Fielding, or Blake.

ENGL 8500. Seminar in English Romantic Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A major writer or special topics of the period.

ENGL 8550. Seminar in Victorian Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Tennyson, Browning, and Arnold.

ENGL 8600. Seminar in Modern Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
An author or problem in twentieth-century British or American literature.

ENGL 8700. Seminar in American Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A research course on special problems in American literature.

ENGL 8710. Major American Writers. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A detailed examination of the life and works of one or two American authors.

ENGL(AFAM) 8720. Seminar in African American Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A detailed examination of selected forms and ideas in the African American tradition.

ENGL 8750. Seminar in Southern Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Special problems in Southern literature.

ENGL 8800. Seminar in Creative Writing. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Advanced instruction in the craft of writing.

ENGL(CMLT) 8850. Seminar in Criticism and Theory. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A problem in structuralism, poststructuralism, feminism, psychoanalysis, Marxism, New Historicism, gay and lesbian studies, postmodernism, postcolonialism, or cultural studies; or of a major literary theorist.

ENGL 8900. Current Issues in Rhetorical Theory. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Study of contemporary rhetorical theory and its relation to literary criticism and English composition.

ENGL 8960. Directed Reading. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent graduate study, under faculty supervision, in special topics not available in scheduled courses. Topics must be approved by the Graduate Committee in English. Non-Traditional Format: Directed study.

ENGL 9000. Doctoral Research. 3-6 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ENGL 9300. Doctoral Dissertation. 3-6 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Environmental Ethics

Peter Hartel, *Graduate Coordinator,*
542-0898
(Plant Sciences Building)

Please see the Index for information on the certificate program in environmental ethics. The courses having an environmental ethics prefix are listed below.

EETH 4020/6020. Readings in Environmental Ethics. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Discussion of selected books and articles pertaining to environmental ethics.

EETH(AGRI) 4190/6190. Agricultural Ethics. 1 hour. 1 lab period of 2 hours each per week.
Ethical issues in agriculture. Topics include animal rights/animal welfare, agriculture as a business/agriculture as a way of life, sustainable agriculture, (bio)technology, migrant farm workers, foreign aid, world hunger, and related topics.

(EETH)ECOL 4200/6200-4200L/6200L. Ecological Concepts. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
A general ecology course for non-science majors, which is a core course for the environmental ethics

certificate. Based on lectures, readings, and laboratories. The course is designed to examine ecological phenomena from global patterns to individual interactions.

(EETH)PHIL 4220/6220. Environmental Ethics. 3 hours.
Prerequisite: PHIL 2200 or permission of department.
Major professional and nonprofessional writings in the field of environmental ethics.

(EETH)PHIL 4250/6250. Technology and Values. 3 hours.
Prerequisite: Permission of department.
Technology in its broadest human context, with emphasis on the mutual influence between means and ends and the impact of technology on shaping the beliefs and attitudes of a civilization. Includes alternative assessments of technology and illustrates with specific crucial issues of our time.

EETH(JURI) 5870/7870. Environmental Dispute Resolution. 2 hours.
Conflict management, anatomy of negotiation, planning and conduct of negotiations, and resolving multiparty environmental disputes.

EETH 6000. Environmental Ethics Seminar. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Seminars in environmental ethics. Topics range from animal rights/animal welfare to ecofeminism and deep ecology.

EETH 8010. Graduate Research. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research project under the direction of a faculty member done independently of regularly scheduled classes. Non-Traditional Format: Independent research under the direction of a faculty member.

Genetics

John F. McDonald, *Head*
Katherine R. Spindler, *Graduate Coordinator, 542-8000*
(Life Sciences Building)

The Department of Genetics offers graduate programs leading to the MS and PhD degrees. The department is particularly strong in the areas of recombinant DNA technology, gene regulation, prokaryotic molecular genetics, plant molecular biology, mammalian genetics, evolutionary genetics, and population genetics. After a student is admitted, a faculty advisory committee is appointed to recommend a program of study based on the individual student's academic background and research interests. A master's degree is not required for entrance into the doctoral program, and students without a master's degree are encouraged to enter the doctoral program directly.

Faculty members associated with three interdepartmental programs in the Division of Biological Sciences—in the RTG for Prokaryotic Diversity, in Cell and Developmental Biology and the Center for Metalloenzyme Studies—have close ties with the Department of Genetics. Graduate course offerings in these interdepartmental programs are available to students in the Department of Genetics and serve to complement the graduate course offerings in genetics.

Physical facilities available for research include all modern equipment and facilities necessary for research in the various areas of genetics. Special on-campus facilities include a DNA and protein sequence and synthesis facility, a molecular marker analysis facility, a complete electron and confocal microscopy laboratory, controlled-environment equipment, equipment for radioisotope studies, a special fermentation facility, a monoclonal antibody production facility, and extensive computer facilities. Cooperative arrangements for joint research exist with such off-campus facilities as the Russell Agricultural Research Center, the Yerkes Primate Center, the Sapelo Island Marine Institute, the Savannah River Ecology Laboratory, and the Oak Ridge National Laboratory.

Prospective students should address inquiries to the Graduate Coordinator, Department of Genetics. E-mail: spindler@arches.uga.edu. Our World Wide Web address is: http://www.genetics.uga.edu. Graduate students in the department are eligible for a number of University fellowships and research and teaching assistantships. Applicants for the doctoral program will also be considered for traineeships provided by a Public Health Service Institutional National Research Service Award. The deadline for application for most fellowships and assistantships is January 1, and students are normally only admitted at the beginning of the fall semester.

GENE(BIOL) 4200/6200. Advanced Genetics. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Prokaryotic, fungal, and mammalian genetic systems which form the basis of our understanding of molecular genetics. Techniques used in the analysis of the structure and function of viral and eukaryotic genomes.

GENE(BIOL) 4600/6600. Evolutionary Biology. 3 hours.
Prerequisite: BIOL 1108-1108L.
An introduction to the processes of evolution. Topics include population genetics, speciation, systematics, coevolution, chemical origin of life, history of life, geological record, and evolution of humans.

GENE 7000. Master's Research. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GENE 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

GENE 8070. Research Seminar in Population, Evolutionary, and Molecular Genetics. 1-3 hours. Repeatable for maximum 12 hours credit.
Seminar focused on current research in population, evolutionary, and molecular genetics.

GENE 8080. Current Literature In Population, Evolutionary, and Molecular Genetics. 1-3 hours. Repeatable for maximum 10 hours credit.
Journal Club examining the current literature on selected topics in population, evolutionary, and molecular genetics.

GENE 8090. Statistical Analysis of Genetic Data. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (STAT 4220 or STAT 6220) and STAT 4510/6510.
Common statistical and genetic models approximate for analyzing genetic data, especially DNA sequence data. Emphasis on fitting models, estimating parameters, and making inferences based upon genetic data.

GENE 8120. Modeling Techniques in Population Genetics. 4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: GENE(BIOL) 4600/6600 and MATH 2210 and MATH 2210L.
Quantitative techniques used in modeling evolutionary processes such as natural selection, gene flow, mutation, and random genetic drift.

GENE 8130. Evolutionary Genetics. 4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: (MATH 2210 and MATH 2210L) or permission of department.
Genetic processes in evolution that integrates elementary conceptual models with the literature on experimental and field studies. Major topics include basic population genetics, an introduction to quantitative genetics, and a consideration of speciation and macroevolution.

GENE 8500. Research Methods in Population Biology. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Methods of data analysis and modeling techniques used in Genetics research.

GENE 8600. Genetics Seminar. 1 hour. Repeatable for maximum 4 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Seminars emphasizing advances in genetics, molecular genetics, and molecular biology.

GENE 8650. Responsible Science. 1 hour.
Prerequisite: Permission of department.
Ethical issues in genetics, how scientists work, social mechanisms in science, scientific misconduct, conflicts of interest, and other issues related to ensuring integrity of the research process.

GENE 8700. Seminar in Population Genetics. 1 hour. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Evaluation of current research literature in population genetics. Non-Traditional Format: Students will meet with faculty members on a regular basis.

GENE 8830. Advanced Topics in Molecular Genetics. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: BCMB 8020 or GENE 8930 or permission of department.
Genetic regulatory mechanisms, extrachromosomal genetics, molecular aspects of recombination mechanisms, ribosome synthesis and control, plasmic genetics, and cytogenetics.

GENE 8840. Advanced Topics in Population Genetics. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Advanced aspects of ecological and population genetics.

GENE 8900. Research Techniques in Genetics. 3 hours. Repeatable for maximum 6 hours credit. 5 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Techniques employed in genetics research taught by student participation in the research projects of Genetics faculty. Non-Traditional Format: Students will meet with faculty members on a regular basis.

GENE 8910. DNA Modeling. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
The building of space filling models to help students understand the structure/function relationships of RNA and DNA. Computer modeling approaches will also be taught.

GENE 8920. Nucleic Acids. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: BCMB 8020 or permission of department.
Structure and function of nucleic acids. The isolation, structure, chemical analysis, hybridization, enzymol-

ogy, and replication of DNA and RNA, nucleic acids enzymes, protein-nucleic acid interactions and recombinant DNA technology.

GENE 8930. Advanced Molecular Genetics. 3 hours.
Prerequisite: BCMB 8010 or GENE 8920.
The molecular mechanisms of gene action in procaryotes and eucaryotes, including discussions of chromosome structure and replication, mutagenesis and DNA repair, recombination mechanisms, transposition, transcriptions, and translation controls.

GENE 8950. Molecular Evolution. 3 hours.
Prerequisite: GENE 4200/6200 or permission of department.
The facts and theories of molecular evolution. Topics include protein evolution, evolution of development, evolution of genome structure, and critical evaluation of contemporary evolutionary theories.

(GENE)BTNY(PATH)(BCMB) 8960. Fungal Genetics. 3 hours.
Prerequisite: Permission of department.
The genetics of the fungi emphasizing classical and modern molecular approaches.

GENE 8970. Metazoan Genetics. 2-3 hours.
Prerequisite: GENE 8930 or permission of department.
Genetic analysis of multicellular animals. Topics include classical and modern genome mapping strategies, regulation of development of complex organ systems, viral genetics, and immunogenetics.

GENE 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GENE 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Geography

George A. Brook, *Head*
Thomas W. Hodler, *Graduate Coordinator*
542-2327
(GG Building)

The Department of Geography offers master's and doctoral degrees with specialization in physical and human geography and in geographic information science (GIS). The department's strengths are in biogeography, geomorphology, quaternary studies, geoarchaeology, and climatology; urban, economic, transportation, and social and development geography; and cartography, photogrammetry, remote sensing, and GIS. The department has strong ties with the Institute of Ecology; the Center for Archaeological Sciences; the Marine Sciences, Asian Studies, Women's Studies and African Studies programs; the Humanities Center; the Institute of Government; the Terry College of Business; and the Institute for Behavioral Research. As a member of the Inter-University Consortium for Political and Social Research, the University supports a host of resources and services for social science research. Housed in the Department of Geography is the Center for Remote Sensing and Mapping Science (CRMS). CRMS undertakes interdisciplinary research projects requiring the development of image and map data and processing technologies for applications in the physical, biological, and mapping sciences. The faculty hail from six different countries and so have diverse backgrounds and interests which enrich the graduate programs. There are more than sixty graduate students from the USA and overseas in residence. The MA degree requires 7 core hours and 18 elective hours. For the PhD, the department requires a minimum of 30 credit hours (including 4 core hours if not already taken in the MA program) and a reading knowledge of one foreign language or two technique courses.

Geography has excellent teaching and research facilities in a building shared with the Department of Geology. The two departments jointly operate a Geosciences Learning Center with 25 computers used for graduate computer-aided instruction. The Geomorphology Laboratory, primarily designed for standard wet-chemical and mechanical analyses of soil, sediment, and plant materials, includes a separate work area with PCS, balances, and microscopes. The Plant Microfossil Laboratory is designed principally for the extraction of pollen grains from sediments and includes a separate microscope facility. The Tree-ring Laboratory has a fully automated stage and computer-controlled microscope imaging system for measuring and analyzing tree cores. The Climatology Research Laboratory includes four workstations, one receiving a feed of real-time weather data, and software packages for climatological analysis. A variety of microclimatological instrumentation is also available for student use. In addition to a word processing facility, the department maintains separate laboratories for introductory GIS and cartography; advanced GIS,

remote sensing and photogrammetry; and spatial analysis and economic geography. Each laboratory is equipped with state-of-the-art computers, both PCS and workstations, on a local area network with digitizers, scanners, printers, and plotters with current software in all areas. CRMS also maintains a complex computer network and extensive software for remote sensing, GIS and photogrammetric applications. All students have internet access and electronic mail.

The University's library holdings, particularly in geography, are extensive. Approximately 290,000 sheet maps and over 180,000 aerial photos are maintained in the nearby Science Library. The Computer Center operates one of the largest facilities in the U.S. There are numerous remote sites on campus with interactive terminals, remote printers, and various mini and microcomputer facilities.

For further information, our e-mail address is gradcoordinator@ggy.uga.edu.

GEOG 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GEOG 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

GEOG 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GEOG 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Human and Regional Geography

GEOG 4610/6610. Location Analysis. 3 hours.
Prerequisite: GEOG 3620.
The geography of retail activity and consumer demand. Principles of locational decision-making for retail and service firms.

GEOG 4620/6620. Advanced Economic Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 3620.
Advanced theoretical and empirical issues in economic geography, such as impacts of globalization, regional development, trade patterns, and labor issues. Topics will vary.

GEOG 4630/6630. Advanced Urban Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 3630.
Urban growth and approaches to urban analysis. Urbanization processes within urban systems, including economic, demographic, social, and technological change.

GEOG 4640/6640. Population Geography. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
The distribution of world population and an introduction to population data and to basic demographic techniques. Topics include theories of population change, fertility, mortality, migration, population policy, and population-environment relationships.

GEOG 4650/6650. Industrial Geography. 3 hours.
Prerequisite: GEOG 3620.
The regional basis of economic growth and industry case studies. The impact of product and process innovation, entrepreneurship, globalization, and the service economy on the spatial distribution of industry.

GEOG 4660/6660. Urban and Regional Development. 3 hours.
Prerequisite: GEOG 3620.
Regional development and the implications of globalization to regional economies of the industrialized countries. Discussions on the changing dynamics of international competition and the reorganization of production. Contemporary trends in regional economic development policy, including high technology and service-sector development.

GEOG 4670/6670. Geography of Development. 3 hours.
Prerequisite: GEOG 3620.
Geographical aspects of Third World development, including population growth, migration, industrialization, trade, and foreign aid. The spatial characteristics of economic development are viewed at the conceptual level and implications for policy discussed.

GEOG 4680/6680. Gender and Geography. 3 hours.
Prerequisite: GEOG 1101-1101D or WMST 1110-1110D.
Relationships between gender and globalization. Women and development, industrialization, and third world regions.

GEOG 4710/6710. Geography of Sub-Saharan Africa. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
Geographic and socio-economic issues that face sub-Saharan economies into the twenty-first century. Emphasis on the physical landscape, environmental

conditions, social and cultural distributions, and strategies and theories of economic development.

GEOG 4720/6720. Geography of Latin America. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
The geography of Latin America, including physical, cultural, and economic characteristics of different regions. Prospects for expansion of settlement, development of resources, and growth of industries.

GEOG 4730/6730. Geography of China. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630 or permission of department.
The physical and human geography of contemporary China. Emphasis is on modernization and development of agriculture, industry, and transportation within the context of China's resource base and large population.

GEOG 4740/6740. Geography of East and Southeast Asia. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
The physical and human geography of East and Southeast Asia. Major focus on resources, land utilization, population characteristics and distributions as they relate to economic and political problems. Emphasis is on Japan, Korea, Indonesia, Philippines, and Indo-China.

GEOG 8620. Seminar in Economic Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 4620/6620.
Empirical and theoretical issues in contemporary economic geography. Specific topics vary.

GEOG 8630. Seminar in Urban Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 4630/6630.
Topics and research problems in urban geography. Topics may vary.

GEOG 8640. Seminar in Advanced Demographic Analysis. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 4640/6640.
Problems, methods, and techniques in demographic analysis; construction and interpretation of life tables; population estimation and projection; cohort analysis, migration, and household demography. Emphasis is on application of these techniques to geographical analysis of population dynamics.

GEOG 8660. Seminar in Regional Development. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 4660/6660.
Topics on regional development and effects of globalization on regional economies of industrialized countries. Specific topics may vary.

GEOG 8670. Seminar in the Geography of Development. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 4670/6670.
Research topics related to the geographical aspects of Third World development. Topics may vary.

GEOG 8690. Directed Problems in Human Geography. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems in advanced topics in human geography. Topics may vary. Non-Traditional Format: Classroom hours are by arrangement with the relevant faculty member and vary depending on credit hours.

GEOG 8710. Seminar in Regional Geography. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research topics on the geography of a selected region; data sources and methodologies for research. Regions may vary.

GEOG 8810. Seminar in Human-Environment Relationships. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems, methods, and techniques in human-environment relationships and economic development, including decision-making strategies in resource exploitation.

GEOG 8900. Proseminar in Geography. 1 hour.
Prerequisite: Permission of department.
Introduction to the graduate program and the departmental faculty, including major foci of research activities and directions within the department.

GEOG 8910. Seminar in Geographic Thought and Methods. 3 hours.
Development of geographical philosophy and methods; contemporary methodological concepts and problems. Required for all graduate majors.

GEOG 8920. Seminar in Social Theory in Geography. 3 hours. Repeatable for maximum 6 hours credit.
Contemporary debates concerning space and society. Epistemological and ontological debates within geography relating to the spatial constitution of society and the social production of geographical knowledge.

Physical Geography

GEOG 4020/6020. Fluvial Geomorphology. 3 hours.
Prerequisite: GEOG 3010.
Landforming effects of surface-water movement with emphasis on surface-water hydrology, streamflow mechanics, floods, sediment transport and storage, and landform evolution. Field trips included.

GEOG 4030/6030. Geomorphology and Environmental Change in Karst and Arid Environments. 3 hours.
Prerequisite: GEOG 3010 or (GEOG 1113 and GEOG 1113L) or GEOL 1250-1250D.
Weathering, erosional and depositional processes, and landforms in karst and arid areas. Formation of sinkholes, sinking streams, caves, springs, sand dunes, playas, and yardangs. Geoarchaeological and other evidence on the nature of past environments, including

dating cave and aeolian sediments. Field trips included.

GEOG 4040/6040. Global Environmental Change During the Quaternary. 3 hours.
Prerequisite: GEOG 3010.
Chronology and geomorphic, isotopic, and palynological evidence of Quaternary paleoclimates. The effects of past climatic changes upon present landscapes, historic short-term fluctuations in temperature and precipitation, and possible explanations for climatic change are emphasized.

GEOG 4120/6120. Synoptic Meteorology/Climatology. 3 hours.
Prerequisite: GEOG 3110.
Theory and observations to understand mid-latitude weather systems. Focus is on application of quasi-geostrophic theory in weather forecasting. Analysis and interpretation of weather maps and numerical models will be used to examine atmospheric dynamics and thermodynamics.

GEOG 4140/6140. Satellite Climatology. 3 hours.
Prerequisite: (GEOG 1111 and GEOG 1111L) or (GEOG 1112 and GEOG 1112L) or (GEOG 2110H and GEOG 2110L).
Satellite remote sensing in climatology, including climatologies of clouds, atmospheric water vapor and precipitation, the Earth's radiation budget, sea and land surface temperatures, and the cryosphere and vegetation.

GEOG 4160/6160. Applied Climatology. 3 hours.
Prerequisite: GEOG 3110.
The interaction of climate with organisms, communities, and ecosystems. Mechanisms of heat flow, radiation exchanges and water vapor flux; statistical methods used with climatic data; bioclimatic methods used to improve environmental impact assessment; and case studies that demonstrate the role of climate in ecosystem function.

GEOG(BTNY) 4220/6220. Ecological Biogeography. 3 hours.
Prerequisite: GEOG 3210 or ECOL(BIOL) 3500-3500L.
Patterns of plant distribution in contemporary landscapes and underlying processes, including vegetation dynamics, disturbance ecology, biogeomorphology, dendrochronology, and environmental history.

GEOG(BTNY) 4240/6240. Plant Geography. 3 hours.
Prerequisite: BIOL 1104-1104L and (GEOG 1112 and GEOG 1112L) and [GEOG 3210 or ECOL(BIOL) 3500-3500L].
Phytogeographical zonation, plant-geographic processes, and current potential natural vegetation. Includes physical and environmental factors, plant-environment relationships, plant roles and types, vegetation dynamics, geographic responses to disturbance, and vegetation of main world biomes. Emphasis on global-scale patterns and relationships.

GEOG 4810/6810. Conservation Ecology and Resource Management. 3 hours.
Prerequisite: GEOG 1125-1125D.
Ecological and economic analysis of human use of global and regional resources, emphasizing ecological requirements, sustainable use, and holistic decision-making. Topics include ecosystem dynamics, functional biodiversity, landscape management, socioeconomic traps, global change, and ecological restoration.

GEOG 8020. Seminar in Geomorphology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GEOG 4020/6020 or GEOG 4030/6030.
Advanced problems in geomorphology and physiography. Topics may vary.

GEOG 8040. Seminar in Quaternary Paleoenvironments. 3 hours.
Prerequisite: GEOG 4040/6040.
Methods used in reconstructing the hydrological and vegetation characteristics of former environments. Emphasis is on the analysis of cave, fluvial, and marine sediments. The changing Quaternary environments of North America, Europe, and Africa are discussed in detail. Specific topics may vary.

GEOG 8120. Seminar in Climatology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GEOG 4120/6120 or GEOG 4140/6140 or GEOG 4160/6160.
Advanced topics in physical climatology such as climate change, microclimatology, urban climatology or synoptic climatology. Specific topics may vary.

GEOG 8220. Seminar in Biogeography. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GEOG(BTNY) 4220/6220 or GEOG 4240/6240.
Advanced topics and research trends in biogeography. Specific topics may vary.

GEOG 8240. Seminar in Geoecology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Geographical ecology, with specific topics ranging from landscape to global scale (e.g., landscape ecology, regional ecology, conservation problems, biosphere-atmosphere interactions, global ecology and global change).

GEOG 8290. Directed Problems in Physical Geography. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Advanced problems in physical geography. Topics vary. Non-Traditional Format: Directed study.

Geographic Techniques and Methods

GEOG 4060/6060. Field and Laboratory Methods in Physical Geography. 3 hours.
Prerequisite: GEOG 3010 or GEOG 3110 or GEOG 3210.
Methods in measurement, observation, recording and synthesis of field data in physical geography. Students conduct field research and present oral and written reports (with maps) of findings.

GEOG 4300/6300. Introductory Spatial Analysis. 3 hours.
Prerequisite: GEOG 2300.
Descriptive and inferential techniques used in quantitative geographic analysis. Probability distributions, sampling techniques, parametric and nonparametric inference, analysis of variance, spatial autocorrelation measures and regression procedures. Applications of statistical methods to spatial analysis and geographic research design. Exercises develop knowledge of statistical programming with computer software.

GEOG 4310/6310-4310L/6310L. Cartographic Design and Reproduction. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 3510-3510L or permission of department.
Design, examination of cartographic literature, map production methods, and their effects on design. Practical applications of desktop publishing, page layout with specific emphasis on state atlas design, map-narrative interactions, four color map reproduction, and photo-cartographic techniques.

GEOG 4330/6330-4330L/6330L. The Use and Interpretation of Aerial Photographs. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Principles and techniques of extracting descriptive and metric information about the environment from aerial photographs acquired in analog and digital forms. Applications emphasize planimetric mapping and interpretation of physical and cultural landscapes. A term project using the techniques is required.

GEOG 4350/6350-4350L/6350L. Remote Sensing of Environment. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4330/6330-4330L/6330L.
Remote sensing with emphasis on aerospace applications in the natural sciences. Fundamental properties of the electromagnetic spectrum and remote sensing devices such as multispectral cameras, thermal infrared line scanners, and television and radar imaging systems.

GEOG 4370/6370-4370L/6370L. Introduction to Geographic Information Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CSCI 1301-1301L or sophomore standing or permission of department.
Principles and applications of geographic information systems (GIS). Examines the nature and accuracy of spatially referenced data, as well as methods of data capture, storage, retrieval, visualization, modeling, and output using one or more GIS software packages.

GEOG 4410/6410-4410L/6410L. Cartographic Visualization Methods. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 3510-3510L.
Theory and application of computer technology in the preparation of thematic maps and graphics. Emphasis on the creation, analysis, and display of statistical surfaces. Students explore trends in cartographic visualization methods, including interactive and animated mapping techniques.

GEOG 4430/6430-4430L/6430L. Advanced Photogrammetry. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4330/6330-4330L/6330L.
Theories of analytical and digital (soft copy) photogrammetry as applied to topographic mapping. Topics include refinement of photographic measurements, coordinate transformations, stereoscopic parallax, collinearity equations, aerial triangulation, orthophotography, and digital image correlation.

GEOG 4470/6470-4470L/6470L. Geographic Analysis and Geographic Information Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4300/6300 and GEOG 4370/6370-4370/6370L and CSCI 1302.
Geographic analytical methods and implementation. Theory and concepts of spatial analysis. Description, reduction, and comparison of point, line, area, and volumetric geographic data sets. Implementation and limitation of geographic information systems.

GEOG 4920/6920. Special Problems in Area Analysis. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent research and readings on geographical topics by arrangement with specific faculty. Non-Traditional Format: Class hours are by arrangement with the relevant faculty and vary depending on credit hours.

GEOG 8300. Multivariate Techniques in Geography. 3 hours.
Prerequisite: GEOG 4030/6030.
Application of multivariate statistical procedures to research problems in geography, with emphasis on peculiarities of such applications. Spatial autocorrelation, areal aggregation, modifiable areal unit problem, spatial interpolation, and trend surfaces are investigated with statistical and GIS software packages.

GEOG 8350. Remote Sensing with GIS Applications. 3 hours.
Prerequisite: (GEOG 4350/6350-4350L/6350L and GEOG 4370/6370-4370L/6370L) or permission of department.

Mapping datums, coordinate systems, and accuracy requirements for geographic information systems (GIS). Global positioning system (GPS), softcopy photogrammetry, and digital image processing techniques for GIS database construction. GIS modeling for environmental studies. Includes the use of various software packages.

GEOG 8390. Directed Problems in Quantitative Geographic Methods. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Topics in statistical analysis of geographic data and geographic modeling. Non-Traditional Format: Class hours are by arrangement with the relevant faculty and vary depending on credit hours.

GEOG 8450. Problems in Remote Sensing of Environment I. 3 hours.
Prerequisite: GEOG 4350/6350-4350L/6350L.
Advanced problems in photointerpretation, photogrammetry and remote sensing. Topics may vary. Emphasis on research and applications.

GEOG 8510. Seminar in Cartography. 3 hours.
Prerequisite: GEOG 4310/6310 or GEOG 4410/6410-4410L/6410L.
Special problems in the application of cartography. Emphasis on problems involving map design and production, computer graphics, map perception, cartographic visualization, and map animation.

GEOG 8530. Advanced Topics in the Use and Interpretation of Aerial Photographs. 3 hours.
Prerequisite: GEOG 4330/6330-4330L/6330L.
The extraction of quantitative and qualitative information from aerial photographs, with emphasis on appropriateness of various approaches and on means of improving interpretation accuracy. Includes applications involving physical, human, and regional geography.

GEOG 8550. Problems in Remote Sensing of Environment II. 3 hours.
Prerequisite: GEOG 4350/6350-4350L/6350L.
Advanced problems in photointerpretation, photogrammetry, and remote sensing. Topics may vary. Emphasis on research and applications.

GEOG 8570. Seminar in Geographic Information Systems. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GEOG 4370/6370-4370L/6370L and permission of department.
Problems in geographic information systems, including methods and techniques and the application to specific topical areas.

GEOG 8590. Directed Problems in Geographic Techniques. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Topics in mapping sciences, such as cartography, airphoto interpretation, remote sensing, photogrammetry, and geographic information systems. Non-Traditional Format: Class hours are by arrangement with relevant faculty and vary depending on credit hours.

Geology

Samuel E. Swanson, *Head*
David B. Wenner, *Graduate Coordinator, 542-2652*
(GG Building)

The department offers instruction and opportunities for research in archaeological geology, economic geology, geochemistry, clay mineralogy, geophysics, hydrogeology, marine geology, mineralogy, paleontology, micropaleontology, petrology, stratigraphy-sedimentology, and other fields. Graduate programs leading to the MS and PhD are individually arranged to fit each student and his/her background.

Facilities for graduate training and research include analytical and experimental laboratories containing X-ray diffraction equipment, mass spectrometers, FTIR and an electron microprobe. Special facilities include a stable isotope laboratory, a potassium-argon laboratory, an experimental petrology laboratory, equipment for seismological studies, a cathodeluminoscope, a carbon-14 and tritium dating laboratory, a neutron activation analysis laboratory, paleontological and sedimentological laboratories, and laboratories for sample preparation, optical determination, 12 station computer lab and photomicroscopy. The university's Marine Institute on Sapelo Island and the Skidaway Institute of Oceanography at Savannah provide facilities for research in marine geology. Companion facilities include the university computer center, electron microscopy laboratory, field vehicles, instrument shops, and rock, mineral, and fossil collections.

GEOL 4050/6050. Facies Models and Stratigraphy. 3 hours.
Prerequisite: GEOL 4010-4010L.
Sedimentary processes in major siliciclastic and carbonate depositional environments. Factors affecting deposition and erosion of sediments on time scales of hundreds of years to hundreds of thousands of years.

GEOL 4060/6060. Structural Geology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 3010-3010L.
Stress and strain within the earth, and the mechanical properties and behavior of earth materials. Geologic structures, their recognition and interpretation in the

field, and solution of structural problems. Framework of the earth's crust; evolution of mountain belts, continents, and basins. Relation between structures, deformation, and plate tectonics.

GEOL 4090/6090. Marine Geology. 3 hours.
Prerequisite: [(GEOL 1121 and GEOL 1121L) and (GEOL 1122 and GEOL 1122L)] or GEOL 1260-1260L.
The geologic aspects of ocean basins, including morphology, sedimentation processes, and mode of origin.

GEOL 4110/6110. Principles of Geochemistry. 3 hours.
Prerequisite: (CHEM 1212 and CHEM 1212L and GEOL 3010-3010L) or permission of department.
Distribution of elements and isotopes in minerals, rocks, and waters. Principles governing the migration and behavior of elements and isotopes.

GEOL 4220/6220. Hydrogeology. 3 hours.
Groundwater in the hydrologic cycle. Examination of flow through porous media, regional flow, influence of wells, water chemistry, and contaminant transport. Emphasis on practical environmental problems.

GEOL 4250/6250. Field Methods in Geology. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 3010-3010L.
Prerequisite or corequisite: GEOL 3020-3020L.
Field measurement of geologic parameters, accurate recording of observations, production and interpretation of geologic maps and cross sections, and the recognition of structures and lithologies in the field. Non-Traditional Format: Two day weekend field trips are required.

GEOL 4270/6270. Geology Field School. 6 hours.
Prerequisite: GEOL 3020-3020L or GEOL 4010-4010L or GEOL 4020-4020L or GEOL 4250/6250.
Theory and practice of field measurement, large scale planimetric and topographic mapping, and grid surveying. Graphic presentation of field data. Geologic mapping projects, including interpretation of observed geologic features. Summary maps and reports must be prepared and defended in the field. Student must demonstrate mastery of the knowledge and skills taught in the required on-campus major courses. Non-Traditional Format: Taught in the field during the summer term. Instructional methods include lectures, demonstrations, field trips, as well as supervised field study.

GEOL 4300/6300. Igneous and Metamorphic Petrology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4020-4020L.
Textures, mineralogy, and classification of the common igneous and metamorphic rocks. Origin of magmas and volcanoes and their impact on civilizations; evolutions of continental and oceanic crusts; metamorphic rocks as probes of crustal processes.

GEOL 4310/6310. Economic Geology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4020-4020L.
Classification and origin of base and precious metal ore deposits; relationships between ore deposits, host rocks, and plate tectonics; principles of ore deposit exploration and evaluation.

GEOL 4330/6330. Geology of North America. 3 hours.
Prerequisite: GEOL 1260-1260L.
Evolution of North American continent through time. Stratigraphic, sedimentary, and magmatic history and tectonic development of various regions since the early Precambrian. Paleontological record of environmental and biological changes. Origin of energy, mineral, soil, and water resources. History of human habitation and resource utilization. Current environmental hazards and challenges. Non-Traditional Format: May be taught during summer session in the field as part of the Geology/Anthropology Summer Field Program.

GEOL(ANTH) 4340/6340. Archaeometry. 3 hours.
Prerequisite: GEOL(ANTH) 4700/6700.
Methods of archaeometric analysis including chronometric and instrumental techniques. Absolute age dating and characterization of archaeological materials by physico-chemical analysis.

GEOL 4350/6350. Geology of the Planets and Moons. 3 hours.
Prerequisite: GEOL 3020-3020L and GEOL 4020-4020L.
Geology of the planets, moons, and asteroids, including internal, surficial, and atmospheric processes. Studies in comparative planetology aimed at showing how unique the current life-supporting environment of the Earth is, and why other planets have undergone such dramatically different evolutions.

GEOL 4370/6370. Data Analysis in the Geosciences. 3 hours.
The principles of data analysis, including data collection methods, graphical presentation, and basic statistics.

GEOL 4410/6410. Introduction to Research in Archeogeology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to archeogeology. Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4420/6420. Introduction to Research in Geochemistry. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to geochemistry. Non-Traditional Format: Taught as a directed study, although tra-

ditional lecture and lab exercises may be utilized when appropriate.

GEOL 4430/6430. Introduction to Research in Geophysics. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to geophysics. Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4440/6440. Introduction to Research in Hydrogeology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to hydrogeology. Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4450/6450. Introduction to Research in Mineralogy. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to mineralogy. Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be employed when appropriate.

GEOL 4460/6460. Introduction to Research in Paleontology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to paleontology. Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4470/6470. Introduction to Research in Petrology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to petrology. Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4480/6480. Introduction to Research in Sedimentary Geology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques appropriate to sedimentation and stratigraphy. Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4490/6490. Introduction to Research in Structure/Tectonics. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to structural geology and/or tectonics. Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4500/6500. Sedimentary Petrology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L.
Mineralogical, petrological, and geochemical study of sedimentary rocks (shales, sandstones, limestones, dolostones, cherts, evaporites, phosphorites, etc.) to interpret origins of sedimentary grains and to understand porosity and permeability of water/rock interaction in and diagenesis of sedimentary rocks.

GEOL 4510/6510. Marine Micropaleontology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 4010-4010L.
Geologic history and applications of marine microfossils, especially foraminifera, calcareous nannoplankton, radiolaria, and diatoms.

GEOL 4520/6520. Paleoecology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: (GEOL 1260-1260L and GEOL 3300) or permission of department.
The ecological factors affecting the distribution and abundance of fossil organisms, with emphasis on marine invertebrates. Invertebrates as a guide to environments of the past and as indicators of environmental change. Taphonomy of invertebrates.

GEOL 4550/6550. Clay Mineralogy and Geochemistry. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L.
Clay minerals with emphasis on x-ray diffraction analysis and identification of mixed layer systems. Geochemical factors for clay origin and uses including applications to soils, petroleum, archeological, environmental and economic ore deposit studies.

GEOL 4560/6560. Weathering and Diagenesis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1211 and CHEM 1211L and GEOL 3020-3020L.
Global cycling of major elements. Rock-water interactions. Kinetics of mineral dissolution and growth in soil, marine, freshwater, sedimentary basins and hydrothermal systems. Geochemical models for estimating reaction rates and reservoir capacities/fluxes are considered.

GEOL 4600/6600. Solid Earth Geophysics. 3 hours.
Prerequisite: GEOL 4020-4020L and MATH 2200 and MATH 2200L.
Analysis of Earth's gravity, magnetic, and seismic wave fields applied to the investigation of structure and dynamics of the Earth's interior. Course will cover theory, methods of analysis, and results of geophysical investigations. Emphasis on major new initiatives in satellite geodesy and digital seismic array studies.

GEOL 4620/6620. Exploration Geophysics. 3 hours.
Prerequisite: GEOL 4020-4020L and MATH 2200 and MATH 2200L.
Geophysical methods for imaging the subsurface Course will focus on gravity, magnetic, resistivity,

seismic refraction, and seismic reflection surveys. Applications discussed include exploration for hydrocarbons and characterization of the shallow subsurface for engineering/groundwater studies. Laboratory will include field experiments and computer modeling studies.

GEOL 4640/6640. Geochemical and Geophysical Surveys. 3 hours.
Prerequisite: GEOL 3010-3010L.
Prerequisite or corequisite: GEOL 4020-4020L.
Geochemical dispersion and survey of common pathfinder elements; methods of instrumental analysis used in geochemical exploration. Background theory of gravity, magnetic, electromagnetic, and electrical techniques used in resource exploration. Field based projects.

GEOL 4660/6660. Field School in Shallow Geophysics. 6 hours. 6 hours lecture and 6-7 lab periods of 8 hours each per week.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Techniques for the geophysical propsection of near-surface geology, geohydrology, and geomorphology. Techniques include electro-magnetic, radar, sonar, and magnetism. Non-Traditional Format: Course taught during summer semester utilizing applied field exercises in addition to traditional lecture/lab methods.

GEOL 4670/6670. Environmental Instrumental Analysis. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L.
Lecture and laboratory course emphasizing principles and practical experience in chemical analysis of sediments, rocks and water, with particular emphasis on environmentally important organic and inorganic contaminants. Non-Traditional Format: Field trip participation required.

GEOL(ANTH) 4700/6700. Archaeological Geology. 3 hours.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Archaeological geology examines the use of earth science methods and theories in the study of archaeological sites and their contents. The four major areas covered include: (1) the archaeological site and geology; (2) age determination techniques; (3) exploration techniques; (4) artifact characterization.

GEOL 4750/6750. Earth Sciences for Middle School Teachers. 4 hours.
Fundamentals of earth sciences for middle school teachers. Map interpretation; minerals and rocks; principles of astronomy, meteorology and oceanography. Processes at the surface and inside the Earth. Emphasis on plate tectonics; geologic time scale, evolution of life, and a study of fossils. Geology and resources of Georgia.

GEOL 4900/6900. Seminar in Geohydrology. 1 hour. Repeatable for maximum 6 hours credit.
Current and classical studies in geohydrology.

GEOL 4910/6910. Seminar in Geochemistry. 1 hour. Repeatable for maximum 6 hours credit.
Current and classical studies in geochemistry.

GEOL 4920/6920. Seminar for Geology Teaching Assistants. 1 hour.
Discussion of the delivery of geology laboratory material, including presentation techniques, attendance policy, grading, and support systems.

GEOL 4950/6950. Geology Seminar. 1 hour. Repeatable for maximum 6 hours credit.
Reviews and discussions of current research topics.

GEOL 6130. Aqueous Environmental Geochemistry. 3 hours.
Prerequisite: GEOL 4110/6110.
Chemical behavior of natural aquatic systems: chemical kinetic and equilibrium relationships controlling the quality of surface and subsurface waters, both pristine and polluted. Distribution and behavior of chemical species in aqueous environments.

GEOL 7000. Master's Research. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GEOL 7300. Master's Thesis. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

GEOL 8010. Advanced Topics in Archaeological Geology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study using traditional lecture and lab exercises when appropriate.

GEOL 8020. Advanced Topics in Geochemistry. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8030. Advanced Topics in Geophysics. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8040. Advanced Topics in Hydrogeology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be used when appropriate.

GEOL 8050. Advanced Topics in Mineralogy. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of a staff member on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when applicable.

GEOL 8060. Advanced Topics in Paleobiology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8070. Advanced Topics in Petrology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8080. Advanced Topics in Sedimentary Geology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8090. Advanced Topics in Structural Geology. 1-3 hours. Repeatable for maximum 9 hours credit.
Intensive study under the direction of staff members on approved topics. Non-Traditional Format: Taught as a directed study but traditional lectures and lab exercises may be utilized when appropriate.

GEOL 8100. Microchemical Analysis of Geologic Materials. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Theoretical and laboratory study of microchemical analytical techniques commonly used to analyze the composition of geologic materials. Includes training on the operation of the JEOL 8600 Superprobe for geochemical analysis.

GEOL 8110. Paleooceanography. 3 hours.
Prerequisite: GEOL 4010-4010L and GEOL 4090/6090.
History of temporal and environmental changes in physical, chemical, and biological components of the ocean as recorded in deep-sea sediments and oceanic crust. Emphasis is placed on the role of paleoclimates in the evolution of the ocean.

GEOL 8120. Paleobiodiversity. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4520/6520 or permission of department.
Pattern, process and causal mechanisms of modern and fossil biodiversity issues.

GEOL 8130. Paleocommunities. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOL 4010-4010L.
Geologic history and paleoecology of fossil associations through time with emphasis on the marine fossil record.

GEOL 8140. Sequence Stratigraphy. 3 hours.
Prerequisite: GEOL 4010-4010L.
Principles of sequence stratigraphy. Roles of sediment supply, subsidence, and eustasy in the accumulation of sediments on time scales of tens of thousands of years and longer.

GEOL 8150. Earth Surface Geochemistry. 3 hours.
Prerequisite: GEOL 4110/6110.
Geochemical principles, materials, and processes related to the near-earth-surface environment. Systems studied include weathering and shallow groundwater; rivers, lakes, and oceans; diagenesis and deep groundwater; and the linkage of the rock and water cycles.

GEOL 8160. Advanced Igneous Petrology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4300/6300.
Mineralogy, petrology, and chemical compositions of igneous rocks. Origin and evolution of magmas and the causes and characteristics of volcanic eruptions including effects on climate and societies. Non-Traditional Format: One weekend field trip is required.

GEOL 8180. Sandstone Petrology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L.
Petrology of sandstones: classifications, mineralogy, geochemistry, provenance, diagenesis, porosity, and hydrogeology of sandstones. Laboratory examination of sandstone mineralogies and diagenetic fabrics.

GEOL 8200. Carbonate Petrology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L and GEOL 4010-4010L.
Petrology, mineralogy, and geochemistry of limestones, dolostones, speleothems, travertines, and other carbonate-bearing geological materials. Precipitation of carbonate minerals, origin of carbonate grains, neomorphism, diagenesis, dolomitization, silicification, porosity, and permeability in carbonate rocks.

GEOL 8220. Advanced Metamorphic Petrology. 3 hours.
Prerequisite: GEOL 4300/6300.
Rigorous and quantitative study of metamorphic rocks through the use of chemical thermodynamics. A study of chemical equilibrium and solution behavior applied to minerals and geologic fluids is followed by specific applications to metamorphic rocks.

GEOL 8250. Plate Tectonics. 3 hours.
Prerequisite: GEOL 4020-4020L.
Mechanics of plate motion on a sphere; analysis of earthquake focal mechanisms and state of stress in the lithosphere; paleomagnetism; true polar wander; geologic processes at plate boundaries; forces driving plates. Discussion of papers covering models for convection, fate of slabs, recent results from global tomography, and regional tectonics.

GEOL 8270. Continental Tectonics. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: GEOL 4060/6060.
Growth and evolution of mountain systems, orogenic belts, and related terranes. Emphasis on processes of deformation, metamorphism, and crustal growth; characteristics and evolution of principal structural provinces; plate tectonic driving forces; relations between deformation, magmatism, and sedimentation. Different orogenic belts, ancient and modern, used as comparative examples.

GEOL 8460. Isotope Geochemistry. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4020-4020L and GEOL 4110/6110.
Theory of isotope fractionation and radioactive decay. Analytical methods for measurement of isotope ratios. Applications of isotope methods in the earth sciences including age dating, studies of chemical cycles in the environment, and evolution of inorganic and organic systems.

GEOL 8600. Advanced Topics in Seismology. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (GEOL 4020-4020L and MATH 2210 and MATH 2210L and PHYS 1212-1212L) or permission of department.
Topics in theoretical and observational seismology. Wave propagation, time series analysis, geophysical data processing, inverse theory, and seismic array studies of the lithosphere, mantle and core. Topics to vary from year to year.

GEOL 8700. Physical Hydrogeology. 3 hours.
Mathematical treatment of subsurface flow and transport using the hydraulic approach. Both regional and local problems are examined. Emphasis is on selecting the appropriate differential equation and boundary conditions to adequately describe a problem. Practical applications are used to illustrate the approach.

(GEOL)FORS 8730. Aquifer Mechanics. 3 hours.
Prerequisite: FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Mechanics of flow through subsurface media, including flow in confined, water table, and leaky aquifers, delayed yield, partially penetrating wells, boundaries, multiple wells, dual porosity media, and fractured rock; use of aquifer tests to estimate aquifer hydraulic properties.

GEOL(FORS) 8740. Hydrologic Flow and Transport Modeling. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 8700 or FORS 4120/6120.
Solutions of surface and subsurface flow and transport problems including finite difference, finite element, and boundary integral methods. Analytic techniques include Laplace-, z-, and Fourier-transform, complex variable, and separation of variables methods. Application to problems commonly found in the environmental field, including capture zones, particle-tracking, advection-dispersion, and non-aqueous phase liquids.

GEOL 8750. Environmental Organic Geochemistry. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and GEOL 1260-1260L.
Origin and distribution of organic compounds in rocks, soils, and water. Biochemistry of major classes of organic compounds found in rocks, soils, and minerals. Emphasis on anthropocentric contamination and geochemistry of remediation.

GEOL(CRSS) 8760. Organic Contaminant Hydrogeology. 3 hours.
Prerequisite: (CHEM 2100 and CHEM 2100L) or (CHEM 2212 and CHEM 2212L) or permission of department.
Physical and chemical processes controlling the mobility and fate of organic contaminants in soils, sediments, surface, and ground waters. Processes include biotic and abiotic (hydrolysis, volatilization, sorption, redox, and photochemical) reactions in the natural systems. Relationships between chemical structure and reactivity in the environment.

GEOL 8770. Hazardous Waste Site Remediation. 3 hours.
Prerequisite: GEOL 6130 and EHSC 4350/6350-4350L/6350L.
The current state of environmental pollution and the application of innovative technologies in clean-up of contaminated soil, sediment, and groundwater. Evaluate the performance and limitations of existing technologies due to site heterogeneity.

GEOL 8780. Environmental Isotopes. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
The use of naturally occurring stable and radiogenic isotopes for solving environmental problems. Principles of isotope fractionation, radionuclide counting methods, applications to solving hydrologic problems, and laboratory techniques for analyzing O-and H-, C-stable isotopes and H-and Rn-radiogenic isotopes.

GEOL 8790. Special Projects in Hydrogeology and Environmental Geology. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite: GEOL 8700 or permission of department.
Environmental geological problems such as sanitary landfills, underground storage tank contaminated sites, mine land pollution areas, and hydrological assess-

ment of wetlands. Non-Traditional Format: Field trip participation is required.

GEOL 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

GEOL 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Germanic and Slavic Languages

Ralf R. Nicolai, *Head*
Marjanne E. Goozä, *Graduate Coordinator, 542-2450*
(Joseph Brown Hall)

The department offers work in all the major fields of Germanistic studies. Required for the master's degree is a reading knowledge of one modern foreign language besides German. Information regarding other requirements for the MA, and MEd degrees in German may be obtained from the coordinator of graduate studies in German.

German

GRMN 4001/6001. Advanced German Conversation and Composition. 3 hours.
Prerequisite: GRMN 3002.
Vocabulary building and review of grammar. Emphasis on common errors of English speakers and on distinctions in meaning.

GRMN 4300/6300. German Literature from the Enlightenment through Classicism. 3 hours.
Prerequisite: GRMN 3001.
Eighteenth-century German literature and culture from approximately 1740-1806. Representative readings from Enlightenment, Empfindsamkeit, Storm and Stress, and Classicism. Includes texts that provide background on eighteenth-century political, social, and cultural developments.

GRMN 4400/6400. German Literature from Romanticism through Realism. 3 hours.
Prerequisite: GRMN 3001.
Nineteenth-century German literature and culture from approximately 1795-1900. Representative readings from early to late Romanticism, Junges Deutschland, Vormaerz, Biedermeier, and Realism. Includes texts that provide background on nineteenth-century political, social, and cultural developments.

GRMN(LING) 4460/6460. Structure of Modern German. 3 hours.
Prerequisite: GRMN 3001.
Linguistic and sociolinguistic structure of modern German with relevant linguistic terminology. Emphasis on phonology, morphology, and syntax. Taught in English.

GRMN 4500/6500. German Literature from Naturalism to the Present. 3 hours.
Prerequisite: GRMN 3001.
Twentieth-century German literature from approximately 1895 to the present. Representative readings from Naturalism, Impressionism, Expressionism, wartime and post-war literature, literature of the GDR, and contemporary literature through post-unification. Includes texts that provide background on twentieth-century political, social, and cultural developments.

GRMN 6100. Medieval German Literature. 3 hours.
Medieval German literature from approximately 800 to 1350. Representative readings from the Old High German and Middle High German periods. Includes texts that provide background on medieval political, social, and cultural developments.

GRMN 6200. Early Modern German Literature. 3 hours.
German literature from approximately 1350 to 1740. Representative readings from Humanism, Renaissance, Reformation, Counter-Reformation, and the Baroque. Includes vernacular and neo-Latin literature by German writers; effect of social, political, religious, and intellectual currents on the German Republic of Letters is considered.

GRMN(LING) 6380. Contrastive Grammar: German-English. 3 hours.
Identification and examination of the salient structural similarities and differences between German and English.

GRMN(LING) 6600. History of the German Language. 3 hours.
The origins of modern standard German from the Indo-European parent language through proto-Germanic, Old and Middle High German, and the early modern period.

GRMN(LING) 6810. German Phonology and Morphology. 3 hours.
Theoretical and applied German phonology and word structure. Taught in English.

GRMN 7000. Master's Research. 3-6 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional

Format: Independent research under the direction of a faculty member.

GRMN 7300. Master's Thesis. 6-9 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

GRMN(LING) 7500. Problems and Methods of Teaching College German. 3 hours.
Methods for teaching foreign language and development of language skills in German. For teaching assistants in German and graduate students in German and Language Education. Taught in English.

GRMN(LING) 8320. Gothic. 3 hours.
Morphology, phonology, and history of the Gothic language based on extant texts. Emphasis on the development of earlier stages of the language and on its later language forms. Taught in English.

GRMN(LING) 8400. Middle High German. 3 hours.
Phonology and grammar of the language, with extensive readings in the prose, epic, and lyric poetry of the Middle High German era.

GRMN 8410. Proseminar. 3 hours.
Bibliography and methodology of research in German literature and linguistics. Survey of literary theory. Required of all graduate students in German.

GRMN(LING) 8510. Seminar in German Linguistics. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of a subject or topic in German linguistics. Taught in English.

GRMN(LING) 8520. Seminar in German Language Variation. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of synchronic and diachronic variation in German. Taught in English.

GRMN 8530. Seminar in German Literature. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of a particular genre, theme, topic, or author.

GRMN 8540. Seminar in German Studies. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of a particular theme or topic. Non-Traditional Format: Students will meet with faculty members on a regular basis.

Russian

RUSS 6980. Directed Study in Russian Literature. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Individual study, reading, or projects in Russian literature under the supervision of a project director. Non-Traditional Format: Directed study.

RUSS 6990. Directed Study in Russian and Slavic Linguistics. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Individual study, reading, or projects in Russian and Slavic linguistics under the supervision of a project director. Non-Traditional Format: Directed study.

Gerontology

Leonard W. Poon, *Director & Graduate Coordinator, 542-3954*
(Candler Hall)

The University of Georgia has a strong commitment to gerontology training. Training in gerontology is directed through the Gerontology Center, which offers a Graduate Certificate of Gerontology to complement students' master's and doctoral training. The Certificate requires 15 semester hours of graduate course work in aging (from a variety of departments) along with three semester hours of field experience or three semester hours of research. Please see Index for detailed information on courses and requirements. The courses having a Gerontology prefix are listed below.

GRNT 4010/6010. Physical Aging. 3 hours.
The physiological and anatomical changes that occur as a person ages. The basics of the biology of aging followed by a system by system description of the aging phenomena in the human body. Team taught by faculty from several universities.

GRNT 6000. Seminar in Aging. 3 hours.
Prerequisite: Permission of department.
Basic concepts of gerontology in an interdisciplinary setting to provide the student with a theoretical framework upon which to base further study and research in the field of aging.

GRNT 6390. Service Learning with the Elderly. 3 hours.
Prerequisite: Permission of department.
Supervised field experience designed to assist in reinforcing knowledge, theories, and principles gained through courses in or related to the field of gerontology. Non-Traditional Format: Students meet regularly with their supervising professor.

GRNT 8000. Advanced Topics in Gerontological Research and Theory. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Interdisciplinary topics and new developments in gerontological research and theory, focused on a specific theme. Non-Traditional Format: Directed study.

GRNT 8010. Advanced Topics in Gerontology Practice. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Interdisciplinary topics on new developments in the practice of gerontology. Non-Traditional Format: Students meet regularly with their supervising professor.

Global Policy Studies

Markus Crepaz, *Graduate Coordinator, 542-5747*
(Baldwin Hall)

Please see Index for information on the certificate program in global policy studies. The courses having a global policy studies prefix are listed below.

GPST 6000. Global Policy Analysis. 3 hours.
Prerequisite: Six hours of graduate credit.
Interdisciplinary and multilevel analyses of global policy problems in the domains of identity, security, and prosperity. Special emphasis on cooperative or collective action solutions to these problems.

GPST 7500. Global Policy Internship. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Six hours of graduate credit.
Academic portion of an internship providing work or field experience in global policy studies.

History

James C. Cobb, *Head*
Michael P. Winship, *Graduate Coordinator, 542-2531*
(LeConte Hall)

The history department offers work leading to the MA and PhD degrees. The MA program in history consists of 30 semester hours, including HIST 7900 (Theory and Practice of History) and two other 8000-level courses. Additional requirements are: two colloquia in the major field (American or European) and one colloquium in the minor field (American, European or other approved graduate course), reading competence in a foreign language, a thesis, and an oral examination. The PhD student must demonstrate through both written and oral examinations a thorough knowledge of four fields of history or three fields of history and a fourth field in another discipline. In addition, PhD students must complete HIST 7910 (Teaching History in Colleges and Universities), two colloquia in the major field (American or European), one colloquium in the minor field (American, European, or other approved graduate course), and a minimum of 6 semester hours of 8000-level courses. However, if HIST 7910 (or its equivalent) has not been completed, it may be taken with the permission of the major professor and the endorsement of the graduate coordinator and be counted in fulfillment of part of the additional seminar requirement. A reading competence in two foreign languages is required of all doctoral candidates, but with the permission of the major professor and the endorsement of the graduate coordinator, two courses in quantitative methodology may be substituted for one foreign language. A dissertation may be presented in United States, European, or other selected fields of history. Students holding a BA degree may be admitted into the doctoral program. The PhD requires 30 semester hours beyond the MA for a total of 60 semester hours.

The graduate program stresses research and writing under faculty guidance. In addition, students possessing the MA degree may receive practical experience in teaching by holding teaching assistantships. The department awards a number of teaching assistantships and nonteaching assistantships each year. Application for these should be made directly to the Graduate Coordinator of History. The deadline for applications for financial assistance is January 1.

HIST 4000/6000. Studies in American History. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Junior or senior standing.
A special subject not otherwise offered in the history curriculum. Topics, methodology, and instructors vary from semester to semester. Normally, no more than two such courses may be counted toward the major or the minor in history, exceptions being made only by the Coordinator of Instruction.

HIST 4030/6030. Politics of Morality in the United States. 3 hours.
Origin of selected political and moral dilemmas in American multicultural contexts from the Colonial to the Contemporary period.

HIST 4040/6040. Working Class America. 3 hours.
Using fiction and film as well as traditional texts, the history of working-class women and men in the United States. The emphasis will be on the everyday lives of the laborers—what they did at work and at home, in the union hall, and on the picket line.

HIST 4050/6050. American Lives. 3 hours. Repeatable for maximum 6 hours credit.
Biographies and autobiographies to explore a variety of themes and issues in American history. Emphases will differ depending on instructor: focus may be nineteenth century, twentieth century, women, race, southern autobiography, etc.

HIST(AFAM) 4055/6055. Historical Survey of African American Thought. 3 hours.
This course examines representative works of such nineteenth- and twentieth-century social, cultural, and political thinkers as Frederick Douglass, Cornel West, Anna J. Cooper, and Angela Davis among other outstanding women and men who have contributed significantly to the intellectual life of the African American community.

HIST 4060/6060. American Legal History. 3 hours.
American legal thought, institutions, and education, focusing on the impact of social, political, and economic forces on the legal system. The English background, colonial period, legal foundations of the new nation, and the nineteenth and twentieth centuries.

HIST 4070/6070. Jeffersonian and Jacksonian America. 3.0 hours.
History of the U.S. from the early republic through the antebellum period, with emphasis on territorial expansion, industrialization, the first and second political systems, and the emergence of the sectional crisis.

HIST 4071/6071. Antebellum South. 3 hours.
A chronological and thematic history of the South from Spanish exploration and Jamestown's settlement through the secession crisis of 1860-1861, with an emphasis on the social, cultural, economic, and political aspects of southern life in the colonial and antebellum periods.

HIST 4072/6072. The Civil War Period of American History. 3 hours.
The origin, conduct, and legacy of the war and the impact of the conflict upon peoples and institutions.

HIST 4073/6073. The Era of Reconstruction, 1865-1877. 3 hours.
The process of reunion, especially in the American South, with emphasis upon the experience of African Americans.

HIST 4074/6074. The South Since Reconstruction. 3 hours.
Economic, social, cultural, and political developments in the South since Reconstruction.

HIST 4075/6075. Scientific Interests in the South. 3 hours.
Scientific inquiry in the southeastern region of the United States. Stresses cultural and intellectual milieu, examines special role of natural history, and compares inquiries of southern scientists with those of other contemporary United States scientists.

HIST 4080/6080. Politics of Gender in United States History. 3 hours.
Representations of women's power historically, evaluated critically in terms of gender, race, and class.

HIST 4091/6091. Problems in American Foreign Policy, 1776-Present. 3 hours.
Selected problems related to United States foreign policy.

HIST 4092/6092. The United States in the Era of the Cold War. 3 hours.
The political, diplomatic, military, and social history of the United States during the era of the Cold War (1946-1992).

HIST 4100/6100. History of Georgia. 3 hours.
Using historical scholarship, biography, and film, the Georgia past from pre-history to the present. Themes of race, class, and modernization in the development of Georgia; special emphasis on the lives of everyday Georgians at various points in history.

HIST 4110/6110. Multicultural Georgia. 3 hours.
The history of the state, with an emphasis on its racial, ethnic, religious, gender, and regional diversity, to be examined through historical documents, novels, short stories, folklore, memoirs, music, and film.

(HIST)ESOC 4150/6150. Teaching United States History. 3 hours.
Classic historiography and current debates among historians over major themes and events in United States history. Examination of ways in which this historical scholarship can be incorporated into social studies teaching. Evaluation of materials and methods used to teach United States history in secondary and middle schools.

HIST 4200/6200. Studies in Latin American History. 3 hours. Repeatable for maximum 9 hours credit.
Special issues or topics in Latin American history not covered in a regular history course. Topics, methodology, and instructor vary from semester to semester. Representative topics include the Latin American revolutionary tradition, the wars of independence in the Americas, and Latin American wars.

HIST 4210/6210. Latin America: A Socioeconomic History Since 1930. 3 hours.
Latin American social and economic development from the onset of the Depression until the present. The role of the state in economic development; the impact of modernization on traditional social systems; persistence of social inequity amidst development; and the liberal and revolutionary responses to social needs.

HIST 4220/6220. The United States and Latin America. 3 hours.
The political, economic, and cultural relations between the United States and Latin America from 1776 to the present. Spanish-American revolutions, the Monroe doctrine, United States expansionism, the Pan American system, United States intervention, the Good Neighbor policy, Latin America in the Cold War, and United States and Latin American revolutions.

HIST 4300/6300. Studies in European History. 3 hours.
Topical studies that vary by year and instructor. Topics might include "Art and Society in the Age of the Reformation," "War and Gender in Twentieth-Century Europe," "Society and Culture in the Medieval European City," and "Imperialism and Anti-imperialism in Modern Europe."

HIST(CLAS) 4311/6311. Greek History. 3 hours.
Greek history to the time of Alexander the Great.

HIST(CLAS) 4312/6312. The Hellenistic World. 3 hours.
Problems in Hellenistic history from 330 B.C. to the Roman conquest with emphasis on the Antigonid, Seleucid, and Ptolemaic dynasties.

HIST(CLAS) 4321/6321. The Roman Republic. 3 hours.
Roman history to the end of the republic.

HIST(CLAS) 4322/6322. The Roman Empire. 3 hours.
History of the Roman Empire from 27 B.C. to A.D. 337 with special emphasis on the government of Augustus, reasons for its decline, and the final attempt at unification of the empire under Constantine.

HIST 4330/6330. Institutions of the Medieval West. 3 hours.
A variety of specific topics in medieval history, such as law and justice, Anglo-Saxon England, politics of the family, and attitudes toward gender and sexuality.

HIST 4340/6340. Rebirth and Reinvention in Early Modern Europe. 3 hours.
European society in the context of pivotal social, political, and intellectual moments, from the growth of the Humanist movement to the military revolution. The goal is a better understanding of "turning points" in history, and their creation and definition.

HIST 4350/6350. Material Culture and Consumer Society in Early Modern Europe. 3 hours.
Examines the origins of modern consumerism by looking at production and consumption in pre-industrial Europe. Treats the circulation, possession, and meaning of goods such as clothes, food, books, and objects of art. Themes include consumption as a sign of social status, popular and learned attitudes toward markets, and luxury.

HIST 4360/6360. European Popular Culture. 3 hours.
The symbols, expressions, and entertainments that all Europeans drew upon from the wealthiest and best educated to the poorest and illiterate. Themes may include material culture, gender identities, folktales, reading practices, religion and worship, music and theatre. Taught as a seminar with extensive readings in primary and secondary sources.

HIST 4371/6371. The Medieval Mind. 3 hours.
The intellectual history of medieval Europe. The nature of Christian behavior will be examined in the development of premodern ideas on the human body, politics, law, and religion.

HIST 4372/6372. Intellectual History in Early Modern Europe. 3 hours.
The intellectual heritage of early modern Europe. Students will study the works of humanists, theologians, and philosophers, as well as evaluate the social context in which those works were produced.

HIST 4373/6373. Nineteenth-Century European Intellectual History. 3 hours.
European thought from 1815-1914, with emphasis on the relationship between ideas and their political and social context.

HIST 4374/6374. Intellectual History of Twentieth-Century Europe. 3 hours.
Major trends and innovations in European intellectual life, from the fin-de-si`ecle revolt against positivism to post-structuralism and its critics. Coverage will include such thinkers as Freud, Weber, and Foucault, as well as such wider cultural movements as futurism, surrealism, and existentialism.

HIST 4381/6381. Politics, Culture, and Society in Stuart England. 3 hours.
Religious, political, and cultural upheavals under the Stuart monarchs, 1603-1704.

HIST 4382/6382. Britain from the Age of Revolution to the Age of Victoria 1780-1900. 3 hours.
Britain in the age of the American War of Independence, the French Revolution, and the Industrial Revolution. Special attention will be paid to political culture, intellectual change, and economic development.

HIST 4383/6383. Britain 1901 to the Present. 3 hours.
Political culture, intellectual change, and economic/imperial readjustment in twentieth-century Britain and beyond.

HIST 4391/6391. The French Revolution and the First Empire. 3 hours.
The causes and course of Europe's first modern revolution and its reconfiguration by Napoleon Bonaparte. Students will read primary sources and a rich contemporary historiography which illuminate official and popular efforts to reshape government, society, and culture. Taught as a seminar with extensive readings.

HIST 4392/6392. Twentieth-Century France. 3 hours.
The history of France in the twentieth century, with an emphasis on politics and social change.

HIST 4400/6400. The Age of World Wars I and II. 3 hours.
The origins, course, nature, and consequences of World Wars I and II in Europe, 1870-1950.

HIST 4410/6410. Nazism and Fascism in Europe, 1919-1945. 3 hours.
The two totalitarian movements, Italian Fascism and German National Socialism (Nazism), emphasizing the intellectual origins of antidemocratic impulses be-

fore and after 1919, the unique social and political factors present in each nation, the personalities of Hitler and Mussolini, and the growth of the totalitarian one-party state.

HIST 4420/6420. Holocausts in History. 3 hours.
The Jewish Holocaust 1933-1945, emphasizing historical precedents and consequences. Traditional religious anti-Semitism, biologically-based racism, and extreme nationalism will be investigated as sources of modern genocidal behavior.

HIST 4500/6500. Studies in African or Middle Eastern History. 3 hours.
Topics in modern and ancient Middle Eastern or African history. Non-traditional methodologies and sources are combined to introduce students to emerging issues in African or Middle Eastern history.

HIST 4510/6510. History of Famine and Food Systems in Africa. 3 hours.
African agricultural achievement, theories of production and famine systems, and attempts by colonial and international capital to control African food systems. Literature is a major source.

HIST 4530/6530. The History of Orientalism. 3 hours.
Images and symbolism used by Europeans and Americans to define the Islamic Middle East. The history of the Middle East through representation—stereotypes, myths, fairy tales, novels, films, and news coverage—particularly the ramifications of these images on Western foreign policy towards the Islamic Middle East.

HIST 4540/6540. Conflict in Twentieth-Century Southern Africa. 3 hours.
South Africa's economic, political and military might has shaped other southern African societies (Namibia, Lesotho, Botswana, Swaziland, Zimbabwe, and Mozambique) in the twentieth century. Reform and revolution which Africans and Europeans employed to regain and maintain African independence in the region.

HIST 4550/6550. Christianity and Colonialism in Africa. 3 hours.
Christianity was both ally and adversary to colonialism, threatening African "tradition" and aiding a vocal westernized elite which shaped independent African nations. African initiatives in Christian conversion, colonial Christianity, Africans in mission communities, mission education and westernized elites, independent African religious movements, and Christianity and African nationalism.

HIST 4600/6600. Studies in Asian History. 3 hours. Repeatable for maximum 9 hours credit.
A special issue or topic not otherwise offered in the history curriculum. Topics, methodology, and instructors will vary from semester to semester. Representative topics include "Japan and the Samurai," "Women, Gender and Family in Traditional Japan," and "Court and Countryside in Japan's Golden Age."

HIST 4700/6700. Themes in Comparative History. 3 hours.
A special subject not otherwise offered in the history curriculum. Topics, methodology, and instructors vary from semester to semester.

HIST 4750/6750. History and Film. 3 hours.
We are living in a post-literate age. Most people now get their history from films instead of books. How film, using a different vocabulary than that of books, recreates the past.

HIST(PHIL) 4860/6860. History, History of Philosophy, Philosophy. 3 hours.
Historians and philosophers differ in the source of evidence and arguments they use and in the standards to which they appeal. Nonetheless, works in each of these fields raise questions relevant to the other field. The purpose of this course is to explore the main relationships between these two fields.

(HIST)EDHI 4900/6900. History of American College and University. 3 hours.
Prerequisite: HIST 2111 and HIST 2112.
History of American colleges and universities from 1619 to the present. Major topics include student life, European antecedents, the nature of the university, the impact of religion, the rise of athletics, the culture of collegiate life, and the influence of society.

HIST 4960/6960. Directed Readings in History. 3 hours. Repeatable for maximum 6 hours credit.
Individual study, reading, or projects under the direction of a project director. Non-Traditional Format: Directed study.

HIST 6521. Eastern Africa to 1800. 3 hours.
Economic, political, and cultural history of eastern Africa to 1800. The origins of agropastoralism, and rise and growth of city-states and kingdoms, the Indian Ocean trading network, and slavery.

HIST 6522. Eastern Africa 1800 to Present. 3 hours.
Economic and cultural history of east Africa from 1800-1900s. Regional systems of food production, trade, and ethnicity, missionary and merchant activity, colonial penetration, African nationalism and independence.

HIST 6531. Africans in the Americas. 3 hours.
Fifteenth- to nineteenth-century political, social, economic connections between North, Central, South America and Caribbean and west, west-central Africa.

HIST 6611. Premodern Japan: A Survey for Graduate Students. 3 hours.
Not open to students with credit in HIST 3601.
Ancient and medieval Japan, focusing on the institutional and cultural foundations of the Japanese state.

HIST 6612. Modern Japan: A Survey for Graduate Students. 3 hours.
Not open to students with credit in HIST 3602.
Early modern and modern Japan: the transformation of Japan from an isolationist, agrarian country to a mili-

tary giant, to a broken and defeated nation, to an economic superpower.

HIST 6671. Traditional China. 3 hours.
Intellectual, political, economic, social, literary, religious, and diplomatic developments of China from its beginnings to the Sung Dynasty. Influences of Confucianism, Daoism, and Buddhism on Chinese identity; development and influence of the "Shung-Guo" (Central Kingdom); trade-tribute concepts; the importance of the growth of the family system and gender views.

HIST 6672. Transitional China. 3 hours.
Internal/external influences that challenge the traditions and cause changes. Influences of nomadic invaders—the Mongols and Manchus—on social and political history, and Buddhist and Daoist influences on Neo-Confucianism. Also, the impact of Christian missionaries and western merchants on modifications of political and economic institutions.

HIST 6673. History of China III: Revolutionary China. 3 hours.
End of nineteenth through twentieth century, focusing on the Republic of China, its establishment, development, and troubles; the rise of Nationalism and Communism; establishment, development, and troubles of the People's Republic of China; emphasis on what revolutions have occurred in China, the leaders, their important ideas/impact.

HIST 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HIST 7001. Colloquium in North American History: Seventeenth and Eighteenth Centuries. 3 hours.
Major themes in the recent literature on early modern Atlantic rim/North American history.

HIST 7002. Colloquium in United States History: Nineteenth Century. 3 hours.
Colloquium in which topics, issues, and recent trends in American nineteenth-century history are explored historiographically and thematically.

HIST 7003. Colloquium in United States History: Twentieth Century. 3 hours.
United States history of the twentieth century.

HIST 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

HIST 7321. Colloquium in Premodern European History. 3 hours.
The gradual discovery of the individual in premodern Europe. The areas of religion, politics, law, art, and literature. Readings will range from Plato and Thomas Aquinas to Dante and Leonardo da Vinci.

HIST 7322. Colloquium in Early Modern Europe. 3 hours.
Major themes and current historiography of Europe from 1350 to 1750.

HIST 7323. Colloquium in Nineteenth-Century European History. 3 hours.
European history from 1750 to 1870.

HIST 7324. Colloquium in Twentieth-Century Europe. 3 hours.
Major issues in the history and historiography of Europe from 1900 to the present.

HIST 7700. Colloquium in Comparative History. 3 hours. Repeatable for maximum 6 hours credit.
Readings and discussion of major topics in the theory and practice of comparative history.

HIST 7710. Colloquium on Gender in History. 3 hours.
Recent scholarship on gender in European History. The time period of the subject matter will vary with the instructor.

HIST 7720. Colloquium in Warfare in History. 3 hours. Repeatable for maximum 9 hours credit.
The history of warfare in the context of the warring societies from ancient to modern times. Topics depend on interest of the instructor.

HIST 7900. Theory and Practice of History. 3 hours.
Methods of research and fundamental theoretical issues pertaining to practicing the science of history, with emphasis on the development of writing skills.

HIST 7910. Teaching History in Colleges and Universities. 3 hours.
The variety of methods appropriate to instruction in college-level survey history courses and practices and utilization of audio visual aids and development of classroom tests.

(HIST)EDHI 8000. History of American Higher Education. 4 hours.
Development and scope of American higher education.

HIST 8010. Seminar in Early American History. 3 hours. Repeatable for maximum 6 hours credit.
A research seminar in early American history. Native Americans, Spanish and French borderlands, British settlement, elaboration of colonial institutions, colonial wars, the American Revolution, and the rise of the new nation.

HIST 8020. Seminar in Middle Period United States History. 3-15 hours. Repeatable for maximum 15 hours credit.
A research seminar in which students should produce a potentially publishable paper upon some topic relating to the American South, the American Civil War, or Reconstruction.

HIST 8025. Nineteenth-Century American Community History. 3 hours.
Prerequisite: Permission of department.
This course on American community studies in the nineteenth century explores the study of human relationships in a particular locale as effected by larger questions: war, race relations, gender and class conflict, industrial change. It considers public as well as private space; the mental world of individuals in relation to their communities, as well as the social, political, and economic ideology of communities.

HIST 8027. United States Women, Politics, and History. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
This interdisciplinary course investigates reform and the changing meaning of gender from the Colonial to Post Modern period. An emphasis upon real rather than ideological politics is the focus of discussions of change and continuity. Other major themes include the meaning of politics and the evolution of women's politics.

HIST 8030. Seminar in Recent United States History. 3 hours.
Social, intellectual, cultural, and political developments in United States history since 1900.

HIST 8300. Seminar in Premodern Europe. 3 hours. Repeatable for maximum 12 hours credit.
Selected topics in premodern European history.

HIST 8310. Seminar in Early Modern Europe. 3 hours.
Research seminar that will allow graduate students to work extensively on a particular theme in early modern European history, 1350-1815.

HIST 8320. Seminar in Nineteenth-Century European History. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected research topics in nineteenth-century European diplomatic, political, social, economic, and intellectual history. Topics vary.

HIST 8330. Seminar in Twentieth-Century Europe. 3 hours. Repeatable for maximum 9 hours credit.
Research in twentieth-century European history. Topics will vary according to the interests of the students and instructors.

HIST 8700. Seminar in World History. 3 hours.
Methods, traditions, concepts, and literature of world history.

HIST 8860. Seminar in History. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: HIST 7900 or permission of department.
Seminar in historical or historiographical subjects for second-year masters and doctoral students.

HIST 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HIST 9010. Directed Study in History. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: HIST 7900 and permission of department.
Directed study for Ph.D. students who have completed all required courses and are preparing for written and oral preliminary examinations. Non-Traditional Format: This course is a directed study and is to help prepare doctoral students for their oral and preliminary examinations once they have completed all other required course work.

HIST 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Linguistics

William A. Kretzschmar, Jr., *Director*
542-5099
(Park Hall)

The Linguistics Program at the University of Georgia is an interdisciplinary program with thirty-one faculty members from nine departments in the Franklin College of Arts and Sciences and three in the College of Education. We offer the MA and the PhD degrees. For further information, please consult the program's Web page at http://www.linguistics.uga.edu, or contact the Director, Linguistics Program, Athens, GA 30602-6205. FAX: 706-542-2897. E-mail to request information: admin@linguistics.uga.edu. E-mail to contact the Director: director@linguistics.uga.edu.

Our graduate program is comprised of four tracks of study from which students may choose to satisfy degree requirements: 1) Second Language Acquisition, 2) Cognitive Aspects of Linguistics, 3) Historical Linguistics, and 4) Language Variation and Sociolinguistics.

Second Language Acquisition offers a curriculum which treats the theoretical bases for SLA and is particularly directed at training for college-level language teaching. Students may follow established course sequences for French, Spanish, or German, or may assemble an appropriate set of courses to concentrate on another

language. The University of Georgia offers MEd and PhD degrees in TESOL and Foreign Language Education through the Language Education Department of the College of Education.

The Cognitive Aspects of Linguistics track includes the study of theoretical models that show how humans understand language. In conjunction with the Departments of Computer Science and Philosophy, and with the Artificial Intelligence Program, the Linguistics Program offers a computer-based track that requires a solid knowledge of computers and programming. Also available is a cognitive linguistics curriculum that does not require intensive work with computers.

Historical Linguistics involves both the methodology for comparison and reconstruction of historical languages and an intense, hermeneutic approach to studying ancient languages individually. Students may acquire a close familiarity with the sounds, grammar, and vocabulary of languages like ancient Greek, Sanskrit, Latin, Old Church Slavic, Classical Armenian, Old English, and many others.

Language Variation and Sociolinguistics provides its students with training in empirical linguistics, including the study of the methods commonly used in research on language as people speak it. Courses in this track range from "American English" and "Language Use in the African American Community" to "Discourse Analysis" and "Language, Gender, and Culture."

(LING)ENGL 4000/6000. History of the English Language. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of present English through the stages of Old English, Middle English, and early Modern English. Study of elementary phonetics, phonemics, sound change, and dialect variation.

(LING)ENGL 4010/6010. American English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The history, present status, and future prospects of American English, including standards and internal variation.

(LING)ENGL 4060/6060. Old English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The language and literature of England before the Norman Conquest, with reading of selected texts.

(LING)ANTH 4090/6090. Cognitive Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Folk systems of knowledge, with an emphasis on how people in different societies culturally identify, define, label, and classify phenomena such as color terms, plants, animals, and other environmental resources.

(LING)ENGL 4110/6110. English Grammar. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English grammar in the scholarly tradition of Curme and Jespersen.

(LING)CMSD 4120/6120. Anatomy and Physiology of Speech, Voice, and Hearing. 3 hours.
Prerequisite: Permission of department.
Anatomical structures and basic physiological functions underlying audition, respiration, phonation, articulation, resonance, and swallowing.

(LING)CMSD 4140/6140. Introduction to Speech and Voice Science. 3 hours.
Prerequisite: CMSD 4090/6090 and CMSD(LING) 4120/6120 and PSYC 1101 and (MATH 1101 or PHYS 1010 or permission of department).
Application of basic physical principles to production and perception of speech and voice. Biomechanics of vocal fold oscillation; acoustics of voice source; resonance; acoustic phonetics; psychoacoustics of speech and voice. Interpretation of objective measures and outputs of computational models.

(LING)GREK(LATN) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo-European.

(LING)ENGL 4170/6170. Second Language Acquisition. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Linguistic theories of second language acquisition, with emphasis on the acquisition of English. Topics include order of acquisition, sociocultural factors with linguistic bases, and neurolinguistic models.

(LING)ENGL 4180/6180. ESL Error Analysis. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Psycholinguistic theory applied to problems in second language learning, and the prediction of language behavior through the use of contrastive analysis.

LING 4210/6210. Introduction to Indo-European Studies. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The Indo-European language family: the various early Indo-European dialects, their grammatical structures, and the evolution of those structures from the proto-language.

(LING)PHIL 4300/6300. Philosophy of Language. 3 hours.
Prerequisite: Permission of department.
Topics such as formal and ordinary languages, meaning, reference, truth, definition, analyticity, ambiguity, metaphor, symbolism, and the uses of language.

(LING)GRMN 4460/6460. Structure of Modern German. 3 hours.
Prerequisite: GRMN 3001.
Linguistic and sociolinguistic structure of modern German with relevant linguistic terminology. Emphasis on phonology, morphology, and syntax. Taught in English.

(LING)CMSD 4500/6500. Study of Language Development. 3 hours.
Prerequisite: CMSD 4130/6130 or permission of department.
Normal development of children's reception, integration, and expression of linguistic information; cultural, gender, socioeconomic, cognitive, and prelinguistic influences on language development.

(LING)PHIL 4510/6510. Deductive Systems. 3 hours.
Prerequisite: PHIL 2500.
Symbolic-mathematical logic, examining the propositional and predicate calculi, with emphasis on problems in translation and formalization and topics in the philosophy of logic and mathematics.

(LING)PHIL 4520/6520. Model Theory. 3 hours.
Prerequisite: PHIL(LING) 4510/6510.
Formal semantics for sentential and first-order predicate logic, including both soundness and completeness results for first-order logic. Additional topics may include Goedel's incompleteness results, the Skolem-Lowenheim theorem, or possible world semantics for modal logics.

LING(CLAS) 4610/6610. Sanskrit I. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The phonology, morphology, and syntax of the classical Sanskrit language, emphasizing the position of Sanskrit within the Indo-European language family and its importance for Indo-European linguistics.

LING(CLAS) 4620/6620. Sanskrit II. 3 hours.
Prerequisite: LING(CLAS) 4610/6610.
Continued studies in both the synchronic and diachronic grammar of classical Sanskrit.

LING 4690/6690. Historical Linguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Traditional methods of historical linguistics are reviewed, with examples from several different language families. Various kinds of possible phonological and syntactic changes are investigated in relation to modern linguistic theory.

LING 4710/6710. Languages in Contact. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The influence of languages on other languages spoken in the same or neighboring areas, including pidgins and creoles, with consideration of relationships in phonology, morphology, syntax, semantics, and vocabulary.

LING(CMLT) 4740/6740. Discourse Analysis. 3 hours.
Prerequisite: LING 2100 or permission of department.
An interdisciplinary study of language use, text analysis, and evaluation. The course will provide students with the ability to investigate and evaluate structural features of language and to identify the strategies used by different writers based on style and cultural backgrounds.

LING(ANTH) 4860/6860. Sociolinguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The study of language as a cultural and social phenomenon. Topics include language and meaning, language and world view, language and social behavior, and language and social issues.

LING(CMLT) 4870/6870. Language, Gender, and Culture. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The role of language and culture in the formation of philosophical assumptions about gender differentiation in society.

LING 4900/6900. Topics in Indo-European Linguistics. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The synchronic and diachronic grammar of an older Indo-European language. Possible offerings include Avestan, Hittite, Lithuanian, Old Church, Slavic, and Old Irish or topics such as Indo-European phonology, morphology, or syntax.

(LING)ENGL(AFAM) 6040. Language Use in the African American Community. 3 hours.
Prerequisite: Permission of department.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

(LING)ENGL 6070. Middle English. 3 hours.
Prerequisite: ENGL(LING) 4000/6000 or ENGL (LING) 4060/6060 or permission of department.
The English language of the Middle English period,

including the development of the language from the end of the Old English period through the transition to Modern English.

(LING)GRMN 6380. Contrastive Grammar: German-English. 3 hours.
Identification and examination of the salient structural similarities and differences between German and English.

LING 6570. Applied Natural Language Processing. 3 hours.
Not open to students with credit in CSCI(LING) 8570. Computer processing of human languages, intended for linguists with a variable amount of previous computer experience. Emphasis is on use of existing software rather than programming.

(LING)GRMN 6600. History of the German Language. 3 hours.
The origins of modern standard German from the Indo-European parent language through proto-Germanic, Old and Middle High German, and the early modern period.

(LING)FREN 6630. The French Sound System in a Social Context. 3 hours.
French phonetics: the sounds of French as they relate to levels of language from the vernacular to literature. An examination of how sounds vary with relation to region and social class. Practice in class and in the language laboratory. Given in French.

(LING)SPAN 6650. Spanish Phonetics and Phonology. 3 hours.
The Spanish sound system using core concepts of linguistics in general and phonology in particular. Characterization and transcription of spoken Spanish. Analysis of important phenomena of language variation in the Hispanic world, including national, geographical, historical, and social dialects. Given in Spanish.

(LING)FREN 6700. Applied French Linguistics. 3 hours.
Phonology of French as it determines the underlying forms of morphology with an application to the teaching of French to non-native speakers. Emphasis on the concepts of variation, acceptability, and cultural sensitivity. Given in French.

(LING)SPAN 6750. Spanish Syntax and Morphology. 3 hours.
Grammar and language usage in the study of the syntactic and morphological structures of Spanish. The syntax and morphology of the pronoun and verb systems, agreement phenomena, gerunds, comparisons, and modal and aspectual distinctions. Written self-expression on a variety of issues as practical application of grammatical structures discussed in class. Given in Spanish.

(LING)FREN 6800. French Syntax and Meaning. 3 hours.
The syntax of modern French through readings in descriptive analysis and examples of literary texts to see how word order contributes to meaning. Particular emphasis on levels of style and reflections of social class. Frequent compositions required. Given in French.

(LING)GRMN 6810. German Phonology and Morphology. 3 hours.
Theoretical and applied German phonology and word structure. Taught in English.

(LING)SPAN 6850. Spanish Applied Linguistics. 3 hours.
Phonetic and morpho-syntactic structures that are problematic for the English-speaking student of Spanish. Ways in which culture is encoded in language. Implications of Spanish linguistics for the teaching and learning of Spanish and the linguistic education of language teachers. Given in Spanish.

(LING)FREN 6910. History of the French Language in its Social and Literary Context. 3 hours.
The major changes in the history of the French language, with special attention to the interaction of linguistic and societal changes and to the representation of these changes in literary texts. Given in French.

(LING)SPAN 6950. Spanish Semantics and Pragmatics. 3 hours.
Semantic and pragmatic approaches to the study of meaning in Spanish. Differences between sentence meaning and speaker meaning. Analysis of types of discourse in Spanish such as narrative and free conversation. Given in Spanish.

LING 7000. Master's Research. 3-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

LING 7300. Master's Thesis. 3-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

(LING)GRMN 7500. Problems and Methods of Teaching College German. 3 hours.
Methods for teaching foreign language and development of language skills in German. For teaching assistants in German and graduate students in German and Language Education. Taught in English.

(LING)FREN 7700. Teaching College French. 3 hours.
Principles and methods of second language teaching applied to French. An analysis of techniques used to teach listening, speaking, reading, writing, and culture, with an examination of current theories of language acquisition. Given in French.

(LING)SPAN 7750. Teaching College Spanish. 3 hours.
Foreign language teaching and learning applied to Spanish. Theories of second language acquisition. Techniques and strategies to teach listening, speaking, reading, writing, and culture in context. Activities and procedures of classroom instruction. Issues in the professionalization of Spanish teachers. Given in Spanish.

(LING)ROML 8000. Topics in Romance Languages. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Specific aspects of Romance languages, linguistics, literatures, or cultures.

(LING)SPAN 8010. Topics in Culture, Language, Linguistics, and Literature of the Spanish-Speaking World Seminar. 3 hours. Repeatable for maximum 9 hours credit.
An intensive, integrative, and contextualized study of a specific representative topic in language, literature, culture, and linguistics of the Spanish-speaking world. Given in Spanish.

LING 8020. Language Variation. 3 hours.
Regional and social language variation within one language, including the relationship between variation and language change. Historical and present-day illustrations come primarily from English, with consideration of the significance of language variation in our modern social context.

(LING)CMSD 8050. Seminar: Language Acquisition and Disorders. 3 hours.
Prerequisite: Permission of department.
Recent issues and research in language acquisition and disorders. Major theories of development, assessment, and intervention, with emphasis on integration of theory and clinical practice.

LING 8060. Phonetics and Phonology. 3 hours.
Not open to students with credit in GRMN(LING) 6810.
Phonetic transcription of various languages dictated by native and non-native speakers; understanding of the phonemic principle by the solution of selected problems which consist of phonetically transcribed data.

LING 8070. Advanced Generative Phonology. 3 hours.
Prerequisite: LING 8060 or permission of department.
The formal nature of phonological rules and representations and how they interact to delimit possible real language phonologies, with attention given to such phenomena as syllabification, tone, and vowel harmony.

LING 8080. Seminar in Linguistic Theory. 3 hours. Repeatable for maximum 9 hours credit.
Special topics and current issues in linguistic theory.
LING 8120. Morphology. 3 hours.
Grammatical analysis of phonemically transcribed data from numerous languages of the world.

(LING)EPSY(PSYC) 8130. Psycholinguistics. 3 hours.
Recent theoretical and experimental work on the psychological aspects of semantics, grammar, and discourse processes are surveyed. Language development is also considered.

LING 8150. Generative Syntax. 3 hours.
Techniques and formalisms for analyzing syntactic phenomena of human languages within the framework of generative grammar. Examples will be drawn from English.

LING 8160. Advanced Generative Syntax. 3 hours.
Prerequisite: LING 8150.
Formal analysis of syntactic phenomena, such as the passive construction, question formation, and relative clauses, with examples drawn primarily from English.

LING 8250. Teaching College Second Language Courses. 3 hours. Repeatable for maximum 9 hours credit.
Not open to students with credit in FREN(LING) 7700 or GRMN(LING) 7500 or SPAN(LING) 7750.
The teaching of college second language courses, most often for new teaching assistants in less-common languages.

LING 8280. Seminar in Second Language Acquisition. 3 hours. Repeatable for maximum 9 hours credit.
Special topics and current issues in second language acquisition. Topics will vary; consult the Linguistics Program office for the specific topics to be covered in any offering of the seminar.

(LING)PHIL 8300. Seminar in the Philosophy of Language. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
The original course materials dealing with such topics as formal and ordinary languages, meaning, reference, descriptions, truth, definition, analyticity, speech acts, and the uses of language.

(LING)GRMN 8320. Gothic. 3 hours.
Morphology, phonology, and history of the Gothic language based on extant texts. Emphasis on the development of earlier stages of the language and on its later language forms. Taught in English.

(LING)CMSD 8360. Advanced Speech and Voice Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: [(CMSD(LING) 4140/6140 or CMSD 4150/6150)] and CSCI 1100-1100L and permission of department.
Designed for students at the early stages of thesis or dissertation planning. Specific topics vary depending on student/faculty interests. Lecture/discussion format to present research approaches to acoustic phonetics, voice science, and psychoacoustics. Emphasis on available instrumentation, measurement standards, psychophysics, and issues in signal processing of speech and voice.

(LING)CMSD 8360L. Laboratory in Advanced Speech and Voice Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CMSD(LING) 8360 and permission of department.
Hands-on laboratory exercises emphasizing digital recording techniques and signal conditioning; spectral, spectrographic, and aerodynamic measures of speech and voice; indirect measures of laryngeal vibration; computational models of peripheral auditory processing.

(LING)GRMN 8400. Middle High German. 3 hours.
Phonology and grammar of the language, with extensive readings in the prose, epic, and lyric poetry of the Middle High German era.

LING 8480. Seminar in Cognitive Linguistics. 3 hours. Repeatable for maximum 9 hours credit.
Special topics and current issues in cognitive aspects of linguistics.

(LING)GRMN 8510. Seminar in German Linguistics. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of a subject or topic in German linguistics. Taught in English.

(LING)GRMN 8520. Seminar in German Language Variation. 3 hours. Repeatable for maximum 6 hours credit.
Intensive investigation of synchronic and diachronic variation in German. Taught in English.

(LING)SPCM 8530. Language and Communication Behavior. 3 hours.
Surveys linguistic aspects of human interaction. Examines language patterns such as orality, intensity, immediacy, and power. Analyzes conversational data as well as language structures in public messages.

(LING)CSCI 8570. Natural Language Processing Techniques. 4 hours.
Prerequisite: CSCI(ARTI) 4540/6540 and LING 8150.
Human language from a computational point of view; algorithms and techniques for computer understanding of human-language input.

LING 8680. Seminar in Historical Linguistics. 3 hours. Repeatable for maximum 9 hours credit.
Special topics and current issues in historical linguistics.

(LING)FREN 8800. Seminar in French Linguistics. 3 hours. Repeatable for maximum 9 hours credit.
Topics and issues in French linguistics. Possible offerings include Old French, French dialectology, French sociolinguistics, and French semantics and pragmatics. Given in French.

(LING)ANTH 8880. Field Methods in Linguistics. 3 hours.
Prerequisite: Permission of major.
The techniques of recording and analyzing a foreign language by working directly with a native speaker.

LING 8980. Seminar in Language Variation and Sociolinguistics. 3 hours. Repeatable for maximum 9 hours credit.
Special topics and current issues in language variation and sociolinguistics.

LING 9000. Doctoral Research. 3-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

LING 9010. Directed Readings in Linguistics. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Advanced directed study of a topic in linguistics. Non-Traditional Format: Directed study.

LING 9300. Doctoral Dissertation. 3-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Marine Sciences

Robert E. Hodson, *Head*
Mary Ann Moran, *Graduate Coordinator, 542-7671*
(Marine Sciences Building)

The Department of Marine Sciences supports MS and PhD programs. Courses of study are currently offered in the biological, chemical, and physical areas of marine science. Graduate students have access to the extensive field and laboratory facilities of the School of Marine Programs in Athens and at Sapelo Island, Skidaway Island, and Brunswick on the Georgia coast.

MARS 4100/6100. General Oceanography I. 3 hours.
Prerequisite: PHYS 1112-1112L.
Oceanographic principles of the geological and physical structure, composition, and processes of the ocean with emphasis on general oceanic circulation, water properties, waves and tides, coastal physical processes, turbulent mixing, sediment transport.

MARS 4110/6110. General Oceanography II. 3 hours.
Prerequisite: BIOL 1108-1108L and CHEM 1211 and CHEM 2211.
Chemical composition, dynamics, and processes of life in the oceans and the role the life of the oceans plays in global processes.

MARS(FORS) 4380/6380-4380L/6380L. Marine Fisheries Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L and permission of department.
Interaction of oceanographic processes with the life histories and productivity of marine fisheries species, and the human interactions with major marine fisheries.

MARS 4450/6450. Introduction to Marine Chemistry. 3 hours.
Not open to students with credit in MARS 8020-8020L.
Prerequisite: CHEM 1212 and CHEM 1212L and PHYS 1212-1212L and MATH 2200 and MATH 2200L and MARS 4110/6110.
Chemical properties of oceanic systems, oceanic acid base equilibrium, redox chemistry, nutrient cycling, and radioactive processes.

MARS 4500/6500. Field Study in Oceanography and Marine Methods. 5 hours. 15 hours lecture and 5 lab periods of 5 hours each per week.
Prerequisite: Permission of department.
Laboratory and fieldwork in chemical, biological, sedimentological, and physical oceanographic processes and methods in southeast esturaine, coastal, and shelf environments. Non-Traditional Format: A field study course taught off-campus.

MARS 4510/6510. Field Study in Oceanography and Marine Methods: Independent Research. 3-7 hours. Repeatable for maximum 7 hours credit. 5 lab periods of 8 hours each per week.
Prerequisite: Permission of department.
Independent field research on oceanographic processes. Non-Traditional Format: A field study course taught off-campus.

MARS(MIBO) 4620/6620-4620L/6620L. Microbial Ecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500 or permission of department.
Emphasizes the roles of microorganisms in ecosystems. Nutrient cycles, methods of microbial analysis, and the functional roles of microorganisms.

MARS 4810/6810. Microbial Biogeochemistry. 3 hours.
Prerequisite: [MIBO 3500 and BCMB(BIOL)(CHEM) 3100] or permission of department.
The microbial processes which are or have been important in modifying the earth's lithosphere, hydrosphere, and atmosphere. Microbially mediated precipitation and solubilization of minerals, cycling of dissolved and particulate organic matter in natural waters, and the physiological ecology of microorganisms adapted to extreme environments.

MARS 7000. Master's Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MARS 7300. Master's Thesis. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MARS 8010. Biological Oceanographic Processes. 3 hours.
Prerequisite: Permission of department.
Major biological processes in the water column and sediments of estuarine, coastal, and open sea environments, with emphasis on interactions of biota with marine chemical and physical processes.

MARS 8020-8020L. Chemical Oceanography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L and PHYS 1112-1112L and MATH 2210 and MATH 2210L.
The chemical forms, distributions, and reactivities of major and minor elements in seawater. The use of chemical tracers to investigate biological and physical processes in the ocean.

MARS 8030. General Physical Oceanography. 3 hours.
Prerequisite: (MATH 2500 and PHYS 1112-1112L) or permission of department.
Oceanic circulation and elementary dynamical principles. Major topics include observed physical properties of the world's oceans, geostrophy, and vorticity.

MARS 8100. Estuarine and Coastal Physical Oceanography. 3 hours.
Prerequisite: MARS 8030 or permission of department.
The distribution of suspended and dissolved material in estuarine and coastal waters. Role of tidal currents, winds, and freshwater discharge. Physical processes leading to mixing in estuarine and shallow coastal water. Field and laboratory collection and analysis of estuarine data.

MARS 8110. Marine Sediment Diagenesis. 3 hours.
Prerequisite: (MARS 8020-8020L and MATH 2500) or permission of department.
Nature and properties of marine sediment pore waters and surface sediments. Chemical, physical, and biological processes controlling sediment pore water chemistry and the alteration and recycling of recently deposited sedimentary materials.

MARS 8120. Geophysical Fluid Dynamics. 3 hours.
Prerequisite: (MARS 8030 and MATH 2700 and PHYS 1212-1212L) or permission of department.
Fundamental geophysical fluid dynamics of small, medium, and large scale rotating stratified fields. Derivation of the navier-stokes equation, dimensional analyses, quasi-geostrophic approximation, potential vorticity principles, buoyancy-driven flows.

MARS 8130. Seminar in Hydrobiology. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Weekly meetings for discussion of current research in marine and freshwater biology and related areas. Non-Traditional Format: Students will meet with faculty members on a regular basis.

MARS 8140. Organic Geochemistry. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and GEOL 1260-1260L.
The use of specific organic marker compounds as probes for biological and geochemical processes. Early diagenesis of lipids and other biochemicals. Molecular markers for paleoceanographic conditions. Preservation of organic matter and petroleum formation.

MARS 8150. Ocean Waves. 3 hours.
Prerequisite: (MARS 8030 and MATH 2700 and PHYS 1212-1212L) or permission of department.
Physics and mathematics of wave motions in the ocean. Kinetics of waves, phase and group velocities, frequency and wave number dispersion, instabilities, barotropic and baroclinic wave forcing, gravity waves, vorticity waves, internal waves, tides, kelvin waves, planetary rossby waves. Time series and spectral analysis as oceanographic experimental tools.

MARS 8160-8160L. Marine Ecology. 3 hours.
Prerequisite: ECOL(BIOL) 3500-3500L or permission of department.
The ecology of organisms, populations, and communities occurring in marine environments.

MARS(ANTH) 8210. Topics in Coastal Marine Policy. 3 hours.
Prerequisite: ECOL(BIOL) 3500-3500L or permission of department.
Coastal marine policy approached from scientific, legal, and anthropological perspectives. This interdisciplinary course provides a general background in coastal policy, and uses a case study approach to examine current topics in marine resource management. Topics include: coastal zone management, coastal groundwater supply, coastal fisheries, development in the coastal zone.

MARS 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MARS 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Mathematics

Kevin F. Clancey, *Head*
Kenneth D. Johnson, *Graduate Coordinator, 542-2211*
(Boyd Graduate Studies Research Center)

The Department of Mathematics offers the MA degree, the MAMS degree, and the PhD degree. Students who are working on the MA degree may choose to major in mathematics with either a thesis option or non-thesis option. The department, along with the Departments of Statistics, Computer Science, and Insurance, Legal Studies, Real Estate, and Management Sciences, offers a professional master's degree, Master of Applied Mathematical Science (MAMS). The MAMS degree requires a technical report. The department also cooperates with the College of Education in the MEd degree and the PhD degree with a major in mathematics education.

Language requirements: one foreign language for MA and two foreign languages for PhD (from French, German, and Russian). A computer science or statistics research skills requirement may be substituted for one foreign language.

MATH 4000/6000. Modern Algebra and Geometry I. 3 hours.
Prerequisite: (MATH 3000 and MATH 3200) or permission of department.
Abstract algebra, emphasizing geometric motivation and applications. Beginning with a careful study of integers, modular arithmetic, and the Euclidean algorithm, the course moves on to fields, isometries of the complex plane, polynomials, splitting fields, rings, homomorphisms, field extensions, and compass and straightedge constructions.

MATH 4010/6010. Modern Algebra and Geometry II. 3 hours.
Prerequisite: MATH 4000/6000.
More advanced abstract algebraic structures and concepts, such as groups, symmetry, group actions, counting principles, symmetry groups of the regular polyhedra, Burnside's Theorem, isometries of R^3, Galois Theory, and affine and projective geometry.

MATH 4050/6050. Advanced Linear Algebra. 3 hours.
Prerequisite: MATH 4000/6000.
Orthogonal and unitary groups, spectral theorem; infinite dimensional vector spaces; Jordan and rational canonical forms and applications.

MATH 4080/6080. Advanced Algebra. 3 hours.
Prerequisite: MATH 4010/6010 or permission of department.

Linear algebra, groups, rings, and modules, intermediate in level between Modern Algebra and Geometry II and Algebra. Topics include the finite-dimensional spectral theorem, group actions, classification of finitely generated modules over principal ideal domains, and canonical forms of linear operators.

MATH 4100/6100. Real Analysis. 3 hours.
Prerequisite: (MATH 3100 and MATH 3200) or permission of department.
Metric spaces and continuity; differentiable and integrable functions of one variable; sequences and series of functions.

MATH 4110/6110. The Lebesgue Integral and Applications. 3 hours.
Prerequisite: MATH 4100/6100 or MATH 4200/6200 or permission of department.
The Lebesgue integral with applications to Fourier analysis and probability.

MATH 4120/6120. Multivariable Analysis. 3 hours.
Prerequisite: MATH 3510 or MATH 4100/6100 or MATH 4200/6200.
The derivative as a linear map, inverse and implicit function theorems, change of variables in multiple integrals; manifolds, differential forms, and the generalized Stokes' Theorem.

MATH 4150/6150. Complex Variables. 3 hours.
Prerequisite: (MATH 2500 and MATH 3100) or MATH 3510.
Differential and integral calculus of functions of a complex variable, with applications. Topics include the Cauchy integral formula, power series and Laurent series, and the residue theorem.

MATH 4200/6200. Point Set Topology. 3 hours.
Prerequisite: MATH 3100 and MATH 3200.
Topological spaces, continuity; connectedness, compactness; separation axioms and Tietze extension theorem; function spaces.

MATH 4220/6220. Differential Topology. 3 hours.
Prerequisite: MATH 4120/6120 and (MATH 4100/6100 or MATH 4200/6200).
Manifolds in Euclidean space: fundamental ideas of transversality, homotopy, and intersection theory; differential forms, Stokes' Theorem, deRham cohomology, and degree theory.

MATH 4250/6250. Differential Geometry. 3 hours.
Prerequisite: (MATH 2500 and MATH 3000) or MATH 3510.
The geometry of curves and surfaces in Euclidean space: Frenet formulas for curves, notions of curvature for surfaces; Gauss-Bonnet Theorem; discussion of non-Euclidean geometries.

MATH 4300/6300. Introduction to Algebraic Curves. 3 hours.
Prerequisite: MATH 4000/6000 or permission of department.
Polynomials and resultants, projective spaces. The focus is on plane algebraic curves: intersection, Bezout's theorem, linear systems, rational curves, singularities, blowing up.

MATH 4400/6400. Number Theory. 3 hours.
Prerequisite: MATH 4000/6000.
Euler's theorem, public key cryptology, pseudoprimes, multiplicative functions, primitive roots, quadratic reciprocity, continued fractions, sums of two squares and Gaussian integers.

MATH 4450/6450. Cryptology and Computational Number Theory. 3 hours.
Prerequisite: MATH 4000/6000.
Recognizing prime numbers, factoring composite numbers, finite fields, elliptic curves, discrete logarithms, private key cryptology, key exchange systems, signature authentication, public key cryptology.

MATH 4500/6500. Numerical Analysis I. 3 hours.
Prerequisite: MATH 3000.
Prerequisite or corequisite: MATH 3100.
Methods for finding approximate numerical solutions to a variety of mathematical problems, featuring careful error analysis. A mathematical software package will be used to implement iterative techniques for nonlinear equations, polynomial interpolation, integration, and problems in linear algebra such as matrix inversion, eigenvalues and eigenvectors.

MATH 4510/6510. Numerical Analysis II. 3 hours.
Prerequisite: (MATH 2500 or MATH 3510) and MATH 2700 and MATH 4500/6500.
Numerical solutions of ordinary and partial differential equations, higher-dimensional Newton's method, and splines.

MATH 4600/6600. Probability. 3 hours.
Prerequisite: (MATH 2500 and MATH 3100) or MATH 3510.
Discrete and continuous random variables, expectation, independence and conditional probability; binomial, Bernoulli, normal, and Poisson distributions; law of large numbers and central limit theorem.

MATH(CSCI) 4630/6630. Mathematical Analysis of Computer Algorithms. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Discrete algorithms (number-theoretic, graph-theoretic, combinatorial, and algebraic) with an emphasis on techniques for their mathematical analysis.

MATH(CSCI) 4670/6670. Combinatorics. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Basic counting principles: permutations, combinations, probability, occupancy problems, and binomial coefficients. More sophisticated methods include generating functions, recurrence relations, inclusion/exclusion principle, and the pigeonhole principle. Additional topics include asymptotic enumeration, Polya counting theory, combinatorial designs, coding theory, and combinatorial optimization.

MATH(CSCI) 4690/6690. Graph Theory. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Elementary theory of graphs and digraphs. Topics in-

clude connectivity, reconstruction, trees, Euler's problem, hamiltonicity, network flows, planarity, node and edge colorings, tournaments, matchings, and extremal graphs. A number of algorithms and applications are included.

MATH 4700/6700. Qualitative Ordinary Differential Equations. 3 hours.
Prerequisite: MATH 2700 and (MATH 3000 or MATH 3500).
Transform methods, linear and nonlinear systems of ordinary differential equations, stability, and chaos.

MATH 4720/6720. Introduction to Partial Differential Equations. 3 hours.
Prerequisite: MATH 2700 and (MATH 2500 or MATH 3510).
The basic partial differential equations of mathematical physics: Laplace's equation, the wave equation, and the heat equation. Separation of variables and Fourier series techniques are featured.

MATH 4760/6760. Mathematics and Music. 3 hours.
Prerequisite: MATH 2210 or MATH 2310H or MATH 2410H.
This course is intended for undergraduates (math majors, music majors, and others) interested in the mathematical aspects of music. At least some familiarity with musical notation is a prerequisite. Topics to be discussed include the structure of sound, the construction of scales, and synthesis.

MATH 4780/6780. Mathematical Biology. 3 hours.
Prerequisite: MATH 2700 and (MATH 3000 or MATH 3500).
Mathematical models in the biological sciences: compartmental flow models, dynamic system models, discrete and continuous models, deterministic and stochastic models.

MATH 4850/6850. History of Mathematics. 3 hours.
Prerequisite: Senior standing.
The development of mathematical thought from ancient times to the present, paying particular attention to the context of today's mathematics curriculum.

MATH 4900/6900. Topics in Mathematics. 3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: Senior standing.
A special topic not otherwise offered in the mathematics curriculum.

MATH 5020/7020. Arithmetic for Middle School Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Operations of arithmetic for middle school teachers; number systems; set theory to study mappings, functions, and equivalence relations.

MATH 5030/7030. Geometry and Measurement for Middle School Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Principles of geometry and measurement for middle school teachers.

MATH 5070/7070. Calculus for Advanced Placement Teachers. 3 hours.
Prerequisite: MATH 2500.
Variable calculus designed to prepare in-service secondary school teachers for effective instruction of advanced placement students. Emphasizes concepts and principles underlying differential and integral calculus of a single variable.

MATH 5200/7200. Foundations of Geometry I. 3 hours.
Prerequisite: MATH 3000 and MATH 3200.
Advanced elementary geometry for prospective teachers of secondary school mathematics: axiom systems and models; the parallel postulate; neutral, Euclidean, and non-Euclidean geometries.

MATH 5210/7210. Foundations of Geometry II. 3 hours.
Prerequisite: MATH 5200/7200.
Further development of the axioms and models for Euclidean and non-Euclidean geometry; transformation geometry.

MATH 5560/7560. Probability and Statistics for Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Fundamental ideas of probability with particular emphasis on their applications in statistics.

MATH 6800. Directed Reading and/or Projects. 1-6 hours. Repeatable for maximum 30 hours credit.
Directed reading and/or project at the master's level. Non-Traditional Format: Directed study.

MATH 7000. Master's Research. 1-6 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MATH 7040. Basic Ideas of Calculus I. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Survey of one-variable calculus in preparation for teaching calculus at the secondary level: combines review of basic techniques with careful study of underlying concepts.

MATH 7050. Basic Ideas of Calculus II. 3 hours.
Prerequisite: MATH 7040.
A continuation of Basic Ideas of Calculus I focusing on functions of several variables.

MATH 7100. Technical Report. 3 hours.
For use with the Master's degree in Applied Mathematical Science - Mathematics option. Non-Traditional Format: Independent research under the direction of a faculty member.

MATH 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MATH 8000. Algebra. 3 hours.
Prerequisite: MATH 4080/6080 or permission of department.
A course in groups, fields and rings, designed to prepare the student for the algebra prelims. Some topics covered include the Sylow theorems, solvable and simple groups, Galois theory, finite fields, Noetherian rings and modules.

MATH 8010. Representation Theory of Finite Groups. 3 hours.
Prerequisite: MATH 8000.
Irreducible and indecomposable representations, Schur's lemma, Maschke's theorem, the Wedderburn structure theorem, characters and orthogonality relations, induced representations and Frobenius reciprocity, central characters and central idempotents, Burnside's p^a q^b theorem, Frobenius normal p-complement theorem.

MATH 8020. Communative Algebra. 3 hours.
Prerequisite: MATH 8000.
Localization and completion, Nakayama's lemma, Dedekind domains, Hilbert's basis theorem, Hilbert's Nullstellensatz, Krull dimension, depth and Cohen-Macaulay rings, regular local rings.

MATH 8030. Topics in Algebra. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 8000 or permission of department.
Topics in abstract algebra at the level of current research.

MATH 8080. Lie Algebras. 3 hours.
Prerequisite: MATH 8000.
Nilpotent and solvable Lie algebras, structure and classification of semisimple Lie algebras, roots, weights, finite-dimensional representations.

MATH 8100. Real Analysis I. 3 hours.
Prerequisite: MATH 4100/6100 or permission of department.
Measure and integration theory with relevant examples from Lebesgue integration, Hilbert spaces (only with regard to L^2), L^p spaces and the related Riesz representation theorem. Hahn, Jordan and Lebesgue decomposition theorems, Radon-Nikodym Theorem and Fubini's Theorem.

MATH 8110. Real Analysis II. 3 hours.
Prerequisite: MATH 8100.
Topics including: Haar Integral, change of variable formula, Hahn-Banach theorem for Hilbert spaces, Banach spaces and Fourier theory (series, transform, Gelfand-Fourier homomorphism).

MATH 8150. Complex Variables I. 3 hours.
The Cauchy-Riemann Equations, linear fractional transformations and elementary conformal mappings, Cauchy's theorems and its consequences, including Morera's theorem, Taylor and Laurent expansions, maximum principle, residue theorem, argument principle, Rouche's theorem and Liouville's theorem.

MATH 8160. Complex Variables II. 3 hours.
Prerequisite: MATH 8150.
Topics including Riemann Mapping Theorem, elliptic functions, Mittag-Leffler and Weierstrass Theorems, analytic continuation and Riemann surfaces.

MATH 8170. Functional Analysis I. 3 hours.
Prerequisite: MATH 8100.
Hilbert spaces and Banach spaces, spectral theory, topological vector spaces, comvexity and its consequences, including the Krein-Milman theorem.

MATH 8180. Functional Analysis II. 3 hours.
Prerequisite: MATH 8170 or permission of department.
Operator theory, spectral theorem for normal operators, distribution theory, the Schwartz spaces, topics from C*-algebras and von Neumann algebras.

MATH 8190. Lie Groups. 3 hours.
Prerequisite: MATH 8000 and MATH 8250.
Classical groups, exponential map, Poincare-Birkhoff-Witt Theorem, homogeneous spaces, adjoint representation, covering groups, compact groups, Peter-Weyl Theorem, Weyl character formula.

MATH 8200. Algebraic Topology. 3 hours.
Prerequisite: MATH 4200/6200.
The fundamental group, van Kampen's theorem, and covering spaces. Introduction to homology: simplicial, singular, and cellular. Applications.

MATH 8210. Topology of Manifolds. 3 hours.
Prerequisite: MATH 8200.
Poincare duality, deRham's theorem, topics from differential topology.

MATH 8220. Homotopy Theory. 3 hours.
Prerequisite: MATH 8200.
Topics in homotopy theory, including homotopy groups, CW complexes, and fibrations.

MATH 8230. Topics in Topology and Geometry. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 8200 or permission of department.
Advanced topics in topology and/or differential geometry leading to and including research level material.

MATH 8250. Differential Geometry I. 3 hours.
Prerequisite: MATH 4200/6200.
Differentiable manifolds, vector bundles, tensors, flows, and Frobenius' theorem. Introduction to Riemannian geometry.

MATH 8260. Differential Geometry II. 3 hours.
Prerequisite: MATH 8250.
Riemannian geometry: connections, curvature, first and second variation; geometry of submanifolds. Gauss-Bonnet theorem. Additional topics, such as characteristic classes, complex manifolds, integral geometry.

MATH 8300. Introduction to Algebraic Geometry. 3 hours.
Prerequisite: MATH 8000.
An invitation to algebraic through a study of examples.

Affine and projective varieties, regular and rational maps, Nullstellensatz. Veronese and Segre varieties, Grassmannians, algebraic groups, quadrics. Smoothness and tangent spaces, singularities and tangent cones.

MATH 8310. Geometry of Schemes. 3 hours.
Prerequisite: MATH 8020 and MATH 8300.
The language of Grothendieck's theory of schemes. Topics include the spectrum of a ring, "gluing" spectra to form schemes, products, quasi-coherent sheaves of ideals, and the functor of points.

MATH 8320. Algebraic Curves. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 8300.
The theory of curves, including linear series and the Riemann Roch theorem. Either the algebraic (variety), arithmetic (function field), or analytic (Riemann surface) aspect of the subject may be emphasized in different years.

MATH 8330. Topics in Algebraic Geometry. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 8300.
Advanced topics such as algebraic surfaces, or cohomology and sheaves.

MATH 8400. Algebraic/Analytic Number Theory I. 3 hours.
Prerequisite: MATH 4080/6080 or permission of department.
The core material of algebraic number theory: number fields, rings of integers, discriminants, ideal class groups, Dirichlet's unit theorem, splitting of primes; p-adic fields, Hensel's lemma, adeles and ideles, the strong approximation theorem.

MATH 8410. Algebraic/Analytic Number Theory II. 3 hours.
Prerequisite: MATH 8400 or permission of department.
A continuation of Algebraic and Analytic Number Theory I, introducing analytic methods: the Riemann Zeta function, its analytic continuation and functional equation, the Prime number theorem; sieves, the Bombieri-Vinogradov theorem, the Chebotarev density theorem.

MATH 8430. Topics in Arithmetic Geometry. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Topics in Algebraic number theory and Arithmetic geometry, such as class field theory, Iwasawa theory, elliptic curves, complex multiplication, cohomology theories, Arakelov theory, diophantine geometry, automorphic forms, L-functions, representation theory.

MATH 8440. Topics in Combinatorial/Analytic Number Theory. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Topics in combinatorial and analytic number theory, such as sieve methods, probabilistic models of prime numbers, the distribution of arithmetic functions, the circle method, additive number theory, transcendence methods.

MATH 8450. Topics in Algorithmic Number Theory. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Topics in computational number theory and algebraic geometry, such as factoring and primality testing, cryptography and coding theory, algorithms in number theory and arithmetic geometry.

MATH 8500. Advanced Numerical Analysis I. 3 hours.
Prerequisite: MATH 4510/6510.
Prerequisite or corequisite: MATH 4100/6100.
Numerical solution of nonlinear equations in one and several variables, numerical methods for constrained and unconstrained optimization, numerical solution of linear systems, numerical methods for computing eigenvalues and eigenvectors, numerical solution of linear least squares problems, computer applications for applied problems.

MATH 8510. Advanced Numerical Analysis II. 3 hours.
Prerequisite: MATH 8500.
Polynomial and spline interpolation and approximation theory, numerical integration methods, numerical solution of ordinary differential equations, computer applications for applied problems.

MATH 8520. Advanced Numerical Analysis III. 3 hours.
Prerequisite: MATH 8500.
Finite difference and finite element methods for elliptic, parabolic, and hyperbolic partial differential equations, convergence and stability of those methods, numerical algorithms for the implementation of those methods.

MATH 8550. Special Topics in Numerical Analysis. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: MATH 8500.
Special topics in numerical analysis, including iterative methods for large linear systems, computer aided geometric design, multivariate splines, numerical solutions for pde's, numerical quadrature and cubature, numerical optimization, wavelet analysis for numerical imaging. In any semester, one of the above topics will be covered.

MATH 8600. Probability. 3 hours.
Prerequisite: MATH 8100.
Probability spaces, random variables, distributions, expectation and higher moments, conditional probability and expectation, convergence of sequences and series of random variables, strong and weak laws of large numbers, characteristic functions, infinitely divisible distributions, weak convergence of measures, central limit theorems.

MATH 8620. Stochastic Processes. 3 hours.
Prerequisite: MATH 8100.
Conditional expectation, Markov processes, martingales and convergence theorems, stationary processes, introduction to stochastic integration.

MATH 8630. Stochastic Analysis. 3 hours.
Prerequisite: MATH 8100.
Conditional expectation, Brownian motion, semimartingales, stochastic calculus, stochastic differential equations, stochastic control, stochastic filtering.

MATH 8700. Applied Mathematics: Applications in Industry. 3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: MATH 4720/6720.
Mathematical modeling of some real-world industrial problems. Topics will be selected from a list which includes air quality modeling, crystal precipitation, electron beam lithography, image processing, photographic film development, production planning in manufacturing, and optimal control of chemical reactions.

MATH 8710. Applied Mathematics: Variational Methods/Perturbation Theory. 3 hours.
Prerequisite: MATH 4100/6100.
Calculus of variations, Euler-Lagrange equations, Hamilton's principle, approximate methods, eigenvalue problems, asymptotic expansions, method of steepest descent, method of stationary phase, perturbation of eigenvalues, nonlinear eigenvalue problems, oscillations and periodic solutions, Hopf bifurcation, singular perturbation theory, applications.

MATH 8740. Ordinary Differential Equations. 3 hours.
Prerequisite: MATH 4100/6100.
Solutions of initial value problems: existence, uniqueness, and dependence on parameters, differential inequalities, maximal and minimal solutions, continuation of solutions, linear systems, self-adjoint eigenvalue problems, Floquet Theory.

MATH 8750. Introduction to Dynamical Systems. 3 hours.
Prerequisite: MATH 8740.
Continuous dynamical systems, trajectories, periodic orbits, invariant sets, structure of alpha and omega limit sets, applications to two-dimensional autonomous systems of ODE's, Poincare-Bendixson Theorem, discrete dynamical systems, infinite dimensional spaces, semi-dynamical systems, functional differential equations.

MATH 8770. Partial Differential Equations. 3 hours.
Prerequisite: MATH 4100/6100.
Classification of second order linear partial differential equations, modern treatment of characteristics, function spaces, Sobolev spaces, Fourier transform of generalized functions, generalized and classical solutions, initial and boundary value problems, eigenvalue problems.

MATH 8800. Directed Reading and/or Projects. 1-6 hours. Repeatable for maximum 30 hours credit.
Directed reading and/or project at the doctoral level. Non-Traditional Format: Directed study.

MATH 8900. Seminar in Algebra. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in algebra.

MATH 8910. Seminar in Analysis. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in analysis.

MATH 8920. Seminar in Topology. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in topology.

MATH 8930. Seminar in Algebraic Geometry. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in algebraic geometry.

MATH 8940. Seminar in Number Theory. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in number theory.

MATH 8950. Seminar in Numerical Analysis. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in numerical analysis.

MATH 8960. Seminar in Probability. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in probability.

MATH 8970. Seminar in Applied Mathematics. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in applied mathematics.

MATH 8980. Seminar in Geometry. 1-3 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
A study of some phase of current research in geometry.

MATH 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MATH 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Microbiology

Lawrence J. Shimkets, *Head*
Juergen K. W. Wiegel, *Graduate Coordinator, 542-2651*
(Biological Sciences Building)

Programs of study leading to both MS and PhD degrees are offered in different fields of microbiology including microbial genetics, microbial ecology, microbial pathogenesis, cell biology, microbial physiology, anaerobic microbiology, and biotechnology. The department occupies over 34,000 square feet of recently renovated space, with laboratories equipped for electrophoretic analyses, gas-liquid chromatography, high-performance liquid chromatography, tissue culture, radioisotopic studies, light spectroscopy, fluorimetry, cell fractionation, ultracentrifugation, fermentation and computerized molecular sequence/structure analyses. In addition, on-campus facilities available to faculty and students include an electron microscopy center, a large-scale fermentation laboratory, a cell analysis facility for flow cytometry, and a molecular genetics instrumentation laboratory offering automated protein and DNA sequencing, amino acid analysis, oligonucleotide synthesis and peptide synthesis services. The Georgia Marine Institute on Sapelo Island, the Skidaway Institute of Oceanography, and the Savannah River Ecology Laboratory are available for environmental studies in connection with a faculty member from this department.

Prospective students should have credit for courses in either calculus or statistics, general genetics, biochemistry, and a year each of inorganic and organic chemistry, with labs. Applicants with otherwise acceptable qualifications may enroll in those courses they lack after admission to our program. No foreign language is required for the master's or doctoral degrees. For teaching assistants, the Test of Spoken English (TSE) is required of all foreign applicants whose native language is not English.

Prospective students should address inquiries to the Graduate Coordinator, Department of Microbiology. Graduate students are normally admitted at the beginning of fall semester, but in special circumstances a student may be admitted at the beginning of any semester. Students whose applications are complete by February 1 will be considered for financial assistance, which usually begins in the fall semester. In addition to several attractive fellowships, assistantships are available for teaching and research. A typical twelve-month stipend ranges from $10,900 to $15,511 depending on the degree objective and level of experience. Support for PhD students on the Microbial Diversity research training grant is also available. All students supported by assistantships receive a waiver of the tuition, except the activity fee and health insurance.

Faculty members are associated with six interdepartmental programs including cell and developmental biology, ecology, genetics, metalloenzymes, microbial diversity, and parasitology. Graduate course offerings in these interdepartmental programs are available to microbiology students and serve to complement the graduate course offerings in microbiology. The listings in biochemistry and molecular biology, biology, botany, chemistry, cellular biology, ecology, genetics, marine sciences, and medical microbiology should be consulted to determine the range of courses available to microbiology majors.

Additional information is also available at our website: http://www.uga.edu/mib.

MIBO 4010/6010. Critical Review of Research in Microbiology. 2 hours. Repeatable for maximum 6 hours credit.
Prerequisite: MIBO 3500 and permission of department.
Corequisite: MIBO 4900L or MIBO 4960H or MIBO 4970H or MIBO 4980H or MIBO 4990H.
Critical analysis and discussion of recent advances in microbiology research through oral presentation. Specific topics may vary but will emphasize molecular biology, physiology, and ecology of prokaryotes.

(MIBO)FDST 4030/6030-4030L/6030L. Food Microbiology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Interactions of microorganisms with food and the implications of these interactions for food preservation, safety, and fermentations. Pathogenic microorganisms associated with food. Analysis of foods for the presence of microorganisms.

MIBO 4090/6090. Prokaryotic Biology. 3 hours.
Prerequisite: MIBO 3500.
Ultrastructure, physiology, genetics, ecology, and phylogeny of bacteria and archaea.

(MIBO)CBIO 4100/6100. Immunology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and GENE (BIOL) 3200.
Immunology from an experimental perspective. Anatomy, development, and function of the immune system. Immune system in infectious diseases. Mech-

anisms and pathogenesis of immunological disorders. Evolution of immunological concepts.

(MIBO)FDST 4120/6120-4120L/6120L. Food Fermentations. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Microbial and technical aspects of dairy, vegetable, meat, grain, and fruit fermentations. Products studied include cheese, sausage, beer, wine, and soy sauce.

MIBO 4220/6220. Pathogenic Bacteriology. 3 hours.
Prerequisite: MIBO 3500.
Molecular basis of bacterial virulence: identification of virulence factors, genetic regulation of virulence, and the complex interactions between bacterial pathogens and their hosts.

MIBO 4300/6300. Environmental Microbiology and Biotechnology. 3 hours.
Prerequisite: MIBO 3500.
Microorganisms used in biotechnology, agriculture, bioremediation, and industry; distribution, taxonomy, and physiology of environmentally significant microorganisms.

(MIBO)FDST(EHSC) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

(MIBO)FDST(EHSC) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

MIBO 4400L/6400L. Experimental Pathogenic Bacteriology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MIBO 4220/6220 and GENE(BIOL) 3200 and BCMB(BIOL)(CHEM) 3100.
Bacterial virulence factors and dynamic interactions between bacteria and their hosts.

MIBO 4600L/6600L. Microbial Physiology Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: (MIBO 3500 and MIBO 3510L) or permission of department.
Prerequisite or corequisite: MIBO 4220/6220.
Experimental design, execution, and interpretation as applied to microbial growth, metabolism, and diversity.

(MIBO)CRSS 4610/6610-4610L/6610L. Soil Microbiology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Microorganisms in soil and their effect on nutrient recycling, especially as it relates to environmental quality and crop production.

(MIBO)MARS 4620/6620-4620L/6620L. Microbial Ecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500 or permission of department.
Emphasizes the roles of microorganisms in ecosystems. Nutrient cycles, methods of microbial analysis, and the functional roles of microorganisms.

MIBO 4700/6700-4700L/6700L. Medical Mycology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MIBO 3500.
The yeasts, molds, and actinomycetes most likely to be encountered by a medical mycologist in a diagnostic laboratory, with special emphasis on the organisms which are pathogenic for man and other animals.

MIBO 4800L/6800L. Microbial Genetics Laboratory. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: (MIBO 3510L and GENE(BIOL) 3200) or permission of department.
Genetic analysis of bacteria, with emphasis on isolating mutants and mapping, characterizing, and cloning genes.

(MIBO)ENTO 6670-6670L. Insect Pathogens. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Insect pathology, including history, classification of diseases, insect response to pathogens, normal insect/microbe ecology, and the production and use of insect pathogens for pest control.

MIBO 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MIBO 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MIBO 7500. Introductory Microbiology for Teachers. 3 hours.
Not open to students with credit in MIBO 3500.
Prerequisite: BIOL 1108-1108L and CHEM 2211 and CHEM 2211L and BCMB(BIOL)(CHEM) 3100.
Microorganisms, with special emphasis on bacteria, their structure, function, diversity, and importance to man. Specifically for students who plan to teach in some area of microbiology.

MIBO 7510L. Introductory Microbiology Laboratory for Teachers. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Not open to students with credit in MIBO 3510L.
Prerequisite: BIOL 1108-1108L and CHEM 2211 and CHEM 2211L.
Prerequisite or corequisite: MIBO 7500 and BCMB (BIOL)(CHEM) 3100.
The primary scientific reasoning and laboratory methodology used in microbiology with an emphasis for students who plan to teach in some area of microbiology.

MIBO 8100L. Computational Methods in Biology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Scientific reasoning and computer methodological skills used in genetic, biochemical, physiological, and ecological research.

MIBO 8150. Seminar in Diversity of Microbial Research. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Physiology, ecology, phylogeny, and genetics of various bacterial groups, including studies on adaption to high or low temperatures, methanogens, human and plant pathogens, bioremediation, mercury metabolism, nitrogen fixation, heme biosynthesis, protein folding, gene expression, and cell-cell interactions. Emphasis will be placed on methods used to research these problems.

MIBO 8160. Seminar in Microbiology. 3 hours.
Prerequisite: MIBO 8610.
Techniques involved in effective seminar presentation, including preparation of visual aids, logical development of topic, and delivery. Students present a practice session to the class on an advanced microbiology topic which is videotaped and critiqued, as well as a formal seminar to the department.

MIBO 8170. Seminar in Prokaryotic Diversity. 2 hours. Repeatable for maximum 6 hours credit.
Research literature on the diversity of bacteria and archaea, including physiology, genetics, ecology, and taxonomy.

(MIBO)MMIB 8200. Pathogenic and Molecular Microbiology. 5 hours.
Prerequisite: MMIB 4220/6220 and BCMB 4020/6020.
Medical pathogens emphasizing molecular techniques.

(MIBO)MMIB 8230. Special Topics in Microbial Pathogenesis. 2 hours. Repeatable for maximum 4 hours credit.
Presentation and discussion of published research and new developments in microbial pathogenesis.

(MIBO)CBIO(BCMB) 8520. Topics in Biochemistry and Molecular Genetics of Parasites. 3 hours. Repeatable for maximum 6 hours credit. 1 hour lecture and 2 lab periods of 1 hour each per week.
Prerequisite: BCMB 8020 and GENE 8930.
Parasite cellular biochemistry and molecular genetics with potential for rational drug design. Topics include DNA replication, RNA editing, nucleic acid salvage pathways, polyamine metabolism, and glycosylphosphatidylinositol (GPI) anchors.

MIBO 8600. Fundamental Processes of Prokaryotic Cell Biology. 3 hours.
Biosynthesis of metabolic building blocks (amino acids, nucleotides, fatty acids) and macromolecules (DNA, RNA, proteins, and cell surface structures), environmental regulation, and coordination of these processes with transport and cell division as they occur in key model prokaryotes.

MIBO 8610. Prokaryotic Physiology and Diversity. 3 hours.
Physiological aspects of prokaryotic diversity. Principles of bioenergetics; fermentation pathways, including TCA cycle, glycolysis, substrate level phosphorylation, and ion pumps; aerobic and anaerobic respiration; photosynthesis, autotrophy; and aerobic and anaerobic xenobiotic degradation.

MIBO 8700. Special Topics in Microbiology. 2 hours. Repeatable for maximum 8 hours credit.
Microbial ecology, diversity, physiology, molecular genetics, biochemistry, or pathogenesis. Specific topic depends on instructor.

MIBO 8900. Research Techniques in Microbiology. 3 hours. Repeatable for maximum 6 hours credit. 2 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Research techniques in microbiology for graduate students in preparation for their thesis/dissertation projects.

MIBO 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MIBO 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Music

Richard M. Graham, *Head*
Donald R. Lowe, *Graduate Coordinator,*
542-2743
(Music Building)

The Master of Music degree is offered in composition, music literature, or performance. Stu-

dents concentrating in musicology should enroll for the Master of Arts degree. Students desiring fifth-year certification as teachers of music in the public schools should enroll for the Master of Music Education degree offered in cooperation with the College of Education. The MMEd degree also offers a concentration in music therapy for students wishing to qualify as registered music therapists.

Students desiring sixth-year certification as teachers of music in the public schools should enroll for the Specialist in Education program (sixth-year program) offered in cooperation with the College of Education.

The Doctor of Education degree with subject matter concentration in music is offered in cooperation with the College of Education.

The Doctor of Musical Arts degree is offered in performance, composition, conducting, or music education.

The Doctor of Philosophy degree is offered in music to provide students with opportunities to pursue the research and academic aspects of the discipline at the highest scholarly level.

Some music education courses are listed as EMUS courses in the College of Education section of this bulletin.

MUSI 4100/6100. Tonal Theory and Analysis. 2 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Chromatic harmonic analysis and analytical methods.

MUSI 4110/6110. Introduction to Counterpoint. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Analysis and composition using sixteenth and eighteenth-century compositional techniques.

MUSI 4120/6120. Form and Analysis. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Analysis of form focusing on music from the seventeenth, eighteenth, and nineteenth centuries.

MUSI 4130/6130. Electronic Music Composition I. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Electronic music techniques, focusing on classical and MIDI applications.

MUSI 4200/6200. Ancient, Medieval, and Renaissance Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Music from Greek and Roman society to ca. 1600.

MUSI 4210/6210. Music in the Baroque Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Musical styles and forms from Monteverdi through Bach and Handel.

MUSI 4220/6220. Music in the Classic Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Chamber, orchestral, keyboard, and operatic works from the middle and late eighteenth century.

MUSI 4230/6230. Music in the Romantic Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Emphasis on the development of song, symphony, chamber music, and opera.

MUSI 4240/6240. Modern Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Modern trends in music from Schoenberg, Stravinsky, Hindemith, and Bartok to the present.

MUSI 4250/6250. Women and Music. 3 hours.
Prerequisite: (MUSI 3210 and MUSI 3220) or permission of department.
Roles of women in music, including the history of women musicians in western art music, world cultures, and popular music; gender studies in music.

MUSI 4260/6260. Opera Literature. 2 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Representative operas from the Baroque era to the twentieth century.

MUSI 4270/6270. Non-Western Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Music of non-European cultures, including those of the Far East, Near East, and Africa.

MUSI 4280/6280. Instrumental/Vocal/Choral Literature. 2 hours.
Prerequisite: (MUSI 3210 and MUSI 3220) or permission of department.
Solo, sonata, and ensemble music composed for winds, brass, strings, piano and harpsichord, organ or voice, dating from the earliest appropriate period to the present.

MUSI 4730/6730. African American Choral Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Performance of traditional and contemporary black gospel, spiritual, and popular music.

MUSI 4740/6740. University Symphony Orchestra. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of orchestral literature of various styles and genres.

MUSI 4750/6750. University Chorus. 1 hour. Repeatable for maximum 8 hours credit.
Performance of choral literature for mixed voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4760/6760. Concert Choir. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.

Performance of choral literature for mixed voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4780/6780. Jazz Bands. 1 hour. Repeatable for maximum 8 hours credit.
Performance of works in a variety of jazz idioms and styles with emphasis on big band jazz.

MUSI 4790/6790. Chamber Music Ensemble. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Chamber music experiences in variable instrumental categories (percussion, clarinet, trombone, etc.)

MUSI 4800/6800. Contemporary Chamber Ensemble. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of modern literature for small and large ensembles.

MUSI 4830/6830. Collegium Musicum. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of early music through the Baroque.

MUSI 4840/6840. Symphonic Wind Ensemble. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of wind chamber compositions with concentration on advanced scores.

MUSI 4850/6850. Opera Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Performance of operatic literature. Non-Traditional Format: This is a performance group that requires additional rehearsal time to function. The additional time will account for what would ordinarily be homework in regular courses.

MUSI 5110/7110. Music for Childhood. 3 hours.
Prerequisite: MUSI 3110 and MUSI 3120.
Literature, techniques, and methodologies for teaching children music in a diverse society; a study of children's musical development.

MUSI 5120/7120. Teaching Music for Early Childhood Teachers. 3 hours.
Prerequisite: MUSI 3050.
Music teaching techniques, methods, and materials for the early childhood teacher. For education majors only.

MUSI 5130/7130. Early Childhood Musical Development. 3 hours.
Prerequisite: MUSI 3110 and MUSI 3120.
Musical development of children from birth through age eight years emphasizing auditory perception, auditory discrimination, responses of children to music, modes of learning music, and children's acquisition of musical performance skills, and understandings.

MUSI 5140/7140. Computer-Assisted Instruction in Music. 2 hours.
Prerequisite: MUSI 2120 and MUSI 2130.
Programming and testing CAI music lessons.

MUSI 5260/7260. Marching Band Techniques. 2 hours.
Methods and techniques for organizing and training marching bands; planning music, drills, formations, and shows.

MUSI 5270/7270. Advanced Conducting. 2 hours.
Prerequisite: MUSI 3490 or MUSI 3500 or MUSI 3510.
Choral and instrumental conducting methods and techniques with application in laboratory situations.

MUSI 5280/7280. Instrumental Techniques. 1 hour. Repeatable for maximum 4 hours credit.
Performance techniques and teaching methods for wind, string, and percussion instruments.

MUSI 5290/7290. Jazz Piano Improvisation Class. 2 hours.
Skills and techniques in keyboard jazz playing based upon a knowledge of modern popular harmonic and notational practices.

MUSI 5340/7340. Choral Literature and Performance Practice. 2 hours.
Prerequisite: MUSI 3130 and MUSI 3140.
Choral music, including multicultural materials, suitable for all levels and voices.

MUSI 5350/7350. Instrumental Literature and Performance Practice. 2 hours.
Prerequisite: MUSI 3150 and MUSI 3160.
Instrumental music, including multicultural materials, suitable for all levels of instruction for band, orchestra, and chamber music.

MUSI 5400/7400. Principles of Music Therapy. 3 hours.
Music as human behavior and its uses as therapeutic intervention with various populations.

MUSI 5410/7410. Psychology of Music. 3 hours.
Prerequisite: MUSI 5400/7400.
Acoustical and psychological aspects of music with emphasis upon problems of perception, experimental aesthetics, musical function, measurement and diagnosis of musical ability.

MUSI 5420/7420. Influence of Music on Behavior. 3 hours.
Prerequisite: MUSI 5410/7410.
Physiological effects of music, the relation of music to health, and the place of music in the habilitative and rehabilitative process.

MUSI 5430/7430. Clinical Experience. 2 hours.
Prerequisite: MUSI 5400/7400 or MUSI 5420/7420 or MUSI 5440/7440.
Practical application of music therapy in an assigned clinic, along with seminars to analyze effectiveness, in-depth interactions, intervention strategies, and accountability measures.

MUSI 5440/7440. Music in Recreation. 2 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or MUSI 2530 or MUSI 3480.
Methods of song leading and accompanying on the autoharp, guitar, and piano.

MUSI 5450/7450. Music for Exceptional Children. 3 hours.
Prerequisite: Junior standing and permission of department.
Trends in special education, characteristics and needs of those classified as exceptional, curriculum development, and intervention strategies. Mainstreamed and self-contained settings will be discussed.

MUSI 5730/7730. Electronic Music Composition II. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: MUSI 4130/6130.
Electronic music compositional techniques, focusing on digital sound recording, sampling, and editing. Students will use highly advanced recording and editing software on a high-speed computer.

MUSI 6000. Directed Independent Study. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent research topics directed by a faculty member at the masters level. Non-Traditional Format: Directed study.

MUSI 6010. Trends and Issues in Music Education. 3 hours.
Prerequisite: Permission of department.
Current trends and issues in music education, the historical and social foundations of American music education, music education bibliography, and the role of research in music education.

MUSI 6140. Eighteenth-Century Counterpoint. 3 hours.
Prerequisite: MUSI 4110/6110.
Eighteenth-century counterpoint focusing on invention, canon, and fugue in the works of J.S. Bach.

MUSI 6290. Music History Problems. 3 hours.
Western music literature, styles, genres, and composers from the Medieval period to the present day.

MUSI 6300. Music Bibliography. 3 hours.
Library research, documentation, and writing.

MUSI 7000. Master's Research. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MUSI 7030. Research in Music Education. 3 hours.
Basic concepts, types, and techniques of research as they apply to music education. Students plan and conduct individual research projects.

MUSI 7300. Master's Thesis. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MUSI 7320. Problems in Instrumental Music Education. 3 hours.
Prerequisite: MUSI 3120 and MUSI 3150.
Methods and techniques used for development of the instrumental music program, elementary through secondary school; diagnosis of problems relating to strings, woodwinds, brasses, and percussion.

MUSI 7330. Music Curriculum and Supervision. 3 hours.
Prerequisite: Permission of department.
Philosophy, design, implementation, and supervision of curriculum for music programs in the public schools.

MUSI 7500. Vocal Pedagogy. 2 hours.
Vocal pedagogy in performance and in music education.

MUSI 7520. Piano Pedagogy I. 2 hours.
Learning theories, methodologies, and materials.

MUSI 7530. Piano Pedagogy II. 2 hours.
Prerequisite: MUSI 7520 or permission of department.
Repertoire, motivation, and related issues of personalities/learning styles.

MUSI 7810. Applied Music Instruction. 1-3 hours. Repeatable for maximum 42 hours credit.
Prerequisite: Permission of department.
Applied lessons at the masters level. Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 7910. Masters Recital. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Solo or chamber recital in partial fulfillment of requirements for masters degrees. Non-Traditional Format: Recital.

MUSI 7920. Conducting Project. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Preparation and presentation of masters conducting recital. Non-Traditional Format: Credit varies according to difficulty of literature and level of length of program.

MUSI 8000. Practicum in Music Education. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Supervised professional work experience with an educational institution, musical organization, or arts agency.

MUSI 8010. Directed Independent Study. 1-3 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Independent research topics directed by a faculty member at the doctoral level. Non-Traditional Format: Independent study.

MUSI 8030. Research in Music Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: MUSI 7030 or permission of department.
Students plan and conduct group and individual projects.

MUSI 8040. Score Analysis I. 3 hours.
Prerequisite: Permission of department.
Score preparation and study with emphasis on the conductor's point of view. Literature will be chosen from Medieval through Baroque periods.

MUSI 8050. Score Analysis II. 3 hours.
Prerequisite: MUSI 8040 or permission of department.
Score preparation and study with emphasis on the conductor's point of view. Literature will be chosen from the Classic period to the present.

MUSI 8060. Music in Higher Education. 2 hours.
History and development of music in higher education in the United States and the mission, function, and operation of music units within a college or university setting.

MUSI 8070. Music Education Problems. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MUSI 7330 or permission of department.
Basic principles and current thought in music education.

MUSI 8080. Pedagogy of Music. 3 hours.
Principles and practices of music instruction, including learning theory, curriculum design, and systems of evaluation.

MUSI 8090. Psychology of Music. 3 hours.
Experimental findings and research methods in psychology of music.

MUSI 8100. History of Music Theory. 3 hours.
Prerequisite: MUSI 4050.
Issues in music theory from Pythagorus to the present, with emphasis on Medieval and Renaissance theorists.

MUSI 8110. Contemporary Trends in Music Theory I. 3 hours.
Prerequisite: MUSI 4050.
Chromatic tonal theory and analysis. Late and post-romantic composers (Wagner, Mahler, Strauss, and Schoenberg) involving current applications of typical harmonic and Schenkerian graphic analysis.

MUSI 8120. Contemporary Trends in Music Theory II. 3 hours.
Prerequisite: MUSI 4050.
Analytical methods and models for modern and contemporary music. The primary foci for the course will be pitch-class set analysis, twelve-tone theory, and more recent theories.

MUSI 8130. Special Topics in Music Theory. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: MUSI 4050.
Changing series of topics, including pedagogy of music theory.

MUSI 8300. Special Studies in Keyboard Literature. 2 hours. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Keyboard music of selected composers, single genres, or specific national schools.

MUSI 8310. Special Topics in Musicology. 3 hours. Repeatable for maximum 12 hours credit.
Changing topics, such as individual composers, music notation, and special research areas.

MUSI 8320. Chamber Music Literature. 3 hours.
Major chamber music works from the Italian trio sonata to the present day.

MUSI 8330. Performance Practice. 3 hours.
Performance practice in a variety of style periods involving treatises, scores, and recordings.

MUSI 8340. American Music. 3 hours.
Art music and vernacular traditions of the United States.

MUSI 8350. Musicology Proseminar. 3 hours. Repeatable for maximum 9 hours credit.
Research seminar in musicology; topics based upon current trends in musicological research.

MUSI 8810. Applied Music Instruction. 1-3 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Applied music instruction at the doctoral level. Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 8910. Doctoral Recital. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Solo, chamber, or lecture recital in partial fulfillment of requirements for the doctoral degree. Non-Traditional Format: Credit varies according to difficulty of literature and length of program.

MUSI 8920. Doctoral Conducting Project. 1-3 hours. Repeatable for maximum 12 hours credit.
Preparation and presentation of doctoral conducting recital. Non-Traditional Format: Credit varies according to difficulty of literature and level of length of program.

MUSI 8990. Doctoral Seminar. 1 hour. Repeatable for maximum 6 hours credit.
Seminar on a variety of topics of interest to music doctoral students.

MUSI 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MUSI 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 33 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Philosophy

Donald E. Nute, Jr., *Head*
Charles B. Cross, *Graduate Coordinator, 542-2653*
(Peabody Hall)

The department offers a comprehensive program, covering the major areas of philosophical study, leading to the MA and the PhD degrees. Various approaches, including historical studies, linguistic analysis, logical analysis, and phenomenology are represented by the faculty. Though the department allows students to pursue their own interests in diverse areas, our special strengths lie in metaphysics, moral and political philosophy, and theory of knowledge and philosophy of mind. The graduate program is designed to give broad and thorough training in these basic areas of philosophy, as well as the opportunity for special study in the area of specialization of interest to the student. Admission to the PhD program presupposes a thorough background in the history of philosophy. Restricted admission encourages close student-faculty relationships. Preparation for teaching is considered an integral part of the PhD program.

For the MA degree, reading knowledge of one foreign language is required; for the PhD, one foreign language is required and a second language and/or knowledge of areas cognate to philosophy may be required.

Additional information about the department can be found on our web site: http://www.phil.uga.edu.

PHIL 4000/6000. Plato. 3 hours.
Prerequisite: PHIL 3000.
The major writings of Plato.

PHIL 4010/6010. Aristotle. 3 hours.
Prerequisite: PHIL 3000.
The major writings of Aristotle.

PHIL 4020/6020. Medieval Philosophy. 3 hours.
Prerequisite: PHIL 3000.
The major figures of the medieval period in western philosophy, including Augustine and Aquinas.

PHIL 4030/6030. Continental Rationalism. 3 hours.
Prerequisite: PHIL 3010.
Continental Rationalism, focusing on evaluating the principal writings of Descartes, Spinoza, and Leibniz.

PHIL 4040/6040. British Empiricism. 3 hours.
Prerequisite: PHIL 3010.
British Empiricism, focusing on evaluating the principal writings of Locke, Berkeley, and Hume.

PHIL 4050/6050. Kant. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
The major writings of Immanuel Kant.

PHIL 4060/6060. Hegel. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
The major writings of G.W.F. Hegel.

PHIL 4070/6070. Nineteenth-Century European Philosophy. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
Works of some major nineteenth-century philosophers, typically organized around a theme. Philosophers to be studied may include Mill, Bentham, Frege, Brentano, Schopenhauer, Fichte, Schelling, and Nietzsche.

PHIL 4080/6080. Classical American Philosophy. 3 hours.
Prerequisite: Permission of department.
The major writings of C.S. Pierce, William James, and John Dewey and their influence on the development of contemporary philosophy.

PHIL 4090/6090. Contemporary Continental Tradition. 3 hours.
Prerequisite: PHIL 3000 or PHIL 3010 or PHIL 3030.
Writings from the early phenomenologists, existentialists, contemporary Marxists and their successors, such as Husserl, Heidegger, Merleau-Ponty, Camus, Sartre, Marcuse, and Habermas.

PHIL 4100/6100. Contemporary Analytic Tradition. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3600 or PHIL 3610.
The development of contemporary analytical philosophy from the turn of the century to the present. Readings will be from philosophers such as Russell, Moore, Wittgenstein, Carnap, Ryle, Austin, Quine, and Strawson.

PHIL 4210/6210. Social and Political Philosophy. 3 hours.
Prerequisite: PHIL 2200.
The nature and function of society and the state, human freedom and rights, and the bases of social and political obligations.

PHIL(EETH) 4220/6220. Environmental Ethics. 3 hours.
Prerequisite: PHIL 2200 or permission of department.
Major professional and nonprofessional writings in the field of environmental ethics.

PHIL 4230/6230. Aesthetics. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Philosophical theories about the arts; for example, painting, literature, and music. Questions to be ad-

dressed include: what makes art art? and what are appropriate criteria of good art? Attention may also be given to such topics as the function of art in society. Course may be taken through UGA Studies Abroad program in Cortona.

PHIL 4240/6240. Philosophy of Law. 3 hours.
Prerequisite: Permission of department.
The nature and function of law, with emphasis on the interpretation and application of the law in the judicial process. Readings in classical and contemporary schools of the philosophy of law.

PHIL(EETH) 4250/6250. Technology and Values. 3 hours.
Prerequisite: Permission of department.
Technology in its broadest human context, with emphasis on the mutual influence between means and ends and the impact of technology on shaping the beliefs and attitudes of a civilization. Includes alternative assessments of technology and illustrates with specific crucial issues of our time.

PHIL(LING) 4300/6300. Philosophy of Language. 3 hours.
Prerequisite: Permission of department.
Topics such as formal and ordinary languages, meaning, reference, truth, definition, analyticity, ambiguity, metaphor, symbolism, and the uses of language.

PHIL 4310/6310. Philosophy of Mind. 3 hours.
Prerequisite: PHIL 3000 or PHIL 3010 or PHIL 3020 or PHIL 3610.
The philosophical implications of alternative approaches to psychology such as the behavioral, the psychoanalytic, the phenomenological, with particular attention to such problematic areas as the nature and validation of psychological concepts, law, and theories, and the knowledge of other minds.

PHIL 4400/6400. History of Natural Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2400.
Major physical, biological, and cosmological theories and their philosophic import, sixth century B.C. to the present.

PHIL 4410/6410. Philosophy of Natural Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2400.
The logical structure of scientific hypotheses and/or laws, and the problems of their meaning and confirmation; the general patterns of scientific explanation; and the ideals of prediction and control.

PHIL 4420/6420. Philosophy of Social Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
The methods and problems of inductive reasoning, including the nature of probable inference, techniques of verification, and the structure of scientific explanation, with special reference to the social sciences.

(PHIL)RELI 4500/6500. Philosophy of Religion. 3 hours.
Prerequisite: RELI 1003 or PHIL 1000 or PHIL 2200 or PHIL 2400.
The meaning, nature, and validity of religious discourse, beliefs, and practices, involving theories concerning the existence and nature of God and humanity's relation to God.

PHIL(LING) 4510/6510. Deductive Systems. 3 hours.
Prerequisite: PHIL 2500.
Symbolic-mathematical logic, examining the propositional and predicate calculi, with emphasis on problems in translation and formalization and topics in the philosophy of logic and mathematics.

PHIL(LING) 4520/6520. Model Theory. 3 hours.
Prerequisite: PHIL(LING) 4510/6510.
Formal semantics for sentential and first-order predicate logic, including both soundness and completeness results for first-order logic. Additional topics may include Goedel's incompleteness results, the Skolem-Lowenheim theorem, or possible world semantics for modal logics.

PHIL 4530/6530. Philosophy of Mathematics. 3 hours.
Prerequisite: (PHIL 1000 or PHIL 2400) and PHIL 2500.
The philosophical issues associated with mathematical inquiry, including, perhaps, the existence and nature of mathematical objects, the epistemology of mathematical truths, the character of mathematical proof, and the foundations of mathematics.

(PHIL)CSCI 4550/6550. Artificial Intelligence. 3 hours.
Prerequisite: CSCI 1302 or [PHIL 2500 and (PHIL 3010 or PHIL 3020 or PHIL 3610)] or permission of department.
Prerequisite or corequisite: CSCI(ARTI) 4540/6540.
The artificial intelligence approach to modeling cognitive processes. Topics include an introduction to heuristic methods, problem representation and search methods, classic AI techniques, and a review of the controversial issues of the AI paradigm of cognition as computation.

(PHIL)HIST 4860/6860. History, History of Philosophy, Philosophy. 3 hours.
Historians and philosophers differ in the source of evidence and arguments they use and in the standards to which they appeal. Nonetheless, works in each of these fields raise questions relevant to the other field. The purpose of this course is to explore the main relationships between these two fields.

PHIL 7000. Master's Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHIL 7010. Teaching Philosophy. 1 hour. 1 lab period of 2 hours each per week.
Materials, techniques, and objectives for teaching undergraduate courses in philosophy. Particular attention to presenting lectures, leading discussions, constructing examinations, and instructional evaluations.

PHIL 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PHIL 8000. Seminar in History of Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Philosophical topics and problems as found in the works of ancient, medieval, and modern philosophers.

PHIL 8200. Seminar in Ethics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems and topics in classical and contemporary moral philosophy.

PHIL 8210. Seminar in Political Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Problems and topics in classical and contemporary political philosophy.

PHIL(LING) 8300. Seminar in the Philosophy of Language. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
The original course materials dealing with such topics as formal and ordinary languages, meaning, reference, descriptions, truth, definition, analyticity, speech acts, and the uses of language.

PHIL 8310. Seminar in the Philosophy of Mind. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
One or more central problems in the philosophy of mind such as the mind-body problem, intentionality, and metal causation.

PHIL 8400. Seminar in Philosophy of Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Basic concepts in science, such as explanation, description, prediction, law, cause, theory, confirmation, probability, observation, and measurement.

PHIL 8500. Seminar in Problems of Logic. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PHIL(LING) 4510/6510.
Modal logic, epistemic logic, temporal logic, conditional logic, nonmontonic logic, the problem of induction, and the logic of belief revision.

PHIL 8600. Seminar in Metaphysics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Various metaphysical systems and related problems.

PHIL 8610. Seminar in Epistemology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Various theories of knowledge and related problems.

PHIL(RELI) 8630. Seminar in Philosophy of Religion. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Major topics in the philosophy of religion, such as the nature and existence of God, the problem of evil, and the character of religious discourse.

(PHIL)CSCI 8650. Logic and Logic Programming. 4 hours.
Prerequisite: [CSCI(ARTI) 4540/6540 and PHIL (LING) 6430] or permission of department.
Theoretical foundations of automated reasoning and logic programming. Topics covered include propositional logic, predicate logic, first-order models, resolution principles, logic programming paradigms, nonmonotonic reasoning.

PHIL 8700. Problems and Topics in Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Philosophical positions and problems.

PHIL 8800. Readings and Research in Special Problems in Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed reading and research in philosophy in areas of a student's special interest. Non-Traditional Format: An independent research course. Each student meets individually with a faculty supervisor on a weekly basis to discuss the progress of his/her research project.

PHIL 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHIL 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Physics and Astronomy

F. Todd Baker, *Head*
Jean-Pierre Caillault, *Graduate Coordinator, 542-2818*
(Physics Building)

The Department of Physics and Astronomy offers graduate work leading to the MS and PhD degrees in physics. The major research in the department is conducted in the following fields: astrophysics, atomic and molecular physics, nuclear physics, condensed matter physics, statistical mechanics, optics, relativity, high energy physics, and mathematical physics. Experimental research is conducted in on-campus laboratories for atomic and molecular physics, laser spectroscopy of solids, and material synthesis. Research involving the application of computer simulational techniques to astrophysics, condensed matter physics, material science, and high energy physics is conducted at the Center for Simulational Physics. Experimental research in intermediate-energy nuclear physics is performed at off-campus accelerator laboratories in the U.S., France, Canada, and Japan. Astronomical research is conducted with the facilities of the National Radio and Optical Observatories, and those of NASA. Research in the above areas is aided by the campus computing facilities.

Prospective students desiring financial aid should submit all application material by February 15. No foreign language is required for the master's or doctoral degrees.

Physics

PHYS 4000/6000. Physics Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Discussion of contemporary topics in physics.

PHYS 4101/6101. Theoretical Mechanics I. 3 hours.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L).
Prerequisite or corequisite: MATH 2700.
Kinematics and dynamics of a particle and of systems of particles.

PHYS 4102/6102. Theoretical Mechanics II. 3 hours.
Prerequisite: PHYS 4101/6101.
Mechanics of continuous media. Formal developments in mechanics including the formulations of Lagrange and Hamilton.

PHYS 4201/6201. Electricity and Magnetism I. 3 hours.
Prerequisite: PHYS 4101/6101.
Experimental foundations, including development of Maxwell's equations.

PHYS 4202/6202. Electricity and Magnetism II. 3 hours.
Prerequisite: PHYS 4201/6201.
Applications of Maxwell's equations.

PHYS 4300/6300. Thermodynamics and Kinetic Theory. 3 hours.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L) and MATH 2700.
The laws of thermodynamics and their application to physical systems. Kinetic theory.

PHYS 4701/6701. Introductory Quantum Mechanics I. 3 hours.
Prerequisite: PHYS 3700 and PHYS 4101/6101.
Fundamental principles of quantum mechanics. Solutions of the Schroedinger equation and their properties for simple systems are discussed.

PHYS 4702/6702. Introductory Quantum Mechanics II. 3 hours.
Prerequisite: PHYS 4701/6701.
Perturbation theory and applications of quantum mechanics.

PHYS 4750/6750. Nuclear and Particle Physics. 3 hours.
Prerequisite: PHYS 3700.
Properties of nuclear and subnuclear systems. Fundamental interactions between particles are treated. An introduction to the theory of the structure of baryons, mesons, and nuclei is presented along with quarks and the standard model.

PHYS 4820/6820. Condensed Matter Physics. 3 hours.
Prerequisite: PHYS 3700 and PHYS 4300/6300.
Elastic, thermal, electrical, magnetic and optical properties of condensed matter. Covers such topics as crystal structure, symmetry operators, X-ray and neutron diffraction, lattice vibrations, thermal properties, electrons in metals and semiconductors, dielectric and optical properties, magnetism and magnetic resonance, superconductivity, and quantum fluids.

PHYS 6670L. Experimental Physics. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: PHYS 4701/6701.
Laboratory course in which the student uses modern experimental techniques to investigate phenomena in atomic, molecular, nuclear, and solid state physics.

PHYS 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHYS 7111-7111L. Introductory Physics for Teachers - Mechanics, Waves, Thermodynamics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MATH 1090 or MATH 1113.
This course is designed to aid the introductory physics teacher in dealing with problems in mechanics, waves, and thermodynamics which arise in his/her teaching. The effective presentation of physical concepts in this area will be emphasized. Credit is limited to students working for degrees in education.

PHYS 7112-7112L. Introductory Physics for Teachers - Electricity and Magnetism, Optics, Modern Physics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PHYS 7111-7111L.
This course is designed to aid the introductory physics teacher in dealing with problems in electricity and magnetism, optics, and nuclear physics which arise in his/her teaching. The effective presentation of physical concepts in this area will be emphasized. Credit is limited to students working for degrees in education.

PHYS 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PHYS 8011. Classical Mechanics I. 3 hours.
Prerequisite: PHYS 4102/6102.
Corequisite: PHYS 8401.
The mechanics of particles and rigid bodies is developed using generalized coordinates, D'Alembert's principle and Hamilton's principle. Symmetry principles and conservation laws are emphasized.

PHYS 8012. Classical Mechanics II. 3 hours.
Prerequisite: PHYS 8011.
Corequisite: PHYS 8402.
The mechanics of small oscillations and continuous media is developed using Hamilton's principle. Other topics covered include: special relativity, Hamilton's equations of motion, canonical transformations, Hamilton-Jacobi Theory and an introduction to nonlinear systems.

PHYS 8101. Quantum Mechanics I. 3 hours.
Prerequisite: PHYS 4702/6702 and PHYS 8012 and PHYS 8402.
The basic principles of quantum mechanics and their applications to problems in modern physics. Topics covered include principles of wave mechanics, central forces and angular momentum, three dimensional bound state problems and scattering theory, spin.

PHYS 8102. Quantum Mechanics II. 3 hours.
Prerequisite: PHYS 8101.
The basic principles of quantum mechanics and their applications to problems in modern physics. Topics covered include quantum dynamics, identical particles, symmetries, time-independent and time-dependent perturbation theory.

PHYS 8150. Advanced Quantum Theory. 3 hours.
Prerequisite: PHYS 8102.
Relativistic quantum mechanics and quantum field theory.

PHYS 8171. Quantum Theory of Scattering with Applications I. 3 hours.
Prerequisite: PHYS 8102.
Concepts and applications of potential scattering. Both short-range and long-range potentials are treated.

PHYS 8172. Quantum Theory of Scattering with Applications II. 3 hours.
Prerequisite: PHYS 8171.
Scattering and reactions involving identical particles and composite systems. Elastic, inelastic, and rearrangement processes are treated.

PHYS 8201. Advanced Electromagnetic Theory I. 3 hours.
Prerequisite: PHYS 4202/6202 and PHYS 8402.
A study of classical electrodynamics. Topics include development of Maxwell's electromagnetic field equations and the Lorentz force equation, electrostatics and magnetostatics.

PHYS 8202. Advanced Electromagnetic Theory II. 3 hours.
Prerequisite: PHYS 8201.
A study of classical electrodynamics. Topics include development of Maxwell's electromagnetic field equations and the Lorentz force equation, electrostatics and magnetostatics, time-varying fields, conservation laws, radiating systems, and electromagnetic waves.

PHYS 8251. Relativity I. 3 hours.
Prerequisite: Permission of department.
Einstein's general theory of relativity. Topics include mathematical background, fundamental field equations of Einstein's theory of gravitation and their phenomenological extension to include electromagnetic phenomena.

PHYS 8252. Relativity II. 3 hours.
Prerequisite: Permission of department.
Einstein's general theory of relativity. Topics include fundamental field equations of Einstein's theory of the total field, particle structure and motion in general relativistic theories, experimental and observational tests of the theories.

PHYS 8301. Statistical Mechanics I. 3 hours.
Prerequisite: PHYS 8102.
The foundation and development of statistical mechanics in classical and quantum physics and its relationship to thermodynamics.

PHYS 8302. Statistical Mechanics II. 3 hours.
Prerequisite: PHYS 8301.
Applications of statistical mechanics to some fundamental problems in physics, astrophysics and other sciences.

PHYS 8321. Advanced Statistical Mechanics I. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PHYS 8302 or permission of department.
Advanced topics in statistical mechanics, especially those which have contributed to recent rapid progress in the modern many-body problem. Analytical and other advanced mathematical techniques will be emphasized.

PHYS 8322. Advanced Statistical Mechanics II. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PHYS 8302 or permission of department.
Recent topics in advanced statistical mechanics of special significance. Special mathematical techniques such as matrix polynomials and diagonalization, transfer matrix method and mapping, chaotic dynamical systems, elliptical integrals will be discussed in detail.

PHYS 8401. Methods of Mathematical Physics I. 3 hours.
Prerequisite: MATH 2700.
Treatment of mathematical methods necessary for solving problems in physics. Techniques from complex analysis, integral transforms, linear vector spaces and ordinary differential equations are covered.

PHYS 8402. Methods of Mathematical Physics II. 3 hours.
Prerequisite: PHYS 8401.
Treatment of mathematical methods necessary for solving problems in physics. Techniques from special functions, partial differential equations, Green's functions and the calculus of variations are developed and applied.

PHYS 8501. Structure and Spectra of Atoms and Molecules I. 3 hours.
Prerequisite: PHYS 8102.
Atomic and molecular physics with emphasis on current research in the structure and spectra of atomic systems, especially non-relativistic descriptions.

PHYS 8502. Structure and Spectra of Atoms and Molecules II. 3 hours.
Prerequisite: PHYS 8501.
Atomic and molecular physics with emphasis on current research in the structure and spectra of molecular systems, and relativistic descriptions of atoms and molecules.

PHYS 8601. Computer Simulation Methods in Physics. 3 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: PHYS 4300/6300 or permission of department.
The use of computer simulation methods to treat otherwise intractable problems. Emphasis will be placed on many-body problems and the techniques will include Monte Carlo and spin dynamics.

PHYS 8602. Computer Simulations of Materials. 3 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: PHYS 8601 or permission of department.
Computer simulation algorithms including molecular dynamics and quantum molecular dynamics techniques. Student must write programs and analyze data for different ensembles.

PHYS 8730. Nuclear Theory. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PHYS 8102.
Analysis of symmetry principles, nuclear forces, nuclear shell model, nuclear and nucleon structure and nucleonic degrees of freedom.

PHYS 8821. Advanced Solid State Physics I. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PHYS 8301.
Quantum theory of solids. Current and fundamental topics in solid state physics, including the theory of electrons and phonons in metals, semi-conductors and insulators, will be covered.

PHYS 8822. Advanced Solid State Physics II. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PHYS 8821.
Quantum theory of solids. Current and fundamental topics in solid state physics, including magnetism, optical and transport properties of solids and superconductivity, will be covered.

PHYS 8900. Advanced Topics. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Current and advanced topics in physics and astronomy. Non-Traditional Format: Lecture/discussion hours will vary depending on the particular faculty member presenting the course.

PHYS 8990. Introduction to Research. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Active research areas in physics and astronomy provided by faculty members who are actively engaged in research.

PHYS 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHYS 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Astronomy

ASTR 4010/6010. Astrophysics I. 3 hours.
Prerequisite: ASTR 1010 and ASTR 1020 and PHYS 3700 and PHYS 4101/6101.
Stellar astrophysics, stellar structure and atmospheres, formation of spectral lines and spectral classification,

stellar evolution from star formation to planetary nebulae and supernovae and the resulting compact objects.

ASTR 4020/6020. Astrophysics II. 3 hours.
Prerequisite: ASTR 4010/6010.
Systems of stars, the interstellar medium and stellar populations, galaxies, their classification and evolution, extragalactic astronomy and cosmology.

ASTR 4330/6330. Astronomy Seminar. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: ASTR 1010 and ASTR 1020.
Prerequisite or corequisite: ASTR 3010 or ASTR 3020 or ASTR 4010/6010 or ASTR 4020/6020.
Seminar on contemporary topics in astronomy and astrophysics.

ASTR 8070. Stellar Structure and Evolution. 3 hours.
Prerequisite: MATH 2700 and PHYS 4101/6101 and PHYS 4201/6201 and PHYS 4701/6701.
Prerequisite or corequisite: PHYS 4202/6202 or PHYS 4702/6702.
The internal structure and evolution of single and binary stars from formation to supernova. The equations of stellar structure and their numerical solution are discussed. Recent developments in stellar evolution theory, including brown dwarfs and extrasolar giant planets are presented.

ASTR 8080. Stellar Atmospheres. 3 hours.
Prerequisite: ASTR 8070.
The atmospheres of stars and giant planets, the equation of state, the transfer of radiation in stellar atmospheres, and the interaction of radiation and matter. The equations of stellar atmospheres and their numerical solution are derived and results of modern calculations are presented. Recent developments in stellar atmosphere theory, including brown dwarfs and extrasolar giant planets.

ASTR 8090. The Interstellar Medium. 3 hours.
Prerequisite: MATH 2700 and PHYS 4101/6101 and PHYS 4202/6202 and PHYS 4702/6702.
Physical processes and phenomena in the interstellar medium including radiative processes; excitation, ionization, and dissociation of atoms and molecules; neutral hydrogen and galactic structure; equilibrium conditions in clouds; interactions of dust with gas and radiation; HII regions; molecular clouds; star formation; planetary nebulae; supernova remnants; cosmic rays and the galactic magnetic field.

ASTR 8110. Graduate Astronomy Seminar. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Professional skills such as writing and reviewing research and observing proposals, writing and refereeing research papers, making oral presentations of their research and of journal articles, and writing brief newspaper and magazine summaries.

ASTR 8270. Extragalactic Astronomy and Observational Cosmology. 3 hours.
Prerequisite: MATH 2700 and PHYS 4101/6101 and PHYS 4202/6202 and PHYS 4702/6702.
Stellar content and dynamics of external galaxies, galaxy types and their evolution, Active Galactic Nuclei and quasars. Topics to be discussed include the extragalactic distance scale, clusters of galaxies, large-scale structure, cosmological models incorporating the microwave background, the early universe and galaxy formation.

Political Science

Thomas P. Lauth, *Head*
Brad Lockerbie, *Graduate Coordinator (MA, PhD), 542-2932*
Jerome S. Legge, Jr., *Graduate Coordinator (MPA, DPA), 542-2932*
(Baldwin Hall)

The Department of Political Science offers programs leading to MA, MPA, PhD, and DPA degrees. The MA and PhD programs are oriented to the systematic study and analysis of political phenomena. For the PhD program, candidates are required to complete three courses in research methods and statistics offered within the department. They choose three fields from the seven offered for comprehensive examinations. These include: American politics; public administration; public policy; political theory; comparative politics; international relations; and law, courts, and the judicial process.

The purpose of the Master of Public Administration degree is to educate individuals for administrative and managerial careers in government. It is designed for those planning to enter or who are already a part of the public service. The Doctor of Public Administration program offers a research degree designed for students interested in academic or public service careers. For further information, our e-mail address is polgrad @uga.cc.uga.edu.

POLS 4370/6370. Politics of Industrialized Democracies. 3 hours.
Not open to students with credit in POLS 4370H.
Prerequisite: POLS 1101-1101D.
The political economy, institutions, and cultures of the major capitalist countries in Europe, East Asia, and North America. State-society relations and formal and informal political institutions, such as political parties, interest groups, electoral systems, and democratic representation.

POLS 4520/6520. Electoral Behavior. 3 hours.
Prerequisite: POLS 1101-1101D.
Factors which contribute to electoral choice and the dynamics of voting in the American political system.

POLS 4610/6610. The United States Presidency. 3 hours.
Prerequisite: POLS 1101-1101D.
The president of the United States, including the president's constitutional position, theories of executive dominance and executive privilege, the president's attempt to control the executive branch, and presidential-congressional relations.

POLS 6000. American Political Thought. 3 hours.
Ideas about human nature and government that have shaped political practice and debate in America. The principles of the Declaration of Independence and the Constitution as developed especially by Jefferson, Madison, and Hamilton, and the interpretation of these principles by such statesmen as Lincoln and Wilson. Other topics include Black political thought and current liberal-conservative debate.

POLS 6020. Political Philosophy: Hobbes to the Twentieth Century. 3 hours.
Development of modern political philosophy through the analysis of selected works of such writers as Hobbes, Locke, Hume, Rousseau, Mill, Marx, and Nietzsche.

POLS 6040. Problems in Democratic Theory. 3 hours.
Major problems that arise in theoretical discussions of democracy, such as the nature of democratic government, its purposes, its justification, its limitations, and the conditions necessary for its maintenance.

POLS 6100. Pre-Seminar in American Politics. 3 hours.
The study of American politics. Recommended for students considering advanced work in the field.

POLS 6140. The Legislative Process. 3 hours.
The United States Congress with emphasis on recruitment and composition of leadership, procedures, and the role of parties and interest groups. Recent changes in the Congress will be examined in light of theories of representation.

POLS 6170. American Political Parties. 3 hours.
Research on political parties in the United States, with an emphasis on empirical analysis and theories of parties.

POLS 6200. Pre-Seminar in International Relations. 3 hours.
Realist, idealist, and institutionalist approaches to the study of International Relations. Special emphasis on applications to both historical and contemporary cases.

POLS 6210. International Organization. 3 hours.
The role of international institutions to overcome obstacles of international cooperation. International regimes, formal as well as informal, and their capacity to induce cooperation. International regimes are understood as political institutions designed to solve collective action problems and reduce transaction costs among states to such degrees that international cooperation becomes possible.

POLS 6220. International Law. 3 hours.
Functioning of the legal structures in the international system with special emphasis on the relation between law and politics.

POLS 6230. International Conflict. 3 hours.
Major theories of international conflict. The objective is to explore the logical and empirical foundations for the key hypotheses linking systemic, structural, coalitional, and individual factors to decisions regarding war and peace. Also, introduces the different types of methodologies currently used in the quantitative study of international relations.

POLS 6240. International Political Economy. 3 hours.
Various aspects of the international economy, both theoretical and practical, essential to an understanding of modern diplomacy and the conduct of foreign affairs.

POLS 6250. American Foreign Policy. 3 hours.
History and content of American foreign policy as well as the foreign policy making process. Special emphasis on the role of individuals and nongovernment organizations in making foreign policy in a mature democracy.

POLS 6350. Comparative Analysis and Method. 3 hours.
Comparative approaches to political science. The transition from feudalism to capitalism, state building, and the interaction between political institutions and cultures in various polities. Methods and approaches investigated include structuralism, functionalism, culturalist perspectives, rational choice, institutionalist frameworks, and the perennial issue of what constitutes the "state."

POLS 6380. Russian and East European Politics. 3 hours.
Domestic and international politics in Russia and selected East European states (e.g., Belarus and Ukraine).

POLS 6390. Far Eastern Political Systems. 3 hours.
Social, cultural, and political processes in contrasting Far Eastern nations including China, Japan, and Korea. Both domestic and international issues will be examined.

POLS 6440. Constitutional Law: Powers. 3 hours.
The substantive law of separation of powers; powers among branches of government and between national and state governments defined; historical coverage is emphasized.

POLS 6460. Constitutional Law: Rights and Liberties. 3 hours.
The substantive constitutional law of rights and liberties, with emphasis on political freedom of speech and press, religious freedom, freedom from discrimination, and protection of due process in criminal justice.

POLS 6490. Administrative Law. 3 hours.
The legal principles and practical doctrines involved in the work of administrative agencies, vested with quasi-legislative or quasi-judicial powers.

POLS 6910. Public Administration and Democracy. 3 hours.
Administrative organization, relations, and controls facing the contemporary public management in the United States. The institutional, political, and normative environment of the public manager in democratic society. Among the questions considered is the problem of reconciling bureaucratic government and democratic principles.

POLS 6920. Public Personnel Administration. 3 hours.
Procedures and problems of governmental personnel administration. Included in the topics are classification, performance appraisal, hiring practices, affirmative action, and pay equity. Studies of governmental agencies are employed to give the students first-hand knowledge of governmental personnel administration.

POLS 6930. Public Financial Administration. 3 hours.
Activities involved in the collection, custody and expenditure of public revenue, such as the assessment and collection of taxes, public borrowing and debt administration, the preparation and enactment of the budget, financial accountability and the audit. In addition, the course covers politics of the budgetary process.

POLS 6960. Organizational Theory. 3 hours.
Major concepts and theories associated with the modern public organization. Organizational environments, goals and effectiveness, strategy and decision-making, structure and design, communication, leadership, individual work behaviors, and other topics. The implications of the public sector context and political environments for these topics.

POLS 6980. Law, Ethics, and Professionalism in Public Administration. 1 hour.
An exposition of three elements of public administration: the legal environment, the subject of ethics, and a consideration of the extent to which public administration can be considered a profession.

POLS 6990. Communication Skills for Public Managers. 1 hour.
The importance of interpersonal and group skills in public sector management. Students will use the public sector assessment center to assess their communication skills, both oral and written.

POLS 7000. Master's Research. 1-6 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

POLS 7010. Research Design. 3 hours.
Basic scientific methods, broadly defined, to include problems of definition, concept formation, hypothesis testing, explanation and prediction, and theory construction.

POLS 7030. Methodology in Political Science. 3 hours.
The use of quantitative methods in political science research. Topics range from descriptive statistics through regression analysis.

POLS 7040. Quantitative Methods. 3 hours.
Prerequisite: POLS 7010 and POLS 7030.
Multiple regression analysis and related techniques. Focus on assumptions of OLS and applications to political science research. Topics include interactives, specifications, nonlinearities, error diagnostics, and introduction to time series and causal modeling.

POLS 7060. Writing for Publication in Political Science. 3 hours. Repeatable for maximum 6 hours credit.
Preparation and revision of manuscripts suitable for publication in political science journals.

POLS 7110. Research Methods in Public Administration. 3 hours.
Basic research methods and their use in public administration from the standpoint of both public policy and public management. Topics covered include the scientific method, experimental and quasi-experimental designs, sampling, interviewing, and questionnaire construction.

POLS 7120. Data Applications in Public Administration. 3 hours.
Applications of data analysis techniques to problems in public management and program evaluation. Special attention is devoted to familiarity with computer hardware and software to solve public sector problems. Topics include cross-tabulation, difference of means testing, and regression analysis.

POLS 7300. Master's Thesis. 3-6 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

POLS 7350. Internship in Government. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Integrates government employment experience into the curriculum of the Master of Public Administration degree program. Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS 7380. Ethics in Public Administration. 3 hours.
Leading ethical issues that arise in public administration practice and consideration of the sources to which

the public administrator can look for guidance in dealing with these issues.

POLS 7500. Local Government Management. 3 hours.
Description and analysis of the practice of local government management. Key issues in several functional areas of local government service are highlighted.

POLS 7520. Urban Policy. 3 hours.
Major federal, state, and local policies affecting American urban areas. Major topics include local government finance, service delivery, land use, and urban economic development.

POLS 7540. Productivity Improvement in Local Government. 3 hours.
The concept of productivity, its importance in the public sector, principal techniques used to improve productivity in local government, and barriers to productivity improvement initiatives.

POLS 7560. Special Topics in Urban Administration. 3 hours. Repeatable for maximum 6 hours credit.
Topics in the area of urban policy and administration. The focus of the course will shift depending on the interest of the instructor and may include such topics as land use policy and regulation, urban service delivery, and local government reform.

POLS 7620. Policy Analysis. 3 hours.
Theoretical approaches and concepts associated with the empirical analysis of public policies.

POLS 7630. Policy Implementation. 3 hours.
Public policy implementation literature with emphasis given to the major substantive and methodological issues driving this emerging field of public policy analysis. Bureaucracy's role in policy process, implementation analysis, and theories and methods for studying policy implementation.

POLS 7640. Program Evaluation. 3 hours.
The theoretical perspectives associated with program evaluation; design and measurement procedures; types of evaluative research; and the management of political and ethical problems associated with performing and utilizing evaluation research.

POLS 7650. Public Policy Seminar. 3 hours.
Research seminar on the major analytical techniques and theoretical approaches to decision-making in substantive public policy areas (e.g., environmental protection, health care, natural resources.)

POLS 7660. Government and Business. 3 hours.
Economic, social, and political bases for government intervention in market economies, comparative and/or American. Evolution of and justification for regulatory policies, the theoretical debate surrounding government regulations, case studies of specific regulatory programs, and alternatives to regulation.

POLS 7720. Public Personnel Problems in Public Agencies. 3 hours.
Selected problems in public personnel administration, using case studies and other vehicles to simulate realistic situations encountered in public agencies. Developing analytical and behavioral skills applicable in public personnel administration.

POLS 7830. Public Financial Management. 3 hours.
Principal aspects of public financial management, including accounting, budgeting, capital budgeting, revenue forecasting, risk management, pension management, and auditing. The focus of the course is on state and local finance.

POLS 7840. Budget Practicum. 3 hours.
The development of practical budgeting skills, with a special emphasis on budget development at the local level of government. Practical computer-based exercises enable the student to learn the logic of budget format and techniques of budget analysis.

POLS 7900. Managing Volunteers in the Public and Nonprofit Sectors. 3 hours.
Involvement of volunteers in government and nonprofit organizations, especially in relation to delivering services and maintaining the organization. Covers size, scope, significance, and challenges of the voluntary sector, and functions of volunteer administration, including recruitment, screening, placement, recognition, and evaluation.

POLS 7930. Human Services Administration in Government. 3 hours.
Special problems and processes involved in administering government and human service programs in health, welfare, disability, social security, and other service areas. Privatization of services will be considered as an alternative service-delivery mechanism.

POLS 7960. Organizational Behavior. 3 hours.
Prerequisite: POLS 6960.
Focuses on four arenas or levels of management which must be integrated in the pursuit of public-sector excellence. These arenas involve individuals, pairs of individuals, supervisor/subordinates, and small groups. Institutional, behavioral, and psychological factors will be emphasized.

POLS 8000. Strategy in Politics. 3 hours.
Formal analysis of strategic behavior in various political settings. Factors leading to competition and cooperation. Course content includes social choice theory, game theory, and other forms of rational choice analysis.

POLS 8020. Formal Analysis. 3 hours.
Game theoretic analysis of politics. The role of information and uncertainty about preferences and beliefs.

POLS 8040. Political Economy. 3 hours.
Various ways of analyzing the interaction between government and the economy.

POLS 8050. Empirical Political Theory. 3 hours.
Principal empirically oriented models and theories used in political science.

POLS 8060. Systems of Political Philosophy. 3 hours. Repeatable for maximum 6 hours credit.
Writings of a leading political philosopher, aimed at seeing how the elements of his/her thought form a comprehensive and unified view of political life. Philosophers to be studied will include Plato, Aristotle, St. Thomas Aquinas, Machiavelli, Hobbes, Locke, Rousseau, Hegel, Marx and Nietzsche. Classic works in American thought, such as the Federalist, will also be considered.

POLS 8080. Problems in Political Philosophy. 3 hours.
Selected problems in political philosophy, including the nature of justice; the functions of government; the ground of legitimate authority; the scope of individual rights; the foundations of democratic government; political obligation, civil disobedience, and revolution; the meaning of responsibility; and views of human nature and their political relevance.

POLS 8090. Recent Political Thought. 3 hours.
Important and influential recent political theories, including ideologies and scientific theories as well as contributions to political philosophy. The aim will be to understand both the approaches to political theory that have emerged in the contemporary period and the alternative interpretations that have been given of contemporary individuals and society.

POLS 8110. Research on Electoral Behavior. 3 hours.
Factors which contribute to electoral choice and the dynamics of voting in the American political system.

POLS 8120. Southern Politics. 3 hours.
The politics of individual states, the emergence of the Republican Party, Black mobilization, the consequences of reapportionment, and selected civil rights topics.

POLS 8130. Government and Interest Groups. 3 hours.
Theories of interest group formation and maintenance. Lobbying and the role of interest groups in the United States governmental process, including traditional literature on pluralism and interest groups as well as modern literature addressing traditional questions and problems.

POLS 8140. The Legislative Process. 3 hours.
The United States Congress, with emphasis on recruitment and composition of leadership, procedures, and the role of parties and interest groups. Recent changes in the Congress will be examined in light of theories of representation.

POLS 8150. The United States Presidency. 3 hours.
Powers of the United States Presidency. The President's constitutional position, including theories of executive dominance and executive privilege. Attention will also be given to the President's attempts to control the executive branch, presidential-congressional relations, and the president's leadership over domestic and foreign policy.

POLS 8160. Urban Politics. 3 hours.
Local politics in the United States, including the social and economic development of cities, local government structures and their effects, the participation of individuals and groups in urban politics, and major theoretical perspectives in urban research.

POLS 8170. American Political Parties. 3 hours.
Research on political parties in the United States, with an emphasis on empirical analysis and theories of parties.

POLS 8180. Readings and Research in American Government. 3 hours. Repeatable for maximum 9 hours credit.
Independent study of selected topics and problems in American government.

POLS 8190. Campaign Politics. 3 hours.
Presidential selection processes, including impact of rules, money, media, and voting in primaries. Focus on campaign dynamics and strategy.

POLS 8200. Special Topics in International Relations. 3 hours. Repeatable for maximum 6 hours credit.
The substance and method of selected topics in comparative politics with an emphasis on theory, analysis, and praxis. Topics selected by the instructor vary from semester to semester.

POLS 8260. Human Rights Policy. 3 hours.
Human rights issue as it affects the process of policy formulation and implementation, including both domestic and international policy areas.

POLS 8270. Politics of Trade and Security Policy. 3 hours.
Domestic and international politics of trade and security of selected countries, including the United States.

POLS 8300. Selected Topics in Comparative Politics. 3 hours. Repeatable for maximum 6 hours credit.
Research oriented seminar of both the substance and method of selected topics in comparative politics, with an emphasis on theory, analysis, and praxis. Topics selected by the instructor vary from semester to semester.

POLS 8310. Politics of Industrialized Democracies. 3 hours. Repeatable for maximum 6 hours credit.
Political economy and institutions of the major capitalist countries in Europe, East Asia, and North America. Comparative analysis of both country-specific and function-specific criteria, such as state-society relations and formal and informal political institutions.

POLS 8330. Politics of Post-Communist Political Systems. 3 hours.
Domestic and international politics of selected post-communist states.

POLS 8340. Seminar in Developing Political Systems. 3 hours.
Theory of creating integrated, viable, modernizing political systems in a world of economic inequalities.

The focus is on the kinds of political institutions that can help manage the social stress of racial, ethnic, cultural, social, economic, technological, and ideological diversity.

POLS 8410. Modern Legal Theory. 3 hours.
Theoretical approaches to analyzing the role of courts in a democracy, including methods for interpreting and applying constitutional and other legal texts.

POLS 8430. Judicial Politics. 3 hours.
Judicial processes, policy-making, and policies, with emphasis on judicial selection, models of judicial decision-making, institutional constraints on judicial choice, and the implementation and impact of judicial decisions.

POLS 8450. Special Topics in Law, Courts, and Judicial Process. 3 hours.
Special topics relating to law, courts, and the judicial process (such as "Women and the Law," "State Legal Systems," "Comparative Legal Systems," "Research Seminar on Trial Courts," etc.).

POLS 8710. Problems in Public Administration. 3 hours.
Perennial and emerging research issues, perspectives, and controversies in the field of public administration.

POLS 8720. Seminar in Selected Problems in Public Personnel Administration. 3 hours. Repeatable for maximum 9 hours credit.
Special topics, such as public sector labor relations and collective bargaining; issues related to job analysis, evaluation, and compensation; or civil service reform.

POLS 8830. Seminar in Public Budgeting. 3 hours.
A doctoral seminar which considers the works of the major scholars in the field of public budgeting and finance.

POLS 8840. Metropolitan Fiscal Problems. 3 hours.
Public economy of metropolitan areas and selected special metropolitan fiscal problems in the areas of public expenditures, revenues, and fiscal administration.

POLS 8850. Quantitative Analysis for Public Decision-Making. 3 hours.
Quantitative analysis and techniques used in public sector decision-making.

POLS 8940. Seminar in Comparative Administration. 3 hours.
Administrative systems other than the United States. Among the topics covered will be personnel administration, public finance, organizational analysis, and public policy problems. Possible nations covered include Europe, Africa, Asia, and Latin American political and administrative systems.

POLS 8960. Organization Development and Change. 3 hours.
Intellectual and theoretical perspectives on a complex area of inquiry and application—organizational development and change. The course illustrates various ways in which significant theoretical issues can be approached in practical ways, and in which central practical issues can be approached in theoretically-rich ways.

POLS 9000. Doctoral Research. 3-6 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

POLS 9200. Special Problems in Political Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research in specialized areas of Political Science. For students with advanced graduate standing. Students must have completed a minimum of four courses in the general area of the specialized topic. Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS 9300. Doctoral Dissertation. 3-6 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Psychology

Joseph D. Allen, *Head*
Irwin S. Bernstein, *Graduate Coordinator, 542-3103*
(Psychology Building)

Graduate work leading to the PhD degree is offered in biopsychology, clinical psychology, cognitive/experimental psychology, applied psychology, social psychology, and life-span developmental psychology. Students are admitted directly into one of the six doctoral programs and they are ordinarily required to obtain the master's degree on the way to the doctoral degree. Foreign language proficiency is not required by the department.

The biopsychology program permits specialization in physiological psychology or animal behavior or a combination of the two. The clinical program, approved by the American Psychological Association, seeks to prepare the student for a variety of professional roles by providing a solid foundation in technique, theory and re-

search in clinical psychology. In the cognitive/experimental program, specialization is offered in learning and performance, sensation and perception, and cognitive processes. Specialization may also be arranged in history and systems of psychology. The applied psychology program permits the student to concentrate in human factors psychology, industrial-organizational psychology, psychometrics, and related areas. In the social program, substantive training is provided in the areas of social-cognitive and attitudinal theories, group structure and process, and personality and social development, along with methodological training in group observation, attitude measurement, and survey research. The life-span developmental program provides training in areas of early infancy to late adulthood; in such substantive areas as cognitive development and assessment, health psychology, identity and minority development, language development, perceptual development, personality/social development, infant attention and development, adaptation and successful aging, developmental theory, and primate development.

Specialized facilities for graduate training/research in Psychology include: the Psychology Clinic, which provides diagnostic and therapeutic services; the University Testing and Evaluation Center; a child development subject pool, and child subject availability and research laboratories at the McPhaul Children's Center; the Institute for Behavioral Research; the Gerontology Center; laboratories for human psychophysiological and electroencephalographic studies, as well as a variety of laboratories within the realm of cognitive/experimental psychology; animal laboratories of behavioral and neuroscience research; and a colony of nonhuman primates for behavioral studies.

Students are expected to begin graduate work in the Fall semester following their admission. The department does not require applications for finanical aid; any student considered eligible by the department will be notified if additional information is required.

(PSYC)AFAM 4500/6500. Psychology of Prejudice. 3 hours.
Prerequisite: (PSYC 1101 or SOCI 1101) and senior standing.
Motivational, cognitive, social, and cultural factors that lead to discrimination in our society and various perspectives found in the research on discrimination.

(PSYC)AFAM 4550/6550. Classic Studies in Black Psychology. 3 hours.
Prerequisite: AFAM(PSYC) 3150 or permission of department.
Studies which have had major social or scientific impact on the lives of Black Americans and the way black people have been viewed within psychology. Approach is historical and interdisciplinary.

PSYC 4600/6600. Psychology of Women. 3 hours.
Prerequisite: PSYC 3230 or PSYC 4200 or PSYC 4220.
Women as the subject of psychological inquiry. Topics include personality theory, psychopathology, psychological aspects of reproductive health, psychological reaction to being victimized, and life crises.

PSYC 4700/6700. Psychology of Aging. 3 hours.
Research in gerontology, with emphasis on learning, personality, attitudes, perception, ability, and adjustment in the aged.

PSYC 4930/6930. Systems of Psychology. 3 hours.
Prerequisite: Permission of department.
Major theoretical systems in psychology, with special emphasis on developments of the last half-century, especially behaviorism and cognitivism.

PSYC 5750/7750. Principles of Primate Phylogeny. 3 hours.
Prerequisite: Junior or senior standing.
Interrelationships among morphology, behavior, and systematics for students studying primate behavior.

PSYC 5760/7760. Comparative Physical and Psychological Development of the Primates. 3 hours.
Prerequisite: Junior or senior standing.
Influence of species and developmental environment on normal and abnormal behavioral development.

PSYC 5770/7770. Organization of Primate Social Groups. 3 hours.
Prerequisite: Junior or senior standing.
The interaction of ecology, phylogeny, individual behavior, and group organization from a comparative perspective.

PSYC 6040. History of Psychology. 3 hours.
Prerequisite: Permission of department.
History of psychology and its antecedents, both classical and modern.

PSYC 6120. Behavior Therapy. 3 hours.
Behavior therapy techniques for use with adults. Emphasis on relaxation training, systematic desensitization, modeling, contingency management, aversive control, cognitive restructuring, and similar methods.

PSYC 6140. Introduction to Industrial-Organizational Psychology. 3 hours.
Major topics in industrial-organizational psychology, with emphasis on organizational and personnel psychology applied to business, industry, and government.

PSYC 6150. Psychometrics. 3 hours.
Prerequisite: Permission of department.
Theoretical and statistical principles that underlie psychological measurement and how they are employed in the development and use of psychological tests.

PSYC 6400. Research Methods in Social Psychology. 3 hours.
Methods used in contemporary empirical research by social psychologists. Field and experimental approaches will be examined in terms of their relative strengths, weaknesses, and costs for various research questions. Topics will vary from semester to semester.

PSYC 6410. Statistics in Psychological Research. 3 hours.
Prerequisite: Permission of department.
Basic concepts and techniques in descriptive and sampling statistics. Applications of statistics in psychological research.

PSYC 6420. Advanced Experimental Psychology. 3 hours.
Prerequisite: Permission of department.
Experimental techniques and methods of experimental work. Especially designed for the student who desires to learn scientific method in psychology.

PSYC 6430. Applied Regression Methods in Psychology. 3 hours.
Prerequisite: STAT 6220 and permission of department.
Simple and multiple regression methods as applied to the prediction and explanation of behavior. Topics include the formation and testing of models in experimental and nonexperimental research. Computer software packages are used for data analysis.

PSYC 6440. Experimental Design in Psychology. 3 hours.
Prerequisite: STAT 6220 and permission of department.
Design and analysis of psychological research, with emphasis on the logical foundations of experimental design.

PSYC 6510. Theories of Personality. 3 hours.
Prerequisite: Permission of department.
Major theories of personality, with some attention given to current research and to methodological issues in the field.

PSYC 6520. Basic Learning Processes. 3 hours.
Prerequisite: Permission of department.
Empirical phenomena and theories concerning basic forms of nonassociative and associative learning, primarily stimulus-stimulus and response-consequence associations. Phenomena include habituation, Pavlovian and operant conditioning, generalization and discrimination, concept formation, and choice behavior. Historical and comparative aspects of the subject are emphasized.

PSYC 6530. Individual Differences. 3 hours.
Prerequisite: Permission of department.
Nature and interrelationship of psychological traits, including maximum performance (intelligence, achievement, etc.) and typical behavior (interests, personality, etc.) traits. Also considered are the extent of racial, sex, age, and other group differences as well as the causal factors (genetics, environmental, etc.) in individual differences.

PSYC 6630. Cognitive Psychology. 3 hours.
Prerequisite: PSYC 6520 and permission of department.
History of cognitive psychology and the basic cognitive processes involved in attention, memory, knowledge representation, information processing, and problem solving.

PSYC 6640. Advanced Social Psychology. 3 hours.
Prerequisite: Permission of department.
Ethics in social research, social factors in perception, attitude formation and change, cognitive theories, group structure and process, ideology and personality, and social motivation.

PSYC 6650. Methods and Practices in Clinical Psychology. 3 hours.
Prerequisite: Permission of department.
Assessment and behavior-personality change procedures currently used in clinical psychology. The course will also focus on theoretical issues important to these applied procedures.

PSYC 6670. Research Design in Clinical Psychology. 3 hours.
Prerequisite: PSYC 6650.
Research problems and strategies in clinical psychology. Methods for evaluating treatment outcome will be the focus of study. Both single subject and group designs.

PSYC 6800. Physiological Psychology. 3 hours.
The relationship between the internal environment and such behaviors as food intake control, mating behavior, neural action, emotion, etc,.

PSYC 6810. Comparative Psychology. 3 hours.
Prerequisite: Permission of department.
Literature in fundamental aspects of comparative psychology.

PSYC 6910. Biological Foundations of Behavior. 3 hours.
Prerequisite: Permission of department.
Literature in the fundamental aspects of physiological psychology.

PSYC 6920. Sensory Psychology. 3 hours.
Prerequisite: Permission of department.
Literature in the fundamental aspects of sensation and perception.

PSYC 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PSYC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PSYC 7530. Personality Assessment. 3 hours.
Prerequisite: PSYC 8140 or permission of department.
Clinical application of selected assessment tools, with emphasis on MMPI, TAT, and Rorschach, including theoretical assumptions and interpretation of data.

PSYC 7540. Psychology of Disadvantaged and Minority Groups. 3 hours.
Psychological aspects of minority and disadvantaged groups in the United States and the impact of the discipline of psychology on these groups.

PSYC 7550. Treatment of Sexual Dysfunction. 3 hours.
Prerequisite: PSYC 8140.
Biological and psychological aspects of human sexual dysfunctions, with a discussion of interviewing, psychometric, behavioral, and psychophysiological approaches to assessment and common treatment methods.

PSYC 8000. Advanced Topics in Psychology. 3 hours. Repeatable for maximum 15 hours credit.
Current topics and new developments in the field of psychology.

PSYC 8060. Vision Seminar. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PSYC 6920 or permission of department.
Specific topics in areas representative of contemporary research and theory in visual science.

PSYC 8070. Audition. 3 hours.
Prerequisite: Permission of department.
Theories of hearing and their experimental bases are examined in detail, along with demonstrations of experimental techniques in the area.

(PSYC)EPSY(LING) 8130. Psycholinguistics. 3 hours.
Recent theoretical and experimental work on the psychological aspects of semantics, grammar, and discourse processes are surveyed. Language development is also considered.

PSYC 8140. Advanced Psychopathology: Adults. 3 hours.
Prerequisite: PSYC 4230 and permission of department.
Surveys, historical trends, and contemporary theories of psychopathology; reviews methods, issues, validity, and utility of classificatory systems; evaluates the intrinsic-attribute properties of various behavior disorders as well as related assessment; and treatment procedures.

PSYC 8200. Operant Conditioning. 3 hours.
Theoretical and practical approaches to the assessment of free-ongoing behavior. Laboratory exercises in the circuitry and logic of operant conditioning apparatus and design are included.

PSYC 8220. Human Memory. 3 hours.
Major phenomena, experimental procedures, and theoretical models of human memory.

PSYC 8230. Classical Perception. 3 hours.
Classical problem areas of perception (e.g., contour, movement, illusions), with emphasis on the perceptual process and its relation to other psychological functions.

PSYC 8250. Cognitive Theories and Models. 3 hours.
Prerequisite: PSYC 6630.
Cognitive theories and models proposed for human behavior in memory, reasoning, language, mathematics, judgment, imagery, problem solving, and thinking.

PSYC 8260. Applied Cognition. 3 hours.
Cognitive psychology with a perspective on applying knowledge from research on basic cognitive processes in attention, memory, knowledge representation, and decision making to the workplace.

PSYC 8270. Cognitive Research Seminar. 1 hour. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of department.
Topics in cognitive psychology, including perception, memory, reading, attention, language, mathematics, and decision making. Non-Traditional Format: Cognitive research, with meetings arranged between major professor and student.

PSYC 8280. Individual Differences in Child Cognition. 3 hours.
Prerequisite: PSYC 8800.
Theory and research in individual differences in children's cognitive development, with emphasis on the stability of intelligence, the modifiability of intelligence, and cognitive characteristics associated with individual differences in intelligence.

PSYC 8300. Neuroanatomy for Behavioral Scientists. 3 hours.
Prerequisite: PSYC 6910.
Basic, functional neuroanatomy of mammals, including humans, is emphasized to provide a foundation for understanding the neuroanatomical substrates of perception, motivation, emotion, learning, and other cognitive and behavioral processes.

PSYC 8310. Advanced Comparative Psychology. 3 hours.
Prerequisite: PSYC 6810.
Topics in comparative psychology which include history, relation to other disciplines, behavior genetics, ontogenetic principles and processes, and problems in the comparative study of complex processes.

PSYC 8330. Laboratory Apprenticeship in Physiological and Comparative Psychology. 3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: PSYC 6810 and permission of department.
Approaches and research methods of physiological

and comparative psychology. Non-Traditional Format: Laboratory apprenticeship, with meetings arranged between major professor and student.

PSYC 8350. Sociobiology. 3 hours.
Basic principles of sociobiology beginning with Wilson's classic book. The scientific theory will be emphasized while noting popular overextensions and common logical fallacies. Tinbergen's analysis of structure, proximate cause, ontogenetic cause, and evolutionary selective pressures will be used to critically evaluate conclusions.

PSYC 8360. Comparative Cognition. 3 hours.
Prerequisite: PSYC 6810 or PSYC 8310.
Traditional and contemporary, empirical and theoretical research which may be subsumed under "cognitive processes" and which has involved nonhuman animals. Among the topics will be Piagetian concepts, oddity and sameness-difference judgments, color, form, size, number, and "natural category" judgments, and other class and relational conceptual judgments.

PSYC 8370. Seminar in Comparative Psychology. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PSYC 6910.
Particular problem areas within comparative psychology. Emphasis is placed upon the evaluation of current research and theory in the development of research ideas by the student.

PSYC 8380. Behavioral Neuroendocrinology. 3 hours.
Prerequisite: PSYC 6910 or CBIO 4730/6730.
Basic principles of neuroendocrinology and their applications to studies of activity, ingestive behavior, learning and memory, stress and emotion, and reproductive behavior.

PSYC 8390. Seminar in Physiological Psychology. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: PSYC 6910.
Particular problem areas within physiological psychology. Emphasis is placed upon evaluation of current research and theory and students' development of original research ideas.

PSYC 8500. Clinical Staffing Procedures. 1-3 hours. Repeatable for maximum 26 hours credit.
Prerequisite: Permission of major.
Practicum in clinical psychology. Supervised experience in assessment and treatment of clinical problems using a wide variety of applicable techniques. Professional roles and ethical concepts of the clinical psychologist are integrated with clinical procedures. Non-Traditional Format: Clinical staffing procedures, with meetings arranged between major professor and student.

PSYC 8510. Child Behavior Therapy. 3 hours.
Prerequisite: PSYC 8140.
Behavior change strategies for child behavior problems occurring in the home, school, or institution. Conduct problems, hyperactivity, learning problems, social withdrawal, mental retardation, and autism are among the disorders examined.

PSYC 8520. Behavioral Medicine/Health Psychology. 3 hours.
Prerequisite: PSYC 6650 and PSYC 6910 and permission of department.
The definition, scope, and research efforts in the field of behavioral medicine-health psychology will be discussed. The behavioral concomitants of select medical and psychophysiological disorders (e.g., cardiovascular, respiratory, and pain related problems) as well as psychologically based interventions.

PSYC 8540. Marital Dysfunction and Intervention. 3 hours.
Prerequisite: PSYC 8140.
Contemporary empirical research on marital functioning and the treatment of marital dysfunction with an emphasis on characteristics of concordant and discordant couples, theoretically divergent models of marital functioning, and the efficacy of available methods of therapeutic intervention.

PSYC 8550. Neuropsychological Assessment. 3 hours.
Prerequisite: PSYC 8300.
Theories of brain function in the human. Methods of detecting abnormal functioning and the localization of such abnormal functioning by behavioral methods. Possible etiologies of such lesions.

PSYC 8600. Comparative Behavioral Development. 3 hours.
Prerequisite: PSYC 8800 or permission of department.
The interface between biology and psychology in the study of development. Evolutionary and psychobiological approaches to behavioral development across species and consideration of human behavioral development from these perspectives.

PSYC 8610. Psychophysical Methods and Psychological Scaling. 3 hours.
Methods and appropriate theories to the investigation and scaling of sensory and nonsensory stimulus events. Single and multidimensional scales.

PSYC 8710. Theories of Attitude Structure, Formation, and Change. 3 hours.
Prerequisite: PSYC 6640.
Theoretical approaches to the organization and formation of beliefs and attitudes to cognitive consistency, and to the determinants of attitude stability and change.

PSYC 8720. Group Structure and Process. 3 hours.
Prerequisite: PSYC 6640.
Situational and individual determinants of social structure and interaction in face-to-face groups. Various theories of exchange, equity, power, and leadership.

PSYC 8730. Theories of Social Psychology. 3 hours.
Prerequisite: Permission of department.
Theoretical and conceptual frames of reference that contribute to our knowledge of social psychology, including consideration of such theories as cognitive consistency, social exchange, symbolic interaction, role theory, group process, and collective behavior.

PSYC 8790. Advanced Seminar in Social Psychology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PSYC 6640.
Illustrative topics are social motivation, conformity, social power, interpersonal perception, simulation and mathematical models of social behavior, and vicarious learning.

PSYC 8800. Developmental Psychology. 3 hours.
Prerequisite: Permission of department.
Critical survey of evidence concerning physical, social, and psychological development of primates. Special emphasis is placed on comparative analysis for understanding human development.

PSYC 8810. Psychology of Health and Illness. 3 hours.
Psychological influences on health, illness, and responses to those states. Psychological origins and outcomes of health policy and health interventions.

PSYC 8830. Cognition and Aging. 3 hours.
Prerequisite: PSYC 6630.
Topics in cognition and aging, including age-related changes in memory, problem-solving, reasoning, intelligence, and attention; role of compensatory mechanisms, structures, and processes, including experience, expertise, knowledge structures, and wisdom.

PSYC 8840. Personality and Social Development. 3 hours.
Literature relevant to early childhood determinants and developmental processes to personality and social behavior. Current research, theories, and methodological issues.

PSYC 8850. Perceptual Development. 3 hours.
Prerequisite: PSYC 6920 or PSYC 8230.
Ontogenetic changes in perception and their importance for cognitive processes with emphasis on the implications of these changes for perceptual theories.

PSYC 8860. Cognitive Development: Infancy to Adolescence. 3 hours.
Prerequisite: PSYC 8800.
Current research on problems, issues, and theories relevant to the development of complex cognitive processes in infancy, childhood, and adolescence.

PSYC 8870. Theories of Psychological Development. 3 hours.
Prerequisite: PSYC 8800.
Logical and empirical adequacies of modern theories of psychological development in relation to selected issues relevant to theory construction in the behavior sciences.

PSYC 8880. Human Sexual Behavior. 3 hours.
Nature and variety of human sexual behavior in many settings.

PSYC 8890. Seminar in Developmental Processes. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Current topics in developmental psychology. Emphasis on independent study and research.

PSYC 8900. Psychopharmacology Seminar. 3 hours.
Prerequisite: PSYC 6910.
Psychopharmacology literature. Emphasis is placed on basic behavioral research. Pharmacotherapy and clinical topics.

(PSYC)CHFD 8920. Behavior Problems in Children. 3 hours.
Prerequisite: Permission of department.
The child's adjustment to his or her environment with a consideration of the causes, treatment, and prevention of behavior problems. Utilization of case materials and research problems in the field will be carried out by the student. Non-Traditional Format: Research problems in the field will be carried out by students.

PSYC 8930. Advanced Psychological Measurement. 3 hours.
Prerequisite: PSYC 6150.
Modern test theory approaches to test construction, reliability, validity, item, and factor analysis.

PSYC 8940. Cognitive Measurement. 3 hours.
Prerequisite: PSYC 8930.
Classical and contemporary readings related to the applications of measurement to industry, education, and related areas of the behavioral sciences.

PSYC 8950. Non-Cognitive Measurement. 3 hours.
Prerequisite: PSYC 8930.
Approaches to interest and personality measurement, artifacts and methodology, dimensions, organization, and utility.

PSYC 8960. Training and Development. 3 hours.
Prerequisite: Permission of department.
Principle systems and techniques applicable to industrial and organizational training and to management development.

PSYC 8970. Organizational Psychology. 3 hours.
Prerequisite: PSYC 6140 or permission of department.
Theories and research in selected areas of organizational behavior. Emphasis is on intrapersonal behavior, such as motivation, job stress, and job satisfaction.

PSYC 8980. Seminar in Industrial-Organizational Psychology. 3 hours. Repeatable for maximum 18 hours credit.
Consideration of significant and current topics in industrial-organizational psychology as determined by the interests and research activities of the faculty.

PSYC 8990. Seminar in Psychometrics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PSYC 6430 or PSYC 8930.
Consideration of significant and current topics are defined by the interests and research activities of the faculty.

PSYC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional

Format: Independent research under the direction of a faculty member.

PSYC 9100. Special Problems. 1-15 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Extensive readings or empirical research in selected areas or planning and pilot studies preparatory to a thesis. Non-Traditional Format: Special problems, with meetings arranged between major professor and student.

PSYC 9200. Clinical Internship in Psychology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Professional practice of clinical psychology under constant and close supervision. This professional work will include treatment of patients, group and individual psychotherapy, teaching, and research. Non-Traditional Format: Clinical internship, with meetings arranged between major professor and student.

PSYC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

PSYC 9880. Seminar in Staffing. 3 hours.
Prerequisite: PSYC 6140 or permission of department.
Methods appropriate to the development and administration of the staffing process in contemporary organizations. The strategies and the statistics of the validation of personnel screening devices: personnel testing, interviewing, and biographical information.

Religion

George E. Howard, *Head*
David S. Williams, *Graduate Coordinator, 542-5356*
(Peabody Hall)

The department offers a comprehensive program of studies in the field of religion leading to the MA degree. Areas of concentration are in Biblical studies, Christian studies, Jewish studies, Islamic studies, and Indian and East Asian religious studies. Various methodologies are employed in these areas. Admission to the MA program presupposes a thorough background in religious studies. The graduate program is designed to give the student a broad and thorough training in the field of religion with a specialization in some area of concentration.

For the MA degree, reading knowledge of one foreign language is required.

Permission of department is a prerequisite for these courses unless otherwise stated.

Religion

RELI 4001/6001. Old Testament/Hebrew Bible Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature, content, and problems of the Old Testament/Hebrew Bible, with attention given to historical data, literary forms, and ancient Near Eastern cultural backgrounds.

RELI 4002/6002. Prophetic Literature of the Old Testament/Hebrew Bible. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The origin and development of the phenomenon of prophecy as it existed throughout the history of ancient Israel.

RELI 4003/6003. Ancient Israelite Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Origins of the religion of ancient Israel, its emergence from and continuities with ancient West Semitic religion and culture. Historical and comparative methods, emphasizing current knowledge of Near Eastern history and religions contemporary with ancient Israel.

RELI 4040/6040. Apocalyptic Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Apocalyptic literature from its origins in the sixth and fifth centuries BCE down to its flourishing in Hellenistic and Roman times. Texts to be studied include Isaiah 24-27, 40-66, Zechariah 9-14, Joel, Malachi, Daniel, I Enoch, IV Ezra, Baruch, Qumran material, Mark 13 and the Book of Revelation. Questions bearing on contemporary theological significance will also be discussed.

RELI 4070/6070. Judaism. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The interaction of Jewish history and Western civilization, with emphasis upon the development of Jewish religion in the biblical, rabbinic, and modern periods.

RELI 4071/6071. The Holocaust. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The background and legacy of the destruction of European Jewry from 1933 to 1945. Topics include: the historical context, Holocaust art, literature, and film, the reactions of rescuers and bystanders, and theological issues raised by the Holocaust.

RELI 4072/6072. American Judaism. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
An examination of what it means, and has meant, to be a Jew in the United States, with emphasis upon the his-

torical experience and religious expressions of American Jews.

RELI 4080/6080. New Testament Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature, content, and problems of New Testament literature, with particular attention given to its canonization and textual transmission.

RELI 4081/6081. Jesus. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Although primarily a study of what Jesus taught, attention is given to the literary and environmental background of his teaching, the historical life of the teacher, and the contemporary validity of what he taught.

RELI 4082/6082. Life and Letters of Paul. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
An historical-exegetical study of the life and letters of Paul, the relation between Acts and the Pauline epistles, early non-Pauline Gentile Christianity, Pauline theology, and its lasting impression on Christianity.

RELI 4083/6083. The New Testament World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The political, social and religious influences on the New Testament writings. Special attention is given to intertestamental Judaism and Hellenistic and Roman religion as background to New Testament Christianity.

RELI 4101/6101. History of Christian Theology (Ancient-Medieval). 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The development of Christian thought from the first through the fourteenth century as expressed in the writings and practices of the Christian community and its leading thinkers.

RELI 4102/6102. History of Christian Theology (Modern-Contemporary). 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The development of Christian thought from the fifteenth century to the present as expressed in the writings and practices of the Christian community and its leading thinkers.

RELI 4105/6105. Women in Christian History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The relationship between women and Christianity, particularly concerning matters involving gender equality in church and society.

RELI 4107/6107. American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Major and innovative religious organizations, ideas, movements, and personalities as they express themselves in particular religious settings as well as the manner in which they have influenced other aspects of American culture.

RELI(AFAM) 4201/6201. African American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The religious traditions of African Americans from Colonial times to the present; major religious movements, personalities, and ideas and their relationship to various aspects of American culture.

RELI(AFAM) 4202/6202. Southern Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The origins, growth, and current practices of religion in the American South. The interaction between religion and other aspects of Southern culture, such as racial and gender concerns, education, Darwinian science, temperance, and politics.

RELI(AFAM) 4203/6203. The Bible in the Black Church. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Biblical interpretation in black America from 1865 to the present.

RELI 4300/6300. Islam and Its World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islam as a religious and sociocultural phenomenon. The fundamental principles of the Islamic faith, Qu'ran, the Sunna of Muhammad, Islamic sectarianism, Islamic law, theology, and mysticism, and themes in Islamic art. The course will also survey Islam in its various forms throughout the world.

RELI 4301/6301. Islamic Thought in the Caliphal Age. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic scholarship from the eighth through the fourteenth centuries. Principal topics covered will include the Qur'an and Qur'anic exegesis, the Hadith tradition, Islamic law, theology, philosophy, and Sufi mysticism.

RELI 4302/6302. Islam and the Modern World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic modernism and revivalism as a response to Western cultural penetration since the eighteenth century. Subjects covered will include Sufi reformism, Wahhabism, the Salafiyya movement, Islamic "Fundamentalism," the Iranian Revolution, women's rights, and Western perceptions of Islam.

RELI 4303/6303. The Sufi Way. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic mysticism, both as a set of metaphysical doctrines and as it is expressed in religious practices. Particular attention will be given to the doctrinal development of Sufism, its literature, major figures, and the process of consciousness transformation.

RELI 4400/6400. The History of Religions. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature of early primitive religions and the main outlines of the chief living religions of the world. The method will be both historical and analytical.

RELI 4401/6401. The Buddhist Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Buddhism from its origin in the life and teachings of the Buddha through the period of philosophical ferment in India, and its thought and institutions in the East and the West up to the present.

RELI 4402/6402. Confucianism and Chinese Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Confucianism and its place in traditional Chinese religion, thought, and culture. Emphasis on the teachings of foundational thinkers such as Confucius, Mencius, and Hsun- tzu.

RELI 4403/6403. The Taoist Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Taoism and its place in traditional Chinese religion, thought, and culture. Emphasis on the classical texts, Lao-tzu and Chuang-tzu; the evolution of the later Taoist religion; and the many varieties of Taoist spirituality.

RELI 4404/6404. Japanese Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Religion in Japan from earliest times to the present, with emphasis upon Shinto, the domestication of Buddhism, and the relationship of religion to the Japanese state and "national identity." Particular attention given to the development of Zen in Japan.

RELI(PHIL) 4500/6500. Philosophy of Religion. 3 hours.
Prerequisite: RELI 1003 or PHIL 1000 or PHIL 2200 or PHIL 2400.
The meaning, nature, and validity of religious discourse, beliefs, and practices, involving theories concerning the existence and nature of God and humanity's relation to God.

RELI 4510/6510. Indian Philosophy and Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Traces the path of India's religious and philosophical thought from the Indus civilization to the present. Attention will be given to interpreting the orthodox Hindu systems as well as Buddhism and their related religious practices, ethics, castes, and sects.

RELI 4520/6520. Constructive Theology. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The aims, methods, and content of theology as related to the theistic religions of humanity.

RELI 4530/6530. Theology and Culture. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The relation of theology to philosophy, science, technology, and the arts, with special attention to the theological attempts to deal with the impact of science and technology upon culture and civilization.

RELI(ANTH) 4640/6640. Anthropology of Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Anthropological approaches to the world's major religions as they relate to complex societies.

RELI 4910/6910. Topics in Asian Religions. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: RELI 3300 or permission of department.
Selected topics in the study of one or more of the religions of Asia.

RELI 7000. Master's Research. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

RELI 7300. Master's Thesis. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

RELI 8450. Seminar in Problems and Topics in Biblical Research. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Major issues in Old Testament (Hebrew Bible) and/or New Testament research. Pentateuchal criticism, prophecy, apocalyptic movements, wisdom literature, the history of Religion of Ancient Israel, the text of the New Testament, the canon of the New Testament, Synoptic Gospels, Jesus, and Paul. Some topics will require a reading knowledge of Greek and/or Hebrew.

RELI 8460. Seminar in Problems and Topics in Judaism. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
A major field or issue in Judaic studies such as Rabbinic literature, Jewish Mysticism, or Post-Holocaust

Theology, or a particular Jewish thinker or school of thought. Some topics will require a reading knowledge of Hebrew.

RELI 8480. Seminar in Problems and Topics in Islamic Research. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Major issues in Islamic studies, Qur'anic exegesis, Islamic law, philosophy, history, literature, hadith, sectarianism, and Sufism.

RELI 8490. Seminar in Problems and Topics in Asian Religions. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Issues in one or more religions of South or East Asia, focusing on textual, historical, and/or interpretive problems.

RELI 8500. Seminar in the History of Christian Thought. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: RELI 4102/6102 or permission of department.
The life, thought, and religious activities of a selected major or innovative Christian leader and his/her impact on the development of Christianity.

RELI 8510. Seminar in Problems and Topics in Theology. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Traditional and contemporary problems and topics in theology. Substantive and methodological issues will be addressed.

RELI 8520. Seminar in Christian Theologians. 3 hours. Repeatable for maximum 9 hours credit. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
The works of Christian theologians both past and present. Substantive and methodological issues will be addressed.

(RELI)PHIL 8630. Seminar in Philosophy of Religion. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Major topics in the philosophy of religion, such as the nature and existence of God, the problem of evil, and the character of religious discourse.

RELI 8700. Seminar in Problems and Topics in Religion Research. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Major issues in religion research. Topics will vary according to the area of discussion. Such areas will include biblical studies, religious history and philosophy, rabbinics, Islamics, Buddhism, canonical criticism.

Arabic

ARAB 4100/6100. Reading and Research in Arabic and Islamic Literature. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: ARAB 2004 or permission of department.
Arabic and Islamic texts with emphasis upon extensive reading and individual and/or group research projects. Qualified students may study Persian and/or Turkish texts.

Hebrew

HEBR 4100/6100. Reading and Research in Hebrew Literature. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: HEBR 2004 or permission of department.
Directed study in reading and research in classical Hebrew literature. Non-Traditional Format: Directed study.

Semitic

SEMI 4001/6001. Elementary Aramaic/Syriac. 3 hours.
Prerequisite: HEBR 2004 or permission of department.
Aramaic and/or Syriac grammar, especially as related to Hebrew, along with simple readings from religious texts.

SEMI 8100. Seminar in Northwest Semitic Epigraphy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: HEBR 2004 or permission of department.
Various Northwest Semitic inscriptions. Areas of concentration will vary, including Ugaritic, Phoenician, Punic, and Moabite as well as extra biblical Hebrew and Aramaic inscriptions.

Romance Languages

Doris Y. Kadish, *Head*
Timothy B. Raser, *Graduate Coordinator, 542-3163*
(Gilbert Hall)

The MA is offered with a major in French, Spanish, or Romance Languages. Coursework, a thesis and a final examination are required for the major. A reading examination (or a grade of B or better in a course at the 2002 level or higher) in

one language (exclusive of the major language) must also be completed before the admission to candidacy may be filed. Options in French, Spanish, and Romance Linguistics are offered for the MA. The MA in French (Literature Option) includes 18 hours of required coursework (FREN 6200, FREN 6300, FREN 6400, FREN 6500, FREN 8180, and FREN 7300) and 12 hours of elective credit. The MA in French (Linguistics Option) includes 15 hours of required coursework (FREN 6630, FREN 6700, FREN 6800, FREN 6910, and FREN 7300) and 15 hours of elective credit. The MA in Spanish (Literature Option) includes 18 hours of required coursework (SPAN 6100, SPAN 6200, SPAN 6300, SPAN 6400, and SPAN 8180, and SPAN 7300) and 12 hours of elective credit. The MA in Spanish (Linguistics Option) includes 15 hours of required coursework (SPAN 6650, SPAN 6750, SPAN 6850, SPAN 6950, and SPAN 7300) and 15 hours of elective credit. The MA in Romance Languages (Literature Option) includes 3 hours or required coursework in (ROML 7300) and 27 hours of elective credit, 15 of which must be in the student's major language, and 12 of which must be in the student's minor language. The MA in Romance Languages (Linguistics Option) includes 3 hours of required coursework (ROM 7300) and 27 hours of elective credit, 12 hours of which must be in French and Spanish linguistics.

The MAT is offered with majors in French, Spanish, and Romance languages. Coursework and a final examination are required for the major. All courses must be approved by the student's advisory committee. The MAT in French includes 3 hours of required coursework (Methods of Research in Education) and 30 hours of elective coursework, 6 hours of which must be taken in the College of Education. The MAT in Spanish includes 3 hours of required coursework (Methods of Research in Education) and 30 hours of elective coursework, 6 hours of which must be taken in the College of Education. The MAT in Romance Languages includes 3 hours of required coursework (Methods of Research in Education) and 30 hours of elective coursework, 6 hours of which must be taken in the College of Education.

The PhD is offered in Romance languages with a major in French, Portuguese, or Spanish and a minor in a discipline or an interdisciplinary field related to the major. A minimum of 20 graduate courses (including those taken at the MA level), preliminary examinations, a dissertation and a final oral defense are required. The minor consists of three or four courses (of the 20 required), and, with the approval of the student's advisory committee, may include isolated graduate courses outside the major or minor fields. A reading knowledge of one foreign language (exclusive of the major language and English) is required. The PhD in Romance Languages includes 3 hours of required coursework (ROML 9300) and 36 hours of elective credit.

French

FREN 4120/6120. Topics in French Culture, Language, and Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FREN 3030 and FREN(LING) 3090.
Selected topics in French and Francophone culture, civilization, language, linguistics, literature, or literary theory. Given in French.

FREN 6200. Francophone Cultures and Literatures. 3 hours.
The major areas of the Francophone world: North America, Antilles, Africa, Maghreb, and Indian Ocean. Literary works will be examined in their linguistic and cultural contexts.

FREN 6300. Medieval and Renaissance Texts and Contexts. 3 hours.
Significant developments in the language, literature, and civilization of France from the Middle Ages through the Renaissance. Discussions will consider writers and genres, linguistic theory, popular culture, and the arts with special attention to historical, social, and political context. Given in French.

FREN 6400. Self, Power, and the Rise of the Modern State. 3 hours.
For the period 1598 to 1789, the literary and other cultural manifestations indicating the emergence of the modern notion of the individual, as well as the modern state. Given in French.

FREN 6500. Revolutions: Artistic and Otherwise. 3 hours.
Literary and non-literary works in their contexts from the nineteenth and twentieth centuries in France. Literary movements from Romanticism to Poststructuralism may be studied, as well as the literary and social influences brought about by the wars and revolutions of this period. Given in French.

FREN(LING) 6630. The French Sound System in a Social Context. 3 hours.
French phonetics: the sounds of French as they relate to levels of language from the vernacular to literature. An examination of how sounds vary with relation to region and social class. Practice in class and in the language laboratory. Given in French.

FREN(LING) 6700. Applied French Linguistics. 3 hours.
Phonology of French as it determines the underlying forms of morphology with an application to the teaching of French to non-native speakers. Emphasis on the concepts of variation, acceptability, and cultural sensitivity. Given in French.

FREN(LING) 6800. French Syntax and Meaning. 3 hours.
The syntax of modern French through readings in descriptive analysis and examples of literary texts to see how word order contributes to meaning. Particular emphasis on levels of style and reflections of social class. Frequent compositions required. Given in French.

FREN(LING) 6910. History of the French Language in its Social and Literary Context. 3 hours.
The major changes in the history of the French language, with special attention to the interaction of linguistic and societal changes and to the representation of these changes in literary texts. Given in French.

FREN 7000. Master's Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FREN 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

FREN(LING) 7700. Teaching College French. 3 hours.
Principles and methods of second language teaching applied to French. An analysis of techniques used to teach listening, speaking, reading, writing, and culture, with an examination of current theories of language acquisition. Given in French.

FREN 8100. Seminar in Medieval Studies. 3 hours. Repeatable for maximum 9 hours credit.
Topics in medieval literature, language, and culture. Study of a particular problem, author, genre, or linguistic topic will be integrated into the larger cultural context of medieval France. Given in French.

FREN 8180. Literary Theory. 3 hours.
Theories that have special relevance for understanding French literature, linguistics, and cultural studies. Readings, discussions, and assignments in French. Readings by Bal, Barthes, Baudrillard, Benveniste, Bourdieu, Genette, Irigaray, Jakobson, Kristeva, LÇvi-Strauss, Riffaterre. Emphasis on structuralism, poststructuralism, cultural studies, narratology, and feminism. Given in French.

FREN 8200. Seminar in Renaissance Studies. 3 hours. Repeatable for maximum 9 hours credit.
In-depth study of a major author or special topic related to the French Renaissance. Given in French.

FREN 8300. Seminar in Seventeenth-Century Studies. 3 hours. Repeatable for maximum 9 hours credit.
Doctoral-level seminar in French seventeenth-century studies. Given in French.

FREN 8400. Seminar in Eighteenth-Century Studies. 3 hours. Repeatable for maximum 9 hours credit.
Doctoral-level seminar in French eighteenth-century studies. Given in French.

FREN 8500. Seminar in Nineteenth-Century Studies. 3 hours. Repeatable for maximum 9 hours credit.
An intensive study of one major nineteenth-century author or literary movement. Given in French.

FREN 8600. Seminar in Twentieth-Century Studies. 3 hours. Repeatable for maximum 9 hours credit.
A major author, group of authors, theme, genre topic or movement in French or Francophone literature. Given in French.

FREN 8700. Seminar in Francophone Studies. 3 hours. Repeatable for maximum 9 hours credit.
In-depth study of one or several writers, representative of one of the major Francophone areas in the world: North America, Antilles, Africa, Maghreb, and Indian Ocean. Although the primary emphasis will be on literary works, they will be studied in their linguistic and cultural contexts.

FREN(LING) 8800. Seminar in French Linguistics. 3 hours. Repeatable for maximum 9 hours credit.
Topics and issues in French linguistics. Possible offerings include Old French, French dialectology, French sociolinguistics, and French semantics and pragmatics. Given in French.

Italian

ITAL 4040/6040. Topics in Italian Cinema, Culture, and Literature. 3 hours.
Specific aspects of Italian cinema, culture, and literature. Topics to be selected according to the needs and interests of the students. Taught in seminar fashion with extensive outside readings of primary and secondary sources. Given in English.

ITAL 4120/6120. Topics in Italian Culture, Language, and Literature. 3 hours. Repeatable for maximum 45 hours credit.
Prerequisite: ITAL 4010 or ITAL 4050 or ITAL 4060 or ITAL 4070.
Selected topics in Italian culture, civilization, language, literature, or literary theory. Given in Italian.

Portuguese

PORT 4010/6010. Advanced Language, Literature, and Culture of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or permission of department.
Linguistic, cultural, and literary structures in Portuguese-speaking societies. Emphasis is divided between students' abilities to express themselves fluently in oral and written Portuguese and to identify and contextualize main literary genres and movements. Given in Portuguese.

PORT 4050/6050. Prose of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative prose texts from Portugal, Brazil, and Lusophone Africa analyzed in their cultural, social, and political contexts. Given in Portuguese.

PORT 4060/6060. Poetry of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative poetic texts from Portugal, Brazil, and Lusophone Africa analyzed in their cultural, social, and political contexts. Given in Portuguese.

PORT 4070/6070. Theater of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative plays from Portugal and Brazil analyzed with emphasis on drama as a literary genre, specific aspects of staging and performance, and socio-political context of theatrical production. Given in Portuguese.

PORT 4080/6080. Studies in Culture and Literature of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Studies in culture and literature of the Portuguese-speaking world. Selected topics of special interest in their cultural, social, and political context.

Romance

(ROML)AFAM 4860/6860. Topics in Afro-Hispanic Identity. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Representations of Africa and African American culture in Hispanic Literature by writers of African descent. By covering a variety of genres, the course will provide discussion about a cultural identity that is constantly in dialogue with dominant discourses. The course will incorporate critical texts.

ROML 7000. Master's Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ROML 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ROML(LING) 8000. Topics in Romance Languages. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Specific aspects of Romance languages, linguistics, literatures, or cultures.

ROML 8500. Readings and Research in Romance Languages. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Extensive readings in the field of the student's program of study determined by the student's previous background, presuming that the student is capable of reading rapidly with comprehension.

ROML 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ROML 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Spanish

SPAN 4120/6120. Topics in Spanish Culture, Language, and Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Selected topics in Hispanic culture, civilization, language, linguistics, literature, or literary theory. Given in Spanish.

SPAN 6100. Poetry. 3 hours.
Poetry as literary genre in Spain and Spanish America (Middle Ages, Colonial and Post-Colonial, Modern Ages) paying special attention to Hermenuetic theories of text, analysis of poetic language, relevant tex-

tual examples, and pertinent contextual aspects (historical, political, social, artistic, philosophical). Given in Spanish.

SPAN 6200. Narrative Fiction. 3 hours.
Narrative fiction as literary genres (novel and short story) in Spain and Spanish America through time (Middle Ages, Colonial and Post-Colonial, Modern Ages) paying special attention to theories of text, language, and linguistic innovations, relevant textual examples, and pertinent contextual aspects (historical, political, social, artistic, philosophical). Given in Spanish.

SPAN 6300. Essay. 3 hours.
Primarily non-fiction narrative as literary genre in Spain and Spanish America through time (Middle Ages, Colonial and Post-Colonial, Modern Ages) paying special attention to historical development and theories of essay, relevant textual examples, and pertinent contextual aspects (historical, political, social, artistic, philosophical). Given in Spanish.

SPAN 6400. Drama. 3 hours.
Dramatic texts as literary genre in Spain and Spanish America. From the Middle Ages to the Modern, historical development and theories of drama, relevant textual examples, and pertinent contextual aspects will be emphasized. Given in Spanish.

SPAN(LING) 6650. Spanish Phonetics and Phonology. 3 hours.
The Spanish sound system using core concepts of linguistics in general and phonology in particular. Characterization and transcription of spoken Spanish. Analysis of important phenomena of language variation in the Hispanic world, including national, geographical, historical, and social dialects. Given in Spanish.

SPAN(LING) 6750. Spanish Syntax and Morphology. 3 hours.
Grammar and language usage in the study of the syntactic and morphological structures of Spanish. The syntax and morphology of the pronoun and verb systems, agreement phenomena, gerunds, comparisons, and modal and aspectual distinctions. Written self-expression on a variety of issues as practical application of grammatical structures discussed in class. Given in Spanish.

SPAN(LING) 6850. Spanish Applied Linguistics. 3 hours.
Phonetic and morpho-syntactic structures that are problematic for the English-speaking student of Spanish. Ways in which culture is encoded in language. Implications of Spanish linguistics for the teaching and learning of Spanish and the linguistic education of language teachers. Given in Spanish.

SPAN(LING) 6950. Spanish Semantics and Pragmatics. 3 hours.
Semantic and pragmatic approaches to the study of meaning in Spanish. Differences between sentence meaning and speaker meaning. Analysis of types of discourse in Spanish such as narrative and free conversation. Given in Spanish.

SPAN 7000. Master's Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SPAN 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

SPAN(LING) 7750. Teaching College Spanish. 3 hours.
Foreign language teaching and learning applied to Spanish. Theories of second language acquisition. Techniques and strategies to teach listening, speaking, reading, writing, and culture in context. Activities and procedures of classroom instruction. Issues in the professionalization of Spanish teachers. Given in Spanish.

SPAN(LING) 8010. Topics in Culture, Language, Linguistics, and Literature of the Spanish-Speaking World Seminar. 3 hours. Repeatable for maximum 9 hours credit.
An intensive, integrative, and contextualized study of a specific representative topic in language, literature, culture, and linguistics of the Spanish-speaking world. Given in Spanish.

SPAN 8100. Poetry Seminar. 3 hours. Repeatable for maximum 12 hours credit.
A specific topic in poetry of the Spanish-speaking world with special emphasis on theoretical frameworks and contextualization. Given in Spanish.

SPAN 8180. History of Literary Criticism and Critical Theory. 3 hours.
With an emphasis on the twentieth century, an examination of historical and theoretical frameworks and their application in the development of literary genres, movements, and social implications in the Spanish-speaking world. Given in Spanish.

SPAN 8200. Narrative Fiction Seminar. 3 hours. Repeatable for maximum 12 hours credit.
A specific topic in narrative fiction of the Spanish-speaking world with special emphasis on theoretical frameworks and contextualization. Given in Spanish.

SPAN 8300. Essay Seminar. 3 hours. Repeatable for maximum 12 hours credit.
A specific topic in non-fiction narrative of the Spanish-speaking world with special emphasis on theoretical frameworks and contextualization. Given in Spanish.

SPAN 8400. Drama Seminar. 3 hours. Repeatable for maximum 12 hours credit.
A specific topic in drama of Spanish-speaking world

with special emphasis on theoretical frameworks and contextualization. Given in Spanish.

Sociology

E. M. Beck, *Head*
William Finlay, *Graduate Coordinator,*
542-3195
(Baldwin Hall)

The department offers programs leading to the degrees Master of Arts and Doctor of Philosophy in sociology. Specialized study is provided in four areas: organizations, occupations and industrial; deviance, criminology and law; social psychology and culture; and race, gender, and inequality. No foreign language is required for the master's or doctoral degrees.

The department has cooperative programs with the Women's Studies Program and the Public Administration Program. Research facilities include the Baldwin Data Analysis Center, the Institute for Behavioral Research, and the Survey Research Center.

SOCI 4240/6240. Sociology of War and the Military. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
War as a phenomenon with social causes and consequences; the military as an occupation and organization. Topics include conscription; the historical experiences of women and minorities in the military; and war as a source of collective memory for generations, ethnic groups, and nations.

(SOCI)CHFD 4610/6610. The Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Family study utilizing data from the fields of anthropology, individual and social psychology, history, sociology, economics, and psychiatry. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 4650/6650. Sociology of Aging. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The status, roles, and demographic aspects of the aging population and its relationship with social institutions.

SOCI 6010. Sociological Approaches to Culture. 3 hours.
Case studies of art, music, literature, rituals and ceremony, food, dress, and other cultural objects. Topics include the dimensions of cultural objects; structuralist, postmodern, functionalist and semiotic perspectives; and basic issues such as consensus and diversity, ideology, collective memory and tradition, religion, social solidarity, conflict, and change.

SOCI 6060. Sociology of Education. 3 hours.
Mainstream and critical theories of how society shapes the purposes, processes, and organization of schools; current policy issues and sources of national education data, with primary focus on United States elementary and secondary schools.

SOCI 6090. Social Change. 3 hours.
The causes, nature, and consequences of changes in social structure and institutions.

SOCI 6150. Criminal Punishment and Society. 3 hours.
The relationship between contemporary American punishment and social organization and processes. Topics include historical features of, and justifications for, punishment; the death penalty debate; prisoner rights; and prison conditions.

SOCI 6160. Sociology of Development. 3 hours.
The political economy of global development and its impact on class, gender, race, and ethnicity; the application and relevance of theoretical and methodological paradigms. Topics include agriculture, urbanization, environment, education, health, migration, economic restructuring, and political and collective strategies.

SOCI 6220. Development of Sociological Theory. 3 hours.
Pivotal theories from classic theorists such as Marx, Weber, and Durkheim to the present.

SOCI 6230. Sociological Theory: The German Tradition. 3 hours.
The German theoretical tradition, beginning with Marx and continuing with Wilhelmine-era sociologists, particularly Simmel and Weber; the Weimar and Nazi periods; and postwar critical theorists, notably Habermas.

SOCI 6270. Personality and Social Structure. 3 hours.
The social factors that shape behavior and self-concept; theories such as behaviorism, symbolic interactionism, Freudian psychology, cognitive social psychology, and critical approaches. Topics include emotions, human development, and authenticity and sincerity in the postmodern age.

SOCI 6280. Sociology of Gender. 3 hours.
Feminist theories and methodologies on gender, with an emphasis on contemporary American society and the intersection of gender, race, and class. Topics include socialization, sexual orientation, reproduction, violence, family and household, work and global restructuring, and politics.

SOCI(AFAM) 6370. Sociology of Race and Ethnicity. 3 hours.
The relationships of racial and ethnic groups with each other and with social institutions and processes.

SOCI 6410. Current Trends in Sociological Theory. 3 hours.
The concepts of community, authority, rank, the sacred, and alienation to examine conflict and consensus, modernity and postmodernity, classical theory, and the problem of meaning. The role of ideas in social integration and change, the problem of legitimation, civil religion in politics, "postmodern" society, and symbolism and moral order.

SOCI 6420. Structured Inequality. 3 hours.
Social stratification in the United States. The perception of class distinctions; prestige and power; the criteria of status evaluation; and the consequences of class for social relationships, lifestyles, and personality development.

SOCI(ANTH) 6450. Sociopolitical Ecology. 3 hours.
The relationship between humans and the environment; ecological and social theories about environmental policies and problems.

SOCI 6470. Deviance and Social Control. 3 hours.
Theories and research on the nature of deviant behavior and its control by social institutions, agencies, and groups.

SOCI 6490. Studies in Microsociology. 3 hours.
Research and theoretical perspectives on how humans are affected by social structures and how they create the structures that shape and direct behavior. Particular emphasis on symbolic interactionism. Perception, identity, socialization, deviance and social control, power and inequality, and the linkage between microscopic and macroscopic levels of analysis.

SOCI 6500. Sociology of the Political Economy. 3 hours.
The balance of political power between classes, races, and nations, as it shapes the economic forces that determine social order and the success or failure of social change.

SOCI 6600. Research Methods. 3 hours.
Sociological research methods. Topics include conceptions of research, the philosophy of science, formal and grounded theory construction, and qualitative and quantitative approaches to research design.

SOCI 6620. Analysis and Interpretation of Sociological Data I. 3 hours.
Univariate, bivariate, and multivariate analyses of non-experimental quantitative evidence. Topics include frequency distributions, central tendency and dispersion, cross tabulation, mean difference analyses, statistical inference, regression, and the use of microcomputers and statistical software to conduct quantitative data analysis.

SOCI 6630. Analysis and Interpretation of Sociological Data II. 3 hours.
Prerequisite: SOCI 6620 or permission of department.
Multivariate data analysis; the design and execution of an independent research project using such techniques.

SOCI 6700. Survey Research Methods. 3 hours.
The procedures, methods, and problems of survey data collection. Topics include the historical development of survey research; sources of error in surveys; sampling; formatting questionnaires and interviews; and interviewing techniques.

SOCI 6750. Qualitative Methods of Social Research. 3 hours.
Prerequisite: Permission of department.
Qualitative approaches to research, with an emphasis on participant observation, intensive interviews, and analysis of text. Students must complete a major fieldwork project.

SOCI 6800. Sociology of Work and Industry. 3 hours.
Theories and research on work, industry, and organizations. Topics include the impact of organizations and workplaces on employees; models of management and control; and recent transformations in work and work organizations.

SOCI 6810. Sociology of Crime. 3 hours.
The nature, extent, and correlates of crime; theories of criminal behavior and victimization.

SOCI 6830. Sociology of Law. 3 hours.
The nature of law, and the ways the legal system reflects its broader social context.

SOCI 6850. Sociology of Occupations. 3 hours.
Occupational choice, socialization, careers, and professionalization; contemporary issues concerning women and work, minorities and work, the consequences of bureaucratic and technological changes, and the impact of work on non-work behavior.

SOCI 6950. Sociology of Organizations. 3 hours.
The impact of organizational structure on the lives and attitudes of employees; centralization, control, power, and accountability in workplaces; the role of gender in organizations.

SOCI 7000. Master's Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SOCI 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

SOCI 8000. Special Topics in Sociology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Theory and research on advanced topics selected by the student. Non-Traditional Format: Directed study.

SOCI 8010. Seminar in Culture. 3 hours.
Approaches to culture, including the critical traditions of Frankfurt and Birmingham; the Durkheimian tradition of collective memory and social integration; and interactionist emphases on cultural products and structuration.

SOCI 8200. Seminar in Sociological Theory and Research. 3 hours. Repeatable for maximum 9 hours credit.
Selected topics on theory and research.

SOCI 8230. Seminar in Critical Theory. 3 hours.
Critical social theory from its origins in Germany in the 1920s to its present development in Europe and the United States. Includes Frankfurt theorists such as Horkheimer, Marcuse, and Adorno; second-generation Frankfurters, especially Habermas; and contemporary critical theories of identity, culture, justice, and politics.

SOCI 8280. Seminar in Gender Stratification. 3 hours.
Prerequisite: SOCI 6280 or WMST 7010 or permission of department.
Research and theories of gender equality and inequality in America and other cultures. Topics include gender stratification in public and private domains, and the intersection of gender with race, ethnicity, social class, and sexual orientation.

SOCI 8450. Seminar in Theory Construction. 3 hours.
Theory construction and empirical inquiry, including an application of model-building concepts to specific research selected by the student.

SOCI 8500. Seminar in Political Sociology. 3 hours.
Issues of class, gender, and race. Topics include power and state formation; competing paradigms of state action; the relationship between the state and economy; collective action; democratization, legitimacy and revolution.

SOCI 8510. Seminar in Organizations and Social Control. 3 hours.
Prerequisite: SOCI 6470 or SOCI 6800 or SOCI 6950.
Organizational processes that control behavior, including work performance, career development, and off-job attitudes, orientations, and behaviors.

SOCI 8630. Empirical Model-Building in Social Research. 3 hours.
Prerequisite: SOCI 6630 or STAT 6220 or permission of department.
Simultaneous equations and confirmatory factor methods to evaluate structural and measurement models. Emphasis on the interplay between theory and the construction and evaluation of empirical models.

SOCI 8730. Theories of Social Psychology. 3 hours.
Major classic and contemporary theories, including Freudian theory, exchange theory, dramaturgy, phenomenology, and ethnomethodology.

SOCI 8820. Communities and Crime. 3 hours.
Urban crime and spatial variation in crime rates. The impact of crime on the structure of communities and its role in neighborhood decline.

SOCI 8830. Violence and Society. 3 hours.
Theory and research on the relationship between criminal violence and social structures and processes.

SOCI 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SOCI 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Speech Communication

Donald L. Rubin, *Head*
Jerold L. Hale, *Graduate Coordinator, 542-3263*
(Terrell Hall)

The Department of Speech Communication offers programs leading to the PhD and MA degrees. PhD candidates select either an interpersonal communication track or a rhetoric track.

During their first year of study, students in the rhetoric track take SPCM 8200 and SPCM 8010 (1 hr.) in the Fall semester and SPCM 8300 in the Spring. Students in the interpersonal track take SPCM 8500 and SPCM 8010 (1 hr.) in the Fall semester and SPCM 8700 in the Spring semester. Additional requirements for PhD candidates include: (1) research skills, (2) competence in two areas within communication, (3) four hours of SPCM 8050, taken during the first four semesters in the program, (4) comprehensive examinations, and (5) dissertation.

Requirements for the MA in speech communication include: (1) SPCM 8200, SPCM 8500, SPCM 8010 (1 hr.), and SPCM 8020 (1 hr.) in the Fall semester and either SPCM 8300 or SPCM 8500 in the Spring semester of the first year of study (2) four hours of SPCM 8050, one per semester, (3) thesis, and (4) final oral examination on both the program of study and the thesis.

SPCM 4310/6310. Communication Strategies in Government. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
Communication strategies and activities in the executive and legislative branches of local, state, and national government. Case study approach incorporated into the class.

SPCM 4340/6340. Communication and Religion. 3 hours.
The nature and practice of communication in a variety of religious traditions. Notions of sacred symbolism, myth, revelation, hermeneutics, and apologetics are especially emphasized.

SPCM 4370/6370. Women and United States Public Discourse. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
History and criticism of speeches by United States women in nineteenth- and twentieth-century social reform movements, especially woman's rights and feminism.

SPCM(HPRB) 4610/6610. Health Communication. 3 hours.
Communication about health with physicians and other providers, within support groups and health care organizations, and by public figures, groups, and organizations.

SPCM 6320. Political Campaign Communication. 3 hours.
The role communication plays in deciding which candidates will run for office, the nomination of candidates, and the election of candidates to office.

SPCM 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SPCM 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

SPCM 7500. Seminar in Communication Training and Development. 3 hours.
Prerequisite: Graduate standing.
Practicum of communication training and development. Relevant theory and research and the opportunity to participate in and present extended training and development programs. Topics include needs assessment, design and presentation of training programs, proposal writing, multi-media skill development, and follow-up evaluation of program effectiveness.

SPCM 8010. Seminar in Communication Education. 1-3 hours. Repeatable for maximum 6 hours credit. 0-2 hours lecture and 1 lab period of 2 hours each per week.
Teaching speech communication in postsecondary institutions, including communication training in organizations. Learner variables, such as communication apprehension, sociolinguistic diversity, and motivations for adult learning. Instructional strategies, including evaluation, technology use, and curriculum organization. Projects in analysis of instructional discourse and evaluation of learning outcomes. Non-Traditional Format: Students can elect to take the course as a lab/discussion only for a single credit, or they can elect to enroll in the lecture section as well for up to two additional credits.

SPCM 8020. Introduction to Graduate Study in Speech Communication. 1 hour.
Introduction to graduate studies in the field of speech communication.

SPCM 8050. Research Practicum in Communication. 1 hour. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research apprenticeship conducted under faculty supervision. Non-Traditional Format: Collaborative research conducted with varying time commitments from week to week.

SPCM 8200. Seminar in Rhetorical Theory. 3 hours.
Rhetorical theory in classical, modern, and contemporary times.

SPCM 8210. Seminar in Classical Rhetorical Theory. 3 hours.
Rhetorical thought in the Graeco-Roman world, from the older Sophists to St. Augustine. Non-Traditional Format: Independent research under the direction of faculty members.

SPCM 8220. Seminar in Argumentation. 3 hours.
Examines argument from a rhetorical perspective focusing on reasoning as it occurs in a variety of public settings.

SPCM 8230. Contemporary Rhetorical Theory. 3 hours.
Influential twentieth-century scholarship in rhetorical theory, emphasizing a communication orientation.

SPCM 8240. Legal Communication. 3 hours.
Communication issues and skills which affect lawyers, judges, litigants, and jurors in criminal and civil justice. Particular attention is given to a survey of research related to verbal and nonverbal communication as applied to legal interviewing, negotiation, pretrial tactics, and litigation.

SPCM 8300. Seminar in Rhetorical Criticism. 3 hours.
Analysis, evaluation, and practice of approaches to rhetorical criticism of public discourse.

SPCM 8310. Topics in Public Address. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: (SPCM 8200 and SPCM 8300) or permission of department.
Research, analysis, and evaluation of selected topics of public address.

SPCM 8330. Topics in Rhetorical Theory. 3 hours. Repeatable for maximum 9 hours credit.
Specific areas of research of rhetorical theory from various eras. May focus on an author (e.g., Kenneth Burke, Michel Foucault, or St. Augustine) or a subject area (e.g., rhetoric and social change or rhetoric and culture or stylistics).

SPCM 8340. Methodologies of Rhetorical Criticism. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: (SPCM 8200 and SPCM 8300) or permission of department.
A particular approach to rhetorical criticism, such as feminist criticism, Burkean criticism, or cross-cultural criticism.

SPCM 8500. Seminar in Interpersonal Communication Theory. 3 hours.
Prerequisite: Permission of department.
Theories of interpersonal communication. Familiarizes students with the breadth, scope, and range of communication theories. Develops skills in theory development, hypothesis formation, and model building. Provides skills necessary to read and evaluate scholarly publications in speech communication.

SPCM 8510. Seminar in Nonverbal Communication. 3 hours.
Empirical and theoretical research that focuses on the major communicative functions of nonverbal behavior and cues. Particular emphasis is placed on research projects that focus on the impression management functions of nonverbal communication. Students examine contemporary impression management efforts in politics, the courtroom, and related contexts.

SPCM 8520. Seminar In Communication and Social Influence. 3 hours.
Familiarizes students with issues related to communication and social influence. Parameters of social influence, theories of social influence that emphasize communication processes, source and audience characteristics, message and channel properties, and attitudinal outcomes.

SPCM(LING) 8530. Language and Communication Behavior. 3 hours.
Surveys linguistic aspects of human interaction. Examines language patterns such as orality, intensity, immediacy, and power. Analyzes conversational data as well as language structures in public messages.

SPCM 8540. Relational Communication. 3 hours.
Issues and research related to communication in personal relationships. Issues and studies related to attraction, relational development, relational maintenance and repair, critical events in relationships, and relational termination.

SPCM 8550. Advanced Topics in Interpersonal Communication. 3 hours. Repeatable for maximum 9 hours credit.
A readings and research seminar in theoretical topics of interpersonal communication. Areas of study will vary depending on the timelines of the topics and the research focus of the professor. Sample topics include communication in relational development and interpersonal communication competencies.

SPCM 8610. Seminar in Health Communication. 3 hours.
The multiple discourses and processes involved in communication about health. Advanced analysis of theories and research involved in the processes of naming, blaming, and shaming.

SPCM 8700. Social Scientific Research Methods In Speech Communication. 3 hours.
Topics covered include formalizing research questions, conceptual definitions, operational definitions, measurement, hypothesis testing, sampling, research designs, and computer assisted data analysis.

SPCM 8800. Seminar in Intercultural Communication. 3 hours.
The study of communication within and between diverse cultural groups. Examines communicative nature of social identity, effects of world view on communication, nonverbal and verbal codes, varying relational patterns, and rhetoric situated in varying cultures. An applied research project will be conducted.

SPCM 8990. Directed Study and Special Topics in Speech Communication. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Individual directed study or research in selected areas of speech communication conducted under the supervision of a faculty member.

SPCM 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SPCM 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Statistics

William P. McCormick, *Head*
Jaxk H. Reeves, *Graduate Coordinator, 542-3316*
(Statistics Building)

The Department of Statistics offers a Master of Science (MS) degree in statistics, a Doctor of Philosophy (PhD) degree in statistics, and a Master of Applied Mathematical Science (MAMS) degree. The MS degree has two options, one in applied statistics and the other in mathematical statistics. In both options, preparation of an MS thesis is optional. The thesis option requires a minimum of 27 semester hours of graduate credit exclusive of thesis and the non-thesis option requires a minimum of 33 semester hours. The PhD degree requires basic core course work equivalent to the mathematical statistics option of the MS degree plus work in advanced probability and inference; otherwise, the student can select advanced course work according to his own special interests.

Graduate students in the department may expect to have assignments that include teaching, applied research and consulting experience in addition to their course work and the basic research experience involved in completing their dissertation. The department maintains computational and data preparation laboratories, including its own computer system of thirty Sun Workstations and thirty supermicro-computers. Three labs containing Sun Workstations, ATs, a sparc 20 fileserver and a sparc 10 computer server provide the user with the versatility of in-house computing.

Courses in advanced calculus, linear algebra, and computer programming are required as prerequisites for all graduate students in statistics.

STAT 4070/6070. Probability and Statistics for Secondary Teachers. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in STAT 2100H or STAT 4210 or STAT 6210.
Prerequisite: STAT 2000.
Sampling and statistical studies; basic probability; random variables and their distributions; exploring data using graphical techniques and numerical summaries; exploring relationships between two variables: chi-sq. test of independence; correlation, linear regression; confidence intervals and hypothesis testing for means and proportions. Group projects and activities illustrating concepts will be utilized.

STAT 4100/6100. Applied Stochastic Processes. 3 hours.
Not open to students with credit in STAT 4720/6720 or STAT 8700.
Prerequisite: MATH 2500.
Stochastic processes including discrete, continuous and conditional probability concepts. Definitions and properties of stochastic processes. Markov processes and chains, basic properties, transition matrices and steady state properties. Reliability renewal and queueing processes, expected waiting times, single and multiserver queues.

STAT 4230/6230. Applied Regression Analysis. 3 hours.
Prerequisite: STAT 4210 or STAT 6220 or permission of department.
Applied methods in regression analysis. Topics include univariate linear regression, techniques of multiple regression and model building, ANOVA as regression analysis, analysis of covariance, model selection and diagnostic checking techniques, nonlinear regression, and logistic regression.

STAT 4240/6240. Sampling and Survey Methods. 3 hours.
Prerequisite: STAT 4210 or STAT 6210.
Design of finite population sample surveys. Stratified, systematic, and multistage cluster sampling designs. Sampling with probability proportional to size. Auxiliary variables, ratio and regression estimators, non-response bias.

STAT 4260/6260. Statistical Quality Assurance. 4 hours.
Prerequisite: STAT 4210 or STAT 6220.
Basic graphical techniques and control charts. Experimentation in quality assurance. Sampling issues. Other topics include process capability studies, error analysis, SPRT, estimation and reliability.

STAT 4270/6270. Least Squares Methods. 3 hours.
Prerequisite: STAT 4210 and MATH 2500.
Least squares techniques using matrices. Techniques of matrix algebra and calculus applied to regression and experimental designs.

STAT 4280/6280. Applied Time Series Analysis. 3 hours.
Prerequisite: STAT 4510/6510.
Autoregressive, moving average, autoregressive-moving average, and integrated autoregressive-moving average processes, seasonal models, autocorrelation function, estimation, model checking, forecasting, spectrum, spectral estimators.

STAT 4290/6290. Nonparametric Methods. 3 hours.
Prerequisite: STAT 4210 or STAT 6220.
Techniques and applications of nonparametric statistical methods, estimates, confidence intervals, one sample tests, two sample tests, several sample tests, tests of fit, nonparametric analysis of variance, correlation tests, chi-square test of independence and homogeneity, sample size determination for some nonparametric tests.

STAT 4360/6360. Statistical Programming in SAS. 3 hours.
Prerequisite: STAT 4210 or STAT 4230/6230 or STAT 6220.
Statistical programming techniques, data manipulation, and presentation of analyses using SAS software package.

STAT 4380/6380. Survival Analysis. 3 hours.
Prerequisite: [(STAT 4210 or STAT 6220) and STAT 4510/6510] or permission of department.
Methods for comparing time-to-event data, including univariate parametric and nonparametric procedures, regression models, diagnostics, group comparisons, and use of relevant statistical computing packages.

STAT 4510/6510. Mathematical Statistics I. 3 hours.
Prerequisite: MATH 2500.
Concepts and basic properties of some special probability distributions, independence, moment generating functions, sampling distributions of statistics, limiting distributions.

STAT 4520/6520. Mathematical Statistics II. 3 hours.
Prerequisite: STAT 4510/6510.
Methods and properties of point estimation, confidence intervals, minimum variance unbiased estimators, hypothesis testing, analysis of variance, linear regression.

STAT 4710/6710. Introduction to Probability Theory I. 3 hours.
Prerequisite: MATH 2500.
Probability axioms, combinatorial analysis, random variables, univariate and multivariate distributions, expectations, conditional distributions, independence, and laws of large numbers.

STAT 4720/6720. Introduction to Probability Theory II. 3 hours.
Prerequisite: STAT 4710/6710.
Central limit theorems, random walks, Markov chains and processes, Brownian motion, branching and renewal processes, diffusion processes and queueing processes and applications.

STAT 6210. Statistical Methods I. 3 hours.
Statistical models, descriptive statistics, random variables, probability distributions, concepts in statistical inference, estimation, confidence intervals, hypothesis testing, goodness-of-fit tests, contingency tables.

STAT 6220. Statistical Methods II. 3 hours.
Prerequisite: STAT 6210.
Regression analysis including simple linear regression, multiple regression, model checking and analysis of residuals, correlation and prediction, analysis of variance, completely randomized designs, randomized block designs, factorial designs, interaction and covariance analysis.

STAT 6310. Statistical Analysis I. 3 hours.
Prerequisite: Permission of department.
Statistical analysis, including principles of sampling and descriptive statistics, elementary probability and discrete random variables, normal distribution, sampling distributions, statistical inference and hypothesis testing for one and two samples, simple linear regression, basic nonparametrics, chi-squared tests.

STAT 6320. Statistical Analysis II. 3 hours.
Prerequisite: STAT 6310 or permission of department.
Statistical analysis, including multiple regression, model building and selection, regression diagnostics, nonlinear regression, completely randomized designs, randomized block designs, factorial designs, general linear models, analysis of covariance, split plot designs, repeated measures analyses, and use of relevant statistical computing packages.

STAT 6810. Probability Distributions. 3 hours.
Prerequisite: Permission of department.
Probability laws, distribution functions and expectations, random variables and statistical distributions, joint distributions and conditional expectations, order statistics, Markov chains, Poisson process, Brownian motion, renewal theory, queueing theory.

STAT 6820. Statistical Inference. 3 hours.
Prerequisite: STAT 6810.
Principles of data reduction, completeness, ancillarity. Point estimation; methods of estimation. Evaluation of estimators; C-R lower bound, efficiency, hypothesis testing: N-P tests, UMP tests, interval estimation; coverage probabilities and confidence sets.

STAT 7000. Master's Research. 1-9 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

STAT 7100. Technical Report. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
For use with the professional master's degree in the Applied Mathematical Sciences. Non-Traditional Format: Students doing technical report work for the professional Masters of Applied Mathematical Sciences Degree will meet with their assigned faculty members as needed.

STAT 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

STAT 7770. Graduate Assistantship Teaching in Statistics. 1-5 hours. Repeatable for maximum 60 hours credit.
Prerequisite: Permission of department.
Provides graduate teaching assistants with knowledge of pedagogical approaches and available support systems for teaching statistics courses. Special sections are reserved for international students, with focus on

use of language, pedagogy, and cultural aspects of teaching in this country.

STAT 8000. Supervised Statistical Consulting. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: STAT 8260.
Statistical consulting skills needed to deal with clients, formulate statistical models, explain analyses, use standard statistical computer packages, and write reports in language understandable to the client.

STAT 8040. Environmental Statistics. 3 hours.
Prerequisite: STAT 4210 or STAT 6220 or STAT 6320.
Methods for sampling the environment and subsequent analysis of resulting data are considered. Emphasis is placed on design-based analysis and spatial data analysis. Special topics include environmental variables, environmental toxicology, and long-term trend detection.

STAT 8060. Computing Techniques in Statistics I. 3 hours.
Prerequisite: STAT 4510/6510 and STAT 6220.
Algorithms for computer generation of discrete and continuous univariate and multivariate random variates. Finite population sampling algorithms. Poisson processes. Variance reduction techniques. Analysis of simulated data.

STAT 8070. Computing Techniques in Statistics II. 3 hours.
Prerequisite: STAT 8060.
A continuation of Computing Techniques in Statistics I. Resampling methods. Markov-chain simulation techniques. Numerical integration. Optimization techniques. Data augmentation methods. Selected topics in advanced statistical computation.

STAT 8090. Statistical Analysis of Genetic Data. 3 hours.
Prerequisite: (STAT 4210 or STAT 6220) and STAT 4510/6510.
Common statistical and genetic models appropriate for analyzing genetic data, especially DNA sequence data. Emphasis on fitting models, estimating parameters, and making inferences based on genetic data.

STAT 8170. Probability Theory I. 3 hours.
Prerequisite: MATH 4100/6100.
Measurable spaces and measures, Lebesgue-Stieljes measure, independence, almost sure and in probability convergence, integration in probability spaces, product measures, absolute continuity of measures, weak law of large numbers, strong law of large numbers, weak convergence.

STAT 8180. Probability Theory II. 3 hours.
Prerequisite: STAT 8170.
Central limit theorem and Lindeberg-Feller theorem, stable laws, infinitely divisible laws, conditional expectations, Martingales, almost sure convergence for martingales, uniform integability, Markov chains, Brownian motion, Skorokhod's representation and Donsker's theorem.

STAT 8200. Design of Experiments for Research Workers. 3 hours.
Prerequisite: STAT 4210 or STAT 6220 or STAT 6320.
Methods for constructing and analyzing designed experiments are considered. Concepts of experimental unit, randomization, blocking, replication, and orthogonal contrasts are introduced. Designs include completely randomized design, randomized complete block design, Latin squares design, split-plot design, repeated measures design, and factorial and fractional factorial designs.

STAT 8210. Multivariate: Theory and Methods. 3 hours.
Prerequisite: STAT 6320.
Relevant matrix theory, multivariate random vectors, exact and asymptotic distributions, multivariate normal distribution (MVN), Q-Q plots, sampling from MVN and inference for population mean vector, covariance matrix, correlation matrix, MANOVA, principal component analysis, factor analysis, discriminant analysis and classification and clustering.

STAT 8220. Clinical Trials. 3 hours.
Prerequisite: STAT 6320.
Drug development and NDA approval procedures; randomization; blindness; phase I-IV clinical trials; multicenter trials; bioequivalency; sample size determination; design and analysis; cross-over design; repeated measurements design; survival analysis; meta analysis.

STAT 8240. Sampling and Related Topics. 3 hours.
Prerequisite: STAT 4240/6240 and STAT 6820.
Prerequisite or corequisite: STAT 8210 and STAT 8260.
Recent development in model-based estimation in survey sampling. A super population approach to inference on finite population quantities will be taken. Both Bayesian and classical approaches to sampling and related applications including small area estimation will be emphasized.

STAT 8250. Multivariate Methods. 3 hours.
Prerequisite: STAT 6220.
The relevant matrix theory, multivariate random vectors and their distributions, multivariate normal distribution (MVN), sampling from MVN and inference for population mean vector, covariance matrix, correlation matrix, multivariate ANOVA, principal component analysis, factor analysis, discriminant analysis and classification.

STAT 8260. Theory of Linear Models. 3 hours.
Prerequisite or corequisite: STAT 6820 and STAT 8210.
The Gauss-Markov model is introduced. Topics include estimability, parameter estimation, analysis of variance, hypothesis testing, restricted models, reparameterization, two- part model, correlated data, and fixed, mixed and random effects models.

STAT 8270. Spatial Statistics. 3 hours.
Prerequisite: STAT 4520/6520 and STAT 8260.
Theoretical foundations of spatial statistics, models for spatial data, and methods for model fitting, statistical

inference, and spatial prediction are considered. Analysis of lattice data, images, continuous spatial variation and spatial point patterns.

STAT 8280. Time Series Analysis. 3 hours.
Prerequisite: STAT 4520/6520 or STAT 6820.
Linear processes, autoregressive-moving average models, predication, parameter estimation, model fitting and testing.

STAT 8290. Advances in Experimental Designs. 3 hours.
Prerequisite: STAT 8260.
Historical and recent advances in experimental design are considered. Designs including factorial, fractional factorial, central composite, incomplete block, cyclic, row-column, and simplex are discussed. Response surface and mixture models are considered. Optimal designs for linear and nonlinear models are developed.

STAT 8300. Multivariate Analysis. 3 hours.
Prerequisite: STAT 6820 and STAT 8210.
Selected topics in the theory of multivariate analysis at an advanced level.

STAT 8330. Advanced Applications and Computing. 3 hours.
Prerequisite: STAT 8200.
Basics of S programming language, objects in S+, graphics in S+, smoothing techniques and data summaries, linear models, generalized linear models, modern nonlinear regression techniques, multivariate statistics, survival analysis.

STAT 8530. Advanced Statistical Inference I. 3 hours.
Prerequisite: STAT 6820.
Prerequisite or corequisite: STAT 8170.
Exponential families; more on sufficiency, completeness, ancillarity, and UMVUE; C-R lower bound and Fisher information for single and multiparameter cases; equivariance; large sample theory; likelihood estimation and asymptotic efficiency.

STAT 8540. Advanced Statistical Inference II. 3 hours.
Prerequisite: STAT 8530.
Theory of uniformly most powerful tests, unbiased tests, and invariant tests, maximin tests, confidence sets, asymptotic theory for standard large sample likelihood based tests, theory of linear rank tests.

STAT 8550. Asymptotic Inference. 3 hours.
Prerequisite: STAT 8540.
Local asymptotic normality and its applications; M-estimation; minimum distance methods; robust inference; quasilikelihood and applications to generalized linear models; kernel density estimation; adaptive estimators and tests with applications to proportional hazard models.

STAT 8560. Advanced Theory of Nonparametric Statistics. 3 hours.
Prerequisite: STAT 8540.
Nonparametric estimation and hypothesis testing, relative efficiency, exchangeable random variables, ranking and distribution free statistics, generalized U-Statistics, generalized linear rank statistics, limiting distributions of certain nonparametric statistics, density estimation and related topics.

STAT 8570. Statistical Decision Theory. 3 hours.
Prerequisite: STAT 8530.
Essential elements of decision theory, game theoretic approach, minimax theorem, Bayesian Inference and decision rules, admissibility and minimaxity results, minimax estimation of normal and Poisson means, multiple decision problems, gamma-minimaxity.

STAT 8600. Ranking and Selection: Theory and Methods. 3 hours.
Prerequisite: STAT 4520/6520 or STAT 6820.
Selecting the best populations and treatments; indifference zone and subset selection approaches; multiple comparisons; nonparametric selection; bayesian selection; estimation of ordered parameters.

STAT 8620. Advanced Statistical Applications I. 3 hours.
Prerequisite: STAT 6320 and STAT 6820.
Review of standard discrete distributions and generating functions, two-way and higher-dimensional contingency tables, chi-squared and other goodness-of-fit tests, binary response models, log-linear models, multinomial response models, introduction to generalized linear models.

STAT 8630. Advanced Statistical Applications II. 3 hours.
Prerequisite: STAT 8260 and STAT 8620.
Theoretical foundations for the generalized linear model are introduced. Applications to Gaussian, binary, polytomous, and counts data are considered. Topics include hierarchical model building, estimation algorithms, analysis of deviance, and diagnostics. Extensions include overdispersed data, mixed generalized linear models, longitudinal data, and spatial data.

STAT 8650. Bootstrapping Techniques. 3 hours.
Prerequisite: STAT 8530.
The jacknife and bootstrap, bootstrap confidence intervals, prepivoting, asymptotic validity and invalidity, bootstrap accuracy and Edgeworth expansions, bootstrap for regression and autoregression, bootstrapping Markov chain models, moving block bootstrap for general weakly dependent data.

STAT 8700. Applied Stochastic Processes. 3 hours.
Prerequisite: STAT 4720/6720.
Discrete time Markov chains, continuous time Markov chains, queueing processes, renewal processes, Markov random fields, point processes, Brownian motion and diffusion.

STAT 8730. Sequential Analysis. 3 hours.
Prerequisite: STAT 6820.
Prerequisite or corequisite: STAT 8170 and STAT 8530.
Stopping times, optional stopping theorem, Anscombe's theorem, renewal theorem and associated results, SPRT for simple and composite hypotheses, nonlinear renewal theory, sequential point and interval

estimation. In addition to these topics, current results from the literature will be presented.

STAT 8900. Special Topics in Statistics. 3 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Selected topics concerning recent developments in statistics.

STAT 8910. Statistical Seminar. 1-3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Seminar topics in statistics. Non-Traditional Format: Meeting times for the statistical seminar will vary with topic. Typical meeting times for seminars are one or one and one-half hours per week. Some seminars will meet twice a week, and individual meetings with faculty are occasionally used.

STAT 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

STAT 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Women's Studies

Patricia Del Rey, *Director*
542-2846
(230K Main Library)

Please see the Index for information on the certificate program in women's studies. The courses having a women's studies prefix are listed below.

WMST 4010/6010. Introduction to Feminist Theories. 3 hours.
Prerequisite: Undergraduate level only: (WMST 1110 or WMST 2010) and permission of department.
The historical origins, philosophical assumptions, and political implications of contemporary feminist theories, including conservative, liberal, radical and ecological feminist theories. Offered fall, spring, and summer semesters.

WMST 4120/6120. Biology and Politics of Women's Reproduction. 3 hours.
Prerequisite: Undergraduate level only: Permission of department.
Women's reproductive life cycles from the perspective of evolutionary biology and the political theory of radical feminism. Topics include puberty, sexual cycling, menarche, pregnancy, childbirth, and menopause. Feminist critiques of science are explored.

WMST 4130/6130. Border Women: Postcolonialism, Gender, and Identity. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Gender construction and identity formation in multicultural, postcolonial societies using theories from the social sciences and humanities. Experiences of women of color and Third World women from, for example, the Indian sub-continent, Hawaii, and Chicana United States. Topics include processes of marginalization, strategies of resistance, and transformation of oppressive power relations.

WMST 4250/6250. Special Topics in Women's Studies. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: WMST 4010/6010 or permission of department.
Ongoing and current topics of scholarly interest in women's studies.

WMST 7010. Women and the Construction of Knowledge. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Women's approaches to thinking, learning, and the production of knowledge; inclusiveness of academic disciplines to women's lives and experiences; the question of whether distinct feminist methods exist within academic disciplines; and women's status as participants in disciplines and universities.

WMST 7050. The Political Economy of Gender in Third World Societies. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Conceptual and methodological tools of analysis to gender and development issues in Third World societies of Africa, Asia, Latin America, and the Caribbean. Use of case studies to explore similarities in gender-related experiences and strategies of resistance and empowerment.

WMST 7060. Black Women's Narratives. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Theoretical and methodological issues in the study and use of black women's narratives. The course also focuses on how gender, ethnicity, culture, class, and sociohistorical context are reflected in various kinds of narrative texts.

WMST 7070. Feminist Ethnography. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Ethnographic research and writing and how it is shaped by gender, race, class, and other markers of social difference. Issues of identity politics, power relationships, ethical dilemmas, and representational

strategies will be explored. Students will engage in critical reading of classic and contemporary ethnographies and term projects entailing qualitative methods.

WMST 7100. Lesbian and Gay Studies. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Investigation of same-sex desire, heterosexuality, homosexuality, and the regulation of sexual identities across different racial/ethnic and class/regional communities. Focusing on Native American, African American, Latino, Asian American, and international studies, with texts from law, anthropology, history, film, fiction, and theory.

WMST 7950. Directed Research in Women's Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: WMST 4010/6010 and permission of department.
Readings and independent research closely supervised by a faculty member on a specified interdisciplinary topic in women's studies. Non-Traditional Format: Students will meet with faculty members on a regular basis.

WMST 8020. Seminar in Advanced Feminist Theory. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: WMST 4010/6010 or permission of department.
Seminar covering topics of scholarly interest in advanced feminist theory.

The C. Herman and Mary Virginia Terry College of Business

P. George Benson, Dean
Kay L. Keck, *Director, MBA Program, 542-5671*
(Brooks Hall)

Eight graduate degree programs are offered by the Terry College of Business: the Master of Business Administration, Master of Accountancy, Master of Marketing Research, Master of Arts in business administration and in economics, Master of Applied Mathematical Science, and Doctor of Philosophy in business administration and in economics. The MBA, MAcc, and MMR degrees lead to professional and managerial careers. The MA programs are used for intensive specialization or as a path to the PhD. The PhD programs lead to research and/or teaching careers.

The one-year MBA and MMR programs admit students in the summer only. The two-year MBA program admits students in the fall only. All other programs in the Terry College of Business admit students each semester.

MBA

The MBA degree requires two years for students without undergraduate preparation in business administration and one year for students entering with an AACSB accredited BBA degree. Broadly speaking, the MBA program provides a mixture of practical and theoretical studies to prepare the student to become a first-rate managerial problem-solver in either the private or the public sector. The program prepares the student to fulfill important business roles in a rapidly changing environment.

The program's objectives are:

1. To provide a basic analytical tool kit for management, including fundamental concepts and principles from the various management disciplines, and an understanding of the major institutions in business and government.
2. To develop skill in using these tools in an imaginative, orderly, problem-solving capacity.
3. To advance the ability to make and carry out decisions.
4. To develop a basis for dealing effectively with others, in person and in writing.
5. To encourage continuous learning from experience.
6. To instill a thorough understanding of today's economic, political, and social environment as it relates to business.

The first year consists of core course work. These courses introduce tools, concepts, and techniques for managerial decision making in the basic areas of business. Courses include accounting, finance, production management, information systems, ethics, statistics, economics, legal environment of business, marketing, organizational behavior, negotiations, and management strategy. The second year consists of sequence and elective course work and the MBA P.L.U.S. Program.

The one-year MBA consists of three consecutive semesters of course work. Core courses are taken during the summer term. During the rest of the year, the student takes sequence courses, electives, and the MBA P.L.U.S. Program.

Each student must take at least six hours in two areas of specialization. Six electives are available to gain additional breadth or depth in the concentration. A calculus course is a prerequisite for enrollment. Please refer to the MBA brochure for additional program information.

MMR

The MMR program prepares students for professional careers in marketing research and marketing intelligence. Students entering this selective program usually have degrees in business or marketing, although entrance is available to students in other majors who meet a set of five prerequisite business courses. Criteria for admission include: GMAT score, GPA, work experience or internships, references, and a personal interview. The program involves 12 months of coursework followed by a six-month paid internship. For a brochure and application packet contact the MMR website at http://www.cba.uga.edu/mmr/.

MAcc

The MAcc program is designed to prepare students for professional careers in financial accounting, public sector accounting, auditing, managerial accounting and controllership, information systems, or taxation. Students usually enter this program after having earned a baccalaureate degree. However, the currently enrolled accounting majors at the University of Georgia may enter at the beginning of the senior year, in which case the student will earn both a baccalaureate and master's degree.

MA

The MA programs enable students to secure a working knowledge in business administration or economics. After satisfying undergraduate foundation requirements, the student, counseled by a major professor, designs a program of at least 24 semester hours built around a research field. The thesis and course work represent an integrated program of study. Master of Arts programs are offered in economics, finance, management, management sciences, real estate, and risk management and insurance.

PhD

The PhD programs provide a background for careers in government, business, academia, and research. The doctoral program is individually planned for each student by the major professor and advisory committee. There is no foreign language requirement. Students in the PhD in Business Administration develop a high level of competency in a major field of business, a minor field, and a research methodology. In addition, all students must have knowledge of mathematics through differential and integral calculus. Programs leading to the PhD in Business Administration are offered in:

Accounting
Business Finance
Management Information Systems
Management Sciences
Marketing
Human Resource Management
Production/Operations Management
Real Estate
Risk Management and Insurance
Strategic Management

The PhD in Economics is offered with emphasis on microeconomic theory, macroeconomic theory, and two of the following fields:

Financial Economics
Econometrics
Economic Development
Economic History
Industrial Organization
International Economics
Labor Economics
Monetary Economics
Public Finance
Productivity Analysis

Accounting

Russell M. Barefield, *Director*
Jennifer J. Gaver, *Graduate Coordinator, (PhD), 542-3699*
Russell M. Barefield, *Graduate Coordinator, (Macc), 542-1616*
(Brooks Hall)

ACCT 5030/7030. Advanced Financial Accounting. 3 hours.
Prerequisite: ACCT 5020.
Application of accounting theory to complex business entities, including accounting for equity investments, business combinations, and international operations. Accounting for not-for-profit organizations. The preparation of consolidated financial statements, including the use of electronic spreadsheets.

ACCT 5100/7100. Managerial Accounting I. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
The design of accounting systems to serve the internal needs of management with an emphasis on underlying theory. Product costing, including activity-based costing; budgeting and other planning applications, information for decision making, planning and control application for decentralized organizations.

ACCT 5200/7200. Audit/Systems I. 3 hours.
Prerequisite: ACCT 5020 and ACCT 5100/7100.
Assurance services with focus on the audit of financial statements. The basic financial statement audit process is discussed including the concepts of evidence, materiality, and risk. The role of professional ethics and legal liability in the auditing profession.

ACCT 5310/7310. Audit/Systems II. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
Accounting information systems (AIS), including the role of such systems in an organization, electronic data processing, AIS applications, AIS analysis and design, AIS controls, and the audit of AIS.

ACCT 5400/7400. Taxation I. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
A basic federal income tax course covering concepts of taxation applicable to all taxable entities but primarily relating to individuals. Introduces research ap-

proaches to tax problems as well as methods of analysis most appropriate to taxation issues. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ACCT 5410/7410. Taxation II. 3 hours.
Prerequisite: ACCT 5400/7400.
The federal taxation of business entities and owners, primarily focusing on corporations and shareholders. The tax provisions governing business entities, as well as the impact of those provisions on business decisions and choice of entity form.

ACCT 5420/7420. Partnership Taxation. 3 hours.
Prerequisite: ACCT 5730/7730 and permission of department.
The fundamental tax and legal concepts involved in the income taxation of partnerships and partners.

ACCT 5430/7430. Estate and Gift Taxations. 3 hours.
Prerequisite: ACCT 5730/7730 and permission of department.
The structure and fundamental concepts involved in estate and gift taxation and the income taxation of estates and trusts. Personal financial planning concepts are also introduced.

ACCT 5440/7440. Corporate Tax I. 3 hours.
Not open to students with credit in ACCT 5410/7410.
Prerequisite: ACCT 5400/7400.
The federal taxation of business entities and owners, primarily focusing on corporations and shareholders, for students planning to pursue a concentration in taxation.

ACCT 5730/7730. Tax Policy and Research. 3 hours.
Prerequisite: ACCT 5400/7400 and permission of department.
Development of tax research tools and the development of an understanding of tax policy issues as they arise in social policy and professional accounting settings.

ACCT 5740/7740. Accounting Policy and Research. 3 hours.
Prerequisite: ACCT 5200/7200 and permission of department.
Development of accounting research tools and an understanding of accounting policy issues as they arise in social policy and professional accounting settings.

ACCT 5800/7800. Internship/Cooperative Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Applied professional experience or experience with the profession in another culture. Non-Traditional Format: Relevant professional work experience that augments topics covered in regular classes.

ACCT 7990. Financial Accounting. 3 hours.
Concepts of accounting, the basic structure of financial statements, the interpretation of corporate annual reports and limitations of such reports.

ACCT 8000. Financial and Managerial Accounting. 3 hours.
Not open to students with credit in ACCT 7990.
Prerequisite: Permission of department.
Concepts of accounting, the basic structure of financial statements, the interpretation of corporate annual reports and basic concepts related to the internal use of accounting information. Non-Traditional Format: Half of the class will be on campus in a classroom setting. The remainder will be distance learning projects over the world-wide web.

ACCT 8050. Financial Statement Analysis. 3 hours.
Prerequisite: ACCT 5010 or ACCT 8150.
Basic techniques, research methods, strengths, and limitations of financial statement analysis. Computer analysis of financial data to predict earnings and other financial ratios. Use of these techniques to value equity securities and to predict takeover targets, future debt ratings, and bankruptcies.

ACCT 8100. Managerial Accounting II. 3 hours.
Prerequisite: ACCT 5100/7100.
Advanced cost and managerial accounting topics. Application of cost and managerial accounting techniques to "real world" problems.

ACCT 8140. Internal Uses of Accounting Information. 2 hours.
Prerequisite: ACCT 7990.
Basic concepts and techniques applicable to the internal uses of accounting information. Emphasis is placed on planning and control applications, but some attention is given to product costing issues.

ACCT 8150. Survey of Accounting. 1.5 hours.
Prerequisite: Permission of department.
Financial and managerial accounting for students with prior accounting course work or experience. Basic accounting concepts, techniques pertinent to understanding corporate financial statements and techniques applicable to the use of accounting information for planning and controlling business operations.

ACCT 8200. Audit/Systems III. 3 hours.
Prerequisite: ACCT 5200/7200 and ACCT 5310/7310.
Advanced auditing topics with emphasis placed on the practical aspects of auditing financial statement transaction cycles and account balances. Students will complete a practice case, including the drafting of the audit report.

ACCT 8300. Systems. 3 hours.
Prerequisite: ACCT 5310/7310.
Design, installation, and applications of particular accounting information systems.

ACCT 8440. Corporate Tax II. 3 hours.
Prerequisite: ACCT 5440/7440 or permission of department.
Tax and legal concepts involved in the taxation of corporations and in the taxation of entities changing to or from a corporate form of organization.

ACCT 8490. Tax Implications of Business Decisions. 3 hours.
Prerequisite: ACCT 8140 or ACCT 8150.
The major provisions of the federal income tax law that impact management decisions in all types of business entities.

ACCT 8700. Special Topics in Accounting. 3 hours.
Prerequisite: Permission of department.
Advanced topics of current interest in auditing, financial accounting, managerial accounting, systems, or taxation.

ACCT 8990. Directed Study in Accounting. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed study or research in the area of accounting. Non-Traditional Format: Directed readings or study under the direction of a faculty member done independently of regularly scheduled classes.

ACCT 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ACCT 9010. Accounting Workshop. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Critical examination and development of research projects of departmental faculty, doctoral students, and visiting scholars. Non-Traditional Format: Attendance at, and participation in, accounting workshops where research results are presented and discussed.

ACCT 9030. Documentation and Presentation of Accounting Research Results. 1 hour.
Prerequisite: Permission of department.
Publication issues related to accounting research.

ACCT 9100. Behavioral Accounting Research. 3 hours.
Prerequisite: Permission of department.
Judgement and decision-making research in accounting and auditing, including the roles of experience, cognitive processes, group processes, and decision aids.

ACCT 9110. Positive Accounting Research. 3 hours.
Prerequisite: Permission of department.
The use of accounting information in contracts, the associated incentives for earnings management, and other related topics.

ACCT 9120. Capital Markets Research in Accounting. 3 hours.
Prerequisite: Permission of department.
The information content of accounting information as reflected in changes in security prices and trading volume in financial markets, and other related topics.

ACCT 9130. Special Topics in Accounting Research. 3 hours.
Prerequisite: Permission of department.
Contemporary topics in accounting research.

ACCT 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Banking and Finance

James A. Verbrugge, *Head*
Joseph F. Sinkey, *Graduate Coordinator, 542-3649*
(Brooks Hall)

FINA 4280/6280. Small Business Finance. 3 hours.
Prerequisite: FINA 3000.
Principles of small business finance and the raising and management of venture capital, financial planning, forecasting, capital budgeting, working capital management, and sources of capital. This course is aimed at students planning careers in either small business management or in small business consulting.

FINA 4810/6810. International Finance. 3 hours.
Prerequisite: FINA 3000.
International business decision making emphasizing the effects of internationalized financial and non-financial markets. Exchange rate analysis, hedged costs of funds, economic exposure and management, capital budgeting, financial and corporate strategy, and the evaluation of international risks and returns.

(FINA)AAEC 4870/6870. Futures and Option Markets. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Development, functions, and importance of futures and option markets. Futures and option contracts; issues such as speculation, the roles of commission houses, commodity exchanges, and clearinghouses; and the use of future contracts as instruments for financing business activities. Technical and fundamental trading theories.

FINA 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

FINA 8000. Financial Management. 3 hours.
Not open to students with credit in FINA 8010.
Intensive analysis of financial decision-making in the firm, emphasizing both investment and financing deci-

sions. Analytical tools of finance are introduced. Valuation concepts, risk-return analysis, project valuation, capital structure, and corporate financing.

FINA 8010. Financial Management. 1.5 hours.
Not open to students with credit in FINA 8000.
Financial decision-making in the firm, emphasizing both investment and financing decisions. Analytical tools of finance are introduced. Valuation concepts, risk-return analysis, project valuation, capital structure, and corporate financing.

FINA 8100. Corporate Financial Management. 3 hours.
Tools and concepts in corporate finance. Students are required to analyze situations, make value maximizing decisions, and communicate the basis of those decisions. Financial analysis and planning, capital budgeting, evaluation of financing alternatives, company valuation, dividend policy, mergers, and capital structure decisions.

FINA 8110. Theory of Corporate Finance. 1.5 hours.
Important theoretical contributions in corporate finance and the empirical tests of those theories. A framework is developed for understanding a broad range of important corporate financial decisions. Substantial emphasis is placed on the determinants of corporate financing and payout policies.

FINA 8140. Mergers, Restructuring, and Corporate Control. 1.5 hours.
The dynamics of control within corporations and the role of the market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Mergers and acquisitions, asset sales, restructuring, leverage buyouts, and bankruptcy.

FINA 8160. Venture Capital Financing. 1.5 hours.
Venture capital in financing entrepreneurial growth companies. How venture capital is raised, invested, and then harvested for reinvestment. How professional venture capitalists analyze and structure potential investments. How and when portfolio companies should execute initial public offerings.

FINA 8300. Investments. 3 hours.
Financial assets and markets including the efficient markets hypothesis. The role of risk in asset pricing, the implications of asset pricing models, the capital asset pricing model, the arbitrage pricing model, and theories of valuation for both stocks and fixed income securities.

FINA 8310. Advanced Speculative Markets. 1.5 hours.
The economics of financial futures and options markets. Advanced theory of hedging with speculative financial instruments.

FINA 8340. Portfolio Management. 1.5 hours.
Prerequisite: FINA 8300.
The active management of portfolios consisting of domestic and international securities. The estimation of portfolio inputs, the construction of desirable portfolios, and the evaluation of portfolio performance. Selected cases are analyzed by the students.

FINA 8360. Financial Engineering. 1.5 hours.
Prerequisite: FINA 8300 and FINA 8310.
The use of derivative securities to achieve financial goals. Specific cases involve the use of derivatives and other financial innovations to reduce risk, lower the cost of financing, improve portfolio yields, or help the corporate firm achieve strategic goals. Students analyze, present, and critique cases.

FINA 8430. Financial Markets. 1.5 hours.
The evolving roles of financial intermediaries, regulation, and capital markets in the financing of American businesses and the provision of savings and payments mechanisms for individuals. The securitization of traditional loan products and the determinants of the term structure of interest rates.

FINA 8450. Management of Financial Institutions. 1.5 hours.
Measurement and management of risk in financial services firms. Management of risks associated with interest rates, credit, liquidity, and exchange rates. Attention is devoted to commercial banks, pension funds, investment banks, and other firms. A financial institution decision game is typically included in the course.

FINA 8810. International Financial Management. 3 hours.
International business decision making with an emphasis on the relationship between decisions and markets. The determinants of exchange rates, hedged costs of funds, transaction and economic exposure management, capital budgeting, corporate strategy, and swaps. The course makes extensive use of cases.

FINA 8990. Directed Study in Finance. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
The most recent professional contributions in the various special fields of finance. Student and instructor interests determine which particular field is brought under scrutiny. Non-Traditional Format: Directed study not involving formal lecture or lab.

FINA 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FINA 9100. Mathematical Finance. 3 hours.
Prerequisite or corequisite: ECON 8910 or permission of department.
Selected tools from continuous time finance and fundamental concepts in the analysis of stochastic processes. These tools are applied to the pricing of derivative securities — especially forward, futures, and option contracts. Binomial and finite difference ap-

proximations to continuous time processes are also used to price derivatives.

FINA 9110. Valuation and Capital Market Theory. 3 hours.
Prerequisite: FINA 9100 and ECON 8010 and ECON 8070.
Prerequisite or corequisite: ECON 8080.
Theory emphasizing valuation and capital markets. A mathematical development of the major asset pricing theories: the capital asset pricing model (CAPM), arbitrage pricing theory, the pricing of contingent claims, and the intertemporal CAPM. Related topics include expected utility maximization, mean-variance analysis, and efficient markets.

FINA 9120. Empirical Research in Corporate Finance. 3 hours.
Prerequisite: FINA 9100 and ECON 8000 and ECON 8010 and ECON 8070.
Prerequisite or corequisite: FINA 9110.
Empirical research in corporate finance. The modern theories of capital structure, dividend policy, corporate control, investment banking, and capital budgeting, emerging areas of research such as market microstructure, venture capital financing, and comparative international corporate finance.

FINA 9130. Financial Research Methodology. 3 hours.
Prerequisite: FINA 9120 and ECON 8080.
The data bases and empirical methodologies used in performing financial research. Event study and regression methodologies in corporate finance research and investment-oriented methodologies such as factor and principal components analyses. Students gain experience in presentation of research and in refereeing papers.

FINA 9200. Corporate Finance Theory. 3 hours.
Prerequisite: Permission of department.
Theoretical constructs underlying corporate finance, illustrated with both theoretical seminal and current research. Theoretical topics will include optimization, non-cooperative game theory, information economics, and agency theory. Signaling, screening, incentive design, product market structure, research and development, security issuance, bankruptcy, and market microstructure.

FINA 9210. Empirical Research in Investments. 3 hours.
Prerequisite: Permission of department.
The markets, trading systems, and properties of financial securities. Includes an investigation of market efficiency and the time series properties of securities. Empirical studies of asset pricing models, portfolio performance, term structure models, and capital market integration.

FINA 9230. Research Topics in Finance. 3 hours.
Prerequisite: Permission of department.
Advanced topics in finance. The content is flexible with the material based on recent advances in finance. Possible course topics include "Financial Markets and Institutions" and "Game Theory with Applications to Finance and Economics."

FINA 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Economics

Charles DeLorme, *Interim Head*
William D. Lastrapes, *Graduate Coordinator, 542-3569*
(Brooks Hall)

ECON 4350/6350. Industrial Economics. 3 hours.
Prerequisite: ECON 4010.
Firms' performances and conduct toward rival firms, suppliers, and customers under different market structures, including perfect competition and monopoly. The rationale and consequences of antitrust regulation and other public policies.

ECON 4400/6400. Economics of Public and Regulated Enterprises. 3 hours.
Prerequisite: ECON 4010.
The economic analysis of regulated and nationalized industries and organizations, with emphasis on the regulation of electric, natural gas, and telecommunications enterprises. Methods and implications of privatization of traditionally "public" enterprises are also considered.

ECON 4450/6450. Economic Analysis of Law. 3 hours.
Prerequisite: ECON 4010.
An efficiency-based perspective on major areas of the law, including contract, tort, and nuisance law, which points to the reduction of transactions costs as unifying legal principle.

ECON 4650/6650. Economics of Organizations and Management. 3 hours.
Prerequisite: ECON 4010.
Decision making within firms and public organizations, using standard microeconomic tools. Transaction costs and the size of the firm, the compensation and motivation of workers, mergers and corporate control, team production, and the theory of bureaucracy.

ECON 7000. Master's Research. 1-6 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional

Format: Independent research under the direction of a faculty member.

ECON 7300. Master's Thesis. 3-6 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ECON 8000. Mathematical Analysis for Economists. 3 hours.
Mathematical methods and economic applications of selected topics in optimization theory, including comparative statistics analysis, duality and envelope results, inequality constraints and Kuhn-Tucker theory.

ECON 8010. Microeconomic Theory I. 3 hours.
The theory of consumer behavior, the analysis of production and cost, and the determination of output level and input mix of the profit-maximizing firm under perfect competition and monopoly.

ECON 8020. Microeconomic Theory II. 3 hours.
Prerequisite: ECON 8000 and ECON 8010.
Welfare economics, including the concepts of Pareto efficiency and consumer surplus and the analysis and measurement of welfare costs of public goods, externalities, and other "market failures."

ECON 8030. Microeconomic Theory III. 3 hours.
Prerequisite: ECON 8020.
The general equilibrium framework of microeconomics is developed and then extended to allow for the passage of time and the presence of uncertainty. Game-theoretic considerations are also considered.

ECON 8040. Macroeconomic Theory I. 3 hours.
Prerequisite: ECON 8000 and ECON 8010.
Theories of national income, unemployment, inflation, and interest and exchange rates. The implementation, and domestic and global repercussions, of alternative monetary and fiscal policies.

ECON 8050. Macroeconomic Theory II. 3 hours.
Prerequisite: ECON 8040.
Dynamic, stochastic models of macroeconomic behavior, including neoclassical and endogenous models of economic growth and New Classical and New Keynesian models of the business cycle.

ECON 8060. Macroeconomic Theory III. 3 hours.
Prerequisite: ECON 8050.
Macroeconomics, with emphasis on theory or applied time-series methods. Endogenous growth theory, real and New Keynesian business cycle theories, vector autoregression, long-memory processes, and multiple-equilibrium and heteroskedasticity models.

ECON 8070. Statistics for Econometrics. 3 hours.
The statistical foundations of econometrics, including probability, random variables, sampling, expectation, distribution functions, parametric and conditional distributions, independence, functions of random variables, and maximum likelihood.

ECON 8080. Introduction to Econometrics. 3 hours.
Prerequisite: ECON 8070.
Linear regression models, with special attention to estimator properties and hypothesis testing under various statistical assumptions. Least-squares, maximum likelihood, and method-of-moments estimation procedures and seemingly unrelated regressions and simultaneous equation models.

ECON 8110. Econometrics I. 3 hours.
Prerequisite: ECON 8080.
Advanced econometric techniques, including full-information estimation of simultaneous equation models, generalized methods of moments estimation and specification testing, dynamic regression models, vector autoregressions, cointegration, and estimation and inference using panel data.

ECON 8120. Econometrics II. 3 hours.
Prerequisite: ECON 8110.
The theoretical properties of maximum likelihood estimators and their use in overcoming shortcomings of the classical linear model. Computer algorithms are developed and used to compute maximum-likelihood estimators for logit, probit, tobit, sample-selectivity, and failure time models.

ECON 8210. Industrial Economics I. 3 hours.
Prerequisite: ECON 8010.
The structure, conduct, and performance of suppliers and customers in product and geographic markets. Topics treated include recent industry studies, consequences of technological change, the role of property rights and transactions costs, and federal and state public utility and antitrust regulations.

ECON 8220. Industrial Economics II. 3 hours.
Prerequisite: ECON 8030.
Industrial economics, with emphasis on game-theoretic models of strategic behavior, contracting and agency theory, transaction costs, property rights, and the boundaries of the firm. Recent theoretical contributions are also covered, with empirical applications and illustrations.

ECON 8310. Public Economics I. 3 hours.
Prerequisite: ECON 8010.
Market failures involving public goods and externalities, and of methods for measuring and reducing their efficiency costs, together with analysis of taxation and income- redistribution policies and discussion of collective choice theories, including social choice and public choice paradigms.

ECON 8320. Public Economics II. 3 hours.
Prerequisite: ECON 8010.
The effects of taxes on economic decision making by individuals and businesses, with discussions of alternative tax systems, tax evasion and avoidance, social insurance programs, and issues in fiscal federalism.

ECON 8410. Labor Economics I. 3 hours.
Prerequisite: ECON 8010.
The neoclassical economic theory of the market and nonmarket allocation of individuals' time. Labor de-

mand and supply, human capital investment, unions, discrimination, public sector labor markets, the distribution of earnings and income, and unemployment.

ECON 8420. Labor Economics II. 3 hours.
Prerequisite: ECON 8010.
Labor economics, with special emphasis on current theoretical and empirical issues. The demand for and supply of labor, compensating wage differentials, the structure of compensation, worker displacement, unemployment, and the distribution of labor-market income.

ECON 8510. International Economics I. 3 hours.
Prerequisite: ECON 8010.
A general equilibrium treatment of commodity and intra-industry trade, international capital mobility, and immigration, with treatments of alternative government policies including free trade, import tariffs and subsidies, export taxes and subsidies, quotas, and voluntary export restraints.

ECON 8520. International Economics II. 3 hours.
Prerequisite: ECON 8010.
Commodity-market imperfections and trade policy, including discussion of the implications of increasing returns to scale technology, commodity-trade restrictions, and the location of economic activities for international trade policy.

ECON 8610. Monetary Economics I. 3 hours.
Prerequisite: ECON 8040.
Monetary and banking theory, emphasizing the microfoundations of monetary exchange and bank intermediation, the determinants of money supply and demand, and the macroeconomic consequences of monetary shocks and bank failures.

ECON 8620. Monetary Economics II. 3 hours.
Prerequisite: ECON 8040.
The evolution and workings of commodity and flat-monetary regimes, with discussions of alternative regimes, discretionary central bank behavior, and externality, natural monopoly, and time-consistency issues in money and banking.

ECON 8710. Economic History. 3 hours.
Prerequisite: ECON 8040.
United States history through cliometrics, which applies economic theory and econometrics to historical data. The course draws on recent cliometric research as well as on more traditional studies of economic history.

ECON 8720. Topics in Economic History. 3 hours.
Prerequisite: ECON 8010.
Current research topics in historical economics, aimed at a deeper understanding of these topics and of modern cliometric techniques for examining them as demonstrated in recent scholarly writings. Topics will reflect student interests and current research trends.

ECON 8810. Economic Growth and Development. 3 hours.
Prerequisite: ECON 8040.
Exogenous and endogenous growth theories for market economies, addressing regional growth-rate differences, and of determinants of economic development including economic structures, environmental policies, and diet.

ECON 8820. The Analysis of Productivity. 3 hours.
Prerequisite: ECON 8010.
Analytical techniques for assessing the sources of and measuring changes in productivity, with microeconomic and macroeconomic empirical applications.

ECON 8850. Special Topics in Economics. 3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: ECON 8010.
Intensive study relating to a central theme of special interest in the field of Economics.

ECON 8900. Survey of Business Economics. 1.5 hours.
Prerequisite: Permission of department.
Theories of consumer and producer behavior and models of market structure, with discussions of the nature of the firm and various aspects of government and business relations. For one-year MBA students.

ECON 8910. Business Microeconomics. 3 hours.
Prerequisite: Permission of department.
Develops the fundamental microeconomic concepts of scarcity, opportunity cost, and marginal utility along with standard models of the firm. These concepts and models are then used to shed light on the structure and performance of actual firms, with emphasis on problems faced by real-world managers.

ECON 8920. Business Macroeconomics. 2 hours.
Prerequisite: Permission of department.
The historical behavior and determinants of aggregate economic statistics including gross domestic product, the unemployment rate, the inflation rate, interest rates and exchange rates. Models are developed to explain cyclical and long-term variations in these statistics; and fiscal and monetary policies for improving their performance.

ECON 8930. MBA Tutorial. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Reading and independent research on a specified topic beyond normal MBA course offerings and supervised by a faculty member. Non-Traditional Format: Directed study. Students must apply to the department head at least five weeks in advance.

ECON 8980. Economics Seminar. 1-3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Lectures on and discussion of some selected topic in applied or theoretical economics, with an emphasis on recent published and unpublished research.

ECON 8990. Directed Study. 3 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Students investigate a research problem in their special field of study under the personal direction of their major professor. Non-Traditional Format: Directed study.

ECON 9000. Doctoral Research. 1-6 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format; Independent research under the direction of a faculty member.

ECON 9300. Doctoral Dissertation. 1-6 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Risk Management and Insurance

RMIN 5530/7530. Advanced Property Insurance. 3 hours.
Prerequisite: RMIN 5100 or permission of department.
Property risks facing businesses and the effective management of these risks with insurance. Practical application of property insurance to pure risk exposures, including direct and indirect property, inland marine, crime, boiler and machinery, and catastrophic property risks.

RMIN 5540/7540. Advanced Liability Insurance. 3 hours.
Prerequisite: RMIN 5100 or permission of department.
Liability risks facing businesses and the effective management of these risks with insurance. Practical application of liability insurance to pure risk exposures, including motor vehicle liability, professional and general liability, environmental liability, employment practices and workers' compensation, and fiduciary liability.

RMIN 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

RMIN 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

RMIN 8100. Fundamentals of Risk Management. 1.5 hours.
Fundamentals of Risk Management and Insurance, with emphasis on risk financing through the use of insurance, retention, and non-insurance transfer agreements.

RMIN 8110. Employee Benefits. 1.5 hours.
The design, management, and financing of employee benefit plans. Topics include group life, group health, group disability, and retirement plans. Implications for employers and employees. Public and private approaches to provision of benefits. Regulatory and tax issues. Current topics in the field of employee benefits.

RMIN 8120. Corporate Risk Management. 3 hours.
Prerequisite: RMIN 8100.
The operational and financial risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets. Extensive use of cases.

RMIN 8990. Directed Study in Risk Management. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed study or research in risk management and insurance. Non-Traditional Format: Directed study.

RMIN 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

RMIN 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

RMIN 9450. Property and Liability Insurance Seminar. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics in property and liability insurance. Special emphasis on academic research. Topics in-

lude loss reserves, adverse selection, insurer sol-ency, underwriting cycles, capital budgeting and roperty and liability insurance, property and liability ate regulation, and liability insurance issues.

RMIN 9550. Life and Health Insurance Seminar. hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics in life and health insurance. Special mphasis on academic research. Topics include pen-ions, group health, moral hazard, demand for life in-urance, industry structure and productivity, life nsurance products and costs, disability insurance, and ife insurer asset/liability management.

RMIN 9650. Risk Theory Seminar. 3 hours.
Prerequisite: Permission of department.
Risk theory and its applications including basic con-cepts of actuarial mathematics. Importance of utility theory and ruin theory to modeling of the insurance process is investigated. Application of probability and statistical techniques to the analysis of pure losses and loss distributions.

Legal Studies

LEGL 4300/6300. Law of Business Organizations. 3 hours.
Prerequisite: LEGL 2700.
A managerial, entrepreneurial focus on the law applicable to forming partnerships, corporations and other business entities, raising capital and structuring relationships with agents, employees, partners, officers, and directors.

LEGL 4400/6400. Business Law. 3 hours.
Prerequisite: LEGL 2700.
Debtor-creditor relations, commercial paper, contracts, securities, agency, partnership, joint ventures, corporations, professional and legal responsibility, sales, secured transactions, bankruptcy.

LEGL 4500/6500. Employment Law. 3 hours.
Laws prohibiting employment discrimination based on race, gender (including sexual harassment), religion, national origin, age, and disability, with an emphasis on avoiding unnecessary liability.

LEGL 8000. Legal and Regulatory Environment of Business. 2-3 hours.
The interrelationship of business and the ordering of society through law. Emphasizes why legal duties come to be placed on business and how managers appropriately respond to these duties.

LEGL 8050. Negotiation. 1.5 hours.
Concepts and tools of integrative, interest-based negotiation.

LEGL 8100. Law for Managers. 1.5 hours.
Prerequisite: LEGL 8000.
Antitrust, employment discrimination, products liability, environmental laws, securities fraud, and other current legal issues facing business managers.

LEGL 8200. Negotiation and Conflict Resolution. 1.5 hours.
Prerequisite: LEGL 8050.
Complex negotiation simulations and interest-based conflict management systems, with emphasis on methods of recognizing and resolving underlying conflicts and resulting disputes.

LEGL 8300. Legal Aspects of Financial Institutions. 1.5 hours.
Prerequisite: LEGL 8000.
Legal issues facing regulated financial institutions, such as banks and credit unions.

LEGL 8400. International Legal Transactions for Business. 1.5 hours.
Prerequisite: LEGL 8000.
Laws, agreements, and institutions that affect international business transactions with particular emphasis on licensing, exporting, contract formation, dispute resolution, intellectual property rights, and cultural, political, and ethical problems. Non-Traditional Format: Course meets on half-semester.

LEGL 8990. Directed Study in Legal Studies. 1-15 hours. Repeatable for maximum 15 hours credit.
Research in Legal Studies. Non-Traditional Format: Course involves independent work outside the traditional classroom format.

Real Estate

REAL 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

REAL 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

REAL 8070. Real Estate Development. 1.5 hours.
Development process with particular emphasis on analyzing the feasibility of design, location, and construction.

REAL 8800. Real Estate Analysis. 1.5 hours.
The basic principles of real estate law, markets, valuation, and finance. Designed for any graduate student with an interest in real estate decision making as well as a basis for more advanced courses.

REAL 8810. Real Estate Practice and Participants. 1.5 hours.
Prerequisite: REAL 8800.
Corequisite: REAL 9810.
Intended for real estate decision makers and managers in general. A series of seminars focusing on specific

trends and challenges of contemporary real estate markets. The course is uniquely designed to expose students to the best practices in the industry as well as the managers implementing those practices.

REAL 8990. Directed Studies in Real Estate. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed study or research in real estate. Non-Traditional Format: Independent research outside the traditional classroom format.

REAL 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

REAL 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

REAL 9810. Real Estate Investments. 1.5 hours.
Prerequisite: REAL 8800.
An intensive case-oriented course in the real estate decision making process. Special emphasis is placed on value maximization in investment analysis. Carefully selected topics address the process as well as the risk and rewards of real estate investment from a local market to an international perspective.

REAL 9830. Real Estate Finance. 1.5 hours.
Application of theoretical aspects of financial economics to explain real estate financial institutions and markets. Financial and economic methods are applied to residential and commercial real estate. Special topics include real estate in a portfolio, agency problems, and the influence of the legal environment. Non-Traditional Format: Course meets one-half semester.

REAL 9850. Real Estate Markets. 1.5 hours.
Concentration on real estate markets with specific emphasis on understanding the market forces affecting real estate at the urban and regional levels. The main focus will be on providing insight into the operation of urban land and non-residential markets and the process of urban growth and regional development. Non-Traditional Format: Course meets one-half semester.

REAL 9860. Real Estate Valuation. 1.5 hours.
Principles and techniques of appraising real estate with special emphasis on income producing real estate. The course provides an in-depth look at conventional valuation techniques in addition to modern valuation methods based on statistical inference. Special consideration is given to lease analysis and problems in applying the valuation techniques.

REAL 9870. Special Topics in Real Estate. 1.5 hours.
Advanced topics in real estate. Special emphasis on current issues in the real estate industry and the conceptual and analytical tools available for their analysis. The course is designed to provide practical experience through case analysis, site selection projects, and other forms of market analysis and research.

REAL 9910. Seminar in Real Estate Analysis and Finance. 1-6 hours. Repeatable for maximum 12 hours credit.
Selected topics in real estate analysis and finance. Topics include interest rate theory and mortgage financing, mortgage choice, secondary mortgage market, option theory, derivative assets, efficient market theory, default risk, mortgage insurance, agency problems, and risk management. Discussion of current research, proposal writing, and research methods.

REAL 9920. Seminar in Real Estate Markets and Investments. 1-6 hours. Repeatable for maximum 12 hours credit.
Selected topics in real estate market analysis, urban economics, and investments. Topics include real estate asset pricing, diversification, housing demand, information economics, agency theory, urban spatial structure, financial institutions, and urban public policy. Discussion of current research, proposal writing, and research methods. Non- Traditional Format: Ph.D. seminar context will vary based on student needs.

Management Sciences and Information Technology

MSIT 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MSIT 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MSIT 8000. Business Statistics. 1.5 hours.
Prerequisite: Permission of department.
Descriptive statistical measures, basic probability notions, estimation and hypothesis testing for the mean, proportion and variance in a population, linear regression models. Emphasis is on applications in a business environment. Computer is used throughout the course.

MSIT 8100. Applied Business Statistics. 2-3 hours.
Fundamental statistical tools and their use in business and economics. Goal of course is to ensure that students can select appropriate statistical tools and apply them correctly. Topics include sampling distributions,

estimation, hypothesis testing, inferences on two populations, and simple and multiple regression.

MSIT 8130. Quantitative Analysis I. 3 hours.
Prerequisite: MSIT 8100.
The tools of quantitative analysis most frequently used in business, industry, and government. Spreadsheet modeling and applications in multiple regression, time series, forecasting, linear programming, network flows, and integer programming.

MSIT 8140. Quantitative Analysis II. 3 hours.
Prerequisite: MSIT 8130.
A continuation of Spreadsheet Modeling and Decision Analysis I. Spreadsheet modeling and applications in service systems subject to randomness, reliability, risk analysis, simulation analysis, discriminant analysis, neural networks and artificial intelligence, multi-criteria decision analysis, and quality.

MSIT 8150. Applied Mathematical Programming. 3 hours.
Prerequisite: MSIT 8130 or permission of department.
Models, theory and algorithms of linear, integer, and nonlinear programming. Use of the Solver capability in Excel along with instruction in Visual Basic to create add-in capabilities. Applications from within the functional areas of business permeate the course.

MSIT 8160. Multiple Criteria Decison Making. 3 hours.
Prerequisite: MSIT 8150 or permission of department.
Analytic hierarchy process (United States school) vis-a-vis methods from the European school of discrete alternative multi-criteria decision analysis, multiple objective programming, interactive procedures, computation, and enchancements derived from the application of neural networks and genetic algorithms.

MSIT 8210. Simulation. 3 hours.
Prerequisite: MSIT 8100 or permission of department.
Simulation as a tool for model analysis. Topics include random number and random variate generation, techniques for modeling complex systems, simulation program design, validation, implementation, applications in business. Assignments will involve computer exercises.

MSIT 8220. Applied Stochastic Models. 3 hours.
Prerequisite: STAT 4710/6710 or permission of department.
Stochastic models in management science, Markov chains, birth and death processes, applications to queuing and inventory models, reliability and maintenance models.

MSIT 8250. Network Flow Optimization Models in Business. 3 hours.
Prerequisite: MSIT 8150 or permission of department.
Models, theory, and algorithms for solving network flow optimization problems are presented. Data structural design and computer implementation issues are discussed along with the widespread usage of network models in business and industry.

MSIT 8470. Artificial Intelligence and Expert Systems in Management Science. 3 hours.
Prerequisite: MSIT 8140.
Artificial intelligence and expert systems applied to problems in management science. Artificial intelligence, focusing on the design, testing, validation, and use of expert systems in management science applications. Knowledge-acquisition is also discussed. Computer-based projects are employed to reinforce concepts.

MSIT 8990. Directed Study in Management Science. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Students conduct field study projects or individually investigate newly-breaking areas in the management sciences under faculty direction. Non-Traditional Format: Directed study.

MSIT 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MSIT 9150. Special Topics in Management Science. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Various topics in neural networks, genetic algorithms, fuzzy sets and fuzzy logic, tabu search, data envelopment analysis, chaos theory, and simulated annealing. Non- Traditional Format: Course will vary with needs of students.

MSIT 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Management

Archie B. Carroll, *Head*
Richard T. Watson, *Graduate Coordinator,*
542-3706
(Brooks Hall)

MGMT 6080. Management Information Systems Overview. 1.5 hours.
The use of information systems technology by managers and professionals to improve organizational performance, group work, and personal productivity. Decision support software and database query systems are used to support a case-based approach to learning. For students in the one-year MBA program. Non-Traditional Format: For four weeks (offered only in summer).

MGMT 6090. Management Information Systems. 1-2 hours.
Use of information systems technology by managers and professionals to improve organizational performance, group work, and personal productivity. Decision support software and database query systems are used to support a case-based approach to learning. For students in the two-year MBA program.

MGMT 7000. Master's Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MGMT 7010. Developing Leadership Skills. 3 hours.
Leadership skills necessary for managerial work. Class activities are varied, including experiential exercises, discussions, case analyses, and collaborative learning. Activities focus on leadership skills, such as self-awareness, stress management, decision-making, feedback, listening, power and influence, motivation, empowerment, building effective teams, and self-leadership.

MGMT 7210. Materials Management. 3 hours.
Prerequisite: Permission of department.
Management of dependent and independent demand inventory items within a manufacturing environment and the examination of the management of finished good items within a distribution environment. Emphasis is placed on a systems perspective.

MGMT 7220. Project Management. 3 hours.
Prerequisite: Permission of department.
Planning, scheduling, organizing, implementing, and controlling of single and multiple projects. This course explores traditional and new techniques for the dynamic environment of project management.

MGMT 7230. Purchasing Management. 3 hours.
Prerequisite: Permission of department.
Purchasing and related functions (traffic, receiving, and surplus material). The relationships among price, quality, and delivery service. Japanese purchasing philosophy is contrasted to the United States philosophy in conjunction with techniques of negotiation, sourcing, value analysis, and engineering.

MGMT 7280. Simulation in Operations Management. 3 hours.
Prerequisite: Permission of department.
Network-based, discrete-event simulation in analyzing operations-based, business-related problems. Emphasis is on problem formulation, solution development, and analysis of output.

MGMT 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MGMT 7400. Strategic Management and Communication. 3 hours.
Prerequisite: Permission of department.
Applied strategic management theory combined with the development of communication skills for their effective application. Strategies for the development and maintenance of resources likely to yield competitive advantage, and the communication skills needed to present and elucidate those strategies to other constituents within and outside the organization.

MGMT 7410. Strategic Management in a Changing Environment. 3 hours.
Prerequisite: Permission of department.
Elements of strategy with principles of large-scale organizational change. Practical issues related to mental frameworks and human behavior, environmental and competitor analysis, competitive advantage for single- and multi-business firms, stakeholder analysis, and change implementation. Non-Traditional Format: Fifty percent of the class time will be face to face, meeting 14 days on campus. The remainder will be completed via distance learning projects on the World Wide Web.

MGMT 7420. Business, Society, and Stakeholder Management. 3 hours.
Prerequisite: Permission of department.
The business and society relationship, including an analysis of corporate social performance. A strategic management and public policy perspective is employed in examining the relationship between business and key stakeholders, including governments, consumers, employees, community, and the natural environment.

MGMT 7440. Business and Corporate Strategy. 3 hours.
Prerequisite: Permission of department.
Issues, concepts, and tools for formulating business and corporate strategies that will enable organizations to achieve their goals and objectives effectively and efficiently. Key concepts include industry evaluation, resource-based strategy, sustainable competitive advantage, experience curve analysis, sensitivity analysis, and key success factor analysis.

MGMT 7460. Managing Change and Innovation. 1.5 hours.
Prerequisite: Permission of department.
Managing constant change inherent in modern business, whether driven by technological, environmental, or human innovations. Includes conceptual and theoretical perspectives, as well as practical applications of modern frameworks for managing change.

MGMT 7500. Entrepreneurship and New Venture Formation. 3 hours.
Prerequisite: Permission of department.
Contributions that new ventures and small businesses make to the economy and society as a whole; the characteristics of successful entrepreneurs; the process of starting up new businesses; and the primary determinants of new venture and small business performance.

MGMT 7510. Developing Successful Business Plans. 3 hours. 1 lab period of 3 hours each per week. Prerequisite: Permission of department.
Key tasks involved in creating successful business plans and different ways in which each task may be accomplished. The primary course activity involves the preparation of a business plan for a "prospective" new venture.

MGMT 7530. Small Business Management. 3 hours. Prerequisite: Permission of department.
Examines the special challenges facing small businesses in today's society. Integrates from a general management perspective the functional knowledge gained in the areas of finance, economics, human resource management, marketing, and operations in order to help prepare the student to manage such businesses.

MGMT 7560. International Strategic Management. 3 hours.
Prerequisite: Permission of department.
The formulation and implementation of integrated corporate strategy by multinational business organizations. The planning, direction, and control of the many flows linking the multinational company to its affiliates while operating within a plurality of political, economic, and sociocultural systems.

MGMT 7580. Management of Nonprofit Organizations. 3 hours.
Prerequisite: MGMT 3000 or permission of department.
Management of nonprofit organizations, from the entrepreneurship of start-up ventures to the evolving missions of established nonprofits. Specific attention is given to board roles, resource development, and fundraising, as well as to the history and legal basis of the nonprofit sector.

MGMT 7600. Organizational Memory Technology. 3 hours.
Issues and principles of managing organizational data. Concepts and skills for developing, accessing, and administering each technology. Extensive experience in developing data models, relational databases, and formulating and executing complex queries.

MGMT 7620. Rapid Application Development. 3 hours.
Prerequisite: MAN 7600 or permission of department.
Use of rapid application development (RAD) techniques such as prototyping and end-user development for quickly creating information system applications.

MGMT 7630. The Systems Approach. 3 hours.
The systems approach is a viewpoint that conceptualizes institutions as organized complexities, i.e., as organic (open) systems. Exemplified by the development of a general systems theory and cybernetics. The theories and findings of such interdisciplinary research to the study of human organizations.

MGMT 7640. Networking Technology. 1.5 hours.
The application of data communications and networking technology to support the organizational information systems mission. Communication architectures and protocols, along with current commercial offerings, equipment, software, network design principles, and network management techniques.

MGMT 7650. Electronic Commerce. 1.5 hours.
Electronic commerce and markets, including the use of the Internet and World Wide Web for commercial purposes. Development and management of websites and applications is covered in-depth.

MGMT 7670. Information Resource Management. 3 hours.
Administering the Information System/Resource activities in an organization. Computer-based resources and IS development and consulting activities. Issues include management of IS professionals, user-professional relationships, management of IS project teams, tracking emerging technologies, and planning processes. A sociotechnical perspective is emphasized to insure a balanced look at technical and people issues.

MGMT 7730. Decision Support Systems. 3 hours.
The building of decision support systems. Topics include the DSS concept, applications, organizational issues, hardware and software technology, developmental methodology, data-model-user relationships, implementation strategies, and evaluation procedures.

MGMT 7740. Knowledge-Based Systems in Business. 1.5 hours.
Prerequisite: MGMT 7730 or permission of department.
Knowledge-based systems are a subset of artificial intelligence that deal with computer applications that replicate the decision- making and problem-solving skills of experts. Students learn how to identify, build, implement and manage knowledge-based systems.

MGMT 7750. Executive Information Systems. 1.5 hours.
Prerequisite: MGMT 7730 or permission of department.
This course provides the student with an understanding of executive information systems (EIS). An EIS supplies an organization's executives with the information needed to perform their job responsibilities. Concepts, development approaches, technologies, applications, and impacts.

MGMT 7760. Group Support Systems. 1.5 hours.
Prerequisite: MGMT 7730 or permission of department.
Collaborative computing, in particular group support systems (GSS), supports a group of people who work together on a common task. Concepts, development approaches, technologies, applications, and impacts.

MGMT 7770. Data Warehouses and Mining. 1.5 hours.
Prerequisite: MGMT 7730 or permission of department.
Data warehouses or large databases are used to support decision-making applications. Coverage includes con-

cepts, development process, organizational issues, hardware, and software. The focus is on-line analytical processing (OLAP) and data mining to discover relationships in large databases.

MGMT 7780. Advanced Decision Support in Business. 1.5-3 hours.
Prerequisite: MGMT 7730 or permission of department.
Advanced topics in decision support and artificial intelligence. These include fourth generation languages, data warehousing, model building, model generation, and model management, data access, problem solving on novel computer architectures, fuzzy logic and sets, belief functions, neural computing and artificial intelligence, and intelligent agents.

MGMT 7790. Advanced Artificial Intelligence in Business. 3-6 hours.
Prerequisite: MGMT 7740 or permission of department.
Advanced topics in artificial intelligence. These include search reduction methods, such as genetic and Tabu Search algorithms, fifth generation languages, fuzzy logic and sets, belief functions, neural networks, and virtual reality.

MGMT 7800. Organizational Diagnosis and Intervention. 3 hours.
Prerequisite: MGMT 7010.
Methods for gathering and assessing information about problems affecting the performance of the organization (diagnosis), as well as designing interventions to correct the problems.

MGMT 7810. Organizational Design and Development. 3 hours.
Prerequisite: MGMT 7010.
The formal and informal structures within an organization. Topics include designing organizational structures, jobs, teams, and work-flow processes; aligning the design of structures with organizational strategy; and assessing supporting relationships, such as decision-making and authority networks.

MGMT 8010. Integrated Resource Management I. 1.5 hours.
Not open to students with credit in MGMT 4000.
Traditional, total quality, just-in-time, and constraints management philosophies applied to services and manufacturing. Resource management is the integration of these philosophies and takes a systems perspective to long- and short-range planning, scheduling, executing, controlling, and measuring operations and related functions in providing effective business processes to achieve organizational goals. For one-year MBA students.

MGMT 8020. Integrated Resource Management II. 2 hours.
Not open to students with credit in MGMT 4000.
Traditional, total quality, just-in-time, and constraints management philosophies applied to services and manufacturing. Resource management is the integration of these philosophies and takes a systems perspective to long- and short-range planning, scheduling, executing, controlling, and measuring operations and related functions in providing effective business processes to achieve organizational goals. For two-year MBA students.

MGMT 8240. Quality Management. 3 hours.
Prerequisite: Permission of department.
Managerial, behavioral, technological, and statistical concepts as related to Total Quality Management (TQM). Quality, continuous improvement, and productivity are discussed. Focus is on understanding and being able to apply all the concepts throughout any organization (e.g., service, manufacturing, not-for-profit, and governmental).

MGMT 8250. Productivity Management. 3 hours.
Not open to students with credit in MGMT 4250.
Prerequisite: Permission of department.
Advanced personal, process, white collar, and organizational productivity concepts, issues, and measurement systems. Process management concepts are applied to cross-functional activities in services and manufacturing. Constraint management tools for problem identification, solution, and implementation are applied to productivity problems.

MGMT 8260. Service Operations Management. 3 hours.
Not open to students with credit in MGMT 4260.
Prerequisite: Permission of department.
Operations management's role in service sector organizational performance. The concepts, skills, and research issues necessary to provide a competitive advantage to the service organization. Productivity improvement, quality of service delivery, work-force management, the impact of new technologies, and international issues.

MGMT 8270. Advanced Operations Management. 3 hours.
Not open to students with credit in MGMT 4260.
Prerequisite: MGMT 8250 or permission of department.
Process management, constraint management, just-in-time, quality management and traditional management tools applied to cross-functional problems based on case studies and/or actual organization projects from services and manufacturers. Technical analyses, presentations, and writing skills are utilized. Constraint management logic-based analytical processes provide the problem-solving methodology.

MGMT 8990. Directed Study. 1-9 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of department.
Directed study in management or MIS topics giving particular attention to specialized problems in an area related to a student's academic interests. Non-Traditional Format: Directed study.

MGMT 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MGMT 9010. Management Research Methodology. 3 hours.
Prerequisite: Permission of department.
The requirements that science places on management research. The importance of theory as a source of research questions, the role of constructs and variables, sampling, measurement, and the design of research to facilitate valid explanations of management phenomena.

MGMT 9020. Concepts of Organizations. 3 hours.
Prerequisite: Permission of department.
General exploration and analysis of the academic literature surrounding organizations.

MGMT 9030. Doctoral Research Seminar. 3 hours. Repeatable for maximum 9 hours credit.
Management research with particular emphasis on preparing students for research in different aspects of management.

MGMT 9280. Operations Management Research Seminar I. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Operations Management literature examining applicable research concepts, theories, and frameworks in the OM field.

MGMT 9290. Operations Management Research Seminar II. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Selected research topics focusing on providing an understanding of specific areas in the field of Operations Management (OM) and on identifying potential dissertation topics and areas for future research.

MGMT 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

MGMT 9400. Strategic Management Theory. 3 hours.
Prerequisite: Permission of department.
Evolution of major strategic management concepts and theories through in-depth discussions of the literatures which built the field's foundations. The benefits and limitations of key authors' contributions will be reviewed from the prospects of research, teaching, and management practice.

MGMT 9500. Strategic Management Research. 3 hours.
Prerequisite: Permission of department.
Research in the fields of strategic management, ethics/social responsibility, and entrepreneurship/small business. Includes a discussion of current "cutting edge" literature survey methods, model building and hypothesis generation, research designs, sample and site selection, data gathering methods, and quantitative and qualitative data analysis techniques.

MGMT 9700. Management Information Systems Research Seminar I. 3 hours. Repeatable for maximum 9 hours credit.
The management information systems (MIS) research literature. It explores applicable research theories and frameworks, research concepts, and exemplary MIS research.

MGMT 9710. Management Information Systems Research Seminar II. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MGMT 9700.
A continuation of the survey of management information systems (MIS) research literature focusing on MIS dissertation proposals and completed dissertations. Preparation, development, presentation, and defense of an MIS doctoral dissertation proposal.

MGMT 9810. Seminar in Human Resource Management. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Environments and functions of human resource management. The impact of the economic and institutional environments of human resource management, human resource planning, and human resource functions, such as recruitment, selection, development, compensation, and performance measurement. The course may also include emerging topics in human resource management.

MGMT 9820. Seminar in Organizational Behavior. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Classic and current theory and empirical research in organizational behavior. Individual differences, perception, job design, groups, leadership, power, motivation, organizational socialization, job satisfaction, organizational commitment, turnover, absenteeism, withdrawal behaviors, and individual performance. The course may also include emerging topics in organizational behavior.

Marketing

George M. Zinkhan, *Head*
Srinivas K. Reddy, *Graduate Coordinator (PhD), 542-3759*
Thomas W. Leigh, *Graduate Coordinator (MMR), 542-3763*
(Brooks Hall)

MARK 7000. Master's Research. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MARK 7630. Creative Problem Solving. 1.5 hours.
Prerequisite: Permission of department.
Understanding the creative process, stimulating creative thinking in problem solving situations, and applying problem solving techniques to marketing. Introduces tools and techniques for developing skills in idea generation and creative problem solving.

MARK 7690. Strategic Logistics and Supply Chain Management. 3 hours.
Prerequisite: Permission of department.
Focuses on logistical competency and competitive advantage. Best practices at world class firms (the strategic, structural, and informational). A channel-wide or supply chain perspective will be adopted with emphasis on managing the relationships among businesses involved in the process of buying and selling products and services.

MARK 7720. Promotion Management. 3 hours.
Prerequisite: Permission of department.
Provides management perspective on planning, developing, and evaluating advertising programs. Focus moves from agency-client relationships and the opportunities for advertising for a product or service to analyzing elements of advertising: market, messages, production and measurement.

MARK 8100. Introductory Statistical Methods for Marketing Research. 3 hours.
Prerequisite: Permission of department.
Application of probability and basic statistical methods to marketing research problems.

MARK 8130. Buyer Behavior. 1.5 hours.
Prerequisite: Permission of department.
Buyer decision processes relating to the purchase and consumption of goods and services by both businesses and consumers.

MARK 8150. Overview of Marketing Research Management. 1.5 hours.
Prerequisite: Permission of department.
The function of marketing research in organizations. Examination of the marketing research process.

MARK 8200. Research Design and Data Collection. 3 hours.
Prerequisite: Permission of department.
Data collection procedures in marketing research are considered, particularly questionnaire design for personal interviews and sampling issues.

MARK 8220. Applications of Marketing Research Techniques I. 3 hours.
Prerequisite: Permission of department.
The application of marketing techniques. Focuses on the process of developing a product from idea generation and screening through product testing and copy/positioning evaluation.

MARK 8240. Applied Models in Marketing Research. 3 hours.
Prerequisite: MARK 8100 or permission of department.
Analysis of marketing data. The use of models, regression analysis, and experimental design in marketing research. Emphasizes analysis of field experiments in marketing.

MARK 8250. Marketing Research Project I. 1.5 hours. 15 lab periods of 1.5 hours each per week.
Prerequisite: Permission of department.
Students design and complete research projects or management audits in the area of marketing management under the supervision of a faculty member. Special assignments in simulations and business games may also be undertaken. Non-Traditional Format: This course will meet the second half of fall semester.

MARK 8300. Information Technology and Marketing. 3 hours.
Prerequisite: Permission of department.
The use of secondary and syndicated data for effective marketing decision making. Use of computerized data bases and marketing decision support systems. Exploring emerging technologies and their influence on marketing.

MARK 8320. Applications of Marketing Research Techniques II. 1.5-3 hours.
Prerequisite: MARK 8220 or permission of department.
A continuation of Applications of Marketing Research Techniques I. Focuses on evaluating the market potential of new product systems; e.g., product plus price, package, and positioning. Pre-test market evaluation systems, test marketing, tracking studies, research for claim support, and the impact of UPC and scanner technology.

MARK 8350. Marketing Research Project II. 1.5 hours. 15 lab periods of 1.5 hours each per week.
Prerequisite: MARK 8250.
A continuation of Marketing Research Project I. Students design and complete research projects or management audits in the area of marketing management under the supervision of a faculty member. Special assignments in simulations and business games may also

be undertaken. Non-Traditional Format: This course will meet the first half of spring semester.

MARK 8400. Master's Internship. 1-5 hours.
Prerequisite: Permission of department.
A professional internship during which students gain a practical, working knowledge of the field and refine knowledge, skills, and attitudes developed in the classroom. Students work directly with cooperating manufacturers, agencies, and research firms and are assigned responsibility for various products and or research projects. Non-Traditional Format: This course is designated for master's internship and does not meet formally.

MARK 8440. Organization to Organization Marketing. 3 hours.
Prerequisite: MARK 8510.
The fundamental differences between transactional and partnership purchasing, and marketing strategy implications for business, governmental, and retail intermediary markets. How technology, changing demand patterns, marketing complexity, and global competition impact business marketing and the management of buyer-seller relationships and interactions within the supply chain.

MARK 8450. Behavioral Theory and Marketing. 3 hours.
Prerequisite: MARK 8510 or permission of department.
Decision making processes and consumer choice, individual and group level influences on consumer behavior, and the implications of consumer behavior for marketers. Concepts and theories developed in a variety of behavioral disciplines are applied to understanding individuals and organizations as consumers. Relationship building, customer satisfaction, and customer loyalty are stressed as new marketing strategies.

MARK 8460. Market Intelligence and Marketing Research for Managers. 3 hours.
Prerequisite: MARK 8510.
The market information needs of the customer-oriented firm including market trends, market segmentation, competitive intelligence, benchmarking, survey research, database analysis and qualitative methods. Primary and secondary data collection and analysis; brand name advertising and pricing research; sales analysis and forecasting; and customer satisfaction and usage patterns.

MARK 8500. Business Ethics. 1.5 hours.
An investigation of processes to resolve moral conflicts in business. Normative guidelines to be applied toward attaining common ground among those operating from different levels of moral reasoning.

MARK 8510. Marketing Management. 2-3 hours.
The process by which customer demand structures marketing response. The positioning of product/service offerings toward building customer satisfaction is examined by its component parts, so that marketing effort can be seen as the vehicle which delivers desired return on investment.

MARK 8520. Marketing Management. 1.5 hours.
The process by which customer demand structures marketing response. The positioning of product/service offerings toward building customer satisfaction is examined by its component parts, so that marketing effort can be seen as the vehicle which delivers desired return on investment.

MARK 8600. Marketing Strategy. 3 hours.
Strategic marketing decisions and the development of a cohesive marketing strategy that integrates the elements of the marketing mix within the competitive and market environment faced by the firm.

MARK 8610. Qualitative Research in Marketing. 1.5 hours.
Prerequisite: Permission of department.
Qualitative approaches to conducting marketing research. Paradigmatic assumptions; research design issues; various types of qualitative inquiry, with the primary focus on interviewing and observational methods; issues related to collecting and analyzing data; reporting the findings; and working with clients.

MARK 8620. Management of Marketing Communications. 3 hours.
Prerequisite: Permission of department.
Integrated marketing communications strategy to support the brand's marketplace positioning. The development of the integrated marketing communications program, including advertising, sales promotion, publicity, and presence plans. Other topics include communication models, message strategy, brand equity, measurement of effectiveness, and approaches to determining brand-customer relationships.

MARK 8630. Interpretive Research in Marketing. 1.5 hours.
The sequel to Qualitative Research in Marketing, focusing on alternative qualitative and hybrid approaches to conducting marketing research. Topics include paradigmatic assumptions; how qualitative research facilitates creative problem solving; and how methods are combined. Types of research covered include ethnography, case studies, and content analysis.

MARK 8660. Consumer Goods and Services Marketing and New Product Innovation. 3 hours.
Prerequisite: MARK 8510.
Strategic marketing management issues for consumer brands and services, including developing and managing brand equity in consumer markets; managing marketing innovation and products and services development, including identification and evaluation of new markets to enter, designing and testing of product ideas, and developing a marketing plan for launching the new products or services.

MARK 8990. Directed Study in Marketing Policy. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Students design and complete research projects or management audits in the area of marketing management under the supervision of a faculty member. Spe-

cial assignments in simulations and business games. Non-Traditional Format: This course is designed for directed study and does not meet formally.

MARK 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MARK 9180. Marketing and the Internet. 1.5 hours.
Prerequisite: MARK 8510 or permission of department.
Deals with marketing issues relevant in the emerging medium—the Internet and the World Wide Web. The infrastructure necessary to support electronic commerce, along with the role of advertising, promotion, pricing, and distribution in this new technology.

MARK 9210. Sales Force Strategy and Account Management. 3 hours.
Prerequisite: MARK 8510.
Developing and managing the marketing-driven sales force, including customer relationship strategy, cross-functional coordination, sales force organization design, customer-focused teams, and human resource decisions, including compensation; salesperson development, and sales leadership. Account development and management, professional selling, and sales technology.

MARK 9230. Global Marketing Strategy. 3 hours.
Prerequisite: MARK 8510.
Strategies by which global firms build the mix of international business activities to include non-traditional entry modes and how such firms create and maintain synergistic partnerships across national boundaries. The impact of cross functional integration on the conduct of global marketing activities and approaches for developing strategic intelligence that will anticipate new competitors from new national players.

MARK 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

MARK 9400. Marketing Theory. 3 hours.
Prerequisite: Permission of department.
Essential elements of philosophy of science and their use in marketing. Emphasizes the structure of theoretical explanation and the interaction between marketing theory and practice.

MARK 9450. Seminar in Marketing Management. 3 hours.
Prerequisite: Permission of department.
Current research in the marketing management area, including such content topics as consumer and industrial product development and management, advertising and sales promotion management, pricing, distribution and retail issues, sales management and personal selling as well as the philosophies and methods relevant to applied managerial research.

MARK 9550. Seminar in Buyer Behavior. 3 hours.
Prerequisite: Permission of department.
Theories, concepts, and research in marketing. Psychology, demography, sociology, anthropology, and other behavioral disciplines and their application to understanding individuals as consumers. Consumer decision making, its determinants, and implications for marketers.

MARK 9600. Measurement Issues in Marketing. 3 hours.
Prerequisite: Permission of department.
Seminar in proper design and execution of a research project in marketing. Both descriptive and experimental research designs are discussed in terms of reducing measurement error caused by improper conceptual definitions, sampling procedures, data collection methods, and scale construction.

MARK 9650. Applied Multivariate Methods. 3 hours.
Prerequisite: Permission of department.
Application of multivariate statistical methods to solve marketing problems. Introduction to multivariate statistical computer programs.

MARK 9700. Marketing Models. 3 hours.
Prerequisite: Permission of department.
Quantitative models used to investigate consumer behavior and attitudes, marketing strategies, and market structures.

MARK 9750. Advances in Causal Modeling. 3 hours.
Prerequisite: Permission of department.
Statistical techniques collectively known as structural equation modeling or causal modeling in experimental and survey research in marketing.

MARK 9800. Advanced Research Topics in Marketing. 3 hours.
Prerequisite: Permission of department.
Seminar dealing with the latest research topics in product, advertising, pricing, promotion, distribution, sales, and service research. Emphasis on recent development in theory and methodology.

MARK 9900. Practicum in Marketing. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Completion of a supervised task in marketing in an approved research setting. Non-Traditional Format: Directed study.

The College of Education

Russell H. Yeany, Dean
(Aderhold Hall)

The College of Education offers graduate degree programs at three levels in a variety of fields. These include: Master of Arts in Education; Master of Education; Master of Art Education; Master of Music Education; Specialist in Education; Doctor of Education; and Doctor of Philosophy. Many of these graduate programs are designed to meet Georgia Department of Education certification requirements.

Although there are common elements in each of the degree programs, there is considerable flexibility to meet individual students' interests and backgrounds. Accordingly, details about specific admission or program requirements and options should be discussed with the appropriate department or division graduate coordinator. General information regarding degree programs available in the College of Education may be obtained from the Office of Graduate Admissions in the Graduate School or from the Office of the Associate Dean in the College of Education.

The Board of Regents has also authorized Master of Education and Doctor of Education programs to be offered cooperatively by the University of Georgia and certain other institutions in Georgia. General information about these degree programs may be obtained from the Graduate School; specific information may be obtained from the Departments of Adult Education, Educational Leadership, and Occupational Studies.

It is possible to earn credit toward the Master of Education or Specialist in Education degree in course work taken through Area Teacher Education Services. Up to a maximum of one-half of the master's program (e.g., 18 semester hours for MEd, Plan B) may be applied toward degree requirements provided that the student has been or is later admitted to resident graduate study. Up to 15 semester hours may be applied toward EdS requirements provided that the student has first been admitted to resident graduate study as a degree candidate.

Six thousand- and 7000-level courses are generally designed for students enrolled in a master's degree program. Eight thousand- and 9000-level courses are generally designed for students pursuing specialist or doctoral degrees. However, due to differences in background, many students may have a mixture of 6000-, 7000-, 8000-, and 9000-level courses regardless of degree objective.

Adult Education

Bradley C. Courtenay, *Head*
Ronald M. Cervero, *Graduate Coordinator, 542-2214*
(River's Crossing)

The goal of the department's instructional mission is to develop students' knowledge and abilities in the social context of adult education, program development and management processes, and teaching and learning processes. The department offers programs of study leading to MEd, EdS, EdD, and PhD degrees.

The MEd in Adult Education is the basic degree for adult education majors whose vocational objectives require preparation for teaching and/or administration in such areas as adult literacy, continuing education, health education, community development, gerontology, and religious education. The MEd in Human Resource and Organizational Development provides students with the opportunity to gain knowledge and skills focusing on learning within the work environment, career development, organizational development, globalization, and technology. The EdS program is designed to provide advanced study in adult education for individuals who seek to enhance their abilities for application in positions and organizations related to the education of adults. The EdD program is designed to prepare students for careers as leaders in positions and organizations related to the education of adults. The PhD program is designed to prepare students for careers in research-oriented positions related to the education of adults.

EADU 6000. Special Problems in Adult Education. 3 hours. Repeatable for maximum 9 hours credit. Specialized training appropriate to the needs of the individual. The student's project may involve intensive

library investigation or the collection and analysis of original data pertinent to a given problem. Non-Traditional Format: Individual/special projects.

EADU 6010. Introduction to Adult Education. 3 hours.
The field of adult education incorporating topics such as the profession, history and philosophy of the adult education movement, delivery systems, programs and organization, and trends and issues.

EADU(READ) 6040. Teaching Reading to Low-Literate Adults. 3 hours.
Causal factors contributing to adult literacy and undereducation and instructional approaches appropriate for teaching adults to read.

EADU 6070. Survey of Educational Gerontology. 3 hours.
Social gerontology with an emphasis on adult education. Background knowledge on aging dealing specifically with program development and the involvement of older adults in educational programs is provided.

EADU 7020. Adult Learning and Instruction. 3 hours.
Principles and practices of adult learning and instruction. Emphasis on situations, factors, and methods which may influence how adults learn in a variety of traditional and ever changing multimedia and telecommunications settings.

EADU 7030. Program Development in Adult Education. 3 hours.
Guided study and practice in developing educational programs for adults in colleges, public schools, and other institutions. Includes identifying needs, establishing objectives, and critically designing and evaluating programs in adult education.

EADU 7650. Applied Project in Adult Education. 3 hours. Repeatable for maximum 6 hours credit.
Integration of adult education theory and practice in applied project significantly related to the student's professional goals. Focus is on critical reflection in practice. Non-Traditional Format: Individual/special projects.

EADU 8010. History and Philosophy of Adult Education. 3 hours.
The development of adult education as a field of study, research, and practice based on historical and philosophical perspectives. Significant social, economic, political, and demographic issues affecting the development of adult education.

EADU 8020. Group Learning in Adult Education. 3 hours.
Nature and function of group learning in diverse adult education contexts.

EADU 8040. Theoretical Perspectives on Adult Literacy. 3 hours.
Theoretical perspectives of adult literacy and undereducation. Sociological, linguistic, historical, and psychological perspectives. Implications for adult literacy education.

EADU 8050. Multicultural Issues in Adult Education. 3 hours.
Cultural (racial, ethnic, linguistic) diversity in the adult educational context. Topics include cultural self-awareness, demographic changes and projections, problems/issues in inter-cultural educational settings, theoretical perspectives of multicultural adult education, practical problems and related strategies in handling diversity in adult education settings.

EADU 8090. Adult Development and Instruction. 3 hours.
Adult developmental psychology, including the nature of adult development; issues and trends in the field; theories of adult growth and development; changes in young, middle, and older adulthood; and implications for instruction and learning of adults.

EADU 8100. Adult Education and Public Policy. 3 hours.
The role and practice of adult education in the formation and implementation of public policy. Major topics include the history of public policy and adult education; major movements and trends; the public policy process today.

EADU 8110. Adult Education for Community Development. 3 hours.
Critique of community action and learning processes in community settings. An introduction to how adult educators and human resource developers develop communities.

EADU 8120. Critical Perspectives on Adult Education. 3 hours.
Critical perspectives on adult education theory, research, and practice. Perspectives include critical theory, feminist theory, and issues of race, class, gender, and culture as they relate to the production of knowledge for adult education and the practice of adult education.

EADU 8140. Impact of Gender and Race on Learning in the Workplace. 3 hours.
The effects of gender and race in the workplace, focusing on the field of adult education and related areas. The impact of sociological, economic, racial, and gender theories are analyzed.

EADU 8190. Human Resource Development. 3 hours.
Explores three areas of practice and theory of HRD: training, career development, and organization development. HRD practice at the individual, group, and organizational levels.

(EADU)EDIT 8200. Theory and Practice of Educational Change. 3 hours.
Individual and collective meanings of change, theory, and practice of organizational change and development in a variety of educational settings.

EADU 8620. Adult Education Administration. 3 hours.
Administration in adult education organizations with emphasis on theoretical constructs underlying good management practice. The contributions or research for such management roles as program development, leadership, organizational change, and evaluation are highlighted.

EADU 8640. Continuing Education for Professionals. 3 hours.
Theoretical and research literature related to the continuing education for professionals. Topics include professionalization, professional practice, professionals as learners, developing and evaluating educational programs, and the institutional context of continuing professional education.

EADU 9000. Doctoral Research. 1-18 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EADU 9010. Adult Education in Social Context. 3 hours.
The social context of adult education, including race, class, and gender analyses, and the role of adult education in society. Relevant historical, sociological, political, and economic factors that influence adult education theory and practice.

EADU 9020. Adult Learning Theory and Research. 3 hours.
Research and theory in adult learning, including social and psychological aspects of adult learning, participation and motivation, self-directed learning, transformative learning, and recent theoretical perspectives.

EADU 9030. Program Planning Theory and Research in Adult Education. 3 hours.
Theoretical and research literature related to planning educational programs for adults. Special emphasis is placed on the political, ethical, and technical issues faced by adult educators.

EADU 9050. Human Resource and Organizational Development. 3 hours.
The literature in human resource and organizational development.

EADU 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EADU 9600. Research Seminar in Adult Education. 3 hours. Repeatable for maximum 6 hours credit.
Advanced research methods in adult education.

EADU 9610. Trends and Issues in Adult Education. 3 hours.
Selected topics and issues in practice, research, and theory of adult education.

EADU 9630. Critique of Educational Literature in Adult Education. 3 hours.
Research studies, dissertations, and journal articles in adult education.

EADU 9640. Research Methods in Adult Education. 3 hours. Repeatable for maximum 6 hours credit.
Research methods for dissertation in adult education, including preparation of the dissertation prospectus.

EADU 9700. Internship in Adult Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Supervised internship experience in an adult education setting. Non-Traditional Format: Individual/special projects.

EADU 9750. Reflective Practice Seminar. 3 hours.
Past or current work experiences in adult education used as a basis for systematic reflection on practice.

EADU 9800. Practicum in Adult Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Graduate study projects in special topics not available in scheduled courses. Projects include research and field experiences. Non-Traditional Format: Individual/special projects.

Art Education

Joe E. Sanders, *Graduate Coordinator, 542-1624*
(Visual Arts Building)

ARED 4010/6010. Techniques of Art Appreciation and Criticism. 3 hours.
Analyzing, interpreting, and evaluating art; the construction of art appreciation curricula; critical methodology as employed in classroom teaching strategies.

ARED 4340/6340. Art for the Exceptional Child. 3 hours.
Nature, identification, and treatment of children's disabilities through art. Emphasizes the role of art for emotional, social, educational, and vocational adjustment of gifted or disabled students.

ARED 5130/7130. Studio Techniques for Art Education. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Use of tools, materials, and processes in adapting the studio arts to children at various age levels and in integrating studio with a total program.

ARED 5230/7230. Special Problems in Art Education I. 3 hours.
Prerequisite: Permission of department.
Specific problem areas, according to individual needs, are investigated, discussed, and evaluated. Non-Traditional Format: Directed study.

ARED 5240/7240. Special Problems in Art Education II. 3 hours.
Prerequisite: Permission of department.
Specific problem areas with adult populations, e.g., prisoners and the aged, are investigated, discussed, and evaluated. Non-Traditional Format: Directed study.

ARED 5250/7250. Special Problems in Art Education III. 3 hours.
Prerequisite: Permission of department.
Specific problem areas in mental health facilities are investigated, discussed, and evaluated. Non-Traditional Format: Directed study.

ARED 5260/7260. Special Problems in Art Education IV. 3 hours.
Prerequisite: Permission of department.
Specific problem areas with handicapped children are investigated, discussed, and evaluated. Non-Traditional Format: Directed study.

ARED 5270/7270. Special Problems in Art Education V. 3 hours.
Prerequisite: Permission of department.
Specific problem areas in community recreation and cultural centers and museums are investigated, discussed, and evaluated. Non-Traditional Format: Directed study.

ARED 5310/7310. Multicultural and Cross-Cultural Study in Art Education. 3 hours.
Prerequisite: Permission of department.
Various cultural traditions in the United States with emphasis on multicultural and cross-cultural art education curricula.

ARED 5350/7350. Teaching of Art in the Elementary School. 3 hours.
Prerequisite: Permission of department.
Recommended practices in qualitative curriculum planning; laboratory experiments that identify philosophical, motivational, and evaluative problems in elementary school art.

ARED 5360/7360. Teaching of Art in the Secondary School. 3 hours.
Prerequisite: Permission of department.
Recommended practice in qualitative curriculum planning, together with laboratory projects that identify philosophical, motivational, and evaluative problems in secondary school art.

ARED 5460/7460. Student Teaching in Art Education. 9 hours.
Prerequisite: Permission of department.
Corequisite: ARED 5470/7470.
Supervised internship in teaching art. Non-Traditional Format: Visits by college supervisor and seminars by arrangement.

ARED 5470/7470. Issues and Practices in Teaching Art. 3 hours.
Corequisite: ARED 5460/7460.
Varied approaches to art issues; practices relevant to art education. Must be taken during student teaching.

ARED 5500/7500. Approaches to Art in the Museum. 3 hours.
Prerequisite: Permission of department.
History and current practices in museum education. Emphasis on approaches to aesthetics and art criticism in the museum environment.

ARED 7370. Curriculum Development in Art Education. 3 hours.
Prerequisite: Permission of department.
Curriculum improvement, guidelines for curriculum improvement, curriculum decision making, testing and evaluating operational curriculum innovations.

ARED 7390. Supervision of Art. 3 hours.
Prerequisite: Permission of department.
Problems of the supervisor, consultant, or director of the art program in the community schools, including qualitative curriculum planning and strategies for building potential of the art teacher.

ARED 7650. Applied Project in Art Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
A topic or problem in education significantly related to the student's professional task. Non-Traditional Format: Directed study.

ARED 8410. History of Art Education. 3 hours.
Prerequisite: Permission of department.
Art educational theory and practice in American schools, beginning with European influences and culminating in current practice.

ARED 8430. Readings in Art Education. 3 hours.
Significant writings ranging from classical foundations to contemporary viewpoints in art education with emphasis upon issues relevant to current art education practice.

ARED 8990. Research Seminar in Art Education 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research methodology, critiques of art education research and proposed research projects.

ARED 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ARED 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.

Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

ARED 9600. Educational Research in Art Education. 1-9 hours. Repeatable for maximum 9 hours credit. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Independent research on a topic in art education that pertains to the student's primary interest. Non-Traditional Format: Directed study.

ARED 9630. Critique of Educational Literature in Art Education. 3 hours.
Prerequisite: Permission of department.
Research and theoretical writing in the field of education. Non-Traditional Format: Directed study.

Communication Sciences and Disorders

Anne van Kleeck, *Head*
Robert J. Nozza, *Graduate Coordinator, 542-4561*
(Aderhold Hall)

CMSD 4090/6090. Introduction to Phonetics. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Identification, discrimination, and IPA transcription of segmental and supra-segmental elements of American English. Emphasis on branches of phonetics; classification schemes; narrow transcription of variants associated with regional dialects, speech disorders, and non-native pronunciations; dialects as manifestations of cultural diversity.

CMSD(LING) 4120/6120. Anatomy and Physiology of Speech, Voice, and Hearing. 3 hours.
Prerequisite: Permission of department.
Anatomical structures and basic physiological functions underlying audition, respiration, phonation, articulation, resonance, and swallowing.

CMSD 4130/6130. Language Science. 3 hours.
Prerequisite: Permission of department.
Components and structures of language, including analysis of sentences. Language variation and bilingualism.

CMSD(LING) 4140/6140. Introduction to Speech and Voice Science. 3 hours.
Prerequisite: CMSD 4090/6090 and CMSD(LING) 4120/6120 and PSYC 1101 and (MATH 1101 or PHYS 1010 or permission of department).
Application of basic physical principles to production and perception of speech and voice. Biomechanics of vocal fold oscillation; acoustics of voice source; resonance; acoustic phonetics; psychoacoustics of speech and voice. Interpretation of objective measures and outputs of computational models.

CMSD 4150/6150. Hearing Science. 3 hours.
Prerequisite: CMSD(LING) 4120/6120 or permission of department.
Physics of sound and the physiological and psychological bases of auditory function.

CMSD 4160/6160. Intermediate Speech and Voice Science: Clinical Applications. 3 hours.
Prerequisite: (CMSD(LING) 4140/6140 and CMSD 4150/6150 and CMSD 4530 and CMSD 6600) or permission of department.
Application of recent theory and objective measurement techniques to assessment and intervention in speech pathology. Readings include research articles in the "sciences" of speech and voice. Informal laboratory demonstrations and hands-on activities as class size permits. Designed for beginning master's level speech-language pathology majors on a non-thesis track.

CMSD(LING) 4500/6500. Study of Language Development. 3 hours.
Prerequisite: CMSD 4130/6130 or permission of department.
Normal development of children's reception, integration, and expression of linguistic information; cultural, gender, socioeconomic, cognitive, and prelinguistic influences on language development.

CMSD 4730/6730. Psychosocial Characteristics of Deafness. 3 hours.
Prerequisite: CMSD 4710 or permission of department.
Development, adjustment, and educational needs of deaf individuals. Cognitive, personality, and socioemotional development; aptitudes, special abilities, and cultural perspectives.

CMSD 4810/6810. Basic Sign Language. 3 hours.
Prerequisite: Permission of department.
History and description of sign language systems. Practice in expressive and receptive use of sign language and finger spelling.

CMSD 5790/7790. Rehabilitative Audiology. 3 hours.
Prerequisite: CMSD 4710 and permission of department.
Theories and procedures used in the rehabilitation of children and adults with hearing loss.

CMSD 6000. Special Problems in Communication Sciences and Disorders. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Adaptation of the Communication Sciences and Disorders curriculum to meet students' individual needs: supervised or directed reading, research, or clinical experiences. Non- Traditional Format: Students work independently or under the direction of a faculty

member. Meetings between students and supervising faculty are arranged independently.

CMSD 6540. Language Assessment and Intervention with Preschool Children. 3 hours.
Prerequisite: CMSD 4520 and permission of department.
Formal and informal language assessment procedures; selection and implementation of appropriate assessment instruments and models; intervention models for diverse populations.

CMSD 6550. Language Assessment and Intervention with School-Age Children. 3 hours.
Prerequisite: CMSD 4520 and permission of department.
Formal and informal language assessment procedures; selection and implementation of appropriate assessment instruments and models; intervention models for diverse populations. Language requirements for successful classroom performance in kindergarten through high school.

CMSD 6600. Research Design in Communication Sciences and Disorders. 3 hours.
Prerequisite: Permission of department.
Theories, thought processes, and methods underlying science, research, and clinical work in communication sciences and disorders. Emphasis on the tools necessary to be an informed consumer of research publications and a productive contributor to a research-based clinical profession.

CMSD 6700. Diagnosis in Speech-Language Pathology. 2 hours.
Prerequisite: CMSD 4520 and CMSD 4530 and permission of department.
Theory, purpose, selection, administration, and interpretation of formal and informal diagnostic tests and procedures. Determining the differential diagnosis, nature of the problem, and recommended intervention, for clients of all ages with speech and/or language disorders. Requires supervised lab activities for development of diagnostic skills.

CMSD 6740. Articulation and Phonology Disorders. 3 hours.
Prerequisite: Permission of department.
Nature and treatment of disorders of the production of speech sounds. Phonological development and phonological processes; using theoretical and etiological knowledge as the basis of clients' individualized assessment and intervention plans.

CMSD 6750. Voice and Resonance Disorders. 3 hours.
Prerequisite: Permission of department.
Nature and treatment of physiological and other disorders of pitch, loudness, and voice quality, including those associated with cleft palate and laryngectomy. Using theoretical and etiological knowledge as the basis for clients' individualized assessment and intervention plans.

CMSD 6760. Fluency Disorders. 3 hours.
Prerequisite: Permission of department.
Nature and treatment of stuttering, cluttering, and acquired neurogenic stuttering. Using theoretical and etiological knowledge as the basis for clients' individualized assessment and intervention plans.

CMSD 6770. Clinical Audiology. 4 hours.
Prerequisite: CMSD 4710 or permission of department.
Rationale and procedures for measuring aspects of hearing using simple and complex stimuli, threshold and supra-threshold measurements, and physiologic principles associated with middle and inner ear analysis.

CMSD 6780. Auditory Electrophysiology. 3 hours.
Prerequisite: Permission of department.
Fundamental principles essential to the understanding and measurement of electrocochleography and auditory brainstem responses; the clinical application of these procedures to evaluate the peripheral and central auditory system.

CMSD 6790. Hearing Aids and Other Amplification Systems. 3 hours.
Prerequisite: CMSD 6770 and CMSD 8000 and permission of department.
Design, electroacoustic characteristics, and acoustic characteristics of analog, programmable, and digitally programmable amplification systems, including personal hearing aids and other personal and group systems. Ear mold characteristics and acoustic modifications, fitting strategies, and real-ear measurement.

CMSD 6800. Neural Bases of Speech, Language, and Hearing. 3 hours.
Prerequisite: Permission of department.
Neuroanatomy and neurophysiology of speech, language, and hearing from a communication science perspective.

CMSD 6820. Advanced Electrophysiology. 3 hours.
Prerequisite: CMSD 6780 and permission of department.
Neurophysiologic procedures used in the evaluation of human auditory and vestibular systems, including auditory middle and late responses, and electronystagmography.

CMSD 6840. Neurogenic Speech Disorders and Dysphagia. 3 hours.
Prerequisite: CMSD 6800 and permission of department.
Dysarthria, apraxia, dysphagia, and related disorders affecting the speech musculature. Focus is on neurological correlates of muscle paralysis/paresis, differential diagnosis, and speech/communication rehabilitation.

CMSD 6850. Aphasia. 3 hours.
Prerequisite: CMSD 6800 and permission of department.
Study of acquired aphasia and related neurogenic communicative disorders. Focus is on neurological correlates, differential diagnosis, and rehabilitation.

CMSD 6860. Special Issues in Adult Language Disorders. 3 hours.
Prerequisite: CMSD 6800 and permission of department.
Communication and cognition in normal adults and the influences of aging and acquired neurological impairments on these behaviors. Adult communication disorders associated with dementia, agnosia, nondominant hemisphere injury, and traumatic brain injury are discussed, with emphasis on their characteristics, assessment, and treatment.

CMSD 6900. Pediatric Audiology. 3 hours.
Prerequisite: CMSD 8000 and permission of department.
Prerequisite or corequisite: CMSD 6790.
Normal auditory development and etiologies of childhood hearing impairment and deafness. Identification and assessment of hearing loss in infants and children, including screening principles and practices and amplification fitting strategies for the very young.

CMSD 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CMSD 7040. Clinical Practicum in Speech-Language Pathology. 1-3 hours. Repeatable for maximum 15 hours credit.
Supervised clinical practice and field experience with clients of all ages. Direct involvement in all aspects of screening, assessment, and treatment of speech and language disorders. Professional issues related to the practice of speech-language pathology presented in weekly Case Review Seminars. Non-Traditional Format: Students work with assigned clients under the direction of a faculty member or other clinical supervisor.

CMSD 7140. Clinical Practicum in Audiology. 1-3 hours. Repeatable for maximum 15 hours credit.
Supervised clinical practice and field experience with clients of all ages. Direct involvement in all aspects of screening, basic audiological evaluations, special diagnostic tests, and aural rehabilitation. Professional issues related to the practice of audiology presented in weekly Case Review Seminars. Non-Traditional Format: Students work with assigned clients under the direction of a faculty member or other clinical supervisor.

CMSD 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CMSD 7700. Clinical Internship in Speech-Language Pathology. 3-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Supervised practicum in a hospital, medical center, rehabilitation center, community clinic, public or private school, educational service agency, or a combination of these and similar settings. Non-Traditional Format: Students work independently or under the direction of a faculty member. Meetings between students and supervising faculty are arranged independently.

CMSD 7770. Internship in Audiology. 3-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Supervised practicum in hospitals, medical centers, community clinics, public/private schools, educational service agencies or a combination of these settings. Non-Traditional Format: Students work with assigned clients under the direction of a faculty member or other clinical supervisor.

CMSD 7780. Pediatric Rehabilitative Audiology. 3 hours.
Prerequisite: CMSD 4710 and permission of department.
Models and procedures for implementing effective auditory rehabilitation for children.

CMSD 7810. Hearing Conservation. 2 hours.
Prerequisite: Permission of department.
Detection of pathological noise and the correction of its effects on human hearing mechanisms in community, industrial, and military settings.

CMSD 7820. Language of Deaf and Hard of Hearing. 3 hours.
Prerequisite: CMSD(LING) 4500/6500 and permission of department.
Theories and strategies for assessing and facilitating language development in individuals who are deaf or hard of hearing, including historical and current approaches.

CMSD 7830. Spoken Language of Deaf and Hard of Hearing. 3 hours.
Prerequisite: Permission of department.
Theories and strategies for assessing and facilitating listening skills and speech skills in individuals who are deaf or hard of hearing.

CMSD 7840. Instructional Strategies and Curriculum for Deaf. 3 hours.
Prerequisite: CMSD 7820 and permission of department.
Development, selection, and modification of instructional materials for early childhood and elementary students who are deaf or hard of hearing; instructional strategies for these children.

CMSD 7850. Written Language of Deaf and Hard of Hearing. 3 hours.
Prerequisite: Permission of department.
Prerequisite or corequisite: CMSD 7820.
Theories and strategies for assessing and facilitating reading and writing in individuals who are deaf or hard

of hearing. Impact of hearing loss on written language and language processes.

CMSD 7860. Educational Assessment of Deaf and Hard of Hearing. 3 hours.
Prerequisite: CMSD 7820 and permission of department.
Interview techniques; selection, administration, and interpretation of appropriate norm-referenced and criterion-referenced measures; report preparation; conference procedures.

CMSD 8000. Auditory Processes: Physiological and Psychological Bases. 3 hours.
Prerequisite: CMSD 4150/6150 and permission of department.
The modification and transmission of acoustic information as it travels from the peripheral auditory system through the central nervous system; the limits and characteristics of auditory function as measured using psychophysical techniques.

CMSD 8010. Seminar in Speech and Hearing. 2 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Current literature or research and professional issues at the intersection of speech and hearing sciences and disorders.

CMSD 8030. Advanced Topics in Audiology. 3 hours.
Prerequisite: Permission of department.
Specialized measurement techniques in diagnostic audiology, including acoustic immittance and otoacoustic emissions measures; advanced hearing aid and amplification selection and fitting strategies.

CMSD(LING) 8050. Seminar: Language Acquisition and Disorders. 3 hours.
Prerequisite: Permission of department.
Recent issues and research in language acquisition and disorders. Major theories of development, assessment, and intervention, with emphasis on integration of theory and clinical practice.

CMSD 8060. Seminar in Auditory Disorders. 3 hours.
Prerequisite: Permission of department.
Congenital and acquired hearing disorders and their effects on the peripheral and central auditory systems.

CMSD(LING) 8360. Advanced Speech and Voice Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: [(CMSD(LING) 4140/6140 or CMSD 4150/6150)] and CSCI 1100-1100L and permission of department.
Designed for students at the early stages of thesis or dissertation planning. Specific topics vary depending on student/faculty interests. Lecture/discussion format to present research approaches to acoustic phonetics, voice science, and psychoacoustics. Emphasis on available instrumentation, measurement standards, psychophysics, and issues in signal processing of speech and voice.

CMSD(LING) 8360L. Laboratory in Advanced Speech and Voice Science. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CMSD(LING) 8360 and permission of department.
Hands-on laboratory exercises emphasizing digital recording techniques and signal conditioning; spectral, spectrographic, and aerodynamic measures of speech and voice; indirect measures of laryngeal vibration; computational models of peripheral auditory processing.

CMSD 8990. Research Seminar in Communication Sciences and Disorders. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Review of research literature and current issues for advanced graduate students. Non-Traditional Format: Students work independently or under the direction of a faculty member. Meetings between students and supervising faculty are arranged independently.

CMSD 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CMSD 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Counseling and Human Development Services

Richard L. Hayes, *Head*
John C. Dagley, *Graduate Coordinator, 542-1812*
(Aderhold Hall)

Two distinct doctoral programs are offered in the department: the counseling psychology program, and the counseling and student personnel services program. Each program has separate admission standards, curricula, and general requirements.

The counseling psychology program is based on the scientist-practitioner model of training in professional psychology and was fully accredited by the American Psychology Association in

1986. The program, leading to the PhD degree in counseling psychology, prepares graduates for instructional and service positions in colleges and universities and for employment in health agencies and institutions. The curriculum is also intended to be consistent with state licensure requirements for the practice of applied psychology in independent practice.

The counseling and student personnel services PhD program is designed to prepare professionals for careers as college student affairs administrators, graduate faculty members in student affairs professional preparation programs, and/or positions that specialize in student assessment, outcomes research, and program evaluation in higher education. The scientist-practitioner model of graduate education is the foundation of the program. Graduates are expected to possess skills and knowledge as theoretician-researchers and as professional higher education leader-administrators.

There are three master's degree programs in the department, each of which offers the MEd degrees: (1) college student affairs administration; (2) rehabilitation counseling; and (3) guidance and counseling, which has two specialities (school counseling and community agency counseling). The college student affairs administration, school counseling, and community agency counseling programs are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP), and the rehabilitation counseling program is accredited by the Council on Rehabilitation Education (CORE).

The college student affairs administration program focuses on the psychosocial and intellectual development of college students and is designed to prepare practitioners for work in student affairs divisions in areas such as residence halls, student activities, and career planning and placement. The rehabilitation counseling program is designed to educate counselors prepared to assist persons with disabilities in a variety of public and private service and treatment agencies. The guidance and counseling program is designed to prepare graduates to work as school counselors or to work in a variety of community settings, such as mental health centers, alcohol and drug treatment programs, and employment services offices.

The Specialist in Education (EdS) program is offered in guidance and counseling (with specialty in school counseling). The EdS provides advanced education and training in human service delivery and leadership, and is viewed as a terminal degree designed for individuals who do not plan to pursue the doctorate.

Admission to the PhD program is for fall semester only. Admission to all master's degree programs is for summer or fall semester only, depending on the program. Applicants should contact the department's graduate coordinator for detailed information about programs and application procedures. Early application is encouraged because all programs have enrollment limits.

ECHD 4020/6020. Interpersonal Relationships. 3 hours.
Prerequisite: Permission of department.
Interpersonal skills are taught and demonstrated by the instructor. Students practice the skills in role-playing situations. Skills included are physical attending, psychological attending, listening, perceiving surface and underlying feelings, basic responding skills, personalizing skills, and initiating skills. Intended for non-majors.

ECHD 6000. Special Problems in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 6 hours credit.
Specialized training appropriate to the needs of the individual. The student's project may involve intensive library investigation or the collection and analysis of original data pertinent to a given problem.

ECHD(SOWK)(CHFD) 6010. Issues in Marriage and Family Therapy. 3 hours.
Prerequisite: Permission of school.
Disciplines and professional groups related to marriage and family therapy, including historical, ethical, and legal issues, and other topics relevant to the current practice of marriage and family therapy.

ECHD 6030. Interpersonal Facilitation and Intervention I. 4 hours.
Basic counseling skills for student affairs practice. Course focuses on counseling techniques and theories appropriate for use with college students as they deal with developmental issues and concerns.

ECHD 6040. Interpersonal Facilitation and Intervention II. 3 hours.
Prerequisite: ECHD 6030.
Focuses on strategies and tools that may be used to assist college students, including psychological assessment techniques, career development theory and interventions, and use of facilitation skills in working with staff.

ECHD 7000. Master's Research. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ECHD 7010. Individual Appraisal. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Prerequisite or corequisite: ECHD 7040.
Principles of testing, types of scores, use of instruments and methods of assessing abilities, achievement levels, interests, attitudes, developmental variables, vocational skills, and personality characteristics. Use of test and non-test data in counseling and human development services.

ECHD 7040. Counseling Theories and Practice. 3 hours.
Prerequisite: Permission of department.
Selected theories of counseling and human development and their application to research, theory, and practice in educational, rehabilitation, community, and employment settings. Helping skills will be developed through demonstration and role-playing situations.

ECHD 7050. Career Development Theory. 1 hour.
Prerequisite: Permission of department.
Prerequisite or corequisite: ECHD 7040.
Career development concepts, assumptions, theories, and research in educational, rehabilitation, community, and employment settings.

ECHD 7055. Career Counseling and Educational Practice. 1 hour.
Prerequisite: ECHD 7050 and permission of department.
Application of lifestyle and career development concepts, assumptions, theories, and research in counseling and educational settings. Emphasis will be placed on career counseling, career education, life planning, assessment, and occupational information.

ECHD 7060. Cross-Cultural Counseling. 3 hours.
Prerequisite: ECHD 6030 ECHD 7040.
Knowledge, skills, and self-awareness needed to counsel members of racially and ethnically diverse populations.

ECHD 7080. Introduction to Group Counseling. 2 hours.
Prerequisite: ECHD 7040 and permission of department.
Introductory group counseling theories. Review of the basics of setting up and conducting counseling groups. Discussion of ethical standards related to group counseling.

ECHD 7090. Structured Group Interventions. 3 hours.
Prerequisite: ECHD 6020 or ECHD 6030.
Basic approaches to structured group work in relation to goals, objectives, and dynamics and the implications of group approaches to personal and educational development of students and adults.

ECHD 7090L. Structured Group Laboratory. 1-3 hours. Repeatable for maximum 6 hours credit. 1 lab period of 1-3 hours each per week.
Prerequisite: ECHD 7090.
Design, implementation, and evaluation of structured group interventions. Group leadership skills will be developed and a structured group devised by the student will be implemented under supervision.

ECHD 7150. Loss and Grief Counseling. 3 hours.
Prerequisite: ECHD 7040.
Conceptualization of loss as a set of generic experiences resulting from a variety of changes across the lifespan. Issues related to the meaning of loss for the individual, factors that influence the grieving process, and the identification and treatment of complicated mourning.

ECHD 7200. Foundations of Rehabilitation Counseling. 3 hours.
Prerequisite: Permission of department.
Prerequisite or corequisite: ECHD 7040.
The rehabilitation field with emphasis on philosophical, historical, psychological, and organizational foundations, rehabilitation services, and professional practice.

ECHD 7210. Vocational Assessment. 2 hours.
Prerequisite: ECHD 7200 and permission of department.
Assessment methods for identifying individual skills, interests, and support needs to assist individuals with disabilities to develop career and life goals.

ECHD 7230. Coordinating Career and Life Planning Services. 3 hours.
Prerequisite: ECHD 7200 and permission of department.
Coordination of transition and community services and the resources that support accomplishment of individualized rehabilitation goals. Strategies and methods for assisting individuals with disabilities in choosing career and life planning services.

ECHD 7240. Psycho-Social Issues in Rehabilitation. 2 hours.
Prerequisite: ECHD 7200 or permission of department.
Psychological and sociological aspects of severe disabilities, including adjustment factors in living with disabilities, community attitudes toward individuals with disabilities, and strategies to change negative attitudes.

ECHD 7250. Medical Information and Assistive Technology. 3 hours.
Prerequisite: ECHD 7200 or permission of department.
Etiology, prognosis, treatment, and vocational implications of varying disabling conditions. Assisting persons with severe disabilities to select technology and other forms of support.

ECHD 7260. Employment Strategies. 3 hours.
Prerequisite: ECHD 7200 or permission of department.
Theory and practice in career development for individuals with disabilities. Employment strategies including innovative job development, job modification, and job creation strategies. Assisting individuals with

disabilities to select, obtain, maintain, and advance in employment.

ECHD 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ECHD 7400. Foundations of College Student Affairs Administration. 3 hours.
The field of college student affairs with emphasis on historical, philosophical, psychological, and sociological foundations, and student service functions.

ECHD 7410. College Student Affairs Interventions. 3 hours.
Prerequisite: ECHD 7400 or permission of department.
Application of student development and organization development theories to the institutional environments of college students for purposes of enhancing their personal and educational development.

ECHD 7420. Theories of College Student Development. 3 hours.
Prerequisite: Permission of department.
Human development and person-environment theories, assessment methods, and their applications to college students.

ECHD 7430. College Student Ecology. 3 hours.
Prerequisite: ECHD 7400 or permission of department.
The modern American college and university and their students, with special emphasis on the diverse student populations. College student ecology, including exploration of trends in higher education, the impact of college on students, and current campus cultures.

ECHD 7440. Administration in College Student Affairs. 3 hours.
Prerequisite: ECHD 7400 or permission of department.
Leadership and administration principles and practices applied to college student affairs programs and services. Administrative approaches designed to support, enhance, and create developmental educational environments for college students.

ECHD 7500. Foundations of School Counseling. 3 hours.
Prerequisite: Permission of department.
Prerequisite or corequisite: ECHD 7040.
The profession of counseling and specialty practice as applied in schools. Consideration of the nature of schools as well as school counseling programs that are comprehensive, developmental, and collaborative in nature.

ECHD 7600. Foundations of Mental Health and Community Counseling. 3 hours.
Prerequisite: Permission of department.
Prerequisite or corequisite: ECHD 7040.
Counselors in mental health counseling settings (such as community agencies, drug and alcohol treatment programs, and employment services). Historical, philosophical, psychological, and sociological foundations of counseling in community settings.

ECHD 7700. Individual Counseling Practicum. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ECHD 7040 and permission of department.
Supervised psychological counseling practice in a setting consistent with the student's professional goals. Non-Traditional Format: Practicum.

ECHD 7720. Advocacy Practicum in Rehabilitation Counseling. 1-2 hours. Repeatable for maximum 4 hours credit.
Prerequisite: ECHD 7040 and permission of department.
The political, social, economic, and environmental barriers faced by people with disabilities. Non-Traditional Format: Practicum.

ECHD 7740. Practicum in College Student Affairs. 1-2 hours. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Supervised practice within a student affairs program at an institution of higher learning. Non-Traditional Format: Practicum.

ECHD 7820. Internship in Rehabilitation Counseling. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 7720 and permission of department.
A supervised experience in a rehabilitation setting appropriate to rehabilitation specialization. Non-Traditional Format: Supervised counseling practice under professional supervision.

ECHD 7840. Internship in College Student Affairs. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 7740 and permission of department.
Supervised experience in a college setting appropriate to college student affairs.
Non-Traditional Format: Supervised practice under professional supervision.

ECHD 7850. Internship in School Counseling. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 7700 and permission of department.
Supervised experience in an educational setting appropriate to school counseling. Non-Traditional Format: Supervised counseling practice under professional supervision.

ECHD 7860. Internship in Community Counseling. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 7700 and permission of department.
Supervised experience in a community setting appropriate to community counseling. Non-Traditional Format: Supervised counseling practice under professional supervision.

ECHD 7920. Research Methods in Counseling and Psychotherapy. 3 hours.
Prerequisite: ECHD 7040.
Behavioral science research methods used to study counseling and psychotherapy. Examination of frequently used qualitative and quantitative research approaches, critique of published research in the field, and development of research plans.

ECHD 7940. Research Methods in College Student Affairs. 3 hours.
Prerequisite: ECHD 7400.
Behavioral science research methods used to study college students and higher education institutions. Examination of frequently used qualitative and quantitative research approaches, critique of published research in the field, and development of research plans.

ECHD 7990. Research Seminar in Counseling and Human Development Services. 1-6 hours. Repeatable for maximum 6 hours credit.
A seminar for master's level students in counselor education dealing with proposed research projects and critiques of the literature. Non-Traditional Format: Course is directed study in research that may be satisfied by research with multiple instructors and/or independent study under faculty supervision.

ECHD 8000. Applied Project in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 6 hours credit. 1 lab period of 1-3 hours each per week.
Prerequisite: Permission of department.
Individual research in an area pertinent to the field of counseling and human development services, with emphasis on increasing skills necessary to collect, interpret, and utilize research data.

ECHD 8020. Seminar in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Specific areas in counseling and human development services. Topics will vary but will focus on the development of advanced knowledge and skills in emerging areas relevant to professionals in counseling and human development.

ECHD 8030. Psychodiagnosis. 3 hours.
Prerequisite: ECHD 7040 and permission of department.
Key concepts of mental health and illness with an emphasis on examining major issues in psychiatric diagnosis, including gender, racial/ethnic, and cultural factors. Students will become familiar with the DSM classification system and achieve proficiency in making diagnoses.

ECHD 8100. Developmental Counseling. 3 hours.
Prerequisite: ECHD 7040.
Cognitive, psychosocial, person-environment interaction, and life-span development theories in counseling.

ECHD 8110. Adlerian Family Counseling. 3 hours.
Prerequisite: ECHD 7040.
Presentations, demonstrations, and critical analyses of the basic principles and practices of Adlerian Family Counseling. A review of the fundamental tenets of Alfred Adler's approach to family education, intervention, and enrichment.

ECHD 8120. Person-Centered Approach. 3 hours.
Prerequisite: ECHD 7040.
Significant theories in the practice of the Person-Centered Approach. Research and investigation of its applications will be evaluated critically.

ECHD 8130. Expressive Arts and Play Media in Counseling. 3 hours.
Prerequisite: ECHD 7040.
Expressive arts and play media in counseling with children and adolescents.

ECHD 8140. Existential Approaches to Therapy. 3 hours.
Prerequisite: ECHD 7040.
Theory and practice of existential approaches to individual and group therapy.

ECHD 8150. Child and Family Counseling. 3 hours.
Prerequisite: ECHD 7040.
Theories and methods of working with children and families. The understanding of children's development and behavior and the understanding of family systems and interventions.

ECHD 8160. Gestalt Therapy. 3 hours.
Prerequisite: ECHD 7040.
Significant theories in the practice of Gestalt Therapy. Research and investigation of its applications will be evaluated critically.

ECHD 8170. Theories of Drug and Alcohol Abuse. 3 hours.
The causes and effects of drug and alcohol addiction and the implications for counseling.

ECHD 8180. Counseling the Drug and Alcohol Abuser. 3 hours.
Prerequisite: ECHD 8170.
Advanced counseling and treatment approaches used with drug and alcohol abusers.

ECHD 8990. Research Seminar in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research seminar for individuals or groups of doctoral students dealing with proposed psychological, vocational, educational, and developmental programs and projects.

ECHD 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ECHD 9020. Human Development Services Interventions. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Investigation of theoretical foundations, research findings, and techniques for selected human development interventions. Environmental assessment and milieu management, life skills training, consultation in human service agencies, and organizational development in educational settings.

ECHD 9050. Career Development and Research. 3 hours.
Prerequisite: ECHD 7055 and permission of department.
Career development theory and research, including a comprehensive review of the principles and techniques of career counseling. Special consideration will be given to the seminal research, development theorists, typological theorists, and social learning theorists.

ECHD 9060. Advanced Cross-Cultural Counseling. 3 hours.
Prerequisite: ECHD 7060 and permission of department.
Multicultural issues related to gender, age, disability, and sexual orientation as they pertain to counseling.

ECHD 9080. Advanced Theories and Procedures of Group Work. 3 hours.
Prerequisite: ECHD 7080 and permission of department.
Advanced group work theories with emphasis on techniques and application, ethical responsibilities, and current trends.

ECHD 9100. Constructivist Approaches in Counseling Theory. 3 hours.
Prerequisite: Permission of department.
The origins, current status, and emerging applications of constructivist developmental approaches to counseling psychology.

ECHD 9110. Cognitive-Behavioral Approaches in Counseling Theory. 3 hours.
Prerequisite: Permission of department.
Current cognitive-behavioral models for understanding human problems and behavior change. The cognitive-behavioral movement as a bridge between theory and practice.

ECHD 9220. Rehabilitation Education. 3 hours.
Prerequisite: Permission of department.
Rehabilitation education programming, including accreditation requirements, training grants, field work supervision, and continuing education.

ECHD 9240. Professional Issues in Rehabilitation. 3 hours.
Prerequisite: Permission of department.
History, development, and current issues related to the profession of rehabilitation counseling. Philosophical assumptions, legal and ethical considerations, new rehabilitation service initiatives, and new consumer populations.

ECHD 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

ECHD 9400. Seminar in Student Affairs Administration. 3 hours.
Prerequisite: Permission of department.
Current trends, issues, and research related to contemporary college student affairs practices. Organizational patterns, models, and structures; professional standards; personnel practices; and innovations in program and service delivery.

ECHD 9410. Organizational Development and Consultation in Higher Education. 3 hours.
Prerequisite: ECHD 9400.
Organizational development strategies and consultation approaches designed to strengthen higher education organizations.

ECHD 9420. Advanced Theories of College Student Development. 3 hours.
Prerequisite: ECHD 7420.
Major theories of college-student psychosocial, intellectual, moral, and ego development; measurement of developmental constructs; and effects of college attendance on each domain. Differences attributable to gender, socioeconomic background, sexual orientation, age, and ethnicity.

ECHD 9430. Environmental Assessment and Milieu Management. 3 hours.
Prerequisite: ECHD 9400 and permission of department.
Theories and techniques for assessing human environments in educational settings and strategies to influence them.

ECHD 9440. Leadership and Policy Development in Student Affairs. 3 hours.
Prerequisite: ECHD 9400 and permission of department.
The theoretical foundations, research findings, and contemporary practices related to the processes of leadership and policy-making in college student affairs division. Specific attention will be given to analyzing the role of leadership in the institution and the effects of policy implementation.

ECHD 9450. Staffing Practices in Student Affairs. 3 hours.
Prerequisite: ECHD 9400 and permission of department.
Research and theory in staff recruitment and selection, new position orientation, staff supervision, staff development and continuing education, and performance appraisal.

ECHD 9460. Issues in Student Affairs Administration. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ECHD 9400 and permission of department.
Theories, models, issues, and practices in contemporary college student affairs administration.

ECHD 9600. Foundations of Counseling Psychology I. 3 hours.
Prerequisite: Permission of department.
History, development, and current issues related to the profession of counseling psychology. Philosophical and cultural assumptions, legal and ethical considerations, and implications of selected research topics.

ECHD 9610. Foundations of Counseling Psychology II. 3 hours.
Prerequisite: ECHD 9600 and permission of department.
Basic theoretical foundations for the profession of counseling psychology. Counseling and psychotherapy, career development, human development, and cultural diversity perspectives.

ECHD 9620. Assessment and Diagnosis in Counseling Psychology I. 3 hours.
Prerequisite: ECHD 9610 and permission of department.
The administration and interpretation of psychological measure of intellectual, social, and personality characteristics of individuals. The ethical use of test results in counseling individuals from diverse populations.

ECHD 9630. Assessment and Diagnosis in Counseling Psychology II. 3 hours.
Prerequisite: ECHD 9620 and permission of department.
Use of selected appraisal instruments and techniques, with an emphasis on outcome assessment and the relationship between assessment and psychodiagnosis. Students will become familiar with the DSM classification system and achieve proficiency in making diagnoses.

ECHD 9640. Systemic Intervention in Counseling Psychology I. 3 hours.
Prerequisite: ECHD 9630 and permission of department.
The role of the psychologist from a systems perspective. Understanding individuals within the various contexts in which they function, such as families, work groups, cultures, and societies. Examination of selected techniques for working with individual families, groups, and organizations.

ECHD 9650. Systemic Intervention in Counseling Psychology II. 3 hours.
Prerequisite: ECHD 9640 and permission of department.
Application of social psychological research and systems theory to organizational development. Emphasis will be on the role of the counseling psychologist as a consultant and the development of consultation and group leadership skills necessary to work with teachers, clients, patients, families, groups, administrators, and personnel in agencies, organizations, or institutions.

ECHD 9660. Professional Development Seminar in Counseling Psychology I. 3 hours.
Prerequisite: ECHD 9650 and permission of department.
Intended to facilitate students' transition from psychologists-in-training to professional counseling psychologists. The seminar will assist students in the integration and articulation of their own theoretical framework to guide their practice and research as counseling psychologists.

ECHD 9670. Professional Development Seminar in Counseling Psychology II. 3 hours.
Prerequisite: ECHD 9660 and permission of department.
Emphasis on current and emerging professional issues, including psychology licensure, professional and legal standards, and ethical practice in counseling psychology, as well as current topics in therapy.

ECHD 9680. Process of Counseling Psychology Supervision. 3 hours.
Prerequisite: ECHD 9760 and permission of department.
Each student will supervise two master's-level students in Individual Counseling Practicum. The supervisory sessions will be recorded and critiqued in the supervision course. An updated and systematic understanding of the problems of supervision will be accomplished through a review of the literature.

ECHD 9760. Advanced Counseling Psychology Practicum. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised psychological counseling practice in a setting consistent with the student's professional goals. Non-Traditional Format: Practicum.

ECHD 9780. Advanced Group Work Practicum. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ECHD 9640 and permission of department.
Supervised practice in group work with opportunities for practical experiences in diverse settings. Non-Traditional Format: Practicum.

ECHD 9830. Administrative Internship in Student Affairs Administration. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 9400 and permission of department.
Advanced supervised experience in an applied higher education administrative setting. Non-Traditional Format: Doctoral internship under supervision of faculty and site staff.

ECHD 9840. Research Internship in Student Affairs Administration. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 9400 and permission of department.
Advanced supervised experience in an applied higher education research setting. Non-Traditional Format: Doctoral internship under supervision of faculty and site staff.

ECHD 9850. Teaching Internship in Student Affairs Administration. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ECHD 9400 and permission of department.
Advanced supervised experience in an applied higher education teaching setting. Non-Traditional Format: Doctoral internship under supervision of faculty and site staff.

ECHD 9860. Internship in Counseling Psychology. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ECHD 9760 and permission of department.
An advanced supervised experience in an applied setting. Non-Traditional Format: Internship.

ECHD 9970. Educational Research in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Designed for advanced graduate students to accommodate research in current psychological, vocational, educational and developmental trends, unique interests and special research efforts.

Educational Leadership

C. Thomas Holmes, *Head and Graduate Coordinator, 542-0913*
(River's Crossing)

EDUL 6990. Research Seminar in Educational Leadership. 1-6 hours. Repeatable for maximum 6 hours credit.
Research projects and critiques of the literature in educational leadership.

EDUL 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDUL 7010. Curriculum Foundations and History. 4 hours.
Social, historical, and professional foundations of curriculum theory and development.

EDUL 7020. Supervision of Instruction. 4 hours.
The basic concepts of supervision, its contribution to the total school program, and means of improving instruction through supervision.

EDUL 7030. Organizational Leadership in Schools. 4 hours.
Theories, models, and research focusing on the development of a reflective-critical understanding of school leadership.

EDUL 7040. School Law. 4 hours.
Legal principles applied to educational institutions, including federal and state constitutional provisions, legislation, administrative regulations, and case law.

EDUL 7050. Personnel Administration and Staff Development. 4 hours.
Principles, policies, and procedures for employer-employee relationships in school systems. Comprehensive planning and implementation of staff development programs in schools. Emphasis is on human resource management.

EDUL 7060. School Business and Resource Management. 4 hours.
Business management functions, with emphasis given to the budgeting process, accountability, and educational efficiency.

EDUL 7090. Instructional Development. 2 hours.
The basic nature of classroom instruction, key elements of the instructional process, organizing operations, and skills for evaluating and improving instruction.

EDUL 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

EDUL 7600. Research in Educational Leadership. 4 hours.
The types of educational research and issues in research design and methodology in educational leadership.

EDUL 7650. Applied Project in Educational Leadership. 3 hours. Repeatable for maximum 9 hours credit.
Study of a problem in administration, curriculum, instruction, or supervision. A proposal for study must be approved by a faculty member. Non-Traditional Format: Applied project under the direction of a faculty member.

EDUL 7800. Practicum in Educational Leadership. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Guided and supervised learning opportunities allowing students to test principles in the field and to relate theory to practice in actual institutional settings. Non-Traditional Format: Field experience supervised jointly by faculty and practitioners.

EDUL 8000. Special Problems in Educational Leadership. 1-4 hours. Repeatable for maximum 4 hours credit.
Projects designed to provide specialized training appropriate to the needs of the individual. The project may involve intensive library investigation or the collection and analysis of original data pertinent to a given problem.

EDUL 8020. Curriculum Development and Evaluation. 4 hours.
Principles of curriculum development and evaluation of the improvement of the life and program of schools.

EDUL 8040. Social Psychology of Schools. 3 hours.
The organizational and cultural factors that contribute to the formation of teacher and student identities. Practices such as tracking, assignment of students to special education, extra-curricular activities, evaluation, rewards, and peer influences will be considered in terms of their implications for self development and understanding.

EDUL 8050. Organizational Development and Change. 2 hours.
Organizational effectiveness and the quality of work life emphasizing the processes of planning and implementing changes to the culture/climate of the individuals in a school and the school as a system using sociology and social psychology research methodologies.

EDUL 8070. Ethics in Educational Leadership. 3 hours.
The various ethical dimensions of educational leadership, involving both content and process.

EDUL 8090. Economics of Education. 2 hours.
Economic forces, including those involved in financing public schools.

EDUL 8120. Public School Superintendency. 2 hours.
The roles and responsibilities of the public school superintendent.

EDUL 8130. Trends and Issues in Educational Leadership. 3 hours. Repeatable for maximum 9 hours credit.
Selected issues in educational leadership.

EDUL 8140. Schools as a Social System. 3 hours.
Schools viewed as one social system within the matrices of other social systems.

EDUL 8200. Educational Facilities Planning. 4 hours.
Principles, concepts, processes, and practices of planning and evaluating educational facilities.

EDUL 8210. Education Policy Analysis. 4 hours.
The context, causes, and consequences of education policy.

EDUL 8240. Group Development in the Schools. 3 hours.
Organizational development, group development, communications, role behaviors, leadership, goal setting, problem-solving, conflict reduction, and decision making.

EDUL 8250. Designing Educational Learning Environments. 2 hours.
The conceptual framework for employing modern technology in the design of schools.

EDUL 8260. Designing Outside Learning Environments for Schools. 2 hours.
Design of outdoor learning spaces for schools that fit curriculum specifications for playgrounds, nature trails, and other environments.

EDUL 8270. Managing School Design and Construction. 4 hours.
Planning and managing the design phase of schools, bidding, evaluating architectural designs, and managing the construction phase.

EDUL 8290. Politics of Education. 4 hours.
Local, state, federal, and nongovernmental political influences operating in the public schools.

EDUL 8390. School-Community Relations. 3 hours.
Building a sound school-community relations program involving teachers, parents, community members, industry, and government.

EDUL 8410. Administration and Supervision of Special Education. 4 hours.
The needs of exceptional children with particular emphasis on planning and implementing comprehensive special education programs, including a supervised field experience. Non-Traditional Format: Includes a supervised field experience.

EDUL 8990. Research Seminar in Educational Leadership. 1-6 hours. Repeatable for maximum 9 hours credit.
Research topics in educational leadership, including the preparation of a dissertation prospectus.

EDUL 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDUL 9040. Curriculum Theory and Policy. 4 hours.
Analysis and evaluation of competing curriculum theories and their implications for educational policy and practice.

EDUL 9170. Seminar in School Law. 2 hours. Repeatable for maximum 4 hours credit.
Specific areas of school law mutually agreed upon by the student and instructor.

EDUL 9220. Strategic Planning in Educational Leadership. 2 hours.
Strategic planning theory and concepts.

EDUL 9250. Supervision Theory. 2 hours.
Forces impinging upon education and the implications of these findings for supervision.

EDUL 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDUL 9620. Directed Doctoral Readings. 1-9 hours. Repeatable for maximum 9 hours credit.
Specialized study while enrolled for a doctoral degree under the direction of a major professor. Non-Traditional Format: Independent reading under the supervision of a major professor.

EDUL 9630. Critique of the Literature in Educational Leadership. 3 hours. Repeatable for maximum 9 hours credit.
Critical interpretation and evaluation of research and theoretical writing in the field of educational leadership.

EDUL 9700. Internship in Educational Leadership. 1-9 hours. Repeatable for maximum 9 hours credit.
A study-work program; class or conference study of problems encountered by the intern with remainder of time in application of principles to regular job. Non-Traditional Format: Internship under the supervision of faculty and practitioner.

Educational Psychology

Carl J Huberty, *Head*
Bonnie Cramond, *Graduate Coordinator, 542-4248*
(Aderhold Hall)

The department's primary missions are to prepare highly skilled professionals to serve in academe and other settings, and to enhance the theoretical and technical training of graduate students. For its own graduate students, the department provides preparation to those who would serve as school psychologists, as specialists in gifted/creative education, cognition and development, and as evaluation and research methodologists. Students in programs outside the department are provided with general training in learning and development and in quantitative and qualitative research methods.

The department offers programs of study leading to MEd, MA, EdS, EdD and PhD degrees. Program areas include applied cognition and development, gifted/creative education, research design in education, and school psychology. The department also includes the Torrance Center for Creative Studies and the School Psychology clinic.

The school psychology programs meet the applicable standards of the Georgia Department of Education, the National Association of School Psychologists, and the American Psychological Association.

Educational Psychology

EPSY 4000/6000. Independent Study in Educational Psychology. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study agreed upon by the student and sponsoring professor. Non-Traditional Format: Prior arrangement with professor is made for course work assignment and hours to be completed.

EPSY 4310/6310. Prevention and Remediation of Classroom Behavior Problems. 3 hours.
Prevention and management of classroom behavior problems using behavioral, humanistic, and motivational strategies. Focuses on prevention of problem behaviors through effective teaching and classroom design.

EPSY 6010. Foundations of Human Development for Education. 3 hours.
The interactive influences of biology, family, culture, and extended environment on children's emotional, social, and cognitive development during the school years. The implications of regularities and diversity in development for teaching and learning and on principles of educational practice to enhance development.

EPSY 6060. Foundations of Motivation for Education. 3 hours.
Current theory and research in motivation and motivational processes. The goal is to help students develop a foundational understanding of motivational constructs in the educational setting.

EPSY 6160. Study of Problems in Educational Psychology. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Special topics in educational psychology for master's level students.
Non-Traditional Format: Prior arrangement with professor is made for course work assignment and hours to be completed.

EPSY 6240. Child Psychopathology and Schooling. 3 hours.
Etiology and typical behaviors of children with major psychological and psychiatric disorders. Special emphasis is given to diagnostic criteria. DSM-IV and Special Education classification systems are presented. Impact of these disorders on schooling is a major focus.

EPSY 6300. Introduction to School Psychology and School-Based Services. 3 hours.
History, functions, duties, and responsibilities of psychologists in schools and other applied settings serving children, adolescents, and families relative to schooling issues. Roles of school psychologists in special education diagnosis and placement and other service delivery models in schools.

EPSY 6800. Foundations of Cognition for Education. 3 hours.
Prerequisite: EPSY 2020 or PSYC 1101.
Cognitive psychology as applied to education. Cognitive theories, models, and processes are applied to the teaching and learning of school skills and content areas. Processes such as attention, critical thinking, concept formation, language, memory, and problem solving are examined. Cognitive psychology principles are used to examine and refine instructional methods.

EPSY 6990. Master's Seminar in Educational Psychology. 1-6 hours. Repeatable for maximum 12 hours credit.
Seminar in educational psychology dealing with review of research projects and literature critiques. Non-Traditional Format: Lecture/discussion pertaining to selected educational psychology topics.

EPSY 7000. Master's Research. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EPSY 7060. Assessment of Gifted Children and Youth. 3 hours.
Prerequisite: ERSH 4600/6600.
Measurement of intellectual and creative abilities for identification and evaluation, with a focus on administering and scoring the Torrance Tests of Creative Thinking; assessment of abilities in special populations of the gifted.

EPSY 7100. Individual Assessment of Development. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: EPSY 7060.
The measurement of intellectual, academic, and adaptive behavior development, and screening.

EPSY 7110. Characteristics of Gifted Children and Youth. 3 hours.
Prerequisite: EPSY 2020.
Psychological characteristics of gifted children and youth, including studies of the lives of eminent persons, empirical studies of gifted children and youth today, and models for identifying gifted children.

EPSY 7160. Special Problems in Applied Cognition and Development. 3 hours. Repeatable for maximum 6 hours credit.
Selected issues in applied cognition and/or development of particular interest to educational practitioners in a seminar setting. Examples include uses of cooperative grouping, multicultural issues in cognition and learning, teaching metacognitive strategies, and techniques for motivating students.

EPSY 7200. Diagnosis of Social-Emotional Behavior in Education. 3 hours.
Administration, scoring, and interpretation of test materials designed to diagnose social and emotional adjustment problems in school children. Emphasis is given to the effects of social and emotional adjustment on adjustment in schools.

EPSY 7210. Multicultural Gifted and Talented Education. 3 hours.
Prerequisite: Permission of department.
Theories, research, and practice concerned with recognizing and developing the gifts and talents of children from diverse cultural backgrounds. Contemporary and historical perspectives will be provided on attributes of strength, self-perceptions of ability, family factors, environmental factors, and assessment tools and procedures.

EPSY 7230. Strategies and Materials for the Gifted. 3 hours.
Prerequisite: EPSY 7110 or permission of department.
Teaching strategies and related instructional materials for the gifted student.

EPSY 7250. Program and Curriculum Development for the Gifted. 3 hours.
Prerequisite: EPSY 7110.
Program planning for gifted students, including curriculum inventory and development, program, models, and evaluation.

EPSY 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

EPSY 7310. Consultation Processes in Educational Settings. 3 hours.
Problems in interprofessional communication among school psychologists, teachers, and parents. Social influence processes among these communicators are also discussed.

EPSY 7320. Individual Psychoeducational Intervention. 3 hours.
Individual and family treatment approaches to a number of child and adolescent psychopathologies common in schools, with emphasis primarily on cognitive-behavioral interventions.

EPSY 7650. Applied Project in Educational Psychology. 3 hours.
Functional study of a topic or problem in applied cognition and development, gifted and creative education, research methods and measurement, or school psychology. Non-Traditional Format: Independent work on a student-professor selected topic.

EPSY 7700. Infant and Preschool Assessment. 3 hours.
Prerequisite: EPSY 7100.
Administration, scoring, and interpretation of major measurement instruments used in early childhood. Special emphasis is placed on the educational implications of test findings.

EPSY 8020. Developmental Psychology and Instruction. 3 hours. 3 lab periods of 1 hour each per week.
Prerequisite: EPSY 6010.
The role that developmental psychology plays in the instructional process is examined from an advanced perspective. The focus is on the implications of psychological theories of development for improving teaching and learning in schools and other educational settings.

EPSY 8060. Advanced Seminar in Motivation for Education. 3 hours.
Prerequisite: EPSY 6010 or EPSY 6060.
Examines research on goals, expectancy, self-efficacy beliefs, and attributional beliefs. The focus will be on primary sources that are theory-based and research oriented.

EPSY(LING)(PSYC) 8130. Psycholinguistics. 3 hours.
Recent theoretical and experimental work on the psychological aspects of semantics, grammar, and discourse processes are surveyed. Language development is also considered.

EPSY 8160. Special Topics in Educational Psychology. 3 hours. Repeatable for maximum 12 hours credit.
Selected topics in applied cognition and development, gifted and creative education, research methods and measurement, or school psychology.

EPSY 8180. Psychology of Learning and Instruction. 3 hours.
Prerequisite: EPSY 6800.
The role that psychology plays in the instructional process. Advanced psychological theories and models are applied to learning in schools and other educational settings. The implications of current cognitive science research for improving teaching and learning at all developmental levels.

EPSY 8190. Achievement and Intelligence. 3 hours.
Prerequisite: EPSY 6800.
Examines theories of intelligence and achievement. Different theories, including psychometric, social, and genetic theories of the development of intelligence and achievement.

EPSY 8200. Learning Difficulties of Gifted Children and Youth. 3 hours.
Prerequisite: Permission of department.
Teaching gifted students with special needs, including dual exceptionalities, limited English proficiency, gender issues, cultural implications, and special needs because of age, type of giftedness, and degree of exceptionality.

EPSY 8220. Theories of Creativity. 3 hours.
Prerequisite: Permission of department.
Theory and research concerned with the creative process, creative problem solving, creative thinking abilities and their measurement, the creative personality, and environmental and classroom conditions that facilitate creative functioning and development.

EPSY 8240. Creativity: Instructional Procedures and Problem Solving Processes. 3 hours.
Prerequisite: Permission of department.
Basic theory and practice of creative thinking techniques, including ideation strategies and group problem solving techniques.

EPSY 8340. Child Neuropsychology. 3 hours.
Prerequisite: PSYC 6910.
Normal and abnormal development of the central nervous system; functional organization of the brain in children and adolescents; neuropsychological basis of developmental learning disabilities, ADHD, and other behavioral/psychiatric disorders; traumatic brain injury; pediatric neurological syndromes and diseases; neurodiagnostic and neuropsychological assessment procedures.

EPSY 8700. Practicum in Applied Cognition and Development. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Supervised practice in approved setting for conducting work relevant to applications of cognitive or developmental theory to education. Non-Traditional Format: Student will be doing independent practicum full-time.

EPSY 8710. Practicum in Gifted and Creative Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: EPSY 7060 and EPSY 7230 and EPSY 7250.
Supervised learning opportunities allowing students to test basic principles and techniques in gifted and creative education and to relate theory to practice in selected settings. Non-Traditional Format: Supervised experience in the field of gifted and creative education.

EPSY 8720. Practicum in School Psychology. 1-9 hours. Repeatable for maximum 40 hours credit.
Prerequisite: EPSY 6240 and EPSY 7100 and EPSY 7200 and EPSY 7320.
Supervised practicum in the school psychology clinic or other approved institutional settings. Non-Traditional Format: Students practice in applied settings as determined by the supervising psychologist.

EPSY 8750. Practicum in College Teaching. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Supervised practice in teaching at the college level. Students will develop skills in course organization, resource identification, lesson planning and delivery, student assessment, and techniques for course improvement. Non-Traditional Format: Supervised experiences in the field of educational psychology.

EPSY 8900. Internship in School Psychology. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: EPSY 7100 and EPSY 7200 and EPSY 7320.
Supervised practice in approved school psychology institutional settings. Non-Traditional Format: Practice

in a school or related setting supervised by a professional psychologist.

EPSY 8990. Doctoral Seminar in Educational Psychology. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Seminar for doctoral level students in educational psychology dealing with review of research projects and critiques of literature. Non-Traditional Format: Lecture/discussion pertaining to selected educational psychology topics.

EPSY 9000. Doctoral Research. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EPSY 9140. Individual Clinical Measurement Consultation. 3 hours.
Prerequisite: EPSY 7100 and EPSY 7110.
Prepares the advanced student in applied educational psychology to deliver indirect measurement and assessment services in educational settings. Sample measurement services include parent and teacher educational services, dimensional and actuarial classification schemes, screening, and other topics.

EPSY 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EPSY 9330. Advanced Psychological Interventions in Schools. 3 hours.
Prerequisite: EPSY 7320.
Critical interpretation and evaluation of research and theoretical writing related to selected psychoeducational interventions.

EPSY 9510. Topics in School Psychology. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Critical evaluation of literature, research, policy, and practice relating to specific issues in school psychology.

EPSY 9620. Professional Practice of Psychology in Education. 3 hours.
Prerequisite: EPSY 6300.
Familiarizes the advanced students in applied educational psychology with professional practice issues such as licensure/certification, business planning, ethical and legal issues, interdisciplinary collaboration, and professional identity development. An emphasis will be placed on the integration of science and practice.

EPSY 9630. Critique of Literature in Educational Psychology. 3 hours.
Prerequisite: ERSH 4200/6200.
Critical interpretation and evaluation of research and theoretical writing in educational psychology.

EPSY 9700. Internship in Applied Cognition and Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
A study-work program in applied cognition and development. Class or conference study of problems encountered by the intern with remainder of time in application of principles to professional practice. Non-Traditional Format: Student will be doing out-of-class work.

EPSY 9710. Internship in Gifted and Creative Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Advanced experiences providing students with opportunities to refine competencies related to innovative and experimental application of principles and techniques in selected settings under the supervision of gifted and creative education faculty. Non-Traditional Format: Supervised experience in the field of gifted and creative education.

EPSY 9720. Advanced Internship in School Psychology. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: EPSY 6240 and EPSY 7100 and EPSY 7200 and EPSY 7320.
Supervised practice in approved school psychology institutional settings. Non-Traditional Format: Practice in a school or related setting supervised by a professional psychologist.

Educational Research and Measurement

ERSH 4200/6200. Methods of Research in Education. 3 hours.
Diverse research approaches used in behavioral science settings, including critical review and interpretation of published research.

ERSH 4600/6600. Applied Educational Assessment. 3 hours.
Development, administration, scoring, analysis, and interpretation of classroom educational assessments used in the service of instruction and accountability objectives. Traditional as well as current approaches (portfolios, performance assessments). Although classroom approaches are emphasized, standardized measures are also studied.

ERSH 6300. Applied Statistical Methods in Education. 3 hours.
Prerequisite: ERSH 4200/6200.
Techniques for describing and summarizing data for educational research studies. Applications of the stan-

dard normal distribution and the use and interpretation of standard scores. Inferential statistics for one and two population studies including means, proportions, and correlations.

ERSH 7250. Educational Program and Project Evaluation. 3 hours.
Prerequisite: ERSH 4600/6600 and ERSH 6300.
Innovative or ongoing educational programs, projects, or curricula. Consideration is made of goal specification, data collection, standard setting, and reporting. Interdisciplinary points of view are stressed.

ERSH 7400. Qualitative Research in Education. 3 hours.
Prerequisite: Permission of department.
Foundations of qualitative design: history, philosophy, nature, types, examples, and assessment. Reading and evaluating reports of qualitative research in education and identifying methodological issues.

ERSH 7600. Construction of Educational Measuring Instruments. 3 hours.
Prerequisite: ERSH 4600/6600 and ERSH 6300.
Hands-on experience in instrument development, especially in the affective domain. Scaling methods will be considered in addition to actual item and reliability analyses. Techniques such as Likert, Thurstone, and Osgood's semantic differential method.

ERSH 7800. Topics in Educational Research. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: ERSH 6300.
Special topics in educational research focusing on methodological applications. Topics include understanding standardized tests, policy issues in educational assessment, using large databases, computer application in educational assessment and data analysis, large scale school assessment programs.

ERSH 8310. Applied Analysis of Variance Methods in Education. 3 hours.
Prerequisite: ERSH 6300.
Experimental design and the analysis of data from experiments, including orthogonal analysis of variance for single and multifactor designs, randomized block, repeated measures, and mixed models. Computer applications and the reporting results using APA style.

ERSH 8320. Applied Correlation and Regression Methods in Education. 3 hours.
Prerequisite: ERSH 8310.
Nonexperimental and quasi-experimental research studies, including simple and multiple regression techniques, nonorthogonal analysis of variances, correlation techniques, and analysis of covariance.

ERSH 8350. Multivariate Methods in Education. 3 hours.
Prerequisite: ERSH 8320.
Discriminant analysis, multivariate analysis of variance, canonical correlation analysis, and cluster analysis. Relating research questions to methods, conducting computer analyses, interpreting computer printouts, and critiquing analysis reports.

ERSH 8410. Qualitative Data Collection in Education. 3 hours.
Prerequisite: ERSH 7400.
Disciplinary origins and cross-disciplinary uses, variations, applications, and evaluations of methods of collecting qualitative data. Choice of methods in the overall construction of qualitative designs, practice in selecting and collecting qualitative data for educational research, and examination of naturalistic data in the educational literature.

ERSH 8420. Qualitative Data Analysis in Education. 3 hours.
Prerequisite: ERSH 8410 or permission of department.
Approaches to analysis in the design of qualitative research studies. Procedures are surveyed and compared from a range of social science and professional disciplines for use in studying educational problems and topics.

ERSH 8510. Theories in Qualitative Design in Education. 1-3 hours. 1-3 lab periods of 2 hours each per week.
Prerequisite: ERSH 8410 or permission of department.
Theories in qualitative research design and conduct. Theories commonly used in qualitative approaches to educational problems and issues; sociocultural, psychosocial, critical, feminist, and postmodern theories.

ERSH 8520. Interviewing in Educational Research. 1-3 hours. 1-3 lab periods of 2 hours each per week.
Prerequisite: ERSH 8410 or permission of department.
Conceptual framework for interviewing, approaches associated with various disciplines and schools of inquiry, forms and structures interviewing takes, the criteria developed to assess interviews, and interviewing practice across a variety of situations. Recording, analyzing, and reporting interview data, ethical and relationship issues, and research on interviewing methods.

ERSH 8530. Case Study Research in Education. 1-3 hours. 1-3 lab periods of 2 hours each per week.
Prerequisite: ERSH 8410 or permission of department.
Case study as a research design. Topics are types of case studies, defining the case, site and sample selection, data collection methods, within-case and cross-case analysis, and writing case reports.

ERSH 8540. Participant Observation in Educational Research. 1-3 hours. 1-3 lab periods of 2 hours each per week.
Prerequisite: ERSH 8410 or permission of department.
Qualitative approaches to observation in education: participant and nonparticipant observation and ethnographic, ethnological, and field study. Choices of such approaches in qualitative design, their development, application, and evaluation, are compared and selected versions are practiced.

ERSH 8610. Educational Measurement Theory. 3 hours.
Prerequisite: ERSH 8320.
Theoretical basis of classical test theory: statistical treatment of reliability and validity; emphasis on ap-

plication and interpretation of results through computer analyses.

ERSH 8620. Item Response Theory. 3 hours.
Prerequisite: ERSH 8610.
Models, statistical methods, and computer applications of item response theory (IRT) to educational and psychological test data.

ERSH 8630. Applications of Item Response Theory. 3 hours.
Prerequisite: ERSH 8620.
Applications of item response theory (IRT) to practical testing problems, including test equating, differential item functioning, computerized adaptive testing, and test construction. Dichotomous and polytomous item response theory models with strong emphasis on computer applications.

ERSH 8650. Generalizability Theory. 3 hours.
Prerequisite: ERSH 8610.
Application of generalizability theory to educational problems; emphasis on conducting and interpreting computer analyses and critiquing the research literature using generalizability theory; and use of generalizability for evaluating performance assessments.

ERSH 8700. Practicum in Educational Research. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: ERSH 8320.
Supervised experiences in educational research focusing on the planning, implementation, analysis, and response to scientific inquiries. Non-Traditional Format: Supervised experiences in the field of educational research.

ERSH 8750. Exploratory and Confirmatory Factor Analysis. 3 hours.
Prerequisite: ERSH 8610.
Traditional exploratory factor analysis procedures and confirmatory factor analysis via covariance modeling. Relating educational measurement questions to conducting and interpreting computer analysis; critiquing research using exploratory/confirmatory factor analysis and research on the models themselves.

ERSH 8760. Structural Equation Modeling. 3 hours.
Prerequisite: ERSH 8750.
Structural equation modeling with observed and latent variables. Relating educational research problems to conducting and interpreting computer analysis; critiquing research using structural equation models and research on structural equation models.

ERSH 9210. Quantitative Design in Education. 3 hours.
Prerequisite: ERSH 8310.
Philosophical, ethical, and procedural aspects of experimental and nonexperimental research in education. Synthesizing and integrating previous research studies, designing quantitative inquiries, measuring outcomes and analyzing data.

ERSH 9700. Internship in Educational Research. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ERSH 8320.
Supervised experiences outside of the department in educational research; focusing on the planning, implementation, analysis, and reporting of scientific inquiries. Non-Traditional Format: Supervised experiences in the field of educational research.

ERSH 9800. Issues in Qualitative and Quantitative Research. 1-3 hours. Repeatable for maximum 12 hours credit. 1-3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Current issues in qualitative and quantitative research methods. Methodological, substantive, and theoretical literature in the areas of measurement, qualitative design, and quantitative data analysis.

Elementary Education

Brenda H. Manning, *Head*
Judith C. Reiff, *Graduate Coordinator, 542-4244*
(Aderhold Hall)

Early Childhood Education

EDEC 6000. Special Problems in Early Childhood Education. 1-3 hours. Repeatable for maximum 6 hours credit.
Library investigation or the collection and analysis of original data pertinent to a given problem. Non-Traditional Format: Independent study.

EDEC 6990. Research Seminar in Early Childhood Education. 3 hours.
Literature and research related to early childhood education. Emphasis will be placed on locating, evaluating, and interpreting research.

EDEC 7010. Trends and Issues in Early Childhood Education. 3 hours.
Current and past trends and issues in the education of children in prekindergarten through grade five.

EDEC 7020. Theory and Curriculum in Early Childhood Education. 3 hours.
Theory and curricula in early childhood education.

EDEC 7050. Teaching in Elementary Schools (P-5). 3 hours.
Use of problem-solving techniques in teaching and to develop a repertoire of strategies.

(EDEC)EDMS 7060. Service Learning. 3 hours.
History, rationale, research, methodology, and outcomes of service learning. Students will conceptualize, plan, and participate in a service learning project. Emphasis is on how service can be incorporated into curriculum with a primary focus on learning.

EDEC 7110. The Educational Role of Play in Early Childhood Education. 3 hours.
The cognitive and affective aspects of the play of children in prekindergarten through grade five. Techniques for facilitating children's play.

EDEC(EDMS) 7120. Children's Social Lives. 3 hours.
Race, gender, and class as explanatory frameworks for incidents in young children's everyday lives and approaches for culturally responsive teaching.

EDEC(EDMS) 7130. Teaching Styles in the Elementary Classroom. 3 hours.
Theoretical foundations of selected teaching styles, including the planning and developing of teaching strategies which reflect these styles.

EDEC 7160. Instructional Strategies for Early Childhood Education. 3 hours.
Curricular approaches and research on instructional strategies to meet the needs of children in prekindergarten through grade five.

EDEC 7170. Evaluation of the Elementary School. 3 hours.
Components of evaluation, appropriate evaluation techniques, procedures, collection, and utilization of research data for improving elementary schools.

EDEC 7420. Organization and Management of Early Childhood Classrooms. 3 hours.
Principles and practices that are germane to organizing and operating the classroom for learners in prekindergarten through grade five. Students will acquire knowledge of important theoretical approaches in this area as well as practical skills applicable to their work with young children.

EDEC 7460. Internship in Teaching Early Childhood Education. 3-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
A prekindergarten through grade five classroom teaching experience under the direction of a teacher and an early childhood education faculty member. Non-Traditional Format: Student teaching/field based in schools.

EDEC 7650. Literature Review in Early Childhood Education. 3 hours.
Preparation of a literature review on a topic of interest related to early childhood education.

(EDEC)EDMS 8010. Teacher Action Research. 3 hours.
Prerequisite: Permission of department.
Teacher action research at the classroom, team, school, and inter-school levels.

EDEC(EDMS) 8020. Self-Instruction for Classroom Processes. 3 hours.
Prerequisite: EDMS 7080.
Theoretical and research backgrounds of self-instruction (SI) to improve memory, comprehension, problem-solving, and behavioral self-control of both elementary (K-8) teachers and students. Includes teacher introspection, classroom strategies, and management.

EDEC(EDMS) 8050. Theory and Research on Teaching. 3 hours.
Research on teaching, including teachers' thought processes, students' thought processes, effective teacher behavior, classroom organization, and classroom discourse.

(EDEC)EDMS 8070. Research and Perspectives on Teacher Education: PreK-Grade8. 3 hours.
The history of teacher education, the process of becoming a teacher, and approaches to teacher education.

EDEC(EDMS) 8100. Theories and Research on Teachers' Thinking. 3 hours.
Knowledge and self-regulation of teachers' thinking about their own cognitive, social, emotional, and physical development in classrooms. Theoretical considerations, relevant research, and applied practice.

EDEC(EDMS) 8110. Methods for Observing Children in Schools. 3 hours.
Process of designing and conducting observational methods projects. Observing children in natural habitats, such as school and community. Topics include entering the field, forming categories, sampling and recording rules, measurement, reliability, and validity.

EDEC(EDMS) 8120. Social Constructivist Approaches to Understanding Classroom Motivation. 3 hours.
Constructs of motivation; how classroom cultures, ways of knowing, particular pedagogies, and assessment practices affect student motivation; qualitative methods accessing perspectives on motivation.

EDEC(EDMS) 8140. Cross-Cultural Perspectives on Learning Environments for Children and Young Adolescents. 3 hours.
Cross-cultural perspectives on such topics as the social construction of learning, cultural perspectives on development, and institutionalized patterns of instruction drawn from developed and developing countries.

EDEC(EDMS) 8150. Research and Theory in Family-School-Community Interactions. 3 hours.
Interactive relationships among families, schools, and communities from the interdisciplinary perspectives of anthropology, education, sociology, history, political science, and psychology.

EDEC(EDMS) 8180. Research in Multicultural Teacher Education. 3 hours.
Multicultural teacher education research, theories, and practices. Opportunities to construct understandings of the political and economic context within which decisions are made, the effect of values on multiple realities, the dominant forces in society, and the impact of culture on the individual in teacher education contexts.

EDEC(EDMS) 8190. Mentoring in Learning to Teach. 3 hours.
Description, analysis, and appraisal of mentoring for pre-service and in-service teachers, and an examina-

tion of content, processes, roles, and responsibilities in interactions of mentors and teachers of prekindergarten through grade eight.

EDEC 8200. Early Educational Intervention for Young Children Placed At-Risk. 3 hours.
Prerequisite: EDEC 7020.
Analysis of recent research, theoretical developments, and social issues relevant to the determinants of the at-risk classification of young children and their families. Child, family, and societal roles in early educational intervention are examined with a focus on the efficacy of particular early education intervention models.

EDEC 8990. Research Seminar in Early Childhood Education. 2 hours. Repeatable for maximum 4 hours credit.
Seminars on topics related to early childhood education. Non-Traditional Format: Doctoral/research seminars.

EDEC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDEC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDEC 9600. Educational Research in Early Childhood Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent research in the area of early childhood education under the direction of faculty. Non-Traditional Format: Doctoral/independent research projects.

EDEC 9630. Critique of Educational Literature in Early Childhood Education. 3 hours.
Prerequisite: ERSH 6300 and ERSH 7400.
Interpretation and evaluation of research and theoretical writing in early childhood education. Non-Traditional Format: Also offered as individualized critiques of literature.

EDEC 9800. University Teaching Practicum in Early Childhood Education. 1-9 hours.
University teaching experience under the direction of a tenured faculty member noted for outstanding university teaching. Non-Traditional Format: Students apprentice with an exemplary university teacher to learn first-hand the theory, research, and practice particular to University teaching.

Elementary Education

EDEL 8990. Research Seminar in Elementary Education. 1-6 hours. Repeatable for maximum 12 hours credit.
Seminars on topics related to elementary education. Non-Traditional Format: Doctoral/research seminars.

EDEL 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDEL 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDEL 9600. Educational Research in Elementary Education. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent research in elementary education under the direction of faculty. Non-Traditional Format: Doctoral/independent study.

EDEL 9630. Critique of Educational Literature in Elementary Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ERSH 4200/6200.
Critical interpretation and evaluation of research and theoretical writing in elementary education. Non-Traditional Format: Also offered as individualized critiques of literature.

Middle School Education

EDMS 6000. Special Problems in Middle School Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Independent study of educational problems related to middle school education. Non-Traditional Format: Individual/special projects.

EDMS 6990. Research Seminar in Middle School Education. 3 hours.
Prerequisite: Permission of department.
Literature and research related to the middle school.

EDMS 7030. The Middle School. 3 hours.
Research supporting the concept of a separate organization and program for youngsters ten to fourteen years of age, types of curricular plans for the middle school, aspects of teaching in the middle school, and the organization and staff of the middle school.

EDMS 7050. Teaching Young Adolescents. 3 hours.
Examines literature about research and practice to develop a repertoire of teaching strategies for young adolescents.

EDMS(EDEC) 7060. Service Learning. 3 hours.
History, rationale, research, methodology, and outcomes of service learning. Students will conceptualize, plan, and participate in a service learning project. Emphasis is on how service can be incorporated into curriculum with a primary focus on learning.

EDMS 7080. Curriculum Planning for the Middle School. 3 hours.
Curriculum development based on the unique nature of the middle school learner and content appropriate to physical, intellectual, and emotional development.

EDMS 7090. Instructional Strategies for the Middle School. 3 hours.
Instructional strategies to meet unique needs of early adolescents, curricular approaches as related to instructional strategies and program development, major curricular models, and research on instructional strategies for the middle school.

EDMS 7100. Evaluation of the Middle School. 3 hours.
Needs for evaluation of middle school, components of evaluation, types of appropriate evaluation techniques, procedures, and utilization of research data for improving middle schools.

(EDMS)EDEC 7120. Children's Social Lives. 3 hours.
Race, gender, and class as explanatory frameworks for incidents in young children's everyday lives and approaches for culturally responsive teaching.

(EDMS)EDEC 7130. Teaching Styles in the Elementary Classroom. 3 hours.
Theoretical foundations of selected teaching styles, including the planning and developing of teaching strategies which reflect these styles.

EDMS 7460. Internship in Middle School. 1-9 hours.
Prerequisite: Permission of department.
Supervised professional laboratory experience in a selected middle school under the direction of a faculty member. Non-Traditional Format: Student teaching/field based in schools.

EDMS 7650. Literature Review in Middle School Education. 3 hours.
Prerequisite: EDMS 6990.
Preparation of a literature review on a topic related to middle school education.

EDMS(EDEC) 8010. Teacher Action Research. 3 hours.
Prerequisite: Permission of department.
Teacher action research at the classroom, team, school, and inter-school levels.

(EDMS)EDEC 8020. Self-Instruction for Classroom Processes. 3 hours.
Prerequisite: EDMS 7080.
Theoretical and research backgrounds of self-instruction (SI) to improve memory, comprehension, problem-solving, and behavioral self-control of both elementary (K-8) teachers and students. Includes teacher introspection, classroom strategies, and management.

(EDMS)EDEC 8050. Theory and Research on Teaching. 3 hours.
Research on teaching, including teachers' thought processes, students' thought processes, effective teacher behavior, classroom organization, and classroom discourse.

EDMS(EDEC) 8070. Research and Perspectives on Teacher Education: PreK-Grade8. 3 hours.
The history of teacher education, the process of becoming a teacher, and approaches to teacher education.

(EDMS)EDEC 8100. Theories and Research on Teachers' Thinking. 3 hours.
Knowledge and self-regulation of teachers' thinking about their own cognitive, social, emotional, and physical development in classrooms. Theoretical considerations, relevant research, and applied practice.

(EDMS)EDEC 8110. Methods for Observing Children in Schools. 3 hours.
Process of designing and conducting observational methods projects. Observing children in natural habitats, such as school and community. Topics include entering the field, forming categories, sampling and recording rules, measurement, reliability, and validity.

(EDMS)EDEC 8120. Social Constructivist Approaches to Understanding Classroom Motivation. 3 hours.
Constructs of motivation; how classroom cultures, ways of knowing, particular pedagogies, and assessment practices affect student motivation; qualitative methods accessing perspectives on motivation.

(EDMS)EDEC 8140. Cross-Cultural Perspectives on Learning Environments for Children and Young Adolescents. 3 hours.
Cross-cultural perspectives on such topics as the social construction of learning, cultural perspectives on development, and institutionalized patterns of instruction drawn from developed and developing countries.

(EDMS)EDEC 8150. Research and Theory in Family-School-Community Interactions. 3 hours.
Interactive relationships among families, schools, and communities from the interdisciplinary perspectives of anthropology, education, sociology, history, political science, and psychology.

(EDMS)EDEC 8180. Research in Multicultural Teacher Education. 3 hours.
Multicultural teacher education research, theories, and practices. Opportunities to construct understandings of the political and economic context within which decisions are made, the effect of values on multiple realities, the dominant forces in society, and the impact of culture on the individual in teacher education contexts.

(EDMS)EDEC 8190. Mentoring in Learning to Teach. 3 hours.
Description, analysis, and appraisal of mentoring for pre-service and in-service teachers, and an examination of content, processes, roles, and responsibilities in interactions of mentors and teachers of prekindergarten through grade eight.

EDMS 8990. Research Seminar in Middle School Education. 1-6 hours. Repeatable for maximum 12 hours credit.
Seminars on topics related to middle school education. Non-Traditional Format: Doctoral/research seminars.

EDMS 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDMS 9030. Young Adolescents and Schools. 3 hours.
Adolescence as a historical and cultural concept, research on middle school practices and students' perspectives of schooling, and adolescents' experiences in school and society.

EDMS 9080. Theory and Practice in Middle Grades Curriculum. 3 hours.
Current curricular practices in the middle grades, theories on curriculum development, and research on curriculum implementation.

EDMS 9090. Socio-Cultural Issues in Early Adolescence. 3 hours.
Social construction of adolescence from a historical and cultural viewpoint, including cross-cultural research on the dynamics of adolescent development.

EDMS 9120. Comparative and International Perspectives in Middle Grades Education. 3 hours.
Common issues and problems in the education of young adolescents and the current predicaments of adolescent education.

EDMS 9150. School Reform and Young Adolescents. 3 hours.
School reforms and shifts in educational paradigms related to young adolescent development and the schooling of young adolescents from the 1870s to the present.

EDMS 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDMS 9600. Educational Research in Middle School Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Independent research in middle school education under the direction of faculty. Non-Traditional Format: Doctoral/independent research projects.

EDMS 9630. Critique of Literature in Middle School Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ERSH 6300 and ERSH 7400.
Interpretation and evaluation of research and theoretical writing in middle school education. Non-Traditional Format: Also offered as individualized critiques of literature.

Health and Human Performance

Within the School, graduate study is offered in the following areas: exercise science (MEd, EdD, PhD), health promotion and behavior (MEd, PhD), physical education (MEd, EdS, EdD, PhD), and recreation and leisure studies (MEd, EdD). Students may pursue a master's degree with the thesis option through the Master of Arts in education degree.

Exercise Science

Kirk J. Cureton, *Head*
Ted A. Baumgartner, *Graduate Coordinator, 542-4424*
(Ramsey Student Center)

EXRS 4200/6200-4200L/6200L. Biomechanics I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and (PHYS 1111-1111L or PHYS 1211-1211L) and permission of school; Graduate level only: Permission of school.
Mechanical principles to human movement, equipment design, and injury.

EXRS 4300/6300. Exercise Epidemiology. 3 hours.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Health-related aspects of exercise, physical activity, and physical fitness from the perspective of epidemiology. Biological mechanisms for healthy adaptations to physical activity and the behavioral determinants of exercise participation.

EXRS 4310/6310. Physical Fitness Programs. 3 hours.
Prerequisite: Permission of school.
Physical fitness programs for adults and special populations. Topics include program goals and objectives, principles and methods of physical fitness development and testing, evaluation of existing programs, and administrative and programming considerations.

EXRS 4320/6320. Physical Activity and Aging. 3 hours.
Prerequisite: EXRS 4630/6630-4630L/6630L and permission of school.
Biological and psychological effects of aging in relation to physical activity and exercise.

EXRS 4400/6400. Exercise and Sport Psychology. 3 hours.
Prerequisite: Undergraduate level only: PSYC 1101 and CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Effects of participating in exercise and sport on psychological traits and states. Cognitive and neurobiological mechanisms and psychological limitations to athletic performance.

EXRS 4630/6630-4630L/6630L. Exercise Physiology I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Physiological effects of human physical activity. Neuromuscular, cardiovascular, respiratory, metabolic, hormonal, and thermal responses and adaptations to exercise.

EXRS 4690/6690-4690L/6690L. Exercise Physiology II. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: EXRS 4630/6630-4630L/6630L and permission of school; Graduate level only: Permission of school.
Mechanics, energetics, and motor unit recruitment during skeletal muscle contraction; regulation of energy metabolism during exercise; mechanisms underlying oxygen delivery to muscle during exercise.

EXRS 6000. Problems in Exercise Science. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Independent study in exercise science. Non-Traditional Format: Variable hours established by faculty.

EXRS 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EXRS 7140. Current Problems in Exercise Science. 1-3 hours. Repeatable for maximum 6 hours credit.
Intensive study of a timely problem in exercise science. Non-Traditional Format: Variable hours established by instructor.

EXRS(HPRB)(PEDS)(RLST) 7150. Research Methods in Health and Human Performance. 3 hours.
Application of research to exercise science, health promotion and behavior, physical education, and recreation and leisure studies, with experience in developing techniques of gathering, analyzing, and reporting data.

EXRS 7160. Advanced Measurement in Exercise Science. 3 hours.
Prerequisite: Permission of school.
Current tests in exercise science; principles of test construction for physical performance, knowledge, and behavior tests; tools for evaluation of tests and the use of laboratory instruments in performance measurement.

EXRS 7180. Measuring Psychological Constructs. 3 hours.
Prerequisite: Permission of school.
Scale construction and methods for assessing psychological constructs of relevance to exercise scientists, such as anxiety, body image, depression, mood, perceived exertion, personality, pain, and self-concept.

EXRS 7210. Motor Learning and Control. 3 hours.
Analysis of the scholarly literature on the learning, memory, and control of motor skills with appropriate laboratory experiences.

EXRS 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

EXRS 7310-7310L. Adult Fitness and Cardiac Rehabilitation. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of school.
Knowledge and skills required to conduct adult fitness, cardiac rehabilitation, and other clinical exercise programs. Special emphasis is placed on graded exercise testing with electrocardiogram interpretation as it relates to exercise prescription.

EXRS 7330-7330L. Metabolic and Cardiorespiratory Aspects of Exercise. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of school.
Metabolic and cardiovascular-respiratory responses to exercise and adaptations to training, with emphasis on applications to human physical performance and fitness.

EXRS 7340-7340L. Exercise Psychology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Relation of physical activity and physical fitness to stress and mental health, explanatory models of exercise patterns, and exercise psychology assessment experiences.

EXRS 7350. Biomechanics of Human Movement. 3 hours.
Prerequisite: Permission of school.
Laws and principles of mechanics applied to human movement.

EXRS 7800. Practicum in Exercise Science. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Supervised participation in programs or research in exercise science. Non-Traditional Format: Contact hours established by supervisor.

EXRS 8200. Meta-Analysis in Health and Human Performance. 3 hours.
Prerequisite: ERSH 8310 or permission of school.
Statistical techniques for the quantitative analysis and review of a scientific literature. Meta-analytic studies in the health and human performance literature are critiqued.

EXRS 8210. Advanced Topics in Motor Learning and Control. 3 hours.
Prerequisite: EXRS 7210 or permission of school.
Reading, discussion, and laboratory investigation of special topics in motor learning and control.

EXRS 8300-8300L. Advanced Topics in Exercise Physiology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 7330-7330L or permission of school.
Reading, discussion, and laboratory investigation of special topics in exercise physiology.

EXRS 8310-8310L. Biochemistry of Exercise. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 7330-7330L.
Reading, discussion, and laboratory investigation of the current topics in the biochemistry of exercise, including contractile protein energetics, mechanisms regulating chemical energy stores and substrate fluxes, and regulation of protein metabolism.

EXRS 8320. Evaluation of Human Neuromuscular Function. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: [EXRS 7330-7330L and (VPHY 6090 or PHRM 6400)] or permission of school.
Reading and laboratory experiences of the physiological basis for evaluation of human neuromuscular function as it relates to physical performance. Emphasis will be on dynamic, isometric, and isovelocity muscle actions evoked by voluntary effort or transcutaneous electrical stimulation.

EXRS 8340. Seminar in Exercise Psychology. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: (EXRS 7340-7340L and PSYC 6910) or permission of school.
Reading and discussion of current topics of investigation in the psychological and behavioral aspects of exercise and health-related physical fitness. Non-Traditional Format: Variable hours established by instructor.

EXRS 8350. Methods in Biomechanics. 1-3 hours. Repeatable for maximum 7 hours credit. 1 lab period of 1-3 hours each per week.
Prerequisite: EXRS 7350 or permission of school.
Methods in human movement biomechanics, including electromyography, motion measurement, kinetic analyses, modeling, and anthropometry.

EXRS 8410. Neuromuscular Mechanisms in Exercise. 3 hours.
Prerequisite: [EXRS 7330-7330L and (PHRM 6400 or VPHY 6090)] or permission of school.
Reading and discussion of current topics of investigation in the relationship between the nervous system and skeletal muscle as it pertains to exercise and training, with emphasis on neural regulation of muscle phenotype, muscle force and shortening velocity.

EXRS 8420. Oxygen Transport From Lung to Muscle During Exercise. 3 hours.
Prerequisite: [EXRS 7330-7330L and (VPHY 6090 or PHRM 6500)] or permission of school.
Reading and discussion of the mechanisms that regulate oxygen transport from the lung to muscle mitochondria at rest and during exercise. Focus will be on potential limiting factors in the transport system under different exercise stresses and the influence of training on these limiting steps.

EXRS 8430. Autonomic Adjustments to Physical Stress. 3 hours.
Prerequisite: [EXRS 7330-7330L and (VPHY 6090 or PHRM 6500)] or permission of school.
Reading, discussion, and laboratory experiences of the mechanisms that regulate autonomic adjustments to physical stress. Focus will be on the afferent, central, and efferent pathways of neural reflexes engaged during exercise.

EXRS 8990. Research Seminar in Exercise Science. 1-2 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Methods and current research in exercise science. Non-Traditional Format: Variable hours established by instructor.

EXRS 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a doctoral degree under the direction of faculty. Non-Traditional Format: Independent research under the direction of a faculty member.

EXRS 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of school.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EXRS 9630. Directed Reading in Exercise Science. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Critical evaluation of reported research on a specialized topic in exercise science. Non-Traditional Format: Expectations and contact hours estabished by faculty supervisor.

Health Promotion and Behavior

Stuart W. Fors, *Acting Head*
Mark G. Wilson, *Graduate Coordinator, 542-4364*
(Ramsey Student Center)

HPRB 4000/6000. Special Problems in Health Promotion and Behavior. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study of selected topics. Non-Traditional Format: Students develop a proposal for a learning experience that is not normally available to them in a regular department course. The amount of work and/or the depth of inquiry depends on the number of credits the student desires. The proposal must be approved by the faculty member who is directing the project and by either the undergraduate or graduate coordinator. Offered on a regular basis.

HPRB 4450/6450. Occupational Safety. 3 hours.
The specific areas and the broad scope in methods, materials, and problems in occupational safety programming with special emphasis on organization and implementation of injury prevention and control techniques.

(HPRB)SPCM 4610/6610. Health Communication. 3 hours.
Communication about health with physicians and other providers, within support groups and health care organizations, and by public figures, groups, and organizations.

HPRB 5060/7060. Educational Strategies in Human Sexuality. 3 hours.
Theory and practice of sexuality education; basic issues, philosophy, and guiding principles; legal implications; needs, justification, and objectives; curriculum critique for school and community programs; content knowledge, resource materials; acceptable methods to approach controversial topics.

HPRB 5160/7160. Special Topics in Health Promotion and Behavior. 1-3 hours. Repeatable for maximum 6 hours credit.
Selected health problems or issues, with emphasis on epidemiology, etiology, and the development and evaluation of prevention measures. Non-Traditional Format: Format will generally be lecture and discussion.

HPRB 5210/7210. The Effects of Drug Use and Abuse. 3 hours.
Social, moral, psychological, and physiological causes and effects of drug use and abuse. Individual, family, and community factors related to prevention and treatment. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HPRB 6040. Use of Epidemiologic Data in Health Promotion and Behavior. 3 hours.
The etiology of various health problems, with focus on using this knowledge for planning preventive programs. The principles, uses, techniques, and language of epidemiology and epidemiological method.

HPRB 6420. Health Education in Early Childhood Education. 2 hours.
Contemporary issues and trends in curriculum and methods for Early Childhood Health Education. Emphasis is on the role of the classroom teacher in the comprehensive school health program.

HPRB 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HPRB 7070. Planning and Evaluation in Health Education and Health Promotion. 3 hours.
Planning, implementation, and evaluation of health education and health promotion programs in a variety of community settings.

(HPRB)EXRS(PEDS)(RLST) 7150. Research Methods in Health and Human Performance. 3 hours.
Application of research to exercise science, health promotion and behavior, physical education, and recreation and leisure studies, with experience in developing techniques of gathering, analyzing, and reporting data.

HPRB 7170. Aging and Health. 3 hours.
Health promotion, risk reduction, health maintenance, and health problems of the elderly, from an individual, community, cultural, and policy perspective.

HPRB 7200. Women in Health and Illness. 3 hours.
Health and illness concerns of women throughout the life cycle, including the social, political, and cultural contexts of health and health care.

HPRB 7270. Resource Development and Program Implementation in Health Promotion and Education. 3 hours.
Prerequisite: HPRB 7070.
Managing human resources and implementing health education and health promotion programs.

HPRB 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

HPRB 7370. Social Marketing of Health: Theory and Process. 3 hours.
Prerequisite: HPRB 7070 or permission of department.
Social marketing theory and process applied to the marketing of health concepts, attitudes, and behaviors.

HPRB 7400. Worksite Health Promotion. 3 hours.
Prerequisite: HPRB 7070 or permission of department.
The interaction between human health and the work environment. The design, implementation, and evaluation of prevention and health promotion programs in business and industry.

HPRB 7460. Student Teaching in Health Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
In-school experience for graduate students who are completing initial teacher certification requirements in health education. Non-Traditional Format: Graduate level student teaching experience for students who do not have an undergraduate degree and certification in School Health Education.

HPRB 7560. Field Experience in Health Promotion and Behavior. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Practical experience in community or corporate health promotion/education through placement in an appropriate health agency, hospital, or worksite setting. Non-Traditional Format: Graduate-level field experience in community health, corporate wellness, or safety management. Required of students who do not have either an undergraduate field experience or equivalent work experience.

HPRB 7650. Applied Project in Health Promotion and Behavior. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Functional study of a topic that is related to the student's career objectives. Non-Traditional Format: Students propose and implement a health promotion/education project and write up the results. This is not a mini-thesis, but the "real world" application of knowledge acquired during the master's degree program.

HPRB 7700. Analysis and Prevention of Injury and Violence. 3 hours.
Prerequisite: (HPRB 6040 and HPRB 7070) or permission of department.
Causes and consequences of injury and violence, with emphasis on prevention research and program development.

HPRB 7920. Health Behavior. 3 hours.
Prerequisite: (HPRB 6040 and HPRB 7070) or permission of department.
Behavioral science theories and models used in health promotion and health education.

HPRB 8000. Directed Study in Health Promotion and Behavior. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Individual study under the direction of a department faculty member. Non-Traditional Format: Doctoral level independent study of an issue that applies to the

student's research interests. Must be approved in advance by the faculty mentor, the major professor and the department graduate coordinator. The number of credits determines how extensive the final paper is to be.

HPRB 8410. Human Ecology of Health and Illness. 3 hours.
Prerequisite: Permission of department.
Major causes of premature disability and death and the relationship of health-related behavior to these problems. Challenges related to hard-to-reach populations, social isolation, economics, health policy, and lack of trust.

HPRB 8420. Theory and Research in Health Behavior. 3 hours.
Prerequisite: (HPRB 7920 and HPRB 8410) or permission of department.
Theoretical and conceptual foundations of health-related behavior. The development, change, and maintenance of these behaviors from a bio-behavioral perspective; needs and concerns of under-served and under-represented segments of the population.

HPRB 8430. Intervention and Evaluation of Health Promotion and Disease Prevention. 3 hours.
Prerequisite: (HPRB 7070 and HPRB 8420) or permission of department.
Intervention and evaluation strategies in health promotion and disease prevention at the individual, group, and community levels.

HPRB 8990. Research Seminar in Health Promotion and Behavior. 1-3 hours. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of department.
Literature in health promotion and education, health behavior, health communications, and instructional design; research design; data analysis; and development of research proposals. Non-Traditional Format: Doctoral research seminar. Students are exposed to the latest issues and strategies as they apply to doctoral level research in Health Promotion and Behavior. Students write papers and/or make presentations based on selected readings in a specific area.

HPRB 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HPRB 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

HPRB 9630. Critique of Literature in Health Promotion and Behavior. 3 hours.
Prerequisite: Permission of department.
Critical interpretation and evaluation of research and theoretical writing.

Physical Education and Sport Studies

P. Stanley Brassie, *Acting Head*
Michael A. Horvat, *Graduate Coordinator*
542-4455
(Ramsey Student Center)

Within the department are three areas of study including, sport management, sport studies, and curriculum and instruction.

PEDS 4300/6300-4300L/6300L. Physical Education for the Elementary School. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Curriculum, methods, and evaluation strategies for teaching physical activities in kindergarten through 6th grade. Students will plan lessons and teach groups of students in elementary school physical education classes.

PEDS 4330/6330-4330L/6330L. Physical Education for the Middle/Secondary School. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Curriculum, methods, and evaluation strategies for teaching physical activities in grades 7 through 12. Students will plan lessons and teach groups of students in both middle and high school physical education classes.

PEDS 4610/6610-4610L/6610L. Adapted Physical Education. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
The nature, behavioral characteristics, and motor limitations of various exceptional populations with methods of preparing meaningful individualized movement experiences in an integrated, segregated, or hospital/home bound setting. Includes planning lessons and teaching individuals in a clinic setting.

PEDS 5050/7050. Problems of Teaching in Physical Education. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Contemporary problems and issues facing the physical education teaching profession. Non-Traditional Format: Normally a school district contacts a faculty member about being a consultant on some problem being encountered in a school. The faculty member elicits assistance from an individual student to study the problem and provide solutions.

PEDS 5140/7140. Current Problems in Physical Education and Sport Studies. 1-3 hours. Repeatable for maximum 3 hours credit.
Seminars on issues and problems in Physical Education and Sport Studies. Non-Traditional Format: Class may be lecture, a course transmitted by satellite, or a series of speakers on a topic.

PEDS 5250/7250. Women and Sport. 3 hours.
Political, social, and cultural factors which have influenced the participation of women in sport and physical activity.

PEDS 6000. Directed Study in Physical Education and Sport Studies. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research project in physical education and sport studies. Non-Traditional Format: Directed study.

PEDS 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PEDS 7040. Instructional Strategies in Physical Education. 3 hours.
Instructional strategies for the purpose of improving teaching effectiveness in physical education and increasing the student's repertoire of teaching strategies.

PEDS 7060. Human Diversity in Curriculum and Instruction. 3 hours.
Theoretical and practical perspectives on diversity. Specific foci include social and cultural diversification in school institutions, and culturally responsive curriculum and pedagogy.

PEDS 7070. Movement Education for the Elementary School. 3 hours.
Definition, conceptual framework and theory of movement education. Simulated and/or actual teaching situations are analyzed and a movement education program is planned for schools.

PEDS 7080. Curriculum Planning in Physical Education. 3 hours.
Problems of curriculum design and development in physical education.

PEDS 7090. Applications of Technology to Physical Education and Sport Studies. 1 hour. Repeatable for maximum 4 hours credit.
Role of technology in the instructional process in physical education. Characteristics of technological delivery systems and selection of appropriate technology to fit instructional needs.

PEDS 7100. Motor Development. 3 hours.
Development of fundamental motor skills from childhood to old age with emphasis on concomitant physiological and motor skill stages of development.

PEDS 7120. Analysis of Teaching Physical Education. 3 hours.
Process of utilizing descriptive-analytic techniques in the analysis of physical education. Emphasis on systematic observation as employed in supervision, research, and self-evaluation of teaching.

PEDS 7130. Administration of Physical Education. 3 hours.
Program planning, budgeting, care and maintenance of equipment and facilities, personnel management, and program evaluation in physical education.

(PEDS)EXRS(HPRB)(RLST) 7150. Research Methods in Health and Human Performance. 3 hours.
Application of research to exercise science, health promotion and behavior, physical education, and recreation and leisure studies, with experience in developing techniques of gathering, analyzing, and reporting data.

PEDS 7200. Administration of Sport. 3 hours.
Past and present management trends, major management functions, personnel management, and leadership in sport organizations.

PEDS 7220. Sport and Society. 3 hours.
Sport in the American culture and its impact on society.

PEDS 7230. History of Entrepreneurship in American Sport. 3 hours.
The development of sport in a variety of cultures and how sport reflects the social, economic, political, religious, and philosophical views of a culture.

PEDS 7240. Psychosocial Aspects of Sport. 3 hours.
Psychological and sociological processes that affect the individual participating in sport.

PEDS 7260. Legal Issues in Sport Management. 3 hours.
Influence of constitutional state and federal laws on sport organizations and athletes.

PEDS 7270. Facility Design and Event Management in Sport. 3 hours.
Planning, design, financing, construction, and management of sport facilities. Planning, organizing, and evaluating the management of sporting events.

PEDS 7280. Sport Marketing. 3 hours.
Marketing of sport events and service to consumers of sport. Planning and organization of appropriate marketing strategies.

PEDS 7290. Managerial Operations in Sport. 1 hour.
1 lab period of 2 hours each per week.
Business and managerial operations in intercollegiate and professional sport including budget development and control, financial analysis, taxation issues, insurance considerations, and application of computers.

PEDS 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major profes-

sor. Non-Traditional Format: Independent research and thesis preparation.

PEDS 7310. Ethics in Sport Management. 1 hour. 1 lab period of 2 hours each per week.
Ethical decision making in sport management. Development and application of a code of ethics for decision making in sport management.

PEDS 7320. Student Athlete in Higher Education. 1 hour. 1 lab period of 2 hours each per week.
Role conflict the student athlete experiences between academic responsibilities and athletic demands. Development of support programs to assist the student athlete.

PEDS 7330. Governance in Sport Organizations. 1 hour. 1 lab period of 2 hours each per week.
Structure of various sport organizations and how they govern and control the conduct of sport at different levels.

PEDS 7340. Technology in Sport Management. 1 hour. 1 lab period of 2 hours each per week.
Use of the latest technology and computer programs in sport management.

PEDS 7350. Compliance in Intercollegiate Athletics. 1 hour. 1 lab period of 2 hours each per week.
Issues surrounding compliance with the NCAA Rulebook with interpretation and enforcement of NCAA rules.

PEDS 7400. Practicum in Physical Education and Sport Studies. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Supervised participation in professional activities associated with physical education and sport studies. Non-Traditional Format: Graduate student is assigned to a limited work experience on campus by a faculty member. The experience is supervised on-site by a practitioner. The on-site supervisor and faculty member evaluate the student's work performance.

PEDS 7450. Internship in Sport Management. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Work experience in a sport organization under an on-site professional and supervised by a faculty member. Non-Traditional Format: Graduate student is assigned to a full-time work experience in an off-campus sport administration setting by a faculty member. The experience is supervised on-site by a full-time professional. The on-site supervisor and faculty member evaluate the student's work performance.

PEDS 7460. Internship in Physical Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Full time work experience in physical education in a school setting under an on-site professional and supervised by a faculty member. Non-Traditional Format: Graduate student is assigned to a full-time work experience in an off-campus physical education setting by a faculty member. The experience is supervised on-site by a full-time professional. The on-site supervisor and faculty member evaluate the student's work performance.

PEDS 7610. Physical Rehabilitation of Children with Disabilities. 3 hours.
Etiology and remediation of disabilities caused by neurological, cardiorespiratory, sensory, and/or musculoskeletal and developmental anomalies as they relate to physical functioning. Responses to exercise and physical rehabilitation of children with disabilities.

PEDS(RLST) 7640. Developmental and Motor Assessment. 3 hours.
Prerequisite: PEDS 4610/6610-4610L/6610L.
Assessment and interpretation techniques for evaluating physical, motor, and recreational capabilities of individuals with disabilities.

PEDS 7650. Applied Project in Physical Education and Sport Studies. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Topic or problem in physical education related to the student's professional interests. Non-Traditional Format: Master's degree student in a non-thesis track conducts a research study on a problem approved by a faculty member. The research is conducted and presented to a committee of faculty in an oral defense.

PEDS 8040. Trends in Pedagogical Research. 3 hours. Repeatable for maximum 9 hours credit.
Research design and findings in pedagogical research with implications for teaching and further research.

PEDS 8210. Bases of Motor Control. 3 hours.
A neuropsychological approach to perceptual motor processes with emphasis on the role of the nervous system in controlling sensory and motor behavior.

PEDS 8630. Program Design in Adapted Physical Education. 3 hours.
Theories, concepts, and techniques for development, implementation, coordination, and evaluation of adapted physical education programs.

PEDS 8990. Research Seminar in Physical Education and Sport Studies. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Seminar for doctoral students to establish foundation for dissertation writing. Non-Traditional Format: Research seminar.

PEDS 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for the doctoral degree under the direction of a faculty member. Non-Traditional Format: Independent research under the direction of a faculty member.

PEDS 9080. Curriculum Inquiry in Physical Education. 3 hours.
Prerequisite: PEDS 7080.
Curriculum theorizing in physical education. Application of criteria for theory-building to curriculum model building to use in physical education settings.

PEDS 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

PEDS 9600. Research in Physical Education and Sport Studies. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study of a research topic in physical education and sport studies appropriate to the advanced graduate student's specialization. Non-Traditional Format: Independent study.

PEDS 9630. Critique of Research Literature in Physical Education and Sport Studies. 3 hours.
Prerequisite: Permission of department.
Critical evaluation of reported research in the advanced graduate student's area of specialization in physical education and sport studies.

PEDS 9700. Internship in Physical Education and Sport Studies. 3 hours.
Prerequisite: Permission of department.
Work experience by an advanced graduate student utilizing a research design or experimental model. Non-Traditional Format: Internship.

Recreation and Leisure Studies

Douglas A. Kleiber, *Head and Graduate Coordinator, 542-4335*
(Ramsey Student Center)

RLST 5130/7130. Leisure Education. 3 hours.
Prerequisite: (RLST 2800 and RLST 2800L) or permission of department.
Principles of educating for leisure. Review of techniques for enhancing leisure awareness, leisure attitudes, decision-making skills, and resource utilization. Emphasis is on the recreation professional's facilitative role in assisting individuals and groups to achieve satisfying lifestyles.

RLST 5320/7320. Women and Leisure. 3 hours.
Prerequisite: Permission of department.
Feminist critique of leisure traditions, including women's representation in leisure theories and services. Examines leisure as a context for hegemonic relationships.

RLST 5340/7340. Advanced Administrative Practices in Leisure Services. 3 hours.
Prerequisite: RLST 4870 or permission of department.
Techniques in budgeting and finance, personnel management, facility management, and public relations, as well as organizational theory and legislative issues.

RLST(FORS) 5400/7400-5400L/7400L. Park Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Management of public lands and open spaces, including management tools, type and nature of physical effects, visitor management principles, and site development. Use of maps, aerial photos, and compass in recreation area development.

RLST 5430/7430. Camping Administration. 3 hours.
Prerequisite: RLST 4870 or permission of department.
Camps with particular emphasis on program planning, selection and training of staff, campsite selection and development, health and safety, accessibility, and program evaluation.

RLST 6000. Special Problems in Recreation and Leisure Studies. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Specialized study in recreation and leisure studies. May involve intensive library investigation, collection and analysis of original data, or course work on a new topic with other students. Non-Traditional Format: Student does directed reading with faculty member or group of students meet with faculty member on special topics course. A/F grading used for full class; S/U grading used for individual supervised study.

RLST 6020. Concepts of Leisure. 3 hours.
Leisure studies with special attention to problems in defining recreation, leisure, and play. The personal, societal, political, and environmental contexts in which leisure occurs are also examined.

RLST 6990. Research Seminar in Recreation and Leisure Studies. 2 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of major.
The philosophy and practice of basic and applied research in Recreation and Leisure Studies.

RLST 7000. Master's Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

(RLST)EXRS(HPRB)(PEDS) 7150. Research Methods in Health and Human Performance. 3 hours.
Application of research to exercise science, health promotion and behavior, physical education, and recreation and leisure studies, with experience in de-

veloping techniques of gathering, analyzing, and reporting data.

RLST 7290. Advanced Issues in Therapeutic Recreation. 3 hours.
Prerequisite: Permission of major.
Therapeutic recreation program development, design, and evaluation for persons with disabling conditions. Case studies, field trips, and volunteer experiences are utilized.

RLST 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

RLST 7380. Leisure and Aging. 3 hours.
Leisure behavior in later life with attention to programs and services for older adults in both community and institutional settings.

RLST 7500. Outdoor Recreation Resources Management. 3 hours.
Development of skills in planning, programming, management, and interpretation of outdoor recreation areas through lectures and field experiences.

(RLST)PEDS 7640. Developmental and Motor Assessment. 3 hours.
Prerequisite: PEDS 4610/6610-4610L/6610L.
Assessment and interpretation techniques for evaluating physical, motor, and recreational capabilities of individuals with disabilities.

RLST 7650. Applied Project in Recreation and Leisure Studies. 1-9 hours. Repeatable for maximum 15 hours credit.
A project which addresses a problem in recreation and leisure services that is significantly related to a student's professional goals. Non-Traditional Format: Student works independently under faculty direction in doing an applied, research-based project in the field of leisure services.

RLST 7700. Internship in Recreation and Leisure Services. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Field placement in leisure service agency. Training in management of leisure programs and/or resources with agency and faculty supervision. Includes applied research project. Non-Traditional Format: Student works in field of leisure services under supervision of agency personnel.

RLST 8000. Special Problems in Recreation and Leisure Studies. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Specialized study in recreation and leisure studies. May involve intensive library investigation, collection and analysis of original data, or course work on a new topic with other students. Non-Traditional Format: Student does directed reading with faculty member or group of students meet with faculty member on special topics course. A/F grading used for full class; S/U grading used for individual supervised study.

RLST 8990. Doctoral Seminar in Recreation and Leisure Studies. 1 hour. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of major.
Topics of relevance to scholarship in recreation and leisure studies in higher education.

RLST 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

RLST 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

RLST 9330. Trends in Recreation and Leisure Research. 3 hours.
Trends in leisure research with attention to broader premises of scientific investigation.

RLST 9630. Critique of Literature in Recreation and Leisure Studies. 3 hours.
Contemporary literature in recreation and leisure studies.

RLST 9800. Teaching in Recreation and Leisure Studies. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Teaching in recreation and leisure studies with faculty supervision. Non-Traditional Format: Student teaches course or parts of course under faculty supervision.

Higher Education

Cameron L. Fincher, *Director*
Ronald D. Simpson, *Graduate Coordinator, 542-0577*
(Candler Hall)

EDHI(HIST) 4900/6900. History of American College and University. 3 hours.
Prerequisite: HIST 2111 and HIST 2112.
History of American colleges and universities from 1619 to the present. Major topics include student life, European antecedents, the nature of the university, the impact of religion, the rise of athletics, the culture of collegiate life, and the influence of society.

EDHI 7650. Applied Project in Higher Education. 2 hours. Repeatable for maximum 6 hours credit.
Applied study of a topic or problem in higher education significantly related to the student's professional task.

EDHI(HIST) 8000. History of American Higher Education. 4 hours.
Development and scope of American higher education.

EDHI 8020. The Two-Year College. 3 hours.
Purposes, policies, and programs of two-year colleges.

EDHI 8200. Institutional Research. 3 hours.
Knowledge, skills, and competencies required to design, conduct, and interpret institutional studies in higher education.

EDHI 8300. The Law and Higher Education. 3 hours.
The legal aspects of higher education through pertinent court decisions affecting the administration of the institution, faculty, staff, and students.

EDHI 8400. Finance of Higher Education. 3 hours.
Financing and financial management in higher education, with particular attention to patterns of financial support and costs, tuition and financial aid, cost-effectiveness, budgeting, and financial decision making.

EDHI 8600. Assessment in Higher Education. 4 hours.
Methods and techniques used in assessing educational outcomes in colleges and universities. Analysis and interpretation of problems, issues, and concerns involved in public demands for assessment and accountability.

EDHI 8890. Seminar in Higher Education. 1-3 hours. Repeatable for maximum 12 hours credit.
Issues in teaching and learning in higher education. Topics are tailored to meet the needs of doctoral-level students preparing for academic posts across a variety of disciplines and instructional levels. Integrating technology in the classroom, instructional strategies, and assessing students and courses for improvement.

EDHI 8990. Research Seminar in Higher Education. 1-3 hours. Repeatable for maximum 3 hours credit.
Proposed student research projects and methods of data analysis.

EDHI 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDHI 9010. Academic Programs in Higher Education. 3 hours.
General education and specialization in undergraduate education. Curricular trends, contemporary practices, persistent challenges, and external influences in the development of courses and programs in higher education.

EDHI 9020. Critical Issues in Higher Education. 3 hours. Repeatable for maximum 9 hours credit.
Critical problems and issues facing higher educational institutions, emphasizing the processes of change for improved administrative leadership and practice.

EDHI 9030. Instructional Processes in Higher Education. 3 hours.
Major instructional practices in higher education, including establishing course goals and objectives, selecting appropriate teaching methods, and evaluating learning outcomes.

EDHI 9040. Using Technology in the College Classroom. 2 hours.
Uses of technology when applied to college level instruction. Using e-mail, multi-media, distance learning, and other emerging tools to enhance student learning in higher education.

EDHI 9050. Organization and Governance in Higher Education. 3 hours.
Organization and governance in higher education, with special attention to the diversity of institutional types, relevant organizational theory, and the nature of change in colleges and universities.

EDHI 9100. The American Professoriate. 2 hours.
Nature of the American professoriate by way of historical, scholarly, popular, and contemporary perspectives. The transition of new faculty members from graduate school to the initial academic appointment.

EDHI 9200. Administrative Leadership in Higher Education. 4 hours.
Administrative leadership concepts, principles, and practices in United States colleges and universities. Interpretation and evaluation of theory and research in leadership, administration, and management.

EDHI 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 33 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDHI 9400. Comparative Higher Education. 2 hours. Higher education systems and institutions outside North America.

EDHI 9500. Policy Studies in Higher Education. 1-6 hours. Repeatable for maximum 6 hours credit. Analyzing, interpreting, and evaluating selected policy issues related to the continued improvement and development of institutions, programs, and services in higher education. Policy analysis and research at public and institutional levels.

EDHI 9630. Critique of Educational Literature in Higher Education. 2-6 hours. Repeatable for maximum 9 hours credit.
Critical interpretation and evaluation of theory and research. Each student will make critical reviews of scholarly studies in his/her field of specialization. Non-Traditional Format: Arranged by individual and instructor; time and place by mutual agreement.

EDHI 9700. Internship in Higher Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Problems encountered in a work-study program applying higher education principles at a selected institution. Non-Traditional Format: Arranged by individual, faculty, and participating institution by mutual consent.

Instructional Technology

Kent L. Gustafson, *Head*
Lloyd P. Rieber, *Graduate Coordinator, 542-3986*
(Aderhold Hall)

EDIT 4170/6170. Instructional Design. 3 hours.
Systematic procedures for designing, developing, evaluating, and revising instruction to meet identified goals and objectives.

EDIT 4180/6180. Instructional Development. 3 hours.
Prerequisite: EDIT 4170/6170.
Developing instructional materials for a defined context applying a learner-centered, systematic design philosophy. Working within a team environment while applying contemporary learning theories. Engaging in situational assessment, learner analysis, performance specification, test construction, strategies selection, materials design, and evaluation.

EDIT 4500/6500. Educational Television Production. 3 hours.
Design, production, and use of digital and analog video. Laboratory experiences with studio and portable cameras; editing and other equipment suitable for school use.

EDIT 6000. Special Problems in Instructional Technology. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study of selected problems in instructional technology. Non-Traditional Format: Students work independently on selected problems. There is no regularly scheduled class time.

EDIT 6100. Introduction to Instructional Technology. 3 hours.
The field of instructional technology, situating the field within the context of its historical perspective, current practices, and future directions.

EDIT 6150. Introduction to Computer-Based Education. 3 hours.
The computer and its educational applications. Computer-based education in the areas of instruction, text and data processing, multimedia, and telecommunications. Philosophical perspectives on the role of computer technology in education.

EDIT 6200. Learning Environments Design I. 3 hours.
Prerequisite: EDIT 4170/6170.
Instructional design, learning theory, project management, and evaluation of designing interactive learning environments for education and training. Students and faculty work in teams to produce interactive multimedia, electronic performance support systems, internet resources, and other evolving forms of technology-enhanced learning environments.

EDIT 6210. Learning Environments Design II. 3 hours.
Prerequisite: EDIT 6200.
Contemporary learning theories of the design of interactive environments for information retrieval, learning, and performance support. Students and faculty work in teams to produce hypertext, hypermedia, microworlds, simulations, games, virtual learning environments, and other examples of interactive environments.

EDIT 6220. Design and Development Tools. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Students learn a variety of tools appropriate for computer-based development. These include graphics, media, and software development tools. Students are required to write a contract for the specific tools to be learned. Non-Traditional Format: Students work independently learning computer-based tools. There is no regularly scheduled class time.

EDIT 6300. Administration of Media Programs. 3 hours.
Management of resources, services, and functions of the school media program. Students develop a vision and plan for improving collections, technical services, and promotion activities.

EDIT 6320. Information Technology. 3 hours.
Effective utilization, integration, and management of technology tools within the curriculum, with emphasis on planning, needs assessment, and organizational structure.

EDIT 6340. Information Services in School Media Programs. 3 hours.
Students analyze criteria for planning, selecting, using, and evaluating a variety of electronic and print resources for information services in schools.

EDIT 6360. Information Literacy in the School Media Program. 3 hours.
School media specialist's role in collaborative planning partnerships with classroom teachers, integration of information literacy skills within the curriculum, and strategies for teaching information literacy.

EDIT 6400. Emerging Approaches in Teaching, Learning, and Technology. 3 hours.
Teaching, learning, and performing, and the ways technological environments can be designed to support these approaches. Describes the theoretical and research foundations of these approaches, and demonstrates varied uses of technology.

EDIT 6900. Research Methods in Instructional Technology. 3 hours.
Locating and interpreting information from published reports, planning and conducting research and evaluation studies, and using research and evaluation procedures to explore questions related to instructional technology.

EDIT 7000. Master's Research. 1-6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDIT 7230. Educational Applications of Computer Graphics. 3 hours.
Prerequisite: EDIT 6150 and EDIT 6220.
Static and animated computer graphics for educational settings including use of multiple visual representations in interactive learning environments. Strong focus on theory and research.

EDIT 7320. Research in School Media Services. 3 hours.
Prerequisite: EDIT 6300 and EDIT 6900.
Identifies contemporary problems in the field of school media services around which students design appropriate research studies.

EDIT 7340. Issues in School Media Programs. 3 hours.
Prerequisite: EDIT 6300 and EDIT 6320 and EDIT 6340 and EDIT 6360.
Explores contemporary trends, problem areas, and issues in management of school media programs through literature investigations, seminar discussions, and case studies.

EDIT 7460. Internship in Instructional Technology. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
On-site experiences under supervision of qualified persons in the field. Students maintain and submit a log, journal, or other documentation of their experience. Non-Traditional Format: Students are assigned to off-campus locations for internships under the supervision of qualified individuals. There is no regularly scheduled class time.

EDIT 7500. Technology-Enhanced Classroom Environments. 3 hours.
Design and creation of technology-enhanced classroom environments. Examines role of current and emerging technologies in the classroom.

EDIT 7520. Distance Learning and Telecommunications. 3 hours.
Distance learning and telecommunications in the United States and the world, covering history, research, technology, uses, and policy issues; development of appropriate educational applications.

EDIT 7550. Management of Instructional Technology Projects. 3 hours.
Planning, organizing, supervision, and evaluation of technology-based education and training projects and support services in a variety of settings.

EDIT 7650. Applied Research Project in Instructional Technology. 3 hours.
Prerequisite: Permission of department.
Culminating activity leading to the Specialist Degree. Student applies skills, knowledge, and appropriate research methods to identify and solve real world professional problems. Non-Traditional Format: Specialist students work independently to identify and solve real world problems. There is no regularly scheduled class time.

EDIT 8150. Instructional Message Design. 3 hours.
Prerequisite: EDIT 6210.
Application of message design principles to the creation of instructional messages in the materials for various media. Motivation, memory, perception, attitude changes, and concept learning principles are integrated into practical exercises.

EDIT(EADU) 8200. Theory and Practice of Educational Change. 3 hours.
Individual and collective meanings of change, theory, and practice of organizational change and development in a variety of educational settings.

EDIT 8350. Instructional Product Evaluation. 3 hours.
Prerequisite: EDIT 4170/6170 and (ERSH 6300 or STAT 6210).
Planning, conducting, analyzing, and reporting systematic evaluations of instructional products such as

computer-based training, interactive multimedia, and distance learning.

EDIT 8990. Doctoral Seminar. 1 hour. Repeatable for maximum 4 hours credit.
Developmental forum for establishing, clarifying, and evolving student's perspectives on instructional technology research. Heighten awareness of critical issues in the field and areas of disciplined inquiry.

EDIT 9000. Doctoral Research. 1-6 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EDIT 9300. Doctoral Dissertation. 1-6 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EDIT 9600. Educational Research in Instructional Technology. 1-6 hours. Repeatable for maximum 12 hours credit.
Individual research under the supervision of a faculty member. Non-Traditional Format: Doctoral students work independently on individual research problems under the direction of a faculty member. There is no regularly scheduled class time.

EDIT 9630. Critique of Literature in Instructional Technology. 3 hours.
Research and theoretical literature in instructional technology. Review and evaluation of current research in selected areas is emphasized. A synthesis of the literature in an area of interest is completed by each student.

EDIT 9990. Doctoral Topical Seminar. 3 hours. Repeatable for maximum 12 hours credit.
Examination of topical issues in instructional technology.

Language Education

Joel A. Taxel, *Head*
Linda C. DeGroff, *Graduate Coordinator, 542-4510*
(Aderhold Hall)

ELAN 4080/6080. Special Problems in Language Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics related to teaching language arts or a foreign language. Non-Traditional Format: Independent study with faculty member.

ELAN 4400/6400. Teaching as Planning in Context. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Historical, political, economic, and social factors that influence how the language arts are taught, how schools operate, and how teachers function.

ELAN 4401/6401. Teaching as Collaborative Inquiry. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Literacy research for practitioners including research design, methodology, data analysis and interpretation for questions about students as readers/writers/language users.

ELAN 4410/6410. Adolescent Literature. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4460/6460 or ELAN 4470/6470.
Adolescent literature and its selection and use in the middle school and high school to promote engagement with literature and as a bridge to the classics.

ELAN 4460/6460. Supervised Field Experience in English, Grades 7-12. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4470/6470.
Observation and work in public school English classrooms.

ELAN 4462/6462. Student Teaching Seminar. 3 hours.
Prerequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Corequisite: ELAN 5460.
Issues of classroom teaching. Students plan for and examine their concurrent student teaching experience in light of research and theory, peers' experiences in other school settings, and their own teaching and learning histories. Non-Traditional Format: Intensive two-week planning seminar prior to student teaching and two-week debriefing seminar following student teaching. Ten weeks of two-hour weekly discussions concurrent with student teaching.

ELAN 4470/6470. Guided Field Research. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460.
Supervised observation and participation in school settings.

ELAN 4630/6630. TESOL Methods and Materials. 3 hours.
Principles, methods, materials, and activities for the teaching of English to adult speakers of other languages.

ELAN 5312/7312. Poetry in Elementary and Middle School Classrooms. 3 hours.
Poems and enrichment activities for use in elementary and middle school classes; ways of encouraging children to respond to published poetry, to understand poetic devices, and to write poetry.

ELAN 5314/7314. Informational Literature in Elementary and Middle Schools. 3 hours.
Reading of informational literature and examining selection criteria and ways to integrate informational books into language arts and content area curricula appropriate for preschool through 8th grade.

ELAN 5318/7318. Culturally Diverse Children's Literature. 3 hours.
Prerequisite: Undergraduate level only: ELAN 5210; Graduate level only: ELAN 6310 or ELAN 7310.
Children's fiction, poetry, and nonfiction literature dealing with the experiences of diverse cultures comprising American society. Development of criteria for evaluation and strategies for incorporating literature into the curriculum.

ELAN 5332/7332. Drama in Elementary and Middle Grade Classrooms. 3 hours.
Integrating drama across the curriculum, including improvisational process drama, connecting to issues associated with children's literature, reading, writing, storytelling, and thematic oriented units of study with students in grades prekindergarten to middle school.

ELAN 5390/7390. Problems of Literacy Teaching and Learning. 3 hours.
Issues related to preschool through 8th grade readers and writers with diverse learning paths, including learning disabilities, English as a second language, and histories of school failure. Effective teaching strategies include culturally-responsive teaching, student-generated curriculum and assessment links, interdisciplinary connections, and family involvement.

ELAN 5730/7730. First and Second Language Acquisition and Development. 3 hours.
Native and second language acquisition processes, with attention to regional, social, and functional variation in language and contrasts between English and other selected languages.

ELAN 6100. Whole Language Teaching in Early Childhood Education. 3 hours.
Research and theory on oral and written language acquisition, development, and variation and the implications for classroom practices. Whole language instructional techniques for the development of written and oral language.

ELAN 6310. Survey of Children's Literature, Preschool Through 8th Grade. 3 hours.
Prerequisite: Permission of department.
Literature appropriate for children, preschool through middle school.

ELAN 6631. Teaching Language-Minority Students. 3 hours.
Pedagogical theories and practices pertaining to non-native speakers of English in the American school system.

ELAN 7000. Master's Research. 1-6 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ELAN 7016. Folk Literature in the Curriculum. 3 hours.
Genres of folk literature, their relationship to formal literature, and their role in contemporary society. A study of culture through folklore.

ELAN 7070. Research Methods in Language Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Research methods appropriate for studying language teaching and learning.

ELAN 7300. Master's Thesis. 1-6 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ELAN 7310. Children's Literature in the Curriculum, Preschool Through 8th Grade. 3 hours.
Prerequisite: Permission of department.
Role of children's literature in the curriculum, including principles and techniques in selection of books and implementation of literature-based curriculum.

ELAN 7320. Teaching Composition in the Elementary and Middle School. 3 hours.
Strategies for building literate classroom communities based on current theory and research.

ELAN 7330. The Oral Tradition. 3 hours.
Prerequisite: ELAN 3110 or ELAN 5210 or ELAN 6310.
The role of storyteller in preliterate and literate cultures, and practice in the arts of poetic recitation, choral reading, and storytelling as they relate to the primary and middle school grades.

ELAN 7400. Current Issues in English Education. 3 hours.
Based on their own experiences in schools, students will identify issues of language and literacy that present challenges and potential in an increasingly diverse culture.

ELAN 7408. Master's Seminar in English Education. 3 hours.
Prerequisite: ELAN 7400.
Critical issues in the teaching of English based on student input as teachers.

ELAN 7410. Guiding the Reading of Young Adults. 3 hours.
The needs and concerns of young adults as readers of imaginative literature and theoretical foundations of a successful program for literature instruction.

ELAN 7420. Critical Pedagogy in Composition Studies. 3 hours.
Prerequisite: ELAN 7400.
Theoretical implications of traditional, critical, and deconstructive pedagogies of writing and their usefulness in the classroom.

ELAN 7430. Critical Pedagogy in English Education. 3 hours.
Prerequisite: ELAN 7400.
Linguistic diversity, the varieties of English, English as a second language, and exploring the power of language as a cultural and political tool.

ELAN 7500. Curriculum Planning in Foreign Language Education. 3 hours.
Prerequisite: Permission of department.
Historical, philosophical, and sociological bases for curriculum planning in foreign languages; survey of current trends in design and content.

ELAN 7600. Reading and Writing in a Non-Native Language. 3 hours.
Linguistic, cognitive, and social dimensions of reading and writing in a non-native language.

ELAN 7650. Applied Project in Language Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Intensive study of a selected topic through library research and/or collection of original data. Non-Traditional Format: Students will meet with faculty members on a regular basis.

ELAN 7700. Creating Literate Communities. 3 hours.
Prerequisite: ELAN 7400.
How literate communities develop, how group members talk about texts, and how they negotiate roles within groups of readers.

ELAN 7731. Advanced Topics in First and Second Language Acquisition. 3 hours.
Research and theories on first and second language acquisition and development.

ELAN 7732. Sociocultural Aspects of Language Learning and Teaching. 3 hours.
Theories and practices underlying a sociocultural perspective on language teaching and learning.

ELAN 8000. Research Seminar in Language Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Critiques of published research and reports of original research conducted by faculty members and doctoral students.

ELAN 8010. Theory and Research in Reader Response to Literature in Schools. 3 hours.
Prerequisite: ELAN 7310 or ELAN 7410.
Theories of Rosenblatt, Iser, Bakhtin, and others. Research in how readers create meaning from literature in elementary, secondary, and college classrooms.

ELAN 8020. Research Seminar on Composing Processes. 3 hours.
Research on the composing processes, including developmental rhetoric, speaking and writing relationships, thought processes involved in composing, qualitative research methodology, and implications of research for curriculum and instruction in writing.

ELAN 8030. Classroom Discourse in Language Teaching and Learning. 3 hours.
Recent research and theories on the pedagogical role of discourse in first and second language classrooms.

ELAN 8032. Seminar on Thought and Language. 3 hours.
Theories of the relation between thought and language, with emphasis on the works of Vygotsky and educational theorists and researchers working from a Vygotskian frame. Explores pedagogical implications for literacy, literature, and language learning.

ELAN 8040. Languages, Cultures, and Literacies. 3 hours.
Theory and research on literacy and its relationship to culture, social process, and identity.

ELAN 8070. Representing Qualitative Research. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ERSH 8410 or ERSH 8420.
Theoretical, ethical, and practical issues involved in transforming qualitative data into a written research report. Students, both in dissertation and pre-dissertation, will write representations of data they have already collected.

ELAN 8310. Women and Minorities in Literature for Young People. 3 hours.
Prerequisite: ELAN 6310 or ELAN 7310 or permission of department.
Historical evolution of representations of women and racial minorities in children's literature. Theory and research exploring the relation between children's literature and changing sociocultural and political values and ideologies provide the framework for the course. The relation between sociocultural and political values and more traditional aesthetic considerations.

ELAN 8400. Assessment and Evaluation in English Education. 3 hours.
Philosophical stances underlying various purposes and practices for assessing and evaluating student and teacher performance and progress in secondary language arts programs. Examines issues from a historical perspective.

ELAN 8410. Seminar in Secondary School Literature. 3 hours.
Recent trends in literature curriculum development in secondary schools; critical examination of issues re-

lated to literature curriculum development with special attention to theories of reading and of young adult literature.

ELAN 8600. Research on Second Language Acquisition in the Classroom. 3 hours.
Research and theories on the acquisition of other languages in classroom settings.

ELAN 8730. Advanced English Language Studies for Teachers. 3 hours.
Scholarship in the teaching of English language; theory and research-based critiques of English language teaching methods and policies; classroom discourse studies; and language variation in educational settings.

ELAN 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ELAN 9020. Independent Study in Language Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed readings in research related to language teaching and learning. Non-Traditional Format: Independent study.

ELAN 9040. Review of Research in Language Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Review of research on the theory and research of language and literacy. Non-Traditional Format: Independent research.

ELAN 9060. Special Topics in Language Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Selected topics related to the theory and research of language and literacy. Non-Traditional Format: Independent research.

ELAN 9080. Critique of Theory and Research in Language Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Survey of research related to language teaching and learning. Non-Traditional Format: Independent research under the direction of faculty members.

ELAN 9100. Doctoral Examinations and Prospectus Preparation. 1-12 hours. Repeatable for maximum 36 hours credit.
Written and oral comprehensive examinations and development of dissertation prospectus. Non-Traditional Format: Doctoral exams and prospectus preparation.

ELAN 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 48 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Mathematics Education

Larry L. Hatfield, *Head*
Thomas J. Cooney, *Graduate Coordinator, 542-4194*
(Aderhold Hall)

EMAT 4000/6000. Special Problems in Mathematics Education. 1-6 hours. Repeatable for maximum 9 hours credit.
Topics in mathematics education. Non-Traditional Format: Independent study.

EMAT 4200/6200. Technology in Teaching Elementary School Mathematics. 3 hours.
Prerequisite: Permission of department.
Use of technological tools in teaching elementary mathematics. Current computer software for mathematical explorations.

EMAT 4360/6360. Teaching and Learning Secondary School Mathematics. 3 hours.
Prerequisite: EMAT 4680/6680 and permission of department.
Corequisite: EMAT 5360/7360.
Instructional strategies, classroom management, assessment techniques, lesson planning, multicultural and gender issues in mathematics education.

EMAT 4500/6500. Connections in Secondary School Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
The secondary mathematics curriculum, with attention to applications of mathematics and to connections within mathematics and between mathematics and other subjects.

EMAT 4550/6550. Contemporary School Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
The contemporary secondary and collegiate mathematics curriculum, with an emphasis on data handling, modeling, infinite processes, stochastic processes, and discrete mathematics.

EMAT 4600/6600. Problem Solving in Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
Mathematical problems with emphasis on exploring various mathematical contexts, on posing and extending problems, and on communicating mathematical problems and solutions.

EMAT 4650/6650. Historical and Cultural Foundations of Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
Development of mathematics across time, geography, and cultures with attention to the content of school mathematics.

EMAT 4680/6680. Technology and Secondary School Mathematics. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Mathematical investigations appropriate to the secondary school using various technology tools.

EMAT 4690/6690. Technology Enhanced Instruction in Secondary School Mathematics. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Use of technology in mathematics instruction and development of materials for mathematics instruction enhanced by technology.

EMAT 4700/6700. Advanced Explorations with Technology in Mathematics Instruction. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 2210 and MATH 2210L.
Use of technology in mathematics instruction, with an emphasis on the organization of materials for secondary mathematics courses.

EMAT 4950/6950. Professional Seminar in Teaching Mathematics. 3 hours.
Prerequisite: EMAT 4360/6360.
Corequisite: EMAT 5460/7460.
Issues identified from the student teaching experience in mathematics with consideration of various avenues for professional development.

EMAT 5280/7280. Teaching Number Systems in the Middle School. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L and permission of department.
Corequisite: MATH 5020/7020.
Didactics of number systems for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing natural, integer, rational, and real number structures. Evaluation through the examination of mathematics content, with emphasis on the mathematical operations, models, and problem solving.

EMAT 5290/7290. Teaching Geometry and Measurement in the Middle School. 3 hours.
Prerequisite: EMAT 5280/7280.
Corequisite: MATH 5030/7030.
Didactics of geometry for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing geometric and measurement concepts. Evaluation through the examination of mathematics content, with emphasis on statistics, probability, and mathematical applications.

EMAT 5310/7310. Teaching Mathematics in the Middle School. 3 hours.
Prerequisite: EMAT 5290/7290.
Methods and materials for teaching mathematics in the middle school, with emphasis on integration of mathematical topics.

EMAT 5320/7320. Teaching Algebra in the Middle School. 3 hours.
Prerequisite: EMAT 5290/7290.
Didactics of algebra and number theory for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing algebraic concepts.

EMAT 5360/7360. Secondary School Mathematics Field Experience. 3 hours.
Prerequisite: EMAT 4680/6680 and permission of department.
Corequisite: EMAT 4360/6360.
Supervised observations, interviews, tutoring, teaching practice, and professional goal development. Non-Traditional Format: Forty-five hours of field work per semester.

EMAT 5460/7460. Student Teaching in Secondary School Mathematics. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: EMAT 4360/6360.
Corequisite: EMAT 4950/6950.
Supervised mathematics teaching in a secondary school. Non-Traditional Format: In school for ten weeks, all day.

EMAT 6410. Mathematical Learning in PreK-Grade 5. 3 hours.
Learning theories and their application to mathematics teaching and learning.

EMAT 6420. Mathematics Methods for Early Childhood Education. 3 hours.
Content, methods, and materials appropriate for preK through 5th grade mathematics instruction. Integration of instruction and assessment and appropriate use of technology.

EMAT 6990. Research Seminar in Mathematics Education. 1-6 hours. Repeatable for maximum 9 hours credit.
Topics in mathematics education from a research perspective.

EMAT 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EMAT 7010. Teaching Mathematics in the Elementary School. 3 hours. Repeatable for maximum 6 hours credit.
Interrelationships between contemporary mathematics content for elementary schools, effective mathematical communication with children, and learning theory.

EMAT 7050. Teaching Secondary School Mathematics. 3 hours.
Prerequisite: Permission of department.

Instructional procedures and evaluation in terms of student growth.

EMAT 7070. Mathematics Curriculum in the Elementary School. 3 hours. Repeatable for maximum 6 hours credit.
Elementary school mathematics curriculum with special emphasis on contemporary programs, issues, and trends.

EMAT 7080. Curriculum in Mathematics Education. 3 hours.
Prerequisite: Permission of department.
Mathematics curriculum of the secondary schools, with emphasis on current issues and trends.

EMAT 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

EMAT 7650. Applied Project in Mathematics Education. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A mathematics education topic or problem under the direction of a faculty member. Non-Traditional Format: This course is based on the development and conduct of an individual project resulting in less need for faculty contact.

EMAT 8010. Advanced Study of Mathematics Curriculum. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (EMAT 7050 and EMAT 7080) or permission of department.
Theoretical bases for mathematics curriculum.

EMAT 8020. Advanced Study of Mathematics Teaching and Teacher Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (EMAT 7050 and EMAT 7080) or permission of department.
Theoretical bases for mathematics teaching and teacher education.

EMAT 8030. Advanced Study of Mathematics Learning. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (EMAT 7050 and EMAT 7080) or permission of department.
Theoretical bases for mathematics learning.

EMAT 8990. Research Seminar in Mathematics Education. 1-6 hours. Repeatable for maximum 12 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Seminar for doctoral students on contemporary issues in mathematics education. Non-Traditional Format: Independent study and/or research will be required if the number of credit hours exceeds the number of hours of discussion.

EMAT 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members.
Non-Traditional Format: Independent research under the direction of a faculty member.

EMAT 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EMAT 9600. Educational Research in Mathematics Education. 1-9 hours. Repeatable for maximum 9 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Independent research on a problem in mathematics education. Non-Traditional Format: Supervised independent research.

EMAT 9630. Critique of Literature in Mathematics Education. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Critical interpretation and evaluation of research and theoretical writing in mathematics education.

EMAT 9640. Analysis and Critique of Research in Mathematics Education. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 1 hour each per week.
Prerequisite: Permission of department.
Analysis and evaluation of research in mathematics education.

EMAT 9700. Internship in Mathematics Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised work in mathematics education in an instructional situation. Non-Traditional Format: Supervised independent study.

EMAT 9800. Practicum in Mathematics Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Completion of a supervised project in mathematics education. Non-Traditional Format: Supervised independent study.

Music Education

Donald R. Lowe, *Graduate Coordinator, 542-2743*
(Music Building)

EMUS 6000. Special Problems in Music Education. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Individual research projects involving library investigation or the collection and analysis of original data pertinent to a given problem.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

EMUS 7460. Internship in Music Education. 1-13 hours. Repeatable for maximum 13 hours credit.
Prerequisite: Permission of department.
Professional seminar and supervised teaching in the public schools.
Non-Traditional Format: Three weeks of seminar and twelve weeks of supervised teaching.

EMUS 7650. Applied Project in Music Education. 3 hours.
Prerequisite: Permission of department.
Topic or problem in music education significantly related to the student's professional needs. Non-Traditional Format: Students will meet with faculty members on a regular basis.

EMUS 8220. Philosophy, History, and Practice of Music Education. 3 hours.
National and international philosophical thought and practice in music education; history of music.

EMUS 8990. Research Seminar in Music Education. 1-3 hours. Repeatable for maximum 6 hours credit.
Music education research topics and reports. Non-Traditional Format: Students will meet with faculty members on a regular basis.

EMUS 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EMUS 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 33 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EMUS 9630. Critique of Literature in Music Education. 3 hours.
Fundamental sources, databases, and techniques used in conducting library research; analysis of broad spectrum of the professional literature in music education, with emphasis on critical reviews of standard references and current literature.

Occupational Studies

Helen C. Hall, *Head*
Robert C. Wicklein, *Graduate Coordinator, 542-4503*
(River's Crossing)

Agricultural Education

EAGR 4010/6010. Agricultural Education Leadership Seminar. 1 hour. Repeatable for maximum 5 hours credit. 1 lab period of 1 hour each per week.
Current problems in teaching agricultural education and training in specialized areas relevant to the needs of future teachers of agricultural education. Non-Traditional Format: Involvement in off-campus Agricultural Education/FFA activities will also be required in order to succeed in the class.

EAGR 4340/6340. Developing Community Programs in Agriculture. 3 hours.
Developing the components of high school agriculture education programs, including collection and use of demographic data to design and implement community based programs.

EAGR 4350/6350. Curriculum Planning in Agricultural Education. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for agricultural education.

EAGR 4360/6360. Instructional Strategies in Agricultural Education. 3 hours.
Study and evaluation of teaching materials, methods, techniques, and strategies utilized in agricultural education.

EAGR 7020. Methods of Instruction in Agricultural Education. 3 hours.
Instructional procedures, materials, and evaluation techniques in agricultural education.

EAGR 7450. Internship in Agricultural Business/ Industry. 1-3 hours. Repeatable for maximum 6 hours credit.
Internship in an agricultural business for experienced educators. Non-Traditional Format: Supervised occupational experience in business and industry.

EAGR 7460. Internship in Agricultural Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Selected problems confronting a beginning teacher, with emphasis upon program planning, class preparation, instructional strategies, and evaluation tech-

niques. Non-Traditional Format: Supervised full-time experience in school setting.

EAGR 7650. Applied Project in Agricultural Education. 3 hours.
Prerequisite: ERSH 4200/6200.
Topic or problem in agricultural education significantly related to the student's professional responsibility. Non-Traditional Format: Independent study completed under direction of a faculty member.

Business Education

EBUS 4010/6010. Business Communication. 3 hours.
Theory and practice of thinking, reading, writing, speaking, and listening processes involved in business education.

EBUS 4020/6020. Computer Concepts and Operating Systems for Occupational Studies. 3 hours.
Computer hardware and software operating procedures, data organization and representation. Current trends in occupational uses of computer technology and instructional approaches for teaching operating systems.

EBUS 5030/7030. Word Processing Applications. 3 hours.
Prerequisite: Permission of department.
Word processing with popular software packages. Focus is on advanced features of word processing packages, including merging, sorting, mathematical functions, and desktop publishing and instructional approaches for teaching word processing in occupational studies.

EBUS 5060/7060. Desktop Publishing in Occupational Studies. 3 hours.
Computer applications for electronic publishing, including elements of page design, effective publications, presentations, instructional materials, and instructional approaches for teaching desktop publishing in occupational studies.

EBUS 5070/7070. Office Management. 3 hours.
Office management, including practices, supervision, information management, methods and procedures, job organization, evaluation, selection, and training of office personnel. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

EBUS 5090/7090. Spreadsheet and Presentation Applications in Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Spreadsheet and presentation software, including spreadsheet commands, graphs, data sorting, querying, and macro design and presentation software commands, design, sequencing and practice demonstration. Instructional approaches for teaching spreadsheets and presentation software in occupational studies.

EBUS 5100/7100. Systems Analysis and Design for Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Technical background and knowledge for teaching information systems development and implementation in occupational studies. Instructional strategies for project management, documentation standards, hardware and software considerations, systems design, and program languages.

EBUS 5760/7760. Consumer Financial Planning. 3 hours.
Prerequisite: ECON 2105.
Consumer problems encountered during and after school years. How the economy functions, wise purchase decisions, managing money, evaluating sales and advertising practices, and guarding against unwise buying practices. Instructional approaches for teaching financial planning in occupational studies.

EBUS 7010. Instructional Strategies for Information Processing. 3 hours.
Prerequisite: EBUS 5030/7030.
Teaching theory and principles of skill building, materials development, and evaluation relating to teaching of keyboarding, word processing, and machine or manual transcription.

EBUS 7020. Instructional Strategies for Basic Business Education. 3 hours.
Organization, standards, evaluation, textbooks, materials, special teaching techniques, motivation, individual differences in the teaching of basic business courses.

EBUS 7460. Internship in Teaching Business Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Teaching internship in a business education program under the supervision of a classroom business education teacher and a member of the occupational studies faculty. Non-Traditional Format: Supervised full-time experience in school setting.

EBUS 7650. Applied Project in Business Education. 3 hours.
Project written in acceptable thesis format involving library investigation and original data collection pertinent to a chosen problem related to the student's professional task. Non-Traditional Format: Independent study completed under direction of a faculty member.

Home Economics Education

EHEC 7460. Internship in Teaching Home Economics Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Teaching internship in a home economics education program under the supervision of a classroom home economics teacher and a member of occupational studies faculty. Non-Traditional Format: Supervised full-time experience in school setting.

EHEC 7600. Nutrition Education. 3 hours.
Current trends in nutrition education; emphasis on the development of a nutrition education program for a local community setting.

EHEC 7650. Applied Project in Home Economics Education. 3 hours.
Project written in acceptable thesis format involving library investigation and original data collection pertinent to a chosen problem related to the student's professional task. Non-Traditional Format: Independent study completed under direction of a faculty member.

Marketing Education

EMKT 4100/6100. Economic Foundations for Work-Based Education. 3 hours.
Economic principles and concepts of free-market economies in work-based education programs, with emphasis on instructional approaches.

EMKT 4110/6110. Marketing and Business Foundations of Work-Based Education. 3 hours.
Business and marketing concepts, business environments, and managerial systems in work-based education, with emphasis on instructional strategies.

EMKT 4120/6120. Human Resource Applications in Marketing Education. 3 hours.
Human relations, communications, mathematics, management, and career development in work-based education programs, with emphasis on instructional strategies.

EMKT 7460. Internship in Teaching of Marketing Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Teaching internship in a marketing education program under the supervision of a classroom marketing teacher and a faculty member in occupational studies. Non-Traditional Format: Supervised full-time experience in a school setting.

EMKT 7650. Applied Project in Marketing Education. 3 hours.
Topic or problem in marketing education significantly related to the student's professional responsibility. Non-Traditional Format: Independent study completed under direction of a faculty member.

Occupational Studies

EOCS 4000/6000. Directed Readings in Occupational Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Individual research in an occupational studies discipline under the direction of a faculty member. Non-Traditional Format: Independent study completed under supervision of a faculty member.

EOCS 4100/6100. Principles and Practices of Career Education. 3 hours.
Career education in elementary, middle, and secondary schools; major theories of career development; use of standardized assessment, career information resources, and curriculum materials; special issues and trends influencing work and careers.

EOCS 4350/6350. Curriculum Planning in Occupational Studies. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for occupational studies programs.

EOCS 4360/6360. Instructional Strategies in Occupational Studies. 3 hours.
Teaching materials, methods, techniques, and strategies utilized in programs of occupational studies.

EOCS 4990/6990. Topics in Occupational Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Contemporary issues in occupational studies with emphasis on the effect of these issues on education and the workplace.

EOCS 5030/7030. Organizing and Coordinating Work and Community-Based Education Programs. 3 hours.
Planning, implementing, and directing various school-to-career transition models in education.

EOCS 5050/7050. Problems of Teaching Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Selection, utilization, and evaluation of strategies that support effective teaching in occupational studies.

EOCS 5060/7060. Student Organizations in Occupational Studies. 2 hours.
Student organizations in occupational studies programs, emphasizing contributions of organizations to the curricula. Planning, directing, and evaluating activities such as group and individual projects. Techniques of leadership and group development are included.

EOCS 5120/7120. Needs Analysis in Occupational Studies. 3 hours.
Techniques in analyzing occupations, industry, human resources, and communities to determine instructional and training content.

EOCS 5450/7450. Internship in Business and Industry. 1-3 hours. Repeatable for maximum 6 hours credit.
Guided learning experiences in a business or industry for the purpose of updating a student's knowledge or skills in an occupational area. Non-Traditional Format: Supervised experience in an occupational setting.

EOCS 5550/7550. Students With Special Needs in Programs of Occupational Studies. 3 hours.
Learning characteristics of students with special needs, including those who are disabled, economically and academically disadvantaged. Implications for oc-

cupational studies are considered and modifications of curriculum and instruction are identified.

EOCS 6010. Foundations of Work and Family Life Education. 3 hours.
Philosophic and historical foundations for occupational and family life education.

EOCS 6030. Supervision of Occupational Teaching. 3 hours.
Theoretical and research base for the supervision of student teachers in occupational studies; policies, procedures, and problems related to the supervised teaching program.

EOCS 7020. Assessing Student Learning in Occupational Studies. 3 hours.
Nature and function of assessing student learning in programs of occupational studies.

EOCS 7070. Enhancing Learning in Occupational Studies. 3 hours.
Learning theory and research in programs of occupational studies.

EOCS 7080. Developing Curricula and Programs for Modern Work. 3 hours.
Curriculum theories and models for planning, developing, and evaluating programs of occupational instruction. Social, psychological, philosophical, and practical factors which influence curricular development and implementation are included. Focus is on learning theories and assumptions as applied to curriculum in occupational studies.

EOCS 7200. Evaluation of Programs in Occupational Studies. 3 hours.
Concepts, principles, and procedures basic to the evaluation of programs in occupational studies.

EOCS 7460. Internship in Teaching Occupational Studies. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Teaching internship in an occupational studies program under the supervision of a classroom teacher and a faculty member in occupational studies. Non-Traditional Format: Supervised experience in educational setting.

EOCS 7560. Diversity in Occupational Education and Work. 3 hours.
Prerequisite: EOCS 5550/7550.
Current issues relevant to students from economically disadvantaged and/or culturally diverse backgrounds. Characteristics of individuals deemed at-risk of school failure, relationship of poverty and cultural diversity, applicable legislation, and educational and societal responsibilities.

EOCS 7650. Applied Project in Occupational Studies. 3 hours.
Topic or problem in occupational studies significantly related to the student's professional responsibility. Non-Traditional Format: Independent study completed under the supervision of a faculty member.

EOCS 8000. Technology for Education in the Workplace. 3 hours.
Technology for educational and workplace environments. Teaching/learning paradigms that influence the application of educational technologies within the context of education and the workplace.

EOCS 8020. International Occupational Education. 3 hours.
Occupational education systems and international applications. Analysis of factors affecting international work and the planning of international occupational programs are emphasized.

EOCS 8030. Organizational Behavior in Programs of Occupational Studies. 3 hours.
Theories and models of behavior in organizations and institutions offering programs in occupational studies. Theories affecting adaptation and change; determinants of individual, interpersonal, and group behavior; and institutional structures and processes are examined.

EOCS 8060. Administration and Supervision of Occupational Studies Programs. 3 hours.
Administration and supervision of organizations engaged in occupational education. Management theories of empowerment, team learning, collaboration, and implementation of systems for continuous organizational learning.

EOCS 8990. Research Seminar in Occupational Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Development of research skills necessary to identify an appropriate dissertation topic and prepare the prospectus.

EOCS 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

EOCS 9010. Workforce Issues and Policy Development. 3 hours.
Prerequisite: EOCS 6010.
Sociological, economic, political, and demographic trends that impact on occupational education at the local, state, national, and international levels.

EOCS 9020. Leadership Development in Occupational Studies. 3 hours.
Leadership philosophies, theories, and research as related to organizations engaged in occupational studies and training. Research and theory are translated into practice for educational leaders in occupational studies.

EOCS 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 27 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major

professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

EOCS 9600. Educational Research In Occupational Studies. 3 hours.
Critical evaluation of research literature, research paradigms, future research needs, and research design/methodology in occupational studies.

EOCS 9630. Critique of Educational Literature in Occupational Studies. 3 hours.
Research studies, dissertations, and journal articles in occupational studies are analyzed in preparation for the development of the dissertation proposal.

EOCS 9800. Practicum in Occupational Studies. 1-9 hours. Repeatable for maximum 9 hours credit.
Guided learning opportunities allowing students to test principles in the field and to relate theory to practice in an occupational or educational setting. Non-Traditional Format: Supervised full-time experience in either an educational or business industry setting.

Technological Studies

ETES 4350/6350. Developing Programs in Technological Studies. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for technological studies.

ETES 5010/7010. Technology and Society. 3 hours.
Impact of technology on society and culture. Included is the investigation of positive and negative aspects of various technologies, with specific attention to the technology education curriculum.

ETES 5020/7020. Communication Systems. 3 hours.
Communication technology in business and industry. Use of microcomputer applications for computer graphics, desktop publishing, electronic presentation, and telecommunications, including layout and design principles and procedures, graphic production systems, photographic processes, societal impacts, and innovative technologies.

ETES 5030/7030. Manufacturing Systems. 3 hours.
Manufacturing through the design, planning, and development of a specific product.

ETES 5040/7040. Construction Systems. 3 hours.
Construction practices used to produce structures in residential and commercial settings. Special emphasis placed on safety in laboratory-based education.

ETES 5060/7060. Energy Systems. 3 hours.
Present and future applications of the technical, economic, and environmental aspects of energy systems and evaluation of their advantages and disadvantages.

ETES 5070/7070. Research and Experimentation in Technological Studies. 3 hours.
Solving technological problems through the analysis and implementation of technical research and experimentation methods. Suitable research and experimentation activities will be developed and analyzed for technology education programs in secondary schools.

ETES 5140/7140. Laboratory Planning, Management, and Safety. 3 hours.
Planning and managing laboratories, including the development of a safety program and selection of equipment, tools, and supplies.

ETES 7080. Critical Issues in Technological Studies. 3 hours.
Current problems and issues, contemporary trends, strategies for initiating change, and resources needed to implement changes in technological studies.

ETES 7090. Principles of Technology. 3 hours.
Technological literacy acquired through applied physics concepts and laws. Special emphasis on teaching the integration of mathematics, science, and technology scholarship.

ETES 7100. Appropriate Technological Development. 3 hours.
Research and development of self-help technologies used to create and maintain appropriate levels of technological growth. Focuses on field projects, programs, and consultancies testing and demonstrating applications of relevant and efficient technological solutions to problems.

ETES 7460. Internship in Technological Studies. 1-12 hours. Repeatable for maximum 12 hours credit.
Work-based program of student activities, such as administration, supervision, teaching, curriculum, or staff development in an existing technological studies program. Non-Traditional Format: Supervised full-time experience in school setting.

ETES 7650. Applied Project in Technological Studies. 3 hours.
Research and development of a topic or problem in technological studies as related to the student's career. Non-Traditional Format: Arranged meetings with student in person and/or through distance learning technology to guide development of the project.

Reading Education

David Reinking, *Head*
Michelle Commeyras, *Graduate Coordinator*
542-4621
(Aderhold Hall)

READ 6000. Special Problems in Literacy. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Approved independent research project pertaining to literacy. Non-Traditional Format: Independent research.

READ 6010. Foundations of Reading Instruction. 3 hours.
Principles and practices in preschool through secondary reading instruction.

READ 6020. Children With Reading Problems. 3 hours.
Prerequisite: READ 4010 or READ 6010 or permission of department.
Formal and informal assessments, instructional procedures and materials for improving decoding, word recognition, comprehension, and study skills.

READ 6030. Teaching Reading in the Secondary School. 3 hours.
Concepts and strategies for developing reading and study skills needed by students in secondary schools.

(READ)EADU 6040. Teaching Reading to Low-Literate Adults. 3 hours.
Causal factors contributing to adult literacy and undereducation and instructional approaches appropriate for teaching adults to read.

READ 6050. Materials for Reading Instruction. 3 hours.
Prerequisite: READ 4010 or READ 6010 or permission of department.
Theoretical and practical examination of materials for teaching reading.

READ 6060. Content Area Literacy. 3 hours.
Theory and instructional strategies for enhancing reading, writing, speaking, and listening across various subjects in the school curriculum.

READ 6070. Middle School Reading. 3 hours.
Prerequisite: (READ 4010 or READ 6010) and permission of department.
Instructional practices, materials, and evaluation techniques for comprehensive reading programs in middle schools.

READ 6080. Teaching College Reading. 3 hours.
History of post-secondary reading programs, characteristics of college reading and college readers, and instructional methods and materials for improving college reading.

READ 6100. Foundations of Reading Instruction. 3 hours.
Reading instruction for students enrolled in the alternative master's program.

READ 6420. Literacy Development and Instruction in Early Childhood. 3 hours.
Emergent literacy development of preschool through grade three children; theory and research relevant to instructional approaches and practice.

READ 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

READ 7020. Practicum in Clinical Reading. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: READ 6020 or permission of department.
Supervised experience in assessing and tutoring children having problems learning to read.

READ 7110. Computer-Based Instruction in Reading Education. 3 hours.
Integration of computers into instruction to enhance literacy in elementary through secondary schools.

READ 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

READ 7460. Internship in Reading Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised field-based experience related to teaching reading. Non-Traditional Format: This is a directed study course. Format, assignments, and hours are to be determined by the professor on a case-by-case basis. Student workload will be commensurate with credit received upon successful completion of the course.

READ 7800. Sociopolitical Perspectives in Literacy Education. 3 hours.
Classroom practices and research that represent humanist, social constructionist, critical, and poststructural theories and their implications for literacy education.

READ 8150. Topics in Computer-Based Reading and Writing. 3 hours.
Theory and research comparing printed and digital forms of written discourse and their effects on literacy.

READ 8170. Psychology of Reading. 3 hours.
Psychological foundations of reading ability, instructional methods, and materials.

READ 8300. Culture, Literacy, and the Classroom. 3 hours.
Prerequisite: READ 4010 or READ 6010 or permission of department.
Social and cultural factors that affect learning and teaching of literacy; application of multicultural perspectives to curriculum development and classroom literacy practice.

READ 8500. Research in College Reading. 3 hours.
Prerequisite: READ 6080 or permission of department.
Post-secondary reading with a focus on theoretical and methodological issues.

READ 8880. Theories of Reading Comprehension. 3 hours.
Prerequisite: READ 4010 or READ 6010 or permission of department.
Theoretical understandings of reading comprehension relevant to the development of curriculum, evaluation of teaching, and the design and interpretation of research.

READ 8990. Seminar in Reading Education. 1-2 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Contemporary topics related to literacy and to becoming active participants in the community of literacy scholars.

READ 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

READ 9010. Special Topics in Reading Education. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A topic related to emerging trends, practices, or research in an area related to literacy.

READ 9020. Advanced Topics in Reading Problems. 3 hours.
Prerequisite: Permission of department.
The literature pertaining to reading problems.

READ 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

READ 9600. Research in Reading Education. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Approved independent research in reading education in student's field of specialization through pure or applied research under the direction of a faculty member. Non-Traditional Format: Instructor to determine requirements for appropriate grades on a case-by-case basis.

READ 9630. Critique of Research Literature in Reading Education. 3 hours.
Prerequisite: Permission of department.
Theory and research in reading education including classic and contemporary works.

READ 9700. Internship in Reading Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Advanced field-based experience related to the teaching of reading. Non-Traditional Format: This is an independent study-in-the-field course. Requirements for satisfactory course completion are to be determined on a case by case basis between the professor and the student, in accordance with departmental and school policy and precedent.

Science Education

Thomas R. Koballa, *Head*
Michael J. Padilla, *Graduate Coordinator, 542-9191*
(Aderhold Hall)

ESCI 4000/6000. Special Problems in Science Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Specialized study appropriate to the needs of the individual. Non-Traditional Format: Independent study.

ESCI 4030/6030. Teaching Science to Students with Special Educational Needs. 3 hours.
Basis and practice of modifying science programs/teaching for students with special educational needs and introductory skills for modifying science programs/teaching strategies.

ESCI 4450/6450. Science Curriculum and Learning. 3 hours.
Prerequisite: EPSY 2020 and EFND 2030.
Science curriculum models for students in grades 7 through 12 in relation to goals for science education and classroom practice. Development, selection, and evaluation of curricular materials based on research in learning.

ESCI 4460/6460. Methods of Science Teaching. 3 hours.
Prerequisite: EPSY 2020 and EFND 2030.
Corequisite: ESCI 3450 and ESCI 4450/6450.
Science instructional strategies and classroom assessment for students in grades 7 through 12. Classroom management, lesson planning, and safety in the science classroom.

ESCI 4470/6470. Special Topics in Science Teaching. 2 hours.
Selected modules on science teaching and learning on special topics such as applications of life science teaching; applications of physical science teaching; interdisciplinary science teaching; multimedia and computers in science teaching; reading, writing, and literacy in science.

ESCI 4480/6480. Technological Capabilities for Science Teaching. 3 hours.
Prerequisite: Permission of department.
Corequisite: ESCI 4450/6450.
Classroom applications of electronic technologies to science teaching, including analog audiovisual media, microcomputers, telecommunications networks, and their interactions. Technology-facilitated teaching

strategies and curriculum integration in science teaching at the middle and secondary school levels.

ESCI 5460/7460. Science Education Student Teaching. 11 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5470/7470 and ESCI 5480/7480.
School-based experiences in grades 7 through 12 under the supervision of a university supervisor. Non-Traditional Format: Eleven weeks, full-time experience.

ESCI 5470/7470. Reflection on Science Teaching. 2 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5460/7460 and ESCI 5480/7480.
Topics following student teaching include development as a reflective practitioner, preparation for being a first year teacher, and professional portfolio development.

ESCI 5480/7480. Philosophy and Leadership in Science Classroom Practice. 2 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5460/7460 and ESCI 5470/7470.
Historical, cultural, social, political, and professional influences related to science classroom practice in grades 7 through 12.

ESCI 6200. Science, Technology, and Society. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Science, technology, and society (STS) related goals and activities in the K through 12 curriculum. Emphasis is placed on STS issues in the state of Georgia.

ESCI 6220. Marine Environmental Education. 3 hours.
Teaching strategies to interpret marine and coastal environments.

ESCI 6230. Environmental Science Education. 3 hours.
Prerequisite: Permission of department.
Environmental curriculum materials and how they can be implemented in the science classroom.

ESCI 6420. Science for Early Childhood Education. 3 hours.
Science content selection and organization, lesson and unit planning, science teaching and assessment materials, and the sociocultural construction of science knowledge by young children.

ESCI 6990. Research Seminar in Science Education. 3 hours.
Research and evaluation studies in science education.

ESCI 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ESCI 7020. Teaching Science in the Elementary School. 3 hours.
Prerequisite: Permission of department.
Instructional practices, materials, and assessment in teaching biological, physical, and earth sciences in the elementary school.

ESCI 7040. Teaching Strategies for Middle and Secondary School Science Teachers. 3 hours.
Prerequisite: Permission of department.
Improvement of instructional competencies of teachers of science in middle and secondary schools. Includes preparation in the planning and implementation of instructional strategies.

ESCI 7060. Technology in Science Education. 3 hours.
Prerequisite: ESCI 4480/6480 or EDIT 2020 or permission of department.
Analysis of research, practice, and policy issues regarding the role of electronic technologies in science teaching, curriculum development, and teacher education.

ESCI 7080. Curriculum Planning in Science Education. 3 hours.
Science curriculum from early childhood to high school. Social, psychological, philosophical, and practical influences on science curriculum are applied to the process of selecting and developing curriculum materials.

ESCI 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ESCI 7650. Applied Project in Science Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
A topic or problem in science education significantly related to the student's professional responsibilities.
Non-Traditional Format: Student working on project for MA degree.

ESCI 8060. Affective Domains in Science Education. 3 hours.
Values and attitudes embodied in science and technology education. Students will formulate objectives, use instructional techniques, and implement evaluation procedures directed toward important outcomes of the affective domain.

ESCI 8100. International Science Education. 3 hours.
Science education instruction, curriculum, and policy issues in countries with developed and emerging economies.

ESCI 8120. Science Writing and Literature Retrieval. 3 hours.
Scientific writing and literature retrieval techniques in

the sciences. Familiarization with library resources and their use through manual and automated retrieval systems and on practical aspects of oral and written communications of scientific information.

ESCI 8200. Science Supervision. 3 hours.
Supervision and evaluation of school science programs.

(ESCI)EFND 8210. Multicultural Education Research. 3 hours.
Prerequisite: EFND 7200 and permission of department.
Using multicultural education research articles, chapters, and books; familiarization of seminal multicultural education research studies; and a critical analysis of the research done in one area are the foci of the course.

ESCI 8990. Research Seminar in Science Education. 1-6 hours. Repeatable for maximum 9 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Integration of theoretical construction in research design and analysis into practical application to science education research, both published and proposed. Non-Traditional Format: Students will meet with faculty members on a regular basis.

ESCI 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ESCI 9010. Problems of Teaching College Sciences. 3 hours.
Instructional practices in higher education with special emphasis on the teaching and learning of science. The establishment of appropriate goals, the selection of effective teaching methods, and the critical elements of assessment will serve as core topics.

ESCI 9020. History and Theory of Science Education. 3 hours.
Science education's historical and theoretical background and its influence on current science teaching practices. Examines contributions by science educators and learning theorists who have influenced classroom practices and curriculum development.

ESCI 9080. Science Curriculum Theory and Practice. 3 hours.
Prerequisite: Permission of department.
Historic and present day school science curricula. Literature, recent national reports, as well as national, state, and local standards, will be examined as a context which frames curriculum and its development.

ESCI 9300. Doctoral Dissertation. 3-15 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

ESCI 9600. Educational Research in Science Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research practicum while involved in a research problem, including activities such as searching the literature, collection of data, or processing data. Non-Traditional Format: Research practicum.

ESCI 9630. Critique of Educational Literature in Science Education. 3 hours.
Interpretation and evaluation of selected research and theoretical writings in science education.

ESCI 9700. Internship in Science Education. 1-9 hours. Repeatable for maximum 9 hours credit.
The development of instructional materials and their use in classroom settings based on the student's professional responsibility. Non-Traditional Format: Internship.

ESCI 9730. Science Teacher Education - Theory and Practice. 3 hours.
Research and practice of science teacher education, including historical perspectives, models for the preparation of teachers, and reform movements.

Social Foundations of Education

Judith Preissle, *Department Head*
542-8931
Carl Glickman, *Graduate Coordinator*
542-8931
(630 Aderhold Hall)

The Department of Social Foundations of Education offers only a PhD program. The PhD program is primarily for individuals who seek careers in higher education where their coursework will have, among other purposes, a continuing emphasis on the development of theory and research on teaching, learning, schooling, and education. The PhD program in the social foundations of education will provide academic studies to graduate students in the questions of why educate and for what purpose? The program will prepare scholars to produce knowledge about the social, cultural, historical, and ethical contexts in which students, teachers, and other educators study, teach, and provide educational services.

EFND 6000. Special Problems in Social Foundations of Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Study of a problem in social foundations of education through library research or collection and analysis of primary data. Non-Traditional Format: Individual study supervised directly by a faculty member.

EFND 7010. Comparative and International Education. 3 hours.
Theory, policy, and practice in selected educational systems. Examines data and models from educational systems around the world. Critiques important themes: race, ethnicity, class, and gender; the role of education in national development; cross-cultural research; and major development in the methodology of comparative education.

EFND 7020. History of Education in the United States to 1865. 3 hours.
United States educational history from Colonial America through the Civil War.

EFND 7030. History of Education in the United States Since 1865. 3 hours.
United States educational history from the end of the Civil War to the present.

EFND 7100. Gender and Education. 3 hours.
Issues, research, theory, and policy on gender and education. Gender effects in socialization, schooling, and lifelong learning are analyzed for their implications for individuals, society, and culture.

EFND 7110. The African American Educational Experience. 3 hours.
African American educational experience since 1865. The history of racial discrimination and the ongoing struggle for equal opportunity in American education. Black America's educational leadership, philosophies, tactical disputes, and schools; desegregation process; white reformers and the black community.

EFND 7120. Sociological Theories of Education. 3 hours.
Theories of social structure, stratification, and social change. Relationships among social institutions and educational processes and outcomes, and how various social institutions contribute to the maintenance of existing structured inequalities.

EFND 7140. The Social and Cultural Contexts of Teaching. 3 hours.
Perspectives of education and schooling practices that shape teacher-student relations. Teacher preparation programs and school structures in United States society and how these contexts influence and organize the classroom community.

EFND(ANTH) 7150. Anthropology of Education. 3 hours.
Cultural aspects of educational processes, institutions, and issues in societies around the world organized around comparative analysis. Topics include education as cultural process and social function, as sociocultural structure, as cultural transaction, and as cultural product.

EFND 7200. Multicultural Education in the United States. 3 hours.
Racial and cultural identity; ways oppression appears in students' lives and schooling policies and practices; connections between gender, feminist, and sexuality issues and education; relationships of empowerment to social changes, assessment, and evaluation; and associations among knowledge construction, culture, and the learning of school disciplines.

EFND 8010. Philosophy of Education. 3 hours.
Philosophical questions concerning education. Topics include metaphysical, epistemological, and ethical issues of teaching, curriculum, and educational institutions.

EFND 8040. Pragmatism and Education. 3 hours.
Educational writings of William James, Charles S. Pierce, and John Dewey.

EFND 8060. Social and Political Philosophies of Education. 3 hours.
Analyzes educational problems from standpoint of various social and political theories. Theorists considered are Locke, Hegel, Marx, Nietzsche, and Dewey. Educational problems examined include authority, curriculum, public good, social oppression, and equality. Class presentations and papers focus on application of political theory to contemporary educational issues.

EFND 8070. Ethics and Education. 3 hours.
Theories of value and evaluation, ethical discourse and arguments, and other uses of ethics in educational writings.

EFND 8080. Contemporary Philosophies of Education. 3 hours.
Recent developments in the field as revealed in current literature. Topics include foundationalism, self identity, multiculturalism, and equality as they pertain to education.

EFND 8100. Research in Educational History of the United States. 3 hours.
Research methods in the history of education.

EFND 8130. Education as Democracy. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Conceptions of public education congruent with principles of democratic society. Topics include foundational works, constitutional interpretations, traditional canons, multiculturalism, post-modernism/critical theory, and relationships between school reform and perspectives on American democracy.

EFND 8150. Education and Cultural Knowledge. 3 hours.
Transmission and transformation of cultural knowledge and symbolic orders in schools and other educational institutions around the world. How culture

interacts with beliefs and knowledge and how teachers' and students' belief systems and cultural models interact in social contexts to contribute to continuity and change.

EFND 8160. Ethnography of Educational Organizations. 3 hours.
Educational organizations around the world: their social structures, functions, and ideologies, supplemented by analysis of youth organizations and other agencies with educational goals.

EFND(ESCI) 8210. Multicultural Education Research. 3 hours.
Prerequisite: EFND 7200 and permission of department.
Using multicultural education research articles, chapters, and books; familiarization of seminal multicultural education research studies; and a critical analysis of the research done in one area are the foci of the course.

EFND 8330. School Reform and Public Education. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Current attempts to reform public education. Topics include elements of reforms and views of education, policies that obstruct or enhance change, and purposes and consequences of reforms as challenges to conceptions of education, schooling, and society.

EFND 8400. Critical Race Theory and Education. 3 hours.
Theoretical and ideological debates about race, oppression, and power; conceptions of race identity, oppression, resistance, and empowerment in relation to American culture and society; critiques of social, historical, and cultural shapes of race theories.

EFND 8450. Cultural Politics of Post-Colonial Education. 3 hours.
Prerequisite: EFND 7100 or EFND 7110.
Education as a key institutional and discursive site where cultural forms and practices are constituted, transmitted, and transformed. Major twentieth-century options for theorizing cultural politics will be applied to a study of intersections of race, class, and gender, and their relationships with power structures as manifested in educational contexts.

EFND 8500. Research Methods in Foundations of Education. 3 hours.
Theoretical and ethical principles involved in designing and conducting foundations of education research: research question development, research document collection, literature reviews, sampling strategies, data collection. A variety of research approaches will be considered.

EFND 8990. Research Seminar in Social Foundations of Education. 1-3 hours.
Prerequisite: Permission of department.
Research design issues in social foundations of education. Non-Traditional Format: A combination of lecture, discussion, and team research.

EFND 9600. Research in Social Foundations of Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed independent research in social foundations of education. Non-Traditional Format: Directed research.

EFND 9630. Critique of Educational Literature in Social Foundations of Education. 3 hours.
Prerequisite: Permission of department.
Research and other literature in social foundations of education.

EFND 9700. Internship in Social Foundations of Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised internship in instruction, curriculum development, supervision, or evaluation in social foundations of education. Non-Traditional Format: Internship.

Social Science Education

John D. Napier, *Head*
John D. Hoge, *Graduate Coordinator, 542-7265*
(Aderhold Hall)

ESOC 4000/6000. Special Problems in Social Science Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Intensive study of a problem in social science education through library research or collection and analysis of primary data. Non-Traditional Format: Individual study supervised by a faculty member.

ESOC(HIST) 4150/6150. Teaching United States History. 3 hours.
Classic historiography and current debates among historians over major themes and events in United States history. Examination of ways in which this historical scholarship can be incorporated into social studies teaching. Evaluation of materials and methods used to teach United States history in secondary and middle schools.

ESOC 4350/6350. Social Science Curriculum in Secondary Schools. 3 hours.
Prerequisite: ESOC 2450 or permission of department.
Current status of and trends in the social science curriculum in secondary schools, with illustrations of selected curriculum models for both cognitive and affective learning.

ESOC 4360/6360. Methods of Teaching Social Science in Secondary Schools. 3 hours.
Prerequisite: Permission of department.
Instructional objectives and the examination and application of instructional procedures, utilization of media, and methods of evaluation.

ESOC 4400/6400. Teaching Social Studies in the Middle Grades. 3 hours.
Prerequisite: Permission of department.
Instructional procedures and materials focusing upon the cognitive and affective processes relevant to middle grades social studies education.

ESOC 5010/7010. Teaching of Geography. 3 hours.
Prerequisite: Permission of department.
Geographic principles and the history of geography in the school curriculum; the literature of the field, including textbooks; the application of special techniques; and geographic evaluation.

ESOC 5200/7200. Economic Education in the Social Science Curriculum. 3 hours.
Instructional strategies and materials for teaching basic economic concepts in an integrated kindergarten through grade 12 social science curriculum, with emphasis on utilizing a decision-making model for analyzing contemporary economic problems.

ESOC 5460/7460. Student Teaching in Social Science Education. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Teaching social studies in the middle or secondary grades under supervision of school and university professional personnel. Non-Traditional Format: In-school teaching experience in middle and secondary grades social studies supervised by faculty.

ESOC 5520/7520. Teaching Politics, Government, and Citizenship. 3 hours.
Prerequisite: Permission of department.
Rationale for and resources in political science and civic/citizenship education, the role of teachers and schools in political socialization, and teaching procedures for instruction on state and local citizenship in middle grades and high schools.

ESOC 6380. Computer Technology Applications in Social Science Education. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Applications of computer technology for teaching social studies in middle and secondary grades, including instructional design, adaptation, and authoring; accessing resources through computer technology.

ESOC 6990. Research Seminar in Social Science Education. 3 hours.
Fundamentals of research in social science education.

ESOC 7000. Master's Research. 1-9 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

ESOC 7050. Problems of Teaching Secondary Social Studies. 3 hours.
Selection, utilization, and evaluation of teaching procedures in history and the social sciences to various ability levels of students.

ESOC 7080. Curriculum Planning in Social Sciences. 3 hours.
Selection, utilization, and evaluation of curricular content and materials in history and the social sciences appropriate to various ability levels of pupils.

ESOC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

ESOC 7420. Social Studies for the Young Child. 3 hours.
Social studies curriculum and instruction models relevant to instruction for preschool and primary level children.

ESOC 7650. Applied Project in Social Science Education. 3 hours.
Prerequisite: Permission of department.
A topic or problem in social science education significantly related to the student's professional responsibilities. Non-Traditional Format: Individual student research supervised by a faculty member.

ESOC 8010. History of Social Studies Education. 3 hours.
Prerequisite: Permission of department.
Major themes, ideas, and personalities in the historical development of curriculum and instruction in social studies in the United States since 1880, including comparisons to selected other nations.

ESOC 8250. Values Education for Citizenship. 3 hours.
Prerequisite: Permission of department.
Theory, research, and classroom practice in values education, focusing specifically on the development of values needed for citizenship in a democracy. Various contemporary and historic approaches to values education, curriculum materials, and state and district policies.

ESOC 8990. Research Seminar in Social Science Education. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research design problems in social science education.

ESOC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional

Format: Independent research under the direction of a faculty member.

ESOC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

ESOC 9600. Research in Social Science Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Directed independent research in social science education. Non-Traditional Format: Individual research supervised by a faculty member.

ESOC 9630. Critique of Educational Literature in Social Science Education. 3 hours.
Prerequisite: Permission of department.
Review and analysis of research and other literature in social science education.

ESOC 9700. Internship in Social Science Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised internship in instruction, curriculum development, supervision, or evaluation in social science education. Non-Traditional Format: Individual professional work supervised by a faculty member.

Social Work Education

Nancy P. Kropf, *Graduate Coordinator, 542-5429*
(Tucker Hall)

Course of study requirements for students interested in school social work can be obtained by contacting the Graduate Coordinator.

ESWK 7155. Practicum in School Settings. 4 hours. Repeatable for maximum 8 hours credit.
Not open to students with credit in SOWK 7055.
Prerequisite: Permission of department.
Field experience in schools integrating knowledge of human behavior and interventive practice models appropriate for school settings.

ESWK 7417. Home, School, and Community Practice. 2-3 hours. Repeatable for maximum 3 hours credit.
Relationships among home, school, and community systems. Identifies approaches to linking those systems in the best interest of children/youths.

Special Education

Cheri A. Hoy, *Head*
David L. Gast, *Graduate Coordinator, 542-4617*
(Aderhold Hall)

The Department of Special Education offers the following degrees with a major in special education: MEd, EdS, and PhD.

SPED 4000/6000. Directed Study in Special Education. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Specialized training appropriate to the needs of selected individuals. Non-Traditional Format: Directed study.

SPED 7000. Master's Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SPED 7010. Clinical Assessment in Special Education. 3 hours.
Prerequisite: Permission of department.
Corequisite: SPED 7010L.
Theory and practice in the use of standardized and dynamic evaluation techniques required for the assessment and program planning of individuals with disabilities.

SPED 7010L. Special Education Assessment Practicum Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: SPED 7010.
Laboratory in the assessment of special education.

SPED 7100. Early Childhood Special Education. 3 hours.
Prerequisite: Permission of department.
Seminar in early childhood special education, including history of and rationale for early intervention from birth through age five, typical and atypical early development, family and diversity issues. Emphasis is on assessment, including screening and play-based assessment.

SPED 7110. Mental Retardation. 3 hours.
Prerequisite: Permission of department.
The characteristics of individuals with mental retardation across the lifespan. Theory and current issues as they relate to definition, assessment, eligibility, diversity, service delivery, and family needs.

SPED 7120. Learning Disabilities. 3 hours.
Prerequisite: Permission of department.
Characteristics of individuals with learning disabilities across the lifespan. Theory and current issues as they relate to definition, assessment, eligibility, diversity, service delivery, and family needs.

SPED 7130. Behavioral Disorders. 3 hours.
Prerequisite: Permission of department.
The characteristics of individuals with behavioral disorders across the lifespan. Theory and current issues as they relate to definition, assessment, eligibility, diversity, service delivery, and family needs.

SPED 7200. Methods and Curriculum in Early Childhood Special Education. 3 hours.
Prerequisite: SPED 7100 and permission of department.
Program models, instructional methods, and curricula in early childhood special education. Emphases are on developmentally appropriate practice, family systems, diversity, transitions, and methods for collaboration.

SPED 7210. Methods for Teaching Functional Skills. 3 hours.
Prerequisite: Permission of department.
Behavioral psychology learning principles and procedures in the design of instructional programs to teach basic life skills. Focus is on data-based instructional strategies that facilitate skill acquisition, fluency, maintenance, and generalization.

SPED 7220. Methods for Teaching Academic Skills. 3 hours.
Prerequisite: Permission of department.
Research-based methods and materials used to teach academic skills to persons with mild disabilities across different school and vocational settings.

SPED 7230. Methods for Teaching Social Skills. 3 hours.
Prerequisite: Permission of department.
Behavioral analysis as applied to socially significant behavior. Emphases include skills curricula, social behavior across cultures, school- and community-based instruction, generalization of skills, and validation of intervention procedures.

SPED 7240. Methods for Postsecondary Transition. 3 hours.
Prerequisite: Permission of department.
Instructional procedures, demographics, social policies, and school and post-school factors that predict successful transitions for individuals with disabilities. Collaborative transition models, supported employment, independent and supported living, education/training, and community-based instruction are emphasized, as are service-delivery issues related to diverse populations.

SPED 7240L. Postsecondary Transition Laboratory. 1-3 hours. Repeatable for maximum 3 hours credit. 1-3 lab periods of 1-3 hours each per week.
Prerequisite: Permission of department.
Development and/or implementation of curricula models and/or transition models.

SPED 7250. Written Language Disorders. 3 hours.
Prerequisite: Permission of department.
The literature on the psychology of written language for individuals with developmental disabilities from diverse backgrounds and cultures.

SPED 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

SPED 7440. Practicum in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised field experience related to teaching individuals with disabilities. Non-Traditional Format: Field based practicum.

SPED 7460. Internship in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: SPED 7440 and permission of department.
Supervised culminating field experience related to teaching individuals with disabilities. Non-Traditional Format: Field based internship.

SPED 7500. Advanced Technology in Special Education. 3 hours.
Prerequisite: [(SPED 4040 and SPED 4040L) or (EDIT 2020 or EDIT 6150)] and permission of department.
Technology-based solutions for persons with disabilities. Emphases include technological applications of situated learning, system analysis, and issues related to diversity.

SPED 7500L. Advanced Technology in Special Education Laboratory. 1-3 hours. Repeatable for maximum 3 hours credit. 1-3 lab periods of 1-3 hours each per week.
Prerequisite: Permission of department.
Specialization in technology matching the participants' degree programs.

SPED 7600. Topics in Special Education. 3 hours.
Prerequisite: Permission of department.
Critical discussion of contemporary and cutting edge issues of people with disabilities. Non-Traditional Format: Seminar in special education.

SPED 7630. Critique of Literature in Special Education. 3 hours.
Prerequisite: Permission of department.
Analysis of literature related to contemporary issues in special education.

SPED 7650. Applied Project in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research study of a topic or problem in special education related to the student's professional work. Non-Traditional Format: Individual or applied project.

SPED 8000. Directed Study in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Specialized and advanced study in special education. Non-Traditional Format: Directed study.

SPED 8320. Laws Affecting Individuals with Disabilities. 3 hours.
Prerequisite: Permission of department.
Court rulings, legislative enactments, administrative regulations, and their impact on the function of general and special education in providing public education for individuals with disabilities.

SPED 8370. Single-Subject Research Methodology in Special Education. 3 hours.
Prerequisite: Permission of department.
Research methods related to individuals with disabilities that employ single-subject research methodology. The design of a research proposal that uses single-subject research methodology.

SPED 8990. Research Seminar in Special Education. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Current issues in special education research. Non-Traditional Format: Individual or special projects.

SPED 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SPED 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

SPED 9600. Issues and Trends in Special Education. 3 hours.
Prerequisite: Permission of department.
Contemporary issues and trends impacting the education of people with disabilities.

SPED 9800. Advanced Practicum in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Practicum in special education at an advanced level. Non-Traditional Format: Advanced field-based practicum.

SPED 9930. Internship: College Teaching in Special Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A supervised internship involving college teaching of special education. Non-Traditional Format: Internship.

SPED 9940. Internship: Supervision of Special Education Teachers. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised internship concerning the supervision of students in field settings. Non-Traditional Format: Internship.

The School of Environmental Design

John F. Crowley, Dean
(Caldwell Hall)

The School of Environmental Design offers two graduate degree programs: Master of Landscape Architecture (initiated 1954) and Master of Historic Preservation (initiated 1982). Both programs are concerned with the quality of environments. Each is directed by a graduate coordinator. Each program publishes detailed information for prospective applicants. Request information specifically about the MLA or MHP program from the Graduate Studies Office, School of Environmental Design, Caldwell Hall, University of Georgia, Athens, GA 30602, (706) 542-4720, dkent@arches.uga.edu.

Master of Landscape Architecture (MLA): Applicants are accepted into the program from both design and non-design backgrounds. Those entering without the BLA (or equivalent degree) are admitted into the three-year degree program. Applicants holding a recent BLA degree enter directly into the second year of study. Applicants holding the BLA degree with ten or more years' responsible professional experience may apply for a one-year accelerated program emphasizing specialization.

The MLA program is structured around a sequence of design studios, lecture and seminar courses and electives. Design studios are supported by required courses in theory, landscape construction, plant communities, professional practice, and research methods and applications. Areas of specialization are supported by elective courses both within the School and from other departments.

All candidates are required to have their applications completed prior to March 31 of the year they plan to enter. Completion prior to December 30 is to the student's advantage. Graduate Record Examination scores are a required part of a complete application.

A limited number of scholarships and assistantships are administered by the School and the University.

Master of Historic Preservation (MHP): Students from diverse backgrounds are often surprised to discover the manner in which their undergraduate degree may either relate directly to historic preservation or provide skills useful in the pursuit of historic preservation as a career. Thus, interested individuals are encouraged to visit the School to explore their potential for success in this new career area. As an area of academic study, historic preservation has been available for just three decades. Within this period, there has been a rapid expansion of career opportunities at the various levels of government as well as within the private sector. The Academic Common Market makes it possible for many students to attend at in-state rates.

The two-year program of study, required for the Master of Historic Preservation degree, provides a comprehensive program which includes an internship as well as a thesis. Financial assistance, in the form of research assistantships, is available on a competitive basis. Students interested in applying for assistantships for the following year must have been accepted for admission by April 1.

In addition to the MHP program, the School, in cooperation with the School of Law, offers a joint JD/MHP four-year combined degree as well as a Preservation Studies Certificate Program. The School is a member of the National Council of Preservation Educators and meets their standards for academic programs in historic preservation.

Environmental Design

EDES 4090/6090. Architectural Design. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6020.
Major design determinants in architecture. Inquiry into structural, functional/programmatic, theoretical, and environmental issues will be focused on developing an understanding of the relationship between architecture and landscape.

EDES 4100/6100. Historic Preservation Design Studio. 4 hours. 2 lab periods of 4 hours each per week.
An advanced design studio focused on contemporary preservation issues. Emphasis will be placed on new design and community planning.

EDES 4250/6250. Advanced Computer-Aided Design. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of computer-aided design software for the development of environmental design and land planning projects.

EDES 4260/6260. Computer Rendering and Animation. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of computer rendering and animation software for the visualization of site design and land planning projects.

EDES 4270/6270. Environmental Design Uses of Geographic Information Systems. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of geographic information systems software for the development of environmental design and land planning projects.

EDES 4610/6610. Vernacular Architecture. 3 hours.
Vernacular or folk architecture around the world and through history. Emphasis will be on how built form is a response to natural/physical and socio-cultural determinants. Both anthropological and art historical approaches to the subject will be explored.

EDES 4620/6620. Evolution of American Architecture. 3 hours.
Prerequisite: (EDES 2510 and EDES 2520) or EDES 6510.
History of American architecture from colonial times to World War II. Emphasis is on the development of both built form and the intellectual and social currents influencing that form.

EDES 4630/6630. The History and Theory of Twentieth-Century Architecture. 3 hours.
Prerequisite: EDES 2520 or permission of school.
The major monuments and theories of world architecture from the early modern period to the present. Major monuments will be presented in slide lecture; theory in readings and discussions.

EDES 4640/6640. The History of Urban Planning. 3 hours.
Prerequisite: (EDES 2510 and EDES 2520) or EDES 6510 or permission of school.
Major movements and monuments in the history of urban planning. The first half of the course will cover the world from ancient times to the present; the second half will focus on America from colonial times to the present.

EDES 4650/6650. City Planning. 2 hours.
The study of urban places. Planning processes and regulatory tools and techniques used by urban communities to achieve community goals and objectives.

EDES 4660/6660. Environment and Behavior: Theory and Practice. 2 hours.
The interactions and relationships between people and their physical environments. Focuses on the social, behavioral, and cultural aspects of design.

EDES 4670/6670. History of Landscape Technology and Management. 2 hours.
Prerequisite: EDES 2520 or EDES 6510.
Technological influence upon attitudes toward nature and natural resources that result in a changed landscape.

EDES 4680/6680. Conservation of Culturally Significant Resources in Rural Areas. 2 hours.
Prerequisite: Junior standing.
The cultural evolution of rural landscapes in the United States. Exploration of approaches and methodologies used in identifying and protecting significant features, both natural and cultural, in a constantly changing environment.

EDES 4920/6920. Directed Study in Computer Application. 1-3 hours. Repeatable for maximum 9 hours credit. 1-3 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Supervised research into computer-generated visualizations as they may be applied in environmental design and land planning.

EDES 6210. Representation and Communication I. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Drawing, computer graphics, and other methods of representing and communicating design ideas.

EDES 6220. Representation and Communication II. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 6210.
Exploration of a variety of methods of representing and communicating design ideas.

EDES 6510. Evolution of the American Landscape. 2 hours.
Corequisite: LAND 6010.
The ways in which Americans of various historical periods and in diverse places have shaped the landscape to accommodate specific needs and to express cultural attitudes, values, and aspirations.

EDES 6520. Ideas of the Garden. 2 hours.
Corequisite: LAND 6020.
The garden as an archetypal concept through which different cultural groups have expressed their understanding of the world and of human history from ancient times to the present.

EDES 6530. Ideas of Nature. 2 hours.
Corequisite: LAND 6030.
The idea of nature as a cultural construct that is continually subject to reappraisal and revision with critical implications for the environmental sciences, the design arts, and humanistic studies.

EDES 6540. Ideas of Community and Place. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Corequisite: LAND 6040.
The relationship between concepts of community and the physical environments (home, village, town, city, region) that may be designed in ways that foster personal and societal commitment to community and place.

EDES 6900. Research Strategies. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of school.
Alternative methods of inquiry appropriate to environmental design.

EDES 7350. Landscape Management. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Landscape management techniques with an emphasis on the values of environmental conservation and historic preservation.

EDES 7550. Values in Environmental Design. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Corequisite: LAND 7050.
The societal values that attach cultural significance to some places but not others and the forms (scientific, literary, artistic) through which these judgements are promulgated or subverted.

Historic Preservation

John C. Waters, *Graduate Coordinator, 542-4706*
(Denmark Hall)

HIPR 4000/6000. Introduction to Historic Preservation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of school.
Historic preservation theory, its evolution and practice, and its relationship to the concept of environmental quality.

HIPR 6100. Cultural Resource Assessment. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: HIPR 4000/6000.
Identification, assessment, and documentation of cultural resources at all scales from historic interiors and individual sites to distinct districts and entire townscapes.

HIPR 6150. Rural Preservation. 3 hours.
Prerequisite: Permission of school.
The evolution of the rural historic landscape, its aesthetic values, preservation problems, and legal and financial resources available for landscape preservation. Open space planning will be emphasized.

HIPR 6200. Preservation Law. 3 hours.
Prerequisite: HIPR 4000/6000.
Analysis of significant national, state, and local preservation laws and ordinances, and the legal functions for these laws; major legal challenges past, current, and anticipated; and, a review of the positive and negative effects of the application of various legal measures on the historic environments they protect.

HIPR 6320. Historic Resource Documentation. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 6210 or permission of school.
The skills and processes of documenting historic resources at basic, intermediate, and archival levels, utilizing both graphic and photographic techniques.

HIPR 6350. Building Materials Conservation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HIPR 4000/6000.
Restoration and rehabilitation theory and practice. Emphasis is on the history of building technology and the identification and treatment of common conservation problems in historic structures.

HIPR 6510. Preservation Economics/Grant Writing. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HIPR 4000/6000.
The economic impact of preservation upon communities, its measurement in terms of both financial and environmental benefits and the financial needs and fiscal management of preservation organizations and agencies, with emphasis upon the development and preparation of funding and/or grant proposals.

HIPR 6600. Design Guidelines. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: HIPR 4000/6000 or permission of school.
Theory and practice of compatible change within historic districts, the evaluation and documentation of visual character, how to set design goals and produce design guidelines regarding additions to historic buildings, rehabilitation and restoration, new construction, improving the compatibility of non-contributing buildings, signage, urban design and setting, and landscapes.

HIPR 6720. Preservation Advocacy/Professional Practice. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: HIPR 4000/6000.
Preservation advocacy strategies and techniques with emphasis on application to preservation issues and problems and the improvement of individual commu-

nication, behavioral, and management skills, including conflict resolution. Beyond advocacy there will be a focus upon the ethical standards and operational practices expected of preservation professionals.

HIPR 6750. Special/Independent Studies. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of school.
Individual special studies or projects which provide the opportunity to pursue research interests in historic preservation. Non-Traditional Format: Directed study.

HIPR 6800. Contemporary Preservation Perspectives. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of school.
Preservation issues, preservation practice, and special preservation topics as related to the concerns of preservation professionals, preservation organizations and agencies, and the protection and interpretation of regional historic resources.

HIPR 6850. Historic Preservation Planning Studio. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: HIPR 4000/6000 or permission of school.
The theory and techniques of preservation planning. Emphasis on survey of historic resources and development of community preservation programs.

HIPR 7000. Master's Research. 1-6 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HIPR 7300. Master's Thesis. 1-3 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of school.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

Landscape Architecture

Bruce K. Ferguson, *Graduate Coordinator, 542-4720*
(Denmark Hall)

LAND 4070/6070. Garden Design in America. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6020.
Design traditions which have shaped American gardens over the past 200 years with emphasis on the twentieth century, and plants, uses, design forms, and environmental conditions through which these traditions have been expressed. Designing gardens informed by traditional models.

LAND 4080/6080. Gardens as Nurturing Environments. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6020.
Physical, psychological, perceptual, and cultural influences of garden design, with an emphasis on gardens for healing, play, discovery/learning, and other sensory/therapeutic stimuli.

LAND 4150/6150. Land Development Studio. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6340.
Land development process. Landscape architecture and real estate students prepare a report that includes absorption, targeted market, estimates, financial feasibility, site planning, design, and building types to be reviewed by a visiting jury of developers, designers, planners, and brokers.

LAND 4400/6400. Plant Communities of the Southeast. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: LAND 4360 or LAND 6320.
The plant communities of the southeastern United States, with emphasis on botanical and aesthetic characteristics, factors affecting community composition, and community dynamics.

LAND 4580/6580. Landscapes in Painting, Poetry, Literature, and Design. 2 hours.
Prerequisite: EDES 1500 or EDES 6520.
The appreciation and understanding of nature, landscape, and garden in painting, poetry, and literature. Study of how changing attitudes to the environment affect aesthetic appreciation of landscape and are reflected in the design of gardens and the description of landscapes in art and literature.

LAND 4710/6710. Professional Practice. 2 hours.
Prerequisite: Junior standing.
The legal environment of business focusing on public and private law. Professional relations during project management, resolution of disputes, the court system, torts, real property/liens, contract law, specification writing, insurance bonds, business organizations, ethics, and professional registration.

LAND 4800/6800. Field Study in Contemporary Landscape Architecture. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: (LAND 2020 and EDES 2520) or permission of school.
Current and historic works and individuals in the fields of landscape architecture, architecture, historic preservation, and urban design in the United States. The class will visit significant projects, offices, national parks, and landmarks during a ten to fourteen-day trip to another region of the country. Non-Traditional Format: Field study.

LAND 4810/6810. Field Study in American Garden Design. 2 hours.
Prerequisite: LAND 4070/6070.
Recognized professional firms, garden designers, and gardens central to the evolution and current culture of

garden design in America. Non-Traditional Format: Course consists of a 10-11 day field trip to earn two hours credit.

LAND 4910/6910. Independent Project. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Special study or project under the direction of faculty.

LAND 4911/6911. Independent Project. 1-6 hours.
Prerequisite: Permission of school.
Special study or project under the direction of faculty. Non-Traditional Format: Directed study.

LAND 4912/6912. Independent Project. 1-6 hours.
Special study or project under the direction of faculty. Non-Traditional Format: Directed study.

LAND 6010. Landscapes. 4 hours. 2 lab periods of 4 hours each per week.
Corequisite: EDES 6510.
Design, an appreciation of materials and an understanding of processes. Studio projects selected to expose students to the wide range of approaches to design and landscapes.

LAND 6020. Gardens. 4 hours. 2 lab periods of 4 hours each per week.
Corequisite: EDES 6520.
The garden as the central image and metaphor in landscape architecture. Studio projects selected to explore the image and the metaphor in a variety of social and environmental contexts.

LAND 6030. Nature and Sustainability. 4 hours. 2 lab periods of 4 hours each per week.
Corequisite: EDES 6530.
Concepts of nature and their implications for landscape architecture, with particular attention to the issue of sustainability. Projects selected to investigate alternative design strategies in a variety of environments from wilderness to city center.

LAND 6040. Community and Place. 4 hours. 2 lab periods of 4 hours each per week.
Corequisite: EDES 6540.
Concepts of community and place in architecture and urban design and their implications for landscape architecture. Projects selected to investigate alternative design strategies at a variety of scales and densities of habitation, from a single dwelling unit to a city.

LAND 6310. Landscape Ecology: Materials and Processes. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Landforms, geology, hydrology, soils, and biotic communities, with an examination of ecological concepts and their application at the landscape scale.

LAND 6320. Landscape Design: Materials and Processes. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
The history and ecology of plants and related materials associated with the design of gardens.

LAND 6330. Landscape Construction and Engineering I. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Landscape construction and engineering through inquiry into their ability to implement values of sustainability.

LAND 6340. Landscape Construction and Engineering II. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: LAND 6330.
Applications of landscape construction and engineering through inquiry into their ability to implement values of community and place.

LAND 6700. Landscape Architecture Internship. 3 hours.
Prerequisite: Permission of school.
Professional office experience under the supervision of licensed landscape architects or related practitioners. Non-Traditional Format: Professional office experience under the supervision of licensed landscape architects or related practitioners. A minimum of two months full-time supervised employment for eight credits.

LAND 7000. Master's Research. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

LAND 7050. Design and Meaning. 4 hours. 2 lab periods of 4 hours each per week.
Corequisite: EDES 7550.
A studio inquiry into how a place acquires meaning and significance, and the implications of this for landscape architecture. Projects selected to investigate alternative design strategies in a variety of historical contexts from "old" to "new" places.

LAND 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of school.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

LAND 7850. Practicum in Teaching Landscape Architecture. 3 hours.
Prerequisite: Permission of school.
Experience in teaching undergraduate professional skills under the direction of a faculty mentor. Non-Traditional Format: Experience in teaching undergraduate professional skills under the direction of a faculty mentor.

The College of Family and Consumer Sciences

Sharon Y. Nickols, Dean
(Dawson Hall)

The College of Family and Consumer Sciences offers the Doctor of Philosophy and Master of Science degrees in each of its departments: Child and Family Development; Foods and Nutrition; Housing and Consumer Economics; and Textiles, Merchandising, and Interiors. The Department of Child and Family Development and the Department of Foods and Nutrition also offer the Master of Home Economics degree. A Pre-Professional Certificate in Marriage and Family Therapy is also offered to graduate students meeting certain requirements. (Please see Index.) The Department of Child and Family Development offers an AAMFT accredited program. A certificate is also available in gerontology. (Please see Index.) Facilities include well equipped laboratories in foods, nutrition, clothing, textiles, housing and family resource management; the Marriage and Family Therapy Clinic; the McPhaul Child and Family Development Center for infants and young children; and the computer laboratories located in Dawson Hall. Applications for admission and requests for assistantships should be addressed to the graduate coordinator in the department of interest.

Child and Family Development

Patsy L. Skeen, *Head*
Sharon J. Price, *Graduate Coordinator, 542-4831*
(Dawson Hall)

The MS and PhD programs are designed to: enable students to gain and demonstrate competencies in acquiring, integrating, and applying substantive and theoretical knowledge of both child development and family relationships; provide knowledge and skills for conducting research on individual and family development and behavior; and enable students with skills for engaging with individuals, families and other professionals in processes that prevent or solve problems and promote competence and well-being.

CHFD 4080/6080. Advanced Human Development. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2950-2950L.
Theoretical perspectives and philosophical issues in human development across the life span from an interdisciplinary perspective. Special reference to techniques of child guidance.

CHFD 4090/6090. Advanced Infant Development. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CHFD 3900.
Emotional, social, cognitive, and physical development in infancy. Supervised observation in Infant Center and in selected homes.

CHFD(HACE) 4500/6500. Second Half of Life. 3 hours.
Prerequisite: Junior standing or permission of department.
Second half of life; resource management, living patterns, and housing, sexuality, roles, family relationships, community and organization involvement, and career opportunities.

CHFD 4600/6600. Older Individuals. 3 hours.
Prerequisite: CHFD(HACE) 4500/6500.
Older individuals in marriage, family, and society. Special attention given to marital relationships, widowhood, parent and adult-child relationships and care giving, social networks and ecological issues as they affect older individuals and their families.

CHFD(SOCI) 4610/6610. The Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Family study utilizing data from the fields of anthropology, individual and social psychology, history, sociology, economics, and psychiatry. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CHFD 4620/6620. Women in the Family and Society. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Women's experiences and gender issues in relation to

family and individual development. Research and policy implications are examined.

CHFD 4700/6700. The Family and Adolescence. 3 hours.
Prerequisite: Undergraduate level only: CHFD 3700.
Advanced consideration of unique features of the family that includes an adolescent member. Special attention is given to dual processes of adolescent development and family development.

CHFD 4810/6810. Hospitalized Child and the Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 and CHFD 2950-2950L and permission of department.
Developmental and psychosocial issues of hospitalized children and their families. Organization and services in health care settings investigated.

CHFD 4850/6850. Family Development. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 or SOCI 1101.
Families as social groups that develop their own patterns, meanings, and processes across family life cycle in both conventional and alternative family forms.

CHFD 4860/6860. Parent Education and Child Guidance. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 and CHFD 2950-2950L.
Application of theory, research, and developmental practice to understanding the role of parents, teachers, and community leaders in guiding the behavior of children from birth through adolescence, and to establishing mutually satisfying parent-child relationships through the life cycle. Programs for parents and parental interactions with schools and other social institutions.

CHFD 4870/6870. Human Sexuality Across the Life Span. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Attitudes toward and values associated with human sexuality, based on substantive and theoretical information, with emphasis on how development and interactions across the life span are affected by familial, social, cultural, and psychological factors.

CHFD 5120/7120. Observation and Assessment Techniques. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2950-2950L.
Directed experiences in observing, recording, and assessing behavior and interaction among children and families, and examination of program assessment.

CHFD 5130/7130. Creative Activities for Young Children. 3 hours.
Prerequisite: CHFD 4860/6860.
Quality individual and group programming for young children based upon current theory, research, and developmentally appropriate practice. Special emphasis will be placed upon the integration of creative activities including art, music, movement, nutrition, health, dramatic play and computer applications.

CHFD 5140/7140. Group Programs for Young Children. 9 hours. 5 hours lecture and 4 lab periods of 4 hours each per week.
Prerequisite: Undergraduate level only: CHFD 3900.
Developmental and educational theories applied to the design, content, and implementation of group programs for young children.

CHFD 5160L/7160L. Administration of Children's Programs. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHFD 4860/6860 and CHFD 5140/7140.
Theories and administration of child care programs. Topics include planning, scheduling, enrollment, certification, and evaluation. Laboratory work required.

CHFD 5710/7710. Study Tour in Child and Family Development. 3-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Selected topics in child and family development. Combined with site visits to relevant locations. Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

CHFD 5900/7900. Preinternship Orientation. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Junior or senior standing or permission of department.
Orientation to and preparation for doing an internship.

CHFD 5910/7910. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in settings with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 5920/7920. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in programs for children under six with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 5930/7930. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in human development programs with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 5940/7940. Internship in Child and Family Development. 1-12 hours.
Prerequisite: Permission of department.
Supervised professional practice in special needs programs with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 5950/7950. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in administrative programs with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 5960/7960. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: CHFD 5900/7900 and permission of department.
Supervised professional practice in Child Life programs with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

(CHFD)ECHD(SOWK) 6010. Issues in Marriage and Family Therapy. 3 hours.
Prerequisite: Permission of school.
Disciplines and professional groups related to marriage and family therapy, including historical, ethical, and legal issues, and other topics relevant to the current practice of marriage and family therapy.

CHFD 6100. Theories of Human Development. 3 hours.
Prerequisite: Permission of department.
Theoretical and historical perspectives used in the study of human development across the lifespan.

CHFD 6110. Issues in Human Development. 3 hours.
Prerequisite: Permission of department.
Integration of classic and current research literature on human development across the life span.

CHFD 6630. Theories of Family Relationships. 3 hours.
Prerequisite: Permission of department.
Theoretical and philosophical perspectives used in the study of families.

CHFD 6640. Issues in Family Relationships. 3 hours. Not open to students with credit in CHFD(SOCI) 4610/6610.
Prerequisite: Permission of department.
Integration of classic and current research literature on families from an ecological, life-span perspective.

CHFD 6800. Research Methods. 3 hours.
Prerequisite: Permission of department.
Research design in selected areas of family and consumer sciences. Emphasis on common problems incurred in measurement and data analysis.

CHFD 7000. Master's Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CHFD 7010. Directed Study in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Directed reading and/or research under supervision of the instructor. Non-Traditional Format: Directed study.

CHFD 7210. Problems in Child and Family Development. 3 hours.
Prerequisite: Permission of department.
Individual guidance in the development of a significant project related to the student's field of work. Written report of problem or project required. Non-Traditional Format: Directed study.

CHFD 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

CHFD 7970. Interdisciplinary Collaboration in the Context of Disability. 3 hours.
Prerequisite: Permission of department.
The support of individuals with disabilities and their families through team-oriented collaboration. Team models, organizational aspects of teams, individual roles and attitudes, interpersonal factors, individual and group diversity, and leadership are addressed in relation to successful collaboration.

CHFD 7980. Foundations of Early Intervention with Children Birth to Age Three. 3 hours.
Prerequisite: Permission of department.
Historical and theoretical perspectives on intervention with children and disabilities from birth to age three. Addresses the impact of disability risk factors on children in relation to typical development norms and stresses challenges to culturally-sensitive intervention strategies, assessment, parent/program consultation, and interagency coordination.

CHFD 7990. Working with Families in Early Intervention. 3 hours.
Prerequisite: Permission of department.
Seminar on values, policies, and strategies that promote successful intervention with families of children with disabilities. Family diversity, family assessment, parent-professional partnerships, family service coordination, and family-focused interagency interaction are addressed in relation to family roles, structure, and process.

CHFD 8050. Family Systems Theory. 3 hours.
Prerequisite: Permission of department.
Experience in marriage and family therapy through observation of healthy marital/family systems. Structured experiences to develop skills in interviewing, assessing couple/family functioning, making limited therapeutic interventions, observing couple/family interaction, and developing basic aspects of the client-therapist relationship.

CHFD 8060. Principles of Marital and Family Therapy I. 3 hours.
Prerequisite: Permission of department.
Principles, theoretical approaches, specific objectives, and techniques currently used in marriage and family therapy. The focus will be on normal developmental problems rather than on psychopathology.

CHFD 8070. Principles of Marital and Family Therapy II. 3 hours.
Prerequisite: Permission of department.
Additional principles, theoretical approaches, specific objectives, and techniques currently used in marriage and family therapy. The focus will be on normal developmental problems rather than on psychopathology.

CHFD 8080. Marriage and Family Assessment. 3 hours.
Prerequisite: CHFD 8700.
Observational and self-report measures used to assess aspects of marriage and family life with emphasis on reliability, validity, and theoretical issues. Application in educational and clinical settings emphasized.

CHFD 8090. Research Methods in Marriage and Family Intervention. 3 hours.
Prerequisite: Permission of department.
Quantitative and qualitative research designs used to study the process and outcome of marriage and family interventions.

CHFD 8700. Philosophy of Science in Child and Family Development. 3 hours.
Prerequisite: Permission of department.
Integration of literature on history and philosophy of science as it pertains to the study of human development and families across the life span.

CHFD 8710. Principles of Life-Span Human Development. 3 hours.
Prerequisite: CHFD 8700.
Integration of theoretical and research literature as it pertains to study of human development over the life span with an emphasis on contextual-systemic approaches to family and individual development.

CHFD 8720. Ecological Perspective on Individual and Family Diversity. 3 hours.
Prerequisite: CHFD 8700.
Theoretical, historical, and philosophical perspectives on diversity and similarity in individual and family development. Considers transactions among families and individuals and other significant contexts as moderated by diversity. Emphasizes implications for service delivery, treatment, policy, and marriage and family therapy.

CHFD 8800. Quantitative Methods in Child and Family Development. 4 hours.
Prerequisite: Permission of department.
Quantitative research processes, conceptualization of research problems, research designs, selection of appropriate methods of data collection, consideration of alternative data analysis strategies, interpretation of findings, and research writing. Research on marital and family therapy included.

CHFD 8810. Qualitative Methods in Child and Family Development. 4 hours.
Prerequisite: Permission of department.
Qualitative research processes, conceptualization of research problems, research design, selection of appropriate methods of data collection, consideration of alternative data analysis strategies, interpretation of findings, and research writing. Research in marital and family therapy included.

CHFD 8820. Evaluation Methods in Child and Family Development. 3 hours.
Prerequisite: Permission of department.
Evaluation research processes; prevention/intervention settings; research problems; research designs; selection of appropriate methods of data collection; alternative data analysis strategies, including measurement of change; interpretation of findings; and research/evaluation report writing. Research in marital and family therapy included.

CHFD 8910. Current Research and Issues in Child and Family Development. 1-2 hours. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Current research of faculty, graduate students, and visiting scholars. Discussion of current issues pertaining to child and family development.

CHFD(PSYC) 8920. Behavior Problems in Children. 3 hours.
Prerequisite: Permission of department.
The child's adjustment to his or her environment with a consideration of the causes, treatment, and prevention of behavior problems. Utilization of case materials and research problems in the field will be carried out by the student. Non-Traditional Format: Research problems in the field will be carried out by students.

CHFD 8950. Seminar in Child and Family Development. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Current literature on selected areas in child and family development; discussion of current research trends; reports and discussion on selected topics; completion of review of empirical research paper.

CHFD 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

CHFD 9010. Directed Study in Family and Child Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study and/or research under supervision

of an instructor. Non-Traditional Format: Directed study.

CHFD 9070. Practicum in Marriage and Family Therapy. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised experience in marriage and family therapy. Non-Traditional Format: Practicum.

CHFD 9080. Supervision of Marriage and Family Therapy. 3 hours. 2 hours lecture and 3 lab periods of 1 hour each per week.
Prerequisite: Permission of department.
Methods of supervision in marriage and family therapy.

CHFD 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

CHFD 9900. Preinternship Orientation. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Orientation and preparation for doing a doctoral level internship. Non-Traditional Format: Preinternship course with seminar style.

CHFD 9910. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in off-campus settings with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

CHFD 9920. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in on-campus settings with employed persons with a degree in Child and Family Development or related field. Non-Traditional Format: Internship.

Foods and Nutrition

Roy J. Martin, *Head*
Mary Ann Johnson, *Graduate Coordinator, 542-2292*
(Dawson Hall)

The objectives of the MS and PhD programs are to prepare students to function as nutrition professionals, to meet changing needs of society and industry, and to generate scholarly work in the areas of foods and nutrition. Graduates are placed in research positions with universities, medical schools, federal laboratories, and industry. The primary emphasis of the program is the scientific basis for diversity in the human needs for foods and nutrients, the metabolic responses to dietary change, and the interactions among genetics, nutrients and food consumption patterns on human health and well-being. The Preprofessional Practice Program (AP4) equips students with the skills needed to become a Registered Dietitian.

FDNS 4050/6050. Optimal Nutrition for the Life Span. 3 hours.
Not open to students with credit in FDNS 4510/6510.
Prerequisite: FDNS 2100.
Nutritional needs of infants, young children, adolescents, pregnant and lactating women, and middle-aged and elderly people.

FDNS 4100/6100. Micronutrient Nutrition. 4 hours.
Prerequisite: FDNS 3100 and BCMB(BIOL)(CHEM) 3100 and (CBIO 2210-2210L or VPHY 3100).
Human needs for vitamins, minerals, and electrolytes with emphasis on biochemistry, physiology, epidemiology, food sources, and their role in performance under varying conditions of age and health.

FDNS 4510/6510. Nutrition Related to the Human Life Cycle. 3 hours.
Prerequisite: FDNS 3100.
Nutritional health needs related to specific stages of the human life cycle. Special emphasis will be given to physiological changes and nutrition needs during pregnancy, lactation, infancy, childhood, adolescence, and adulthood.

FDNS 4520/6520. Dietetic Practice and Nutrition Support. 2 hours.
Corequisite: FDNS 4530/6530.
Specialized nutrition practice in the clinical setting including nutrition assessment, enteral and parenteral nutrition, and nutrition care documentation.

FDNS 4530/6530. Medical Nutrition Therapy. 4 hours.
Prerequisite: FDNS 4100/6100.
Diet modifications for disease prevention and treatment. Special emphasis is given to the study of gastrointestinal disease and metabolic, cardiovascular, and renal disorders.

FDNS 4540/6540. Public Health Dietetics. 3 hours.
Prerequisite: FDNS 4050/6050 or FDNS 4510/6510.
Nutrition in public health care and tools for successful management and delivery of nutrition services, including knowledge of community assessment, planning, implementation, and evaluation as related to nutritional care.

FDNS 4550/6550. Nutritional Biodynamics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDNS 3100.
Nutrients as precursors for organ and cell components and energy stores, emphasizing processes of turnover, growth, biosynthesis, and metabolism. Students will explore quantitative and dynamic issues using interactive computer modeling.

FDNS 4560/6560. Nutrition and Aging. 3 hours.
Prerequisite: (FDNS 3100 or FDNS 4050/6050) and (CBIO 2210-2210L or VPHY 3100).
Foods and nutrients in the health and well-being of the elderly; effects of aging on macro and micronutrient needs; influence of disease, medications, economics, and culture; nutritional assessment, support, and services; health promotion and disease prevention; future directions for research.

FDNS 4600/6600. Food and the Consumer. 3 hours.
Prerequisite: FDNS 3600-3600L.
Health, safety, and policy issues related to food consumption trends; nutrient composition of foods, food additives, food allergies and hypersensitivities, naturally occurring toxins, pathogens, pesticides, biotechnology-derived foods, irradiated foods, and food laws and regulations.

FDNS 4610/6610. Foodservice Procurement and Financial Management. 2 hours.
Prerequisite: FDNS 3610-3610L.
Purchasing methods, specifications, storage and issuing procedures, inventory systems. Cost control, budgets, and financial statements used in foodservice organizations.

FDNS 4620/6620. Management of Foodservice Organizations. 3 hours.
Prerequisite: FDNS 4610/6610.
Management, staffing, and delivery systems as they pertain to the resources and organization of public and private foodservice institutions.

FDNS 4630/6630. Cultural Aspects of Foods and Nutrition. 3 hours.
Prerequisite: FDNS 2100.
Foodways, food habits, and food-related behavior of various population groups and their influences on the nutritional status of group members.

FDNS 4640/6640. Food Sanitation and Safety. 3 hours.
Prerequisite: FDNS 3600-3600L.
Safe food handling for foodservice and the consumer, with emphasis on causes and prevention of foodborne illness.

FDNS 4650/6650. Experimental Study of Food. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: [(FDNS 2100 and FDNS 3600-3600L and STAT 2000 or STAT 2210] or permission of department.
Prerequisite or corequisite: CHEM 2200 and CHEM 2200L.
Functional and nutritional properties of components in food products; techniques to evaluate food products for consumer acceptability including individual and group laboratory experimentation; computer applications.

FDNS 4660/6660. Delivery Systems for Food and Nutrition Information. 3 hours.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and one course in Speech.
Transfer of food and nutrition information to consumers using various media.

FDNS 4710/6710-4710L/6710L. Catering. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDNS 3610-3610L or permission of department.
Types of catering; establishing catering businesses; principles and practice of menu planning, work planning, food preparation, styles of service, cost accounting, and resource management.

FDNS 4720/6720. Menu Management and Service. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Meal planning and service styles for individuals, families, and institutions; cultural, nutritional, marketing, and social aspects of foods; government regulations related to meal planning.

FDNS 4730/6730. Food Sales and Service. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Effective sales and service techniques; market research and strategies specific to the foodservice industry.

FDNS 4740/6740. Food Service Facilities Planning and Development. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Concepts, strategies, and skills needed in planning, designing, and equipping food service facilities.

FDNS 4750/6750. Foodservice Cost Controls and Systems. 3 hours.
Prerequisite: FDNS 4620/6620 or permission of department.
Cost control and accounting principles for the foodservice industry; manual and computer information systems for foodservice inventory and cost control.

FDNS 5910/7910. Foods and Nutrition Internship. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and permission of department.
Supervised experience in dietetics, foodservice management, or a foods and nutrition related industry. Non-Traditional Format: Supervised practice experience only. Variable hours.

FDNS 6400. Advanced Macronutrients. 4 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and VPHY 3100.
Literature of human nutrition related to macronutrients; includes metabolism, genetics, physiology, biochemistry, endocrinology, and epidemiology.

FDNS 6580. Graduate Special Topics in Foods and Nutrition. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FDNS 4100/6100 or FDNS 6400 or permission of department.
Selected topics from the field of foods and nutrition.

FDNS 7000. Master's Research. 1-12 hours. Repeatable for maximum 35 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FDNS 7010. Directed Research in Foods and Nutrition. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Individual guidance in the development of a research project. A written report of the problem or project will be required. Non-Traditional Format: Directed research.

FDNS 7210. Problems in Foods and Nutrition. 3 hours.
Prerequisite: Permission of department.
Individual guidance in the development of a significant project related to the student's field of work. Written report of problem or project required. Non-Traditional Format: Directed study.

FDNS 7300. Master's Thesis. 1-12 hours. Repeatable for maximum 35 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

FDNS 7930. Consumer Foods Internship. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Work in a public or private institution to obtain practical professional experience. Non-Traditional Format: Internship.

FDNS 8510. Metabolic Controls in Nutrition. 3 hours.
Prerequisite: [FDNS 6400 and BCMB 4020/6020] or permission of department.
Regulatory mechanisms of nutrition and metabolism, including current genetic theories on metabolic controls and their dysfunction in human health.

FDNS 8520. Nutritional Aspects of Growth and Development. 3 hours.
Prerequisite: [FDNS 4100/6100 and FDNS 6400 and BCMB 4020/6020] or permission of department.
Tissue and cellular development during prenatal and neonatal periods of growth, including current concepts of nutritional and hormonal regulation of cellular proliferation and differentiation.

FDNS 8530. Nutrition and Disease Processes. 3 hours.
Prerequisite: [FDNS 4100/6100 and FDNS 6400] or permission of department.
Epidemiological, clinical, animal, and cellular studies linking diet and diseases such as cancer, heart disease, and osteoporosis. Mechanisms by which nutrients prevent disease.

FDNS 8540. Mineral Nutrition and Human Health. 3 hours.
Prerequisite: FDNS 4100/6100 and FDNS 6400.
Literature on human mineral nutrition, including molecular biology, physiology, and epidemiology, with special emphasis on the role of minerals in optimal health.

FDNS 8560. Dissertation/Thesis Proposal Writing. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Proposal preparation and presentation for planning thesis/dissertation research.

FDNS 8580. Special Topics in Foods and Nutrition. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: (FDNS 6400 and BCMB 4010/6010) or permission of department.
Recent developments in the field of foods and nutrition.

FDNS 8900. Seminar in Foods and Nutrition. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Literature on selected topics in foods and nutrition.

FDNS 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 35 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FDNS 9010. Directed Research in Foods and Nutrition. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study and/or research under supervision of a faculty member. No more than six hours may be counted toward master's degree requirements. Non-Traditional Format: Directed research.

FDNS 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 35 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Housing and Consumer Economics

Brenda Cude, *Head*
Teresa Mauldin, *Graduate Coordinator,*
542-4854
(Dawson Hall)

The MS program offers flexibility in selecting coursework to meet a variety of career goals in either housing or consumer economics. The PhD program provides students with the opportunity to pursue scholarly activities by providing a thorough acquaintance with consumer economics or housing policy, quantitative methods in applied economics, research methods and statistics. Students take core courses in the department and supporting coursework in statistics and related area(s) outside the department.

HACE 4100/6100. Family Economic Behavior and Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 3150.
The family as an income producing and time allocating unit. Theory and applications of the economics of household decision making. The family as the supplier and demander of economic inputs and outputs. The interrelationship between demographic and economic family characteristics and well-being.

HACE 4200/6200. Advanced Family Financial Management. 3 hours.
Prerequisite: Undergraduate level only: HACE 3200.
Personal income taxes, life insurance, disability insurance, liability insurance, savings and investment, retirement planning, and estate planning.

HACE 4300/6300. Advanced Housing Theories. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Sociological and economic theories of housing consumption and production in housing markets, including basic concepts of housing needs, quality, norms and satisfaction. Economic theories relating to characteristics of housing and capital markets, including primary and secondary mortgage markets and alternative financing.

HACE 4310/6310. Housing Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Housing policies at the federal, state, and local levels as they relate to current housing markets. Barriers and incentives for housing development activities created by regulations, finance, and taxation. The role of public/private initiatives in the provision of housing.

HACE 4350/6350. Household Technology and Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Technological devices and their use within the household, including mechanical and electrical systems, home automation, universal design, regulation, and national appliance standards.

HACE 4400/6400. Family Demographics and Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 2100 or SOCI 1101.
Basic concepts and measurement issues of family demography, including migration, income, marriage, and divorce; implications of family structural characteristics for public policies.

(HACE)CHFD 4500/6500. Second Half of Life. 3 hours.
Prerequisite: Junior standing or permission of department.
Second half of life; resource management, living patterns, and housing, sexuality, roles, family relationships, community and organization involvement, and career opportunities.

HACE 4900/6900. Seminar in Housing and Consumer Economics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Selected topics and problems in housing and consumer economics.

HACE 5100/7100. Consumer Protection. 3 hours.
Prerequisite: Undergraduate level only: HACE 3150.
Consumer rights and responsibilities in the private and public sector of the economy. Relationship of government, nonprofit, and corporate response to consumer problems, legislation concerning consumer information, product safety, and choice of goods and channels of appeal for the consumer.

HACE 5150/7150. Consumers' Market Environment. 3 hours.
Prerequisite: HACE 3100 and HACE 3150.
The consumer marketplace in terms of the welfare of the consumer. Actions of consumers with changing marketplace, institutions, and government policies.

HACE 5200/7200. Family Financial Counseling. 3 hours.
Prerequisite: Undergraduate level only: HACE 3200.
Indicators, causes, and impact of family financial problems on the family's well-being. Topics covered include credit difficulties, repossessions, liens, garnishments, and bankruptcy. Non-Traditional Format: Students are required to work on a regular basis with families in financial difficulty.

HACE 5250/7250. Family Financial Planning. 3 hours.
Prerequisite: HACE 4200/6200.
Advanced financial topics and development of a comprehensive financial plan. Regulation, certification,

and legal and ethical requirements for financial planners.

HACE 5350/7350. Housing Counseling. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Basic information for certification as a Professional Housing Counselor. Includes basic techniques for housing, budget, and tenancy counseling.

HACE 5710/7710. Study Tour in Housing and Consumer Economics. 3-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Topics relating to housing or consumer economics, with site visits to relevant locations. Combines in-depth study with first-hand experience gained on site. Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

HACE 5900/7900. Professional Seminar and Internship Orientation. 1 hour.
Orientation to an internship experience.

HACE 5910/7910. Housing and Consumer Economics Internship. 3-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Supervised work experience in housing, consumer economics, or consumer journalism. Non-Traditional Format: Internship.

HACE 6810. Housing the Elderly. 3 hours.
Housing needs and conditions, housing alternatives, legislation and current programs related to housing elderly persons. Survey of current housing is compared to proposals for effectively meeting more of the housing needs of the elderly person.

HACE 7000. Master's Research. 3-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HACE 7010. Directed Study in Housing and Consumer Economics. 3-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Directed study on masters research in housing and consumer economics. Non-Traditional Format: Directed study.

HACE 7300. Master's Thesis. 3-18 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

HACE 8000. Research Methods in Housing and Consumer Economics I. 3 hours.
Research design. Emphasis on common problems incurred in measurement and data analysis in housing and consumer economics.

HACE 8050. Research Methods in Housing and Consumer Economics II. 3 hours.
Prerequisite: HACE 8000 and permission of department.
Advanced research methods. Integration of research design, measurement, and data analysis. Preparing a research proposal on topics in housing and consumer economics.

HACE 8100. Theory of Households and Markets I. 3 hours.
Contemporary theories of consumer and household decision making. Includes neoclassical economic analysis, the household production model, information costs, and related material.

HACE 8150. Theory of Households and Markets II. 3 hours.
Prerequisite: HACE 8100.
A continuation of Theory of Households and Markets I. Emphasis on application, extension, and integration.

HACE 8200. Family Financial Analysis. 3 hours.
Prerequisite: HACE 8150 or permission of department.
Family financial decision making over the life cycle. Advanced techniques in present and future value analysis. Economics of saving and borrowing, insurance and risk management, and retirement and estate planning. Effects of public policy on household financial decisions, and the interrelationship between family finance and the labor market.

HACE 8300. Housing Theories, Research, and Policies. 3 hours.
Theoretical and empirical housing models and concepts. Building on previous research, the student will develop and test his/her own conceptual model.

HACE 8400. Demographics and Policy. 3 hours.
Prerequisite: Permission of department.
Application of demographic data in the development of public policy. Includes changes in family status, aging, rural to urban migration, and economic development.

HACE 8900. Seminar in Housing and Consumer Economics. 3-9 hours. Repeatable for maximum 9 hours credit.
Selected topics in housing and consumer economics. Non-Traditional Format: Students will meet with faculty members on a regular basis.

HACE 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

HACE 9010. Directed Study in Housing and Consumer Economics. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Directed study in housing and consumer economics. Non-Traditional Format: Directed study.

HACE 9100. Consumer Policies and Programs. 3 hours.
Prerequisite: HACE 8150.
Public policies and programs relating to consumers in the market. Policies promoting consumer information and protection, as well as service-provision programs are explored in terms of benefit/cost relationships.

HACE 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Textiles, Merchandising, and Interiors

Ian R. Hardin, *Head*
Helen H. Epps, *Graduate Coordinator, 542-4913*
(Dawson Hall)

Graduate programs are directed toward preparation of professionals for careers in industry, government, business and academia. Two degrees are offered: the MS degree in textiles, merchandising and interiors; and the PhD degree in textile sciences. Both are research degrees that culminate in a thesis (MS) or dissertation (PhD) Focus areas for the MS degree are dyeing and finishing, polymers and fibers, testing and analysis, environmental, merchandising, historic, and international trade. Major emphasis areas for the PhD degree are textile chemical processes, textile analysis, and textile products and standards.

TXMI 4100/6100. Advanced Textiles. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Fibers and finishes; emphasis on man-made fibers, new fiber, and finish developments and technology.

TXMI 4110/6110. Textile Dyeing. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L and permission of department.
Textile dyeing processes with emphasis on fiber-dye association. Analysis of dyeing techniques and properties of dyes and dyed materials.

TXMI 4120/6120. Product Standards and Quality Analysis. 3 hours.
Prerequisite: (STAT 2000 and TXMI 3520) or permission of department.
Developing, maintaining, and assessing product standards from the initial design process to end uses of textile and apparel products. Quality assurance and certification programs; governmental regulations; statistical analysis and control of benefits offered through standards.

TXMI 4130/6130. Chemical and Instrumental Analysis of Polymers and Textiles. 3 hours.
Prerequisite: TXMI 3520 and TXMI 4100/6100 and CHEM 2211 and CHEM 2211L.
Theory and application of instrumental analysis to polymers, fibers, fabrics, dyes, and finishes.

TXMI 4140/6140. Textile Finishing Processes. 3 hours.
Prerequisite: TXMI 3520 and TXMI 4100/6100.
Theory, application, evaluation, and identification of textile finishes and textile auxiliary processes. Examination of the role of finishing and types of finishes used in manufacturing fibers, yarns, and fabrics.

TXMI 4150/6150. Nonwovens Science and Technology. 3 hours.
Prerequisite: TXMI 4100/6100 and permission of department.
Manufacture and conversion of nonwoven webs with examination of interrelationships involving raw materials, bonding systems, manufacturing processes, product properties, and end uses.

TXMI 4230/6230. Clothing and Human Behavior. 3 hours.
Prerequisite: PSYC 1101 or SOCI 1101.
The study of clothing with particular emphasis on psychological, sociological, and economic aspects of clothing.

TXMI(DRAM) 4270/6270. History of Costume: Antiquity to Nineteenth Century. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationships of costume and social, cultural, political, and economic environments from antiquity to the nineteenth century.

TXMI 4290/6290. History of Costume from the Nineteenth Century to Present. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationship of costume and social, cultural, political, and economic environments from the nineteenth century to present day.

TXMI 4330/6330. American Interiors and Furnishings. 3 hours.
American interior design and furnishings from the seventeenth to the twentieth centuries. Identification of styles as well as social, cultural, and historic influences.

TXMI 4340/6340. Historic Interior Materials. 3 hours.
Prerequisite: Permission of department.
Ceiling, wall, and floor coverings, window treatments,

upholstery, and lighting in historic American interior design, with emphasis on analysis and selection.

TXMI 4350/6350. Historical Homes and Furnishings. 3 hours.
Prerequisite: [TXMI 3350 and ARST 2000]or permission of department.
The architecture, interiors, and furnishings in the western world from the ancient Egyptian era through 1850.

TXMI 4360/6360. Decorative Accessories for the Home. 3 hours.
Prerequisite: TXMI 3350 or permission of department.
Historical and cultural development of accessories used in the home including ceramics, metals, and textiles. Design and characteristics of materials in these accessories will be covered.

TXMI 4370/6370. Contemporary Homes and Furnishings. 3 hours.
Prerequisite: (TXMI 3350 and ARST 2000) or permission of department.
Contemporary developments in architecture, interiors, and furniture from 1850 to the present day.

TXMI 4380/6380. Interior Fabrics and Materials: Specifications and Estimations. 3 hours.
Prerequisite: (TXMI 3520 and senior standing) or permission of department.
Construction, fibers, and finishes for fabrics with emphasis on quality, durability, and utilization of current materials for soft floor coverings, window treatments, and upholstery. Estimations and specifications.

TXMI 4520/6520. Apparel and Textile Economics. 3 hours.
Prerequisite: [TXMI 3500 and TXMI 3500L and (ECON 2106 or ECON 2105)] or permission of department.
Organization and functions of apparel and textile industries. Factors related to production, distribution, and consumption of apparel and household textiles.

TXMI 4540/6540. International Textiles and Apparel: Asia. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L.
Textile and apparel production and distribution in relation to the culture, politics, and policies of major textile and apparel industries in Asia. Emphasis placed on impact of global issues on marketability and availability of textile and apparel products.

TXMI 4580/6580. History of Textiles in Europe and America. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Textiles and the textile industry in prehistoric, ancient, medieval, and modern eras, with special emphasis on Western European and American textiles.

TXMI 5240/7240. Retailing Apparel and Textiles. 3 hours.
Prerequisite: Permission of department.
Retailing, retail organizational structures, merchandising, and organization of market resources in apparel and textiles. Emphasizes concepts applicable to the apparel and textile industry.

TXMI 5310/7310. Residential Interiors and Economic Resources. 3 hours.
Prerequisite: [TXMI 3380 and TXMI 4380/6380] or permission of department.
Residential space planning and selection of fabrics, finishes, and furnishings using specified amounts of economic resources.

TXMI 5320/7320. Residential Design Practices. 3 hours.
Prerequisite: Senior standing and permission of department.
Relationships between the designer, wholesaler, and retailer in the home furnishing industry. Designer and client relationships with emphasis on retailing practices and economic resources in the residential design firm.

TXMI 5710/7710. Study Tour in Textiles, Merchandising and Interiors. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
An on-location study of clothing, textiles, fashion merchandising, and residential interiors and furnishings. Includes lectures by recognized leaders in the fields; meetings with designers, manufacturers, merchants and field trips to designers' showrooms or studios, manufacturing plants, distribution centers, retail stores, and museums. Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

TXMI 6250. Apparel Theories and Methodologies. 3 hours.
Prerequisite: TXMI 4230/6230 and permission of department.
Theories and methods in apparel research: retailing, fashion, cultural, and historical.

TXMI 6260. Apparel Trade and International Retailing. 3 hours.
Economic aspects of apparel and textile trade and international retailing practices. Trade policies, comparative advantages, and global issues that affect apparel and textile trade and retailing are examined.

TXMI 7000. Master's Research. 1-12 hours. Repeatable for maximum 33 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

TXMI 7300. Master's Thesis. 1-12 hours. Repeatable for maximum 33 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

TXMI 8050. Textiles, Merchandising and Interiors Research Methods. 3 hours.
The philosophy of research applicable to clothing, textile, and interiors studies; methodology and interpretation of research literature.

TXMI 8110-8110L. Physical Analysis of Textiles. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: TXMI 4100/6100 and permission of department.
The physical properties of textiles important for quality control and research. New techniques and instrumentation for physical analysis of textiles.

TXMI 8120. Polymer Science. 3 hours.
Prerequisite: TXMI 4100/6100 and CHEM 2212 and CHEM 2212L.
The physics and chemistry of polymeric materials, including polymer property-structure relationships, polymer solution and rheology, polymerization, polymer reactions, and polymer characterization.

TXMI 8140. Environmental Aspects of Textiles. 3 hours.
Prerequisite: TXMI 4520/6520.
Environmental issues related to textile manufacturing. Examination of water, air, noise, and solid pollution controls and legislation and their impact on the textile industry.

TXMI 8170. Color Science. 3 hours.
Prerequisite: [TXMI 3520 and MATH 2200 and MATH 2200L] or permission of department.
Development of color order systems and color theory in relation to color vision, light, and optics; problems in visual and instrumental color measurement of materials with emphasis on textile materials.

TXMI 8180. Physics of Textile Structures. 3 hours.
Prerequisite: [(TXMI 3520 and TXMI 4100/6100) and (PHYS 1111-1111L or PHYS 1211-1211L)] or permission of department.
Theoretical analysis of fine fiber structure, physical properties of yarns, fabric shear deformation and bending. Evaluation of interrelationships among fiber structure, yarn structure, fabric geometry, and fabric performance.

TXMI 8190. Dyeing Theory. 3 hours.
Prerequisite: TXMI 4110/6110 or permission of department.
Textile dyeing, with emphasis on mathematical descriptions of equilibrium and kinetic processes of dye absorption.

TXMI 8500. Contemporary Topics in Textiles, Merchandising and Interiors. 2 hours.
Prerequisite: Permission of department.
Current specialized topics in textiles, clothing, and furnishings. Focus on economic, environmental, and social factors related to textiles, clothing, and furnishings.

TXMI 8900. Textiles, Merchandising and Interiors Seminar. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Research and theory in clothing, textiles, and furnishings. Intensive reading and discussion of selected topics to be presented by advanced students, faculty, and guest speakers.

TXMI 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

TXMI 9010. Direct Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study and/or research under supervision of an instructor.

TXMI 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

The Daniel B. Warnell School of Forest Resources

Arnett C. Mace, Jr., Dean
Robert O. Teskey, *Graduate Coordinator,*
542-1183
(Forest Resources Building)

Graduate study opportunities in the School of Forest Resources encompass numerous disciplines needed to understand and effectively manage renewable natural resources. Graduate training and research are conducted in the general areas of fisheries and aquaculture; forest biology and silviculture; forest business management; forest management and biometrics; forest products; forest resource economics; forest resource information systems; forest resource management and policy; forest soils, hydrology, and environmental systems; and wildlife ecology and management.

Excellent facilities are available for graduate study and research. The School of Forest Resources is housed in a complex of four buildings, two of which are devoted primarily to graduate education and research. Two modern U.S. Forest Service research laboratories, located adjacent to the School, provide excellent opportunities for cooperative research in silviculture and wood utilization. In addition, the U.S.G.S. Biological Resources Division maintains the Georgia Cooperative Fisheries and Wildlife Unit and the Patuxent Wildlife Research Center in association with the School of Forest Resources.

The School of Forest Resources offers the Master of Forest Resources, MS and PhD degrees, and participates in the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin titled, General Degrees: Interdisciplinary Program.

FORS 4000/6000-4000L/6000L. Forest Soil Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L.
Corequisite: FORS 4010-4010L.
Morphological, physical, and chemical soil properties affecting tree growth and forest productivity; evaluation of soils and site quality; preparation of forest sites for planting, diagnosis, and correction of nutrient limitations; use of forest soil systems for waste treatment. Non-Traditional Format: One Friday and one Friday-Saturday field trip are required.

FORS 4020/6020. Genetics and Breeding of Forest Trees. 3 hours.
Prerequisite: BIOL 1108-1108L.
Genetic variation in forest trees; harnessing natural variation and creating new variation to meet breeding objectives; biological and economic consequences of tree domestication; conservation of genetic resources.

FORS 4030/6030. Regional Silviculture. 3 hours.
Prerequisite: FORS 4010-4010L.
Identification of the major forest regions of the United States and discussion of their silvicultural management.

FORS 4060/6060-4060L/6060L. Field Ornithology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS(ECOL) 3580-3580L or permission of school.
Bird identification, also emphasizing ecology, evolution, behavior, and field techniques. Non-Traditional Format: Overnight field trip required.

FORS 4110/6110. Forest Hydrology. 3 hours.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Multidisciplinary examination of the terrestrial components of the hydrologic cycle focûsing on the qualitative analysis of precipitation, snowmelt, runoff generation, routing, infiltration, and subsurface flow and transport. Emphasis is on the definition of hydrologic processes, identification of hydrologic resources, development of environmental monitoring techniques, and application to hydrologic resources management.

FORS 4120/6120. Quantitative Methods in Hydrology. 3 hours.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Advanced analysis of hydrologic processes to provide a theoretical understanding of precipitation, evapotranspiration, streamflow, groundwater occurrence and movement, and soil zone flow and transport. Emphasis is upon quantitative methods used in conjunction with field and laboratory data to identify flow and transport dynamics in hydrologic systems.

FORS 4130L/6130L. Field Methods in Hydrology. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L.
Field data acquisition methods to hydrologic systems are used to determine precipitation quantity and quality, evapotranspiration, streamflow, groundwater occurrence and movement, and soil zone transport processes. Physical and chemical measurements are coupled to determine flow paths, mass balances, and the environmental fate of solutes.

FORS 4160/6160-4160L/6160L. Environmental Monitoring. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS(FORS) 3060-3060L and STAT 2000.
Design, implementation, and interpretation of sampling programs for environmental systems (especially aquatic systems) for monitoring, regulatory activities, quality control, scientific study, and impact assessment.

FORS 4300/6300-4300L/6300L. Management of Wildlife Habitat. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: [FORS 3020-3020L and FORS 3300] or permission of school.
Principles and practices related to the management of forested ecosystems for wildlife and biological diversity, with emphasis on habitat management at the stand and landscape level. Habitat management through use of appropriate silvicultural practices, wildlife enhancement techniques, and regulations is evaluated.

(FORS)ECOL 4310/6310-4310L/6310L. Limnology. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or FORS 3300.
Aquatic ecosystems (lakes and streams) and their biota. Linkages between terrestrial and aquatic ecosystems.

FORS 4320/6320. Wildlife Physiology and Nutrition. 3 hours.
Prerequisite or corequisite: FORS 3300 or permission of school.
An advanced course relating animal physiology and nutrition to wildlife ecology and management.

FORS 4330/6330-4330L/6330L. Water Quality Management in Fisheries and Aquaculture. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L.
Chemical and biological aspects of water quality, with emphasis upon relationships between water quality and fish production. Practical information on water quality management and related fields.

FORS 4340/6340. Endangered Species Management. 3 hours.
Prerequisite: FORS(ECOL) 3580-3580L or FORS 3010-3010L or BTNY 4650/6650-4650L/6650L or permission of school.
Factors affecting extinctions and declines in biodiversity, including laws, policies, and management activities designed to protect species and critical habitats.

FORS 4370/6370-4370L/6370L. Fish Physiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L or permission of school.
Basic fish physiology with an emphasis on the effects of environmental stresses on physiological functions of fish.

(FORS)MARS 4380/6380-4380L/6380L. Marine Fisheries Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L and permission of department.
Interaction of oceanographic processes with the life histories and productivity of marine fisheries species, and the human interactions with major marine fisheries.

FORS 4570L/6570L. Practical Wood Identification. 2 hours. 2 lab periods of 2 hours each per week.
Identification of domestic and commercial tropical woods.

FORS 4610/6610-4610L/6610L. Forest Mensuration. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 3000-3000L and FORS 3610-3610L.
Direct measurement and indirect estimation of primary and secondary forest products. Measures of stand productivity, density, and growth.

FORS 4620/6620. Timber Management. 3 hours.
Prerequisite: FORS 4610/6610-4610L/6610L.
Organization and management of forest properties for the production of commercial forest products.

FORS 4630L/6630L. Computational Methods and Computer Models in Forestry. 2 hours. 0 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: FORS 4610/6610-4610L/6610L.
Spreadsheets and forestry software packages to solve inventory and growth prediction problems.

FORS 4640/6640-4640L/6640L. Forest Inventory. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 4610/6610-4610L/6610L.
Planning forest inventories and comparison of various equal and unequal probability sampling concepts; permanent and temporary forest sampling procedures; current stand and future growth estimation principles.

FORS 4710/6710-4710L/6710L. Quantitative Decision Methods for Forest Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 3610-3610L and FORS 3710-3710D.
Analysis methods applicable to forest management planning and decision making in forestry. Particular emphasis on optimization procedures and financial analysis.

FORS 4800/6800-4800D/6800D. Forest Resources Policy. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Prerequisite: FORS 3710-3710D or permission of school.
Forest policy as a process, establishing forestry agendas, political decision models, political institutions and interest groups, policy in organizations, current issues.

FORS 4900/6900-4900L/6900L. Wildlife Damage Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 3300 or FORS(ECOL) 3580-3580L or permission of school.
Theory and practice of assessing and controlling damage done by wild and feral vertebrate animals, especially mammals and birds. Emphasis is on protecting agricultural and forest crops and property.

FORS 5010/7010. Urban Tree Management. 3 hours.
Prerequisite: BTNY 1210-1210L or BIOL 1104-1104L or BIOL 1108-1108L.
Establishment and maintenance of trees in urban environments. Nature and benefits of trees, planting, and soil management; pruning, repair, and protection; stress management; values of urban trees.

FORS 5310/7310-5310L/7310L. Techniques in Wildlife Population Management. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: [FORS(ECOL) 3580-3580L and PGEN 3580-3580L] or permission of school.
Field and laboratory methods commonly used by professional wildlife ecologists to analyze and manipulate animal populations.

FORS 5360/7360-5360L/7360L. Fisheries Management. 3 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Principles, methods, and techniques used in the management of freshwater and marine fisheries resources. Practical, theoretical, and ethical questions are addressed.

FORS 5380/7380-5380L/7380L. Fish Culture. 3 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Biological and abiological aspects of extensive and intensive culture of freshwater fishes. Emphasis is on species and methods utilized in the eastern United States.

(FORS)RLST 5400/7400-5400L/7400L. Park Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Management of public lands and open spaces, including management tools, type and nature of physical effects, visitor management principles, and site development. Use of maps, aerial photos, and compass in recreation area development.

FORS 5410/7410. Wilderness Management. 3 hours.
Origins of the wilderness movement; wilderness values; scope of wilderness management as limited by laws and philosophy; principles of wilderness management; and review status and management of nonroaded natural areas.

FORS 5720/7720-5720L/7720L. Forest Harvesting and Roads. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 3000-3000L.
Prerequisite or corequisite: FORS 4010-4010L.
Techniques and systems for harvesting and roading forests. Production, cost, quality, safety, and environmental protection measures. Field exercises stress planning of harvesting and road construction operations to achieve desired objectives.

FORS 5730/7730. Principles of Forest Management. 3 hours.
Prerequisite: BIOL 1104-1104L or BTNY 1210-1210L or permission of school.
Practical forestry in the South with emphasis on the management of private forest land. Topics include forest regeneration, tree identification and growth, basic measurements of tree crops. Not open to FRS majors.

FORS 5740/7740. Forest Operational Planning. 3 hours.
Prerequisite: (FORS 3710-3710D and FORS 4010-4010L and FORS 4620/6620) or permission of school.
Integration of silviculture, finance, forest engineering, biometrics, and ecology to analyze industrial problems.

FORS 5750/7750. Procurement and Management of Wood Fiber Supply. 3 hours.
Prerequisite: (Enrollment in Professional Program of WSFR) or permission of school.
Management of the wood fiber supply, program management functions, legal aspects and analysis of current issues in raw material management.

FORS 5760/7760. Forest Products Marketing. 3 hours.
Prerequisite: (Enrollment in Professional Program of WSFR) or permission of school.
Planning, organizing, and managing forest products marketing programs, domestically and internationally. Focus on developing marketing strategies and implementation of marketing plans in the context of forest industry structures and distribution channels.

FORS 5770/7770-5770L/7770L. Applied Population Dynamics. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Senior standing or graduate student.
Foundations of population dynamics from an applied perspective. Exponential and logistic population growth, life tables, multiple species interactions, and basic population models. Sampling design and analytical methods for estimating abundance and demographic parameters. Application of population models to harvest management and small population management. Integrative student project required.

FORS 5820/7820. Natural Resources Law for Managers and Administrators. 4 hours.
Statutory, case law, and regulations concerning resource conservation, allocation, and development.

Modern, systems-sensitive regulatory programs affecting natural resources administration analyzed. Examination of the division and nature of the functions of the judicial and executive branches of government. Non-Traditional Format: Law library exercise requiring sixty or more hours per semester.

FORS 5850/7850. Forest Policy Issues. 2 hours.
Prerequisite: POLS 1101-1101D or FORS 4800/6800-4800D/6800D.
Forestry issues and political processes. A general framework for analyzing current issues is developed and specific issues are analyzed each year.

(FORS)ECOL(ANTH) 6140. Principles of Conservation Ecology and Sustainable Development II. 3 hours.
Prerequisite: ECOL 6080.
Social science dimensions of conservation and sustainable development; social, economic, and political considerations in managing natural resources; policy-level aspects to project implementation.

FORS 6150. Control and Systems Theory for the Environmental Scientist. 3 hours.
Prerequisite: MATH 2700.
Development of models of the dynamic behavior of environmental systems from the perspective of process engineering and control. State-space, continuous-time, and discrete-time representations. Introduction to, and tutorials in, the MATLAB-SIMULINK software package.

FORS 6540-6540L. Physical and Mechanical Properties of Wood. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 4500-4500L.
Concepts in stress/strain development and the viscoelastic response. Wood moisture relationships with mechanical properties.

FORS 6750. Experimental Methods in Forest Resources Research. 3 hours.
Prerequisite: STAT 6220.
Statistical procedures and computer software to collect, analyze, and interpret forest resources research data.

FORS 6760-6760L. Quantitative Models for Forest Resources Managers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: STAT 6220 or permission of school.
Model forms used to simulate tree and forest stand development as well as models used to simulate the growth of various wildlife and fish species. Parameter estimation methods and model evaluation included.

FORS 7000. Master's Research. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FORS 7020. Tree Morphogenesis. 3 hours.
Prerequisite: Permission of school.
Differentiation of tree structures and functions. Topics include the shoot and root apex, the cambium, phase change and differentiation of tissues and organs in vitro.

FORS 7210-7210L. Spatial Management of Forest Resources. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in GEOG 4370/6370-4370L/6370L or GEOG 4470/6470-4470L/6470L.
Applications of spatial information in forest resource management. Topics include: the heterogeneity of the forest, spatial measures and models of forests, data accuracy and decision quality, and information needs assessment. Both raster and vector GIS are used in class laboratory exercises.

FORS 7300. Master's Thesis. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

FORS 7630. Intensive Forest Management. 3 hours.
Prerequisite: FORS 4010-4010L.
Effects of silvicultural treatments on growth, yield, and product distributions of forest stands. Effects of vegetation management at various points in the life of the stand, fertilization, thinning, pruning, and initial spacing included. Effect magnitude as an objective criterion for management decision making is emphasized.

FORS 7640. Advanced Forest Management. 3 hours.
Prerequisite: FORS 4620/6620 or permission of school.
Models for estimating forest yields at different points in time, including models for uneven-aged stands, and thinned stands, and methods for adjusting for effects of cultural treatments. Whole stand and diameter distribution yield models examined.

FORS 7710. Advanced Forest Economics. 3 hours.
Prerequisite: ECON 2106.
Prerequisite or corequisite: FORS 4710/6710-4710L/6710L.
Microeconomic and production economics theory with forest resources applications, financial analysis of investments, social benefit-cost analysis.

FORS 7780. Timberland Accounting, Finance, and Taxation. 3 hours.
Prerequisite: ACCT 7990.
Timberland accounting, financial analysis of forest products company operations, financial evaluation of timberland investment and forest management decision alternatives, linkages between financial markets and timberland, timber taxation, and strategies involving forest assets in estate planning.

FORS 7790. Forest Finance Decisions. 3 hours.
Prerequisite: FORS 7780 or permission of school.
Analysis of forest asset financing, acquisition, management, and disposition decisions from a financial

perspective. Development of financial strategies for a forestry operation, timberland portfolio management, asset pricing models and timberland, the behavior and evolution of forest asset markets, timber access options, and entrepreneurship in forestry.

FORS(AAEC) 7860. Resource Economics and Management. 3 hours.
Prerequisite: AAEC 6580-6580L or ECON 8000.
Economic and physical concepts of scarcity, the impact of market and social factors on resource use, and the optimal management of renewable and nonrenewable resources.

FORS 7981. Fisheries and Aquaculture Problems. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to fisheries and aquaculture at the masters level. Non-Traditional Format: Formal classes are not held. Faculty members assist students as needed.

FORS 7982. Forestry Problems. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to forestry at the masters level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 7983. Forest Soils, Hydrology and Environmental Systems Problems. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to forest soils, hydrology, and environmental systems at the masters level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 7984. Wildlife Ecology and Management Problems. 1-12 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to wildlife ecology and/or management at the masters level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 7990. Supervised Professional Practicum in Forest Resources. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of school.
University-level teaching, including the presentation of university-level lectures and/or laboratory sessions under faculty supervision. Non-Traditional Format: Students lecture in a classroom setting and meet with a faculty supervisor to discuss teaching technique.

FORS 8000. Forest Resources Seminar. 1-2 hours. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of school.
Fundamental and applied topics relating to multiple-use management of forests and wild land, including literature review and current advances. Non-Traditional Format: Discussions scheduled as required.

FORS 8030. Advanced Tree Physiology. 3 hours.
Prerequisite: FORS 3040 or permission of school.
Recent research in the processes that directly or indirectly affect carbon gain and allocation, including photosynthesis, respiration, nutrient uptake, water relations, and growth of trees.

FORS 8040. Current Topics in Forest Biotechnology. 2 hours.
Prerequisite: Permission of school.
Applications of genetic, biochemical, and physiological principles to forest trees; forest products and organisms affecting forests, including in vitro propagation, genetic engineering, genomic mapping, bioprocessing and biological control of tree pests and pathogens.

FORS 8050. Forest Stand Dynamics. 3 hours.
Prerequisite: FORS 4010-4010L or permission of school.
Dynamics of mortality, growth, and biomass allocation in forest stands during the four stages of development (stand initiation, stem exclusion, transition, and old growth) with emphasis on silviculture of southeastern United States forests.

FORS 8060. Advanced Forest Policy and Law. 3 hours.
Legal basis and fundamentals of policy affecting private and public forest resource use. Private property in forests and public regulation, income, estate, and property tax policy, resource procurement systems for industry, industrial organization of timberland ownership, foundations of modern federal forest policy, selected topics of student interest.

FORS 8100. Advanced Forest Ecology. 3 hours.
Prerequisite: FORS 3020-3020L or ECOL(BIOL) 3500-3500L or permission of school.
Factors regulating the structure and function of forest ecosystems, forest energetics, community dynamics, and research methods.

FORS 8120. Hillslope Hydrology Seminar. 3 hours.
Prerequisite: FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Current concepts used to describe water and chemical movement on watersheds scales. Conceptual models of flow at watershed scales, saturated/unsaturated flow and transport processes, and techniques for measuring soil moisture, soil potential, and lateral surface and subsurface flow.

FORS 8150. System Identification for the Environmental Scientist. 3 hours.
Prerequisite: FORS 6150.
Calibration of models of environmental systems against field data. Methods of parameter estimation, recursive estimation, time-series analysis and filtering theory. Model validation and analysis of uncertainty. Case studies in surface and groundwater quality and aquatic ecosystems.

FORS 8160. Environmental Process Control Laboratory. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 6150 or permission of school.
Instrumentation and systems for real-time remote sensing and control of the behavior of environmental systems and contaminant treatment technologies. Functions of on-line respirometry and intelligent/ software sensors. Principles and integration of sample retrieval, preparation, analysis, data storage, communication, and presentation.

FORS 8170. Environmental Systems Analysis and Control. 1-3 hours. 0-3 hours lecture and 0-3 lab periods.
Prerequisite: Permission of school.
Current topics, books and articles in inter-disciplinary studies of the analysis and regulation of environmental systems. Cross-disciplinary thinking through a diverse set of topics (such as choice of wastewater infrastructure for sustainable cities, or protocol for model validation). Non-Traditional Format: 1-3 hours seminar/discussion depending on topics.

FORS 8180. Principles of Forest Land Treatment. 2 hours.
Basic principles for designing forested systems for treatment of municipal and industrial biosolids and wastewater. Hydrologic loading and assimilation/ degradation pathways for N, P, metals and organics; methods for determining land-limiting constituents.

FORS 8200. Scientific Research in Forest Resources. 2 hours.
Prerequisite: Permission of school.
The scientific method, standards for good scientific conduct, research proposal writing and reviewing skills are emphasized.

FORS 8210-8210L. Scientific Communication in Natural Resources. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Preparation of scientific manuscripts for publication and presentation of papers at scientific conferences. Preparation of individual manuscripts, figures, and tables; writing with clarity, brevity, and word economy; dealing with journal editors and reviewers; reviewing and editing manuscripts; preparing proposals for funding; presentation of oral and poster papers at scientific conferences; and preparation of visual aids.

FORS 8300. Wildlife and Fisheries Seminar. 1-2 hours. Repeatable for maximum 6 hours credit.
Recent advances in wildlife and fisheries research and management.

(FORS)ECOL(BTNY) 8310. Population Ecology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and permission of department.
Advanced ecological theory to biological populations. Mathematical and evolutionary treatment of population growth and regulation, niche theory, foraging theory, predator-prey theory, habitat selection, and competition.

FORS 8350-8350L. Waterfowl and Wetland Management. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: Permission of school.
Ecology of North American waterbirds (ducks, geese, swans, shorebirds, rails, gallinules, wading birds) and their habitats. Techniques for managing waterfowl populations by harvest regulations and habitat manipulation. Identification and requirements of important wetland plants. Non-Traditional Format: Field trips of up to one week in length required.

FORS 8390-8390L. Estimation of Fish and Wildlife Population Parameters. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of school.
Statistical methods for estimating parameters and testing hypotheses of fish and wildlife populations. Models of population dynamics. Sampling and estimation methods including line-transect, mark-recapture, removal, catch-effort, tag-recovery, and analysis of failure times. Optimization and decision-theoretic methods for wildlife and fisheries management.

(FORS)BTNY(ECOL) 8410. Community Ecology. 4 hours.
Prerequisite: ECOL 4010/6010-4010L/6010L and STAT 4220.
The applicability of advanced theory to multi-species communities. Patterns and processes that influence species composition, diversity, and function. Topics include deterministic vs. stochastic regulation, succession, resource partitioning, patch dynamics, island biogeography, and food webs.

FORS 8480. Quantitative Modeling of Forest Stands. 3 hours.
Prerequisite: Permission of school.
Application of statistical and mathematical modeling concepts along with computer technology to develop models of forest tree and stand growth and yield. Formulation of mathematical models with proper biological behavior and estimation of parameters using compatible growth and yield structures and systems fitting methods.

FORS 8490. Sampling Techniques for Biological Populations. 3 hours.
Prerequisite: [STAT 4240/6240 and STAT 4510/6510] or permission of school.
Theory of probability sampling procedures for populations of interest to forest resource managers.

FORS(PARA) 8500-8500L. Diseases of Wildlife I. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of school.
Prerequisite or corequisite: FORS(PARA) 8510-8510L.
Fundamental causes of disease-induced morbidity and mortality among free-ranging wildlife populations.

Etiology, pathogenesis, clinical signs, lesions, epidemiology, diagnosis, and management significance of diseases produced by viral and microbial pathogens.

FORS(PARA) 8510-8510L. Diseases of Wildlife II. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of school.
Prerequisite or corequisite: FORS(PARA) 8500-8500L.
Fundamental causes of disease-induced morbidity and mortality among free-ranging wildlife populations. Emphasis is on the etiology, pathogenesis, clinical signs, lesions, epidemiology, diagnosis, and management significance of diseases of parasitic, toxicologic, or miscellaneous etiologies.

FORS 8550. Chemistry and Synthesis of Wood Adhesives. 3 hours.
Prerequisite: CHEM 2410 and CHEM 2410L.
Synthetic resins chemistry including their raw materials, formulations and procedures of their synthesis, and their chemical and physical properties as related to wood adhesive formulations.

FORS(GEOL) 8730. Aquifer Mechanics. 3 hours.
Prerequisite: FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Mechanics of flow through subsurface media, including flow in confined, water table, and leaky aquifers, delayed yield, partially penetrating wells, boundaries, multiple wells, dual porosity media, and fractured rock; use of aquifer tests to estimate aquifer hydraulic properties.

(FORS)GEOL 8740. Hydrologic Flow and Transport Modeling. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 8700 or FORS 4120/6120.
Solutions of surface and subsurface flow and transport problems including finite difference, finite element, and boundary integral methods. Analytic techniques include Laplace-, z-, and Fourier-transform, complex variable, and separation of variables methods. Application to problems commonly found in the environmental field, including capture zones, particle-tracking, advection-dispersion, and non-aqueous phase liquids.

FORS 8780. Issues in Timberland Finance and Management. 3 hours.
Prerequisite: FORS 7780.
Current and emerging issues in financing and managing timberland properties. Valuation, risk analysis, and forms of timberland control, at domestic and international levels.

FORS 8981. Fisheries and Aquaculture Problems. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to fisheries and aquaculture at the doctoral level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 8982. Forestry Problems. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to forestry at the doctoral level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 8983. Forest Soils, Hydrology and Environmental Systems Problems. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to forest soils, hydrology, and environmental systems at the doctoral level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 8984. Wildlife Ecology and Management Problems. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Individual student problems pertaining to wildlife ecology and management at the doctoral level. Non-Traditional Format: Formal classes are not held. Faculty assist students as needed.

FORS 9000. Doctoral Research. 1-12 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

FORS 9210. Applied Research in Forest Resources. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of school.
Individual guidance in the development of a significant project related to the student's major field of study. Preparation of a report meeting professional standards reviewed by a faculty committee. Non-Traditional Format: Directed study.

FORS 9300. Doctoral Dissertation. 1-12 hours. Repeatable for maximum 36 hours credit.
Prerequisite: Permission of school.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Graduate School

Gordhan L. Patel, Dean
542-4806
(Boyd Graduate Studies Research Center)

Courses having a Graduate School prefix are listed below:

GRSC 7770. Graduate Internship. 1-3 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of school.
Provides graduate teaching assistants with knowledge of pedagogical approaches and available support systems. Special sections are reserved for international students, with focus on use of language, pedagogy, and cultural aspects of teaching in this country. Non-Traditional Format: Students meet with faculty members on a regular basis.

GRSC 9270. Graduate Study Completion. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Designed for graduate students completing degree requirements who will be using staff time or University facilities and for whom no regular course is appropriate. Non-Traditional Format: Students will use staff time or University facilities to complete degree requirements.

The Henry W. Grady College of Journalism and Mass Communication

J. Thomas Russell, Dean
Leonard N. Reid, *Associate Dean, Graduate Studies, 542-3676 (Journalism Building)*

The graduate studies program of the Grady College of Journalism and Mass Communication offers three graduate degrees for students preparing for professional and academic careers: the Master of Arts degree, the Master of Mass Communication degree, and the Doctor of Philosophy degree.

The Master of Arts program provides advanced work and specialization for careers in advertising, journalism, public relations, and telecommunications. The Master of Mass Communication degree serves those students whose career goals indicate that additional course work will be more advantageous to them than completion of the traditional thesis.

The PhD program is designed to produce critical scholars capable of independent and original research. The program offers advanced study and specialization in preparing for careers in teaching and research or for positions of responsibility in mass media, industries, or government.

Applicants accepted for the master's programs and PhD program begin their program in the Fall semester.

Admission is based on undergraduate grade point average, the results of the Graduate Record Examinations (GRE), a statement of purpose, and letters of recommendation, as well as previous professional experience and scholarly work.

Anyone holding a bachelor's degree from an accredited college or university is eligible to apply for admission to the master's programs. A master's degree is required for acceptance into the PhD program.

The program is open both to students with undergraduate majors in journalism and mass communication and to those who have majored in other areas. Master's students without backgrounds in journalism and mass communication may be required to take 9 or more credit hours of undergraduate-level foundation courses before registering for more than 6 hours of graduate courses. If not previously completed, a course in statistics is also required.

Financial assistance for Grady College graduate students is available through a variety of sources, including college assistantships, university assistantships, fellowships, scholarships, loans, and student employment.

Applications and additional information may be obtained from the Graduate Studies Office, Grady College of Journalism and Mass Communication.

Advertising and Public Relations

ADPR 5740/7740. Advertising and Communication Campaigns. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of department.
Corequisite: ADPR 5710.
Managerial and decision making processes in simulated situations with student groups functioning as advertising agencies to plan, implement, and manage advertising and communication campaigns for assigned clients.

ADPR 5790/7790. Advertising Portfolio Seminar. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of major.
Student production and development of an advertising portfolio of their best creative work with emphasis on both verbal and visual skills.

ADPR 5950/7950. Public Relations Campaigns. 3 hours.
Prerequisite: ADPR 5910 and ADPR 5920 and permission of department.
Research, planning, and preparation of an integrated public relations campaign. Campaigns will alternate among business, governmental, and organization problems.

Journalism

JOUR 5350/7350. Advanced Newspaper Editing and Design. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 3510 and permission of department.
Techniques of advanced newspaper editing and design, with emphasis on the visual aspects of newspaper editing.

JOUR 5360/7360. Advanced Magazine Editing and Design. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 3510 and permission of department.
Planning, processing, and production of a magazine.

JOUR 5410/7410. Journalism Ethics. 3 hours.
Prerequisite: JOUR 3310 and JOUR 3510.
Issues of journalistic ethics and social responsibility confronting contemporary American print media and students planning journalism careers.

JOUR 5530/7530. Editorial Writing and Issues. 3 hours.
Prerequisite: JOUR 3410 and permission of department.
Creation, production, and analysis of editorials and editorial pages. Methods of identifying and researching issues and organizing, writing, and editing editorials will be stressed along with methods of analyzing editorials and editorial pages.

JOUR 5580/7580. Magazine Article Writing. 3 hours.
Prerequisite: JOUR 3310 and JOUR 3510 and permission of department.
Methods and procedures in writing various types of articles and features for magazines, magazine sections of newspapers, and other periodicals.

JOUR 5590/7590. Critical Writing and Reviewing. 3 hours.
Prerequisite: JOUR 3510 and permission of department.
Criticizing and reviewing popular culture and fine arts offerings, such as films, television, pop music and theatre, dance and classical music—for newspapers, magazines, and broadcast media.

JOUR 5600/7600. Investigative Reporting. 3 hours.
Prerequisite: JOUR 5300 and permission of department.
Techniques, methods, and practices of investigative, interpretive, and in-depth reporting for print media. Projects in public affairs reporting are developed.

JOUR 5620/7620. Magazine Management. 3 hours.
Prerequisite: JOUR 3310.
Finance and planning skills required to manage the business side of a magazine. Attention will be given to the various systems used in the magazine industry to produce a finished product.

JOUR 5640/7640. Newspaper Management. 3 hours.
Prerequisite: JOUR 3310.
Business and editorial management of newspapers, including newsroom, circulation, advertising, and promotion strategies.

JOUR 5660/7660. Journalism in the Secondary School. 3 hours.
News gathering, news writing, media law and ethics, copy editing, typography, photography, design, desktop publishing, broadcast news, and business practices of newspapers, with specific emphasis on advising staffs of high school newspapers and other media and editing public relations publications for schools. Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

JOUR 5670/7670. Contemporary American Newspapers. 3 hours.
Prerequisite: JOUR 3310.
The newspaper and its role in America today. Concentration is on content, policy, influence, social responsibility and ethics, economics, marketing strategies, and technology. Leading newspapers in various regions are examined closely.

JOUR 5700/7700. Advanced Magazine Article Writing. 3 hours.
Prerequisite: JOUR 5580/7580 and permission of department.
An advanced professional course utilizing research and writing techniques to produce articles and features for specific magazine audiences.

JOUR 5800/7800. Computer Assisted Reporting. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 5300 and permission of department.
Use of computers in journalism to gather, analyze, and present information. Subjects include spreadsheets, databases, and electronic searches in public and commercial sources.

JOUR 7310. Journalism Projects. 3 hours.
Prerequisite: JRMC 8000 and JRMC 8010.
Directed research resulting in written projects in selected areas of media. Open only to Journalism MMC students.

Journalism Core

JRLC 5040/7040. Law of Mass Communication. 3 hours.
Prerequisite: (ADPR 3100 or ADPR 3850 or JOUR 3410 or TELE 3010) and permission of school.
First Amendment principles and communication law affecting print, telecommunications, advertising, and public relations.

JRLC 5490/7490. History of the Mass Media in the United States. 3 hours.
Mass media in the United States from the colonial period to the present. Special attention is given to newspapers, magazines, radio, and television and their relationship to the history and development of the nation.

Journalism and Mass Communication

JRMC 7000. Master's Research. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

JRMC 7300. Master's Thesis. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

JRMC 8000. Proseminar in Mass Communication. 3 hours.
Prerequisite: Permission of department.
Research traditions in mass communication, with emphasis on historical developments within the field and intellectual perspectives of mass communication researchers. Major research streams and methodologies are introduced, discussed, and critiqued.

JRMC 8010. Research Methodology in Mass Communication Research. 3 hours.
Prerequisite: Permission of department.
Quantitative and qualitative methodologies of mass communication research, with emphasis on the research process, concepts and issues of research design, and methods of data collection. Topics introduced include measurement, sampling, focus groups and interviewing, survey and experimental design, and data analysis.

JRMC 8020. Public Opinion. 3 hours.
Prerequisite: Permission of department.
Patterns of public opinion formation including their cultural, social, and economic impact. Analysis of communication content and techniques involving public opinion and persuasion.

JRMC 8030. Mass Communication and Society. 3 hours.
Prerequisite: Permission of department.
The social, cultural, and economic analysis of the processes and effects of mass communication in contemporary society.

JRMC 8040. International Mass Communication. 3 hours.
Prerequisite: Permission of department.
The systems of mass communication throughout the world; philosophies behind them; social, political, and economic reasons why a given kind of pattern develops; comparative analysis of operating procedures of various media.

JRMC 8050. Research and Directed Readings in Mass Communication. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research and directed readings in mass communication under the direction of a sponsoring graduate faculty member. Non-Traditional Format: Directed study.

JRMC 8100. Advertising and Communication Management. 3 hours.
Prerequisite: Permission of department.
Major decision processes in advertising and communication management.

JRMC 8110. Advertising Media Planning. 3 hours.
Prerequisite: JRMC 8100 and permission of department.
Media planning function and theory. Emphasis will be on understanding and evaluating media theory and media for use in advertising and marketing communication programs.

JRMC 8120. Advertising and Public Relations Research. 3 hours.
Prerequisite: Permission of department.
Nature, scope, and techniques of advertising and public relations research, with emphasis on consumer markets, public, media audiences, and message effects.

JRMC 8130. Special Topics in Advertising. 3 hours.
Prerequisite: Permission of department.
Problems, issues, and research in advertising.

JRMC 8140. Public Relations Management. 3 hours.
Prerequisite: Permission of department.
Effective practices, concepts, and techniques as they apply to the management of public relations.

JRMC 8150. Public Relations Theory. 3 hours.
Prerequisite: Permission of department.
Seminal and recent research related to the construction of theory in public relations.

JRMC 8160. Special Topics in Public Relations. 3 hours.
Prerequisite: Permission of department.
Problems, issues, and research in public relations.

JRMC 8200. Telecommunications Management. 3 hours.
Prerequisite: Permission of department.
The establishment, operations, and planning of modern telecommunications media systems. Theory and practice of management in innovative technology-based industries, including radio, television, cable, satellite-to-home delivery, and recordings.

JRMC 8210. Telecommunications Policy. 3 hours.
Prerequisite: Permission of department.
Telecommunications policy making, regulation of broadcasting, cable, satellites, computer networks, and telephone; impact of technological change on the regulation of telecommunications.

JRMC 8220. Telecommunications Programming and Criticism. 3 hours.
Prerequisite: Permission of department.
Criticism and analysis of contemporary and historical programming. Examines a wide variety of content as art form, cultural product, and information source, including social, legal, and economic roles of criticism in media.

JRMC 8230. Emerging Telecommunications Technologies. 3 hours.
Prerequisite: Permission of department.
Technical, social, and economic aspects of the new telecommunications technologies.

JRMC 8240. Special Topics in Telecommunications. 3 hours.
Prerequisite: Permission of department.
Problems, issues, and research in telecommunications.

JRMC 8350. Special Topics in Journalism. 3 hours.
Prerequisite: Permission of department.
Problems, issues, and research in journalism.

JRMC 9000. Doctoral Research. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

JRMC 9010. Mass Communication Theory. 3 hours.
Prerequisite: Permission of department.
Theoretical thinking and theories of mass communication. Emphasizes history, philosophies, and structures of theoretical explanation, and the interaction between theory and the organizations, processes, and effects of mass communication.

JRMC 9020. Quantitative Research in Mass Communication. 3 hours.
Prerequisite: (JRMC 8010 and STAT 6210) or permission of department.
Advanced quantitative approaches to mass communication research with emphasis on research design issues, data management, and statistical analyses.

JRMC 9030. Critical, Cultural, and Naturalistic Approaches to Mass Communication Research. 3 hours.
Prerequisite: JRMC 8010 or permission of department.
Paradigms, concepts, and methodologies of critical, cultural, and naturalistic approaches to mass communication research. Emphasis on ethnography, case study, interviewing, life history, textual analysis, and field observation. Research design and techniques of data collection, analysis, and presentation are studied within the context of mass communication institutions, messages, and audiences.

JRMC 9040. Historical Research in Mass Communication. 3 hours.
Prerequisite: Permission of department.
Historical research approaches to mass communication with emphasis on historical writings, the philosophy of history, and methods of data collection and analysis. Emphasis on United States mass media history.

JRMC 9050. Mass Communication Law. 3 hours.
Prerequisite: Permission of department.
The problems, issues, and research methods of mass communication law and regulation with emphasis on the critical examination of writings in the field.

JRMC 9060. Special Topics in Mass Communication. 3 hours.
Prerequisite: Permission of department.
Selected topics in mass communication.

JRMC 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

The College of Pharmacy

Stuart Feldman, Dean
Clinical and Administrative Sciences
Joseph T. DiPiro, *Head*
Randall L. Tackett, *Graduate Coordinator, 542-7400*
Pharmaceutical and Biomedical Sciences
F. Douglas Boudinot, *Head*
Anthony C. Capomacchia, *Graduate Coordinator, 542-7235*
(Pharmacy Building)

Graduate work leading to the MS and PhD degrees may be pursued in the areas of clinical and administrative sciences or pharmaceutical and biomedical sciences.

Clinical and administrative sciences include the general areas of pharmacy care administration and experimental therapeutics. Pharmacy care administration is the study of the economic, social, behavioral, and political aspects of pharmaceutical services. It is an interdisciplinary program which may contain elective concentration of courses in business administration, psychology, statistics, political science, and other disciplines which impact on ethical drug issues. The program prepares the student to address the complex socio-political problems relating to ethical drug consumption, manufacturing, distribution, and payment mechanisms.

Experimental therapeutics is a multi-disciplinary program which involves the investigation of disease processes and the therapeutic regimens in their treatment. Current areas of interest include diseases of the cardiovascular system, learning and memory, immunology, and renal diseases. Additionally, the efficacy of therapeutic regimens in special populations (e.g. geriatric, women, minority) are also of interest. The graduate program is designed to develop competencies in experimental therapeutics which is translational between the basic, applied and clinical settings.

Pharmaceutical and biomedical sciences include the general areas of pharmaceutics, pharmacology, toxicology and medicinal chemistry. Graduate studies in pharmaceutics explore and define the physical and chemical properties of pharmaceutical systems, and the mechanisms by which medication from these systems may be made available for utilization by the body. Areas of specialization include drug delivery, pharmacokinetics, biopharmaceutics, and industrial pharmacy. The multidisciplinary approach is used to solve research problems in pharmacokinetics, stability kinetics, dissolution phenomena, drug analysis, product development and dosage form design.

Pharmacology is the study of the action of chemicals on living organisms, the effects induced and their therapeutic applications. As a scientific discipline, it is based on the biological sciences with particular emphasis on physiology and biochemistry. Specific programs are available in neuropharmacology, behavioral pharmacology, biochemical pharmacology, and cardiovascular pharmacology.

Toxicology is the scientific discipline which deals with the injurious effects of chemicals on humans and other living organisms. Toxicology is a broad, multi-disciplinary field requiring expertise in a number of biological sciences, including biochemistry, physiology, pharmacology, cell biology, pathology and biostatistics. Toxicology is rapidly expanding in scope and prominence, due to the increasing use/misuse of chemicals and to the increased recognition of hazards posed by chemicals. Students may choose to work in ongoing research programs involving studies of: drug/chemical interactions; relative pharmacokinetics and toxicity of inhaled and ingested hydrocarbons; mechanisms of cytotoxic actions of halogenated organics; biochemical role of calcium in cellular injury by chemicals; influence of nutrition on chemical metabolism and toxicity; role of diet in chemically induced cancers; influence of lead exposure and drugs on harmful effects of noise.

Medicinal chemistry is unique among the specialized areas of chemistry, in that it requires a significant background in the biological sciences as well as a thorough understanding of chemistry. Areas of specialization are the synthesis of new compounds of medicinal interest, in vitro and in vivo studies of drug metabolism, and analytical studies of drugs in dosage forms and biological samples such as plasma or urine.

For a description of the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin entitled, "General Degrees: Interdisciplinary Program."

PHRM 4050/6050. Principles of Medicinal Chemistry I. 3 hours.
Prerequisite: PHRM 3060 or permission of department.
Corequisite: Undergraduate level only: PHRM 4410 and PHRM 4850.
Drugs acting on the peripheral nervous system and peripheral acting hormones and antihormones, including structure-activity relationships; mechanisms of action; storage and chemical stability reactions.

PHRM 4060/6060. Principles of Medicinal Chemistry II. 3 hours.
Prerequisite: PHRM 3060 or PHRM 4050/6050.
Corequisite: Undergraduate level only: PHRM 4420 and PHRM 4860.
Central nervous system drugs, including their physiochemical properties, structure-activity relationships and toxicities, side effects, and drug interactions.

PHRM 4180/6180. Drug Therapy of Infectious Disease. 3 hours.
Prerequisite: PHRM 3060 or permission of department.
Corequisite: Undergraduate level only: PHRM 4120.
Chemistry, spectrum of activity, place in therapy, stability, incompatibilities, and toxicities of antibacterials, antivirals, and antibiotics.

PHRM 4190/6190. Chemotherapy of Cancer. 2 hours.
Prerequisite: PHRM 3060 or permission of department.
Corequisite: Undergraduate level only: PHRM 4130.
Etiology, prevention, and treatment of cancer in man. Emphasis is on the mechanism, toxicity, and side effects of anticancer agents of various antineoplastic agents.

PHRM 5260/7260. Clinical Pharmacokinetics I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (PHRM 4210 and PHRM 4420) or permission of department.
Basic pharmacokinetic concepts and the design and monitoring of therapeutic drug regimens. Emphasis is on learning how to analyze and interpret patient-specific drug concentration time data.

PHRM 5270/7270. Clinical Pharmacokinetics II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PHRM 5260/7260 or permission of department.
Nonlinear pharmacokinetics and effects on therapeutic drug regimens; emphasis on drug and disease-specific case studies.

PHRM 6400. Human Physiology I. 4 hours.
Not open to students with credit in PHRM 3400.
Prerequisite: (BIOL 1104-1104L and CHEM 2410 and CHEM 2410L) or permission of department.
Physiology of the human body with emphasis on the central nervous system, autonomic nervous system and digestive system.

PHRM 6410. Pharmacology I. 4 hours.
Not open to students with credit in PHRM 4410.
Prerequisite: Permission of department.
Mechanisms of action of drugs in the human body. Specific drug classes that are covered include nonsteroidal antiinflammatory drugs, male and female reproductive agents, thyroid drugs, insulin and diabetes treatments, diuretics, ACTH, cholinergic, antihypertensives, hyperlipidemias, antianginals, cardiac glycosides, thrombolytics, and antiarrhythmics.

PHRM 6420. Pharmacology II. 4 hours.
Not open to students with credit in PHRM 4420.
Prerequisite: PHRM 6410 or permission of department.
Pharmacologic action, therapeutic application, and toxicology of drugs in current use, focusing on central nervous system and autonomic nervous system drugs.

PHRM 6470. Pathophysiology I. 4 hours.
Not open to students with credit in PHRM 3470.
Prerequisite: BIOL 1104-1104L and CHEM 2410 and CHEM 2410L.
Corequisite: PHRM 6400.
Mechanisms of human disease processes, including manifestation, mechanisms, diagnosis, treatment, prognosis. Emphasis is on cell injury, neurological, dermatological, oncological, gastrointestinal, visual, and auditory disorders.

PHRM 6480. Pathophysiology II. 4 hours.
Not open to students with credit in PHRM 3480.
Prerequisite: BIOL 1104-1104L and CHEM 2410 and CHEM 2410L.
Corequisite: PHRM 6500.
Mechanisms of human disease processes, including manifestation, mechanisms, diagnosis, treatment, prognosis. Emphasis is on inflammation, blood, endocrine, cardiovascular, pulmonary, and renal disorders.

PHRM 6500. Human Physiology II. 4 hours.
Not open to students with credit in PHRM 3410.
Prerequisite: Permission of department.
Human physiology of the cardiovascular, renal, endocrine, respiratory, immune, and reproductive systems, including selected topics in integrated physiological regulation. Directed literature studies in human physiology.

PHRM 6550. Essentials of Animals in Biomedical Research. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Humane methods of animal maintenance and experimentation; the testing methods which minimize animal distress; use of anesthetics, analgesics, and tranquilizers for commonly used lab species; methods for reporting deficiencies in animal care; laws pertaining to the use of animals in biomedical research.

PHRM(VPHY) 6910. Introductory Toxicology. 3 hours.
Basic toxicology principles, including dose-response relationships, principles of toxicity and safety evaluation, pharmacokinetics and metabolism of chemicals, basic mechanisms of cellular injury, factors influencing toxicity, carcinogenesis/mutagenesis, governmental regulations, and exposure and risk assessment.

PHRM 7000. Master's Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under

the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHRM 7210. Special Topics in Pharmacy. 3-5 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Specialized pharmaceutical systems, processes and techniques, assignments of current literature and student presentations. Non-Traditional Format: Formal lectures are not held. Faculty work with students as needed.

PHRM 7220. Drug Development and Regulation. 3 hours.
Prerequisite: Permission of department.
Processes involved in drug discovery, development, and regulation, including methods of new drug characterization, preclinical and clinical testing, laboratory and manufacturing practice standards, government regulations applicable to the drug approval process for marketing and postmarketing surveillance.

PHRM 7230. Ethical Issues in Research. 2 hours.
Prerequisite: Permission of department.
Ethics of research in animals and human subjects, fraud, scientific misconduct, and conflicts of interest.

PHRM 7300. Master's Thesis. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PHRM 8010. Biochemical Targets of Drug Design. 3 hours.
Prerequisite: Permission of department.
Rational design of drugs based on biochemical targets in humans and pathogenic organisms. Various methodology for the design of drugs, such as false-substrate, mechanism band, and suicide substrate will be presented.

PHRM 8070. Computational Methods for Drug Design and Discovery. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Common theoretical approaches relevant to drug design and discovery, including applied aspects of computational chemistry, quantitating structure-activity relationships (QSAR) and computational molecular biology. Specific topics include modeling of small molecules, proteins, nucleic acids, carbohydrates, and drug receptors; QSAR and 3D-QSAR; and bioinformatics approaches.

PHRM 8080. Grantsmanship. 3 hours.
Prerequisite: Permission of department.
Organization and origination of research ideas and data into grants, manuscript, and other submissions.

PHRM 8100. Pharmaceutical Analysis I. 3 hours.
Prerequisite: Permission of department.
Separation, identification, and analysis of drugs by thin-layer, gas, and high performance liquid chromatography, supercritical fluid chromatography, and capillary electrophoresis.

PHRM 8110. Pharmaceutical Analysis II. 3 hours.
Prerequisite: Permission of department.
The separation, identification, and analysis of drugs and metabolites in biological samples.

PHRM 8120. Pharmaceutical Analysis III. 3 hours.
Prerequisite: Permission of department.
Identification and analysis of drugs and other biomolecules by mass spectrometry.

PHRM 8160. Chemistry of Synthetic Drugs. 2 hours.
Prerequisite: PHRM 4060/6060 and CHEM 8320.
New and established methods for synthetic preparation of organic medicinal agents.

PHRM 8180. Carbohydrate and Nucleoside Chemistry. 3 hours.
Prerequisite: Permission of department.
Carbohydrate chemistry and its application to the synthesis of nucleosides and related classes of compounds.

PHRM 8200. Pharmaceutics Seminar. 1 hour. Repeatable for maximum 8 hours credit.
Research and new developments in pharmaceutics. Non-Traditional Format: Formal lectures are not held. Faculty work with students as needed.

PHRM 8210. Advanced Topics in Pharmaceutics. 1 hour. Repeatable for maximum 10 hours credit. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Methods of utilizing the literature relating to pharmaceutics and discussion of recent developments in the field.

PHRM 8220. Physical Pharmacy. 4 hours.
Prerequisite: Permission of department.
Physical concepts and methods as they apply to pharmaceutical problems. Non-Traditional Format: Formal lectures are not held. Faculty work with students as needed.

PHRM 8230. Drug Delivery Systems. 4 hours.
Prerequisite: Permission of department.
The concepts, principles, technology, and assessment of drug delivery to the blood and target sites by various routes.

PHRM 8240. Technology in Industrial Pharmacy. 4 hours. 1 hour lecture and 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Formation and production of powders, capsules, compressed tablets, coated tablets, liquids, and semisolids.

PHRM 8260. Pharmacokinetics. 4 hours.
Prerequisite: Permission of department.
The kinetics of drug absorption, distribution, and elimination with emphasis on the development and evaluation of mathematical models.

PHRM 8270. Contemporary Concepts in Pharmacokinetics. 3 hours.
Prerequisite: PHRM 8260.
Techniques of pharmacokinetic and pharmacodynamic modeling and data treatment.

PHRM 8290. Computer Applications in Pharmaceutical Sciences. 3-5 hours. Repeatable for maximum 5 hours credit. 2 hours lecture and 1-3 lab periods of 2 hours each per week.
Applications of computers in pharmaceutical sciences.

PHRM 8420. Cardiovascular Pharmacology. 3 hours.
Prerequisite: Permission of department.
Mechanisms of action of drugs used in the treatment of cardiovascular disease states at the system, organ, and molecular level.

PHRM 8430. Advanced Neuropharmacology. 3 hours.
Prerequisite: PHRM 4420 or PHRM 6420 or permission of department.
Behavioral and neurochemical aspects of drug action in the central nervous system.

PHRM 8450. Coronary Heart Disease. 3 hours.
Prerequisite: Permission of department.
Pathophysiology of and therapeutic strategies for treatment of coronary heart disease, including lipid profiles, stress, alcohol, smoking and obesity as interactive risks in coronary artery disease. The vascular biology of arteries and the biochemistry and cell biology of atherogenesis are examined.

PHRM 8610. Social Behavioral Theory in Health Care. 3 hours.
Prerequisite: Permission of department.
Social behavioral theory and research methods used by health services researchers, focusing on determinants of health and illness, the interplay between values, technology, economics, and patient care.

PHRM 8620. Pharmacy Care Administration Seminar. 1 hour.
Current topics of pharmacy and health care services research.

PHRM 8630. Health Care Systems. 3 hours.
Prerequisite: Permission of department.
Health care policy and the research methods used by health services researchers; the complex environment in which health care goods and services are delivered to consumers; the political, economic, and social forces influencing the health care system.

PHRM 8640. Research Methods in Pharmacy Care Administration. 3 hours.
Prerequisite: Permission of department.
Research methodology, including formulation of research questions and research hypotheses, selection of the research design, sampling, internal and external validity, data collection, data analysis, results presentation and discussion.

PHRM 8660. Health Care Marketing. 3 hours.
Prerequisite: Permission of department.
Application of the marketing process to health care and exploration of how marketing theory and practice are applied in health care environments. Development and marketing of health care technology and consumer behavior issues, health beliefs, health promotion, and the role of patient education on behavior are explored.

PHRM 8670. Pharmacoeconomics and Health Care Technology Assessment. 3 hours.
Prerequisite: STAT 6220 and PHRM 8660.
The skills to design, conduct, analyze, and rate trials to evaluate health outcomes of various technologies or policies; theoretical models for health outcomes research integrated with pharmacoeconomics; the methodologic designs and statistical analyses commonly employed to evaluate various health technologies.

PHRM 8680. Pharmacoepidemiology. 3 hours.
Prerequisite: PHRM 8640.
Nature, purpose, and methods in pharmacoepidemiology and their place in pharmacy and health policy. The general concepts in epidemiology and pharmacoepidemiology such as study population, drug exposure, basic measurements, quality of measurements, designs, bias and confounding factors.

PHRM(VPHY) 8910. Organ Systems Toxicology I. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Mechanisms of injury of biological systems produced by chemical exposure. Adverse effects of chemicals on major bodily organs and organ systems including the blood, respiratory systems, nervous system, kidneys and the cardiovascular system.

PHRM(VPHY)(POUL) 8920. Organ Systems Toxicology II. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Mechanisms of injury of biological systems produced by chemical exposure. Adverse effects of chemicals on major bodily organs and organ systems including the liver, carcinogenesis/mutagenesis, immune system, reproductive system, skin, and eyes.

PHRM(VPHY)(POUL)(EHSC) 8930. Chemical Toxicology. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Chemical contamination of air, water, and food by major agricultural and industrial chemicals. Emphasis will be placed on sources of contamination, fate of chemicals in the environment, target species, health effects, chemical analyses, and contamination control.

PHRM 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PHRM 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

The School of Social Work

Bonnie L. Yegidis, Dean
Nancy P. Kropf, *Graduate Coordinator,*
542-5429
(Tucker Hall)

The School of Social Work offers the MSW and the PhD degrees. The graduate professional curriculum is a four semester program leading to the Master of Social Work degree. Admission may be obtained by persons holding bachelor's degrees in any field which includes a liberal arts education if potential for graduate professional education is demonstrated. Advanced standing may be awarded to selected applicants who are graduates of undergraduate social work programs accredited by the Council of Social Work Education. The program for applicants eligible for advanced standing is three semesters in length.

Graduate assistantships and federal traineeships are available in limited numbers. In addition, a few public and voluntary agencies offer stipends.

The program includes two field instruction experiences: the first is generalist and begins in the spring semester of full-time study. The second is the concentration area and occurs in the third and fourth semesters of full-time study. Students may select either a concentration in family well being, or community empowerment and program development.

The School of Social Work also offers the PhD degree, with specialization in the development of knowledge for social work practice. The program includes advanced study in theory, research methods, assessment of practice, internship, and the dissertation. Admission criteria include the MSW, professional experience, and a strong academic record.

(SOWK)ECHD(CHFD) 6010. Issues in Marriage and Family Therapy. 3 hours.
Prerequisite: Permission of school.
Disciplines and professional groups related to marriage and family therapy, including historical, ethical, and legal issues, and other topics relevant to the current practice of marriage and family therapy.

SOWK 6011. Social Welfare Policy and the Social Work Profession. 3 hours.
History of the social work profession and the structures, functions, philosophies, and policies of programs and services which are designed to ameliorate social problems. The process of recognizing and defining social problems and then developing legislation is analyzed.

SOWK 6022. Human Behavior in the Social Environment: Theoretical Perspectives. 3 hours.
Theories of human behavior which guide the practice of social work and provide the basis for assessment in social work practice. Theories such as the psychoanalytic, behavioral, ecological, and normative life stages are highlighted.

SOWK 6033. Direct Practice Methods. 3 hours.
Skill, knowledge, and values of generalist social work practice. Emphasis is placed on the strengths perspective and ecological system framework. Skill development areas include interviewing, communication, building relationships, and problem-solving.

SOWK 6044. Theory and Practice with Families and Groups. 4 hours.
Family and group dynamics in relation to social work practices with families and groups. Theory and practice are integrated and evaluated at various levels of practice.

SOWK 6055. Foundation Practicum and Seminar. 3 hours.
Prerequisite: (SOWK 6011 or SOWK 6022 or SOWK 6033) and SOWK 6044.
Generalist practicum and integrative seminar. Learning plans are developed and implemented together with field instructors in community social service agencies.

SOWK 6066. Foundation Research Methods. 3 hours.
Developing, testing, refining, and using empirical scientific knowledge for social work practice.

SOWK 6074. Theory and Practice With Organizations and Communities. 4 hours.
Organizational and community dynamics, leadership, and change practices within agencies, agency networks, communities, and community empowerment groups.

SOWK 6082. Cultural Diversity. 3 hours.
The impact on social work practice of diversities in age, ethnicity, race, religion, ability, gender, economic class, and sexual orientation.

SOWK 6908. Independent Social Work Research. 1-5 hours. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of school.
Readings course for independent research into the human services under the direction of a faculty member. Non-Traditional Format: Independent study.

SOWK 7000. Master's Research. 1-5 hours. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SOWK 7011. Advanced Policy Analysis. 3 hours.
Prerequisite: SOWK 6011 or permission of school.
Social welfare policy analysis as a field of study. Concepts and tools of analysis are examined in a variety of social problem and related institutional fields.

SOWK 7023. Family-Centered Assessment and Practice with Individuals. 4 hours.
Prerequisite: SOWK 6055 or SOWK 6044 or permission of school.
Assessment methods applicable to social work practice with individuals within the context of the family system.

SOWK 7033. Community Assessment and Empowerment Practices. 4 hours.
Prerequisite: SOWK 6033 or SOWK 6044 or permission of school.
Assessment and intervention with groups, organizations, and communities. Techniques of organizational and community assessment are developed, followed by models of planned intervention.

SOWK 7047. Special Topics in Social Work. 2-3 hours. Repeatable for maximum 6 hours credit.
Unique topical subjects in social work practice, theory, research, or policy.

SOWK 7055. Concentration Practicum. 4 hours. Repeatable for maximum 10 hours credit.
Prerequisite: SOWK 6055 or permission of school.
Two semesters of practical field experience integrating knowledge of human behavior and interventive practice models. A final project demonstrates advanced competence in assessment, practice, diversity, and research.

SOWK 7066. Evaluation of Family-Centered Social Work Intervention. 4 hours.
Prerequisite: SOWK 7023 or permission of school.
Evaluation of direct social work practices with individuals, couples, families, and small groups, utilizing social science research methodologies.

SOWK 7166. Evaluation of Community and Institutional Practices. 4 hours.
Prerequisite: SOWK 6044 or SOWK 7033 or permission of school.
Models of evaluation of community empowerment groups and institutional development programs. Skills are developed in the design and application of empirically-based outcome evaluations.

SOWK 7183. Social Work Treatment with Groups. 2 hours.
Prerequisite: SOWK 6044.
Direct theory-based practice methods with groups. Emphasis is placed on models which are effective with persons at risk because of race, age, ethnicity, ability, gender, or sexual orientation.

SOWK 7222. Assessment and Psychopathology. 2-3 hours.
Prerequisite: Permission of school.
Assessment of individuals in the context of mental disorders. The evolution and assumptions of the DSM systems are examined in terms of strengths and limitations.

SOWK 7233. Behavioral Methods in Social Work Practice. 2-3 hours.
Empirically supported, behavioral interventions for a variety of psychosocial problems. Alcohol and drug abuse, chronic mental illness, affective disorders, anxiety disorders, child and adolescent conduct and autistic disorders are highlighted.

SOWK 7300. Master's Thesis. 1-5 hours. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of school.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

SOWK 7327. Topics in Aging. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies regarding interventions with abused and vulnerable adults. Families with older adult members are also highlighted.

SOWK 7337. Topics in Community Practice. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies regarding intervention at the community level. Various models of community practice are included.

SOWK 7347. Topics in Family and Child Welfare. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies regarding interventions with vulnerable children and their families. A variety of children's, school, parental, and related adult topics are highlighted.

SOWK 7377. Topics in Program Development. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies regarding program design and development in the delivery of human services. Capabilities for organizing to develop programs are highlighted.

SOWK 7387. Topics in Social Problem Intervention. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies regarding treatment or preventive interventions which

are designed to address special social problems. Examples include substance abuse, family violence, mental health, physical health, and corrections.

SOWK 7397. Topics in Social Justice. 2-3 hours. Repeatable for maximum 10 hours credit.
Human behavior, practice, research, and policies which affect organized movements for social justice in the United States of America and developing countries. Perspectives include feminist, racial and ethnic, sexual orientation, age, disability, and social development.

SOWK 7417. Issues in Professional Employment. 1-3 hours.
The process of negotiating the job market. Analysis of personal professional market value is performed in relation to values among employers. Attributes of employers and potential colleagues in preferred settings are discussed.

SOWK 8012. Theories of Social Work Practice I. 3 hours.
Critical analysis of social work practice theories for small systems, their assumptions, application, relevance to human conditions throughout the world, strengths and limitations in working with culturally diverse populations, and empirical evidence to support their effectiveness.

SOWK 8022. Theories of Social Work Practice II. 3 hours.
A critical analysis of social work practice theories for organizations and communities, their assumptions, application, relevance to human conditions throughout the world, strengths and limitations in working with culturally diverse populations, and empirical evidence to support their effectiveness.

SOWK 8116. Research Methods I. 3 hours.
Procedures for conceptualizing a research problem, developing a methodological approach, and providing an analysis plan. An emphasis is put on deduction and a monothetic approach that highlights quantitative analysis. The steps of scientific research methodology are reviewed and followed.

SOWK 8126. Research Methods for Social Work Practice. 3 hours.
Prerequisite: SOWK 8116.
Principles and conduct of single-system research designs (SSRDs) as strategies for evaluating the outcomes of social work practice. Critical analysis of published examples of research in social work and other disciplines which used SSRDs. Research on practice with individuals, groups, couples, families, organizations, and communities will be examined.

SOWK 8136. Methods for Community and Organizational Research. 3 hours.
Prerequisite or corequisite: (STAT 6210 or ERSH 6300 or PSYC 6410) and SOWK 8116.
Research methods, tools, and strategies for studies on communities and organizations.

SOWK 8146. Assessment of Measurement in Social Work. 3 hours.
Prerequisite: STAT 6210 or ERSH 6300 or PSYC 6410.
Application of psychometric theory and techniques to problems of issues involved in the practice of social work with individuals, families, groups, organizations, and communities.

SOWK 8156. Software for Social Work Research. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: (STAT 6210 or ERSH 6300 or PSYC 6410) and SOWK 8116.
Students will master the use of selected software packages that are useful in carrying out independent research on social work issues. Non-Traditional Format: Independent research.

SOWK 8166. Qualitative Research Methods in Social Work. 3 hours.
Theories and methodologies of qualitative social work research, including ethnography, case study, interview, document analysis, and life history studies. The relationships between qualitative and other research traditions are examined. Techniques for data collection, analysis, and presentation are studied.

SOWK 8217. Philosophy of Science and Theory Development. 3 hours.
Issues in the philosophy of social science and approaches to the construction, development, and refinement theories undergirding the field of social work.

SOWK 8227. Doctoral Seminar. 3 hours.
Overview of social work education; the development, testing, and evaluation of knowledge for social work practice; accreditation of social work education programs; and professional associations supporting social work education.

SOWK 8237. Ethical Issues in Social Work Practice. 3 hours.
Basic theories and principles of ethics and their application to a variety of professional issues in the delivery of human services. Attention to examination of major theories of ethics, their application in the analysis of dilemmas in practice, and research approaches for further study of ethical problems.

SOWK 8240. Dissertation Prospectus. 3 hours.
Prerequisite: Admission to Doctoral Candidacy.
Directed study on preparing a doctoral dissertation prospectus.

SOWK 8306. Research Practicum. 2-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: SOWK 8116.
Application of research methods to social work practice, under faculty supervision. Experiences cover the conceptualization of problems through data collection, analysis, interpretation, and writing.

SOWK 8315. Social Work Education Practicum. 1-3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of school.
Practical instructional roles in classroom and field teaching under the guidance of a faculty mentor. Designed to give students experience in all aspects of teaching in higher education, such as constructing course syllabi, leading large and small group classroom instruction activities, and monitoring and evaluating student accomplishment of course objectives.

SOWK 8417. Special Issues in Social Work Practice. 1-3 hours. Repeatable for maximum 9 hours credit.
Current issues and topics that are of scholarly interest, including the nature of social problems, developments in human behavior and cultural diversity, relevant human conditions throughout the world, social policy trends and issues, innovations in service delivery models, new directions for human social services, and developments in research methods.

SOWK 8428. Directed Research on Social Work Practice. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of school.
Research on topics and issues relevant to social work practice under the guidance of a faculty member. Non-Traditional Format: Independent research under the direction of a faculty member.

SOWK 9000. Doctoral Research. 1-6 hours. Repeatable for maximum 24 hours credit.
Prerequisite: Permission of school.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

SOWK 9105. Social Work Research Internship. 3-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of school.
Practice research internship to apply research methods to the study of social work practice. Students develop and test social work interventions based on current theories and practice. Non-Traditional Format: Internship twenty-four hours per week.

SOWK 9300. Doctoral Dissertation. 1-9 hours. Repeatable for maximum 18 hours credit.
Prerequisite: Permission of school.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

The College of Veterinary Medicine

Keith W. Prasse, Dean
(Veterinary Medicine Building)

The College of Veterinary Medicine offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The major areas of concentration include anatomy (MS only), medical microbiology, parasitology, pathology, pharmacology, physiology, and toxicology. A program is offered leading to the professional degree of Master of Avian Medicine for veterinary graduates desiring specialized training in the diagnosis, treatment, and prevention of poultry diseases. In many cases graduate programs are open both to veterinary graduates and to those with bachelor's degrees in appropriate areas.

Internship and residency programs for veterinary graduates are offered in small animal medicine, large animal medicine, surgery, neurology, ophthalmology, theriogenology, and radiology. Residents have the opportunity to work toward the MS or PhD degree in a basic science along with their clinical science training.

Details concerning specific admission or program requirements and options should be discussed with the appropriate department. General information regarding degree programs available in the College of Veterinary Medicine may be obtained from the Office of the Associate Dean for Research and Graduate Affairs, College of Veterinary Medicine.

Avian Medicine

Stanley H. Kleven, *Head*
Jean E. Sander, *Graduate Coordinator, 542-5058*
(Poultry Diagnostic and Research Center)

The Master of Avian Medicine is designed to provide veterinarians with specialized training in the diagnosis, treatment and prevention of poultry diseases. The degree is open to students who hold the Doctor of Veterinary Medicine degree.

AVMD 6050. Avian Diseases. 3 hours.
Prerequisite: Permission of department.
The signs of specific poultry diseases, their causes, and contributing management factors.

AVMD 6100. Clinical Avian Medicine. 3 hours.
Prerequisite: Permission of department.
Through study of case material, students learn to integrate laboratory test results into an accurate diagnosis. Appropriate treatment and prevention plans will be formulated.

AVMD 6120. Avian Medicine Clinical Rounds. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Faculty and students will discuss in detail clinical cases representing current avian disease problems.

AVMD 6140. Avian Necropsy. 1 hour. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Necropsy procedures applied to diagnosis of avian diseases. Use of necropsy case material to correlate function with structure; appropriate therapeutic and prophylactic measures are discussed and recommendations for clients determined. Problem-oriented medical records maintained for discussion and audit.

AVMD 6160. Poultry Disease and Management Interaction. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Interactions between current commercial management practices relative to their effect on poultry diseases. Actual field experiences are used in the identification of health problems and recommendations for improving flock health.

AVMD 6210. Avian Medicine Externship. 7 hours. 5 lab periods of 8 hours each per week.
Prerequisite: Permission of department.
Independent off-campus experience working as a veterinarian in commercial poultry companies, allied industries, or diagnostic laboratories. Non-Traditional Format: Students in this course are off-campus and participate full time in the daily and weekly activities of their corporate or governmental sponsors.

AVMD 6800. Avian Pharmacology and Toxicology. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Chemistry, mechanisms of action, legal dosages, residue concerns, and analysis of antibiotics, minerals, vitamins, anthelmintics, mycotoxins, and other natu-

rally-occurring toxicants impacting commercial poultry production.

AVMD 7060. Avian Diagnostic Microbiology. 3 hours. Prerequisite: Permission of department.
Intense practical experience in acquisition, handling, and processing of clinical microbiological specimens. Areas covered include processing techniques, culture techniques, media selection, screening methods, interpretation of cultures, traditional and rapid identification methods, antimicrobial sensitivity testing, special recovery and enrichment techniques, hatchery microbiology, HACCP and processing.

AVMD 7060L. Avian Diagnostic Microbiology Laboratory. 1 hour. 2 lab periods of 1.5 hours each per week. Prerequisite: Permission of department.
Corequisite: AVMD 7060.
Laboratory to be taken in conjunction with Avian Diagnostic Microbiology. The laboratory will apply techniques discussed in lectures.

AVMD 8050. Avian Virus Diseases. 3 hours.
Prerequisite: Permission of department.
The serological and virological methods used to isolate and identify avian viruses of economic importance. Cell culture systems are prepared and infected with different viruses to observe their effect. Specific projects are undertaken to familiarize the student with current virological techniques.

AVMD 8050L. Avian Virus Diseases Laboratory. 1 hour. 2 lab periods of 1.5 hours each per week.
Prerequisite: AVMD 8050 or permission of department.
Prerequisite or corequisite: AVMD 8050.
Laboratory to be taken in conjunction with Avian Virus Diseases. The laboratory will apply techniques discussed in lecture to identify viruses of importance to poultry.

AVMD 8110. Problems in Poultry Diseases and Parasites. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Students work intensively on approved problems in the field of poultry health after selection of the specialized area with the appropriate staff member.

AVMD 8150. Avian Medicine Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Presentation and discussion of current diagnostic cases and research activities in the area of avian medicine.

(AVMD)VPAT 8220. Avian Histopathology. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Detailed microscopic studies will be made of avian tissues and the effects of specific diseases and their processes on them. A working knowledge of tissue processing and differential staining will be included.

Large Animal Medicine

James Neil Moore, *Head and Graduate Coordinator, 542-3325*
(Veterinary Medicine Building)

The Department of Large Animal Medicine does not have a graduate degree program. Clinical internships and residency programs are offered. Residents are enrolled in graduate degree programs of other departments in the college.

LAMS 5610/7610. Large Animal Residency I. 5-15 hours. 5-15 lab periods of 8 hours each per week.
Prerequisite: DVM degree and permission of department.
This course provides clinical training during year one of a residency for graduate veterinarians desiring to specialize in large animal medicine, surgery, theriogenology, radiology, or anesthesiology. Non-Traditional Format: Clinical responsibilities vary with requirements for time and duty.

LAMS 5620/7620. Large Animal Residency II. 5-15 hours. 5-15 lab periods of 8 hours each per week.
Prerequisite: DVM degree and permission of department.
This course provides clinical training during year two of a large animal residency for graduate veterinarians in medicine, surgery, radiology, theriogenology, and anesthesiology. Non-Traditional Format: Clinical training.

LAMS 5630/7630. Large Animal Residency III. 10 hours. 5 lab periods of 8 hours each per week.
Prerequisite: DVM degree and permission of department.
This course provides clinical training during year three of a large animal residency for graduate veterinarians in medicine, surgery, theriogenology, radiology, or anesthesiology.

LAMS 5640/7640. Large Animal Residency IV. 10 hours. 5 lab periods of 8 hours each per week.
Prerequisite: DVM degree and permission of department.
This course provides clinical training for graduate veterinarians in the fourth year of a large animal residency in animal medicine, surgery, radiology, theriogenology, or anesthesiology. Non-Traditional Format: Clinical training.

LAMS 5650/7650. Seminar in Large Animal Medicine and Surgery. 1-4 hours. Repeatable for maximum 10 hours credit. 1-4 lab periods of 8 hours each per week.
Prerequisite: DVM degree or permission of department.
This course is for graduate veterinarians during any year of their clinical training in a large animal residency in

which they attend journal club discussions in either medicine or surgery. Non-Traditional Format: Discussion periods vary from 30 to 45 minutes per week.

Medical Microbiology and Parasitology

Richard E. Wooley, *Head*
Donald L. Dawe, *Graduate Coordinator, 542-5793*
(Veterinary Medicine Building)

Graduate work is offered in medical microbiology and parasitology leading to the MS and PhD degrees. Areas of specialization include biology of pathogenic microorganisms; immunology; animal virology; infectious diseases of mammals, avian, or fish; molecular biology, chemotherapy, immunology of parasitic protozoa and helminths as well as various aspects of wildlife diseases. An MS degree is also offered in an epidemiology specialization. Two types of students are accepted for graduate training: those with BS or MS degrees and those with DVM degrees.

Instruction is coordinated with course offerings in departments of the College of Arts and Sciences and the College of Agricultural and Environmental Sciences. The statistics and computer science departments are involved in the epidemiology program of study. Suitable courses in these departments are included in students' programs of study. Instruction in infectious diseases is coordinated with work in other departments within the College of Veterinary Medicine, the Poultry Diagnostic Research Center, and regional/federal research facilities.

Medical Microbiology

MMIB 4100/6100-4100L/6100L. Medical Immunology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in CBIO(MIBO) 4100/6100.
Prerequisite: MIBO 3500 and BCMB(BIOL)(CHEM) 3100.
The mechanism of the immune response, host resistance to infection, serologic testing methods, and in vitro cellular testing procedures.

MMIB 4220/6220. Pathogenic Bacteriology. 3.3 hours. The morphological, physiological, and pathogenic mechanisms of the important pathogenic bacterial agents; their relation to health and disease.

MMIB 4390/6390-4390L/6390L. Clinical Diagnostic Microbiology. 3 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MMIB 4220/6220.
The application of basic diagnostic problems associated with the recovery of disease organisms from clinical material. Methodology and problems involved in laboratory isolation and identification. Methods will also include molecular and automated applications.

MMIB 4450/6450. Molecular Bacteriology. 3 hours. Not open to students with credit in MIBO 4800L/6800L.
Prerequisite: MIBO 3500.
Techniques involved in identifying bacterial genes and discerning their function. The general principles behind cloning, nucleic acid hybridizations, and PCR. Issues concerning scientific integrity and patent issues.

MMIB 4500/6500-4500L/6500L. Virology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: [MIBO 3500 and BCMB(BIOL)(CHEM) 3100] or permission of department.
The basic principles and concepts of virology. The major emphasis will be on vertebrate viruses. Subjects covered in this course include classification, replication, diagnosis, quantification, pathogenesis, epidemiology, and viral neoplasia.

MMIB 4800/6800. Environmental Epidemiology. 3 hours.
Prerequisite: Permission of department.
The basics of epidemiology, relying on the Principles of Epidemiology Homestudy Manual from the Centers for Disease Control and Prevention. Utilizing this manual and lecture material, the students will understand how to incorporate epidemiologic tools into handling environmental health related concerns; topical infectious diseases.

MMIB 7000. Master's Research. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MMIB 7300. Master's Thesis. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

MMIB 8160. Seminar in Medical Microbiology. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Semi-formal meetings for discussion of research and new developments in the field. Attendance is required of all Medical Microbiology graduate students.

MMIB(MIBO) 8200. Pathogenic and Molecular Microbiology. 5 hours.
Prerequisite: MMIB 4220/6220 and BCMB 4020/6020.
Medical pathogens emphasizing molecular techniques.

MMIB 8210. Experimental Procedures in Microbial Pathogenesis. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: BCMB 8020 or permission of department.
Experimental procedures for the study of microbial virulence mechanisms. Basic laboratory techniques involved in the identification, isolation, and characterization of molecular factors responsible for microbial survival and virulence within a host.

MMIB(MIBO) 8230. Special Topics in Microbial Pathogenesis. 2 hours. Repeatable for maximum 4 hours credit.
Presentation and discussion of published research and new developments in microbial pathogenesis.

MMIB 8300-8300L. Advanced Immunology II. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Molecular immunology of signal transduction; T-cell, B-cell and NK cell regulation by MHC class I and II antigens; mechanisms of apoptosis; peptide processing and presentation. Lectures presented from recent research literature. Laboratory encourages graduate student involvement of their own research, with emphasis on flow cytometry and other analytical approaches.

MMIB 8350-8350L. Principles and Research Applications of Flow Cytometry. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Theory and research applications of flow cytometry. Flow cytometry as it relates to immunophenotyping, cell cycle analysis, innovative procedures measuring apoptosis, and simultaneous four color analysis. Students will become independent regarding instrumentation, collection of data, analysis, etc. Hands-on experience will be obtained utilizing state-of-the-art instruments.

MMIB 8500. Animal Virology. 3 hours.
Prerequisite: MMIB 4500/6500-4500L/6500L.
Virus/cell interactions, with emphasis on molecular and genetic aspects of disease or tumor production by animal viruses. The use of molecular techniques in the diagnosis, epidemiology, and pathogenesis of viral diseases will be addressed using current literature as the basis for discussion.

MMIB 8900. Problems in Medical Microbiology. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Intensive study, under the direction of staff members, on approved problems in medical microbiology. Non-Traditional Format: Directed study.

MMIB 9000. Doctoral Research. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

MMIB 9300. Doctoral Dissertation. 1-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Parasitology

PARA 7000. Master's Research. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PARA 7300. Master's Thesis. 1-15 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

PARA 8030. Helminthology. 3 hours. 1 hour lecture and 4 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The morphology, life histories, classification, and parasitic relationship of the helminths. Emphasis is placed on recent advances in helminthology research.

PARA 8050. Problems in Parasitology. 1-3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Parasitic diseases of birds and mammals. Nature of the studies determined by the student's major field of interest. Non-Traditional Format: No traditional classes are held. Faculty members assist students as needed.

PARA 8060L. Techniques in Experimental Parasitology. 4 hours. 4 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Techniques necessary for in vivo and/or in vitro cultivation and maintenance of the life cycle of selected helminth, arthropod, and protozoan parasites will be employed.

PARA 8080L. Advanced Techniques in Molecular Parasitology. 3 hours. 2 lab periods of 3 hours each per week.
Current techniques in molecular parasitology. Emphasis is placed on procedures for genomic analysis, rapid isolation and characterization of parasite molecules, and the detection and identification of parasites in host and vector.

PARA 8090-8090L. Parasitic Protozoa. 3.5 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Current topics in the morphology, life histories, classification, and host/parasite interactions of protozoan parasites of man and lower animals.

PARA 8250. Special Topics in Parasitology. 1 hour. Repeatable for maximum 4 hours credit.
Published research and new developments in the study of parasites, their hosts and vectors.

(PARA)FORS 8500-8500L. Diseases of Wildlife I. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of school.
Prerequisite or corequisite: FORS(PARA) 8510-8510L.
Fundamental causes of disease-induced morbidity and mortality among free-ranging wildlife populations. Etiology, pathogenesis, clinical signs, lesions, epidemiology, diagnosis, and management significance of diseases produced by viral and microbial pathogens.

(PARA)FORS 8510-8510L. Diseases of Wildlife II. 5 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: Permission of school.
Prerequisite or corequisite: FORS(PARA) 8500-8500L.
Fundamental causes of disease-induced morbidity and mortality among free-ranging wildlife populations. Emphasis is on the etiology, pathogenesis, clinical signs, lesions, epidemiology, diagnosis, and management significance of diseases of parasitic, toxicologic, or miscellaneous etiologies.

(PARA)CBIO(POUL) 8560. Seminar in Parasitology. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Weekly discussion of parasitological topics.

PARA 8570. Seminar in Parasitology. 1 hour. Repeatable for maximum 6 hours credit.
Weekly meeting devoted to discussion of parasitologic subjects. Non-Traditional Format: A/F grading will be used when a student presents a seminar of her or his own work. S/U grading will be used when a student does not present, but does attend, the seminar series.

PARA 8580. Current Topics in Wildlife Health. 1 hour. Repeatable for maximum 5 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Ongoing disease investigations, research, and wildlife health issues of national interest will be reviewed and discussed in a bi-weekly review of SCWDS activities. Students will participate in the discussion and may be asked to report further information to the group at the next session. Non-Traditional Format: The class will meet for a two-hour session of discussion every other week associated with the Diagnostic and Research Meeting of the Southeastern Cooperative Wildlife Disease Study. The students are expected to use two hours on "off" weeks gathering information for use in discussion sessions.

PARA 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 45 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

PARA 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Pathology

Corrie C. Brown, *Head*
Jaroslava Halper, *Graduate Coordinator, 542-5830*
(Veterinary Medicine Building)

Graduate study leading to the MS or PhD degrees in veterinary pathology with emphasis in either anatomic or clinical pathology is offered by the department. Dissertation opportunities exist in the areas of growth factors, leukocyte pathobiology, infectious diseases, cellular immuno-pathobiology, wildlife diseases, avian pathology including diseases of exotic species, and immunodeficiency diseases.

Applicants for graduate study are accepted to begin preferably in the fall semester. Prospective students usually have the DVM degree.

For a description of the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin entitled, "General Degrees: Interdisciplinary Program."

(VPAT)BIOL(CBIO) 5040/7040. Electron Microscopy. 3 hours.
Prerequisite: [(CHEM 1212 and CHEM 1212L) or (CHEM 1412 and CHEM 1412L)] and PHYS 1112-1112L.
Instrument theory and theory of specimen preparation for both transmission and scanning electron microscopy. Fundamentals of X-ray microanalysis, image processing, and image analysis.

VPAT 7000. Master's Research. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPAT 7010. Necropsy Practicum. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Necropsy diagnosis of diseases of animals via gross and microscopic examination of tissues. Non-Traditional Format: Student works with necropsy pathologist on diagnostic necropsy cases.

VPAT 7020. Biopsy Practicum. 1-3 hours. Repeatable for maximum 6 hours credit.
The diagnosis of diseases of animals by biopsy techniques. Studies are made of microscopic alterations of tissue submitted for antemortem diagnosis. Non-Traditional Format: Student works with biopsy pathologist on clinic biopsy cases.

VPAT 7030. Cytology Practicum. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
The diagnosis of diseases of animals by cytologic techniques. Studies are made of cytologic preparations prepared from fluids and tissues submitted for antemortem diagnosis. Non-Traditional Format: Student works with clinical pathologist on cytology cases.

VPAT 7200-7200L. General Animal Pathology. 3.7 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
The reaction of the body to disease processes, specifically disturbances of circulation, cell injury, inflammation, and disturbances of growth. Recognizing lesions grossly and microscopically, determining the pathogenesis of the lesions, and making lesion and disease diagnoses. Non-Traditional Format: Computer assisted interactive programs.

VPAT 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

VPAT 8000. Pathology Rounds. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
The presentation of complete case studies in weekly clinical pathology and histopathology rounds. Non-Traditional Format: Student participates in weekly clinical pathology and histopathology rounds.

VPAT 8020. Cellular Pathology. 4 hours.
Prerequisite: Permission of department.
The response of the body to disease. Fine structural and molecular changes; includes mechanisms of cellular injury, carcinogenesis, and mechanisms of neoplasia and the inflammatory process.

VPAT 8050. Problems in Veterinary Pathology. 2-5 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Disease problems of both birds and mammals. The nature of the studies will be determined by the student's major field of interest. Non-Traditional Format: Student works with department faculty mentor on disease problems of birds or mammals.

VPAT 8070-8070L. Veterinary Hematology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
The morphology, physiology and pathology of the blood and blood-forming tissues. The laboratory will emphasize the morphology of normal and abnormal blood and bone marrow of domestic animals.

VPAT 8100. Microscopic Pathology. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The microscopic features of diseases of domestic animals with emphasis on writing lesion descriptions and diagnosis.

VPAT 8120. Seminars in Laboratory Clinical Biochemistry. 1-3 hours.
Prerequisite: Permission of department.
Test methodology with brief reviews of related pathophysiologic mechanisms, clinical applications, and species differences. Principles of instrumentation, quality control, methodology, and interpretation of specific tests for diagnosis of animal diseases, e.g., enzymology assays, specific tests related to hepatic function and renal function, protein analysis, and endocrine related assays. Non-Traditional Format: Student will participate in seminars on laboratory clinical biochemistry.

VPAT 8130. Diagnostic Oncology. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: VPAT 8100 or permission of department.
The microscopic features of neoplasms of domestic animals. The identification and characterization of the various tumors.

VPAT 8140. Seminar in Veterinary Pathology. 1-2 hours. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
The review and discussion of basic problems and diseases currently or potentially important in the field of veterinary medicine. Non-Traditional Format: Participation via attendance and presentation in research seminars.

VPAT(AVMD) 8220. Avian Histopathology. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Detailed microscopic studies will be made of avian tissues and the effects of specific diseases and their processes on them. A working knowledge of tissue processing and differential staining will be included.

VPAT 8320. Pathology of Laboratory Animals. 3 hours.
Prerequisite: Permission of department.
The etiology, tissue alterations, both macroscopic and microscopic, of diseases of the common laboratory animals. Biological profile of each major species of laboratory animals. Non-Traditional Format: Lectures and laboratories concerning the diseases of laboratory animals.

VPAT 9000. Doctoral Research. 1-10 hours. Repeatable for maximum 40 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPAT 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Physiology and Pharmacology

Thomas F. Murray, *Head*
Frederick N. Thompson, Jr., *Graduate Coordinator, 542-5862*
(Veterinary Medicine Building)

The Department of Physiology and Pharmacology offers MS and PhD degrees in physiology and pharmacology. Programs of study encompass the disciplines of physiology, pharmacology, and toxicology. Opportunities exist to concentrate on molecular biology, basic mechanisms of physiologic and pharmacologic processes, specific organ systems, or clinical problems. Graduates of these programs are employed by universities, regulatory agencies, and a variety of pharmaceutical or biotech companies.

Candidates for the MS or PhD degrees must have a baccalaureate or a Doctor of Veterinary Medicine (DVM) or equivalent degree from an accredited college or university. Requirements for admission include: 1) a grade point average of 3.00 with a BS or MS degree, or ranked in the upper half of the class for DVM or equivalent degree; and 2) completion of the Graduate Record Examination with a minimum score of 1100 on the verbal and quantitative portions.

Certain minimum requirements in addition to those required by the Graduate School must be met. For the PhD degree, any undergraduate deficiencies in biologic sciences, chemistry, mathematics, or physics must be resolved early in a program of study.

The graduate programs include fulfillment of course requirements, research skills, and completion of a thesis or dissertation. Faculty of the department may be consulted about specific requirements.

For a description of the MS and PhD interdisciplinary program in toxicology, see the section in this bulletin entitled, "General Degrees: Interdisciplinary Program."

VPHY 6050. Animal Physiological Chemistry. 2 hours.
Chemistry of cellular constituents and an introduction to the chemical process of living systems. Integrated functional aspects of the metabolic respiratory and transport systems of the animal body from a chemical standpoint.

VPHY 6090. Comparative Mammalian Physiology. 3 hours.
The animal body as a single functioning organism, including neurophysiology, cardiovascular and respiratory physiology.

VPHY 6100. Comparative Mammalian Physiology. 3 hours.
The animal body as a single functioning organism, including endocrinology, reproduction, renal, and alimentary physiology.

(VPHY)PHRM 6910. Introductory Toxicology. 3 hours.
Basic toxicology principles, including dose-response relationships, principles of toxicity and safety evaluation, pharmacokinetics and metabolism of chemicals, basic mechanisms of cellular injury, factors influencing toxicity, carcinogenesis/mutagenesis, governmental regulations, and exposure and risk assessment.

VPHY 6930. Research Methods. 1-3 hours. Repeatable for maximum 3 hours credit. 1-3 lab periods of 3-9 hours each per week.
One to three laboratory rotations in the Department of Physiology and Pharmacology. Non-Traditional Format: Students will meet with faculty members on a regular basis.

VPHY 7000. Master's Research/Physiology. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 7010. Master's Research/Pharmacology. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 7020. Master's Research/Pharmacology and Toxicology Emphasis. 1-10 hours. Repeatable for maximum 30 hours credit.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

VPHY 8000. Cardiovascular Physiology. 2 hours.
Prerequisite: VPHY 6090.
Advanced study of current concepts in cardiovascular physiology.

VPHY 8010. Mammalian Cell Physiology. 3.3 hours.
The physiology of the mammalian cell.

VPHY 8080. Ruminant Physiology. 3 hours.
The physiological, biochemical, and microbiological processes of digestion, absorption, and metabolism of absorbed nutrients.

VPHY 8100. Comparative Medical Endocrinology. 2 hours.
Prerequisite: VPHY 6100.
Advanced study of current concepts in mammalian endocrinology.

VPHY 8120. Renal and Fluid-Electrolyte Physiology: Body Electrolyte and Mineral Homeostasis and Renal Functions. 2 hours.
Prerequisite: VPHY 6100.
Current concepts in fluid-electrolyte physiology and renal function.

VPHY 8200. Animal Molecular Biology: Concepts and Current Literature. 2 hours.
Lectures and discussion on current research topics in molecular biology pertaining to veterinary medicine and livestock production.

VPHY 8400. Neurophysiology. 2 hours.
The nervous system stressing cellular physiology of the nervous system and how changes in cellular physiology impact behavior.

VPHY 8450. Advanced Clinical Pharmacology. 2 hours.
Presentation and discussion of current knowledge of chemotherapeutic agents and their clinical evaluation.

VPHY 8460. Molecular Pharmacology. 3 hours.
Prerequisite: VPHY 5200 or PHRM 6410.
The interaction of drugs with tissue receptors, and the absorption, distribution, metabolism, and elimination of drugs by the organism, and molecular carcinogenesis.

VPHY 8900. Physiology-Pharmacology Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Current research findings and methodology in physiology, pharmacology, or toxicology.

(VPHY)PHRM 8910. Organ Systems Toxicology I. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Mechanisms of injury of biological systems produced by chemical exposure. Adverse effects of chemicals on major bodily organs and organ systems including the blood, respiratory systems, nervous system, kidneys and the cardiovascular system.

(VPHY)PHRM(POUL) 8920. Organ Systems Toxicology II. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Mechanisms of injury of biological systems produced by chemical exposure. Adverse effects of chemicals on major bodily organs and organ systems including the liver, carcinogenesis/mutagenesis, immune system, reproductive system, skin, and eyes.

(VPHY)PHRM(POUL)(EHSC) 8930. Chemical Toxicology. 3 hours.
Prerequisite: PHRM(VPHY) 6910 or permission of department.
Chemical contamination of air, water, and food by major agricultural and industrial chemicals. Emphasis will be placed on sources of contamination, fate of chemicals in the environment, target species, health effects, chemical analyses, and contamination control.

VPHY 9000. Doctoral Research Physiology. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 9010. Doctoral Research in Pharmacology. 1-10 hours. Repeatable for maximum 30 hours credit.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 9020. Doctoral Research Toxicology. 1-10 hours. Repeatable for maximum 30 hours credit.
Research while enrolled for a doctoral degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VPHY 9300. Doctoral Dissertation. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Dissertation writing under the direction of the major professor. Non-Traditional Format: Independent research and preparation of the doctoral dissertation.

Small Animal Medicine

Clarence A. Rawlings, *Head*
Steve Budsberg, *Graduate Coordinator, 542-6385*
(Veterinary Medicine Building)

The Department of Small Animal Medicine does not have a graduate degree program. Clinical in-

ternships and residency programs are offered. Residents are enrolled in graduate degree programs of other departments in the college.

SAMS 6310. Acute Pathophysiology. 1.5-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite or corequisite: DVM degree or permission of department.
The pathophysiology of patients that are critically ill or injured. Emphasis will be placed on applying these principles of pathophysiology to understanding the mechanism and response to therapy of syndromes involving the critical patient. Course format will include lecture, seminar, and literature review.

SAMS 6990. Special Problems. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: DVM degree or equivalent degree.
Problems defined by a faculty member with the student with approval of the department head. These are usually focused studies or projects by veterinarians entered in a clinical residency program.

SAMS 8010. Seminar in Medicine and Surgery. 0.7-2 hours. Repeatable for maximum 2 hours credit.
Prerequisite: (DVM degree or equivalent degree) and permission of department.
Graduate students and staff members will regularly participate in review and discussion of current research findings and methodology concerning medical and surgical disorders of animals.

Veterinary Anatomy and Radiology

Royce E. Roberts, *Head*
Sharon L. Crowell-Davis, *Graduate Coordinator, 542-8343*
(Veterinary Medicine Building)

Veterinary anatomy currently offers the MS degree. The program is available to all qualified students holding professional degrees in the healing arts as well as to graduate students having a strong biological background. Programs of study are available in the general area of microscopic and gross anatomy, embryology, neuroanatomy, electron microscopy, and radiology. All programs are strongly slanted toward a comparative approach and students are not limited to a particular species for research purposes.

Students interested in comparative anatomical study programs should contact this department directly to determine specific requirements.

VARB 4030L/6030L. Veterinary Histology. 3 hours.
Prerequisite: Permission of department.
Veterinary applications of microscopic structure and organization of the tissues of domestic animals.

VARB 6070. Neuroanatomy of Domestic Animals. 1.3 hours.
Prerequisite: Permission of department.
The gross, microscopic, and ultrastructural aspects of neuroanatomy presented from a comparative viewpoint, using the dog as the basic animal. Open to qualified graduate or undergraduate students in the biological sciences.

VARB 7000. Master's Research. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research while enrolled for a master's degree under the direction of faculty members. Non-Traditional Format: Independent research under the direction of a faculty member.

VARB 7110. Practicum in Teaching Gross Anatomy. 4 hours.
Prerequisite: VARB 5120 or VARB 5130 or VARB 5160 or VARB 7120 or VARB 7130 or VARB 7160 or permission of department.
The preparation and presentation of lectures and laboratory instruction on the gross anatomy of the dog and cat. Various methods of presentation of subject matter and student evaluation. Non-Traditional Format: Practicum.

VARB 7120. Laboratory in Anatomy of the Horse. 3.7 hours.
Prerequisite: Permission of department.
Gross anatomy of the horse correlated with palpation of the live animal and radiographic anatomy with comparison to the dog, cat, and food animals. Emphasis is on the anatomy necessary to understand surgical procedures and clinical diagnosis. Non-Traditional Format: Designated meeting times vary from week to week based on agreed upon times by the instructor and the student.

VARB 7130. Laboratory in Anatomy of Food Animals. 3.7 hours.
Prerequisite: Permission of department.
Gross anatomy of food animals, mainly by dissection, correlated with palpation of the live animal and radiographic anatomy with comparison made to the dog, cat, and horse. Emphasis is on the anatomy necessary to understand surgical procedures and clinical diagnosis. Non-Traditional Format: Varied meeting times agreed upon by the instructor and the student.

VARB 7140. Veterinary Animal Behavior. 1.3 hours.
Prerequisite: Permission of department.
Diagnosis of treatment of common animal behavior problems.

VARB 7150. Principles of Veterinary Anatomy. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Anatomic principles of each system of domestic animals.

VARB 7160. Laboratory in Anatomy of the Dog and Cat. 3.7 hours.
Prerequisite: VARB 5150 or VARB 7150.
Gross anatomy of the dog and cat correlated with palpation of the live animal and radiographic anatomy with comparison to the horse and food animals. Emphasis is on the anatomy necessary to understand surgical procedures and clinical diagnosis. Non-Traditional Format: Meets at varying times and dates agreed upon by the student and professor.

VARB 7300. Master's Thesis. 1-10 hours. Repeatable for maximum 30 hours credit.
Prerequisite: Permission of department.
Thesis writing under the direction of the major professor. Non-Traditional Format: Independent research and thesis preparation.

VARB 7340. Clinical Problems of Animal Behavior. 1-5 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
The diagnosis and treatment of animals with behavior problems. Review of literature on current cases. Non-Traditional Format: Variety of labs held dependent upon need, research, at various times each week.

VARB 8010. Problems in Veterinary Anatomy. 1-5 hours. Repeatable for maximum 10 hours credit.
Designed to allow graduate students the opportunity to explore, under supervision, anatomical problems of their choice. These may be in areas of gross or microscopic anatomy. Open to graduate students in the biological sciences meeting the course prerequisites. Non-Traditional Format: Varies according to need.

VARB 8030. Advanced Veterinary Histology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (VARB 5170 and VARB 5180-5180L) or permission of department.
Histological variations in the structure of organ systems of domestic animals. Functional aspects based on comparative morphology will be stressed. Open to all qualified graduate students in any area of the biological sciences.

VARB 8050. Special Radiographic Procedures. 3 hours.
Prerequisite: VARB 5310.
The methods and interpretation of special radiographic procedures. These findings are correlated with survey radiography.

VARB 8100. Fine Structure of Animal Tissues. 4 hours.
Prerequisite: CBIO 4000/6000-4000L/6000L and permission of department.
The electron microscope and related techniques to the understanding of tissue fine structure. Emphasis will be placed on giving the student a basis for interpretation of electron micrographs in a variety of animal tissues. Cellular and intracellular morphologic specializations will be related to the function of the tissue or organ.

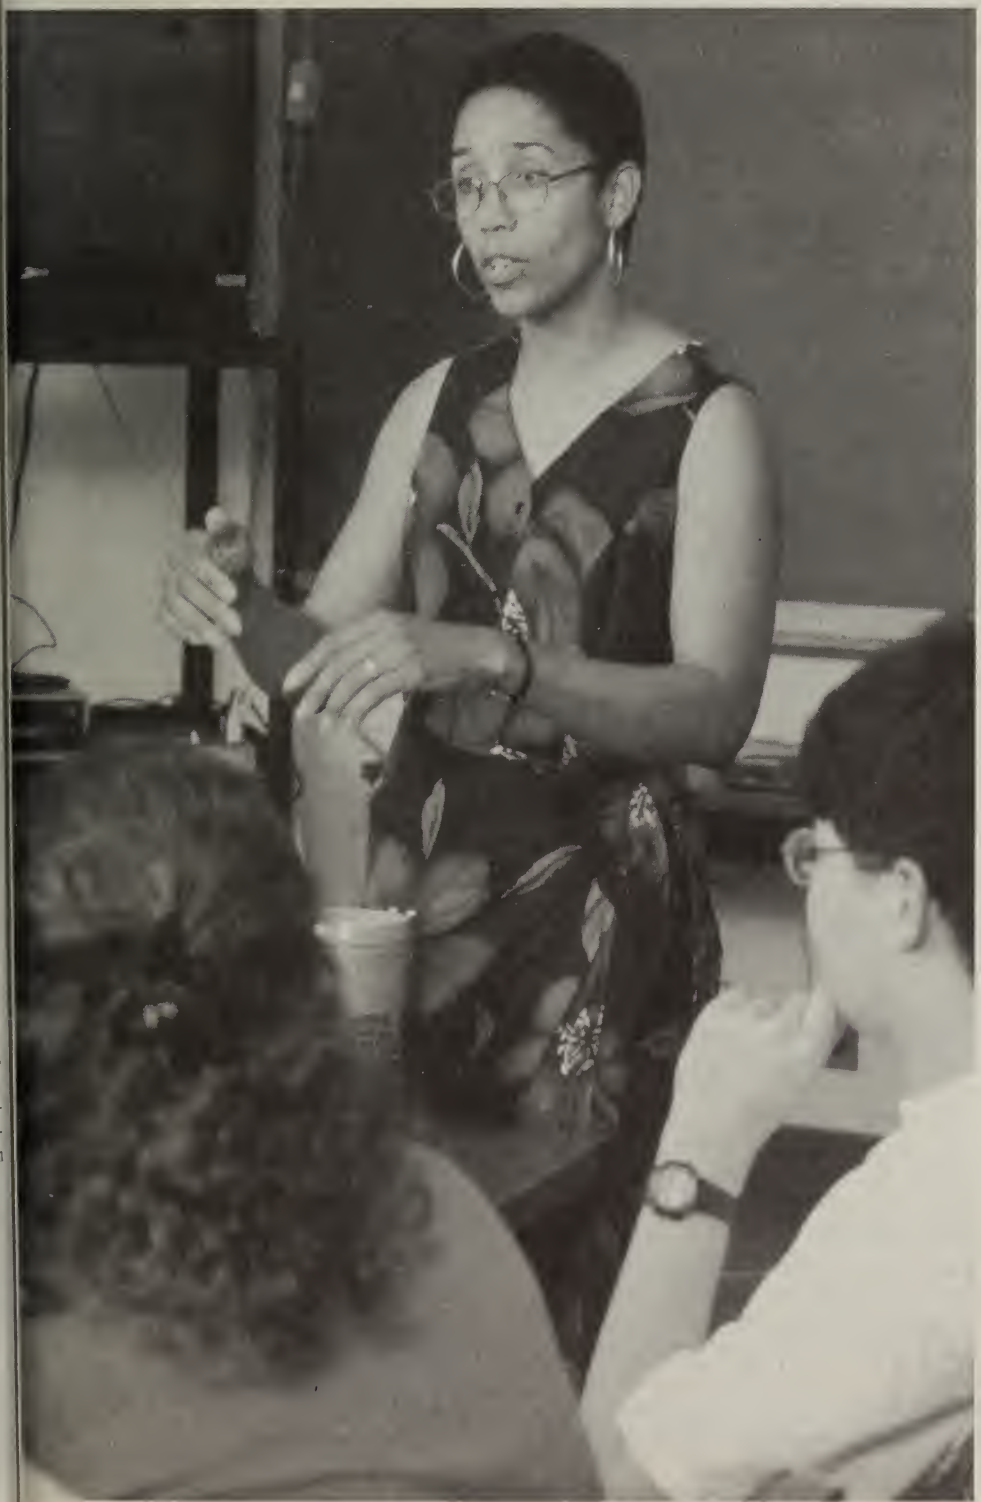
VARB 8340. Seminar in Applied and Domestic Animal Behavior. 1-5 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
The evaluation of research, development of theory, and practical applications of research on animal behavior, or a recent book on the subject will be evaluated. Non-Traditional Format: Students will meet with faculty members on a regular basis.

VARB 9340. Practicum in Clinical Animal Behavior. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: VARB 7340 and permission of department.
Diagnosis and treatment of animals with behavior problems. Includes pharmacologic, surgical, and behavior modification treatment techniques. Non-Traditional Format: Faculty and students meet at various times, both daily and weekly.

Veterinary Medicine

VETM 7100. Veterinary Ethics and Jurisprudence. 0.7 hours. Repeatable for maximum 1.4 hours credit.
Veterinary medical ethics and the basic laws and regulations governing veterinary medicine. Non-Traditional Format: Taught in a sequential curriculum format; time varies each week.

Graduate Faculty



Graduate Faculty

Ex-Officio Members

Adams, Michael F., *President of the University and Professor of Speech Communication*
Ph.D., Ohio State

Holbrook, Karen A., *Provost and Senior Vice President for Academic Affairs and Professor of Cellular Biology*
Ph.D., Washington

Key, Joe L., *Vice President for Research and Research Professor of Botany*
Ph.D., Illinois (Urbana-Champaign)

Younts, S. Eugene, *Vice President for Services and Professor of Crop and Soil Sciences*
Ph.D., Cornell

Potter, William Gray, *Director of the Libraries*
Ph.D., Illinois (Urbana-Champaign)

Anderson, Wyatt W., *Dean of the College of Arts & Sciences and Alumni Foundation Distinguished Professor of Genetics*
Ph.D., Rockefeller

Benson, P. George, *Dean of the Terry College of Business and Professor of Management*
Ph.D., Florida

Buchanan, Gale A., *Dean and Director of the College of Agricultural and Environmental Sciences and Professor of Crop and Soil Sciences*
Ph.D., Iowa

Crowley, John F. III, *Dean of the School of Environmental Design and Constance Knowles Draper Professor of Environmental Design*
Ph.D., Oklahoma (Norman)

Feldman, Stuart, *Dean of the College of Pharmacy and Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., State University of New York (Buffalo)

Mace, Arnett C., Jr., *Dean of the School of Forest Resources, Professor of Forest Resources and Associate Director of Forestry Research College*
Ph.D., Arizona

Nickols, Sharon Y., *Dean of the College of Family and Consumer Sciences and Professor of Housing and Consumer Economics*
Ph.D., Missouri (Columbia)

Patel, Gordhan L., *Dean of the Graduate School and Professor of Cellular Biology and Biochemistry and Molecular Biology*
Ph.D., Washington University (St. Louis)

Prasse, Keith William, *Dean of the College of Veterinary Medicine and Professor of Pathology*
Ph.D., Iowa State

Russell, John Thomas, *Dean of the College of Journalism and Mass Communication and Professor of Advertising/Public Relations*
Ph.D., Illinois (Urbana-Champaign)

Shipley, David E., *Dean of the School of Law and Professor of Law*
J.D., Chicago

Yeany, Russell H. Jr., *Dean of the College of Education and Professor of Science Education*
Ph.D., Colorado (Boulder)

Yegidis, Bonnie L., *Dean of the School of Social Work and Professor of Social Work*
Ph.D., South Florida

Appointed Members

Adams, Malcolm R., *Professor of Mathematics*
Ph.D., Massachusetts Institute of Technology

Adams, Michael W., *Research Professor of Biochemistry and Molecular Biology and Adjunct Professor of Microbiology*
Ph.D., London

Adams, Nigel Graham, *Research Professor of Chemistry*
D.Sc., Birmingham

Adang, Michael J., *Professor of Entomology*
Ph.D., Washington State

Adriano, Domy C., *Professor of Crop and Soil Sciences and Senior Research Scientist at the Savannah River Ecology Lab*
Ph.D., Kansas State

Affolter, James Martin, *Assistant Professor of Horticulture*
Ph.D., Michigan (Ann Arbor)

Ainsworth, Scott H., *Associate Professor of Political Science*
Ph.D., Washington University

Akin, Danny Earl, *Adjunct Professor of Crop and Soil Sciences and Textiles, Merchandising and Interiors*
Ph.D., Georgia

Akoh, Casimir C., *Associate Professor of Food Science and Technology and Adjunct Associate Professor of Foods and Nutrition*
Ph.D., Washington State

Albersheim, Peter, *Research Professor of Biochemistry and Molecular Biology, Botany, Chemistry, and Plant Pathology and Co-Director for the Center of Complex Carbohydrate Research*
Ph.D., California Institute of Technology

Alexander, Alison F., *Professor and Department Head of Telecommunications*
Ph.D., Ohio State

Alexeev, Valery, *Associate Professor of Mathematics*
Ph.D., Moscow M.V. Lomonosov State University

All, John Norman, *Professor of Entomology*
Ph.D., Wisconsin (Madison)

Allen, Christopher S., *Associate Professor of Political Science*
Ph.D., Brandeis

Allen, Joseph Dana, III, *Professor and Department Head of Psychology*
Ph.D., Southern Illinois (Carbondale)

Allen, Joyce E., *Professor and Department Head of Language Education*
Ed.D., Kansas

Allexsaht-Snider, Martha, *Associate Professor of Elementary Education*
Ph.D., California (Santa Barbara)

Allison, James Madison, *Professor of Biological and Agricultural Engineering and Associate Director of the College of Agricultural and Environmental Sciences Academic Programs*
Ph.D., Cornell

Alvarez, Jose B. IV, *Assistant Professor of Romance Languages*
Ph.D., Arizona State

Alvarez, Leonardo, *Associate Professor of Environmental Design*
M.L.A., Harvard

Alvermann, Donna E., *Research Professor of Reading Education*
Ph.D., Syracuse

Amason, Allen C., *Assistant Professor of Management*
Ph.D., South Carolina (Columbia)

Ames, Glenn Clifford Webster, *Professor of Agricultural and Applied Economics*
Ph.D., Tennessee (Knoxville)

Amos, Henry E., *Professor of Animal and Dairy Science*
Ph.D., Kentucky

Amster, I. Jonathan, *Associate Professor of Chemistry*
Ph.D., Cornell

Anderson, Douglas A., *Professor of English*
Ph.D., Virginia

Anderson, James C., Jr., *General Sandy Beaver Teaching Professor of Classics*
Ph.D., North Carolina (Chapel Hill)

Anderson, James L., *Professor of Chemistry*
Ph.D., Wisconsin (Madison)

Anderson, Robert Leonard, *Professor of Physics and Associate Dean of the College of Arts & Sciences*
Ph.D., Wayne State

Anderson, Wyatt W., *Alumni Foundation Distinguished Professor of Genetics and Dean of the College of Arts & Sciences*
Ph.D., Rockefeller

Andress, Elizabeth L., *Associate Professor of Foods and Nutrition*
Ph.D., Pennsylvania State

Annis, Patricia A., *Associate Professor of Textiles, Merchandising & Interiors*
Ph.D., Kansas State

Arabnia, Hamid R., *Associate Professor of Computer Science*
Ph.D., Kent (Canterbury)

Arias, Ileana, *Professor of Psychology*
Ph.D., State University of New York (Stony Brook)

Armitage, Allan Munro, *Professor of Horticulture*
Ph.D., Michigan State

Arnold, Jonathan, *Associate Professor of Genetics and Adjunct Associate Professor of Statistics*
Ph.D., Yale

Arnold, Michael L., *Associate Professor of Genetics and Adjunct Associate Professor of Botany*
Ph.D., Australian National

Aron, Dennis N., *Professor of Small Animal Medicine*
D.V.M., Ohio State

Aronson, Jay E., *Associate Professor of Management*
Ph.D., Carnegie-Mellon

Asmussen, Marjorie Ann, *Professor of Genetics and Mathematics*
Ph.D., Stanford

Assaf, Francis Beshara, *Professor of Romance Languages*
Ph.D., California (Berkeley)

Atkinson, Scott E., *Professor of Economics*
Ph.D., Colorado (Boulder)

Atwater, Mary M., *Professor of Science Education and Adjunct Professor of Social Science Education*
Ph.D., North Carolina (Chapel Hill)

Avise, John Charles, *Research Professor of Genetics*
Ph.D., California (Davis)

Azain, Michael J., *Associate Professor of Animal and Dairy Science and Adjunct Associate Professor of Foods and Nutrition*
Ph.D., Oklahoma

Azoff, Edward Arthur, *Professor of Mathematics*
Ph.D., Michigan (Ann Arbor)

Babcock, Lucia M., *Associate Professor of Chemistry*
Ph.D., City University of New York (Brooklyn)

Bachtel, Douglas Charles, *Professor of Housing and Consumer Economics*
Ph.D., Ohio State

Bacon, Charles W., *Adjunct Assistant Professor of Plant Pathology*
Ph.D., Michigan (Ann Arbor)

Baile, Clifton A., *Adjunct Professor of Animal Science and Foods and Nutrition and Adjunct Professor of Physiology and Pharmacology*
Ph.D., Missouri (Columbia)

Bailey, Joseph Stanley, *Adjunct Senior Research Scientist in Poultry Science*
Ph.D., Georgia

Bailey, Robert L., *Professor of Forest Resources*
Ph.D., Georgia

Baker, Francis Todd, *Professor and Department Head of Physics and Astronomy*
Ph.D., Michigan (Ann Arbor)

Baker, Jean A, *Assistant Professor of Educational Psychology*
Ph.D., Wisconsin (Madison)

Baker, Jerome F., *Associate Professor of Animal and Dairy Science*
Ph.D., Texas A&M

Balkwell, James William, *Professor of Sociology*
Ph.D., Michigan State

Bamber, E. Michael, *Professor of Accounting*
Ph.D., Ohio State

Bamber, Linda S., *Professor of Accounting*
Ph.D., Ohio State

Bamezai, Anil Kumar, *Assistant Professor of Cellular Biology*
Ph.D., All-India Institute of Medical Sciences

Barb, C. Richard, *Adjunct Assistant Professor of Animal and Dairy Science*
Ph.D., Georgia

Barefield, Russell M., *Professor of Accounting and Director of the School of Accounting*
Ph.D., Ohio State

Barnhart, Harold M., Jr., *Professor of Food Science & Technology*
Ph.D., Nebraska (Lincoln)

Barrett, Gary W., *Odum Chair of Ecology*
Ph.D., Georgia

Barsanti, Jeanne A., *Professor of Small Animal Medicine and Physiology and Pharmacology*
D.V.M., Cornell

Bartlett, Michael G., *Assistant Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Georgia Institute of Technology

Barton, Michelle H., *Associate Professor of Large Animal Medicine and Physiology and Pharmacology*
Ph.D., Georgia

Basawa, Ishwarasa V., *Professor of Statistics*
Ph.D., Sheffield

Baughman, George L., *Senior Research Scientist of Textiles, Merchandising & Interiors*
B.S., Florida State

Baumann, James F., *Professor of Reading Education*
Ph.D., Wisconsin (Madison)

Baumgartner, Ted A., *Professor of Exercise Science*
Ph.D., Iowa

Beach, Joseph Warren, *Assistant Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Florida

Beach, Steven R., *Professor of Psychology*
Ph.D., State University of New York (Stony Brook)

Beck, Elwood M., Jr., *Professor and Department Head of Sociology*
Ph.D., Tennessee (Knoxville)

Beck, Michael Bruce, *Eminent Scholar in Forest Resources and Adjunct Professor of Biological and Agricultural Engineering*
Ph.D., Cambridge

Becker, Lee B., *Professor of Journalism and Director of the Cox Communication Center*
Ph.D., Wisconsin (Madison)

Beckmann-Kazez, Sybilla, *Associate Professor of Mathematics*
Ph.D., Pennsylvania

Bedell, Mary A., *Assistant Professor of Genetics*
Ph.D., Chicago

Bell-Scott, Patricia, *Professor of Child & Family Development and Adjunct Professor of Psychology*
Ph.D., Tennessee (Knoxville)

Bender, Michael Thomas, *Assistant Professor of Genetics*
Ph.D., Indiana (Bloomington)

Bender, William Neil, *Associate Professor of Special Education*
Ph.D., North Carolina (Chapel Hill)

Benedek, Dezso, *Associate Professor of Comparative Literature*
Ph.D., Pennsylvania State (Allentown)

Benjamin, Louise M., *Assistant Professor of Telecommunications*
Ph.D., Iowa

Bennett-Alexander, Dawn D., *Associate Professor of Legal Studies*
J.D., Howard

Benson, David John, *Professor of Mathematics*
Ph.D., Cambridge

Benson, Jeri, *Professor of Educational Psychology*
Ph.D., Florida

Benyshek, Larry Lee, *Professor and Department Head of Animal and Dairy Science*
Ph.D., Virginia Polytechnic Institute

Berdanier, Carolyn Dawson, *Professor of Foods and Nutrition*
Ph.D., Rutgers (New Brunswick)

Bergstrom, John Clark, *Professor of Agricultural and Applied Economics*
Ph.D., Texas A&M

Berisford, Charles Wayne, *Research Professor of Entomology and Adjunct Professor of Forest Resources*
Ph.D., Virginia Polytechnic Institute

Berlin, Elois Ann, *Associate Professor of Anthropology*
Ph.D., California (Berkeley)

Berlin, Overton Brent, *Graham Perdue Professor of Anthropology*
Ph.D., Stanford

Bernstein, Irwin S., *Research Professor of Psychology*
Ph.D., Chicago

Bertrand, Joseph Keith, *Professor of Animal and Dairy Science*
Ph.D., Iowa State

Bertsch, Gary K., *University Professor of Political Science*
Ph.D., Oregon

Bertsch, Paul M., *Professor of Crop and Soil Sciences and Senior Research Scientist at the Savannah River Ecology Laboratory*
Ph.D., Kentucky

Beuchat, Larry Ray, *Research Professor of Food* Science and Technology
Ph.D., Michigan State

Bhandarkar, Suchendra M., *Associate Professor of Computer Science*
Ph.D., Syracuse

Billard, Lynne, *University Professor of Statistics*
Ph.D., New South Wales

Binder, Brian J., *Assistant Professor of Marine Programs*
Ph.D., Woods Hole Oceanographic Institute

Black, Clanton C., Jr., *Research Professor of Biochemistry and Molecular Biology*
Ph.D., Florida

Black, Joel Dana, *Associate Professor of Comparative Literature*
Ph.D., Stanford

Black, Marsha C., *Assistant Professor of Food Science and Technology*
Ph.D., Tennessee (Knoxville)

Blackstone, John H., Jr., *Professor of Management*
Ph.D., Texas A&M

Blase, Joseph J., *Professor of Educational Leadership*
Ph.D., Syracuse

Blase, Reba Jo R., *Professor of Educational Leadership*
Ph.D., Colorado (Boulder)

Blazer, Vicki Suzette, *Adjunct Associate Professor of Forest Resources*
Ph.D., Rhode Island

Bleisch, Pamela R., *Assistant Professor of Classics*
Ph.D., California (Los Angeles)

Blount, Ben G., *Professor of Linguistics*
Ph.D., California (Berkeley)

Blount, Ronald Lynn, *Associate Professor of Psychology*
Ph.D., West Virginia

Boe, Brian D., *Associate Professor of Mathematics*
Ph.D., Yale

Boehmer, Robert G., *Associate Professor of Legal Studies*
Ph.D., Oregon

Boerma, Henry Roger, *Research Professor of Crop and Soil Sciences*
Ph.D., Illinois (Urbana-Champaign)

Bogue, Ronald Lynn, *Professor of Comparative Literature*
Ph.D., Oregon

Bongarten, Bruce Charles, *Professor of Forest Resources and Associate Dean of the School of Forest Resources*
Ph.D., Michigan State

Borders, Bruce Edward, *Associate Professor of Forest Resources*
Ph.D., Georgia

Boring, Lindsay R., *Adjunct Associate Professor of Forest Resources*
Ph.D., Georgia

Born, Renate, *Associate Professor of Germanic and Slavic Languages*
Ph.D., Cornell

Bosch, David D., *Adjunct Research Scientist of Biological and Agricultural Engineering*
Ph.D., Arizona

Bostrom, Robert Paul, *L. Edmund Rast Professor of Business*
Ph.D., Minnesota (Twin Cities)

Boudinot, Frank Douglas, *Associate Professor and Department Head of Pharmaceutical and Biomedical Sciences*
Ph.D., State University of New York (Buffalo)

Bouldin, Richard Hindman, *Professor of Mathematics*
Ph.D., Virginia

Bounous, Denise I., *Associate Professor of Pathology and Medical Microbiology*
Ph.D., Louisiana State (Baton Rouge)

Bouton, Joseph Henry, *Professor of Crop and Soil Sciences*
Ph.D., Florida

Bowen, Joel Philip, *Professor of Chemistry*
Ph.D., Emory

Box, Elgene Owen, *Professor of Geography*
Ph.D., North Carolina (Chapel Hill)

Brackett, Benjamin G., *Professor of Physiology and Pharmacology*
Ph.D., Georgia

Brackett, Robert Ennis, *Professor of Food Science and Technology*
Ph.D., Wisconsin (Madison)

Braman, Susan K., *Associate Professor of Entomology*
Ph.D., Kentucky

Branch, Robert C.M., *Associate Professor of Instructional Technology*
Ph.D., Virginia Polytechnical Institute

Brennenman, Timothy B., *Associate Professor of Plant Pathology*
Ph.D., Virginia Polytechnic Institute

Brewer, John Michael, *Professor of Biochemistry and Molecular Biology*
Ph.D., Johns Hopkins

Brewis, Alexandra A., *Assistant Professor of Anthropology*
Ph.D., Arizona

Bridges, David C., *Professor of Crop and Soil Sciences*
Ph.D., Texas A&M

Brisbin, I. Lehr, Jr., *Senior Research Scientist of Ecology and Cellular Biology and Adjunct*

Associate Professor of Poultry Science and Pharmaceutical and Biomedical Sciences
Ph.D., Georgia

Britton, Bruce K., *Professor of Psychology*
Ph.D., Iowa

Britton, Walter Martin, *Professor of Poultry Science*
Ph.D., North Carolina State

Broder, Josef M., *D. W. Brooks Distinguished Professor of Agricultural and Applied Economics and Assistant Dean of the College of Agricultural and Environmental Sciences*
Ph.D., Michigan State

Broderson, J. Roger, *Professor of Pathology and Director of Animal Care Use, Vice President for Research*
Ph.D., Georgia

Brody, Gene Howard, *Research Professor of Child and Family Development and Adjunct Professor of Psychology*
Ph.D., Arizona

Bronk, Deborah A., *Assistant Professor Marine Programs*
Ph.D., Maryland (College Park)

Brook, Diane Lorraine, *Associate Professor of Social Science Education*
Ed.D., Georgia

Brook, George A., *Professor and Department Head of Geography*
Ph.D., McMaster

Brooks, Dwight E., *Assistant Professor of Telecommunications*
Ph.D., Iowa

Brosius, J. Peter, *Assistant Professor of Anthropology*
Ph.D., Michigan (Ann Arbor)

Brown, Corrie, *Professor and Department Head of Pathology*
Ph.D., California (Davis)

Brown, James M., *Associate Professor of Psychology*
Ph.D., State University of New York (Buffalo)

Brown, Mark R., *Assistant Professor of Entomology*
Ph.D., Georgia

Brown, Scott A., *Associate Professor of Physiology and Pharmacology and Small Animal Medicine*
Ph.D., Georgia

Brown, Thomas P., *Associate Professor of Avian Medicine*
Ph.D., Georgia

Bruckner, James V., *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Michigan (Ann Arbor)

Brudney, Jeffrey L., *Professor of Political Science*
Ph.D., Michigan (Ann Arbor)

Buchholtz, Ann K., *Assistant Professor of Management*
Ph.D., New York

Bullock, Charles Spencer, III, *Richard Brevard Russell Professor of Political Science*
Ph.D., Washington University

Bunce, Opal Rebecca Wheeler, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Georgia

Buntin, George David, *Professor of Entomology*
Ph.D., Iowa State

Burke, William Harold, *Professor of Poultry Science*
Ph.D., California (Davis)

Burpee, Leon Louis, *Professor of Plant Pathology*
Ph.D., Pennsylvania State

Burtle, Gary J., *Associate Professor of Animal and Dairy Science*
Ph.D., Auburn

Burton, Robert Glenn, *Associate Professor of Philosophy*
Ph.D., Northwestern

Cabrera, Miguel L., *Associate Professor of Crop and Soil Sciences*
Ph.D., Kansas State

Cai, Wei Jun, *Assistant Professor of Marine Programs*
Ph.D., Scripps College

Caillault, Jean-Pierre, *Professor of Physics and Astronomy*
Ph.D., Columbia (New York)

Calhoun, Karen S., *Professor of Psychology*
Ph.D., Louisiana State (Baton Rouge)

Campbell, Linda Frye, *Associate Professor of Counseling and Human Development*
Ph.D., Georgia State

Canfield, Earl Rodney, Jr., *Professor and Department Head of Computer Science*
Ph.D., California (San Diego)

Canolty, Nancy L., *Associate Professor of Foods and Nutrition*
Ph.D., California (Berkeley)

Capie, William R., Jr., *Professor of Science Education*
Ed.D., Houston

Capomacchia, Anthony Cesare, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Florida

Carlson, Jon Frederick, *Research Professor of Mathematics*
Ph.D., Virginia

Carlson, Russell W., *Professor of Biochemistry and Molecular Biology*
Ph.D., Colorado (Boulder)

Carr, Martha, *Associate Professor of Educational Psychology*
Ph.D. Notre Dame

Carreira, Lionel Andrade, *Professor of Chemistry*
Ph.D., Massachusetts Institute of Technology

Carroll, Archie Benjamin, *Robert W. Scherer Professor of Public Affairs and Corporate Communication and Department Head of Management*
D.B.A., Florida State

Carroll, Carl Ronald, *Professor of Ecology, Director of the Institute of Ecology, and Adjunct Professor of Entomology*
Ph.D., Chicago

Carroll, John P., *Assistant Professor of Forest Resources*
Ph.D., North Dakota

Carrow, Robert N., *Professor of Crop and Soil Sciences*
Ph.D., Michigan State

Casado, Stacey Dolgin, *Associate Professor of Romance Languages*
Ph.D., North Carolina (Chapel Hill)

Caulfield, Jon Paul, *Professor of Forest Resources*
Ph.D., North Carolina State

Centner, Terence J., *Professor of Agricultural and Applied Economics*
L.L.M., Arkansas

Cerbu, Thomas J.M., *Assistant Professor of Comparative Literature*
Ph.D., Harvard

Cervero, Ronald Michael, *Professor of Adult Education*
Ph.D., Chicago

Chang, Chung-Jan, *Professor of Plant Pathology*
Ph.D., Rutgers (New Brunswick)

Chapman, Brian Richard, *Associate Professor of Forest Resources*
Ph.D., Texas Tech

Chastkofsky, Leonard, *Associate Professor of Mathematics*
Ph.D., Yale

Checkoway, Julie A., *Assistant Professor of English*
M.A., Johns Hopkins

Chen, Changsheng, *Assistant Professor of Marine Programs*
Ph.D., Woods Hole Oceanographic Institute

Chen, Chia-Ming, *Senior Research Scientist and Adjunct Associate Professor of Forest Resources*
Ph.D., Tokyo

Chen, Hubert Jan-Peing, *Professor of Statistics*
Ph.D., Rochester

Chepyator-Thomson, Jepkorir Rose, *Assistant Professor of Physical Education and Sport Studies*
Ph.D., Wisconsin (Madison)

Chesser, Ronald Keith, *Professor of Genetics and Senior Research Scientist at the Savannah River Ecology Laboratory*
Ph.D., Oklahoma State

Chinnan, Manjeet Singh, *Professor of Food Science and Technology and Biological and Agricultural Engineering*
Ph.D., North Carolina State

Chou, Tsu-Teh, *Professor of Physics*
Ph.D., Iowa

Chu, Chung K., *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., State University of New York (Buffalo)

Clancey, Kevin Francis, *Professor and Department Head of Mathematics*
Ph.D., Purdue

Clark, Douglas Napier, *Professor of Mathematics*
Ph.D., Johns Hopkins

Clark, John Andrew, *Assistant Professor of Political Science*
Ph.D., Ohio State

Clark, Rex Lee, *Professor of Biological and Agricultural Engineering*
Ph.D., Mississippi State

Clarke, Randolph K., *Assistant Professor of Philosophy*
Ph.D., Princeton

Clees, Thomas J., *Associate Professor of Special Education*
Ph.D., Wisconsin (Madison)

Clifton, Ivery D., *Professor of Agricultural and Applied Economics and Associate Dean of the College of Agricultural and Environmental Sciences*
Ph.D., Illinois (Urbana-Champaign)

Cobb, James C., *Phinizy Spalding Professor of Southern History*
Ph.D., Georgia

Cocco, Maria, *Associate Professor of Romance Languages*
Ph.D., California (Riverside)

Cofer, Judith O., *Professor of English*
M.A., Florida Atlantic

Coffield, Julie Ann, *Assistant Professor of Physiology and Pharmacology*
Ph.D., Wisconsin (Madison)

Cohen, Robert P., *Associate Professor of Social Science Education and Adjunct Associate Professor of History*
Ph.D., California (Berkeley)

Colangelo, Carmon, *Professor and Director of the School of Art*
M.F.A., Louisiana State (Baton Rouge)

Cole, Joshua Hamilton, *Assistant Professor of History*
Ph.D., California (Berkeley)

Coleman, David Cowan, *Research Professor of Ecology and Adjunct Professor of Entomology*
Ph.D., Oregon

Coleman, Thomas M., *Associate Professor of Child & Family Development*
Ph.D., Georgia

Colley, Daniel G., *Adjunct Professor of Cellular Biology*
Ph.D., Tulane

Collins, Frank H., *Adjunct Research Scientist in Entomology*
Ph.D., California (Davis)

Commeyras, Michelle, *Associate Professor of Reading Education*
Ph.D., Illinois (Urbana-Champaign)

Compton, Mark M., *Associate Professor of Poultry Science*
Ph.D., Virginia Polytechnic Institute

Condit, Celeste Michelle, *Professor of Speech Communication*
Ph.D., Iowa

Congdon, Justin Daniel, *Senior Research Scientist of Ecology*
Ph.D., Arizona State

Conroy, Michael J., *Adjunct Associate Professor of Forest Resources*
Ph.D., Virginia Polytechnic Institute

Cooney, Mark, *Assistant Professor of Sociology*
Ph.D., Virginia

Cooney, Thomas J., *Professor of Mathematics Education*
Ph.D., Illinois (Urbana-Champaign)

Cooper, Diane L., *Assistant Professor of Counseling and Human Development*
Ph.D., Iowa

Cooper, James Weaver, Jr., *Professor of Clinical and Administrative Sciences*
Ph.D., Georgia

Cooper, Robert J., *Assistant Professor of Forest Resources*
Ph.D., West Virginia

Copley, Paul A., *Associate Professor of Accounting*
Ph.D., Alabama

Cordell, H. Ken, *Adjunct Associate Professor of Recreation & Leisure Studies and Forest Resources and Adjunct Research Scientist in Agricultural and Applied Economics*
Ph.D., North Carolina State

Cordes, Anne Katherine, *Assistant Professor of Communication Sciences and Disorders*
Ph.D., California (Santa Barbara)

Cornwell, Christopher M., *Associate Professor of Economics*
Ph.D., Michigan State

Courtenay, Bradley C., *Professor and Department Head of Adult Education*
Ed.D., Georgia

Coverdill, James E., *Assistant Professor of Sociology*
Ph.D., Northwestern

Covert, Sarah F., *Assistant Professor of Forest Resources and Adjunct Assistant Professor of Genetics, Plant Pathology, and Botany*
Ph.D., Wisconsin (Madison)

Covington, Michael Aaron, *Adjunct Associate Professor of Computer Science and Associate Director of University Networking and Computing Services, Special System Support*
Ph.D., Yale

Cox, James F., III, *Robert O. Arnold Professor of Business*
Ph.D., Clemson

Cox, Nelson A., *Adjunct Associate Professor of Poultry Science*
Ph.D., Louisiana State (Baton Rouge)

Craige, Betty Jean, *University Professor and Acting Department Head of Comparative Literature, and Director of the Humanities and Art Center*
Ph.D., Washington

Cramond, Bonnie L., *Associate Professor of Educational Psychology*
Ph.D., Georgia

Crask, Melvin Ray, *Associate Professor of Marketing and Distribution*
D.B.A., Indiana (Bloomington)

Crepaz, Markus M. L., *Assistant Professor of Political Science*
Ph.D., California (San Diego)

Cress, Marie Elaine, *Associate Professor Exercise Science*
Ph.D., Wisconsin (Madison)

Crim, Joe William, *Professor of Cellular Biology and Adjunct Professor of Entomology*
Ph.D., California (Berkeley)

Cross, Charles B., *Associate Professor of Philosophy*
Ph.D., Pittsburgh

Crowe, Douglas E., *Associate Professor of Geology*
Ph.D., Wisconsin (Madison)

Crowell-Davis, Sharon Lynn, *Professor of Anatomy and Radiology and Adjunct Professor of Psychology*
Ph.D., Cornell

Culbreath, Albert K., *Associate Professor of Plant Pathology*
Ph.D., North Carolina State

Cunfer, Barry Maurice, *Professor of Plant Pathology*
Ph.D., Washington State

Cureton, Kirk J., *Professor and Department Head of Exercise Science*
Ph.D., Illinois (Urbana-Champaign)

Curtis, Robert I., *Professor of Classics*
Ph.D., Maryland (College Park)

Dagley, John Carl, *Associate Professor of Counseling and Human Development*
Ph.D., Missouri (Columbia)

Dailey, Harry Alva, Jr., *Professor of Microbiology*
Ph.D., California (Los Angeles)

Dallas, Cham Edwards, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Texas

Dallmeyer, Ray David, *Professor of Geology*
Ph.D., State University of New York (Stony Brook)

Damian, Raymond T., *Franklin Professor and Department Head of Cellular Biology*
Ph.D., Florida State

Darley, Walter Marshall, *General Sandy Beaver Teaching Associate Professor of Botany*
Ph.D., California (San Diego)

Darvill, Alan, *Professor of Biochemistry and Molecular Biology, Botany and Co-Director for the Center of Complex Carbohydrate Research*
Ph.D., University College (North Wales)

Datta, Gauri Sankar, *Associate Professor of Statistics*
Ph.D., Florida

Datta, Somnath, *Associate Professor of Statistics*
Ph.D., Michigan State

Dattilo, John P., *Professor of Recreation and Leisure Studies*
Ph.D., Illinois (Urbana-Champaign)

Dauenhauer, Bernard Peter, *University Professor of Philosophy*
Ph.D., Tulane

Davidson, William Randolph, *Professor of Forest Resources*
Ph.D., Georgia

Davion, Victoria M., *Associate Professor of Philosophy*
Ph.D., Wisconsin (Madison)

Davis, Kenneth Roscoe, *Professor of Management*
Ph.D., North Texas

Davis, L. Harlan, *Professor of Agricultural and Applied Economics, Director of International Development, Associate Vice President for*

Public Service and Outreach, and Adjunct Professor of Geography
Ph.D., Wisconsin (Madison)

Davis, William D., *Professor of Music*
D.M.A., Rochester

Dawe, Donald Louis, *Professor of Medical Microbiology*
Ph.D., Illinois (Urbana-Champaign)

Dawe, R. Kelly, *Assistant Professor of Botany and Genetics*
Ph.D., California (Berkeley)

Day, Ellen, *Associate Professor of Marketing and Distribution*
Ph.D., Indiana (Bloomington)

Dayton, John Phillip, *Associate Professor of Educational Leadership and Adjunct Associate Professor of Social Science Education*
Ed.D., Indiana State

Dean, Jeffrey F.D., *Assistant Professor of Forest Resources and Adjunct Assistant Professor of Biochemistry and Molecular Biology*
Ph.D., Purdue

Dean, Roger Glen, *Associate Professor of Animal and Dairy Science and Adjunct Associate Professor of Foods and Nutrition*
Ph.D., Michigan State

Debarr, Gary Lee, *Adjunct Research Scientist in Entomology*
Ph.D., Georgia

De Chicchis, Albert R., *Associate Professor of Communication Sciences and Disorders*
Ph.D., Memphis State

De Haseth, James A., *Professor of Chemistry*
Ph.D., North Carolina (Chapel Hill)

DeGroff, Linda-Jo Caple, *Associate Professor of Language Education*
Ph.D., Syracuse

DeJoy, David M., *Professor of Health Promotion and Behavior*
Ph.D., Pennsylvania State

Del Rey, Patricia, *Professor of Exercise Science and Director of Womens Studies*
Ed.D., Columbia

Delaplane, Keith S., *Associate Professor of Entomology*
Ph.D., Louisiana State (Baton Rouge)

DeLorme, Charles Dubose, Jr., *Professor and Department Head of Economics*
Ph.D., Louisiana State (Baton Rouge)

Dennis, Alan R., *Associate Professor of Management*
Ph.D., Arizona

Dennis, William Michael, *Associate Professor of Physics*
Ph.D., Dublin (Trinity College)

Denny, Timothy Porter, *Associate Professor of Plant Pathology*
Ph.D., Cornell

Deom, Carl M., *Assistant Professor of Plant Pathology*
Ph.D., St. Louis

DerVartanian, Daniel V., *Professor of Biochemistry and Molecular Biology and Microbiology and Chair of the Division of Biological Sciences*
Sc.D., Amsterdam

Desmet, Christy, *Associate Professor of English*
Ph.D., California (Los Angeles)

DeWeaver, Kevin L., *Professor of Social Work*
Ph.D., Florida State

Dickerson, Harry W., Jr., *Professor of Medical Microbiology and Avian Medicine, Associate Dean in the College of Veterinary Medicine, and Director of the Veterinary Medicine Experiment Station*
Ph.D., Georgia

Dickie, Margaret, *Helen S. Lanier Distinguished Professor of English*
Ph.D., Brown

Dipiro, Joseph T., *Professor and Department Head of Clinical and Administrative Sciences and Assistant Dean in the College of Pharmacy*
Pharm.D., Kentucky

Dirr, Michael Albert, *Professor of Horticulture*
Ph.D., Massachusetts (Amherst)

Dishman, Rodney King, *Professor of Exercise Science*
Ph.D., Wisconsin (Madison)

Dix, T. Keith., *Assistant Professor of Classics*
Ph.D., Michigan (Ann Arbor)

Dixon, Philip M., *Associate Research Scientist in Savannah River Ecology Laboratory, Adjunct Assistant Professor of Botany, and Adjunct Associate Professor of Statistics*
Ph.D., Cornell

Dluhy, Richard A., *Associate Professor of Chemistry*
Ph.D., Rutgers

Dominick, Joseph R., Jr., *Professor of Telecommunications*
Ph.D., Michigan State

Donovan, Lisa Alayne, *Assistant Professor of Botany*
Ph.D., Utah

Dorfman, Jeffrey H., *Associate Professor of Agricultural and Applied Economics and Acting Assistant Director of the Agricultural Experiment Station*
Ph.D., California (Davis)

Dove, Charles R., *Associate Professor of Animal and Dairy Science*
Ph.D., Iowa State

Dow, Bonnie Jean, *Assistant Professor of Speech Communication*
Ph.D., Minnesota

Dowd, James Joseph, *Professor of Sociology*
Ph.D., Southern California

Dowd, John F., *Assistant Professor of Geology*
Ph.D., Yale

Doyle, Charles Clay, *Associate Professor of English*
Ph.D., Texas (Austin)

Doyle, Michael Patrick, *Regents Professor and Department Head of Food Science and Technology*
Ph.D., Wisconsin (Madison)

Dudley, Gary A., *Professor of Exercise Science*
Ph.D., Ohio State

Duncan, Michael A., *Research Professor of Chemistry*
Ph.D., Rice

Duncan, Ronny Rush, *Professor of Crop and Soil Sciences*
Ph.D., Texas A&M

Dunn, Delmer Delano, *Regents Professor of Political Science*
Ph.D., Wisconsin (Madison)

Durning, Dan, *Public Service Associate in the Institute of Government*
Ph.D., California (Berkeley)

Dutcher, James D., *Professor of Entomology*
Ph.D., Georgia

Dyer, Thomas George, *Professor of Higher Education and History and Acting Associate Vice President for Academic Affairs*
Ph.D., Georgia

Eberhard, Wallace B., *Professor of Journalism*
Ph.D., Wisconsin (Madison)

Edison, Diane, *Associate Professor of Art*
M.F.A., Pennsylvania

Edwards, Alan K., *Professor of Physics*
Ph.D., Nebraska (Lincoln)

Edwards, Gaylen L., *Associate Professor of Physiology and Pharmacology and Adjunct Associate Professor of Foods and Nutrition*
Ph.D., Washington State

Edwards, Hardy Malcolm, Jr., *Alumni Foundation Distinguished Professor of Poultry Science*
Ph.D., Cornell

Ehardt, Carolyn Lee, *Associate Professor of Anthropology*
Ph.D., Texas (Austin)

Eidsvik, Charles V., *Professor of Drama and Theatre*
Ph.D., Illinois (Urbana-Champaign)

Eiteman, Mark A., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Virginia

Eitenmiller, Ronald Ray, *Professor of Food Science and Technology*
Ph.D., Nebraska (Lincoln)

Ely, Lane O., *Professor of Animal and Dairy Science*
Ph.D., California (Davis)

English, John Wesley, *Professor of Journalism*
Ph.D., Union Institute

Ennulat, Egbert Martin, *Professor of Music*
Ph.D., Case Western Reserve

Epperson, James Eugene, *Professor of Agricultural and Applied Economics*
Ph.D., Mississippi State

Epps, Helen H., *Professor of Textiles, Merchandising, and Interiors*
Ph.D., Tennessee (Knoxville)

Erickson, Marilyn C., *Associate Professor of Food Science and Technology*
Ph.D., Oregon State

Eriksson, Karl-Erik L., *Professor and Eminent Scholar of Biochemistry and Molecular Biology and Adjunct Professor of Biological and Agricultural Engineering and Forest Resources*
Ph.D., Uppsala

Espelie, Karl E., *Professor of Entomology*
Ph.D., Wisconsin (Madison)

Etters, James N., *Professor of Textiles, Merchandising and Interiors*
Ph.D., North Carolina (Greensboro)

Evans, Donald L., *Professor of Medical Microbiology*
Ph.D., Arkansas

Evans, Jonathan Duane, *General Sandy Beaver Teaching Associate Professor of English*
Ph.D., Indiana University (Bloomington)

Evans, Mark David, *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Texas A&M

Everett, Daniel McAllister, *Assistant Professor of Computer Science*
Ph.D., Wisconsin (Madison)

Fallows, Noel, *Associate Professor of Romance Languages*
Ph.D., Michigan

Farlowe, Horace Lavern, *Associate Professor of Art*
M.A., East Carolina

Farmer, Mark A., *Assistant Professor of Cellular Biology, Director of the Electron Microscopy Laboratory, and Adjunct Assistant Professor of Botany*
Ph.D., Rutgers (New Brunswick)

Faust, Mark A., *Associate Professor of Language Education*
Ph.D., New York

Fayrer-Hosken, Richard, *Associate Professor of Large Animal Medicine*
Ph.D., Georgia

Fechheimer, Marcus, *Professor of Cellular Biology*
Ph.D., Johns Hopkins

Feldman, Stuart, *Professor of Pharmaceutical and Biomedical Sciences and Dean of the College of Pharmacy*
Ph.D., State University of New York (Buffalo)

Felson, Nancy, *Professor of Classics*
Ph.D., Columbia

Ferguson, Bruce K., *Professor of Environmental Design*
M.L.A., Pennsylvania

Ferguson, Duncan C., *Professor of Small Animal Medicine and Physiology and Pharmacology*
Ph.D., Pennsylvania

Ferrara, Michael S., *Associate Professor of Exercise Science*
Ph.D., Pennsylvania State

Field, Sherry L., *Associate Professor of Social Science Education*
Ph.D., Texas (Austin)

Fincher, Cameron Lane, *Regents Professor of Higher Education and Psychology and Director of the Institute of Higher Education*
Ph.D., Ohio State

Finco, Delmar R., *Professor of Physiology and Pharmacology*
Ph.D., Minnesota (Twin Cities)

Finlay, William, *Associate Professor of Sociology*
Ph.D., Northwestern

Firestone, Evan R., *Professor of Art*
Ph.D., Wisconsin (Madison)

Firth, Ian James Willis, *Professor of Environmental Design*
M.L.A., Edinburgh

Fischer, Joan Guilford, *Assistant Professor of Foods and Nutrition*
Ph.D., Georgia

Fischer, Kenneth Michael, *Professor of Music*
D.M., Indiana (Bloomington)

Fitt, William K., *Associate Professor of Ecology*
Ph.D., California (Santa Barbara)

Fitzgerald, John Walter, *Professor of Microbiology*
Ph.D., Queens University (Kingston)

Flatt, William P., *D.W. Brooks Distinguished Professor of Foods and Nutrition and Animal and Dairy Science*
Ph.D., Cornell

Fleischmann, Arnold P., *Associate Professor of Political Science*
Ph.D., Texas (Austin)

Fletcher, Daniel Lake, *Professor of Poultry Science*
Ph.D., Florida

Fletcher, James Erving, *Professor of Telecommunications and Associate Vice President for Academic Affairs*
Ph.D., Utah

Fletcher, Stanley McCaull, *Professor of Agricultural and Applied Economics*
Ph.D., North Carolina State

Florkowski, Wojciech Jan, *Associate Professor of Agricultural and Applied Economics*
Ph.D., Illinois (Urbana-Champaign)

Floyd, Charles Frederick, *Professor of Real Estate*
Ph.D., North Carolina (Chapel Hill)

Forehand, Rex Lloyd, *Research Professor of Psychology and Director of the Institute for Behavioral Research*
Ph.D., Alabama

Fors, Stuart Wallace, *Associate Professor and Department Head of Health Promotion and Behavior*
Ed.D., Tennessee (Knoxville)

Foutz, Timothy L., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., North Carolina State

Fox, Richard J., *Associate Professor of Marketing and Distribution*
Ph.D., Michigan State

Fragaszy, Dorothy M., *Professor of Psychology*
Ph.D., California (Davis)

Frank, Joseph Florian, *Professor of Food Science and Technology and Adjunct Professor of Microbiology*
Ph.D., Wisconsin (Madison)

Franklin, Rosemary F., *Associate Professor of English*
Ph.D., Emory

Frasier, Mary Mack, *Professor of Educational Psychology*
Ph.D., Connecticut

Freeman-Lynde, Raymond P., *Associate Professor of Geology*
Ph.D., Columbia

Freer, Coburn, *Professor of English*
Ph.D., Washington

French, Warren A., *I. W. Cousins Professor of Business Ethics*
Ph.D., Pennsylvania State

Friday, Karl, *Associate Professor of History*
Ph.D., Stanford

Friedman, Jean Elizabeth, *Associate Professor of History*
Ph.D., Lehigh

Friedmann, Roberto N., *Associate Professor of Marketing and Distribution and Director of Coca-Cola Center for International Business*
Ph.D., Kansas

Froetschel, Mark Alan, *Professor of Animal and Dairy Science*
Ph.D., North Carolina State

Fu, Joseph H. G., *Associate Professor of Mathematics*
Ph.D., Massachusetts Institute of Technology

Gaertig, Jacek, *Assistant Professor of Cellular Biology*
Ph.D., Warsaw

Galau, Glenn Allan, *Associate Professor of Botany*
Ph.D., California Institute of Technology

Galda-Pellegrini, Susan Lee, *Professor of Language Education*
Ph.D., New York

Gale, Jerry Edward, *Associate Professor of Child and Family Development*
Ph.D., Texas Tech

Gallo, James M., *Adjunct Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Arizona

Gantz, Timothy Nolan, *Professor of Classics*
Ph.D., Princeton

Gard, Thomas C., *Professor of Mathematics*
Ph.D., Tennessee (Knoxville)

Gardner, Wayne Allan, *Professor of Entomology*
Ph.D., Clemson

Garner, Thurmon, *Associate Professor of Speech Communication*
Ph.D., Northwestern

Garrison, Ervan G., *Associate Professor of Anthropology and Geology*
Ph.D., Missouri (Columbia)

Gascho, Gary John, *Professor of Crop & Soil Sciences*
Ph.D., Michigan State

Gast, David L., *Professor of Special Education*
Ph.D., Kansas

Gatewood, Robert Donn, *Professor of Management*
Ph.D., Purdue

Gatrell, Simon J., *Professor of English*
D.Phil., Oxford

Gaudin, James M., Jr., *Professor of Social Work*
Ph.D., Florida State

Gaver, Jennifer J., *Associate Professor of Accounting*
Ph.D., Arizona

Gaver, Kenneth M., *Associate Professor of Accounting*
Ph.D., Carnegie-Mellon

Gerling, Rainer W., *Adjunct Assistant Professor of Physics*
Ph.D., Erlangen (Nuremberg)

Gherardini, Frank C., *Associate Professor of Microbiology*
Ph.D., Illinois (Urbana-Champaign)

Giannasi, David E., *Associate Professor of Botany*
Ph.D., Iowa

Gibbons, J. Whitfield, *Professor and Senior Research Scientist of Ecology*
Ph.D., Michigan State

Giles, Freda S., *Assistant Professor of Drama and Theatre and African-American Studies*
Ph.D., New York

Gitaitis, Ronald David, *Professor of Plant Pathology*
Ph.D., Florida

Glaser, Brian A., *Associate Professor of Counseling and Human Development*
Ph.D., Indiana

Glickman, Carl Donald, *University Professor of Social Science Education*
Ed.D., Virginia

Glisson, John Robert, *Professor of Avian Medicine*
D.V.M., Georgia

Glover, Claiborne Van C., III, *Professor of Biochemistry and Molecular Biology and Genetics*
Ph.D., Rochester

Glynn, Denise Muth, *Professor of Elementary Education*
Ph.D., Georgia

Glynn, Shawn M., *Professor of Educational Psychology and Adjunct Professor of Science Education*
Ph.D., Pennsylvania State

Godlas, Alan A., *Associate Professor of Religion*
Ph.D., California (Berkeley)

Godwin, Deborah D., *Associate Professor of Housing and Consumer Economics*
Ph.D., North Carolina (Greensboro)

Goldstein, Susan T., *Associate Professor of Geology and Marine Programs*
Ph.D., California (Berkeley)

Golembiewski, Robert Thomas, *Research Professor of Political Science*
Ph.D., Yale

Golley, Frank Benjamin, *Research Professor of Ecology*
Ph.D., Michigan State

Gomez, Michael, *Professor of History and African-American Studies*
Ph.D., Chicago

Gomez-Martinez, Jose Luis, *Research Professor of Romance Languages*
Ph.D., Iowa

Goodhue, Dale Louis, *Assistant Professor of Management*
Ph.D., Massachusetts Institute of Technology

Goodrum, John Wesley, *Professor of Biological and Agricultural Engineering*
Ph.D., Georgia Institute of Technology

Gootman, Elliott Charles, *Professor of Mathematics*
Ph.D., Massachusetts Institute of Technology

Gooze, Marjanne E., *Associate Professor of Germanic and Slavic Languages*
Ph.D., California (Berkeley)

Gordon, Walter Martin, *Professor of English*
Ph.D., London

Goss, Glenda G., *Professor of Music*
Ph.D., North Carolina (Chapel Hill)

Gosselin, John A., *Associate Professor of Mathematics*
Ph.D., Purdue

Gowaty, Patricia Adair, *Professor of Ecology and Adjunct Professor of Genetics*
Ph.D., Clemson

Grafstein, Robert M., *Professor of Political Science*
Ph.D., Chicago

Gragson, Theodore L., *Assistant Professor of Anthropology*
Ph.D., Pennsylvania State

Graham, Margaret Ann, *Assistant Professor of Language Education*
Ph.D., Iowa

Graham, Richard Martin, *Professor of and Director of the School of Music*
Ph.D., Kansas

Grant, Linda M., *Professor of Sociology*
Ph.D., Michigan (Ann Arbor)

Grant, Roy E., *Associate Professor of Music*
Ed.D., Georgia

Granville, Andrew J., *David C. Barrow Professor of Mathematics*
Ph.D., Queens University (Kingston)

Green, Keith, *Adjunct Professor of Small Animal Medicine*
Ph.D., St. Andrews

Greene, Craig Evan, *Gunst Professor of Small Animal Practice and Professor of Medical Microbiology*
D.V.M., California (Davis)

Greene, Walter Dale, *Associate Professor of Forest Resources*
Ph.D., Auburn

Greenspan, Phillip, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Iowa

Gregg, Kathy Noel, *Professor of Special Education and Director of the Learning Disabilities Center*
Ph.D., Northwestern

Grider, Arthur, *Assistant Professor of Foods and Nutrition*
Ph.D., Cincinnati

Griswold, William F., Jr., *Associate Professor of Journalism*
Ph.D., Minnesota (Twin Cities)

Grossman, Gary David, *Professor of Forest Resources*
Ph.D., California (Davis)

Grover, Rajiv, *C. Herman and Mary Virginia Terry Distinguished Professor of Business Administration*
Ph.D., Massachusetts (Amherst)

Gunter, Lewell F., Jr., *Associate Professor of Agricultural and Applied Economics*
Ph.D., Maryland (College Park)

Gurian, Paul-Henri, *Associate Professor of Political Science*
Ph.D., North Carolina (Chapel Hill)

Gustafson, Kent L., *Professor and Department Head of Instructional Technology*
Ph.D., Michigan State

Gustavson, Sandra G., *Bradford McFadden Professor of Personal Financial Management and Department Head of Insurance, Legal Studies, Real Estate and Management Science*
Ph.D., Illinois (Urbana-Champaign)

Guy, Talmadge C., *Assistant Professor of Adult Education*
Ed.D., Northern Illinois

Haag, John J., *Associate Professor of History*
Ph.D., Rice

Haas, David, *Associate Professor of Music*
Ph.D., Michigan (Ann Arbor)

Hahn, Michael G., *Associate Professor of Botany, Adjunct Associate Professor of Biochemistry and Molecular Biology and Plant Pathology*
Ph.D., Colorado (Boulder)

Haines, Bruce Lee, *Associate Professor of Botany*
Ph.D., Duke

Hair, Harriet Inez, *Professor of Music*
Ed.D., Columbia

Hale, Jerold L., *Associate Professor of Speech Communication*
Ph.D., Michigan State

Hall, D. Gregory, *Assistant Professor of Pathology*
Ph.D., Texas A&M

Hall, Helen C., *Associate Professor and Department Head of Occupational Studies*
Ph.D., Pennsylvania State

Hall, Joan Kelly, *Associate Professor of Language Education*
Ed.D., State University of New York (Albany)

Hally, David Judson, *Associate Professor of Anthropology*
Ph.D., Harvard

Halper, Edward C., *Professor of Philosophy*
Ph.D., Toronto

Halper, Jaroslava T., *Associate Professor of Pathology*
Ph.D., Mayo School of Medicine

Halverson, Charles F., *Professor of Child and Family Development and Adjunct Professor of Psychology*
Ph.D., Syracuse

Hamilton, Claire E., *Assistant Professor of Elementary Education and Adjunct Assistant Professor of Psychology*
Ph.D., California (Los Angeles)

Hammond, G. Thomas, *Professor of Art*
M.A., East Carolina

Hamrick, James L., III, *Professor of Botany and Genetics and Adjunct Professor of Forest Resources*
Ph.D., California (Berkeley)

Hanna, Wayne William, *Adjunct Professor of Crop and Soil Sciences*
Ph.D., Texas A&M

Hannafin, Michael J., *Eminent Scholar and Professor of Instructional Technology and*

Charles H. Wheatley, Georgia Research Alliance Chair in Technology Based Learning
Ph.D., Arizona State

Hanula, James Lee, *Adjunct Research Scientist in Entomology*
Ph.D., Georgia

Happek, Uwe, *Assistant Professor of Physics*
Ph.D., Regensberg

Hardin, Ian Russell, *Professor and Department Head of Textiles, Merchandising, and Interiors*
Ph.D., Clemson

Hargrove, James Lee, *Associate Professor of Foods and Nutrition*
Ph.D., Utah State

Harklau, Linda Anne, *Assistant Professor of Language Education*
Ph.D., California (Berkeley)

Harmon, Barry Glenn, *Professor of Pathology*
Ph.D., Texas A&M

Harrington, Timothy B., *Assistant Professor of Forest Resources*
Ph.D., Oregon State

Harrison, Judy A., *Assistant Professor of Foods and Nutrition*
Ph.D., Georgia

Harrison, Frank Russell III, *General Sandy Beaver Teaching Professor of Philosophy*
Ph.D., Virginia

Harrison, Mark Andrew, *Professor of Food Science and Technology*
Ph.D., Tennessee (Knoxville)

Hart, Laurie Ellen, *Associate Professor of Elementary Education*
Ph.D., Wisconsin (Madison)

Hartel, Peter G., *Associate Professor of Crop and Soil Sciences*
Ph.D., Oregon State

Hartle, Diane Kathleen, *Associate Professor of Pharmaceutical and Biomedical Sciences and Adjunct Associate Professor of Foods and Nutrition*
Ph.D., Iowa

Hatfield, Larry Lee, *Professor and Department Head of Mathematics Education*
Ph.D., Minnesota (Twin Cities)

Hathcote, Jan, *Associate Professor of Textiles, Merchandising, and Interiors and Associate Dean of the College of Family and Consumer Sciences*
Ph.D., Tennessee (Knoxville)

Hauschildt, Peter H., *Assistant Professor of Physics and Astronomy*
Ph.D., Heidelberg

Hausman, Gary J., *Adjunct Professor of Foods and Nutrition*
Ph.D., Wisconsin (Madison)

Hawman, Robert B., *Associate Professor of Geology*
Ph.D., Princeton

Hayes, David M., *Associate Professor of Health Promotion and Behavior*
Ph.D., Pennsylvania State

Hayes, Richard L., *Professor and Department Head of Counseling and Human Development*
Ph.D., Boston

Hebert, Thomas P., *Assistant Professor of Educational Psychology*
Ph.D., Connecticut

Heil, Timothy Gerald, *Associate Professor of Physics*
Ph.D., Illinois (Urbana-Champaign)

Helfman, Eugene S., *Associate Professor of Ecology*
Ph.D., Cornell

Hellerstein, Nina S., *Professor of Romance Languages*
Ph.D., Chicago

Hendrick, Ronald L., *Assistant Professor of Forest Resources*
Ph.D., Michigan State

Hendrix, Paul F., *Associate Professor of Ecology*
Ph.D., Georgia

Henkel, Jan William, *Professor of Legal Studies*
J.D., Loyola

Henken, Elissa R., *Associate Professor of English*
Ph.D., Indiana (Bloomington)

Henry, Carole K., *Associate Professor of Art*
Ed.D., Georgia

Hepburn, Mary Allaire, *Professor of Social Science Education*
Ph.D., Florida State

Herbert, James Arthur, *Professor of Art*
M.F.A., Colorado (Boulder)

Herod, Andrew J., *Associate Professor of Geography*
Ph.D., Rutgers (New Brunswick)

Herren, Ray Vester, *Associate Professor of Agricultural Leadership, Education, and Communication*
Ed.D., Virginia Polytechnic Institute

Heslep, Robert Durham, *Professor of Educational Leadership and Adjunct Professor of Social Science Education*
Ph.D., Chicago

Hildy, Franklin J., *Associate Professor of Drama and Theatre*
Ph.D., Northwestern

Hill, Gary Martin, *Professor of Animal and Dairy Science*
Ph.D., Kentucky

Hill, Nicholas S., *Professor of Crop and Soil Sciences*
Ph.D., Kansas State

Hill, Roger B., *Assistant Professor of Occupational Studies*
Ph.D., Tennessee (Knoxville)

Hilliard, Jimmy E., *C. Herman and Mary Virginia Terry Distinguished Professor of Business Administration*
Ph.D., Tennessee (Knoxville)

Hilton, Howard Nelson, *Professor of English*
Ph.D., California (Santa Cruz)

Hocking, John E., *Associate Professor of Speech Communication*
Ph.D., Michigan State

Hodler, Thomas William, *Professor of Geography*
Ph.D., Oregon State

Hodson, Robert Edward, *Professor of Marine Programs, Ecology and Microbiology and Director of the School of Marine Programs*
Ph.D., California (San Diego)

Hoenig, Margarethe, *Professor of Physiology and Pharmacology and Small Animal Medicine*
Ph.D., Pennsylvania

Hofer, Charles Warren, *Regents Professor of Management*
D.B.A., Harvard

Hoffer, Peter C., *Research Professor of History*
Ph.D., Harvard

Hoge, John Douglas, *Associate Professor of Social Science Education*
Ph.D., Florida State

Holland, Steven M., *Associate Professor of Geology and Marine Programs*
Ph.D., Chicago

Holland, Thomas Powell, *Professor of Social Work and Director of Doctoral Program in Social Work*
Ph.D., Brandeis

Hollander, Barry A., *Associate Professor of Journalism*
Ph.D., Florida

Hollibaugh, James T., *Professor and Associate Director of Marine Programs*
Ph.D., Dalhousie

Hollifield, Cheryl Ann, *Assistant Professor of Telecommunications*
Ph.D., Ohio State

Holloway, Steven R., *Assistant Professor of Geography*
Ph.D., Wisconsin (Madison)

Holmes, Charles Thomas, *Professor and Department Head of Educational Leadership*
Ed.D., Georgia

Holmes, William Fowler, *Professor of History*
Ph.D., Rice

Holt, Margaret Elizabeth, *Associate Professor of Adult Education*
Ed.D., Georgia

Hoogenboom, Gerrit, *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Auburn

Hook, James E., *Professor of Crop and Soil Sciences*
Ph.D., Pennsylvania State

Hoover, Timothy R., *Assistant Professor of Microbiology*
Ph.D., Wisconsin (Madison)

Horan, Patrick Michael, *Professor of Sociology*
Ph.D., Wisconsin (Madison)

Horne, Arthur M., *Professor of Counseling and Human Development*
Ph.D., Southern Illinois (Carbondale)

Horvat, Michael A., *Associate Professor of Physical Education and Sport Studies*
Ed.D., Utah

Houston, Jack E., Jr., *Associate Professor of Agricultural and Applied Economics and Adjunct Associate Professor of Housing and Consumer Economics*
Ph.D., Washington State

Hoveland, Carl S., *William Terrell Distinguished Professor of Crop and Soil Sciences*
Ph.D., Florida

Howard, George Eulan, *Professor and Department Head of Religion*
Ph.D., Hebrew Union

Howarth, Birkett, Jr., *Professor of Poultry Science*
Ph.D., North Carolina State

Howerth, Elizabeth Wynne, *Associate Professor of Pathology*
Ph.D., Georgia

Howett, Catherine M., *Professor of Environmental Design*
M.L.A., Georgia

Hoy, Cheri A., *Professor and Department Head of Special Education*
Ph.D., Northwestern

Hoyt, Robert E., *Associate Professor of Insurance*
Ph.D., Pennsylvania

Huang, Chung-Liang, *Professor of Agricultural and Applied Economics and Adjunct Professor of Housing and Consumer Economics*
Ph.D., Virginia Polytechnic Institute

Huang, Yao-Wen, *Associate Professor of Food Science and Technology and Adjunct Associate Professor of Marine Programs*
Ph.D., Georgia

Hubbard, Dolan, *Associate Professor of English and African-American Studies*
Ph.D., Illinois (Urbana-Champaign)

Huberty, Carl J., *Professor and Department Head of Educational Psychology*
Ph.D., Iowa

Hudson, Charles Melvin, Jr., *Franklin Professor of Anthropology*
Ph.D., North Carolina (Chapel Hill)

Hung, Yen Con, *Professor of Food Science and Technology*
Ph.D., Minnesota (Twin Cities)

Hunt, Karen S. Loup, *Assistant Professor of Educational Leadership*
Ph.D., Louisiana State (Baton Rouge)

Hunt-Hurst, Patricia K., *Associate Professor of Textiles, Merchandising, and Interiors*
Ph.D., Ohio State

Hunter, Mark D., *Assistant Professor of Ecology*
Ph.D., Oxford

Hussey, Richard Sommers, *D.W. Brooks Distinguished Professor of Plant Pathology*
Ph.D., Maryland (College Park)

Hutcheson, Kermit, *Professor of Statistics*
Ph.D., Virginia Polytechnic Institute

Hutchinson, Sylvia McCoy, *Professor of Reading Education and Associate Dean of the College of Education*
Ph.D., Georgia

Hynd, Cynthia R., *Associate Professor of Academic Assistance*
Ed.D., Georgia

Hynd, George W., *Research Professor of Special Education, Adjunct Professor of Psychology, and Director of the School of Professional Studies*
Ed.D., Northern Colorado

Hynds, Ernest Culloden, *Professor and Department Head of Journalism*
Ph.D., Georgia

Ingersoll, Richard, *Assistant Professor of Sociology*
Ph.D., Pennsylvania

Ingram, Keith T., *Associate Professor of Crop and Soil Sciences*
Ph.D., Florida

Inscoe, John C., *Associate Professor of History*
Ph.D., North Carolina (Chapel Hill)

Iturrian, William Ben, *Associate Professor of Pharmaceutical and Biomedical Sciences and Adjunct Associate Professor of Psychology*
Ph.D., Oregon State

Ivarie, Robert Dennis, *Professor of Genetics and Adjunct Professor of Animal and Dairy Science*
Ph.D., Colorado (Boulder)

Iverson, Maynard J., *Associate Professor of Agricultural Leadership, Education, and Communication*
Ph.D., Ohio State

Izadi, Elham, *Assistant Professor of Mathematics*
Ph.D., Utah

Jackson, David F., *Associate Professor of Science Education*
Ed.D., Michigan (Ann Arbor)

Jackson, Joan Lynne, *Associate Professor of Psychology*
Ph.D., Georgia

Jackwood, Mark Walter, *Associate Professor of Avian Medicine and Medical Microbiology*
Ph.D., Ohio State

Jagoe, Charles Henry, *Assistant Research Scientist at the Savannah River Ecology Labora-*

tory and Adjunct Assistant Professor of Pharmaceutical and Biomedical Sciences
Ph.D., Maine (Farmington)

Jahn, Theodore Lee, *Professor of Music*
D.M., Indiana (Bloomington)

Jameson, Robert Philip, *Associate Professor of Music*
Ed.D., Columbia

Jarret, Robert Lawrence, *Adjunct Associate Professor of Horticulture*
Ph.D., Purdue

Jaso-Friedmann, Liliana, *Associate Research Scientist of Medical Microbiology*
Ph.D., Kansas

Jaworski, Alan John, *Professor and Department Head of Botany*
Ph.D., Arizona

Jennings, Cecil A., *Adjunct Assistant Professor of Forest Resources*
Ph.D., Florida

Johnson-Bailey, Juanita, *Assistant Professor of Adult Education*
Ed.D., Georgia

Johnson, Coates Richard, *Associate Professor of Physics*
Ph.D., California (Berkeley)

Johnson, Jerry Wayne, *Professor of Crop and Soil Sciences*
Ph.D., Purdue

Johnson, Julie Greer, *Professor of Romance Languages*
Ph.D., Indiana (Bloomington)

Johnson, Kenneth D., *Professor of Mathematics*
Ph.D., California (Berkeley)

Johnson, Loch Kingsford, *Regents Professor of Political Science*
Ph.D., California (Riverside)

Johnson, Mary Ann, *Professor of Foods and Nutrition*
Ph.D., Wisconsin (Madison)

Johnson, Michael Kenneth, *Professor of Chemistry and Co-Director of Center for Metalloenzyme Studies*
Ph.D., East Anglia

Jones, Catherine Mary, *General Sandy Beaver Teaching Associate Professor of Romance Languages*
Ph.D., Wisconsin (Madison)

Jones, Karen H., *Associate Professor of Occupational Studies*
Ed.D., Georgia

Jordan, Carl Frederick, *Adjunct Professor of Botany and Senior Research Scientist of Ecology*
Ph.D., Rutgers (New Brunswick)

Jordan, Jeffrey L., *Professor of Agricultural and Applied Economics*
Ph.D., Michigan State

Jorgensen, Peter A., *Professor of Germanic and Slavic Languages*
Ph.D., Harvard

Jun, Hung Won, *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Alberta

Kadish, Doris Y., *Professor and Department Head of Romance Languages*
Ph.D., Case Western Reserve

Kamerschen, David R., *Jasper N. Dorsey Professor of Public Utilities Economics*
Ph.D., Michigan State

Kamphaus, Randy W., *Professor of Educational Psychology*
Ph.D., Georgia

Kanemasu, Edward T., *Regents Professor of Crop and Soil Sciences*
Ph.D., Wisconsin (Madison)

Kannan, Dhandapani, *Professor of Mathematics*
Ph.D., Wayne State

Karnok, Keith J., *Professor of Crop and Soil Sciences*
Ph.D., Texas A&M

Karpf, Juanita, *Assistant Professor of Music*
D.M.A., Georgia

Karwoski, Chester John, *Professor of Psychology and Adjunct Professor of Cellular Biology*
Ph.D., Minnesota (Twin Cities)

Kason, Nancy M., *Professor of Romance Languages*
Ph.D., Illinois (Urbana-Champaign)

Kaswan, Renee L., *Senior Research Scientist in Small Animal Medicine and Physiology and Pharmacology*
D.V.M., Georgia

Katz, Stuart Barry, *Associate Professor of Psychology*
Ph.D., Michigan (Ann Arbor)

Kau, James B., *C. Herman and Mary Virginia Terry Distinguished Professor of Business Administration*
Ph.D., Washington

Kaufman, Glen Frank, *Professor of Art*
M.F.A., Cranbrook Academy of Art

Kavoori, Anadam Philip, *Assistant Professor of Telecommunications*
Ph.D., Maryland (College Park)

Kays, Stanley John, *Professor of Horticulture*
Ph.D., Michigan State

Kazez, William H., *Associate Professor of Mathematics*
Ph.D., Cornell

Kececioglu, John D., *Assistant Professor of Computer Sciences*
Ph.D., Arizona

Keeler, Andrew G., *Associate Professor of Agricultural and Applied Economics*
Ph.D., California (Berkeley)

Keenan, Donald Charles, *Professor of Economics*
D.Sc., Washington University

Kefalas, Asterios G., *Professor of Management*
Ph.D., lowa

Keith, Charles Hubert, *Associate Professor of Cellular Biology*
Ph.D., Chicago

Kellough, James Edward, *Associate Professor of Political Science*
Ph.D., Miami (Hamilton)

Kenner, Hugh, *Fuller E. Callaway Professor and Franklin Professor of English*
Ph.D., Yale

Kernis, Michael Howard, *Associate Professor of Psychology*
Ph.D., Rochester

Kerr, William L., *Assistant Professor of Food Science and Technology*
Ph.D., California (Davis)

Key, Joe Lynn, *Research Professor of Botany and Vice President for Research*
Ph.D., Illinois (Urbana-Champaign)

Keys, Carolyn W., *Assistant Professor of Science Education*
Ph.D., Michigan (Ann Arbor)

Kibler, James E., Jr., *Professor of English*
Ph.D., South Carolina (Columbia)

Kieffer, Ronald D., *Assistant Professor of Language Education*
Ph.D., Ohio State

Kilgo, James Patrick, *Professor of English*
Ph.D., Tulane

Kilpatrick, Jeremy, *Regents Professor of Mathematics Education*
Ph.D., Stanford

Kim, Seock-Ho, *Assistant Professor of Educational Psychology*
Ph.D., Wisconsin (Madison)

King, Daniel John, *Adjunct Research Associate in Avian Medicine*
Ph.D., Wisconsin (Madison)

King, James M., *Associate Professor of Instructional Technology*
Ed.D., Indiana (Bloomington)

King, Karen Whitehall, *Associate Professor of Advertising/Public Relations*
Ph.D., Illinois (Urbana-Champaign)

King, Robert Bruce, *Regents Professor of Chemistry*
Ph.D., Harvard

Kipp, Katherine, *Associate Professor of Psychology*
Ph.D., Florida Atlantic

Kipreos, Edward T., *Assistant Professor of Cellular Biology*
Ph.D., California (San Diego)

Kirkland, James R., *Assistant Professor of Religion*
Ph.D., Indiana (Bloomington)

Kisaalita, William S., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., British Columbia

Kissel, David E., *Professor of Crop and Soil Sciences*
Ph.D., Kentucky

Kleiber, Douglas A., *Professor and Department Head of Recreation and Leisure Studies*
Ph.D., Texas (Austin)

Klein, Jared Stephen, *Professor of Linguistics and Germanic and Slavic Languages*
Ph.D., Yale

Kleiner, Scott Alter, *Professor of Philosophy*
Ph.D., Chicago

Kleven, Stanley H., *Research Professor and Department Head of Avian Medicine*
Ph.D., Minnesota (Twin Cities)

Klobucka, Anna, *Assistant Professor of Romance Languages*
Ph.D., Harvard

Knauft, David A., *Professor of Crop and Soil Sciences and Associate Dean in the College of Agricultural and Environmental Sciences*
Ph.D., Cornell

Kneib, Ronald T., *Senior Research Scientist in Marine Institute*
Ph.D., North Carolina (Chapel Hill)

Koballa, Thomas R., Jr., *Professor and Department Head of Science Education*
Ph.D., Pennsylvania State

Kochert, Gary Dean, *Professor of Botany*
Ph.D., Indiana (Bloomington)

Kochurt, Krzysztof Jan, *Associate Professor of Computer Science*
Ph.D., Louisiana State (Baton Rouge)

Koehler, Philip E., *Professor of Food Science and Technology*
Ph.D., Oklahoma State

Kotzan, Jeffrey Anthony, *Professor of Clinical and Administrative Sciences*
Ph.D., Purdue

Koubi, Vasiliki, *Assistant Professor of Political Science*
Ph.D., Rochester

Kowalewski, Stephen Anthony, *Professor and Department Head of Anthropology*
Ph.D., Arizona

Kraeling, Robert R., *Adjunct Professor of Animal and Dairy Science*
Ph.D., Iowa State

Kraft, Elizabeth Ann, *Associate Professor of English*
Ph.D., Emory

Krasnostchekova, Elena A., *Associate Professor of Germanic and Slavic Languages*
Ph.D., Moscow P.I. Tchaikovsky State Conservatoire

Krause, Duncan Charles, *Professor of Microbiology*
Ph.D., North Carolina (Chapel Hill)

Krell, Jonathan F., *Associate Professor of Romance Languages*
Ph.D., Virginia

Krementz, David G., *Adjunct Assistant Professor of Forest Resources and Ecology*
Ph.D., Western Ontario

Kreshel, Peggy J., Associate Professor of Advertising/Public Relations
Ph.D., Illinois (Urbana-Champaign)

Kresovich, Stephen, *Adjunct Professor of Botany and Crop and Soil Sciences*
Ph.D., Ohio State

Kretzschmar, William A., Jr., *Professor of English*
Ph.D., Chicago

Kriesel, Warren Paul, *Associate Professor of Agricultural and Applied Economics*
Ph.D., Ohio State

Kropf, Nancy Patricia, *Associate Professor and Associate Dean of the School of Social Work*
Ph.D., Virginia Commonwealth

Krugman, Dean M., *Professor and Department Head of Advertising/Public Relations*
Ph.D., Illinois (Urbana-Champaign)

Kuhnert, Karl, *Associate Professor of Psychology*
Ph.D., Kansas State

Kundell, James Edward, *Professor of Ecology and Senior Public Service Associate in the Institute of Government*
Ph.D., State University of New York

Kurtz, Donald M., Jr., *Professor of Chemistry*
Ph.D., Northwestern

Kurtz, P. David, *Professor of Social Work and Counseling and Human Development*
Ph.D., Michigan (Ann Arbor)

Kushner, Sidney R., *Professor of Genetics*
Ph.D., Brandeis

Kutal, Charles Ronald, *Professor of Chemistry*
Ph.D., Illinois (Urbana-Champaign)

Kvien, Craig K., *Professor of Crop and Soil Sciences*
Ph.D., Minnesota (Twin Cities)

Labbo, Linda Day, *Associate Professor of Reading Education*
Ph.D., Texas (San Antonio)

Ladis, Andrew, *Franklin Professor of Art*
Ph.D., Virginia

LaFleur, Richard Allen, *Professor and Department Head of Classics*
Ph.D., Duke

Lahiff, James Michael, *Associate Professor of Management*
Ph.D., Pennsylvania State

Lai, Ming-Jun, *Associate Professor of Mathematics*
Ph.D., Texas A&M

Lammie, Patrick J., *Adjunct Research Scientist of Cellular Biology*
Ph.D., Tulane

Lance, Charles E., *Associate Professor of Psychology*
Ph.D., Georgia Institute of Technology

Landau, David Paul, *Research Professor of Physics*
Ph.D., Yale

Langley, Lester D., *Research Professor of History*
Ph.D., Kansas

Langone, Christine A., *Associate Professor of Agricultural Leadership, Education, and Communication*
Ed.D., Georgia

Langone, John, Jr., *Associate Professor of Special Education*
Ph.D., Florida State

Lariscy, Ruth Ann, *Associate Professor of Advertising/Public Relations*
Ph.D., Missouri (Columbia)

Larson, Edward J., *Associate Professor of History and Law*
Ph.D., Wisconsin (Madison)

Lastrapes, William D., *Associate Professor of Economics*
Ph.D., North Carolina (Chapel Hill)

Latimer, Joyce Griffin, *Associate Professor of Horticulture*
Ph.D., Purdue

Latimer, Kenneth Stuart, *Professor of Pathology*
Ph.D., Georgia

Laughton, Joan M., *Associate Professor of Communication Sciences and Disorders*
Ph.D., Kent State

Lautenschlager, Gary, *Professor of Psychology*
Ph.D., Illinois (Chicago)

Lauth, Thomas P., *Professor and Department Head of Political Science*
Ph.D., Syracuse

Law, Sidney Edward, *D.W Brooks Distinguished Professor of Biological and Agricultural Engineering*
Ph.D., North Carolina State

Leary, William M., Jr., *E. Merton Coulter Professor of History*
Ph.D., Princeton

Leclerc, Monique Y., *Associate Professor of Crop and Soil Sciences*
Ph.D., Guelph

Ledvinka, James David, *Professor of Management*
Ph.D., Michigan (Ann Arbor)

Lee, Dwight Ryndle, *Bernard B. And Eugenia A. Ramsey Professor of Private Enterprise*
Ph.D., California (San Diego)

Lee, John W., *Professor of Biochemistry and Molecular Biology*
Ph.D., New South Wales

Lee, M. Howard, *Professor of Physics*
Ph.D., Pennsylvania

Lee, Margie D., *Associate Professor of Medical Microbiology*
Ph.D., Georgia

Lee, William Eyre, *Professor of Telecommunications*
Ph.D., Wisconsin (Madison)

Legge, Jerome Stewart, Jr., *Professor of Political Science*
Ph.D., Emory

Leglar, Mary Alice, *Associate Professor of Music*
Ph.D., Indiana (Bloomington)

Leigh, David Stuart, *Associate Professor of Geography*
Ph.D., Wisconsin (Madison)

Leigh, Thomas W., *Professor of Marketing and Director of the Center for Marketing Studies*
D.B.A., Indiana

Leonard, Samuel David, *Associate Professor of Psychology*
Ph.D., Iowa

Leonas, Karen K., *Associate Professor of Textiles, Merchandising, and Interiors*
Ph.D., Tennessee (Knoxville)

Lessl, Thomas M., *Associate Professor of Speech Communication*
Ph.D., Texas (Austin)

Lester, Elli, *Associate Professor of Advertising/Public Relations*
Ph.D., Wisconsin (Madison)

Lether, Frank G., *Professor of Mathematics*
Ph.D., Utah

Lewis, Joan Koonce, *Associate Professor of Housing and Consumer Economics*
Ph.D., Ohio State

Lewis, Richard D., *Associate Professor of Foods and Nutrition*
Ph.D., Virginia Polytechnic Institute

Lewis, Theodore J., *Associate Professor of Religion*
Ph.D., Harvard

Lewis, Ward Bevins, Jr., *Associate Professor of Germanic and Slavic Languages*
Ph.D., Pennsylvania

Lindstrom, Orville M., *Associate Professor of Horticulture*
Ph.D., Minnesota (Twin Cities)

Lipson, Marc L., *Assistant Professor of Banking and Finance*
Ph.D., Michigan (Ann Arbor)

Ljungdahl, Lars Gerhard, *Georgia Power Distinguished Professor of Biotechnology and Director of Georgia Biotechnology Center*
Ph.D., Case Western Reserve

Lo, Chor-Pang, *Professor of Geography*
Ph.D., Glasgow

Lockerbie, Brad E., *Associate Professor of Political Science*
Ph.D., Iowa

Lockhart, Lettie Louvennia, *Professor of Social Work*
Ph.D., Florida State

Logan, B. Ikubolajeh, *Associate Professor of Geography*
Ph.D., California (Los Angeles)

Logue, Calvin McLeod, *Professor of Speech Communication*
Ph.D., Louisiana State (Baton Rouge)

Lohr, Luanne, *Assistant Professor of Agricultural and Applied Economics*
Ph.D., California (Davis)

Longman, Stanley Vincent, *Professor of Drama and Theatre*
Ph.D., Iowa

Lootens, Tricia Ann, *Associate Professor of English*
Ph.D., Indiana (Bloomington)

Lorenzini, Dino J., *Associate Professor of Mathematics*
Ph.D., California (Berkeley)

Love, William Gary, *Regents Professor of Physics*
Ph.D., Tennessee (Knoxville)

Lovell, C. A. Knox, *C. Herman and Mary Virginia Terry Distinguished Professor of Business Administration*
Ph.D., Duke

Lu, D. Robert, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Purdue

Lukert, Phil Dean, *Professor of Medical Microbiology*
Ph.D., Iowa State

Lund, Robert B., *Assistant Professor of Statistics*
Ph.D., North Carolina (Chapel Hill)

Lynch, Richard L., *Professor of Occupational Studies and Director of the School of Leadership and Lifelong Learning*
Ed.D., Indiana (Bloomington)

Lyons, Nancy Irene, *Associate Professor of Statistics*
Ph.D., North Carolina State

Mabry, John William, *Professor of Animal and Dairy Science*
Ph.D., Iowa

MacNair, Ray Hugh, *Associate Professor of Social Work*
Ph.D., Michigan (Ann Arbor)

Maddux, Estoria McAfee, *Professor of Housing and Consumer Economics*
Ph.D., Purdue

Magnani, Loris Alberto, *Associate Professor of Physics*
Ph.D., Maryland (College Park)

Mahaffey, Edward Allen, *Professor of Pathology and Associate Dean of the College of Veterinary Medicine*
Ph.D., Kansas State

Mahaffey, Mary B., *Professor of Anatomy and Radiology*
D.V.M., Oklahoma State

Mahan, Robert P., *Associate Professor of Psychology*
Ph.D., Connecticut

Majetich, George Franklin, *Professor of Chemistry*
Ph.D., Pittsburgh

Malmberg, Russell L., *Professor of Botany and Adjunct Professor of Biochemistry and Molecular Biology*
Ph.D., Wisconsin (Madison)

Maltese, John Anthony, *Associate Professor of Political Science*
Ph.D., Johns Hopkins

Mann, William A., *Professor of Environmental Design*
M.L.A., Harvard

Manning, Brenda Holcomb, *Professor and Department Head of Elementary Education*
Ed.D., Georgia

Mantero, Manuel, *Research Professor of Romance Languages*
D.L., Salamanca

Markward, Martha J., *Assistant Professor of Social Work*
Ph.D., Illinois

Marlowe, Julia, *Associate Professor of Housing and Consumer Economics*
Ph.D., Tennessee (Knoxville)

Marsh, Richard L., *Assistant Professor of Psychology*
Ph.D., Stanford

Martin, Bradley C., *Assistant Professor of Clinical and Administrative Sciences*
Ph.D., Georgia

Martin, Jean F., *Associate Professor of Music*
D.M.A., Manhattan School of Music

Martin, Leonard L., *Associate Professor of Psychology*
Ph.D., North Carolina (Greensboro)

Martin, Roy Joseph, *Alumni Foundation Distinguished Professor, Research Professor and Department Head of Foods and Nutrition*
Ph.D., California (Davis)

Martin, Roy Paul, *Professor of Educational Psychology and Interim Associate Director of Academic Assistance*
Ph.D., Texas (Austin)

Martin, Sandy Dwayne, *Associate Professor of Religion*
Ph.D., Columbia (New York)

Martin, Scott A., *Professor of Animal and Dairy Science*
Ph.D., Cornell

Masciadri, Milton W., *Associate Professor of Music*
D.M.A., State University of New York (Stony Brook)

Mason, Laura, *Associate Professor of History*
Ph.D., Princeton

Matic, Gordana, *Associate Professor of Mathematics*
Ph.D., Utah

Matthews, Robert Wendell, *Professor of Entomology*
Ph.D., Harvard

Mauldin, Teresa, *Associate Professor of Housing and Consumer Economics*
Ph.D., Ohio State

Maw, Bryan William, *Associate Professor of Biological and Agricultural Engineering*
Ph.D., North Carolina State

McAlexander, Hubert Horton, Jr., *Professor of English*
Ph.D., Wisconsin (Madison)

McArthur, J Vaun, *Associate Research Scientist of Ecology*
Ph.D., Kansas State

McCall, John Wilson, *Professor of Parasitology*
Ph.D., Georgia

McCann, Julia S., *Associate Professor of Animal and Dairy Science*
Ph.D., Texas Tech

McCann, Mark Alan, *Associate Professor of Animal and Dairy Science*
Ph.D., Texas Tech

McCaskill, Barbara, *Assistant Professor of English*
Ph.D., Emory

McClendon, Ronald Webb, *Professor of Biological and Agricultural Engineering*
Ph.D., Mississippi State

McCormick, Laura K., *Assistant Professor of Health Promotion and Behavior*
Ph.D., North Carolina (Chapel Hill)

McCormick, William Peter, *Professor of Statistics*
Ph.D., Stanford

McCreary, Don Rafferty, *Associate Professor of English*
Ph.D., Delaware

McCrory, Clinton Graydon, *Professor of Mathematics*
Ph.D., Brandeis

McCutchen, Thomas W., *Associate Professor of Music*
D.M.A., North Texas

McCutcheon, Steven C., *Adjunct Professor of Forest Resources*
Ph.D., Vanderbilt

McDonald, John F., *Professor of Genetics*
Ph.D., California (Davis)

McDougald, Larry Robert, *Professor of Poultry Science*
Ph.D., Kansas State

McGraw, Royal A., *Associate Professor of Physiology and Pharmacology*
Ph.D., Florida State

McGregor, James H., *Associate Professor of Comparative Literature*
Ph.D., Princeton

McIntosh, Christopher S., *Associate Professor of Agricultural and Applied Economics*
Ph.D., Texas A&M

McKeown, Patrick G., *Professor of Management*
Ph.D., North Carolina (Chapel Hill)

McLaughlin, H. James, *Assistant Professor of Elementary Education*
Ph.D., North Carolina (Chapel Hill)

McLeod, Kenneth William, *Adjunct Assistant Professor of Forest Resources, Associate Research Scientist of Ecology and Associate Ecologist at Savannah River Ecology Lab*
Ph.D., Michigan State

McNair, Lily D., *Assistant Professor of Psychology*
Ph.D., State University of New York (Stony Brook)

McPherson, Robert M., *Professor of Entomology*
Ph.D., Louisiana State (Baton Rouge)

McWillie, Judith M., *Professor of Art*
M.F.A., Ohio State

Meagher, Richard B., *Professor and Department Head of Genetics*
Ph.D., Yale

Meentemeyer, Vernon George, *Professor of Geography*
Ph.D., Southern Illinois (Carbondale)

Megginson, William L., *Associate Professor of Banking and Finance*
Ph.D., Florida State

Meinersmann, Richard J., *Adjunct Assistant Professor of Avian Medicine*
Ph.D., Temple

Meltzer, Richard Stephen, *Professor of Physics*
Ph.D., Chicago

Mendicino, Joseph F., *Professor of Biochemistry and Molecular Biology*
Ph.D., Case Western Reserve

Mensa-Wilmot, Kojo Anzah, *Associate Professor of Cellular Biology and Biochemistry and Molecular Biology*
Ph.D., Johns Hopkins

Merkle, Scott A., *Professor of Forest Resources*
Ph.D., Virginia Polytechnic Institute

Merriam, Sharan B., *Professor of Adult Education*
Ed.D., Rutgers (Camden)

Mewborn, Denise S., *Assistant Professor of Mathematics Education*
Ph.D., Georgia

Meyer, Henning H. H., *Assistant Professor of Physics and Chemistry*
Ph.D., Georg August University (Gottingen)

Meyer, Judith Lynn, *Research Professor of Ecology and Adjunct Professor of Forest Resources*
Ph.D., Cornell

Middleton, Kent Richards, *Professor of Journalism*
Ph.D., Minnesota

Millard, Larry Wayne, *Professor of Art and Director of the Art Studies Abroad*
M.F.A., Washington University

Miller, Allison P., *Assistant Professor of Clinical and Administrative Sciences*
Pharm.D., Georgia

Miller, Eugene F., *Professor of Political Science*
Ph.D., Chicago

Miller, John A., *Associate Professor of Computer Science*
Ph.D., Georgia Institute of Technology

Miller, Karen S., *Assistant Professor of Advertising/Public Relations*
Ph.D., Wisconsin (Madison)

Miller, Karl Victor, *Associate Professor of Forest Resources*
Ph.D., Georgia

Miller, Lloyd Stephen, *Associate Professor of Psychology*
Ph.D., Mississippi

Miller, Lois K., *Research Professor of Entomology, Microbiology and Genetics*
Ph.D., Wisconsin (Madison)

Miller, R. Baxter, *Professor of English and Director of the Institute for African-American Studies*
Ph.D., Brown

Miller, William P., *Professor of Crop and Soil Sciences*
Ph.D., Virginia Polytechnic Institute

Mills, Harry Arvin, *Professor of Horticulture*
Ph.D., Massachusetts (Amherst)

Mills, W. Fred, *Professor of Music*
B.S., Hartwick

Mims, Charles W., *Professor of Plant Pathology and Adjunct Professor of Botany*
Ph.D., Texas (Austin)

Misra, Joya, *Assistant Professor of Sociology*
Ph.D., Emory

Misztal, Ignacy, *Associate Professor of Animal and Dairy Science*
Ph.D., Polish Academy of Sciences

Mohnen, Debra, *Assistant Professor of Biochemistry and Molecular Biology*
Ph.D., Illinois (Urbana-Champaign)

Mon, Kin Keung, *Associate Professor of Physics*
Ph.D., Cornell

Monahan, Jennifer L., *Assistant Professor of Speech Communication*
Ph.D., Southern California

Moore, Allen Burnell, *Associate Professor of Adult Education*
Ed.D., North Carolina State

Moore, James Neil, *Professor and Department Head of Large Animal Medicine*
D.V.M., California (Davis)

Moran, Mary A., *Assistant Professor of Marine Programs and Adjunct Assistant Professor of Microbiology*
Ph.D., Georgia

Moran, Michael G., *Associate Professor of English*
Ph.D., New Mexico

Morehead, Jere Wade, *Associate Professor of Legal Studies, Adjunct Associate Professor of Law, and Acting Executive Director of Legal Affairs*
J.D., Georgia

Moremen, Kelley W., *Associate Professor of Biochemistry and Molecular Biology*
Ph.D., Vanderbilt

Mori, Masaki, *Associate Professor of Comparative Literature*
Ph.D., Pennsylvania State

Morris, Lawrence A., *Associate Professor of Forest Resources*
Ph.D., Florida

Morris, Libby Vassar, *Associate Professor of Higher Education*
Ph.D., North Carolina (Chapel Hill)

Morrow, John H., Jr., *Franklin Professor of History*
Ph.D., Pennsylvania

Moshi, Lioba, *Associate Professor of Comparative Literature*
Ph.D., California (Los Angeles)

Mote, Thomas L., *Assistant Professor of Geography*
Ph.D., Nebraska (Lincoln)

Munneke, Henry J., *Assistant Professor of Real Estate*
Ph.D., Illinois (Urbana-Champaign)

Murphy, John M., *Associate Professor of Speech Communication*
Ph.D., Kansas

Murray, Thomas F., *Professor and Department Head of Physiology and Pharmacology*
Ph.D., Washington

Murry, Velma McBride, *Associate Professor of Child and Family Development*
Ph.D., Missouri (Columbia)

Myers, Martha Ann, *Professor of Sociology*
Ph.D., Indiana (Bloomington)

Nackerud, Larry G., *Assistant Professor of Social Work*
Ph.D., Cornell

Nagel, James E., *John O. Eidson Distinguished Professor of English*
Ph.D., Pennsylvania State

Nakayama, Kanzo, *Associate Professor of Physics*
Ph.D., Rheinische-Friedrich-Wilhelms (Bonn)

Napier, John David, *Professor of Social Science Education*
Ed.D., Virginia

Naqvi, Nadeem, *Associate Professor of Economics*
Ph.D., Southern Methodist

Narayan, Prema, *Associate Research Scientist in Biochemistry and Molecular Biology,*
Ph.D., Minnesota (Duluth)

Nazarea, Virginia D., *Associate Professor of Anthropology*
Ph.D., Kentucky

Neidle, Ellen L., *Assistant Professor of Microbiology*
Ph.D., Yale

Nelson, Stuart O., *Adjunct Professor of Biological and Agricultural Engineering*
Ph.D., Iowa State

Nesmith, Dennis Scott, *Associate Professor of Horticulture*
Ph.D., Michigan State

Netter, Jeffry Milton, *Associate Professor of Banking and Finance*
Ph.D., Ohio State

Nettles, Victor F., *Professor of Parasitology, Adjunct Professor of Forest Resources, and Director of the Southeast Cooperative Wildlife Disease Study*
Ph.D., Georgia

Neupert, Richard, *Associate Professor of Drama*
Ph.D., Wisconsin (Madison)

Newhoff, Marilyn, *Professor of Communication Sciences and Disorders and Associate Dean of the Graduate School*
Ph.D., Memphis State

Newman, David H., *Associate Professor of Forest Resources and Adjunct Associate Professor of Agricultural and Applied Economics*
Ph.D., Duke

Newton, Melvin Gary, *Professor of Chemistry*
Ph.D., Georgia Institute of Technology

Nichols, David B., *Associate Professor of Environmental Design*
M.L.A., Louisiana State (Baton Rouge)

Nickols, Sharon Y., *Professor of Housing and Consumer Economics and Dean of the College of Family and Consumer Sciences*
Ph.D., Missouri (Columbia)

Nicolai, Ralf Rochus, *Professor and Department Head of Germanic and Slavic Languages*
Ph.D., Kansas

Nielson, Lewis J., *Professor of Music*
Ph.D., Iowa

Nist, Sherrie L., *Professor of Academic Assistance*
Ph.D., Florida

Nix, Walter Robert, *Professor of Art*
Ed.D., Georgia

Noakes, John Edward, *Professor of Geology and Anthropology, Director of Center for Applied Isotope Study, and Adjunct Professor of Marine Programs*
Ph.D., Texas A&M

Noblet, Raymond, *Professor and Department Head of Entomology*
Ph.D., Georgia

Noffke, Gary Lee, *Professor of Art*
M.F.A., Southern Illinois (Carbondale)

Norman, Naomi Jean, *Associate Professor of Classics*
Ph.D., Michigan (Ann Arbor)

Norred, William P., III, *Adjunct Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Georgia

Nowak, Glen Joseph, *Associate Professor of Advertising/Public Relations*
Ph.D., Wisconsin (Madison)

Nozza, Robert J., *Professor of Communication Sciences and Disorders*
Ph.D., Washington

Nute, Donald E., Jr., *Professor and Department Head of Philosophy and Director of the Center for Artificial Intelligence*
Ph.D., Indiana (Bloomington)

Nyman, Andra L., *Associate Professor of Art*
Ed.D., Illinois (Urbana-Champaign)

Nzengung, Valentine A., *Assistant Professor of Geology*
Ph.D., Georgia Institute of Technology

O Connor, Patrick J., *Associate Professor of Exercise Science*
Ph.D., Wisconsin (Madison)

O Toole, Laurence J., Jr., *Professor of Political Science*
Ph.D., Syracuse

Oetting, Ronald Dale, *Professor of Entomology*
Ph.D., Missouri (Columbia)

Oldfather, Penelope, *Associate Professor of Elementary Education*
Ph.D., Claremont

Olejnik, Stephen, *Professor of Educational Psychology*
Ph.D., Michigan State

Olien, Michael David, *Associate Professor of Anthropology*
Ph.D., Oregon

Olive, John, *Associate Professor of Mathematics Education*
Ph.D., Emory

Oliver, J. Steve, *Associate Professor of Science Education*
Ph.D., Georgia

Olsen, Richard James, *Professor of Art*
M.F.A., Wisconsin (Madison)

Orey, Michael A., III, *Associate Professor of Instructional Technology*
Ed.D., Virginia Polytechnic Institute

Orlando, Ronald C., *Assistant Professor of Biochemistry and Molecular Biology and Adjunct Assistant Professor of Chemistry*
Ph.D., Delaware

Orpinas, Pamela K., *Assistant Professor of Health Promotion and Behavior*
Ph.D., Texas Southwestern Medical Center (Dallas)

Ozias-Akins, Peggy, *Associate Professor of Horticulture*
Ph.D., Florida

Padilla, Michael James, *Professor of Science Education*
Ph.D., Michigan State

Paffenhofer, Gustav-Adolf, *Adjunct Associate Professor of Marine Programs*
Ph.D., Just Lieb University of Giessen

Page, Richard Collin, *Professor of Counseling and Human Development*
Ph.D., Florida

Paguio, Ligaya Palang, *Associate Professor of Child and Family Development*
Ed.D., Georgia

Paisley, Pamela O., *Associate Professor of Counseling and Human Development*
Ed.D., North Carolina State

Pajak, Edward F., *Professor of Educational Leadership*
Ph.D., Syracuse

Palevitz, Barry Allan, *Research Professor of Botany*
Ph.D., Wisconsin (Madison)

Pandit, Kavita, *Associate Professor of Geography*
Ph.D., Ohio State

Panetta, Edward M., *Associate Professor of Speech Communication*
Ph.D., Pittsburgh

Pannell, Clifton Wyndham, *Professor of Geography and Associate Dean of the College of Arts and Sciences*
Ph.D., Chicago

Pannell, Sylvia Hillyard, *Professor of Drama and Theatre*
M.F.A., Florida State

Park, Han-Shik, *Professor of Political Science*
Ph.D., Minnesota (Twin Cities)

Park, Timothy A., *Associate Professor of Agricultural and Applied Economics*
Ph.D., California (Davis)

Parker, Albert John, *Professor of Geography*
Ph.D., Wisconsin (Madison)

Parker, Kathleen C., *Professor of Geography*
Ph.D., Wisconsin (Madison)

Parkes, Adam, *Associate Professor of English*
Ph.D., Rochester

Parrott, Roxanne Louise, *Associate Professor of Speech Communication*
Ph.D., Arizona

Parrott, Wayne A., *Associate Professor of Crop and Soil Sciences*
Ph.D., Wisconsin (Madison)

Pate, Priscilla Elizabeth, *Associate Professor of Elementary Education*
Ph.D., Texas A&M

Patino-Douce, Alberto E., *Associate Professor of Geology*
Ph.D., Oregon

Patten, Bernard Clarence, *Regents Professor of Ecology*
Ph.D., Rutgers (New Brunswick)

Paul, William D. Jr., *Professor of Art*
M.F.A., Georgia

Payne, Beverly Dean, *Professor of Elementary Education*
Ed.D., Georgia

Payne, David Allen, *Professor of Educational Psychology and Director of Educational Research Laboratory*
Ph.D., Michigan State

Pellegrini, Anthony D., *Professor of Elementary Education*
Ph.D., Ohio State

Pelletier, S. William, *Alumni Foundation Distinguished Professor and University Professor of Chemistry and Director of the Institute for Natural Products Research*
Ph.D., Cornell

Pendergrass, Jan N., *Associate Professor of Romance Languages*
Ph.D., Tours

Perenich, Theresa A., *Professor of Textiles, Merchandising, and Interiors*
Ph.D., Florida State

Perkins, Warren S., *Senior Research Scientist of Textiles, Merchandising and Interiors*
M.S., Clemson

Perri, Matthew, III, *Professor of Clinical and Administrative Sciences*
Ph.D., South Carolina (Columbia)

Pesti, Gene Michael, *Professor of Poultry Science*
Ph.D., Wisconsin (Madison)

Peters, Charles Rex, *Associate Professor of Anthropology*
Ph.D., California (Los Angeles)

Peterson, Chris J., *Assistant Professor of Botany*
Ph.D., Rutgers (New Brunswick)

Peterson, Thomas E., *Associate Professor of Romance Languages*
Ph.D., Brown

Phelps, Rosemary E., *Associate Professor of Counseling and Human Development*
Ph.D., Tennessee (Knoxville)

Phillips, Layli Dumbleton, *Assistant Professor of Psychology*
Ph.D., Temple

Phillips, Robert Dixon, *Professor of Food Science and Technology*
Ph.D., Auburn

Phillips, Robert Stephen, *Professor of Chemistry*
Ph.D., Georgia Institute of Technology

Pickering, John, *Associate Professor of Ecology*
Ph.D., Harvard

Pierce, James Michael, *Associate Professor of Biochemistry and Molecular Biology*
Ph.D., Johns Hopkins

Pinkert, Carl A., *Adjunct Associate Professor of Physiology and Pharmacology*
Ph.D., Georgia

Piriou, Jean-Pierre Joseph, *Professor of Romance Languages*
Ph.D., Virginia

Platter, Charles L., *Associate Professor of Classics*
Ph.D., North Carolina (Chapel Hill)

Plummer, Paul S., *Assistant Professor of Geography*
Ph.D., Minnesota (Twin Cities)

Pollard, Miranda J., *Associate Professor of History*
Ph.D., University of Dublin, Trinity College

Pomerance, Carl Bernard, *Research Professor of Mathematics*
Ph.D., Harvard

Poon, Leonard W., *Professor of Psychology and Director of the Gerontology Center*
Ph.D., Denver

Porter, David, *Professor of Botany*
Ph.D., Washington (Seattle)

Porter, James W., *Professor of Ecology and Marine Programs*
Ph.D., Yale

Porter, Karen Glaus, *Professor of Ecology and Adjunct Professor of Marine Programs*
Ph.D., Yale

Potter, Walter D., *Associate Professor of Computer Science*
Ph.D., South Carolina (Columbia)

Poulsen, Annette B., *Augustus H. Billy Sterne Chair in Banking and Finance*
Ph.D., Ohio State

Powell, Jack Vaughn, *Associate Professor of Elementary Education*
Ph.D., Florida State

Power, William Larkin, *Associate Professor of Religion*
Ph.D., Emory

Pratt, Lee H., *Research Professor of Botany and Director of The Plant Center*
Ph.D., Oregon State

Pratt, Robert Antonio, *Associate Professor of History*
Ph.D., Virginia

Preissle, Judith, *Professor and Department Head of Social Foundations of Education*
Ed.D., Indiana (Bloomington)

Prestegard, James, *Eminent Scholar in Biochemistry and Molecular Biology*
Ph.D., California Institute of Technology

Preston, Elizabeth, *Associate Professor of Philosophy*
Ph.D., Boston

Price, James Clarence, *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Rhode Island

Price, Robert, *Assistant Professor of Botany*
Ph.D., California (Berkeley)

Price, Sharon J., *Professor of Child and Family Development and Adjunct Professor of Sociology*
Ph.D., Iowa State

Pringle, Catherine M., *Associate Professor of Ecology*
Ph.D., Michigan (Ann Arbor)

Pringle, T. Dean., *Assistant Professor of Animal and Dairy Science*
Ph.D., Nebraska (Lincoln)

Promislow, Daniel E.L., *Assistant Professor of Genetics*
Ph.D., Oxford

Provost, William George, *Associate Professor of English*
Ph.D., North Carolina (Chapel Hill)

Prussia, Stanley Eugene, *Professor of Biological and Agricultural Engineering*
Ph.D., California (Davis)

Przybyla, Alan E., *Professor of Biochemistry and Molecular Biology*
Ph.D. California (Berkeley)

Puett, J. David, *Professor and Department Head of Biochemistry and Molecular Biology*
Ph.D., North Carolina (Chapel Hill)

Pulliam, H. Ronald, *Professor of Ecology*
Ph.D., Duke

Purinton, Paul T., *Professor of Anatomy and Radiology and Acting Associate Dean of the College of Veterinary Medicine*
Ph.D., Minnesota (Twin Cities)

Purvis, Albert C., *Professor of Horticulture*
Ph.D., Illinois (Urbana-Champaign)

Quinlan, Susan Canty, *Associate Professor of Romance Languages*
Ph.D., New Mexico

Quinn, William H., *Professor of Child and Family Development*
Ph.D., Virginia Polytechnic Institute

Radcliffe, David Elliott, *Professor of Crop and Soil Sciences*
Ph.D., Kentucky

Ragland, William L., III, *Professor of Avian Medicine, Pathology and Medical Microbiology*
Ph.D., Washington State

Railsback, Loren Bruce, *Associate Professor of Geology*
Ph.D., Illinois (Urbana-Champaign)

Rainey, Hal Griffin, *Professor of Political Science*
Ph.D., Ohio State

Rampacek, George Bruce, *Professor of Animal and Dairy Science*
Ph.D., North Carolina State

Ramsey, William L., Jr., *Associate Professor of Environmental Design*
M.L.A., Harvard

Randle, William M., *Associate Professor of Horticulture*
Ph.D., Minnesota (Twin Cities)

Randolph, David Mark, *Professor of Music*
D.M.A., Rochester

Ranson, Diana L., *Associate Professor of Romance Languages*
Ph.D., Michigan (Ann Arbor)

Rapp, Carl Allen, *Associate Professor of English*
Ph.D., Johns Hopkins

Raser, Timothy Bell, *Associate Professor of Romance Languages*
Ph.D., Yale

Rasmussen, Todd Christian, *Assistant Professor of Forest Resources*
Ph.D., Arizona

Rathbun, Stephen L., *Associate Professor of Statistics*
Ph.D., Iowa State

Ratnayaka, Shanta, *Professor of Religion*
Ph.D., Northwestern

Rawlings, Clarence Alvin, *Professor and Department Head of Small Animal Medicine*
Ph.D., Wisconsin (Madison)

Reagan, James O., *Adjunct Professor of Animal and Dairy Science*
Ph.D., Texas A&M

Reddy, Srinivas K., *Professor of Marketing and Distributing*
Ph.D., Columbia

Reed, Omer Lee, Jr., *Professor of Legal Studies*
J.D., Chicago

Reeves, Jaxk H., *Associate Professor of Statistics*
Ph.D., California (Berkeley)

Reeves, Thomas C., *Professor of Instructional Technology*
Ph.D., Syracuse

Reid, Leonard Noyd, *Professor of Advertising/Public Relations and Associate Dean of College of Journalism and Mass Communication*
Ph.D., Illinois (Urbana-Champaign)

Reiff, Judith C., *Professor of Elementary Education*
Ed.D., Georgia

Reigle, Thomas George, *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Ohio State

Reinberger, Mark Edward, *Assistant Professor of Environmental Design*
Ph.D., Cornell

Reinert, Robert E., *Professor of Forest Resources*
Ph.D., Michigan (Ann Arbor)

Reinhart, Roland M., *Associate Professor of Germanic and Slavic Languages*
Ph.D., Ohio State

Reinking, David Paul, *Professor and Department Head of Reading Education*
Ph.D., Minnesota (Twin Cities)

Reitz, Elizabeth Jean, *Professor of Anthropology, Adjunct Professor of Geology and Ecology and Director of the Museum of Natural History*
Ph.D., Florida

Resurreccion, Anna V. Agbayani, *Professor of Food Science and Technology*
Ph.D., Georgia

Rhoades, Robert E., *Professor of Anthropology*
Ph.D., Oklahoma (Norman)

Rhodes, Leara D., *Assistant Professor of Journalism*
Ph.D., Temple

Richmond, Farley, *Professor and Department Head of Drama and Theatre*
Ph.D., Michigan State

Rieber, Lloyd P., *Associate Professor of Instructional Technology*
Ph.D., Pennsylvania State

Rieger, Mark W., *Associate Professor of Horticulture*
Ph.D., Florida

Riis, Thomas L., *Adjunct Associate Professor of Music*
Ph.D., Michigan (Ann Arbor)

Riley, David G., *Assistant Professor of Entomology*
Ph.D., Florida

Riley, Joseph Philip, *Professor of Science Education*
Ph.D., Colorado (Boulder)

Riley, Ronald T., *Adjunct Assistant Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Oregon State

Riordan, Christine M., *Assistant Professor of Management*
Ph.D., Georgia State

Ritchie, Branson, W., *Associate Professor of Small Animal Medicine and Medical Microbiology*
Ph.D., Georgia

Rittner, Barbara, *Associate Professor of Social Work*
Ph.D., Barry

Robacker, Carol D., *Associate Professor of Horticulture*
Ph.D., Minnesota (Twin Cities)

Roberts, David Dion, *Professor and Department Head of History*
Ph.D., California (Berkeley)

Roberts, John J., *Adjunct Associate Professor of Crop and Soil Sciences and Plant Pathology*
Ph.D., Purdue

Roberts, Royce E., *Professor and Department Head of Anatomy and Radiology*
D.V.M., Texas A&M

Robinson, Gregory H., *Professor of Chemistry*
Ph.D., Alabama

Robinson, Robert W., *Professor of Computer Science*
Ph.D., Cornell

Roden, Michael F., *Associate Professor of Geology*
Ph.D., Massachusetts Institute of Technology

Rohs, Frederick Richard, *Professor of Agricultural Leadership, Education, and Communication*
Ph.D., Ohio State

Rojek, Dean Gerard, *Associate Professor of Sociology*
Ph.D., Wisconsin (Madison)

Rojewski, Jay W., *Associate Professor of Occupational Studies*
Ph.D., Nebraska (Lincoln)

Roman, Paul M., *Research Professor of Sociology and Director of Center for Research on Deviance and Behavioral Health*
Ph.D., Cornell

Romanek, Christopher S., *Assistant Research Scientist at the Savannah River Ecology Laboratory*
Ph.D., Texas A&M

Rosenbaum, Arthur S., *Professor of Art*
M.F.A., Columbia

Rosenberg, Alexander, *Professor of Philosophy and Director of the Honors Program*
Ph.D., Johns Hopkins

Ross, Kenneth George, *Professor of Entomology*
Ph.D., Cornell

Ross, Sally H., *Associate Professor of Language Education*
Ed.D., Georgia

Rothstein, Mitchell, *Associate Professor of Mathematics*
Ph.D., California (Los Angeles)

Rowland, George N., *Professor of Avian Medicine and Pathology*
Ph.D., Ohio State

Ruberson, John R., *Assistant Professor of Entomology*
Ph.D., Cornell

Rubin, Donald L., *Professor and Department Head of Speech Communication and Professor of Language Education*
Ph.D., Minnesota (Twin Cities)

Ruenitz, Peter Carmichael, *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Kansas

Ruhumbika, Gabriel, *Professor of Comparative Literature*
Ph.D., Paris-Sorbonne

Ruiz-M, Hildebrando, *Associate Professor of Romance Languages*
Ph.D., Indiana (Bloomington)

Rumely, Robert Scott, *Professor of Mathematics*
Ph.D., Princeton

Ruppersburg, Hugh Michael, *Professor of English and Associate Dean of the College of Arts and Sciences*
Ph.D., South Carolina (Columbia)

Ruter, John M., *Associate Professor of Horticulture*
Ph.D., Florida

Ryan, Lori J., *Assistant Professor of Management*
Ph.D., Washington

Sallot, Lynne M., *Assistant Professor of Advertising/Public Relations*
Ph.D., Florida

Saltz, David Zucker, *Assistant Professor of Drama and Theatre*
Ph.D., Stanford

Samdahl, Diane Marie, *Associate Professor of Recreation and Leisure Studies*
Ph.D., Illinois (Urbana-Champaign)

Sander, Jean E., *Associate Professor of Avian Medicine*
D.V.M., Wisconsin (Madison)

Sanders, Joe E., *Associate Professor of Art*
M.F.A., Arizona

Sandor, Edward Paul, Jr., *Professor of Music and Associate Director of the School of Music*
Ph.D., Ohio State

Sapp, William R., *Associate Professor of Art*
M.F.A., Washington University (St. Louis)

Satterwhite, Hilton D., Jr., *Associate Professor of Music*
Ed.D., Alabama

Saupe, Theodore C., *Associate Professor of Art*
M.F.A., Wisconsin (Madison)

Scalise, Joseph J., *Adjunct Assistant Professor of Counseling and Human Development*
Ed.D., Georgia

Schaefer, Henry F., III, *Graham Perdue Professor of Chemistry and Director of Center for Computational Quantum Chemistry*
Ph.D., Stanford

Scheer, Stephen A., *Associate Professor of Art*
M.F.A., Yale

Schell, John W., *Associate Professor of Occupational Studies*
Ph.D., Missouri (Columbia)

Schell, Mark A., *Professor of Microbiology and Plant Pathology*
Ph.D., Cornell

Schempp, Paul G., *Professor of Physical Education and Sport Studies*
Ed.D., Boston

Schiller, David M., *Assistant Professor of Music*
Ph.D., Georgia

Schleyer, Paul Von Rague, *Professor of Chemistry*
Ph.D., Harvard

Schmidt, Deborah, *Associate Professor of English*
Ph.D., Southern California

Schmidt, Gregory W., *Professor of Botany*
Ph.D., State University of New York (Stony Brook)

Schneider, Donald O., *Professor of Social Science Education and Director of the School of Teacher Education*
Ph.D., George Peabody

Schoenbrun, David L., *Associate Professor of History*
Ph.D., California (Los Angeles)

Schroeder, Paul A., *Assistant Professor of Geology*
Ph.D., Yale

Schrum, Lynne M., *Associate Professor of Instructional Technology*
Ph.D., Oregon

Schuttler, Heinz-Bernd, *Professor of Physics*
Ph.D., California (Los Angeles)

Schutz, Paul A. L., *Assistant Professor of Educational Psychology*
Ph.D., Texas (Austin)

Schwanenflugel, Paula J., *Professor of Educational Psychology and Adjunct Professor of Psychology*
Ph.D., Illinois (Urbana-Champaign)

Schwartz, Barry, *Professor of Sociology*
Ph.D., Pennsylvania

Scott, Robert A., *Professor of Chemistry and Biochemistry and Molecular Biology, Department Head of Chemistry and Co-Director of Center for Metalloenzyme Studies*
Ph.D., California Institute of Technology

Seal, Bruce S., *Assistant Professor of Medical Microbiology*
Ph.D., Nevada (Reno)

Seila, Andrew Frederick, *Associate Professor of Management Sciences and Information Technology*
Ph.D., North Carolina (Chapel Hill)

Selcer, Barbara Arnold, *Professor of Anatomy and Radiology*
D.V.M., Purdue

Selgin, George A., *Associate Professor of Economics*
Ph.D., New York

Shaffer, David Reed, *Professor of Psychology*
Ph.D., Kent State

Shamp, Scott A., *Associate Professor of Telecommunications*
Ph.D., Utah

Sharitz, Rebecca Reyburn, *Professor of Botany and Senior Research Scientist in Ecology*
Ph.D., North Carolina (Chapel Hill)

Sharma, Raghubir P., *Fred C. Davison Professor of Veterinary Medicine*
Ph.D., Minnesota (Twin Cities)

Shaw, James Scott, *Professor of Astronomy*
Ph.D., Pennsylvania

Shedd, Peter Jay, *Professor of Legal Studies*
J.D., Georgia

Shelton, Gladys G., *Associate Professor of Housing and Consumer Economics*
Ph.D., Virginia Polytechnic Institute

Sherman, Barry Louis, *Lambdin Kay Professor of Peabody Awards and Director of the Peabody Awards Program*
Ph.D., Pennsylvania State

Sherwood, John L., *Professor and Department Head of Plant Pathology*
Ph.D., Wisconsin (Madison)

Sheth, Amit P., *Associate Professor of Computer Science*
Ph.D., Ohio State

Shewfelt, Robert Lorne, *Professor of Food Science and Technology*
Ph.D., Massachusetts (Amherst)

Shifrin, Theodore, *Professor of Mathematics*
Ph.D., California (Berkeley)

Shimkets, Lawrence J., Jr., *Professor and Department Head of Microbiology*
Ph.D., Minnesota (Twin Cities)

Shiver, Barry Dexter, *Associate Professor of Forest Resources*
Ph.D., Mississippi State

Shockley, Randolph Andrew, *Associate Professor of Accounting*
Ph.D., North Carolina (Chapel Hill)

Shuman, Larry Myers, *Professor of Crop and Soil Sciences*
Ph.D., Pennsylvania State

Simon, Bryant, *Assistant Professor of History*
Ph.D., North Carolina (Chapel Hill)

Simon, Janice, *Associate Professor of Art*
Ph.D., Michigan (Ann Arbor)

Simpson, Kathy J., *Associate Professor of Exercise Science*
Ph.D., Oregon

Simpson, Michele L., *Professor of Academic Assistance*
Ed.D., Arizona State

Simpson, Ronald D., *Professor of Science Education and Higher Education*
Ed.D., Georgia

Sinkey, Joseph F., Jr., *Ed W. Hiles Professor of Finance*
Ph.D., Boston College

Skeen, Patsy Louise, *Professor and Department Head of Child and Family Development*
Ed.D., Georgia

Slater, Thomas B., *Assistant Professor of Religion*
Ph.D., Kings College

Sluder, Ann E., *Assistant Professor of Cellular Biology and Adjunct Assistant Professor of Genetics*
Ph.D., Duke

Smalley, Timothy J., *Associate Professor of Horticulture*
Ph.D., Georgia

Smith, Albert Ernest, Jr., *Professor and Depart*ment Head of Crop and Soil Sciences
Ph.D., Texas A&M

Smith, Clifton L., *Professor of Occupational Studies*
Ed.D., Virginia Polytechnic Institute

Smith, Jeffrey W., *Associate Professor of Computer Science*
Ph.D., North Carolina State

Smith, Mary Alice, *Assistant Professor of Food Science and Technology and Assistant Professor of Pharmacology and Toxicology*
Ph.D., Arkansas

Smith, Matthew C., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Florida

Smith, Michael Howard, *Professor of Ecology, Director and Senior Research Scientist at the Savannah River Ecology Laboratory*
Ph.D., Florida

Smith, Roy Campbell, *Professor of Mathematics*
Ph.D., Utah

Smith, Winston Paul, *Adjunct Associate Professor of Forest Resources*
Ph.D., Oregon State

Snow, Arthur, *Associate Professor of Economics*
Ph.D., Wisconsin (Madison)

Spariosu, Mihai Ivliv, *Research Professor of Comparative Literature*
Ph.D., Stanford

Sparks, Darrell, *Professor and Interim Department Head of Horticulture*
Ph.D., Michigan State

Spence, Sarah, *Professor of Classics*
Ph.D., Columbia

Spindler, Katherine R., *Associate Professor of Genetics*
Ph.D., California (San Diego)

Squires, William T., Jr., *Associate Professor of Art*
Ph.D., Florida State

Sriram, Tharuvai N., *Associate Professor of Statistics*
Ph.D., Michigan State

St. Pierre, Elizabeth A., *Assistant Professor of Language Education*
Ph.D., Ohio State

Stahl, Steven A., *Professor of Reading Education*
Ed.D., Harvard

Stallknecht, David E., *Assistant Research Scientist of Parasitology*
Ph.D., Louisiana State (Baton Rouge)

Stam, Antonie, *Professor of Management*
Ph.D., Kansas

Stanic, George M.A., *Associate Professor of Elementary Education*
Ph.D., Wisconsin (Madison)

Stanulis, Randi N., *Assistant Professor of Elementary Education*
Ph.D., Michigan State

Starkweather, David Amsden, *Associate Professor of Music*
D.M.A., State University of New York (Stony Brook)

Stavropoulos, Carol Susann, *Assistant Professor of Art*
Ph.D., Ohio State

Steffe, Leslie P., *Research Professor of Mathematics Education*
Ph.D., Wisconsin (Madison)

Steffens, Walstine L., III, *Associate Research Scientist of Pathology*
Ph.D., Louisiana State (Baton Rouge)

Steinbeck, Klaus, *Professor of Forest Resources*
Ph.D., Michigan State

Steiner, Jean L., *Adjunct Senior Research Scientist of Crop and Soil Sciences*
Ph.D., Kansas State

Stephenson, Frederick James, Jr., *Associate Professor of Marketing and Distribution*
Ph.D., Minnesota (Twin Cities)

Stern, Norman J., *Adjunct Professor of Food Science and Technology*
Ph.D., Virginia Polytechnical Institute

Steuer, Ralph E., *Charles S. Sanford, Sr. Professor of Business*
Ph.D., North Carolina (Chapel Hill)

Stevenson, Katherine L., *Assistant Professor of Plant Pathology*
Ph.D., Cornell

Stewart, James Thomas, *Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Michigan (Ann Arbor)

Stickney, John L., *Professor of Chemistry*
Ph.D., California (Santa Barbara)

Stitt-Gohdes, Wanda L., *Associate Professor of Occupational Studies*
Ed.D., Georgia

Stoffel, David N., *Associate Professor of Music*
D.M.A., Ohio State

Stokes, Garnett S., *Professor of Psychology*
Ph.D., Georgia

Stoneman, Zolinda, *Professor of Child and Family Development and Director of University Affiliated Programs*
Ph.D., George Peabody

Stout, Candace J., *Associate Professor of Art*
Ph.D., Missouri (Columbia)

Streer, Paul Joseph, *Professor of Accounting*
Ph.D., Illinois (Urbana-Champaign)

Strobel, George Lewis, *Associate Professor of Physics*
Ph.D., Southern California

Stueck, William W., Jr., *Professor of History*
Ph.D., Brown

Summers, Anne O Neill, *Research Professor of Microbiology*
Ph.D., Washington University (St. Louis)

Sumner, Donald Ray, *Professor of Plant Pathology*
Ph.D., Nebraska (Lincoln)

Sumner, Malcolm Edward, *Regents Professor of Crop and Soil Sciences*
D.Phil., Oxford

Swagler, Roger M., *Associate Professor of Housing and Consumer Economics*
Ph.D., Ohio State

Swan, William W., *Associate Professor of Educational Leadership*
Ed.D., Georgia

Swank, Wayne T., *Adjunct Professor of Botany*
Ph.D., Washington

Swanson, Ruthann B., *Assistant Professor of Foods and Nutrition*
Ph.D., Tennessee (Knoxville)

Swanson, Samuel E., *Professor and Department Head of Geology*
Ph.D., Stanford

Swayne, David E., *Adjunct Associate Professor of Pathology*
Ph.D., Georgia

Sweaney, Anne Landoy, *Professor and Acting Department Head of Housing and Consumer Economics*
Ph.D., Alabama

Tackett, Randall L., *Professor of Clinical and Administrative Sciences*
Ph.D., Georgia

Taha, Thiab Rashed M., *Professor of Computer Science*
Ph.D., Clarkson

Talarico, Susette, *Professor of Political Science*
Ph.D., Connecticut

Tallman, Julie I. L., *Associate Professor of Instructional Technology*
Ph.D., Pittsburgh

Tanner, C. Kenneth, *Professor of Educational Leadership*
Ed.D., Florida State

Tarleton, Rick L., *Professor of Cellular Biology*
Ph.D., Wake Forest

Tarrant, Michael A., *Assistant Professor of Recreation and Leisure Studies and Adjunct Assistant Professor of Forest Resources*
Ph.D., Colorado State

Taxel, Joel A., *Professor of Language Education*
Ph.D., Wisconsin (Madison)

Taylor, Barbara Elise, *Associate Research Scientist of Ecology*
Ph.D., Washington

Taylor, Ethan W., *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Arizona

Taylor, Robert Lee, *Professor and Department Head of Statistics*
Ph.D., Florida State

Teague, Frances Nicol, *Professor of English*
Ph.D., Texas (Austin)

Terry, Alvin V., *Assistant Professor of Clinical and Administrative Sciences*
Ph.D., South Carolina (Columbia)

Teskey, Robert O Neal, *Professor of Forest Resources*
Ph.D., Washington

Tesser, Abraham, *Research Professor of Psychology*
Ph.D., Purdue

Tesser, Carmen Chaves, *Professor of Romance Languages*
Ph.D., Mississippi State

Thai, Chi N., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., California (Davis)

Thayer, Stephan Graham, *Senior Public Service Associate in Avian Medicine*
Ph.D., Georgia

Thomas, Adrian Wesley, *Adjunct Assistant Professor of Biological and Agricultural Engineering*
Ph.D., Colorado State

Thomas, Daniel Lanair, *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Purdue

Thomas, Emory Morton, *Regents Professor of History*
Ph.D., Rice

Thomas, Kecia M., *Assistant Professor of Psychology*
Ph.D., Pennsylvania State

Thomas, Martha Lynn, *Associate Professor of Music*
D.M.A., Texas (Austin)

Thomas, Paul A., *Associate Professor of Horticulture*
Ph.D., Pennsylvania State

Thomas, Roger Kemp, Jr., *Professor of Psychology and Director of Franklin College Outreach Program*
Ph.D., Georgia

Thompson, Frederick N., Jr., *Professor of Physiology and Pharmacology*
Ph.D., Iowa State

Thompson, Sidney Alan, *Professor of Biological and Agricultural Engineering*
Ph.D., Kentucky

Thomson, Norman Frederic, *Assistant Professor of Science Education*
Ph.D., Wisconsin (Madison)

Threadgill, Ernest Dale, *Professor and Department Head of Biological and Agricultural Engineering*
Ph.D., Auburn

Timberlake, William E., *Adjunct Professor of Genetics and Plant Pathology*
Ph.D., Syracuse

Tinkham, Spencer Felton, *Professor of Advertising/Public Relations*
Ph.D., Illinois (Urbana-Champaign)

Tippins, Deborah J., *Associate Professor of Elementary Education*
Ph.D., Texas A&M

Todd, Christine, *Associate Professor of Child and Family Development and Associate Dean of the College of Family and Consumer Sciences*
Ph.D., Minnesota (Twin Cities)

Toledo, Romeo T., *Professor of Food Science and Technology*
Ph.D., Illinois (Urbana-Champaign)

Tollner, Ernest William, *Professor of Biological and Agricultural Engineering*
Ph.D., Auburn

Travis, James, *Research Professor of Biochemistry and Molecular Biology*
Ph.D., Minnesota (Twin Cities)

Trieschmann, James Shipp, *Dudley L. Moore, Jr. Professor of Insurance and Associate Dean of the Terry College of Business*
D.B.A., Indiana University (Bloomington)

Tsang, Victor C.W., *Adjunct Professor of Parasitology and Cellular Biology*
Ph.D., Georgia

Turbak, Albin F., *Adjunct Professor of Textiles, Merchandising and Interiors*
Ph.D., Georgia Institute of Technology

Turner, Steven C., *Associate Professor of Agricultural and Applied Economics*
Ph.D., Virginia Polytechnic Institute

Ujhelyi, Michael R., *Associate Professor of Clinical and Administrative Sciences*
Pharm.D., North Carolina (Chapel Hill)

Usery, Eddy Lynn, *Associate Professor of Geography*
Ph.D., Georgia

Vail, Cynthia O., *Associate Professor of Special Education*
Ph.D., Florida State

Valentine, Thomas, *Associate Professor of Adult Education*
Ed.D., Rutgers (New Brunswick)

Van Kleeck, Anne, *Professor and Department Head of Communication Sciences and Disorders*
Ph.D., Washington

Van Den Avyle, Michael J., *Adjunct Professor of Forest Resources*
Ph.D., Texas A&M

Van Keuren, Frances Dodds, *Professor of Art*
Ph.D., Brown

Van Sickle, Ronald Lee, *Professor and Department Head of Social Science Education*
Ed.D., Indiana (Bloomington)

Van Wicklen, Garrett L., *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Cornell

Vance, John A., *Professor of English*
Ph.D., Florida State

Vandenberg, Robert J., *Associate Professor of Management*
Ph.D., Georgia

Varley, Robert, Jr., *Professor of Mathematics*
Ph.D., North Carolina (Chapel Hill)

Vellidis, George, *Associate Professor of Biological and Agricultural Engineering*
Ph.D., Florida

Vencill, William K., *Associate Professor of Crop and Soil Sciences*
Ph.D., Virginia Polytechnic Institute

Verbrugge, James Arnold, *Georgia Bankers Association Professor and Department Head of Banking and Finance*
Ph.D., Kentucky

Verity, Peter G., *Adjunct Assistant Research Scientist of Ecology and Adjunct Associate Professor of Marine Programs*
Ph.D., Rhode Island

Verma, Brahm Prakash, *Professor of Biological and Agricultural Engineering*
Ph.D., Auburn

Villegas, Pedro, *Professor of Avian Medicine and Medical Microbiology*
Ph.D., Georgia

Vogel, Roger Craig, *Professor of Music*
Ph.D., Ohio State

Wade, William E., *Associate Professor of Clinical and Administrative Sciences*
Pharm.D., Georgia

Walker, Sally E., *Assistant Professor of Geology*
Ph.D., California (Berkeley)

Wallace, James Bruce, *Professor of Entomology*
Ph.D., Virginia Polytechnic Institute

Wallinga, Charlotte Rae, *Associate Professor of Child and Family Development*
Ph.D., Iowa State

Waln, Ronald Lee, *Professor of Music*
Ph.D., Iowa

Walters, Lynda Henley, *Professor of Child and Family Development*
Ph.D., Georgia

Walz, Joel Chandler, *Professor of Romance Languages*
Ph.D., Indiana (Bloomington)

Wampler, John Edward, *Professor of Biochemistry and Molecular Biology*
Ph.D., Tennessee (Knoxville)

Wang, Bi-Cheng, *Eminent Scholar in Biochemistry and Molecular Biology*
Ph.D., Arkansas (Little Rock)

Ware, Glenn Oren, *Professor of Forest Resources*
Ph.D., Georgia

Warren, Carl Stephen, *Professor of Accounting*
Ph.D., Michigan State

Warren, Robert Joe, *Professor of Forest Resources*
Ph.D., Virginia Polytechnic Institute

Warren, Ronald St. Clair, Jr., *Associate Professor of Economics*
Ph.D., North Carolina (Chapel Hill)

Washburn, Kenneth Wayne, *Professor of Poultry Science*
Ph.D., Massachusetts (Amherst)

Waters, John C., *Associate Professor of Environmental Design*
M.L.A., Georgia

Watkins, Karen E., *Professor of Adult Education*
Ph.D., Texas (Austin)

Watson, Hugh J., *C. Herman and Mary Virginia Terry Distinguished Professor of Business Administration*
D.B.A., Florida State

Watson, Richard Thomas, *Associate Professor of Management*
Ph.D., Minnesota (Twin Cities)

Weinberg, Scott S., *Professor of Environmental Design*
M.L.A., Iowa State

Welch, Roy Allen, *Research Professor of Geography, Director of the Center for Remote Sensing and Mapping and Adjunct Professor of Marine Programs and Ecology*
Ph.D., Glasgow

Weller, L. David, *Associate Professor of Educational Leadership*
Ph.D., Iowa State

Wenner, David Bruce, *Associate Professor and Associate Research Scientist of Geology*
Ph.D., California Institute of Technology

Wenston, Paul R., *Associate Professor of Mathematics*
Ph.D., Carnegie-Mellon

Wessler, Susan R., *Research Professor of Botany and Genetics*
Ph.D., Cornell

West, Joe Williamson, *Professor of Animal and Dairy Science*
Ph.D., Texas A&M

West, Larry Thomas, *Associate Professor of Crop and Soil Sciences*
Ph.D., Texas A&M

Westmacott, Richard N., *Professor of Environmental Design*
M.L.A., Pennsylvania

Westpheling, Janet, *Associate Professor of Genetics*
Ph.D., John Innes Institute

Wetzstein, Hazel Jean Young, *Professor of Horticulture and Adjunct Professor of Forest Resources*
Ph.D., California (Davis)

Wetzstein, Michael E., *Professor of Agricultural and Applied Economics*
Ph.D., California (Davis)

Wheeler, James Orton, *Merle Prunty Professor of Geography*
Ph.D., Indiana (Bloomington)

Whigham, Thomas L., *Associate Professor of History*
Ph.D., Stanford

White, Catherine A., *Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Washington

White, Donald H., *Adjunct Associate Professor of Forest Resources*
Ph.D., Arkansas

White, Freddie Cad, *D. W. Brooks Distinguished Professor and Acting Department Head of Agricultural and Applied Economics*
Ph.D., Oklahoma State

White, Lawrence H., *Associate Professor of Economics*
Ph.D., California (Los Angeles)

Whitman, William B., *Professor of Microbiology and Biochemistry and Molecular Biology*
Ph.D., Texas (Austin)

Whitney, James Arthur, *Professor of Geology*
Ph.D., Stanford

Whitten, Betty J., *Professor of Management Sciences and Information Technology*
Ph.D., Georgia

Whorton, Joseph W., Jr., *Associate Professor of Political Science*
D.P.A., State University of New York (Albany)

Wicker, Louise, *Associate Professor of Food Science and Technology*
Ph.D., North Carolina State

Wicklein, Robert Carl, *Associate Professor of Occupational Studies*
Ed.D., Virginia Polytechnic Institute

Wiebe, William John, *Professor of Marine Programs*
Ph.D., Washington

Wiegel, Jurgen K. W., *Professor of Microbiology and Biochemistry and Molecular Biology*
Ph.D., Georg August (Gîttingen)

Wiegert, Richard George, *Professor of Ecology and Marine Programs*
Ph.D., Michigan (Ann Arbor)

Williams, Anne, *Professor and Department Head of English*
Ph.D., Cornell

Williams, David Salter, *General Sandy Beaver Teaching Associate Professor of Religion*
Ph.D., Hebrew Union College

Williams, Phillip L., *Associate Professor of Food Science and Technology and Adjunct Associate Professor of Pharmaceutical and Biomedical Sciences*
Ph.D., Georgia Institute of Technology

Williams, Scott E., *Associate Professor of Animal and Dairy Science and Adjunct Associate Professor of Food Science and Technology*
Ph.D., Colorado State

Williamson, Gail M., *Associate Professor of Psychology*
Ph.D., Carnegie-Mellon

Willis, John S., *Professor of Cellular Biology, Ecology, and Physiology and Pharmacology*
Ph.D., Harvard

Willis, Judith H., *Professor of Cellular Biology and Adjunct Professor of Entomology*
Ph.D., Harvard

Wilson, David M., *Professor of Plant Pathology*
Ph.D., Colorado State

Wilson, James W., *Professor of Mathematics Education*
Ph.D., Stanford

Wilson, Jeanna L., *Associate Professor of Poultry Science*
Ph.D., Auburn

Wilson, Jeffrey Paul, *Adjunct Research Scientist of Plant Pathology*
Ph.D., Purdue

Wilson, Katharina Margit, *Professor of Comparative Literature*
Ph.D., Illinois (Urbana-Champaign)

Wilson, Mark G., *Associate Professor of Health Promotion and Behavior*
H.S.D., Indiana (Bloomington)

Wilson, Patricia S., *Associate Professor of Mathematics Education*
Ph.D., Ohio State

Winfield, Richard Dien, *Professor of Philosophy*
Ph.D., Yale

Winger, Parley V., *Adjunct Associate Professor of Forest Resources*
Ph.D., Brigham Young

Winship, Michael P., *Associate Professor of History*
Ph.D., Cornell

Winston, Roger Bradley, Jr., *Professor of Counseling and Human Development*
Ph.D., Georgia

Wiseman, Billy Ray, *Adjunct Assistant Professor of Entomology*
Ph.D., Kansas State

Wisenbaker, Joseph M., *Associate Professor of Educational Psychology*
Ph.D., Michigan State

Wolf, John William Clark, *Assistant Professor of Philosophy*
Ph.D., Arizona

Womble, Myra N., *Assistant Professor of Occupational Studies*
Ed.D., North Carolina State

Wong, Kam-Ming, *Associate Professor of Comparative Literature*
Ph.D., Cornell

Wood, Bruce W., *Adjunct Associate Professor of Horticulture*
Ph.D., Michigan State

Wood, Carolyn H., *Adjunct Assistant Professor of Art*
Ph.D., North Carolina (Chapel Hill)

Wood, Robert Manning, *Professor of Physics*
Ph.D., Wisconsin (Madison)

Woods, Robert J., *Assistant Professor of Biochemistry and Molecular Biology*
Ph.D., Queens (Kingston)

Wooley, Richard Earl, *Professor and Department Head of Medical Microbiology*
Ph.D., Georgia

Wraga, William G., *Assistant Professor of Educational Leadership*
Ed.D., Rutgers (New Brunswick)

Wright, J. Thomas, *Adjunct Assistant Professor of Foods and Nutrition*
Ph.D., Emory

Wyatt, Robert Edward, *Professor of Ecology*
Ph.D., Duke

Wyatt, Roger Dale, *Professor of Poultry Science and Adjunct Research Scientist in the Center for Applied Isotope Study*
Ph.D., North Carolina State

Wyld, Sandra J., *Assistant Professor of Geology*
Ph.D., Stanford

Yang, Charles Q., *Professor of Textiles, Merchandising and Interiors*
Ph.D., Kansas State

Yen, William Mao-Shung, *Graham Perdue Professor of Physics*
Ph.D., Washington University (St. Louis)

Young, Louis L., *Adjunct Research Scientist of Animal and Dairy Science*
Ph.D., Texas A&M

Youngman, Philip, *Adjunct Associate Professor of Genetics*
Ph.D., Massachusetts Institute of Technology

Zeichner, Amos, *Professor of Psychology*
Ph.D., McGill

Zhang, Guo Qiang, *Associate Professor of Computer Science*
Ph.D., Cambridge

Zhang, Qing, *Associate Professor of Mathematics*
Ph.D., Brown

Zimdars, Richard L., *Professor of Music*
D.M.A., Iowa

Zimmer, Mary Ruth, *Associate Professor of Marketing and Distribution*
Ph.D., Texas (Austin)

Zinkhan, George M., *Coca-Cola Professor of Marketing and Chair of the Department of Marketing and Distribution*
Ph.D., Michigan

The UGA Undergraduate Bulletin 1999-2000

The University of Georgia: A Unit of the University System of Georgia

Volume XCVI
January 1999

Pursuant to directives of the President of this institution, the University of Georgia continues its affirmative implementation of equal opportunity to employees, students, covered contractors and vendors, and applicants for employment, admission, or contractor/vendor status. The University of Georgia will act in matters of employment, admissions, programs, and services free of prohibited bias with regard to race, creed, color, sex, national origin, religion, age, veteran status, or disability. Further, the University of Georgia will not maintain racially segregated facilities.

Continuation of the above policies is consistent with applicable provisions of the Civil Rights Act of 1964, the Education Amendments of 1972, Executive Order 11246, Revised Order 4, the Vietnam Era Veterans Readjustment Act of 1974, the Rehabilitation Act of 1973, and The Americans with Disabilities Act of 1990, as revised and/or amended, with implementing regulations. Accordingly, this institution will not discriminate in employment, admissions, programs, or services with regard to any position for which the applicant, employee, or student is qualified and will make reasonable accommodation for physical and mental limitations.

The Affirmative Action Plan implementing the above body of law, regulation, and policy is administered by Claude-Leonard Davis, Director of the UGA Equal Opportunity Office at 3 Peabody Hall, Athens, Georgia 30602-1622. Telephone inquiries concerning this Plan may be directed to (706) 542-7912. Copies of this Plan are available for inspection in the Equal Opportunity Office and in the UGA Main Library during normal weekday working hours.

This is an unofficial publication of the University of Georgia. The official publication for academic matters of the University of Georgia is the *University of Georgia Bulletin*. It appears on the World Wide Web at URL <http://www.bulletin.uga.edu>.

The statements set forth in this *Bulletin* are for informational purposes only and should not be construed as the basis of a contract between a student and the institution. While the provisions of this *Bulletin* will ordinarily be applied as stated, the University of Georgia reserves the right to change any provision listed in this *Bulletin* including, but not limited to, academic requirements for graduation, without actual notice to individual students. Every effort will be made to keep students advised of any such changes. Information on changes will be available in the Curriculum Management Office of the Senior Vice President for Academic Affairs and Provost, Old College, Room 203. It is especially important that each student note that it is his/her responsibility to keep himself/herself apprised of current graduation requirements for his/her particular degree program.

Commencement	May 13, Sa

This Calendar is correct as of the date of this publication, but may be subject to change during the next year. Please refer to the *Schedule of Classes* and/or other special announcements that may be forthcoming.

The University System of Georgia

The University System of Georgia includes 34 state-sponsored public institutions located throughout Georgia—19 universities and 15 two-year colleges.

A 16-member constitutional Board of Regents—one from each of the state's 11 Congressional Districts and five from the state-at-large—governs the University System which was established in 1931. Board members are appointed by the Governor, subject to state senate confirmation, for seven-year terms. The Chairperson, the Vice Chairperson, and other officers of the Board are elected by its membership. The Chancellor, who is not a Board member, is the chief executive officer of the Board and chief administrative officer of the University System.

The overall programs and services of the University System are offered through three major components: Instruction; Public Service/Continuing Education; Research.

Board of Regents' policies for government, management and control of the University System and the Chancellor's administrative actions provide institutions a high degree of autonomy. The President is the executive head of each institution and is recommended by the Chancellor and appointed by the Board.

The University System Advisory Council, with 34 committees, engenders continual dialogue on major academic and administrative matters and makes recommendations to the Chancellor, who transmits them to the Board as appropriate, regarding academic and administrative operations in the System. The Council consists of the Chancellor, the Vice Chancellor, and all Presidents as voting members. It includes other officials of institutions as nonvoting members. The Council's 21 academic and 13 administrative committees are composed of institutional representatives, typically one from each unit, and deal with matters of System-wide application.

Matriculation fees and nonresident tuition fees for students at all institutions are established by the Board of Regents. All students pay matriculation fees while out-of-state students pay nonresident tuition in addition. Other fees for student services and activities are established by institutions, subject to Board of Regents' approval. Non-mandatory fees established by institutions are subject to approval of the Board of Regents office.

POLICE

University Profile

History

When the University of Georgia was incorporated by an act of the General Assembly on January 27, 1785, Georgia became the first state to charter a state-supported university. In 1784 the General Assembly had set aside 40,000 acres of land to endow a college or seminary of learning.

At the first meeting of the board of trustees, held in Augusta on February 13, 1786, Abraham Baldwin was selected president of the University. Baldwin, a native of Connecticut and a graduate of Yale University who had come to Georgia in 1784, drafted the charter adopted by the General Assembly.

The University was actually established in 1801 when a committee of the board of trustees selected a land site. John Milledge, later a governor of the state, purchased and gave to the board of trustees the chosen tract of 633 acres on the banks of the Oconee River in northeast Georgia.

Josiah Meigs was named president of the University and work was begun on the first building, originally called Franklin College in honor of Benjamin Franklin and now known as Old College. The University graduated its first class in 1804.

The curriculum of traditional classical studies was broadened in 1843 to include courses in law, and again in 1872 when the University received federal funds for instruction in agriculture and mechanical arts.

Thirteen schools and colleges, with auxiliary divisions, carry on the University's programs of teaching, research and service. These colleges and schools and the dates of their establishment as separate administrative units are: Franklin College of Arts and Sciences, 1801; College of Agricultural and Environmental Sciences, 1859; School of Law, 1859; College of Pharmacy, 1903; D. B.Warnell School of Forest Resources, 1906; College of Education, 1908; Graduate School, 1910; C. Herman and Mary Virginia Terry College of Business, 1912; Henry W. Grady College of Journalism and Mass Communication, 1915; College of Family and Consumer Sciences, 1933; College of Veterinary Medicine, 1946; School of Social Work, 1964; School of Environmental Design, 1969. The Division of General Extension, now the Georgia Center for Continuing Education, was incorporated into the University in 1947.

In 1931 the General Assembly of Georgia placed all state-supported institutions of higher education, including the University of Georgia, under the jurisdiction of a single board. This organization, known as the University System of Georgia, is governed by the Board of Regents. The Board of Regents' executive officer, the chancellor, exercises a general supervisory control over all institutions of the University System, with each institution having its own executive officers and faculty.

Mission

The University of Georgia, a land-grant and sea-grant university with state-wide commitments and responsibilities, is the state's oldest, most comprehensive, and most diversified institution of higher education. Its motto, "to teach, to serve, and to inquire into the nature of things," reflects the University's integral and unique role in the conservation and enhancement of the state's and nation's intellectual, cultural, and environmental heritage.

The University of Georgia shares with the other research universities of the University System of Georgia the following core characteristics:

1. a statewide responsibility and commitment to excellence and academic achievements having national and international recognition;
2. a commitment to excellence in a teaching/learning environment dedicated to serve a diverse and well-prepared student body, to promote high levels of student achievement, and to provide appropriate academic support services;
3. a commitment to excellence in research, scholarship, and creative endeavors that are focused on organized programs to create, maintain, and apply new knowledge and theories; that promote instructional quality and effectiveness; and that enhance institutionally relevant faculty qualifications;
4. a commitment to excellence in public service, economic development, and technical assistance activities designed to address the strategic needs of the State of Georgia along with a comprehensive offering of continuing education designed to meet the needs of Georgia's citizens in life-long learning and professional education;
5. a wide range of academic and professional programming at the baccalaureate, master's, and doctoral levels.

With its statewide mission and core characteristics, the University of Georgia endeavors to prepare the University community and the state for full participation in the global society of the twenty-first century. Through its programs and practices, it seeks to foster the understanding of and respect for cultural differences necessary for an enlightened and educated citizenry. It further provides for cultural, ethnic, gender, and racial diversity in the faculty, staff, and student body. The University is committed to preparing the University community to appreciate the critical importance of a quality environment to an interdependent global society.

As a comprehensive land-grant and sea-grant institution, the University of Georgia offers baccalaureate, master's, doctoral and professional degrees in the arts, humanities, social sciences, biological sciences, physical sciences, agricultural and environmental sciences, business, environmental design, family and consumer sciences, forest resources, journalism and mass communication, education, law, pharmacy, social work, and veterinary medicine.

The University attracts students nationally and internationally as well as from within Georgia. It offers the state's broadest array of possibilities in graduate and professional education, and thus a large minority of the student body is post-baccalaureate. The predominantly Georgian undergraduate student body is a mix of highly qualified students originally admitted as freshmen and selected transfer students principally from other University System institutions.

With original scholarship, basic and applied research, and creative activities constituting an essential core from which to draw, the impact of the land-grant and sea-grant mission is reflected throughout the state. Cooperative extension, continuing education, public service, experiment stations, and technology transfer are all designed to enhance the well-being of the citizens of Georgia through their roles in economic, social, and community development.

As it has been historically, the University of Georgia is responsive to the evolution of

the state's educational, social, and economic needs. It aspires through its strategic planning to even closer contact and interaction with public and private institutions throughout the state as well as with the citizens it serves.

Accreditation

The University of Georgia is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award Associate, Bachelor's, Master's, and Doctor's degrees. In addition, a number of the University's 13 colleges and schools are further accredited by appropriate educational associations.

Graduation Rate

Pursuant to Public Law 101-542, the Student Right to Know and Campus Security Act, the six year graduation rate for all students who enrolled at the University as first-time, full-time, baccalaureate degree-seeking students in the freshmen class of 1991 was 62 percent. The rate for male students was 60 percent; the rate for female students was 63 percent.

The Campus

The University sweeps across Athens' famed hills, covering approximately 4,300 acres within Clarke County.

Traditional North Campus is the home of the colleges of Arts and Sciences, Business Administration, and Journalism and Mass Communication, and the schools of Environmental Design and Law, as well as the Main Library. Noteworthy buildings on North Campus are Old College (1801), New College (1823), Demosthenian Hall (1824), the University Chapel (1832), and Phi Kappa Hall (1834). The Ladies' Garden Club Founders Memorial Garden enhances the area near Denmark Hall. South Campus, with an array of modern structures, has grown southward as the University continues to expand. Buildings include the Boyd Graduate Studies Research Center, colleges of Agricultural and Environmental Sciences, Family and Consumer Sciences, Veterinary Medicine, Education, and Pharmacy, and the schools of Forest Resources and Social Work, as well as the Georgia Center for Continuing Education, Stegeman Coliseum, and Butts-Mehre Heritage Hall.

State funds complemented by liberal private gifts, grants from foundations, and federal grants continue to increase the building program on campus. Buildings recently completed include the Life Sciences Building, which provides state-of-the-art facilities and equipment for biotechnology research and teaching; the Ramsey Student Center for Physical Activities, which provides a comprehensive fitness/exercise facility for students and faculty; and the Performing and Visual Arts Complex, which provides a home for the University's schools of art and music as well as the Georgia Museum of Art.

Athens

Georgia's "Classic City," Athens is a prospering community, one that reflects the charm of the Old South while developing in cultural and industrial areas.

A college town in every sense of the word, Athens appreciates its University population while recognizing its obligation to all residents to grow independently of the University.

The Clarke County population, according to a 1990 census estimate, is approximately 86,000. Athens' elevation is 600 to 800 feet above mean sea level, and because of its geographic location, the city is sheltered from much of the extreme weather of the winter season. Mean temperature for January, the coldest month, is 43°F., and for July, the warmest month, 79°F. Average minimum and maximum temperatures for January are 33° and 53°F., and for July, 68° and 89°F. Average rainfall is 50.42 inches.

Athens is served by two daily newspapers and an independent student newspaper, *The Red and Black*. Athens also has a weekly newspaper and the Atlanta newspapers, as well as eight local radio stations and the University's radio stations, WUOG-FM and WUGA-FM.

Network television is available through direct reception or cable within a 100-mile radius of Athens.

Two hospitals offering comprehensive health care serve Athens, and there are more than 80 churches in the area.

Admission

General Requirements

Each applicant's record should reflect promise of growth, seriousness of purpose, and a sense of responsibility. The University seeks to enroll students with superior academic credentials and strong personal character who will positively contribute to the diverse and rich cultural environment of campus life.

The University reserves the right to admit only those applicants whose records indicate potential for success in a university environment. The University also reserves the right to examine further any applicant by the use of psychological, achievement, and/or aptitude tests, and personal interview.

The University of Georgia complies with the Civil Rights Act of 1964 and is an Affirmative Action/Equal Employment Opportunity institution. Additionally, the University is actively involved in affirmative action recruitment.

Admission Procedures and Standards

The University, through the Office of Undergraduate Admissions, reserves the right to revise admissions criteria to any program, school, or college and/or to request additional information of applicants at any time during the academic year if deemed necessary.

HOW TO APPLY FOR ADMISSION

Applications for undergraduate admission may be obtained electronically from our Web site at http://www.admissions.uga.edu or from the UGA Office of Undergraduate Admissions, 212 Terrell Hall, University of Georgia, Athens, Georgia 30602-1633. Completion of all forms and submission of all requirements by the appropriate deadlines are mandatory before the applicant's request for admission can be considered. Applicants to the University must enclose a non-refundable application fee to cover the expense of processing the application. See the financial section of this bulletin for a complete explanation of fees.

Once the application for admission, appropriate test scores, and other required records of the applicant are found to be complete and in proper order, an evaluation will be made in terms of academic record, the probability of completing the requirements for the desired degree, and the competitiveness within the applicant pool. The University reserves the right to terminate acceptance of application forms when enrollment limits are reached or when credentials are deemed incomplete or unsatisfactory.

Acceptance of each applicant will be determined by the Faculty Admissions Committee subject to the right of appeal as provided in the University System.

Specific information concerning housing, orientation, pre-registration and transferred courses is sent to the student following the official acceptance.

Freshman Admission

Applicants for freshman admission to summer or fall semester must apply by February 1. The University of Georgia admits freshman applicants whose high school curriculum, grades earned, and college admissions test scores indicate they

can do successful work at the university level. The admissions standards are based primarily on a combination of these academic factors and also reflect the competition for a limited number of class openings by a growing number of highly qualified applicants. For freshman admissions, the University calculates an admissions index based upon academic credentials and the actual performance of recently enrolled freshman classes. Historically, the most heavily weighted factor in the University's admissions process has been the grade average earned in college preparatory subjects. The University may request and use in the admission process qualitative information to better determine a student's potential for success at and contribution to the University.

REQUIRED HIGH SCHOOL CURRICULUM

Prospective freshman applicants are encouraged to take a full schedule of college preparatory subjects in high school. Only grades earned in English, mathematics, science, social studies, and foreign language are used to calculate the academic high school grade point average for use in the admissions process.

It is recommended that high school students take the most rigorous curriculum in order to be prepared for college course work. Certain high school courses are recommended for particular college majors. For instance, trigonometry, geometry, chemistry, and physics are advised for pursuing any Bachelor of Science degree.

The following course of study is currently required as a minimum by the University System of Georgia for students graduating from high school who plan to enroll in a University System research university in a program leading to the baccalaureate degree. This requirement will become more rigorous for freshmen who enroll in the year 2001 and later.

College Preparatory Curriculum (CPC)

Courses and Instructional Emphasis:
English (4 units)
— Grammar and usage
— Literature (American & World)
— Advanced composition skills
Mathematics (3 units)
— Algebra I, II, and Geometry
Science (3 units)
— Physical Science and
— At least two laboratory courses from Biology, Chemistry, Physics or related areas of science or three laboratory courses from Biology, Chemistry, or Physics
Social Science (3 units)
— American Studies
— World Studies
— A third social science, preferably Economics and Government
Foreign Language (2 units)
—Two courses in one language emphasizing speaking, listening, reading, and writing

TEST REQUIREMENTS

An official report on the College Board's Scholastic Assessment Test (SAT-I) or the American College Test (ACT) is required of all freshman applicants. It is highly recommended that applicants also submit two or three SAT-II test scores (English, Math, and a foreign language). The University's school code number for the SAT is 5813; our code for the ACT is 0872. In order to expedite the processing of your application, please remember to include your correct Social Security Number and birth date when taking the SAT or ACT. Applicants whose high school class has been graduated five or more years may be considered for admission without SAT or ACT scores. These non-traditional applicants may be asked to submit results of the Collegiate Placement Exam which may be taken at the University's Counseling and Testing Center.

Students who have had at least two years of foreign language in high school should take the College Board SAT-II Subject Exam in that language if they plan to continue studying that language. Optional but strongly recommended College Board SAT-II or Advanced Placement tests which may be taken for advanced credit include English, chemistry, biology, physics, American or European history, mathematics, art, computer science, political science, economics, music, and psychology. Further information on the University's advanced placement policies may be obtained from the Honors Program office.

Under University System of Georgia Board of Regents Policy, freshman applicants from non-accredited high schools must submit satisfactory scores on eight required College Board SAT-II exams to be considered for admission.

Information for making application to take the College Board SAT-II or Advanced Placement tests may be obtained from the high school counselor, or directly from Educational Testing Service, P.O. Box 592, Princeton, New Jersey 08540.

SCHOOL EVALUATION

To have a complete file, freshmen applicants must also submit a completed School Evaluation, which enables the Admissions office to weigh the applicant's academic credentials in comparison to other seniors at that high school and to other freshman applicants. The School Evaluation asks the high school counselor to indicate the applicant's rank in class, the degree of difficulty of the applicant's curriculum, and the counselor's recommendation of the applicant, as well as provide information about the high school. Most high school counselors send the School Evaluation with the applicant's transcript. The School Evaluation is available on our Web site at http://www.admissions.uga.edu.

Transfer Admission

To be considered for University admission, all transfer applicants must be in good academic standing at their last college attended and must have official transcripts of all college work sent to the University. The deadline for receipt of transfer applications and all required documents for fall semester is June 1, spring is November 1, and summer is April 1. Transfer applications are generally processed during the term immediately preceding the intended term of transfer to UGA. Students who have earned either 30 semester or 45 quarter hours of transferable credit by the application/file completion deadline for their University of Georgia enrollment term will not be required to meet freshman admission requirements. The transfer grade point average will be calculated by UGA Admissions on grades earned in all academic college work attempted. A student who is on academic warning, probation, or dismissal from the last institution attended will not be admitted to the University.

The transfer grade point average required for admission to UGA is established each year by the Faculty Admissions Committee. Transfer applicants of sophomore standing with overall cumulative academic averages higher than 2.3 will be considered for University admission. However, University colleges, schools, and individual majors may require higher averages for acceptance. Admission to the University does not imply that the student is eligible for admission to a specific major. Precise admission requirements can be obtained from the appropriate dean's office.

If a student planning to transfer to UGA from another institution within the University System of Georgia has completed an area of the semester core curriculum with courses taken either at that institution or another institution from which UGA accepts transfer credit, UGA will accept the area as satisfied.

To calculate an overall transfer grade average, UGA Admissions must include all grades earned, including Ds and Fs, in all academic courses an applicant has at

tempted. Normally, grades earned in courses repeated after earning a C grade or better in that course will be excluded from the transfer admissions average. The calculated transfer admissions average will not include grades earned in physical education, orientation courses, or career-oriented courses from a terminal associate degree program.

Transient students may enroll for a summer semester in some undergraduate classes by applying for admission and presenting a letter of good standing from their home college. Transients for any other term must meet all regular transfer admission requirements. Transient admission is only for one semester. Note: Courses taken at the University while a student is a transient are not used in determining later University admission as a regular transfer student.

Post-baccalaureate students are college graduates taking additional undergraduate courses but not for a UGA undergraduate degree. To be admitted, post-baccalaureate students must submit official transcripts from each college attended showing proof of graduation and the required overall transfer academic grade point average for the UGA major to which they desire admission.

Second degree students are college graduates planning to obtain an additional undergraduate degree from UGA. To be admitted, official transcripts must be submitted from all colleges attended and students must meet the minimum grade point average required for the intended major.

Any transfer credit received that brings the overall grade point average below the specific requirements for admission may result in withdrawal of the admission offer before or after matriculation at the University.

TRANSFER OF COLLEGE CREDIT

The University of Georgia accepts credits from other accredited colleges and universities if the courses taken are "college parallel" and not remedial or career (terminal) courses. In order to earn a four-year degree from the University, a student must complete 40 of the last 60 semester hours on the University of Georgia campus. Twelve hours of this work must be in senior division courses of the student's major.

A maximum of 100 academic semester hours may be applied from other institutions toward a second baccalaureate degree. In order to earn a first baccalaureate degree from the University, a minimum of 40 semester hours in residence at the University of Georgia is required.

Students transferring to the University who have completed some or all of the core curriculum courses at another unit of the University System will receive full transfer credit. However, courses from a two-year college that would be earned in the upper division at the University are generally non-transferable. A grade of C or higher in freshman English composition courses is required to guarantee transferability (see English 1101 and 1102, page 36). Students transferring from quarter calendar institutions may multiply the number of quarter hours by two-thirds to determine generally the number of semester hours that will be transferred. The University of Georgia converted from quarters to semesters in fall 1998. All transfer credit earned through summer 1998 is recorded as quarter hours. All transfer credit earned fall 1998 and later will be recorded as semester hours.

College credit will not be allowed for remedial courses or for courses applicable only to the terminal (career) associate degree level.

Choice of School or College

Students of freshman and sophomore status undecided about a major should carefully review this Bulletin to determine which school or college more nearly meets their interests. The Colleges of Agricultural and Environmental Sciences, Arts and Sciences, Business Administration, and Education allow a student entrance as an Unspecified major. The required appointments with one's academic advisor and other University services can be of assistance in this

decision.

Transfer students of junior or senior status are not eligible to declare an Unspecified major in the College of Arts and Sciences.

Applicants for Readmission

Undergraduate students who are out of the University for more than two semesters must file an application for readmission and non-refundable application fee at least 20 calendar days (30 days for graduate students) prior to the published date of registration. Students who are on academic dismissal from the University should also contact their University of Georgia academic college of last enrollment. Undergraduate readmission applications are available electronically from our Web site at *http://www.admissions.uga.edu* or from the Office of Undergraduate Admissions. Undergraduate students who have not been enrolled at the University for a period of five years or more may be subject to different University, college or school, or department requirements than those which existed at the time of matriculation at the University or entry into a given college/school, major, minor, or certificate program.

Graduate and Professional Students

Students in the professional programs of journalism, law, pharmacy, and veterinary medicine must meet additional admission requirements found in the appropriate sections of the Bulletin.

Students applying to graduate programs should consult the *Graduate School Bulletin* or the dean of the particular school or college for a list of requirements.

The University reserves the right to deny admission to applicants whose records indicate inadequate preparation to do college work even though they may meet the minimum entrance requirements.

Recipients of the GED

Persons over 18 years of age whose secondary schooling was interrupted may be admitted by presenting a State Department of Education Certificate of High School Equivalency (GED) and by passing entrance examinations as determined by the Admissions Committee. In general, the Faculty Admissions Committee asks that such applicants take the College Board Scholastic Assessment Test (SAT-I) or the American College Test (ACT), unless the applicant's class has been graduated more than five years.

Students will be considered for admission on the basis of the GED scores only after their class has been graduated one full year from secondary school.

Admission of High School Juniors

Under exceptional circumstances, students may be admitted to the University at the end of their junior year in high school. These students must have outstanding records in college preparatory subjects and must present scores on the combined verbal and mathematics sections of the Scholastic Assessment Test or the American College Test satisfactory to the University Faculty Admissions Committee. The recommendation of the student's high school principal or counselor will also be considered by the Admissions Committee.

Admission and Registration of Persons 62 Years of Age or Older

Pursuant to the provisions of an amendment to the Georgia Constitution, the Board of Regents established the following rules with respect to enrollment of persons of age 62 or older in units of the University System. To be eligible for enrollment under the provisions of this amendment such persons:

(1) Must be residents of Georgia, 62 years of age or older at the time of registration, and must present a birth certificate or other comparable written documentation of age to enable the Registrar to determine eligibility.
(2) May enroll as regular students in courses offered for resident credit on a "space available" basis without payment of fees, except for supplies or laboratory or shop fees.
(3)Must meet all System and institutional admission requirements.
(4)Will have all usual student and institutional records maintained.
(5) Must meet all System, institutional, and legislated degree requirements such as the Regents' Exam, Major Area Exam, and History and Constitution instruction or exams, if they are degree-seeking students.
(6)May not enroll in Dental, Medical, Veterinary, or Law Schools under the provisions of this policy.

Orientation

New undergraduate students are required to register for and attend an orientation session prior to enrolling at the University. Orientation provides opportunities for required placement testing, academic advising, and registration for classes, as well as general information pertinent to newly entering students. Orientation information is mailed in late spring to students who have been accepted for the following fall semester and by December 1 and April 1 for the spring and summer semesters.

Registration and Late Registration Penalties

Registration dates are listed in the front of this Bulletin. A student who fails to register on the scheduled days will be subject to penalties of $25.00 as listed in the financial information section. No student will be admitted after the expiration of the third day beyond scheduled dates except by special permission. No course may be added to a student's schedule after the first fourteen calendar days of a term, with the exception of a research, dissertation, or thesis course at the graduate level.

Medical History

New students and former students who have been absent from the University for over one year must have a complete medical history form on file with the University Health Service prior to registration. Information regarding medical history to be collected will be sent with notification of acceptance for admission and should be returned to the Medical Records Department, University Health Service.

Cost of Education

The estimated cost of education for a Georgia resident is $9,900 per academic year. This estimate includes tuition and fees, books and supplies, room and board, and personal expenses. An additional out-of-state fee assessed all non-Georgia residents increases this estimate to $16,904.

Students of forest resources, law, pharmacy, and veterinary medicine will find the cost somewhat more because of higher fees required.

The University reserves the right to change its fees, charges, rules, and regulations at the beginning of any term and without previous notice. This right will be exercised cautiously.

Fees

APPLICATION FEES

Application Fee $25.00

Required of all students applying for admission or readmission, and covers expenses of processing applications only. Make check or money order payable to the University of Georgia. DO NOT SEND CASH.

Fee Deposit—Law School $50.00

Required of a new student accepted by the Law School to reserve his or her place in the class. Must be paid by April 1 of the year in which admission is sought, or within 30 days of acceptance, whichever comes later. Deposit is non-refundable, but is applicable toward payment of the first term matriculation fees.

Fee Deposit—College of Veterinary Medicine $100.00

Required from each applicant accepted for admission to the College of Veterinary Medicine. Must be received by May 1 or within three weeks after the date of issuance of the acceptance. If deposit is not received within the specified time, an alternate candidate will be called to fill the place of the accepted applicant. Deposit is non-refundable, but is applicable toward payment of the first term matriculation fees.

AUDITOR'S FEE

Persons desiring to attend courses or lectures without examination or credit may register to audit a course. Fees for auditors are the same as those for students registered for credit.

BREAKAGE DEPOSIT AND COURSE FEES

There are no general laboratory fees, but special fees, including breakage fees, are required for a few courses and some field trips. Students are held responsible for any breakage they cause.

SPECIAL FEES AND CHARGES

Service Charge for Late Registration $25.00

Service Charge for Late Payment of Housing Fee $25.00

Special Examination Fee

The University reserves the right to charge a fee for any special examination given at the request of a student.

Transcript Fee

Each copy	$ 2.00
FAX service	$ 3.00

Replacement Fee

Diploma	$10.00

Special Programs Fees

Agencies sponsoring regularly enrolled students who receive special academic programming or administrative services are expected to pay fees in addition to those normally charged for the usual services. While rates charged will be determined by contract arrangements, the scheduled fees for such services will be $125 per semester.

Payment

METHOD OF PAYMENT

On-line Payment Authorization of Fees Via OASIS

The following payment options are available via the OASIS Registration System to satisfy fees:

- Sponsorships
- Loans, Grants, or Scholarships
- Payroll Deduction
- Check/Cash
- Credit Card

In cases where more than one payment option is available, the student must declare how fees will be satisfied. In most cases students who are sponsored, receive financial aid, elect payroll deduction, or credit card payment may satisfy fee payment prior to exiting the OASIS Registration System. Students whose payment method is Check/Cash should screen print their fee invoice prior to exiting the system and pay in one of the following manners:

By Mail

The fee invoice along with check or money order (do not mail cash) should be mailed to the University of Georgia Treasurer's Office, Business Services Building, Athens, GA 30602-4227. Payment must be received by the fee payment deadline to avoid schedule cancellation.

At Late (Phase II) Registration

Students who register during late registration may pay by check or cash at the Treasurer's station located in Memorial Hall. (DO NOT MAIL LATE REGISTRATION FEES.)

At Cashier's Window

Payment may be made by cash or check during cashiering hours at the cashier's window located on the first floor of the Business Services Building, 424 East Broad Street.

At Night Depository

Payment may be made after hours until the fee payment deadline at the night depository located at the front of the Business Services Building, 424 East Broad Street.

TIME OF PAYMENT

Pre-Registration (Phase I)

Students who pre-registered during the current term for the next term must pay fees by the pre-payment deadline in order to avoid schedule cancellation. Those who fail to pay fees by the deadline will be dropped from the class rolls, and the class openings will be made available to others who register late.

Late Registration (Phase II)

Fees and charges for room and board are due and payable at the time of late registration. A student is not officially registered at the University until such fees and charges are paid in full. A late registration service charge will be assessed after the close of Phase II. If payment is not made by the end of the late registration period, the student's registration will be canceled. Exceptions to the time of payment are outlined below.

DEFERRED PAYMENT OF FEES

Students who meet one of the following requirements may defer payment upon approval by the Treasurer's Office, Banking and Trust Department, Business Services Building, 424 East Broad Street:

1. Students whose fees are guaranteed and will be paid by an outside agency under an agreement with the University of

MATRICULATION FEES (1998-99)

For Students with 12 or more Semester Credit Hours

	Maintenance	Non-Resident	Student Fees	Total
Regular Students				
Residents	$ 1,155.00		$310.00	$ 1,465.00
Non-residents	1,155.00	$3,465.00	310.00	4,930.00
Forest Resources Students				
Residents	1,357.00		310.00	1,667.00
Non-residents	1,357.00	4,071.00	310.00	5,738.00
Law Students				
Residents	1,790.00		310.00	2,100.00
Non-residents	1,790.00	5,370.00	310.00	7,470.00
Pharmacy Students				
Residents	1329.00		310.00	1,639.00
Non-residents	1329.00	3,987.00	310.00	5,626.00
Pharmacy Doctorate				
Residents	1669.00		310.00	1,979.00
Non-residents	1669.00	5,006.00	310.00	6,985.00
Veterinary Students	2329.00		310.00	2,639.00

(Payable each term during registration period.)

The per credit hour charge for students with less than 12 credit hours is as follows:

	Residents	*Non-residents*
Regular Students	$ 96.00	$289.00
Forest Resources Students	113.00	339.00
Law Students	149.00	448.00
Pharmacy Students	111.00	332.00
Pharmacy Doctorate	139.00	417.00
Veterinary Students	170.00	N/A

Each student with less than 12 credit hours must also pay the following student fees:

Health fee*	$136.00
Student activity fee	38.00
Student athletic fee**	38.00
Transportation fee	48.00
Ramsey Student Center fee	50.00

Note: Students who enroll for five hours or less have the option of waiving student activity, student athletic, Ramsey Student Center, and health fees. This waiver must be elected at the time of registration.

MEAL PLANS (1998-99)

5 day plan $ 942.00 per semester
7 day plan $1,040.00 per semester

RESIDENCE HALL FEES (1998-99)

Fees range from $1,155.00 to $1,640.00 per semester.

---

*Optional Dental Program available to all enrolled students and their spouses for an additional fee.
**Student Athletic Fee assessed for fall and spring semesters only.

Georgia up to the amount authorized for a specific academic term.

2. Students who have a University-administered loan or scholarship in process up to the amount of the aid granted for a specified academic term.
3. Foreign students who have a certificate or other acceptable documented evidence that payment of fees will be made after a statement of charges for the student has been presented for payment. The deferment will be limited to the amount stated in the certificate or other document for a specified academic term.
4. Students who are recipients of assistantships (at least one-third time) administered by the University may defer their fees.

Deferred fees will be due and payable as follows:

Fall	November 1
Spring	April 1
Summer	July 1

FEE REFUNDS

In order to receive a refund of fees due to withdrawal from school, students must contact the Student Affairs Office and formally withdraw. (Note: withdrawal from school cannot be accomplished through drop/add after the first day of class). Students who formally withdraw from the University on or before the first day of class are entitled to a refund of 100 percent of fees paid for that term; withdrawal after the first day of class but before the end of the first 10 percent (in time) of the period of enrollment, 90 percent; withdrawal after the first 10 percent (in time) of the period of enrollment but before the end of the first 25 percent (in time) of the period of enrollment, 50 percent; withdrawal after the first 25 percent (in time) of the period of enrollment but before the end of the first 50 percent (in time) of the period of enrollment, 25 percent. Refunds will be made at the end of the term. No refunds for reduction in hours after the drop/add period are allowed unless such reduction is the fault of the University.

The following are not entitled to any refund of fees paid: students who withdraw after the first 50 percent (in time) of the period of enrollment, students suspended for disciplinary reasons, students who leave the University when disciplinary action is pending, or students who do not formally withdraw.

Students attending the University for the first time who receive assistance under Title IV of the Higher Education Act of 1965 as amended are entitled to a pro-rata refund of that portion of the tuition, fees, room and board, and other charges assessed the student by the institution equal to that portion of the period of enrollment for which the student has been charged that remains on the last day of attendance by the student up to the sixty percent point in time in the period of enrollment. In the event a student receives Title IV aid and fails to complete registration and/or fee payment for the academic term for which financial assistance was awarded, the full amount of the Title IV aid received must be repaid immediately. In the event a student receives Title IV aid, completes registration, and subsequently reduces his/her enrollment status or withdraws, the amount of funds to be returned to the Title IV programs will be

in accordance with federal regulations concerning refunds and repayments to the Title IV programs.

Refunds

All refunds, up to the amount of the aid received for the term, will be returned to the Title IV programs according to the following priority:

1. Federal Family Educational Loans
2. Federal Direct Student Loans
3. Federal Perkins Loans
4. Federal Pell Grants
5. Federal Supplemental Educational Opportunity Grants
6. Student Incentive Grants
7. Other federal sources of aid
8. Other state, private, or institutional aid
9. Student

Repayments

All repayments, up to the amount of the aid received for the term, will be returned to the Title IV programs according to the following priority:

1. Federal Perkins Loan
2. Federal Pell Grants
3. Federal Supplemental Educational Opportunity Grants
4. Student Incentive Grants
5. Other federal sources of aid
6. Other state, private, or institutional aid

Refunds for elective charges due to withdrawals during the term will be made on a prorated basis depending on the date of withdrawal.

Rules Governing the Classification of Students for Tuition Purposes in the University System of Georgia

1. (a) If a person is 18 years of age or older, he or she may register as an in-state student only upon a showing that he or she has been a legal resident of Georgia for a period of at least twelve months immediately preceding the date of registration.

   (b) No emancipated minor or other person 18 years of age or older shall be deemed to have gained or acquired in-state status for tuition purposes while attending any educational institution in this State, in the absence of a clear demonstration that he or she has in fact established legal residence in this State.
2. If a person is under 18 years of age, he or she may register as an in-state student only upon a showing that his or her supporting parent or guardian has been a legal resident of Georgia for a period of at least twelve months immediately preceding the date of registration.
3. If a parent or legal guardian of a minor changes his or her legal residence to another state following a period of legal residence in Georgia, the minor may continue to take courses for a period of twelve consecutive months on the payment of in-state tuition. After the expiration of the twelve-month period, the student may continue his or her registration only upon the payment of fees at the out-of-state rate.
4. In the event that a legal resident of Georgia is appointed as guardian of a nonresident minor, such minor will not be permitted to register as an in-state student until the expiration of one year from the date of court appointment, and then only upon a proper showing that such appointment was not made to avoid payment of the out-of-state fees.
5. Aliens shall be classified as nonresident students; provided, however, that an alien who is living in this country under an immigration document permitting indefinite or permanent residence shall have the same privilege of qualifying for in-state tuition as a citizen of the United States.
6. *Waivers*: An institution may waive out-of-state tuition for:
   (a) nonresident students who are financially dependent upon a parent, parents or spouse who has been a legal resident of Georgia for at least twelve consecutive months immediately preceding the date of registration; provided, however, that such

financial dependence shall have existed for at least twelve consecutive months preceding the date of registration;

(b) international students, selected by the institutional president or his authorized representative, provided that the number of such waivers in effect does not exceed one percent of the equivalent full-time students enrolled at the institution in the fall term immediately preceding the term for which the out-of-state tuition is to be waived. Institutions are authorized to approve an additional one percent for special cases such as superior out-of-state students in selected programs and/or additional international students.

(c) full-time employees of the University System, their spouses, and their dependent children;

(d) medical and dental residents and medical and dental interns at the Medical College of Georgia;

(e) full-time teachers in the public schools of Georgia or in the programs of the State Board of Technical and Adult Education and their dependent children. Teachers employed full-time on military bases in Georgia shall also qualify for this waiver;

(f) career consular officers and their dependents who are citizens of the foreign nation which their consular office represents, and who are stationed and living in Georgia under orders of their respective governments. This waiver shall apply only to those consular officers whose nations operate on the principle of educational reciprocity with the United States.

(g) military personnel and their dependents stationed in Georgia and on active duty unless such military personnel are assigned as students to System institutions for educational purposes.

(h) selected graduate students at University-level institutions;

(i) students who are legal residents of out-of-state counties bordering on Georgia counties in which an institution of the University System is located and who are enrolled in said institution.

7. A student is responsible for registering under the proper residency classification. A student classified as a nonresident who believes that he/she is entitled to be classified as a legal resident may petition the Registrar for a change in status. The petition must be filed no later than sixty (60) days after the term begins in order for the student to be considered for reclassification for that term. If the petition is granted, reclassification will not be retroactive to prior terms. The necessary forms for this purpose are available in the Registrar's office.

8. Questions concerning classification for fee-payment purposes should be directed to one of the following persons:

Undergraduate applicants for admission:
Director of Admissions
212 Terrell Hall

Graduate applicants for admission:
Director of Graduate Admissions
534 Boyd Graduate Studies Research Center

Currently enrolled students:
Assistant Registrar
235 Memorial Hall

Academic Information

The statements set forth in this Bulletin are for informational purposes only and should not be construed as the basis of a contract between a student and this institution. While the provisions of this Bulletin ordinarily will be applied as stated, the University of Georgia reserves the right to change any provision listed in this Bulletin including, but not limited to, academic requirements for graduation, without actual notice to individual students. Every effort will be made to keep students advised of any such changes. Information on changes will be available in the Registrar's Office, in the offices of the academic deans, and in the Office of the Senior Vice President for Academic Affairs and Provost.

Undergraduate and Professional Degrees Offered by the University

The University will confer degrees upon candidates who have satisfied the prescribed regulations and conditions as follows:

A. *In the College of Agricultural and Environmental Sciences*, the degrees of Bachelor of Science in Agriculture (B.S.A.), Bachelor of Science in Agricultural Engineering (B.S.A.E.), Bachelor of Science in Biological Engineering (B.S.B.E.), and Bachelor of Science in Environmental Health (B.S.E.H.);

B. *In the Franklin College of Arts and Sciences*, the degrees of Bachelor of Arts (A.B.), Bachelor of Science (B.S.), Bachelor of Science in Chemistry (B.S. Chm.), Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B. Mus.);

C. *In the Terry College of Business*, the degree of Bachelor of Business Administration (B.B.A.);

D. *In the College of Education*, the degree of Bachelor of Science in Education (B.S.Ed.);

E. *In the School of Environmental Design*, the degree of Bachelor of Landscape Architecture (B.L.A.);

F. *In the College of Family and Consumer Sciences*, the degree of Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.);

G. *In the D. B. Warnell School of Forest Resources*, the degree of Bachelor of Science in Forest Resources (B.S.F.R.);

H. *In the Henry W. Grady College of Journalism and Mass Communication*, the degree of Bachelor of Arts in Journalism (A.B.J.);

I. *In the School of Law*, the degree of Juris Doctor (J.D.);

J. *In the College of Pharmacy*, the degree of Bachelor of Science in Pharmacy (B.S. Phar.), the degree of Doctor of Pharmacy (Pharm.D.);

K. *In the School of Social Work*, the degree of Bachelor of Social Work (B.S.W.);

L. *In the College of Veterinary Medicine*, the degree of Doctor of Veterinary Medicine (D.V.M.).

DUAL DEGREES

A graduate of any program may receive the baccalaureate degree of any other program by completing the additional studies required in that program. The minimum resident requirement is 30 semester hours. Courses taken in residence at the University of Georgia for the purpose of meeting program requirements for one degree may be

counted toward the resident requirement for the second degree. (Students not enrolled at the University for a period of five years or more must complete 30 semester hours in residence for the second degree in addition to the courses taken to satisfy the first degree.) Individual schools and colleges within the University may impose additional resident requirements. Eligibility for graduation with academic honors does not apply to the second baccalaureate degree. Students pursuing an additional major within the same degree objective are considered to be enrolled for a double major.

MINOR FIELDS OF STUDY

A minor must contain 15 to 18 semester hours of course work, with at least 9 hours of upper division course work, in a field of study other than the student's major. Courses taken to satisfy Core Areas A through E may not be counted as course work in the minor. Courses taken in Core Area F may be counted as course work in the minor. The intent of establishing minor fields of study is to offer students the opportunity to broaden their education through the minor field. The selection of a minor field of study should be made to fulfill this goal.

The availability of a minor is noted in this Bulletin alongside the description of the corresponding major or certificate program. The department shall publish and make available to students the requirements for the minor—the total number of hours required, along with the enumeration of any particular courses that are mandated or excluded, residency requirements (if any) for the minor courses, and grade requirements for minor courses if those requirements differ from the general University standard for credit (a D as the minimum passing grade). The University Curriculum Committee has determined that if a course satisfies a major requirement it cannot also be used to satisfy course requirements in the minor field of study.

A student may select a minor in consultation with his or her advisor. The student may then consult an advisor in the

minor field who can inform the student of remaining requirements for the minor. When the student has met the requirements for the minor, the advisor in the minor field will then certify that fact to the student's dean. The completed minor will be recorded on the student's permanent transcript, but not on the diploma. For students completing a minor before graduation, the minor will appear on the transcript at the time of graduation. For students completing a minor after graduation, the statement shall appear on the transcript in chronological order following the courses taken subsequent to graduation. A student must be enrolled at the time a minor is approved by the Board of Regents, or subsequent to that date, to receive credit for the minor. A student may have more than one minor.

MILITARY COMMISSIONS

A student who satisfactorily completes the advanced ROTC program may be commissioned as second lieutenant in the U.S. Army or U.S. Air Force in conjunction with the degree. Detailed information concerning the Army and Air Force ROTC programs may be found under "Division of the Armed Services."

Degree Requirements

THE UNIVERSITY OF GEORGIA CORE CURRICULUM

The core curriculum was established within the University System of Georgia as a means of facilitating the transfer of credit for students at the lower division level as they work toward baccalaureate degrees within University System colleges and universities. The various institutions within the University System, in establishing their core curricula, provide for (1) 60 semester credit hours of which a minimum of 42 are in general education and 18 in major-related courses; (2) assurances that all courses satisfactorily completed in the core curriculum of any unit of the University System will be acceptable and transferable to other units of the University System; and (3) the preservation of the maximum possible amount of institutional autonomy.

Briefly, the Core Curriculum includes:

	HOURS
AREA A: Essential Skills English and math courses common throughout the University System.	**9-10**
AREA B: Institutional Options UGA students select these courses with the assistance of academic advisors.	**4-5**
AREA C: Humanities/Fine Arts Two courses selected from an approved list with the assistance of academic advisors.	**6**
AREA D: Science, Mathematics and Technology Two science courses and one mathematics/technology course.	**10-11**
AREA E: Social Sciences Four courses which may also satisfy history and constitution requirements.	**12**
AREA F: Courses Related to the Program of Study	**18**

Courses which may be used to satisfy core requirements are listed in the Programs of Study section of this Bulletin.

HOURS REQUIRED FOR THE UNDERGRADUATE DEGREE

A baccalaureate degree must contain a minimum of 120 semester hours. Baccalaureate degree programs also have a maximum of 120 semester hours (exclusive of physical education hours). Exceptions to the maximum degree length requirements may be made only with approval of the Board of Regents.

A baccalaureate degree program must require at least 21 semester hours of upper division courses in the major field and at least 30 semester hours of upper division work overall.

ENVIRONMENTAL LITERACY REQUIREMENT

All students who matriculate in fall 1993 and thereafter must attain knowledge of basic principles concerning environmental

issues. This requirement may be satisfied by taking one course from a list of approved courses, available on the Bulletin Web site at <www.bulletin.uga.edu>. This requirement pertains only to the first baccalaureate degree; it does not apply to any subsequent degrees.

EXAMINATIONS ON THE CONSTITUTIONS

Examinations on the Constitution of the United States and that of the state of Georgia are required of all persons receiving a degree from the University, including those transferring Political Science 1101-1101D from institutions outside the state unless exempted by courses dealing with these constitutions. Approved courses for exemption are as follows:

U.S. Constitution

POLS 1101-1101D
POLS 1105H
POLS 4700
POLS 4710
HIST 2111 and 2112
HIST 2111 and 2112H
HIST 2111H and 2112H
HIST 2111H and 2112

U.S. and Georgia Constitution

POLS 1101-1101D (taken in Georgia)
POLS 1105H (taken in Georgia)
HIST 4100

Georgia Constitution

POLS 2201 (University System course; not offered at UGA, but may be offered at other System institutions)
POLS 4650 (taken in Georgia)
POLS 4660
HIST 4100

Examinations are given once each semester; dates are announced in the *Schedule of Classes*. Students who fail the examination twice must satisfy the requirement with course work.

EXAMINATIONS ON UNITED STATES AND GEORGIA HISTORY

A passing grade on an examination on the history of the United States and Georgia is required of all persons receiving a baccalaureate degree from the University unless exempted by one of the following courses: HIST 2111, HIST 2112, HIST 2111H, HIST 2112H, HIST 3080H, HIST 4100.

Examinations are given to freshmen during orientation and twice each semester by the History Department. Reexamination is permitted. Examination dates are announced in the *Schedule of Classes*.

REGENTS' TESTING PROGRAM

Each institution of the University System of Georgia shall assure the other institutions, and the System as a whole, that students obtaining a degree from that institution possess certain minimum skills of reading and writing.

The Regents' Testing Program has been developed to help in the attainment of this goal. The objectives of the Testing Program are: (1) to provide System-wide information on the status of student competence in the areas of reading and writing; and (2) to provide a uniform means of identifying those students who fail to attain the minimum levels of competence in the areas of reading and writing.

Passing the Regents' Test is defined as having passed all components of the test by scoring above the cutoff score specified for each component. The test may be administered either in its entirety or as one or more components depending on the needs of the students. If one component of the test is passed, that component need not be retaken.

A student holding a baccalaureate or higher degree from a regionally accredited institution of higher education will not be required to complete the Regents' Test in order to receive a degree from a University System institution.

In order to implement effectively the goals of the Testing Program:

1. Students enrolled in undergraduate degree programs shall pass the Regents' Test as a requirement for graduation. Students, including transfer students and/or readmitted students, may take the test after they have completed the required basic core English courses. They will be required to take the test in the semester after they have earned 30 hours of

college-level credit if the test has not been passed previously.

2. All students who have not passed the Regents' Test during the semester in which they will have earned 45 credit hours shall be required to take non-degree credit courses in remedial reading and/or remedial writing in each subsequent term of attendance until they have passed all components of the test.
   a. No enrolled student required to take a remedial course may retake the Regents' Test until the appropriate course is completed with an S grade.
   b. Failure to complete the remedial course(s) satisfactorily will result in a U posted on the student's permanent record, prohibiting the student from registering to retake the Regents' Test. Additionally, the remedial course(s) must be repeated each term until the Regents' Test requirement is satisfied.
3. Having passed the Regents' Test shall not be a condition of transfer into an institution. Students transferring from System programs which require the test shall be subject to all provisions of this policy. Students from institutions outside the System, or from System programs not requiring the test, who transfer into a System institution with 30 or more college-level credit hours shall take the test no later than their second semester of enrollment and in subsequent terms shall be subject to all provisions of his policy.
4. Students whose native tongue is not English may choose to take an alternate version of the Regents' Exam to certify literacy competence. The Writing Center, 72 Park Hall, offers an alternate examination at approximately the same date as the usual exam. Otherwise, all stipulations included in this section apply to international students. International students may contact the Writing Center at 542-2119 or via e-mail addressed to: wrctr@parallel.park.uga.edu.
5. For extraordinary situations, each institution shall develop special procedures for certifying the literacy competence of students. A written description of those procedures shall be submitted to the Chancellor for approval. A record of the action shall be reported by the Chancellor to the Education Committee of the Board of Regents. Such procedures shall include provision for remediation if needed and formal examination prior to certifying competency. Such examination shall equal or exceed the standards of the Regents' Testing Program.
6. Students may request a formal review of their failure on the essay component of the Regents' Test if their essay received at least one passing score among the three scores awarded and if they have successfully completed the courses in English composition required by the local institution. This review will be conducted in accordance with Board-approved procedures.
7. Remedial work as required under the above policy shall be in keeping with regulations in satisfaction of federal and state student financial assistance and other such eligibility programs.
8. These regulations shall not prohibit institutions from increasing requirements affecting the Regents' Testing Program, provided such increased requirements are authorized by the Chancellor, and provided further that such requirements are published in the official bulletin of the institution prior to implementation. Such additional requirements shall in no way affect the transfer of students from one institution to another or the readmission of students to institutions of the University System.

Students' Review Procedures—Regents' Testing Program

1. The review will be initiated at the campus level, with procedural matters to be determined by the institution. The on-campus review, however, will be conducted by the three (3) faculty members designated by the institution as a review panel.
2. The on-campus review panel may (a) sustain, by majority opinion, the essay's

failing score, thus terminating the review process, or (b) recommend, by majority opinion, the re-scoring of the essay by the Regents' Testing Program central office. The student will be notified concerning the results of the on-campus review.

3. If the on-campus panel recommends re-scoring of the essay, that recommendation will be transmitted in writing, along with a copy of the essay, to the office of the system Director of the Regents' Testing Program. The Director will utilize the services of three (3) experienced Regents' essay scorers other than those involved in the original scoring procedures for the essay component of the Regents' Test. The decision of this panel on the merits of the essay will be final, thus terminating the review process. The student will be notified through the institution concerning the results of the review.

BASIC PHYSICAL EDUCATION

1. All students entering the University fall 1991, and thereafter, who matriculate for their first baccalaureate degree are required to pass one semester credit hour of basic physical education. This requirement may be satisfied by successful completion of any combination of basic physical education courses. Basic physical education courses are designated PEDB 1010-1990; courses for physical education majors (PEDS), health promotion and education majors (HPRB) or recreation majors (RLST) will not satisfy the basic requirement. This requirement shall not apply for those entering a second or subsequent bachelor's degree program. The total number of credit hours in basic physical education courses that may be applied toward an undergraduate degree will be determined by individual schools and colleges. Undergraduate students entering fall 1991 or later must satisfy the basic physical education requirement prior to completion of 60 semester hours. Students entering the University prior to fall 1991 and who graduate fall 1991 or later may at their option choose whether they will be governed in their degree requirement by the basic physical education requirement at the time they matriculated or by the new requirement.
2. All students entering the University fall 1977 through summer 1991 who matriculate for their first baccalaureate degree are required to pass five quarter hours (or its semester equivalent) of basic physical education. This requirement may be satisfied by successful completion of any combination of basic physical education courses. Basic physical education courses are designated PEDB 1010-1990; courses for physical education majors (PEDS), health promotion and education majors (HPRB) or recreation majors (RLST) will not satisfy the basic requirement. This requirement shall not apply for those entering a second or subsequent bachelor's degree program. The number of credit hours which may be applied toward an undergraduate degree will be determined by individual schools and colleges.
3. All baccalaureate degree candidates who entered the University prior to fall 1977 are required to satisfy six courses of basic physical education. Students entering the University with 60 semester hours or more credit will be considered to have met this requirement. Students transferring fewer than 60 semester hours will exempt one course in basic physical education for each fifteen hours of credit transferred. A maximum of six credit hours may be applied toward a degree.

The above requirements are applicable to all students except as follows:

1. **Veterans**: Veterans who have served 180 days or more may receive credit based on their military service depending on date of matriculation. Veterans may receive no more credit for basic physical education courses than is required for a degree. To establish credit, veterans will be required to present a copy of their DD214 form to the Admissions Office.

2. **Disabled Students**: Adapted physical education classes are available to facilitate the meeting of the University physical education requirement by disabled students. Policies with regard to physical education for disabled students are as follows:

   The School of Health and Human Performance is committed to fulfilling the physical education needs of all students. An adapted physical education program operates as a normal extension of the basic physical education program for students who, because of temporary or permanent disability or medical conditions, cannot participate in the mainstream physical education program. It is through this adapted program that, with few exceptions, all students are able to satisfy the basic physical education requirement. Students with health problems or disabilities should consult with the Staff Physician at the University Health Service. Students will in turn be referred to the adapted physical education specialist who works in concert with the University Staff Physician, and subsequently will be placed in appropriate physical education activities.

There are no exceptions to the physical education requirement for reasons of age, sex, or disability except upon special recommendation by the Staff Physician at the University Health Service.

ENGLISH 1101 AND 1102

English 1101 and 1102 (English Composition) are required for all undergraduate degrees from the University of Georgia. A grade of C or better is required for English 1101 and an average of 2.0 or better is required for both courses.

Transfer students not receiving freshman English credit for writing courses taken at other institutions should bring catalog descriptions of those courses for review to the Freshman English Office, 135 Park Hall.

RESIDENT REQUIREMENT

Students who are candidates for a baccalaureate degree for fall 1995 and thereafter must earn 40 of the last 60 semester credit hours in residence. In addition, 12 of the semester credit hours required for a student's major must be earned in residence. Courses which are remedial in nature and are numbered less than 1000 shall not be counted in satisfaction of this requirement. Students may receive resident credit for University-sponsored studies abroad programs for which course registration and fee payment are effected through the University. University of Georgia students participating in a University-approved academic program (such as the National Student Exchange) are exempt from that part of the residency requirement that states 40 of the last 60 semester credit hours be completed at the University; in such cases students need only complete 40 semester hours at the University in order to satisfy the residency requirement. Credit earned through programs sponsored by other institutions, organizations, or approved student exchange programs will be recorded as transfer credit.

Students who present acceptable college credit earned before September 1960, or who are enrolled for a second baccalaureate degree, may satisfy the resident requirement by completing in residence 30 semester hours in courses numbered 2000 and above with a cumulative average grade of 2.0 or better. Students enrolled in the combined B.S.-M.D. program with the Medical College of Georgia may satisfy the resident requirement at the University by completing 30 semester hours in residence in courses approved by the Dean of the Franklin College of Arts and Sciences.

General Academic Regulations and Information

THE ACADEMIC YEAR

The college year has two semesters of approximately fifteen weeks each: fall semester, latter part of August to Christmas holidays; spring semester, January to early May, as well as a summer term, June to mid-

August. Exact semester dates appear in the University calendar. Students may enter the University at the beginning of any term.

The University holds two commencement ceremonies each year in December and May. The fall commencement recognizes graduates from the previous summer term as well as candidates for fall graduation. The May ceremony recognizes candidates for spring graduation only.

UNITS OF CREDIT

The unit of credit is the semester hour, representing one hour of in-class work per week for one semester or its equivalent in other forms of instruction. Two or sometimes three hours of laboratory work are considered as the equivalent of one hour of class work.

Most University courses meet three times a week for one semester and carry a credit of three semester hours.

ACADEMIC WORKLOAD

The normal academic work load during the academic year is 15 hours per semester for undergraduates and 12 hours per semester for graduate students. In programs requiring more than 120 hours for graduation, the load per semester may be somewhat higher. Undergraduate students must carry 12 hours per term and graduate students 9 hours per term to be certified as full-time students. Undergraduate students must carry six hours per term and graduate students five hours per term to be certified as one-half time students. Full-time status may vary during the summer session.

During their work term, students participating in the Cooperative Education Program will be certified by the Registrar's Office as being enrolled as full-time students.

ACADEMIC ADVISING

Academic advisement is considered an essential part of the student's educational experience at the University of Georgia. Academic advisors are assigned to each student to assist in various areas of academics, including preregistration each semester, choosing a major, and planning a program of study. Advisors aid students in making certain that all educational requirements of both the University and the specific degree program are met. Advisors cannot provide a guarantee of graduation and/or certification within a specified period of time. Therefore, selection of appropriate courses to meet degree requirements is ultimately the student's responsibility.

STUDENT RESPONSIBILITY

It is especially important that each student knows it is his/her responsibility to keep apprised of current graduation requirements for a particular degree program.

ACADEMIC HONESTY

The University of Georgia seeks to promote and ensure academic honesty and personal integrity among students and other members of the University community. A policy on academic honesty (and procedural guidelines for adjudication of alleged violations of academic honesty) has been developed to serve these goals. Academic honesty means performing all academic work without cheating, lying, tampering, stealing, receiving assistance from any other person or using any source of information that is not common knowledge (unless that assistance or use is authorized by the person responsible for supervising that academic work or fairly attributed to the source of assistance or information).

Academic honesty is vital to the very fabric and integrity of the University of Georgia. All students must comply with an appropriate and sound academic honesty policy and code of honest behavior. All members of the University community are responsible for and involved in bringing about an honest University and all must work together to ensure the success of the policy and code of behavior.

To preserve and enhance the University's academic honesty policy, the Student Government Association proposed a student Honor Code that was approved by the University Council in May 1997. The Honor

Code appears on the University's application for admission and states, "I will be academically honest in all of my academic work and will not tolerate academic dishonesty of others." All applicants for admission to the University must sign this statement as part of the admission process.

Specific regulations governing student academic conduct are contained in the policy manual, *A Culture of Honesty*, and these should be read to avoid any misunderstanding. All members of the academic community are responsible for knowing the policy and procedures on academic honesty. The policy manual has been made available to students and faculty through deans and department heads to assure understanding of the academic honesty system and its proper functioning.

Students and faculty who suspect that an act of academic dishonesty has taken place should contact the Office of the Senior Vice President for Academic Affairs and Provost, 204 Old College, (706) 542-0432.

STUDENTS' RIGHT OF APPEAL

University of Georgia students have the right to appeal academic decisions. Usually the appeal goes first to the unit responsible for the decision (for example, grades to the faculty members who assigned the grades; department requirements to the department; college or school requirements to the school; university requirements to the Educational Affairs Committee). An unfavorable ruling at one level can be appealed to the successive levels (viz., a faculty decision can be appealed to the department; a department ruling can be appealed to the college in which the instructional unit is located; a college-level ruling can be appealed to the Educational Affairs Committee; the Educational Affairs Committee ruling can be appealed to the President of the University; and, except for grade appeals, the President's ruling can be appealed to the Board of Regents).

All grade appeals must be initiated within one calendar year from the end of the term in which the grade was recorded. Additional details on appeals of academic matters, including special provisions for academic

dishonesty cases, can be obtained from the Office of the Senior Vice President for Academic Affairs and Provost, 204 Old College, (706) 542-0432.

CLASSIFICATION OF STUDENTS

In the undergraduate schools and colleges, students will be classified according to the number of academic hours they have earned.

Classification	*Hours Earned*
Freshman	Less than 30 hours
Sophomore	At least 30 hours
Junior	At least 60 hours
Senior	At least 90 hours

Junior Division and Senior Division

Some of the undergraduate schools and colleges further classify their students as junior division students or senior division students. In general, a junior division student is a freshman or sophomore; a senior division student is a junior or senior, and has completed at least 60 semester hours.

Law or honors students may enroll in graduate courses with the approval of their advisor, the course instructor, the graduate coordinator of the department in which the course is offered, and the Graduate Dean. Approval must be secured prior to registering for the course. Appropriate applications are available in the Honors Office and in the Law School.

COURSES AND CREDIT

Course Numbers

Courses numbered less than 1000 are either non-credit or academic assistance courses; those from 1000 to 1099 are designed for freshman and sophomore (junior division) students; those numbered 2000 to 2099 are mainly sophomore courses but, in special instances when justified by course and curricular requirements, may be given senior division (junior and senior) classification. Courses numbered 3000 to 3099 are generally designed for mixtures of junior and senior level students. Courses taken by juniors and seniors along with graduate students carry the numbers 4000 to 5099 for undergraduates and 6000 to 7099 for graduate students. Courses numbered 8000 or 9000 are open only to graduate students. Courses which carry an H suffix are Honors courses.

Course Changes

It is the responsibility of students to select the appropriate courses for their degree program. If students are uncertain as to their degree requirements, they should consult with their academic advisor/dean prior to scheduling.

Students are expected to attend classes on a regular basis during the drop/add period. A student who incurs an excessive number of absences may be withdrawn from the class at the discretion of the professor. Students who find it necessary to make adjustments in their class schedules during the drop/add period must follow the procedures and adhere to the deadlines and dates published in the *Schedule of Classes*. No course may be added to a student's schedule after the first fourteen calendar days of a term, with the exception of a research, dissertation, or thesis course at the graduate level.

Fee Adjustments—Tuition is charged on a per semester hour basis for up to 12 hours. Full tuition is charged for 12 or more semester hours. If a schedule change results in an additional fee being due, the student should report to the Treasurer's Office to pay additional fees. No academic credit will be given unless all fees are paid by the end of the drop/add period.

Course Auditing

Students may audit courses with the approval of their academic dean and the department offering the course. The registration procedure is the same as registration for credit except that the auditor must request audit status at the time of registration.

Fees for auditors are the same as those for students registered for credit. After the drop/add period, credit registrations may not be changed to audit, and audit registrations may not be changed to credit registrations.

Course Challenging

Insofar as accrediting policies permit, the University allows a student the opportunity to receive resident credit for courses by examination without attending the regular classes. Although specific standards of eligibility for challenging a course vary somewhat among the schools and colleges, in general the student must (1) demonstrate to the department in which the course is offered evidence of independent study to master the materials required in the course; (2) not be currently enrolled in the course to be challenged, nor have previously completed the course; and (3) be currently enrolled in the University. Upon completion of the course challenge the instructor will complete and file an official Course Challenge Form with the Registrar of the University.

Based upon the results of the examination, regular grades of A, B, C, D, or F are assigned for the challenged course unless the course is not one authorized to receive these grades, in which case the appropriate grade will be assigned from among those available for the course.

Some courses cannot be challenged. A student should check with the dean or department head regarding the procedure for challenge within a particular school/college.

Class Attendance

Students are expected to attend classes regularly. A student who incurs an excessive number of absences may be withdrawn from a class at the discretion of the professor.

Withdrawal from Courses

Students who wish to withdraw from a course should initiate the withdrawal procedure within the instructional department or with their advisor, if required by their school or college. Instructors who wish to withdraw a student from a course because of excessive absences should initiate the withdrawal procedure within the instructional department. (The term "excessive absences" is defined in the syllabus for the course.)

The instructional department should forward the completed withdrawal form with the instructor's signature and grade assignment to the Registrar's Office. Withdrawal forms for graduate students must be routed through the Graduate Records Office.

Students who withdraw from a course should be aware of the fact that a reduction in their course load because of withdrawal may affect their financial aid, their athletic eligibility, and/or their full-time student status. Students should contact the appropriate office if they have questions about the impact of their withdrawal from a course. Students who are returning from academic dismissal are advised to consult with their academic advisor prior to withdrawal. Veterans and dependents of veterans who receive educational benefits must notify the Office of Veterans Education Benefits in the Office of the Registrar of any course load reductions.

An undergraduate student who withdraws from a course or is withdrawn by the instructor for excessive absences prior to the midpoint of a semester is assigned a grade of W or WF by the instructor. A student who withdraws or is withdrawn for excessive absences after the midpoint of the semester (date to be specified in the *Schedule of Classes*) is assigned a grade of WF, except in those cases in which the student is doing satisfactory work and the withdrawal is recommended by the Office of Student Affairs because of emergency or health reasons.

Anytime a drop or withdrawal is initiated by someone other than the instructor, the instructor and the student will be notified by the Registrar's Office that the student has been dropped or withdrawn from the class. If a student is withdrawn from a class, the instructor must be allowed the opportunity to provide a grade for the course.

No instructional unit shall drop a student for lack of a prerequisite after the end of one calendar week from the beginning of the term.

No refunds for a reduction in hours due to a withdrawal are authorized. Only credit hour reductions effected by the drop/add process will generate a refund.

A grade of W signifies that the student was passing the course at the time of withdrawal. Such a grade, even if the course was withdrawn from for medical reasons, does not relieve the student from the regular probation and exclusion rules. For more information, see "Academic Probation" and "Academic Dismissal."

Credit for Elementary-Level Language Courses

University of Georgia students who have taken two years of a language in high school may not receive degree credit for the first elementary foreign language course, numbered 1001, in that language.

Students admitted to the University are expected to have met the College Preparatory Curriculum (CPC) requirement of two units of one foreign language. Students who have not met the CPC requirement may register for the elementary-level course to satisfy the requirement with the understanding that 1) the course will not satisfy degree requirements, 2) the course and grade will appear on the student's transcript, and 3) the grade awarded will be included in all grade point averages calculated.

Students may register for and receive degree credit for the first elementary foreign language course, numbered 1001, if they are not using the course to satisfy the CPC requirement and have not taken, or have

taken only one year of, this language in high school.

Forfeiture of Course Credit

By registering for and receiving a grade in a course for which credit hours have already been granted, either by work at the University or by transfer, a student forfeits the previous credits in that course. All grades, however, will be included in the student's UGA cumulative average, if UGA credit, and in the overall average.

Military or Extra-Institutional Experience and Credit

United States Armed Forces Institute (USAFI) courses are not recognized by the University unless they are completed through an accredited institution which grants recognized college credit for same. Such courses are regular correspondence courses and are administered under the Cooperating College Program of USAFI.

Inquiries concerning in-service training should be directed to the Director of Admissions. Evaluations of this training will not be made until such time as the student is accepted for study on the University campus.

College Level Examination Program (CLEP) Tests

Credit may be granted in certain subject areas for satisfactory completion of the College Level Examination Program (CLEP) Tests. Students with prior credit in the field or a related field of the subject area involved will not be granted credit. The University administers these tests through the Testing and Evaluation Center. In general, they are also administered by the education officer on military posts or by centers established by the College Board, of which the University is one.

FINAL EXAMINATIONS

Final Examination Policy

A final examination schedule is published each semester by the Vice President for Academic Affairs and a preliminary copy is printed in the official *Schedule of Classes* publication each term. No time and date departures from the examination schedule should occur without prior approval of the dean of the school or college and the Vice President for Academic Affairs. Similar advance approval also must be obtained to administer standardized, departmental "mass" examinations to groups of students enrolled in the same course.

Although there are special courses where a final examination of the regular type may not be appropriate, each student must be provided the opportunity to stand for a final examination as part of the completion of a full instructional term. Each instructor has the authority to design and administer the final examination in whatever manner is appropriate. Additionally, the instructor has the authority to structure the course syllabus and content so that the final examination may be a summative evaluation of the entire term's work or a portion of the term's work.

Admission to Course Examinations

Students who have not registered for the course will not be admitted to the final examination, and only under extraordinary circumstances will they be admitted to the examination unless they have attended at least 50 percent of the total class and laboratory exercises held in the course.

GRADES

Grading System

The grading system for the University of Georgia is as follows:

A Excellent
B Good
C Satisfactory
D Passing
F Failure
WF Withdrew, failing. This grade indicates that the student was permitted to withdraw from the course while doing unsatisfactory work. Withdrawal from a course under these circumstances is equivalent to a failure. This grade is included in the academic average.
I Incomplete. This symbol indicates that a student was doing satisfactory work but, for non-academic reasons

beyond his/her control, was unable to meet the full requirements of the course. If an I is not satisfactorily removed after two semesters, the symbol I will be changed to the grade F by the appropriate official.

W This symbol indicates that a student was permitted to withdraw without penalty. Withdrawals without penalty will not be permitted after the midpoint of the semester (date to be specified in the *Schedule of Classes*) except in cases of hardship as determined by the appropriate official.

S This symbol indicates satisfactory participation in certain required courses. Normally S grades are given in a limited number of professional, seminar, or graduate-level courses. Credit is included in hours earned. The grade is not included in the academic average.

U This symbol indicates unsatisfactory performance in certain required courses in which S grades may normally be given. No credit is given. The grade is not included in the academic average.

V This symbol indicates an audit. No credit is given. The grade is not included in the academic average.

K This symbol indicates that a student was given credit for the course via a credit by examination program approved by the faculty; e.g., CLEP, AP, Proficiency, etc.

ER This symbol indicates an error in reporting. ER's not removed by the end of the semester subsequent to their assignment will be converted to grades of WF.

NR This symbol indicates that a grade was not received by the Registrar's Office in time for processing. The NR symbol will be replaced by a grade upon receipt of an official grade change form from the instructor.

The cumulative grade point average is based on all residence hours attempted at the University exclusive of S and U grades.

Conversion of Letter Grades to Grade Points

For purposes of computing grade point averages, letter grades are converted into numerical equivalents:

A	4.0	I*
B	3.0	S*
C	2.0	U*
D	1.0	V*
F	0	K*
WF	0	W*

*Not computed

Grade Reports

Grade reports will be mailed directly to students at their permanent address at the end of the semester grading period.

Minimum Grade Point Average

A minimum cumulative grade point average of 2.00 is required to meet all undergraduate graduation requirements. A student will not be approved for graduation if he or she has a grade of I which, when changed to a recorded

grade, could cause the student's grade point average to fall below the minimum required for graduation. This policy applies to students for all degrees conferred by the University.

Change in Grades

A grade in a course recorded by the Registrar cannot be changed except in the following circumstances:

A symbol of I not removed after two semesters becomes an F.

A symbol of ER not removed after one semester becomes a grade of WF.

Any grade will be changed upon a written statement by the instructor that the grade was a factual error. All grade changes are subject to approval by the instructor's department head and the Dean's Office.

ACADEMIC HONORS

Graduation with Honors

The University awards degrees with honors to candidates who meet specified standards of academic excellence. In order to be considered for a degree with honors, a student must meet the following requirements:

1. Graduating seniors whose first matriculation at the University of Georgia occurred in September 1977 or thereafter will be recommended for graduation with honors on the basis of their *overall* grade point average for all college-level work attempted. The overall grade point average or all-college average includes all work attempted at the University of Georgia as well as all college-level transfer work attempted prior to or subsequent to matriculation at the University. Respective standards are as follows:

HONORS DESIGNATION	REQUIRED OVERALL GPA
Summa cum laude	3.90
Magna cum laude	3.70
Cum laude	3.50

Only first baccalaureate degree candidates are eligible for graduation with honors.

2. Graduating seniors whose first matriculation at the University of Georgia occurred between September 1975 and summer 1977 will be recommended for graduation with honors on the basis of their overall grade point average for all college-level work attempted. The overall grade point average or all-college average includes all work attempted at the University of Georgia as well as all college-level transfer work attempted prior to or subsequent to matriculation at the University. Respective standards are as follows:

HONORS DESIGNATION	REQUIRED OVERALL GPA
Summa cum laude	3.90
Magna cum laude	3.60
Cum laude	3.30

Only first baccalaureate degree candidates are eligible for graduation with honors.

3. Graduating seniors whose first matriculation at the University of Georgia occurred prior to September 1975 will be recommended for graduation with honors on the basis of the grade point average and scholastic standards in effect at the time they first matriculated as listed in the 1973-75 and 1975-77 University Bulletin.
   a. Minimum of 60 semester hours in residence after reaching junior classification.
   b. Based on all credit attempted in the semester in which hours attempted equal a minimum of 60.
   c. All hours attempted in the final semester before graduation included.
   d. Respective standards as follows:

Summa cum laude	3.90
Magna cum laude	3.60
Cum laude	3.30

In order to qualify for honors graduation, a student must have a minimum of 50 semester hours in which a letter grade (A,B,C,D, or F) was assigned.

First Honor Graduate

Beginning with the August 1977 graduating class, each student completing his/her first baccalaureate degree with an overall grade

point average of 4.0 will be designated a First Honor Graduate.

Presidential Scholar and Dean's List

The University encourages excellence in scholarship and gives recognition to students whose work is superior by publishing the Presidential Scholar and Dean's Lists from each school or college at the end of each semester. To be named a presidential scholar, students must have achieved during the preceding semester a grade point average of 4.00, earned at least 12 hours in courses numbered 1000 or higher, and received no unsatisfactory or incomplete grades. To be named to the Dean's List, students must have achieved during the preceding semester a grade point average greater than or equal to 3.50 but less than 4.00; earned at least 12 hours in courses numbered 1000 or higher; and received no grades below a B, no unsatisfactory grades, and no incomplete grades.

Honor Fraternities and Societies

Several honor fraternities and societies at the University extend recognition to students on the basis of scholarship and good character. There are chapters of Phi Beta Kappa, Sigma Xi, Phi Kappa Phi, and many college, school, and departmental honor societies.

Honors Day

Honors Day was introduced to give public recognition to students who achieve high scholastic records. Undergraduate students who are in the first five percent of their classes, based on cumulative grade point averages, are included in the Honors Day program.

GRADUATION REQUIREMENTS

Candidates for degrees must show that they have met all general University requirements for such matters as registration and payment of fees and special requirements of the college or school in which they have been registered.

Changes in graduation requirements shall not be made retroactively unless there is clear and compelling reason for doing so. Graduation requirements will be determined as follows:

a. The general university requirements stated in the Bulletin that is current at the time a student matriculates as an undergraduate or graduate student at the University will be the general University requirements which the student must meet for graduation.
b. Requirements imposed by colleges or free-standing schools for graduation will be determined by the Bulletin that is current at the time a student transfers to or enters the college or free-standing school.
c. Requirements for a major, a certificate program, or a minor will be determined by the Bulletin that is current at the time a student declares a major, a minor, or certificate program.
d. The University, a college or school, a department, or a certificate program may permit students who matriculate at the University or who enter a college/school or major under one set of courses or graduation requirements to elect for the requirements that have been instituted since students matriculated at the University or entered a college/school or major, minor, or certificate program.
e. Undergraduate students who have not been enrolled at the University for a period of five years or more may be subjected to different University, college or school, or department requirements than those which existed at the time of matriculation at the University or entry into a given college/school, major, minor, or certificate program.

Application for Graduation

Currently enrolled students pursuing undergraduate and professional degrees will have applications for graduation automatically generated based upon their having earned a specified number of hours toward their degree with a minimum number of these hours also having been earned in residence.

In general, students who are in the first semester of their final year of study will

have applications for graduation generated for the following term. Since degree program hours vary among the schools and colleges, students should contact their respective dean's office during the first semester of their last year of study to ensure that graduation requirements will have been met on a timely basis.

Once applications for graduation have been generated, students may make changes to the expected date of graduation through OASIS by accessing the "Expected Graduation Term" as listed on the Student Registration Main Menu.

Commencement

The University holds two formal commencement ceremonies each year in December and May. Students who graduated during the summer term or who are candidates for graduation at the end of fall will be invited to participate in the December ceremony. Only students who will be candidates for graduation at the end of the spring term will be invited to the May ceremony. For degree candidates, potential honors designations will be determined as of the last term of enrollment prior to graduation. Diplomas will be mailed to students following graduation. Students are responsible for maintaining a current home address or informing the Registrar's Office of a diploma mailing address.

The University reserves the right to withhold the degree of any student who has completed all academic requirements when disciplinary charges are pending or when there is a pending disciplinary action equivalent to suspension or expulsion.

STUDENT EDUCATION RECORDS

The federal Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They include the following:

(1)The right to inspect and review the student's education records, subject to certain specific exceptions. A student wishing to review his/her education records should submit to the registrar, academic dean or other appropriate official a written request that identities the records he/she wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official will advise the student of the correct official to whom the request should be addressed.

(2)The right to request the amendment of the student's education records. A student may ask the University to amend a record that he/she believes is inaccurate or misleading. The student should write the University official responsible for the record, clearly identifying the part of the record he/she wants changed and specifying how it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his/her right to a hearing as well as the hearing procedures.

(3)The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without the student's consent. One exception is disclosure to other University officials who have been determined to have a legitimate educational interest in the information. A University official is a person employed by the University in an administrative, supervisory, academic, research, or support staff position; a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Regents of the University System of Georgia; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another University official in performing his/her duties. A University official has a legitimate educational interest if the official needs to review an education record in order to perform his/her official duties.

Upon request, the University also discloses education records without the student's consent to officials of another school in which a student seeks or intends to enroll. In addition, directory information may be disclosed without a student's consent unless the student has advised the registrar in writing that he/she wishes to restrict access to this information. "Directory Information" includes the student's name, address, telephone listing, e-mail address, date and place of birth, major field of study, participation in officially recognized activities and sports, dates of attendance, degrees and awards received and the most recent previous educational agency or institution attended by the student, as well as the weight and height of members of athletic teams.

(4) The right to file a complaint with the U.S. Department of Education concerning the University's alleged failure to comply with FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-4605.

Copies of the complete University policy statement regarding FERPA may be obtained from the Office of the Registrar.

Name Changes

The name carried on the permanent academic record is the name given on the application for admission and should be the complete legal name. The name will be changed by the Registrar upon request to reflect changes in marital status or legal name changes.

ACADEMIC PROBATION

University-wide regulations provide that students are placed on academic probation at the end of any term in which their UGA cumulative average is below 2.00. Students may remove themselves from academic probation by achieving a 2.00 UGA cumulative average. Transfer credits are not included in the computation of the UGA cumulative average.

Some schools and colleges within the University maintain academic standards specific to their degree requirements which may exceed University regulations. Students who fall below such standards should immediately contact the appropriate officer in their respective dean's office for academic counseling and program evaluation.

Admission to Another College or School While on Probation

A student on probation or on first dismissal in one college or school within the University may not transfer to another college or school without the consent of the dean of the college to which admission is sought.

ACADEMIC DISMISSAL

Students are subject to the retention standards listed below based upon the date of their initial enrollment at the University of Georgia.

I. Students whose first enrollment at the University occurred the summer quarter 1980, or thereafter, will be dismissed after two successive terms of probation (either semester or a combination of quarter and semester) if their UGA cumulative average is below that required

for a designated number of total hours attempted as follows:

Total Semester Hours Attempted	*Required Minimum UGA Cumulative Average*
00-20.9	1.60
21.0-39.9	1.70
40.0-59.9	1.80
60.0-79.9	1.90
80.0 and above	2.00

II. Students whose first enrollment at the University occurred prior to the summer quarter 1980 and who have been enrolled at the University for a minimum of three quarters or two semesters will be dismissed if their UGA cumulative average is below that required for a designated number of total hours attempted, as follows:

Total Semester Hours Attempted	*Required Minimum UGA Cumulative Average*
00-29.9	1.50
30.0-59.9	1.60
60.0-89.9	1.70
90.0-119.9	1.80
120.0-159.9	1.90
160.0 and above	2.00

III. Students who are required by the institution to enroll in Academic Assistance courses are allowed three attempts to complete a program area (English, math, reading, and counseling). Students who have not met the criteria for completion after three attempts will be placed on first academic dismissal from the University regardless of their total hours attempted and UGA cumulative average.

The following policies are used to determine a term of probation, a term of enrollment, total hours attempted, and minimum enrollment requirements:

1. A probationary term is the term of enrollment subsequent to the one in which the student's UGA cumulative average fell below 2.0. Grades earned in courses for which the student received transfer credit are not included in the computation of the UGA cumulative average.
2. Students will be considered enrolled for any term during which they receive a grade or grades other than W or V.
3. Total Hours Attempted include all hours attempted at the University plus all hours transferred to the University with the following exceptions:
   a. Hours in courses with grades of I, W, V, NR, and ER are not counted.
   b. Hours in courses that are numbered less than 1000 are not counted, e.g., Academic Assistance courses, Regents' Remediation courses.
4. Students will not be subject to dismissal if they meet the applicable retention standards listed above at the end of their most recent term of enrollment.
5. If students do not meet the applicable retention standards listed above at the end of their most recent term of attendance, they may be continued on probation provided they were enrolled for a minimum of 9 semester hours and earned a term average of 2.30 or higher. The following policies apply in the computation of the 9-hour minimum enrollment requirement:
   a. These 9 hours must be in courses numbered 1000 or above that are graded A-F exclusively.
   b. Courses in which grades of W, V, I, S, U, NR, or ER are received do not count toward the 9 hours.

First Dismissal

Upon a first academic dismissal, a student may not re-enroll in the University until a full fall or spring semester has elapsed. Each student upon first dismissal will be informed by his or her school or college of procedures and standards that will be applied for readmittance.

Second Dismissal

After a second academic dismissal, students will be suspended from the University for a minimum of one calendar year. At the end of the suspension, permission to return to the University can be granted only by appealing to the University Educational Affairs Committee.

WITHDRAWAL FROM THE UNIVERSITY

No student is permitted to withdraw after registration for a term without notifying the Office of Student Affairs, who shall notify the proper University officials. Veterans or their dependents receiving allowances under acts of Congress must notify the Veterans Education Benefits Office. Refunds will be based on the date of such notification.

A student against whom disciplinary charges are pending will not be permitted to withdraw from the University with a clear record until such charges shall have been resolved.

In general, a student voluntarily withdrawing may return later if scholastically eligible.

Administrative Officers

Gale A. Buchanan, B.S., M.S., Ph.D., *Dean and Director of the College of Agricultural and Environmental Sciences*
Avery D. Clifton, B.S., M.S., Ph.D., *Associate Dean*
David A. Knauft, B.S., Ph.D., *Associate Dean for Academic Affairs*
Josef M. Broder, B.S.A., M.S., Ph.D., *Assistant Dean for Academic Affairs*
Robert A. Isaac, B.S., M.S., Ph.D., *Associate Dean for Extension*
Jerry A. Cherry, B.S., Ph.D., *Associate Dean for Research*

General Information

PURPOSE

The goal of the College of Agricultural and Environmental Sciences instruction program is to educate students in the agricultural and environmental sciences to meet the needs of agriculture and environmental protection on a regional, national, and international level. Few of the graduates from the College enter farm production careers. More than half pursue careers in business, with both agricultural and non-agricultural firms. Other graduates are employed in government, environmental

protection, education, management, finance, research, processing, and manufacturing. The College of Agricultural and Environmental Sciences offers 22 degree programs that prepare students for a wide variety of career opportunities.

ORGANIZATION

The College of Agricultural and Environmental Sciences is organized to administer its three missions: teaching, research, and service. The Dean and Director has overall administrative responsibility. The Associate Dean for Academic Affairs administers the teaching program, the Associate Dean for Research administers the research program of the Agricultural Experiment Stations, and the Associate Dean for Extension administers the public service program of the Cooperative Extension Service. Most of the teaching faculty also have research responsibilities in the Agricultural Experiment Stations.

FACILITIES

Administrative offices for the College are located in Conner Hall on South Campus. All courses offered by the College are taught in buildings, laboratories, and greenhouses on South Campus. Several research farms, as well as plant and animal laboratories, are an integral part of the instruction program.

The Science Library and the University Computer Center are also conveniently located on South Campus. Many courses taught in various departments of the College require use of microcomputers and terminals which access University computers. Five microcomputer and word processing laboratories are located in College of Agricultural and Environmental Sciences classroom buildings for use by students and faculty.

Academic Information

ACADEMIC ADVISING

All undergraduate students in the College of Agricultural and Environmental Sciences are assigned an academic advisor by the head of the department in which the student will major. New students meet with advisors during orientation sessions and permanent advisors are designated shortly after classes begin. Unspecified and pre-veterinary students will be assigned during new student orientation to an academic department in which they will be advised.

DEGREES OFFERED

The College of Agricultural and Environmental Sciences offers four undergraduate degrees: the Bachelor of Science in Agriculture (B.S.A.) with a specified major, the Bachelor of Science in Agricultural Engineering (B.S.A.E.), the Bachelor of Science in Biological Engineering (B.S.B.E.), and the Bachelor of Science in Environmental Health (B.S.E.H.).

The College of Agricultural and Environmental Sciences offers graduate programs leading to the Master of Science (M.S.) degree in agricultural economics, agricultural engineering, agronomy, animal science, dairy science, entomology, environmental health, environmental economics, food science, horticulture, plant pathology, and poultry science. Additional degrees offered by the college are the Master of Agricultural Economics (M.A.E.), the Master of Agricultural Extension (M.A.Ext.), and the Master of Plant Protection and Pest Management (M.P.P.P.M.).

The Ph.D. degree is offered in agricultural economics, agronomy, biological and agricultural engineering, entomology, food science, horticulture, plant pathology, and poultry science. In addition, there are interdisciplinary programs in animal nutrition and animal science (physiology, nutrition, and genetics), plant sciences, and toxicology.

CORE CURRICULUM

For an explanation and description of the University of Georgia Core Curriculum, see page 160 of this Bulletin.

MAJORS

The majors offered by the College and the requirements for each major may be found in the Programs of Study section of this Bulletin, starting on page 162.

ENVIRONMENTAL LITERACY

Prior to graduation, all undergraduate students entering the College of Agricultural and Environmental Sciences Fall Quarter 1993 or later must take one or more courses to promote their awareness of environmental issues.

HONORS PROGRAM

The College of Agricultural and Environmental Sciences participates in programs for superior students including the Honors Program. Admission of beginning freshmen is by invitation. Full-time students who are not invited as entering freshmen but who have a cumulative average of 3.7 or better and 14 or more semester hours may request admission to the program. Students transferring from other universities or colleges with a cumulative average of 3.7 should write directly to the director of the Honors Program and request an interview. Students interested in this program should consult the section "Honors Program" in this bulletin.

SCHOLARSHIPS

In addition to the financial assistance available to all University students, the College of Agricultural and Environmental Sciences provides scholarships, work-study programs and loans to students majoring in the agricultural sciences. For example, opportunity for part-time employment is often available in the College of Agricultural and Environmental Sciences through different academic departments. In addition, there are numerous agricultural scholarships awarded annually in national competitions. Students may apply for these awards through their academic advisors and department heads.

College of Agricultural and Environmental Sciences scholarships are divided into two categories; college-wide scholarships and departmental scholarships. The college-wide scholarships are open to any student in the College of Agricultural and Environmental Sciences. Recipients of the college-wide scholarships are selected by the College of Agricultural and Environmental Sciences Scholarship Committee. Departmental scholarships are available to students enrolled in a specific department. Recipients of the departmental scholarships are selected by a committee within the departments.

To qualify for College of Agricultural and Environmental Sciences scholarships (both college-wide and departmental), a student must be officially enrolled or officially accepted for enrollment in the College of Agricultural and Environmental Sciences. Information and applications on all College of Agricultural and Environmental Sciences scholarships can be obtained by writing: Associate Dean for Academic Affairs, College of Agricultural and Environmental Sciences, 102 Conner Hall, University of Georgia, Athens, GA 30602-7502.

Courses of Instruction

See page 307. Courses for the College of Agricultural and Environmental Sciences are listed under the following prefixes:

AAEC	Agricultural and Applied Economics
ADSC	Animal and Dairy Science
AGCM	Agricultural Communications
AGRI	Agriculture
CRSS	Crop and Soil Sciences
EHSC	Environmental Health Science
ENGR	Engineering
ENTO	Entomology
ETEC	Engineering Technology
FDST	Food Science and Technology
HORT	Horticulture
PATH	Plant Pathology
PGEN	Plant Genetics
POUL	Poultry Science

General Information

PURPOSE

The objectives of the faculty of the Franklin College are to advance and disseminate knowledge in the basic academic disciplines of the Arts and Sciences. The college offers its undergraduates both the fundamentals of a liberal education on which to base a lifetime of learning and the opportunity to concentrate in studies which form the foundation for professional pursuits. In concert with the Graduate School, the Franklin College offers graduate students opportunities for advanced study and research. The faculty strives to enrich the intellect and nurture the resourcefulness of the individual student so that he or she may deal with life's challenges with well-founded self-confidence and self-assurance. The objectives of the Franklin College are pursued by a faculty committed to high achievement in teaching and research and creative activities and confident in the quality and the vitality of our educational program.

ORGANIZATION

The Franklin College is organized into several divisions.

The Division of General Studies

All freshmen entering the College, and all transfer students who have not earned

:nough credit to be classified as juniors, are :nrolled in this division. While in the Division of General Studies, students take :ourses in the required University of Georgia Core Curriculum and also work oward satisfying the Franklin College legree requirements, identified below. While in this Division, students who entered he University undecided about their majors nust choose majors for which they are :ligible.

Upon the satisfactory completion of the equirements of this division, which is isually accomplished during the first two 'ears, students transfer either to one of the everal departments of the College or to nother school or college within the Jniversity. Each department in the Franklin College, and each school or college in the Jniversity, has its own regulations concern-ng transfer. Students should contact the ppropriate dean's office well in advance of he expected date of transfer.

The Major Divisions

The major divisions in the Franklin College re:

Division of Biological Sciences: The Departments of Biochemistry and Molecular Biology, Botany, Cellular Biology, Genetics, Marine Sciences, Microbiology, nd the Institute of Ecology.

Division of Fine Arts: The Department f Drama, and the Schools of Art and Music.

Division of Humanities: The Departments of Classics, Comparative Literature, English, Germanic and Slavic Languages, Romance Languages, Speech Communication, History, Philosophy, and Religion.

Division of Social Sciences: The Departments of Anthropology, Geography, History, Philosophy, Political Science, Psychology, Sociology, and Speech Communication.

Division of Physical Sciences: The Departments of Chemistry, Computer Science, Geography, Geology, Marine Sciences, Mathematics, Physics and Astronomy, Statistics, and the Institute of Ecology.

Division of Interdisciplinary Studies: The African American Studies Program, French Studies Program, German Studies Program, Global Policy Studies Program, Latin American and Caribbean Studies Program, Linguistics Program, Medieval Studies Program, Women's Studies Program, Criminal Justice Studies Program, and Interdisciplinary Studies Major Program.

Minimum requirements for entry to a major division are at least 60 semester hours of college credit and a cumulative grade point average of 2.0. Some majors have additional (more stringent) requirements. Once admitted to a major division in the College, a student may transfer to any other division and/or degree program in the Franklin College by satisfying the requirements of that program, and completing the Change of Major form in the Dean's Office.

Academic Information

ADVANCED PLACEMENT

Through Advanced Placement, a student may exempt a course with or without credit. Exemption of a course with credit is equivalent to completing the course. This credit counts toward the 120 semester hours required for graduation and may be used to satisfy core curriculum requirements. If a course is exempted without credit, a core curriculum requirement may be met. If so, the student has the opportunity to choose an equivalent number of credit hours in electives in order to meet overall graduation requirements. For further information concerning Advanced Placement, inquire at the Honors Office in the Academic Building.

APPLICATION FOR GRADUATION

The Registrar's Office produces graduation checksheets for currently enrolled students who have completed 80 semester hours toward their degrees. Each student is responsible for contacting the Graduation Certification Office (542-1522) to complete degree certification. Failure to do so may result in postponement of graduation.

ACADEMIC ADVISING

Academic advising is mandatory in the Franklin College of Arts and Sciences and is provided by a combination of professional advisors and faculty members. While in the General Studies Division, most students will be advised in New College by professional advisors. Students sign up for appointments in person in New College.

Once students have been admitted to major divisions, they should go to their major departments for assignment of faculty advisors. Students with general questions or problems concerning academic matters are encouraged to contact the Coordinator of Academic Advising in the Dean's Office, 106 New College.

HONORS PROGRAM

Appropriate Honors courses may substitute for corresponding courses in the curriculum of the College of Arts and Sciences. Contact the Honors Program Office for information.

Degrees and Programs Offered

The Franklin College offers several baccalaureate degrees and participates in several combined degree programs. Each of these degrees requires a liberal education in the division of general studies and a major in one of the major divisions. In addition, several certificate programs allow students to combine a major in one discipline with interdisciplinary work in others.

The following degrees are offered by the College of Arts and Sciences:

Bachelor of Arts, in which the major may be in any major or division of the College, in Economics, in the Honors Interdisciplinary Studies Program, or the Interdisciplinary Studies Major of the Division of Interdisciplinary Studies.

Bachelor of Science, in which the major must be in the Divisions of Biological or Physical Sciences, in the Honors Interdisciplinary Studies Program, or the Interdisciplinary Studies Major of the Division of Interdisciplinary Studies.

Bachelor of Science in Chemistry, in which the major must be Chemistry.

Bachelor of Fine Arts, in which the major must be in the Division of Fine Arts or the Interdisciplinary Major of the Division of Interdisciplinary Studies.

Bachelor of Music, in which the major must be in Music.

Joint Degree Programs. For students of superior scholastic standing, the Franklin College offers programs leading to a baccalaureate degree from the College combined with a professional degree or program from another school or college. They are:

Bachelor of Science, offered with the Medical College of Georgia.

Bachelor of Science, offered with the College of Veterinary Medicine at the University.

Combined Bachelor-Master Degree, offered with the Graduate School at the University.

Also, there are several programs which may be combined with majors in other areas: Institute for African American Studies, French Studies Program, German Studies Program, Global Policy Studies Program, Latin American and Caribbean Studies Program, Medieval Studies Program, Women's Studies Program, the Pre-Theology program and the A.B. or B.S. with provision for a teaching certificate. Each of these degrees and programs is described in the Programs of Study section of this Bulletin.

Double Major. A double major is two separate majors in the same degree. A double major is earned when the requirements for a major in each of the two areas are satisfied and the requirements for the degree are satisfied. It is sometimes possible to count the same course twice, once in each major, in satisfying the major requirements. When two separate degrees are earned, this is called a *dual degree*. See the Academic Information section of this Bulletin for regulations.

Minor. Many departments and programs offer the chance to earn a minor by taking 15-18 semester hours of approved courses. Contact the individual department or program for information.

CORE CURRICULUM

For a description and explanation of the University of Georgia Core Curriculum, see page 160 of this Bulletin.

DEGREE REQUIREMENTS

Requirements for the degrees and majors offered by the Franklin College may be found in the Programs of Study section of this Bulletin, starting on page 162.

UNIVERSITY OF GEORGIA GRADUATION REQUIREMENTS

For a description and explanation of University-wide requirements for graduation, see Degree Requirements in the Academic Information section of this Bulletin.

ADDITIONAL REQUIREMENTS FOR DEGREES IN THE FRANKLIN COLLEGE

1. All degree recipients must have satisfactorily completed one course certified by the College as dealing with multicultural subject matter.
2. All A.B. and B.S. degree recipients must demonstrate competency in a foreign language equivalent to completion of the third semester of study at the University of Georgia. This requirement may be met by satisfactory scores on a language placement test (including AP, SAT II, UGA placement tests, or the TOEFL if English is not the student's native language) or satisfactory completion of a third semester course at an accredited college or university.
3. All A.B. and B.S. degree recipients must have satisfactorily completed a minimum of one college course in literature; one college course in history; two college courses in social science (not including history); and two college courses dealing with the disciplines of fine and performing arts, philosophy, or religion.
4. All A.B. and B.S. degree recipients must have satisfactorily completed one course in the biological sciences and one course in the physical sciences.

WAIVER OF DEGREE REQUIREMENTS

Course substitutions or waiver of requirements may be made only upon written approval of the Dean or the Senate Committee on Academic Standards of the College of Arts and Sciences. In some cases, specific courses listed in the degree requirements may be replaced by higher level courses. Consult with an advisor for particulars.

Other Degree Programs

BACHELOR OF ARTS OR BACHELOR OF SCIENCE (With Provisions for a Professional Secondary School Teaching Certificate)

Either degree requires that some courses be taken in both the College of Education and the Franklin College of Arts and Sciences. Students interested in meeting teacher certification requirements should inquire at both the Student Services Center, College of Education, and in the Franklin College of Arts and Sciences to determine their appropriate advisors. Each student's program must then have the approval of both advisors and the dean's office of each college.

COMBINED BACHELOR/MASTER DEGREE

Certain exceptional students entering the University each year with unusual academic achievements may have potential to plan a curriculum leading directly to a master's degree during the four-year period normally used to complete the baccalaureate. This combined bachelor/master degree objective is perhaps the greatest academic challenge offered by the University.

A student interested in this degree objective submits credentials for evaluation to the Honors Program. Candidates should have obtained at least 15 semester credits (English, foreign languages, mathematics, history, political science, biology, chemistry, and others) through the Advanced

Placement Program. Each candidate should:

- be ready to begin sophomore studies during the first year here;
- have balanced Scholastic Aptitude Test (SAT) scores totaling 1300 or above;
- come with a general inclination for a major;
- exhibit motivation;
- provide supporting credentials that indicate other superior academic achievements.

Courses of Instruction

Courses for the College of Arts and Sciences are listed under the following prefixes:

AFAM	African American Studies
ANTH	Anthropology
ARAB	Arabic
ARED	Art Education
ARGD	Graphic Design
ARHI	Art History
ARID	Interior Design
ARST	Studio Art
ARTI	Artificial Intelligence

General Information

PURPOSE

The Terry College of Business intends not only to teach undergraduate and graduate students, but also to conduct a broad program of basic and applied research and to render extensive service to society. The particular task is one of educating persons for the practice of business administration.

ACCREDITATION

The Terry College is a member of AACSB, the International Association for Management Education, the recognized national accrediting association for collegiate schools of business.

FACILITIES

The administrative offices are located in the five-story R. Preston Brooks Hall on the north campus. The majority of business courses are taught in Caldwell Hall, a seven-story classroom building adjacent to Brooks Hall. Sanford Hall, a state-of-the-art facility opened in 1997, provides additional classrooms, a student center, and the office of the Undergraduate Program. Detailed information about the Terry College, undergraduate and graduate programs, faculty, departments, and research centers can be accessed at *http://www.cba.uga.edu*.

Undergraduate Program

ACADEMIC ADVISING

Academic advisement in the Terry College is coordinated by the Director of the Undergraduate Program. Each major department has a coordinator who is responsible for upper division academic advising.

HONORS PROGRAM

Admission of students to the University of Georgia Honors Program is by invitation only. Beginning freshmen are admitted on the basis of high school grades and scores on the College Entrance Examination Board Scholastic Aptitude Tests, and on the basis of placement and qualifying examinations administered by the University. For all other students, grades made at the University determine admission to the program.

DEGREES OFFERED

The Terry College offers the undergraduate degree, Bachelor of Business Administration. The School of Accounting offers a five-year course of study leading to a B.B.A./M.Acc. degree.

Several graduate degree programs in business are described in the *Graduate School Bulletin*, including the Master of Business Administration, Master of Accountancy, Master of Marketing Research, and the Master of Arts and Doctor of Philosophy degrees in business-related fields. Also offered are joint degree programs in Master of Business Administration-Law and Master of Accountancy-Law. Information on any of these graduate degree programs may be obtained by writing the Director of Graduate Programs within the Terry College. Visit our home page on the Web at *http://www.cba.uga.edu.*

ENTRANCE REQUIREMENTS

Entrance requirements for incoming freshmen, transfer students, and students declaring majors within the University of Georgia may be higher in selected BBA majors. Entrance requirements for each major may be found in the Programs of Study section of this Bulletin. Please check with the UGA Office of Admissions (www.uga.edu/admit/) if you are an incoming freshman, or with the Terry College, Office of Undergraduate Programs (www.cba.uga.edu), if you are a transfer student.

MAJORS

Major fields of study include: accounting, economics, finance, general business, international business, management, management information systems, marketing, real estate, and risk management and insurance. See the Programs of Study section of this Bulletin for requirements for these majors.

INTERNSHIPS

Junior and senior students may choose to gain experience by serving internships. Within departmental guidelines, students may receive academic credit for internships.

STUDY ABROAD

Students considering a Study Abroad Program should check with their academic advisor for information about specific courses and programs. Students should work through the UGA Study Abroad Program to insure that academic credit is transferrable and applicable to the BBA degree. Several Study Abroad and Exchange Programs are coordinated through the International Business Program in the Terry College.

Bachelor of Business Administration Degree Requirements

All students should acquaint themselves with degree requirements applicable to all students of the University as set forth in the general Academic Information section of this bulletin.

In order to qualify for a Bachelor of Business Administration degree, a student

ust meet the entrance requirements which ay vary from other schools and colleges ithin the University, be enrolled in one of e major disciplines, and meet all of the gree requirements as set forth by the rry College.

ESIDENCY

addition to the UGA residence policy, the rry College has the following residency quirement: BBA students must complete least 30 semester hours as a student in the rry College. Students are also expected complete major courses in residence. owever in some cases with departmental rmission, a student may receive transfer edit for one major course.

RADES

rades or GPAs of 2.0 in the following eas are required for BBA degree rtification:

ENGL 1101 and 1102 combined. Students will not receive credit for courses numbered 3000 and above until they have satisfactorily completed ENGL 1101 and 1102.

All major courses;

Business cumulative GPA; and

UGA cumulative GPA.

RANSFER STUDENTS

dmission standards for transfer students to major in the Terry College of Business ay vary from those standards set by other hools and colleges within the University. ceptance to the Terry College is ntingent upon the student's currently bmitted transcript and transfer GPA.

The specific credit for work done at other stitutions which will apply toward the chelor of Business Administration degree is determined by UGA Admissions ansfer Credit Evaluators. Establishing a nsfer transcript does not necessarily ean that all transfer credit will be accepted ward a Bachelor of Business Administration degree.

Transfer students attend transfer orientation sessions. During orientation, students view their progress toward the B.B.A. degree with a Terry College academic advisor. Advisors help students with course selection prior to registration.

Regulations governing transfer students are given in the Academic Information section of this Bulletin.

ACADEMIC HOURS REQUIRED FOR THE BBA DEGREE

60 hours: University System Core Curriculum, Areas A - F

24 hours: General electives (as specified in the BBA Check sheet)

12 hours: Upper division business core (3000-series courses)

3 hours: Upper division business selection (4000-series courses)

21 hours: Major required courses

120 hours, plus one hour of Physical Education.

UNIVERSITY OF GEORGIA DEGREE REQUIREMENTS

For a description and explanation of University-wide requirements for graduation, see Degree Requirements under Academic Information in this Bulletin.

CORE CURRICULUM

See page 160 of this Bulletin for a detailed explanation and description of the Core Curriculum. Preferred courses for Areas A-F are indicated under the specific BBA majors in the Programs of Study section of this Bulletin.

MAJOR AND ADDITIONAL BBA REQUIREMENTS

Course descriptions and prerequisites are listed under Courses of Instruction, starting on page 307. This information is also found in the on-line UGA Bulletin: www.bulletin.uga.edu.

General Electives (eight courses—24 hours)

15 hours in Arts and Sciences

1 business course outside major (upper division)

2 business courses outside department (upper division)

Upper Division Business Core (four courses—12 hours)

All business students take the following four courses:

MGMT 3000 Management of Organizations and Individuals

MSIT 3000 Statistical Analysis for Business

FINA 3000 Financial Management

MARK 3000 Principles of Marketing

Upper Division Business Selection (one course—3 hours)

(If the course selected is in student's major, a second 4000 course should be used on Line "b" of General Electives as indicated on the BBA checksheet.)

ACCT 4000 Accounting Information in a Multinational Setting

FINA 4000 Money and Capital Markets

ECON 4000 The Economics of Human Resources

MARK 4000 Marketing Research for Business Decision

MGMT 4000 Integrated Resource Management

REAL 4000 Real Estate

RMIN 4000 Risk Management and Insurance

Major Required Courses (7 courses—21 hours)

Each student will take seven designated 3-hour courses in a given major. Major courses in the 4000-5000 series are restricted to Terry College students (or permission of College).

Courses of Instruction

See page 307. Courses for the Terry College of Business are listed under the following prefixes:

ACCT	Accounting
ECON	Economics
FINA	Banking and Finance
INTB	International Business
LEGL	Legal Studies
MARK	Marketing
MSIT	Management Sciences and Information Technology
MGMT	Management
REAL	Real Estate
RMIN	Risk Management and Insurance

General Information

PURPOSE

The College of Education is the division of the University of Georgia that provides and administers all professional programs and courses designed for the preparation of teachers and other professional education positions. In its role of educational leadership, the College recruits and selects prospective educational professionals, provides pre-service and in-service training, conducts research to solve educational problems, and offers field service to all types and levels of educational institutions.

ORGANIZATION OF UNDERGRADUATE PROGRAMS

Undergraduate programs in the College of Education prepare students to teach in the following fields:

Early Childhood (preschool, kindergarten, grades 1-5)

Middle School (grades 4-8)

Secondary (grades 7-12) in agricultural education, business education, health occupations education, home economics, marketing education, technology education, trade and industrial education, and the areas of English, mathematics, science, and social science.

Grades P-12 in art, dance, foreign language education, health promotion and education, music, physical education, and special education.

Programs leading to certification as a counselor, school administrator, etc., are all graduate or postbaccalaureate programs.

The College administers all programs in professional education. The entire re-

sources of the University are used in the education of teachers. Some programs such as Agriculture Education, Art Education, Home Economics Education, and Music Education are primarily housed outside the College of Education and many courses in other teacher education programs are taught by other divisions of the University.

Although specific course requirements vary with the teaching field, each undergraduate program includes the following elements:

(1)general education, a sequence of courses from a variety of fields, taken primarily in the College of Arts and Sciences in the freshman and sophomore years;

(2)the teaching field or major, consisting of courses designed for the specific subject or grade level of prospective teaching, offered in the College of Agricultural and Environmental Sciences, College of Arts and Sciences, College of Business Administration, College of Education, and College of Family and Consumer Sciences;

(3)work in professional education in the College of Education.

Non-teaching majors are also offered in communication sciences and disorders, dance, exercise and sport science, health promotion and education, and recreation and leisure studies.

FACILITIES

The College of Education utilizes extensively the facilities of the University, the community, and the schools in the area. Administrative offices are located in Aderhold Hall. In addition, the following buildings are primarily used for College of Education programs: Physical Education Building, River's Crossing, and Ramsey Student Center.

ACCREDITATION

The University is accredited by the Georgia Professional Standards Commission, the Southern Association of Colleges and Schools, and the National Council for the Accreditation of Teacher Education. Specific programs are also accredited by the American Speech-Language-Hearing Association, National Recreation and Parks Association in cooperation with the American Association for Leisure Recreation, and the American Psychological Association.

ACADEMIC ADVISING

The Associate Dean's Office of the College provides initial advisement for freshmen, transfer students and for those who have not yet made a decision about a specific teaching field or level. Following this initial advisement period, students are assigned to an advisor in their teaching field. Students should consult an advisor in their teaching field as early as possible in their program and should confer with their advisor each semester to plan programs and preregister.

Students who need initial advisement should contact the Associate Dean's Office, G-10 Aderhold Hall.

Special Programs

HONORS PROGRAM

Students in the College of Education are encouraged to participate in the Honors Program. Admission of beginning students is by invitation. Enrolled students with a cumulative grade point average of 3.0 or higher may apply for admission to the program. The College of Education offers individual study and Honors thesis courses and an Honors section of Learning and Motivation (EPSY 2020H) and Child and Adolescent Development (EPSY 3010H). See the Honors Programs section of this Bulletin for more information about this program.

EDUCATIONAL FIELD EXPERIENCES (Student Teaching and Practicums)

Supervised observation-participation in cooperating schools is required of most candidates for a degree leading to professional certification. The extent of required participation in pre-student teaching laboratory experiences varies extensively among different teacher preparation programs. A minimum of one full semester of student

teaching is required of all teaching candidates.

Placement in student teaching requires admission to Teacher Education and other prerequisites as outlined under the Admission to Teacher Education section. Student teaching activities are directed by college supervisors and selected cooperating supervising teachers. High school student teachers usually teach in one teaching field, middle grades in one or two teaching fields, and early childhood at a kindergarten or primary level.

Student teaching involves full-time placement in a school setting. It normally carries 12 hours credit; no additional course work is permitted during student teaching. Students should anticipate that additional expenses will be incurred during student teaching as placement may require transportation and off-campus living arrangements.

Students in some programs participate in a school practicum prior to student teaching. Students should see their departmental advisors concerning this requirement.

Practicums are required for non-teacher education programs which include exercise and sport science, health promotion and education, recreation and leisure studies, and dance education.

Clinics and Laboratories

READING CLINIC

The Reading Clinic provides assessment and instruction of school-aged children with reading difficulties. These services are provided both as a service to the state of Georgia and to provide useful experiences for our graduate students. The Clinic provides direct tutoring for children with reading problems. This tutoring is done individually or in small groups and is based on an analysis of the child's needs in reading. The Clinic also will evaluate children for the purpose of making suggestions for more effective reading instruction. These evaluations are followed up with a conference with school personnel to implement these suggestions. Arrangements for these services should be made through the Director of the Clinic.

SPECIAL EDUCATION CLINIC

The Learning Disabilities Clinic functions as a service facility for the community and a training facility for prospective teachers who are developing their assessment skills. The Adult Clinic provides in-depth diagnostic evaluations and intervention services to individuals over the age of 18 who think their learning, vocational, or social difficulties may be due to learning disabilities. Arrangements may be made through the clinic's intake coordinator.

SPEECH AND HEARING CLINIC

The communication sciences and disorders area is concerned with training of speech/language pathologists, audiologists, and teachers of the hearing impaired, and the conducting of research in speech, language, and hearing disorders. The Speech and Hearing Clinic extends its diagnostic and treatment services to all children and adults who have functional or organic problems of oral communication. Particular attention is given to assisting University students. Arrangements for these services can be made by contacting the Clinic office at (706) 542-4598.

STUDENT DEVELOPMENT LABORATORY

The Student Development Laboratory provides counseling and other developmental personal growth experiences for all college-age students. Experiences include academic success training (study skills), human relations skill building, dealing with test anxiety, leadership training, improving creative thinking, asserting oneself positively, and personal decision-making skill building. In addition, individual and group counseling opportunities are available. The program is coordinated and implemented by faculty and advanced graduate students in the Department of Counseling and Human Development Services. The Student Development Laboratory is located in 420 Aderhold Hall, (706) 542-4140.

Academic Information

DEGREES OFFERED

The College of Education prepares its students for the undergraduate degree of Bachelor of Science in Education (B.S.Ed.). By coordinating programs with other appropriate colleges and schools, the College also prepares students for educational specialties within the undergraduate degrees of Bachelor of Science in Agriculture, Bachelor of Fine Arts, Bachelor of Science in Family and Consumer Sciences, and Bachelor of Music.

Through the Graduate School of the University, the following degrees are offered: Master of Education, Master of Arts in Education, Master of Music Education, Educational Specialist, Doctor of Education, and Doctor of Philosophy. See the *Graduate School Bulletin* for further information.

MATRICULATION

Most students who prepare for teaching matriculate in the College of Education and pursue one of the programs leading to the degree of Bachelor of Science in Education. Students matriculate in other colleges for specialized degrees with educational applications.

Students enrolled in other colleges of the University who seek certification as teachers should apply for admission to Teacher Education, have their individual programs approved by the College of Education by the beginning of the junior year, and must meet all requirements of the approved professional programs.

A distinction is made between matriculation in a division of the University or the College of Education offering teacher education programs and formal admission to a program in teacher education, as described in "Admission to the College and to Teacher Education."

ADMISSION TO THE COLLEGE AND TO TEACHER EDUCATION

Standards for admission of freshmen to the College of Education are the same as for those admitted to the University. Admission standards for transfer students to the College of Education may vary from those standards set by other schools and colleges within the University and may also vary according to the number of hours earned.

Enrollment in the College of Education does not constitute admission as a candidate for a degree in teacher education or professional certification in other professional fields. Each student who seeks a professional teaching degree or professional teacher certification must apply for admission to Teacher Education through the College's Educational Field Experience Office, 315 Aderhold Hall.

For admission of transfer students to the College of Education, the following grade point averages (GPAs) will apply: All external transfer students must have a minimum overall GPA of at least a 2.3 for acceptance to the College. All internal transfer students (transfers from within the University) must meet the following minimum requirements: for up to 30 semester hours, 2.0; from 31 to 60 semester hours, 2.1; from 61 to 90 semester hours, 2.2; and for 91 or more semester hours, a 2.. GPA.

Many of the majors in the College of Education require higher GPAs than these minimum requirements listed. Students should check with individual departments to determine the actual requirements for entry into their program.

In determining the GPA for admission, an overall grade point average will be used for transfer students from other institutions while a cumulative grade point average will be used for University of Georgia students.

Admission to Teacher Education must be obtained prior to enrollment in professional teacher education courses designated (TE). Requirements for admission to undergraduate Teacher Education include: completion of at least one semester of academic work at the University of Georgia; 2.5 overall grade point average, with the exception of majors in occupational studies which require a 2. cumulative grade point average; satisfactory completion of English 1101 and 1102 satisfactory completion of EFND 2030

the equivalent course taken at another institution; passing of the Regents' Test; demonstration of oral language competency; and departmental recommendation.

In addition, please note the B.S.Ed. degree requirements below.

Courses that are designated as Teacher Education (TE) require admission to a teacher education program before they can be taken. *Some programs have GPA requirements exceeding these.* Language proficiency and the 2.5 GPA (or higher program requirements) must be maintained throughout the programs. If a student already holds a degree, admission to teacher education is based on the *overall* GPA.

To receive a student teaching assignment a student must:

- make application at the Educational Field Experience Office, 315 Aderhold, by the end of the first week of the semester preceding student teaching;
- be admitted to Teacher Education; have at least a 2.5 overall grade point average, with the exception of majors in occupational studies which require a 2.5 cumulative grade point average;
- have completed essentially all required courses in the teaching field with a grade of at least C in each;
- have completed the prerequisite education courses with a grade of at least C in each (courses in curriculum and teaching procedures must have been taken on this campus);
- have successfully completed the school practicum (required in most programs);
- be in satisfactory personal health to assume responsibility in student teaching; and
- be recommended by his/her department.

A student is not permitted to student teach while on probation.

Some program areas have requirements exceeding the above; such requirements must be met to enter the program and for continued matriculation, including student teaching.

CERTIFICATION

Initial teacher certification in Georgia may be obtained only by following an approved teacher education program. Requirements for meeting an approved teacher education program vary depending on area of certification. For specific course requirements relative to an area of interest, students should contact the appropriate department within the College of Education. The department will determine the requirements for entry into the program, the course work required to meet the approved teacher education program, and the procedures for obtaining a professional recommendation.

The Georgia Professional Standards Commission provides evaluations only to determine or establish one's eligibility for a provisional certificate, to determine requirements needed to add a field, and to determine renewal requirements for previously held Georgia certificates. The Commission will no longer outline specific professional education course work requirements to establish the initial professional certificate (except for the level one and two Vocational Education certificate fields).

In addition to completing prescribed academic work, individuals applying for initial teacher certification beginning March 1, 1999, must present passing scores on Praxis I academic skills test in reading, mathematics, and writing. Individuals are exempt from this requirement if they have earned qualifying scores on any of these tests: SAT total score 1000 (with at least 480V and 520M); GRE total score 1030 (with at least 490V and 540Q); or ACT total score 22 (with at least 21V and 22M). An applicant must also earn satisfactory scores on the Praxis II (Subject Assessments) in the appropriate subject areas before an application can be submitted. Applications for evaluation, professional certificates, and Praxis I and II registration packets and study guides are available from the Associate Dean's Office, G-10 Aderhold Hall.

Bachelor of Science in Education Degree Requirements

Students are required to acquaint themselves with general degree requirements

applicable to all students of the University as stated in the Academic Information section of this Bulletin.

Undergraduate teacher education programs are approved by the Georgia Professional Standards Commission and the National Council for the Accreditation of Teacher Education. A person completing any one of these programs may be recommended for certification in Georgia as well as in most other states.

The programs outlined in the Programs of Study section of this Bulletin lead to a Bachelor of Science in Education degree except in agriculture education, art education, home economics education, and music education. For these fields, students who wish to complete a certification program must meet the professional education requirements cited under "Admission to the College and to Teacher Education" and complete required professional teacher education courses. They must also meet the degree requirements for these majors.

The B.S.Ed. programs typically include 120 semester hours. Credit beyond one semester hour of Basic Physical Education (PEDB 1010-1990) may not be applied toward the 120-hour minimum requirement. In the requirements of each particular program, *please note that Teacher Education (TE) courses require admission to Teacher Education prior to enrollment.*

CORE CURRICULUM

For general information on the University of Georgia Core Curriculum, see page 160 of this Bulletin.

HOURS AND RESIDENCY

A minimum of 120 semester hours is required for a Bachelor of Science in Education degree. A minimum of 40 of the last 60 semester hours must be taken in residence at the University.

GRADES

A candidate for the Bachelor of Science in Education degree or other baccalaureate degree leading to teacher certification must obtain a grade of C or higher in the prescribed education field courses.

CANDIDACY FOR A DEGREE

When a student has earned at least 90 semester hours, a graduation checksheet will automatically be generated by the Office of the Registrar for processing. For graduation information, contact the Associate Dean's Office, G-10 Aderhold Hall.

Courses of Instruction

Courses for the College of Education are listed under the following prefixes:

CMSD	Communication Sciences and Disorders
DANC	Dance Education
EAGR	Agricultural Education
EBUS	Business Education
ECHD	Counseling and Human Development Services
EDEC	Early Childhood Education
EDIT	Instructional Technology
EDEL	Elementary Education
EDMS	Middle School Education
EDUC	Education
EFND	Foundations of Education
EHEC	Home Economics Education
ELAN	Language Education
EMAT	Mathematics Education
EMKT	Marketing Education
EMUS	Music Education
EOCS	Occupational Studies
ERSH	Educational Research and Measurement
ESCI	Science Education
ESOC	Social Science Education
ETES	Technological Studies
EXRS	Exercise Science
HPRB	Health Promotion and Behavior
PEDB	Physical Education Basic
PEDS	Physical Education and Sport Studies
READ	Reading Education
RLST	Recreation and Leisure Studies
SPED	Special Education

The School of Environmental Design

Caldwell Hall, (706) 542-1816
FAX: (706) 542-4485
Homepage URL: http://www.sed.uga.edu/
Email:www@sed.uga.edu

Administrative Officer

John F. Crowley, B.A., M.A., Ph.D., *Dean*

General Information

PURPOSE

The School of Environmental Design is a center for providing education for those students who wish to play a role in the planning, design, and management of the outdoor environment. The undergraduate program provides professional instruction in landscape architecture.

The discipline of landscape architecture is both an art and a science, and includes the creation and management of environments which meet human needs and are ecologically sensitive. Whether practicing in urban settings or natural environments, the landscape architect's tools blend horticultural, engineering, and artistic skills with an understanding of natural processes and a sense of stewardship.

Special Programs

INTERNSHIP

Under the Internship Program, qualified students are given the opportunity to gain experience by working in a professional office under the supervision of a registered landscape architect or related practitioner (architects, engineers, or planners).

The internship requirements are as follows:

(1) Internships must be approved in advance by the internship coordinator.
(2) To be eligible to serve in an internship for credit, students must have junior standing or special permission.
(3) Students are required to take a minimum of 8 credit hours of internship before graduation.
(4) Students who participate in internships must pre-register and pay tuition for LAND 4700 during the semester in

which the internship is being taken.
(5) Students must submit written reports on their internships.
(6) Evaluations are made by the employers at the end of the internships.
(7) Credit for the course will be given after the written reports and employers' evaluations on work activities have been presented.

A grade of S (satisfactory) or U (unsatisfactory) will be given for each three hours of credit.

FIELD TRIPS

Supervised field trips are required of all students in connection with their classes. Students travel at their own expense to designated places of landscape interest in Georgia and adjoining states, accompanied by a member of the teaching staff.

STUDIES ABROAD

Selected students are permitted to enroll in a studies abroad program and may receive credit towards their degree. In conjunction with the School of Art, the School provides a studio program in Italy offering up to six credit hours of instruction in landscape architecture and three credit hours of instruction in art history.

There are also a limited number of spaces in exchange programs in Australia and England. See your advisor for details.

Degrees Offered

The studies offered in landscape architecture at the University of Georgia are built around a curriculum designed to prepare students for professional practice or graduate education. The program leads to the Bachelor of Landscape Architecture degree. This five-year professional program is accredited by the National Commission on Accrediting and the American Society of Landscape Architects. A Master of Landscape Architecture degree and a Master of Historic Preservation degree are offered through the Graduate School of the University. Only a limited number of positions are available in the School and early application is advised. The best qualified students are selected from the pool of applicants.

LANDSCAPE ARCHITECTURE CORE CURRICULUM

This program is intended to prepare students for the professional program in landscape architecture. For an explanation and description of the University of Georgia Core Curriculum, see page 160 in this Bulletin.

PROFESSIONAL PROGRAM

Requirements for the professional program are outlined in the Programs of Study section of this Bulletin.

Courses of Instruction

Courses for the School of Environmental Design are listed under the prefixes EDES, Environmental Design, HIPR, Historic Preservation, and LAND, Landscape Architecture.

The College of Family and Consumer Sciences

Jan Hathcote, *Associate Dean for Academic Affairs and Research*
Christine M. Todd, *Associate Dean for Outreach*
Lynn Hogan, *Director of Student Services and Alumni Relations*
Patsy Skeen, *Department Head, Department of Child and Family Development*
Roy Martin, *Department Head, Department of Foods and Nutrition*
Brenda Cude, *Department Head, Department of Housing and Consumer Economics*
Ian Hardin, *Department Head, Department of Textiles, Merchandising & Interiors*

General Information

PURPOSE AND ORGANIZATION

The College of Family and Consumer Sciences offers educational programs that lead to a number of professional careers. The curricula provide well-rounded programs of general, scientific, and technical education.

Upon completing core curriculum requirements, students take specialized professional courses specific to their majors and professional goals. Applied learning experiences and internships are emphasized in all programs of study in order to prepare students for their future work settings. Leadership and communication skills are also emphasized through various college programs and activities as are experiences that promote knowledge of and sensitivity to issues of multicultural diversity.

FACILITIES

Dawson Hall and Speirs Hall, located on South Campus, house the modern and fully equipped teaching laboratories and classrooms for foods, nutrition, and textiles, as well as research and computer laboratories. A calorimetry laboratory is located in Boyd Graduate Studies Building.

The Margaret E. McPhaul Child and Family Development Center houses laboratories for instructional, clinical, and research activities which provide opportunities for observations of and work with normal infants, children under six, parents, and families. In addition, early intervention and Head Start programs operate as integral parts of the McPhaul Center and provide instructional, research, observational, and participation opportunities with young developmentally challenged children and their families.

The Housing and Demographics Research Center (HDRC) provides sound housing research, promotes a more rational regulatory environment for the building community, and disseminates research findings to policy makers, interested parties and the general public.

Academic Information

ADVISING

Faculty are responsible for academic advising of sophomores, juniors, and seniors in the College of Family and Consumer Sciences. First-year students are advised by the Office of Student Services and Alumni Relations. Students transferring into the College receive initial advising in the Office of Student Services and Alumni Relations.

DEGREES OFFERED

The College of Family and Consumer Sciences offers the degree of Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.), with majors in Child and Family Development; Foods and Nutrition; Housing and Consumer Economics; and Textiles, Merchandising and Interiors. The majors are described under Programs of Study in this Bulletin.

The College also offers both the Master of Science (M.S.) Degree and Doctor of Philosophy (Ph.D.) degree in all departments. For further information, refer to the *Graduate School Bulletin*.

CORE CURRICULUM

For an explanation and description of the University of Georgia Core Curriculum, see page 160 in this Bulletin.

COLLEGE-WIDE DEGREE REQUIREMENTS

CHFD 2100 or HACE 2100 is required of all students pursuing the Bachelor of Science degree in Family and Consumer Sciences.

ACCREDITATION

The College of Family and Consumer Sciences is accredited by the American Association of Family and Consumer Sciences.

SCHOLARSHIPS

There are numerous scholarships available in the College of Family and Consumer Sciences. Additional information can be obtained in the Office of Student Services and Alumni Relations.

Courses of Instruction

Courses in the College of Family and Consumer Sciences are listed under the following prefixes:

CHFD	Child and Family Development
FDNS	Foods and Nutrition
HACE	Housing and Consumer Economics
TXMI	Textiles, Merchandising and Interiors

The Daniel B. Warnell School of Forest Resources

Forest Resources Building, (706)542-2686
Fax: (706)542-8356
Homepage URL: http://www.uga.edu/wfsr/

Administrative Officers

Arnett C. Mace, Jr., B.S., M.S., Ph.D., *Dean*
Bruce C. Bongarten, B.S., Ph.D., *Associate Dean*

General Information

The Warnell School of Forest Resources was established in 1906 through the generosity of George Foster Peabody. It is the oldest such institution in the southern United States. In 1991 the School was dedicated in honor of the late Daniel B. Warnell, a prominent banker, landowner, and state legislator who made major contributions to rural development, public education, and conservation of forest resources.

The educational, research, and service programs in the School address the use and management of all forest resources.

PURPOSE

The forested lands of the southeastern U.S. form a large, diverse, and productive ecosystem. The timber and wood fiber produced on these lands play an important role in the economy of the state, region, country, and world. The intangible benefits provided by these lands, including habitat for game and non-game animals, special plant associations, living filters for aquatic and atmospheric systems, places for outdoor recreation, for solitude and reflection are increasingly valued by society.

Society places many competing demands on forested and wild lands making their management a more complex and important task now than at any time in history. Managing these lands to meet competing demands requires professionals who understand how forest systems function and how they can be managed to effectively fulfill societal desires. The four undergraduate majors offered by the School address the management of the forested lands of the region from the perspectives of forestry,

wildlife, fisheries and aquaculture, and forest environmental resources.

The School educates students who are capable of being responsible stewards, competent managers and resource staff professionals, or who plan to pursue graduate study. The curriculum emphasizes the biological and physical science knowledge base that supports responsible management, the required economic and social science base, the quantitative skills necessary for the rational analysis of management alternatives and decisions, and the communication and interpersonal skills required to be professionally effective. The curriculum has been designed to emphasize the holistic nature of forest resource systems.

FACILITIES

The Daniel B. Warnell School of Forest Resources is located in a complex of four buildings on south campus. The School manages almost 30,000 acres of forest land including the 800-acre Whitehall Forest, located four miles from the main campus. This forest serves as a field laboratory for instruction and research. Facilities include experimental fish ponds, a wildlife and fisheries laboratory, a tree nursery, and a wood utilization and plant sciences building.

Other major forest areas managed by the School include: 1) the Oconee Forest Park, a recreation and teaching forest located at the edge of the main campus; 2) the B.F. Grant Memorial Forest, a parcel comprising 13,000 acres of Putnam County, used primarily for research and demonstration; 3) the Thompson Mills Forest, which is Georgia's official arboretum; and 4) the 1,500-acre Satilla River Forest, devoted to wildlife and fisheries research. In addition, the School operates the Cohutta Fisheries Research and Extension Center located in northern Georgia about 150 miles from Athens. The School also manages several properties that were given to the University of Georgia Foundation as gifts to the Warnell School of Forest Resources. These include the 7500 acre Kimberly-Clark Property in central Georgia and the 2500-acre Wheatley Property on Lake Blackshear in southwestern Georgia.

Academic Information

ADVISING

Forest Resources students attending the University of Georgia are advised by faculty and staff of the Warnell School of Forest Resources. Students attending other institutions who plan to enter one of the four forest resources majors at the University of Georgia should contact the Office of the Associate Dean, Warnell School of Forest Resources, for guidance in program planning and course selection.

Selection of appropriate courses to meet degree requirements is the responsibility of the student. Assistance is available through printed material and the School's academic advising program. Students should meet with their advisors each semester to plan programs of study and select courses. Students should pay particular attention to listed course prerequisites when selecting and scheduling classes in the School. Prerequisites are enforced by the OASIS registration system and permission of the advisor and the course instructor is required to override stated prerequisites for all courses in the School.

DEGREES OFFERED

The Warnell School of Forest Resources offers the professional undergraduate degree of Bachelor of Science in Forest Resources (B.S.F.R.) with majors in Forestry, Wildlife, Fisheries and Aquaculture, and Forest Environmental Resources. These majors are described in the Programs of Study section of this Bulletin.

Through the Graduate School, the Warnell School of Forest Resources offers programs of study leading to the Master of Forest Resources, the Master of Science, and the Doctor of Philosophy degrees. Persons interested in these programs should contact the Graduate Coordinator of the Warnell School of Forest Resources or refer to the *Graduate Bulletin* of the University.

ACCREDITATION

The undergraduate majors in Forestry,

Wildlife, and Forest Environmental Resources are accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Council on Post-secondary Accreditation and the U.S. Department of Education as the accrediting agency for forestry in the United States. Additionally, the Wildlife major meets the certification requirements of The Wildlife Society. The Fisheries and Aquaculture major meets the Professional Certification Program requirements of the American Fisheries Society.

BACHELOR OF SCIENCE IN FOREST RESOURCES DEGREE REQUIREMENTS

To obtain the B.S.F.R. degree, students must successfully complete 60 credits in the pre-Professional Program and 62-65 credits in the Professional Program (depending on major). In addition, students must meet the University's basic physical education and residency requirements. Students will typically spend four semesters in residence in the Professional Program.

Pre-Professional Curriculum

The pre-Professional curriculum meets the University Core Curriculum requirements. It may be completed at the University of Georgia or at other institutions. Students taking pre-Professional course work at another institution should contact the Office of the Associate Dean, Warnell School of Forest Resources, for assistance in planning programs of study and for confirmation of transfer credit. See page 160 of this Bulletin for an explanation and description of the University of Georgia Core Curriculum.

Professional Curriculum

The Professional curriculum consists of 62-65 credits of which 27 are common to all four majors. Courses common to all majors include study in field measures, ecology, soils and hydrology, fish and wildlife management, biometrics, and forest resources management and policy. All students complete a senior project or senior thesis that integrates previous course work.

Forestry majors choose one of seven Areas of Emphasis: Forest Management, Forest Business, Forest Biology, Forest Recreation, Forest Policy and Administration, Urban Forestry, and Wood Utilization. Students majoring in Forest Environmental Resources choose one of three Areas of Emphasis: Soil and Water, Hydrology and Environmental Systems, and Environmental Resource Assessment. The Wildlife and Fisheries and Aquaculture majors have no Areas of Emphasis.

A complete listing of required courses in each major can be found in the Programs of Study section of this Bulletin.

ADMISSION

Pre-Professional Program

Admission to the pre-Professional Program is handled through the University of Georgia Undergraduate Admissions Office. On the UGA application, indicate "Forest Resources" as the school or college in which you plan to enroll and choose Pre-Forest Resources as your major.

Professional Program

To be admitted to the Professional Program, students must first be admitted to the University through the University Admissions Office. Then they must be admitted to the Warnell School of Forest Resources through a separate application procedure. Application forms for admission to the Warnell School are available from the Office of the Associate Dean.

Students may apply for entry to the Professional Program in fall or spring semester. A maximum of 60 students will be admitted each semester. Applications for fall semester admission are due April 1. Applications for spring semester admission are due September 15. *Note that these deadlines may be earlier than University of Georgia application deadlines.*

Eligibility for Admission to the Professional Program

At the time of matriculation in the Professional Program, students must have completed the pre-Professional curriculum, except that up to 8 credits of electives

(and/or SPCM 1100) may be deferred if an equal number of credits have been completed from the following courses: ECOL 3260-3260L (Wildlife and Fisheries and Aquaculture majors only), FORS 3010-3010L, FORS 3020-3020L, and CRSS (FORS) 3060-3060L.

Admissions Process

- Students who meet the above eligibility requirements and have an overall GPA of 3.0 or higher will be admitted immediately into the Professional Program.
- Students who meet the above requirements and have an overall GPA greater than or equal to 2.5 and less than 3.0 will be admitted into the Professional Program subject to enrollment limitations.
- Students who meet the above requirement and have an overall GPA less than 2.5 may be admitted if openings are available and if they provide satisfactory evidence that they can perform academically at the level expected of students in the Professional Program. Students should submit a statement explaining their academic performance and efforts to improve it.
- Students who have not completed the required course work will be deferred until requirements are met. Students who are deferred or denied admission may appeal the decision to the Associate Dean by written petition.

Student Services and Programs

FINANCIAL AID

In addition to the financial assistance offered through the University's Office of Student Financial Aid, a number of scholarships and awards are available specifically for undergraduate students in forest resources. These awards total about $80,000 annually, and are made possible by donations from forest-related industries and organizations, and from alumni and other interested individuals.

Selection for these scholarships is based on academic achievement, leadership ability, and financial need. Application forms may be obtained from the Office of the Associate Dean.

INTERNSHIPS AND COOPERATIVE EDUCATION PROGRAMS

An active internship program gives students the opportunity to supplement their classroom studies with practical experience in forest resource management. Students may work with private companies, landowners, conservation organizations, and federal and state agencies.

We also offer a Cooperative Education Program with federal and state agencies such as the U.S. Fish and Wildlife Service, the U.S. Forest Service, and the Georgia Department of Natural Resources. Students may alternate semesters of off-campus work with semesters of on-campus study. Although we make every effort to facilitate cooperative education, the arrangement for such programs is usually left to student initiative.

STUDENT ORGANIZATIONS

Participation in School-related extracurricular activities is a tradition among students in the Warnell School of Forest Resources. The Forestry Club, open to all Professional and pre-Professional students, serves a variety of social, service, and professional development functions. Four professional societies, the Society of American Foresters, The Wildlife Society, The University of Georgia Fisheries Society, and the American Water Resources Association, sponsor student chapters, which are open to Professional and pre-Professional students. These organizations foster professional development and the opportunity to practice leadership skills. Students who excel scholastically may qualify for election to membership in Xi Sigma Pi, the forestry honor society.

Courses of Instruction

Courses for the Warnell School of Forest Resources are listed under the prefix FORS, Forest Resources.

The Henry W. Grady College of Journalism and Mass Communication

Journalism Building, (706) 542-1704

Homepage URL:http://www.grady.uga.edu
E-Mail: gradyabj@arches.uga.edu

Administrative Officers

J. Thomas Russell, A.B.J., M.S., Ph.D., *Dean*
Leonard N. Reid, B.S., M.S., Ph.D., *Associate Dean for Research and Graduate Studies*

General Information

PURPOSE

The mission of the Grady College of Journalism and Mass Communication is teaching, research and service. To fulfill its mission most effectively the College continually seeks minority students and minority faculty.

Teaching

Undergraduate students prepare for careers in the mass media, corporations, government agencies, non-profit organizations and other institutions that disseminate information and ideas to the public. Critical skills necessary to gather, prepare, and disseminate information are developed. Students also study the function, ethics, history, law and significance of mass communication in society. The role of free and responsible media in a democracy is emphasized.

Graduate programs offer advanced training in the practice, management and evaluation of mass communication for future policy makers, teachers and practitioners in the media, industry, academia and government.

Research

Through research and practice, the faculty develops knowledge to fulfill the College's mission. Advances gained through research are disseminated to students, teachers, scholars, media professionals, and the public through classes, seminars, publications, and other means of communication.

Service

The College provides knowledge and expertise to foster a communications industry that is financially sound and best serves a democratic citizenry by helping them use and evaluate communications effectively.

ORGANIZATION

The Grady College is organized into three departments: Department of Advertising and Public Relations, Department of Journalism, and Department of Telecommunications.

FACILITIES

The Grady College is housed in a modern multimillion-dollar communication center that provides some of the best instructional facilities available. Included are classrooms equipped with color televisions for closed-circuit broadcast, two large theater-style auditoriums, audio studios, color-equipped television studios, complete packages of portable color television cameras and videotape recorders, videotape editing facilities, satellite communications equipment, typesetting equipment, state of the art advertising, graphics, photography, news writing and editing laboratories, seminar rooms and conference rooms.

The Drewry Learning Resources Center supplements the University of Georgia Libraries.

An elevator makes all floors accessible to persons with disabilities.

Academic Information

ACCREDITATION

The College is accredited by the Accrediting Council on Education in Journalism and Mass Communications.

ACADEMIC ADVISING

Journalism and Mass Communication students are assigned to professional academic advisers, with exception of honors students in the Department of Journalism who are advised by departmental faculty.

Ultimately it is the student's responsibility to stay informed of degree requirements and register for appropriate courses; however, advisers are available to assist in planning schedules for registration and for reviewing progress toward the ABJ degree. Courses that do not fulfill degree requirements will be neither recommended nor approved.

Pre-journalism students are advised by professional academic advisers in the College of Arts and Sciences and are expected to be admitted to the college upon reaching junior standing.

DEGREES

The College offers an undergraduate degree of Bachelor of Arts in Journalism (A.B.J.) and advanced degrees of Master of Arts (M.A.), Master of Mass Communication (M.M.C.), Master of Mass Media Studies (M.M.S.) and Doctor of Philosophy (Ph.D.)

GENERAL DEGREE REQUIREMENTS

A.B.J. degree candidates must meet general degree requirements applicable to all students at the University as set forth in the general information section of this bulletin.

COLLEGE-WIDE DEGREE REQUIREMENTS

Sixty semester hours must be earned in the core and, depending on major, 30-32 hours in journalism and mass communication course work, 15 hours in major electives and 13-15 hours in other electives, for a total of 120 hours. Physical Education hours are extra.

CORE CURRICULUM

For a description and explanation of the University of Georgia Core Curriculum, see page 160 of this Bulletin.

MAJORS

Seven majors are offered: Advertising, Broadcast News, Public Relations, Magazines, Newspapers, Publication Management and Telecommunications.

CHANGE OF MAJOR

A change of major within the College requires approval by the Admissions Committee and cannot be assumed as automatic; therefore, careful thought should be given to a choice of major at time of application and admission. Further, approval to change majors does not imply approval of journalism courses already taken in another major nor in major electives. Loss of graduation credit could occur.

DOUBLE MAJORS AND DUAL MAJORS

Students may not earn more than one undergraduate degree within the College nor may they simultaneously pursue the ABJ degree and that of any other school or college. Upon completion of ABJ degree requirements, those who wish to pursue a second undergraduate degree should consult with the appropriate department, school or college about transferring.

SECOND UNDERGRADUATE DEGREE

A person who has earned a baccalaureate degree in other than journalism and mass communication or a closely related major from an accredited institution, may apply for a second undergraduate degree.

Applications are accepted only from those who have completed core areas A-F and have met minimum requirements in cumulative and overall grade point averages of at least 2.7 and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Depending on the major, satisfactory completion of 30-32 semester hours of journalism and mass communication courses are required to earn a second undergraduate degree. Additional hours will be required to fulfill any deficiencies in the core curriculum.

POST-BACCALAUREATE AND TRANSIENT STATUS

Post-baccalaureate and transient students are non-degree seeking at the University of Georgia and do not apply for admission to the College.

Post-baccalaureate students have earned an undergraduate degree and are enrolled for a limited time.

Transient students are candidates for degrees at other institutions and may be admitted as pre-journalism majors in the College of Arts and Sciences for a semester with the intention of transferring credits to their parent institutions.

Availability of journalism and mass communication courses for students in these categories cannot be assumed.

MASS COMMUNICATION MINOR

Contact the Office of Undergraduate Services, Room 201, for information.

GRADUATION REQUIREMENTS

The graduation coordinator monitors each student's progress toward completion of requirements for the A.B.J. degree. The purpose is to identify and solve problems that could delay graduation.

Due to the competitiveness of admission and the limited number of spaces available in the college each semester, students are expected to pursue degree requirements and graduate in a timely manner. Delaying graduation to permit scheduling courses in another major, to expend scholarship funds, or for the purpose of self-enrichment is not permitted.

HONORS PROGRAM

The College encourages superior academic achievement by endeavoring to identify, recruit, and assimilate into the University's academic life students with outstanding

academic potential.

Honors students may be able to develop programs of study that have greater flexibility and include more challenging courses.

Qualified students have opportunities for individual readings and projects, honors theses, honors option courses, area study majors, and a combined A.B.J./M.B.A program offered cooperatively by the Colleges of Journalism and Business.

COURSE CHALLENGE

Students who are degree candidates in the College and are currently enrolled for resident course work may be allowed to attempt a challenge of certain journalism and mass communication courses if they can demonstrate skills mastered through experience outside the classroom. Requirements may differ but can include a review of work skills, a practical examination, a written test, and an oral examination. A decision must be made prior to the examination whether the challenge is for credit or for exemption without credit. A course may be challenged only once and the challenger may not be currently or previously enrolled in the course or a prerequisite for the one being challenged. The attempt to challenge must first be approved by the head of the department that teaches the course.

PETITION

A waiver in College rules or curriculum requires a written petition to the College's Executive Committee which meets once each semester. To facilitate a timely response, petitions must be submitted to the Office of Undergraduate Services not later than midpoint of the semester. Petition forms may be obtained in Room 201, Journalism.

ENGLISH PROFICIENCY TEST

The English Proficiency Test is administered on a group basis by the Testing Center in Clark Howell Hall at a specified time each semester. The test may also be taken on an individual basis by special arrangement with the Center. A nominal fee is charged.

The test may be taken an unlimited number of times; however, only *twice* per semester. For anyone needing to take the test, it is important to know that it is not administered during the second week of classes.

ORIENTATION

Orientation for newly-admitted students is an attempt to make the transition from the previous school, degree and major as smooth as possible. Key persons in the college inform them of such matters as advising, obtaining permission of department to register for courses, internships, rules, requirements and other procedures specific to the Grady College.

KEYBOARDING SKILLS

Students enrolling in Journalism and Mass Communication courses are expected to have adequate keyboarding skills to meet course requirements.

Other Services and Programs

STUDY ABROAD

An international learning experience may be added to a student's collegiate education by participating in a 7-week summer program in Parma, Italy and London, England co-sponsored by the Departments of Journalism and Drama.

NATIONAL STUDENT EXCHANGE

Journalism and Mass Communication students from other colleges and universities who participate in the National Student Exchange at the University of Georgia are usually committed to a specified period of study and do not apply for admission to the Grady College. They are admitted to the University as pre-journalism students in the College of Arts and Sciences.

Students who are enrolled in this college and participate elsewhere through the National Student Exchange should plan their

course selections early and carefully with their advisers. It is important to remember that credit earned through NSE is evaluated as transfer credit.

PLACEMENT

The Placement Office, Room 209, assists in locating internships and entry-level employment. Each fall it produces a prospectus that is distributed to hundreds of employers around the country. Students may submit a brief biography with information about their qualifications and employment preferences for inclusion in the prospectus.

INFORMATION

A College handbook can be requested from the Dean's Office, Room 237, College of Journalism and Mass Communication, University of Georgia, Athens, GA 30602-3018.

Courses of Instruction

Courses for the College of Journalism and Mass Communication are listed under the following prefixes:

ADPR	Advertising and Public Relations
JOUR	Journalism
JRLC	Journalism Core

The School of Law

Law Building, (706) 542-7140
FAX: (706) 542-5556
Homepage URL: http://lawsch.uga.edu/

Administrative Officers

David E. Shipley, B.A., J.D., *Dean*
Paul M. Kurtz, B.A., J.D., LL.M., *Associate Dean*
Gabriel M. Wilner, A.B., D.P.A., LL.B., LL.M., *Associate Dean*

General Information

PURPOSE

Because its first duty is to prepare men and women for the legal profession, the School of Law stresses excellence in teaching. It seeks to impart to its students a broad understanding of the nature of the legal system and the analytical and other skills necessary for effective participation in the profession. It also seeks to instill in its students a keen sense of professional integrity and an awareness of their responsibility as guardians of the law.

In addition to its emphasis on teaching, the School of Law recognizes its role as a center for scholarly research and service in the law. It seeks to explore the problems of society and to contribute to their resolution through teaching, research, and service. As a part of the University, the School of Law endeavors to contribute in a significant way to the life of the University community and to participate in interdisciplinary efforts to advance learning.

METHOD OF INSTRUCTION

In general, the School operates under the case method of instruction. The student studies actual cases, deducing from them the principles of law involved. This approach tends to develop in the student the power of analysis of legal problems. In addition, however, the study of cases is supplemented by statutory and textual materials. Instruction is also given in the drafting of legal instruments.

Practical instruction in the preparation and trial of cases is given in clinical programs, involving both simulated situations and work with practicing attorneys on litigation and other legal matters. Exercises conducted relate to the preparation of pleadings, examination and cross-examination of witnesses, writing of briefs, presentation of arguments to the court and jury, taking of cases from lower courts to appellate courts, and other related subjects.

FACILITIES

The School of Law is housed in a modern complex built on the original wooded quadrangle of the University's North Campus. Completed in 1967, the main building occupies 135,739 square feet. In addition to lecture halls, seminar rooms, and administrative and faculty offices, Hirsch Hall houses a 500-seat instructional auditorium and federal-style courtroom. Two student lounge areas and student organization offices are provided in the complex.

The law library, with its two-story ceiling and glass wall, is spacious and well-illuminated. The library houses more than 117,000 titles, which places it in the top 25 among United States law schools. The collection includes a comprehensive listing of material on Anglo-American law and extensive holdings in the law of international relations and in foreign law.

A law library annex opened in 1981 houses a spacious reading room, shelf space for one-third of the present collection, student journal offices and audio-visual instructional facilities. The library offers the LEXIS and WESTLAW computerized research systems. Dean Rusk Hall, home of the Rusk Center for International and Comparative Law, was opened in 1996. In addition to the Center, Rusk Hall contains faculty offices, library shelving and a technologically advanced courtroom, suitable both for teaching and use in moot court activity. Rusk Hall has added 35,000 square feet of space to the Law School facilities.

ACCREDITATION

The School of Law is a member of the Association of American Law Schools and is on the approved list of the American Bar Association and the State Bar of Georgia.

Academic Information

DEGREES OFFERED

The School of Law offers the Juris Doctor and Master of Laws degree. Joint degree programs are also available. Complete information about these degree programs may be found in the Law and Graduate School Bulletins.

GENERAL ADMISSION REQUIREMENTS

An applicant for admission as a candidate for the degree of Juris Doctor must hold a bachelor's degree from an accredited (as defined in AALS and ABA regulations) college or university. Compliance with minimum standards does not, however, guarantee admission. Acceptable required work connotes more than satisfaction of minimum academic requirements; rather, it represents substantial scholastic attainment. Moreover, suitability of applicants for admission is gauged not only by their undergraduate record, but also by their character and reputation, the nature of their training and experience, and by their demonstrated aptitude for the study of law.

The School of Law does not require a specific pre-legal course of study. The prospective law student is encouraged to seek a broad general education which will tend to develop ability to communicate both orally and in writing and impart substantive knowledge of genuine intellectual content. Any subject content, regardless of field, which helps develop clear and systematic thinking constitutes sound preparation for the study of law.

LAW SCHOOL ADMISSION TEST

Questions relating to the Law School Admission Test, the Law School Data Assembly Service and application procedures should be addressed to the Admissions Office, School of Law, The University of Georgia, Athens, Georgia 30602.

TRANSFER STUDENTS

The dean may, at his discretion, give full credit for work completed at other law schools. Transfer should be requested only after completion of one year of study, and prior to beginning the second year of study, in order to meet residence requirements for a degree at the University of Georgia. Transfer requests should be made directly to the Law School Admissions Office.

VISITING STUDENTS

Students in good academic standing at other law schools may be admitted as visiting students to enroll for a summer term or an academic year or semester. Prospective visiting students should contact the Law School Admissions Office for information about admission policies and procedures.

Student Services and Programs

SCHOLARSHIPS, LOANS AND STUDENT EMPLOYMENT

Law students are eligible for scholarships, grants, loan funds and employment as research assistants through the University and the Law School. Write to the Director of Admissions of the School of Law for further information.

CLINICAL AND WRITING PROGRAMS

Law students attending the University of Georgia may participate in activities which include three scholarly journals, several clinical programs, Moot Court and Mock Trial competitions, student government, legal fraternities, and many special interest organizations.

The Georgia Law Review, the *Georgia Journal of International and Comparative Law*, and the *Georgia Journal of Intellectual Property*, edited entirely by students, are nationally circulated publications which provide a forum for articles by professors, judges, attorneys, and students on developments in the legal field.

Practical education in criminal and civil procedure is a benefit of the Prosecutorial Clinic, Legal Aid and Defender Clinic, and the Civil Clinic. Under supervision of practicing attorneys, students have the opportunity to develop counseling, investigatory and trial skills. Under Georgia law, certified third-year students are permitted to try cases in local civil and criminal courts.

The School of Law sponsors teams in numerous national and regional Moot Court and Mock Trial competitions. Team members are drawn from outstanding candidates in annual intramural competitions.

Georgia's Student Bar Association is affiliated with the Law Student Division of the American Bar Association. Among the many student interest organizations are the Environmental Law Association, Women Law Students Association, Black Law Students Association, the Equal Justice Foundation, the Federalist Society, and the Georgia Society of International and Comparative Law.

CONTINUING LEGAL EDUCATION

In 1965, the School of Law joined with the State Bar of Georgia and the law schools of Mercer and Emory Universities to establish the Institute of Continuing Legal Education in Georgia. In 1978, the Institute of Continuing Judicial Education was created through the sponsorship of the School of Law and Georgia's Judicial Council. The two institutes, which are housed in Athens, plan and conduct seminars and short courses for judges and attorneys throughout the State of Georgia.

SIBLEY LECTURES

Supported by a private foundation, the John A. Sibley Lectureship in Law brings to Athens outstanding legal scholars each of whom deliver a formal lecture as well as interact with students, faculty, and alumni.

PLACEMENT

The School of Law offers assistance to every law graduate in securing suitable professional employment. Through the Office of Legal Career Services, the student is offered guidance and counseling in selecting an employment objective. While the state of Georgia continues to attract most Law School graduates, students accept positions throughout the country and the world. Graduates serve as judicial clerks, corporate counsel, government attorneys, public interest lawyers, and prosecutors, as well as in private practice.

The College of Pharmacy

Wilson Pharmacy Building, (706) 542-5278
FAX: (706) 542-5269
Homepage URL: http://www.rx.uga.edu

Administrative Officers

Stuart Feldman, B.S. M.S. Ph.D., *Dean*
George E. Francisco, B.S., Pharm.D., *Associate Dean*
Joseph T. DiPiro, B.S., Pharm. D., *Assistant Dean*

General Information

PURPOSE

The College of Pharmacy provides for the comprehensive academic needs of the profession of pharmacy. The College's doctor of pharmacy degree program prepares students for the practice of pharmacy and the delivery of pharmaceutical care. Its graduate program prepares individuals for professional specialization and careers in teaching and research. The post-graduate educational needs of the profession are met through the College's continuing education and nontraditional doctor of pharmacy programs. Faculty research supports all of these programs and contributes to the advancement of the body of pharmaceutical knowledge.

FACILITIES

The College of Pharmacy is housed in the Robert C. Wilson Pharmacy Building located on South Campus of the University of Georgia. The Wilson Pharmacy building has served as the home of the College since its completion in 1964. Additional educational sites are maintained on the campus of the Medical College of Georgia in Augusta. To provide for the experiential application of pharmaceutical knowledge, clinical training of pharmacy students is conducted in Athens, Augusta, Atlanta, Savannah, and other sites around the state.

ACCREDITATION

The College of Pharmacy is accredited by the American Council on Pharmaceutical Education.

Academic Information

DEGREES OFFERED

The Doctor of Pharmacy (Pharm.D.) degree is awarded to students who successfully complete a six-year study of prescribed courses. The first two years (pre-pharmacy) may be completed at any accredited institution of higher education. Complete information about degrees may be found in the *College of Pharmacy Bulletin.*

GRADUATE STUDY

The Graduate School of the University of Georgia offers the Master of Science and Doctor of Philosophy degrees in various specialty areas of pharmacy. Complete information about these degree programs may be obtained by calling the College of Pharmacy (542-1911) or by visiting the College's web site (http://www.rx.uga.edu).

ADMISSION REQUIREMENTS

To be admitted to the professional degree programs in the College of Pharmacy, a student must complete pre-pharmacy curriculum requirements. Applicants to the professional program must take the Pharmacy College Admission Test (PCAT). The fall test date prior to the projected entrance date is preferred. The application deadline is February 1 of each year.

PRE-PHARMACY CORE CURRICULUM

For a description and explanation of the University of Georgia Core Curriculum, see page 160 in this Bulletin. For specific pre-pharmacy requirements, contact the Office of the Dean, College of Pharmacy.

The School of Social Work

Tucker Hall, (706) 542-3364
FAX: (706) 542-3282
Homepage URL: http://www.ssw.uga.edu

Administrative Officers

Bonnie L. Yegidis, B.A., M.S.W., Ph.D., *Dean*
Nancy P. Kropf, B.A., M.S.W., Ph.D., *Associate Dean*
Katheryn B. Davis, B.A., M.S.W., Director, *Undergraduate Program*

General Information

The Bachelor of Social Work degree is the first professional social work degree. This program of study prepares the student for beginning professional practice as a social worker. The liberal arts base combined with appropriate professional courses provide the fundamental knowledge and skill needed to assume the role of a beginning practitioner. The appropriate social work value and ethical base necessary for professional practice is also a central part of the curriculum. The student exits the B.S.W. program as a generalist in the profession of social work.

PURPOSE

The goal of the School of Social Work is to provide an education designed to prepare the undergraduate student for beginning professional social work practice.

This goal is to be realized through:

(1) Providing intellectual stimulation for students in a search for knowledge and truth and to aid them in developing problem-solving processes for professional use in helping individuals, families, groups, and communities.

(2) Helping to develop students' learning and introspective stances which will serve their lifelong learning needs and development of self-awareness.

(3) Motivating students to develop the capacity to evaluate their own practice, and to evaluate and use the research findings of others.

(4) Enabling students to gain knowledge and to develop values and skills appropriate for beginning professional social work practice as a generalist.

FACILITIES

The School of Social Work is located in Tucker Hall on South Campus. Extensive University resources enrich the curriculum of the School of Social Work. Research facilities include the resources of the Computer Center, the Institute of Behavioral Research, and the Social Work Research Center.

ACCREDITATION

The Bachelor of Social Work degree program is accredited by the Council on Social Work Education.

Student Services and Programs

ACADEMIC ADVISING

Selection of appropriate courses to meet degree requirements is the responsibility of the student. Certain printed material and the School's academic advising program are available to assist the student. Students are expected to arrange appointments with the advisors each semester for planning programs of study and course selection.

Each student in the School of Social Work is assigned a faculty advisor. In addition to assisting students with selection of an appropriate course of study, advisors assist upper division students in their professional development.

HONORS PROGRAM

Qualified students are encouraged to participate in the University of Georgia Honors Program. Appropriate academic advising is provided for B.S.W. students who are also in the Honors Program.

STUDENT ORGANIZATIONS

The College Social Work Association is the School's official baccalaureate student organization providing B.S.W. students with opportunities to participate in volunteer service and educational presentations, and to interact with other social work majors. Meetings are held periodically throughout the academic year.

Academic Information

DEGREE OFFERED

The School of Social Work offers the undergraduate degree of Bachelor of Social Work (B.S.W.).

ADMISSION TO THE UPPER DIVISION PROFESSIONAL PROGRAM

The academic program for students seeking the B.S.W. degree is composed of two parts: (1) Pre-professional enrollment for freshmen, sophomores, juniors and transfer students preparing for entry into the professional program; and, (2) the professional foundation program completed during the senior year.

Pre-professional enrollment is open to students meeting regular admission requirements at the University of Georgia. Admission to the professional foundation program occurs at the junior level. Students must have satisfactorily completed 60 semester hours plus one hour of P.E., including all core requirements. A student must have an overall and cumulative GPA of 2.5 or better and a combined average of 3.0 in SOWK 2101 and 2154. Prior to entering the professional program, all applicants must complete 50 clock hours of an advisor-approved human service experience and provide proof of professional liability insurance. See program director for details. In addition, throughout the program evaluation of the student's performance will determine the student's compatibility to the professional practice of social work.

UNDERGRADUATE DEGREE REQUIREMENTS

Students are required to acquaint themselves with general degree requirements applicable to all students of the University as set down in the Academic Information section of this Bulletin. Specific requirements for the B.S.W. degree are listed in the Programs of Study section of this Bulletin.

The primary aim of the B.S.W. program is excellence in the general practice of social work, and its curriculum and methods of pedagogy are designed to produce an environment in which this excellence can flourish. The program of study leading to the B.S.W. degree requires 126 semester hours plus one hour of P.E. and offers a clearly defined progression of course work culminating in the applied study of the general practice of social work during the senior year.

During the first two years of study students are expected to meet liberal arts objectives through completion of courses which make up the core requirements of the University of Georgia. The core is divided into six broad content areas: Essential Skills, Institutional Options, Humanities/ Fine Arts, Science/Math/Technology, Social Sciences, and Social Work Related Courses.

In consultation with the advisor, during the junior year students select additional courses which further enrich the liberal perspective and which prepare students for entry into the professional foundation program. Students complete two courses in social work during their first three years of study: SOWK 2101, The Social Welfare Institution and SOWK 2154, The Profession of Social Work.

Building on the liberal arts base, the senior or professional foundation year is designed to prepare students for beginning social work practice through a year-long practicum and course offerings which establish:

- a base of knowledge in understanding human behavior from a person-in-environment perspective;
- introductory knowledge and skills related to social work practice with individuals, families, groups, organizations and communities from a person-in-environment perspective;
- knowledge of historic and current institutional policies which serve as a general framework for the provision of social services in the United States; and
- introductory knowledge of analytical and evaluative methods of knowledge building and application in social work practice and social welfare settings.

Content regarding human diversity is infused throughout the professional curriculum, building on specific courses in multicultural and Women's Studies taken as part of the core. Transfer credit for courses in social work will be evaluated on a case-by-case basis. In no case will courses numbered 3000 or above be accepted from institutions which are not accredited by the Council on Social Work Education. No transfer credit will be accepted for SOWK 5524, 5534, 5544, 5835, and 5845. For further information contact the Office of the Director, Undergraduate Program, School of Social Work, Tucker Hall.

NOTE: All students will be expected to complete 50 clock hours in an advisor-approved human services setting and attend an orientation session before they are permitted to enroll in professional foundation course work. Proof of professional liability insurance will be required before students are permitted to enroll in SOWK 5835.

Courses of Instruction

Courses in the School of Social Work are listed under the prefix SOWK.

The College of Veterinary Medicine

Veterinary Medicine Building, (706) 542-5728
FAX: (706) 542-1004
Homepage URL: http://www.vet.uga.edu
Email: ywilson@calc.vet.uga.edu

Administrative Officers

Keith W. Prasse, B.S., M.S., D.V.M., Ph.D, *Dean*
Sheila W. Allen, D.V.M., M.S., *Associate Dean for Academic Affairs*
Harry W. Dickerson, B.V.Sc., Ph.D., *Associate Dean for Research and Graduate Affairs*
Edward A. Mahaffey, D.V.M., Ph.D, *Associate Dean for Public Service and Outreach*
Harold E. Snyder, B.S., M.S., *Assistant to the Dean*

General Information

PURPOSE AND ORGANIZATION

Veterinary medicine is the health profession that applies the principles of the biomedical sciences to health and disease in animals. It also has important direct and indirect implications for human health through research. Veterinary medicine is a unique combination of medical, agricultural, and biological sciences.

The University of Georgia College of Veterinary Medicine is designed to meet the educational needs of prospective veterinarians from the Southeast. At present, students are accepted from Georgia, South Carolina, and West Virginia through a Southern Regional Education Board agreement. A limited number of students who are residents of other states also may be admitted. Quotas for South Carolina and West Virginia are subject to change by the Southern Regional Education board each year. Residents of other states will be considered. Interested persons should contact the Office of the Associate Dean for Academic Affairs for current information. Up to 80 students may be admitted to the four-year curriculum each fall.

The College of Veterinary Medicine also has postgraduate instructional responsibilities, which are described in the separate *College of Veterinary Medicine Bulletin*. Such additional training is necessary to prepare students for careers in teaching, research, and clinical specialties. In addition, a program of continuing education for veterinary practitioners is offered to keep the profession up-to-date on advances in the science and art of veterinary medicine.

Research programs intended to ensure the health of the animal resources of Georgia and to protect the human population from those diseases transmittable from animals to man are conducted in the Veterinary Medical Experiment Station. Studies are conducted on diseases of farm animals, pets, wildlife, poultry, fish, marine life, horses, and laboratory animals. These research programs are an integral part of the training of graduate students.

The College faculty also functions in various service capacities through the facilities of the College's Teaching Hospital, the Southeastern Cooperative Wildlife Disease Study, the Poultry Diagnostic and Research Center, and the Veterinary Diagnostic Laboratories located in Athens and Tifton, Georgia.

FACILITIES

The College comprises clinics, offices, laboratories, and classrooms designed to meet the needs of practicing clinicians and students. Facilities for animal surgery, autotutorial instruction, a library, a computer-assisted learning center, and a student lounge are available in the College. A wing housing offices with adjacent laboratories, a complete electron microscopy suite, laboratory animal facilities, and laboratories for parasitology, physiology, pharmacology, toxicology, and surgery was occupied in 1973. The teaching hospital wing, which opened in the Fall of 1979, houses the Veterinary Medical Teaching Hospital, classrooms, and the Veterinary Medical Reading Room. Additional space for maintaining animals is available at a nearby farm and at the Poultry Diagnostic and Research Center.

Diagnostic Laboratories

Dr. Louis E. Newman, Director, Tifton Lab
Dr. Doris M. Miller-Liebl, Director, Athens Lab

The College maintains diagnostic laboratory facilities in Tifton and Athens to assist the veterinarian in diagnosing animal diseases. Funded by the Georgia Department of Agriculture, the laboratories are designed to handle problems concerning large and small domestic animals, as well as laboratory and exotic animals. Laboratory services include pathology, microbiology, toxicology, and serology. Both facilities are staffed by veterinary medical diagnosticians and technicians. Though the labs exist primarily as a service to animal owners through their veterinarians, many diagnostic laboratory cases are utilized by faculty members for instructional purposes.

Veterinary Teaching Hospital

Dr. Douglas Allen, Jr., Hospital Director
Robert L. Gearhart, Hospital Administrator

The foremost objective of the Veterinary Teaching Hospital is to provide clinical experience for students. This method of instruction enables the veterinary medical student to gain familiarity with veterinary clinical cases under the supervision of practicing clinicians. The staff is composed of faculty members board certified in various specialties of veterinary medicine and surgery including internal medicine, surgery, radiology, dermatology, ophthalmology, cardiology, neurology, anesthesiology, reproduction, food animal and equine medicine and surgery, and herd health management. In addition, the services and hospital facilities are available to the private practitioner on a referral or consultation basis, and for the continuing education of practitioners.

ACCREDITATION

The College is officially recognized as an accredited institution by the Council on Education of the American Veterinary Medical Association.

Academic Information

Students in the College of Veterinary Medicine follow a four-year program of study. The first three years of the curriculum are designed to integrate a sound knowledge of the basic medical sciences with clinical application. The fourth year of the curriculum is devoted entirely to the application of basic medical sciences to veterinary medical principles and proce-

dures in a clinical situation.

The fourth year is divided into clinical blocks of 15-21 instructional days. Each student has 12 weeks for electives and free time. Of the 12 weeks at least 4 must be filled with electives to fulfill the requirements for graduation. Students must satisfactorily complete 53 semester credit hours during the three semesters of the fourth year.

Complete course listings and descriptions are available in the *College of Veterinary Medicine Bulletin*, copies of which may be obtained from the Office of the Associate Dean for Academic Affairs, College of Veterinary Medicine. The Veterinary College Bulletin also provides information on grading standards, dismissal policies, and other regulations for veterinary medical students.

DEGREES OFFERED

The professional clinical degree offered by the College is the Doctor of Veterinary Medicine. The College also administers graduate research programs leading to masters and doctoral degrees. Specific information concerning programs at the undergraduate, professional, and graduate levels may be found in the *College of Veterinary Medicine Bulletin* and the Graduate School Bulletin, copies of which may be obtained by writing:

Office of the Associate Dean for
Academic Affairs
College of Veterinary Medicine
The University of Georgia
Athens, Georgia 30602

Graduate School
Boyd Graduate Studies Research Center
The University of Georgia
Athens, Georgia 30602

REQUIREMENTS FOR ADMISSION

Specific inquiries about admission policies may be addressed to the Associate Dean for Academic Affairs, College of Veterinary Medicine. The University of Georgia is an equal opportunity employer and does not discriminate on the basis of age, sex, or ethnic origin. Applications from qualified persons of minority groups are actively encouraged.

In order for the student entering the veterinary medical college to be prepared for the courses, he or she must have acquired certain basic scientific information. Such information is ordinarily obtained in the following undergraduate courses:

English*
Humanities and social studies
Physics**
Chemistry (inorganic and organic**)
Biology

* Information on specific courses and credit hours required can be found in the *College of Veterinary Medicine Bulletin* or in the Admissions Requirements brochure published by the College of Veterinary Medicine.

**Must be at the pre-medical sciences level and not a survey course.

Although a baccalaureate degree is not required, the student should pursue a well-rounded degree program. The requirements for admission to the College of Veterinary Medicine are based on the premise that the program of training of a veterinarian is a continuous one shared by both the undergraduate colleges and the College of Veterinary Medicine. The responsibility of the undergraduate training program is thus not only to provide the prospective student with the technical information and skills necessary to complete the DVM program, but also to help develop a broad background of experience and interest which will make it possible later to achieve a full realization of potential as an individual and a member of society.

PRE-VETERINARY MEDICAL PROGRAM

The required courses for admission to the College of Veterinary Medicine can be completed at any accredited college or in conjunction with studies in any major in the College of Arts and Sciences or College of Agricultural and Environmental Sciences. Either of these options is equally acceptable.

and the decision as to which major to declare should be determined by the student's interests and ability.

COMBINED B.S.A.-D.V.M. PROGRAM

The combined B.S.A.-D.V.M. program is available at The University of Georgia. Three-year pre-veterinary students may qualify by completing the required courses of the selected major in the College of Agricultural and Environmental Sciences, and utilizing the first year professional veterinary courses in the College of Veterinary Medicine as electives in the B.S.A. degree program.

Application

Applicants must complete and return to the Veterinary Medical College Application Service an application form, which must be postmarked no later than October 1. Application packets are available in August. The application must include one copy of transcripts from each institution of higher education attended by the applicant. To be eligible for consideration, the applicant must be able to complete all required courses by the end of spring term of the calendar year in which he or she intends to matriculate.

Application is open to legal residents of Georgia, South Carolina, and West Virginia. A limited number of students from other states also may be admitted. State officials who may be contacted for application forms are:

West Virginia Residents
Director, Pre-Veterinary Medicine Programs
Department of Agriculture and Forestry
West Virginia University
Morgantown, West Virginia 26506

South Carolina Residents
Pre-Veterinary Advisor
Department of Animal, Dairy, and Veterinary Sciences
College of Agriculture, Forestry, and Life Sciences
Clemson University
Clemson, South Carolina 29631

Georgia Residents and at-large Applicants
Associate Dean for Academic Affairs
College of Veterinary Medicine
The University of Georgia
Athens, Georgia 30602

A Veterinary Medical College Application Service (VMCAS) application is required. This application will be forwarded when application materials are requested.

Eligibility

Applicants should consult the College admissions publications regarding the minimum requirement for application consideration.

No person is eligible for admission who has been excluded or is on probation at any school or college for deficiency in scholarship or because of misconduct. All admissions to The University of Georgia College of Veterinary Medicine are conditioned on the applicant's continued satisfactory academic work between the date of his or her conditional acceptance and actual entry into the College. A student who gains entrance to the College by misrepresentation will be immediately dismissed.

Graduate Record Examination and Veterinary College Admission Tests

Each applicant will be required to take the Graduate Record Examination (GRE) and the GRE Biology subject test. Information about the GRE can be obtained from testing and evaluation centers or graduate school offices of most colleges or universities.

Notification of Applicant Status

Notification of the action of the College on all applicants will be mailed directly to the individuals prior to April 15 of each year. This action will be in the form of (1) conditional acceptance, or (2) not accepted.

STUDENT ACTIVITIES

Students are governed by a code of ethical conduct that is administered by the faculty and students. The official student governing body is the student chapter of the American

Veterinary Medical Association. Students may also be involved in publication of the *Intra-Vet* newsletter and the Alpha Psi and Omega Tau Sigma professional veterinary medical fraternity publications.

Courses of Instruction

Undergraduate courses in the College of Veterinary Medicine are listed under the following prefixes:

AVMD	Avian Medicine
MMIB	Medical Microbiology
VETM	Veterinary Medicine
VPHY	Physiology and Pharmacology

See separate *College of Veterinary Medicine Bulletin* for professional and graduate courses.

General Information

PURPOSE

The Graduate School has primary responsibility for the administration of advanced study in all schools and colleges of the University.

ORGANIZATION

Matters of policy relating to graduate education are determined by the graduate faculty through the graduate council. The graduate faculty consists of faculty members appointed by the president on the basis of scholarly competence (including published research or appropriate creative activities), intellectual leadership, and experience with graduate education. The policies determined by the graduate council are administered by the dean of the Graduate School.

The general degrees Master of Arts and Master of Science are offered in 26 and 40 disciplines, respectively. The Doctor of Philosophy degree is offered in 71 disciplines.

Professional master's degrees are offered in 22 areas. The Specialist in Education degree may be earned in 23 fields. Professional doctoral degrees are offered in education, music, and public administration.

FACILITIES

The Graduate School has access to the resources of the entire University. Of particular value are the University libraries, containing over 3,400,000 books, serials and documents, and many other items including manuscripts, photographs, drawings, and maps. The collections support

the curricular and research needs of the campus and are available to library users both on the campus and across the state.

The research program at the Oak Ridge Associated Universities, Oak Ridge, Tennessee, makes available facilities for research problems and thesis writing. Two coastal facilities, the Marine Institute on Sapelo Island and the Skidaway Institute of Oceanography, are available to students and faculty of the University for research and training in marine sciences. The Institute for Behavioral Research encourages a pooling of the expertise of faculty and students from various departments to attack significant social and behavioral problems at both basic and applied levels. The Institute of Higher Education is an instruction, service, and research agency of the University and works closely with other educational agencies and institutions in cooperative programs dealing with planning, development, and evaluation. The Institute of Ecology promotes research in ecology, especially large-scale, system-level studies of major environments such as forested watersheds, wetlands, lakes, rivers, tropical rain forests, and agroecosystems. Additional details are presented in the *Graduate School Bulletin.*

ASSISTANTSHIPS AND SCHOLARSHIPS

A variety of support for graduate students is available in the form of graduate assistantships, teaching assistantships, and research assistantships.

Further information may be obtained from the dean of the Graduate School. Applications for the University-wide assistantships must be filed in the appropriate department by February 15 of each year; departmental awards may normally be applied for at any time.

Academic Information

ADMISSION

Persons holding a baccalaureate degree from any institution accredited by the proper regional accrediting association are eligible to apply for admission to the Graduate School. Applicants should have ranked in the upper half of their undergraduate class and should have completed the equivalent of an undergraduate major in the field in which they propose to study. Application forms may be obtained from the Office of Graduate Admissions. Applicants for admission must submit two copies of official transcripts from all colleges and universities attended, except the University of Georgia, two official copies of scores on the required entrance examination, three letters of recommendation, and a $30.00 nonrefundable application-processing fee. Materials submitted in support of an application will not be returned.

Applications and supporting credentials from domestic students must be received in the Office of Graduate Admissions by the following deadlines: Fall semester, July 1; Spring semester, November 15; Summer, Pre-session, April 1; and Summer, all other sessions, May 1. Applicants are urged to apply as early as possible up to one year in advance of the desired matriculation date. Departments may have earlier application deadlines which take precedence over those established by the Graduate School. Applicants should consult the departments for their specific deadlines. For information concerning deadlines for international applications, refer to the section entitled International Applicants.

Each completed application, with supporting materials, is referred to the department in which the applicant proposes to study, where it is considered by the faculty of that department. No applicant will be admitted without the recommendation of an academic unit. Final approval is given by the dean of the Graduate School.

An applicant is admitted for a specific semester. Admission is valid only when the person registers for the specified semester. The applicant, however, may request the Office of Graduate Admissions to defer his/her registration to another semester provided that the application has not been on file for longer than six months. If the application has been on file longer than six months, a new application must be submitted.

Applicants may not register unless they have received an official acceptance letter from the Graduate School. Students participating in the Honors Program and those registered in the School of Law may enroll in graduate courses with the approval of their advisors and the dean of the Graduate School.

ENTRANCE TESTS

Entrance test scores appropriate for each application must be sent to the Office of Graduate Admissions directly by the responsible testing agency. All test scores are subject to a five-year time limitation.

Scores on the verbal and quantitative sections of the General Test of the Graduate Record Examinations (GRE) are required for admission as a prospective candidate for most graduate degrees. The Miller Analogies Test (MAT) may be used in lieu of scores on the GRE for admission to most Master of Education and Specialist in Education degree programs. The GMAT is required for applicants seeking admission as prospective candidates for the Master of Business Administration and the Master of Accountancy degrees. Applicants for the Master of Marketing Research degree may submit either the GMAT or the GRE. The Master of Arts and Doctor of Philosophy programs in business administration accept the GMAT or the GRE. The Master of Arts and Doctor of Philosophy programs in economics require the GRE. In all cases, applicants should consult the departments for specific information.

The Graduate Record Examinations and the Graduate Management Admission Test are offered several times a year at numerous testing centers in the United States and abroad. Advance registration is required. Registration forms and detailed information on the availability and character of each examination may be obtained from the Office of Graduate Admissions or by writing to the Educational Testing Service, Princeton, New Jersey 08541. The Miller Analogies Test is given at various colleges and universities as approved by The Psychological Corporation. For information concerning the test as given at the University of Georgia, contact the Office of Testing and Evaluation, Clark Howell Hall, 706-542-3183. For information concerning the test as given at other approved testing centers, contact The Psychological Corporation, 555 Academic Court, San Antonio, Texas 78204-2498.

ADDITIONAL INFORMATION

To request admission information, write to the Office of Graduate Admissions, The University of Georgia, Athens, Georgia 30602-7402; phone (706)542-1787; email gradadm@uga.cc.uga.edu; WWW address: http://www.uga.edu/~grad_sch/admit.html. Inquiries about facilities for advanced study and research, programs of study, and specific departmental requirements should be addressed to the appropriate department. More detailed information is given in the *Graduate School Bulletin*, which may be obtained by contacting the Office of Graduate Admissions.

INTERNATIONAL APPLICANTS

Since several months may be required to secure needed information and to process an application from abroad, international applicants are urged to submit application materials as early as possible, but no more than one year in advance. The application and all supporting materials of an international applicant must be received in the Office of Graduate Admissions by the following deadlines: Fall semester, May 15; Spring semester, October 15; Summer semester, February 15. Due to the intensity of summer study and the limited number of classes offered, international applicants are not encouraged to apply for summer semesters. Departments may have earlier application deadlines which take precedence over those established by the Graduate School. Applicants should consult the departments for their specific deadlines.

The application must be supported by two official transcripts from all colleges and universities attended, except the University of Georgia, two official copies of test scores on an approved entrance test, a $30.00 nonrefundable application fee, and three letters of recommendation. Recommendations from teachers familiar

with higher education programs in the United States are advantageous. Foreign applicants, for whom English is not their native tongue, must submit TOEFL (Test of English as a Foreign Language) scores, in addition to scores on an approved entrance examination.

CLASSIFICATION OF GRADUATE STUDENTS

Only those applicants who are formally admitted to the Graduate School will be eligible to register for graduate courses. At the discretion of individual schools or departments and with the approval of the dean of the Graduate School, applicants may be considered for admission to any one of the following classifications:

(1) *Prospective Candidate for a Degree.* Applicants who meet all requirements for admission to a degree program may apply as prospective candidates for a graduate degree. Applicants must submit the following to the Office of Graduate Admissions: the general application for admission, a $30 application-processing fee, two official copies of transcripts from each institution attended except the University of Georgia, and two copies of official entrance test scores. Applicants also must submit three letters of recommendation directly to the department to which they are applying, as well as any supplemental information required by the department. Applicants are responsible for contacting the department graduate coordinator for information on any special requirements and any supplemental materials which may be needed.

Applicants upon whom some condition has been placed by the major department and/or the Graduate School may be admitted provisionally to a degree program if recommended by the department and approved by the graduate dean. Applicants for the Specialist in Education degree are not eligible for provisional admission.

(2) *Nondegree (ND).* Applicants who do not intend to pursue a degree but who wish to take courses for professional advancement, licensure, or certification purposes, and who hold a baccalaureate degree or higher degree from a regionally accredited institution, should apply for nondegree status. Applicants must submit the following to the Office of Graduate Admissions: the general application for admission, a $30 application-processing fee, two official copies of transcripts from the institution which awarded the highest degree, and a statement of purpose. The statement of purpose should be completed in the space provided on the reverse side of the general application. Applicants are responsible for contacting the department graduate coordinator for information about any special requirements or supplemental materials which may be needed.

Nondegree students who are later admitted as prospective degree candidates may apply a maximum of nine hours of course work taken in the nondegree status toward a graduate degree program. The inclusion of such course work on a program of study is subject to approval of the major professor, the department graduate coordinator, and the dean of the Graduate School. Courses taken in the nondegree status may not be included on a program of study for the Specialist in Education degree.

(3) *Graduate Transient (TRANS).* Transient admission may be granted to students in good standing at regionally accredited graduate schools who wish to enroll for one semester at the University of Georgia. Applicants requesting this status must submit the following to the Office of Graduate Admissions: general application for admission, $30 application-processing fee, and certification of graduate standing in a regionally accredited institution. Additional information may be required by departments for admission to this classification; therefore, applicants should contact the appropriate department. Students admitted in this classification who later wish to enroll as prospective candidates for a degree must make formal application to the Graduate School.

IRREGULAR STUDENTS

A student registered in the University as an irregular student cannot register for graduate courses. Course work taken in this classification cannot be counted for credit toward any graduate degree.

COMBINED DEGREE PROGRAMS

The Graduate School offers certain combined degrees with other schools and colleges in the University.

Selected students in the College of Arts and Sciences may be eligible for completion of combined AB and MA or BS and MS programs in a four-year period. Students in the College may also be allowed to complete AB and MBA or BS and MBA programs in five years. Students interested in these degree objectives should contact the University Honors Program.

Certain students in the College of Arts and Sciences or the College of Journalism and Mass Communication may be allowed to complete AB and MBA, or BS and MBA, or ABJ and MBA degrees in five years. Interested students should contact the appropriate school or college and the University Honors Program.

Certain students in the College of Family and Consumer Sciences may be eligible to pursue the combined degrees of BSHE and MBA. In the College of Journalism and Mass Communication, students may be allowed to pursue combined programs leading to the ABJ and MBA degrees. In the Terry College of Business, students may be eligible to pursue combined programs leading to the BBA and MAcc degrees. All these combined degree programs are designed to be completed in five years.

Students interested in the JD and MBA or JD and MAcc four-year combined degree programs should contact the School of Law and the Terry College of Business.

Selected pharmacy students may enter a combined degree program in which they receive the BS degree in pharmacy at the end of their third professional year and the MS degree in pharmacy at the end of one additional year.

ENROLLMENT IN GRADUATE COURSES—LAW/ UNDERGRADUATE STUDENTS

Students enrolled in the School of Law, who hold a baccalaureate degree from an accredited university/college and who are in good standing, may enroll in graduate courses with approval of their advisor and the dean of the Graduate School. An approval form may be obtained in the School of Law.

Undergraduate students, participating in the Honors Program and who are in good standing, may register for graduate courses with approval of their advisor and the dean of the Graduate School. An approval form may be obtained in the Honors Program Office.

Undergraduate students, having received prior approval, may enroll for up to six semester hours of credit to be included in a graduate program of study if they are within three hours of completing requirements for the undergraduate degree. They may enroll for three hours of such credit if they are within six hours of completing degree requirements. This credit must be in 4000- or 5000-numbered courses which also have 6000 or 7000 listings. If work in the 4000- or 5000-numbered courses is satisfactory, credit at the graduate level will be granted after admission and registration in the Graduate School of the University of Georgia. A form to request prior approval may be obtained in the Graduate School.

COURSE NUMBERS AND LOAD

Courses numbered 8000 and 9000, taught by members of the graduate faculty, are advanced graduate courses and seminars that provide educational experiences at the highest level in a graduate student's program of study. Courses numbered 6000 are fundamental knowledge courses; those numbered 7000, except thesis 7300, are technique and professional courses. Courses numbered 6000 and 7000 are normally taken early in the graduate student's program of study. Joint undergraduate/graduate courses, numbered 4000/6000 and 5000/ 7000, in which undergraduate and graduate students are mixed, are not normally used to provide the core requirements of a graduate degree program. Such courses may be used as electives and as service courses taken in other departments.

A full course load for a graduate student is nine hours per semester during the academic year and six hours during the summer session. A student who holds an assistantship that requires from one-fourth to one-third time service must register for a

minimum of nine hours each semester. A student who holds an assistantship that requires four-ninths to one-half time service must register for a minimum of six hours each semester. A student enrolling for over 15 hours per semester must receive approval from the Graduate School. Any graduate student using University facilities and/or staff time must register for at least three hours each semester. A student must be registered for a minimum of three hours of credit the semester in which degree requirements are completed.

PROBATION AND DISMISSAL

Students may be dismissed by their department at the end of any semester if they have not made sufficient academic progress to warrant continuance of study. Termination of students will follow policies and procedures adopted by the department. Dismissal by an academic department may be appealed to the dean of the Graduate School after all avenues of appeal have been exhausted at the departmental level. When students are terminated by a department, but not simultaneously by the Graduate School, they may apply for admission to another graduate program if they wish to do so.

Students with a cumulative graduate course average below 3.0 for two consecutive semesters are placed on academic probation by the Graduate School. They then must make a 3.0 or higher graduate average per term each succeeding semester that their overall cumulative graduate average is below 3.0. These students are no longer on probation when their cumulative graduate average is 3.0 or above. If they make below a 3.0 graduate average per semester while on probation, they are dismissed. When students repeat a graduate course, the last grade will be utilized to calculate the cumulative graduate average that is used for probation and dismissal. Grades of S, U, I, and V will not be used in calculating the cumulative graduate average. When students are dismissed under the terms of this policy, they may not apply for admission to another graduate program offered by the University. Students who are dismissed by the Graduate School for academic reasons may appeal the dismissal to the dean of the Graduate School. The appeal must be submitted within 10 working days following receipt of notice of dismissal. Information concerning the appeal process may be obtained in the Graduate School.

Degrees Offered

The degrees offered by the Graduate School are listed below. For specific requirements see the *Graduate School Bulletin.*

GENERAL DEGREES

Master of Arts

The Master of Arts degree will be conferred upon candidates who have met prescribed requirements, with major study in one of the following fields: anthropology, art history, business administration, classics, comparative literature, economics, education, English, French, geography, German, Greek, history, journalism, Latin, linguistics, mathematics, mathematics non-thesis, music, philosophy, political science, religion, Romance languages, sociology, Spanish, and speech communication.

Master of Science

The Master of Science degree will be conferred upon candidates who have met prescribed requirements, with major study in one of the following fields: agricultural economics; agricultural engineering; agronomy; anatomy (veterinary); animal science; artificial intelligence; biochemistry and molecular biology; biological engineering, botany; cellular biology; chemistry; child and family development; computer science; conservation ecology and sustainable development; dairy science; ecology; entomology; environmental economics; environmental health; food science; foods and nutrition; forest resources; genetics; geology; horticulture; housing and consumer economics; marine sciences; medical microbiology; microbiology; pharmacology (veterinary); pharmacy; physics; physiology (veterinary); plant pathology; poultry science; psychology; statistics; textiles, merchandising and interiors; toxicology; veterinary parasitology; and veterinary pathology.

Doctor of Philosophy

The University established this degree for the purpose of providing properly qualified students with the opportunity to pursue research and other scholarly activity beyond the point that is possible in programs for the master's degree. At present, opportunity for such advanced graduate work is provided in adult education, agricultural economics, agronomy, animal and dairy science, animal nutrition, anthropology, art, biochemistry and molecular biology, biological and agricultural engineering, botany, business administration, cellular biology, chemistry, child and family development, communication sciences and disorders, comparative literature, computer science; counseling and student personnel services, counseling psychology, drama, ecology, economics, educational psychology, English, entomology, exercise science, food science, foods and nutrition, forest resources, genetics, geography, geology, health promotion and behavior, higher education, history, horticulture, housing and consumer economics, instructional technology, language education, linguistics, marine sciences; mass communication, mathematics, mathematics education, medical microbiology, microbiology, middle school education, music, pharmacology (veterinary), pharmacy, philosophy, physical education, physics, physiology (veterinary), plant pathology, political science, poultry science, psychology, reading education, Romance languages, science education, social foundations of education, social science education, social work, sociology, special education, speech communication, statistics, textile sciences, toxicology, veterinary parasitology, and veterinary pathology.

This degree will not be granted upon the completion of any definite amount of work prescribed in advance. It will be granted in recognition of proficiency in research, breadth and soundness of scholarship, and thorough acquaintance with a specific field of knowledge. Evidence of such attainment must be provided through the presentation of an acceptable dissertation based upon independent research and passing of such written and oral examinations as may be prescribed.

PROFESSIONAL DEGREES

Master of Accountancy

This degree program prepares students for careers in public accounting or for executive positions in private accounting. It is open to students who hold a Bachelor of Business Administration degree or its equivalent.

Master of Agricultural Economics

This degree is designed for students who wish to acquire specialized training in agribusiness. The program blends business and economics with the applied science of agriculture, providing methods for solving real-world problems. An internship and technical report are required in lieu of a thesis.

Master of Agricultural Extension

This degree is designed especially for county agricultural extension workers, agricultural educators, and other continuing education professionals engaged in informal educational settings. In addition to the general Graduate School requirements, one year of field experience in agricultural extension, or its equivalent, is required.

Master of Applied Mathematical Science

The Master of Applied Mathematical Science is a terminal degree program designed for students who seek a broad training in applied quantitative methods as preparation for professional employment in business, government, or industry. For such students, this program will provide a structure that blends various applied mathematical sciences with particular reference to their application to real-world problems.

Master of Art Education

This program is designed to improve the professional competency of teachers and supervisors of art.

Master of Arts for Teachers

Programs leading to the Master of Arts for Teachers degree are designed to prepare teachers for employment in secondary schools and junior colleges. The degree may be earned in English, French, German, Romance languages, and Spanish.

Master of Avian Medicine
This degree is designed to provide veterinarians with specialized training in the diagnosis, treatment, and prevention of poultry diseases.

Master of Business Administration
This program is designed for the student who desires sound training beyond the baccalaureate degree as preparation for a career in business.

Master of Education
This degree is designed for the student whose vocational objectives require preparation for teaching, supervision, and/or first line administration in grades P-12 and other educational or professional agencies. The Master of Education degree may be obtained in the following areas: adult education; agricultural education; business education; college student affairs administration; communication sciences and disorders; computer-based education; early childhood education; educational leadership; educational psychology; elementary education; English education; exercise science, family and consumer sciences education; foreign language education; guidance and counseling; health promotion and behavior; human resource and organizational development; instructional technology; marketing education; mathematics education; middle school education; occupational studies; physical education; reading education; recreation and leisure studies; rehabilitation counseling; safety education; science education; social science education; special education; and technological studies.

Master of Fine Arts
This program is for students in the creative and performing arts whose professional objectives require advanced skills in art and drama.

Master of Forest Resources
This is a professional program designed to be a terminal degree program for forest resources managers.

Master of Historic Preservation
This program is designed to prepare students for a wide range of careers in the conservation and management of historic resources in both the built and natural environments.

Master of Home Economics
This program prepares students for professional careers in home economics and related professions. This degree may be earned in the areas of child and family development and foods and nutrition.

Master of Landscape Architecture
This program provides advanced training for landscape architects and graduates in related fields.

Master of Laws
The LLM program is essentially a fourth year of JD studies, affording an opportunity for further study in fields not fully covered in undergraduate law work.

Master of Marketing Research
This degree program is designed to develop marketing research professionals with a solid understanding of business and marketing analyses. The program of study includes 39 semester hours of graduate work, including two semesters of internship, and begins each June. Students without business courses must complete foundation courses before entering the program.

Master of Mass Communication
This program serves those students whose career goals indicate that additional course work will be more advantageous to them than the completion of the traditional thesis required in the Master of Arts. The additional course work provides an opportunity for more breadth and depth of exposure to areas which may lay the foundations of career development, whether in additional mass communication courses or in cognate courses that tie into professional goals.

Master of Music
This degree offers major concentrations in performance, piano pedagogy, chamber music/accompanying, conducting, woodwinds, composition, and music literature.

Master of Music Education
This program prepares students for professional careers in teaching/supervising school music or in music therapy.

Master of Plant Protection and Pest Management

This program is designed to produce graduates with comprehensive, multi-disciplinary training in plant pathology, entomology, and weed science for employment by industrial, extension, and regulatory agencies.

Master of Public Administration

Advanced professional training for graduates who plan to work in public administration is provided by this program.

Master of Social Work

This program emphasizes both clinical social work practice and community social policy.

Specialist in Education

This degree is planned for the student who seeks advanced specialized training in a selected area in order to improve teaching, supervisory, and/or administrative skills.

The program for the Specialist in Education degree shall consist of a minimum of 30 semester hours of study at the graduate level beyond the master's degree. The Specialist in Education degree may be obtained in the following areas: adult education; art education; communication sciences and disorders; early childhood education; educational leadership; educational psychology; elementary education; English education; foreign language education; guidance and counseling; instructional technology; mathematics education; middle school education; music education; occupational studies; physical education; reading education; safety education; school psychology; science education; social science education; and special education.

Doctor of Education

This degree provides advanced professional training for careers in teaching, administration, and other educational services. At the present time, the degree is offered in the following fields: adult education; art education; early childhood education; education of gifted; educational leadership; educational psychology; elementary education; exercise science; higher education; instructional technology; mathematics education; music education; occupational studies; physical education; reading education; recreation and leisure studies; science education; social science education; and special education. Specialization in research skills and in subject fields appropriate to public schools, higher education, and other educational and/or helping agencies is provided.

Doctor of Musical Arts

The program of study leading to the Doctor of Musical Arts degree provides advanced professional, academic, and research preparation for music careers in teaching, performing, composing, and conducting. Major concentrations are offered in music education, performance, composition, and choral conducting. The School of Music should be contacted regarding applied music options available within the performance and conducting areas.

Doctor of Public Administration

The objective of the program is to provide doctoral-level training for several client groups. First, the program will prepare students to serve in executive or upper managerial levels in local, state, and federal jurisdictions. Second, the program will prepare students for a variety of institutional settings that have significant interfaces with public agencies. These include various institutes, private planning agencies, and consulting organizations. Third, the program will help prepare individuals for specialized research and teaching careers.

PROGRAM FOR TEACHER CERTIFICATION

For Majors in Education

The Georgia State Board of Education is the agency which awards professional certificates. The College of Education has been approved to offer graduate programs designed to qualify students for fifth-year, sixth-year, and seventh-year professional certificates.

For other details and requirements see the *Graduate School Bulletin*.

For Majors in Fields Other Than Education

Candidates for degrees in fields other than education may meet the requirements for a teaching certificate at the fifth-year level. For requirements see the *Graduate School Bulletin*.

GRADUATE CERTIFICATE PROGRAMS

Conservation Ecology and Sustainable Development

The University offers a certificate in conservation ecology and sustainable development through the Institute of Ecology. Any graduate student in a natural science or a social science degree program at the University is eligible to apply. For information, contact the Graduate Coordinator, Institute of Ecology, Ecology Building (706) 542-2958.

Environmental Ethics

The University of Georgia has a Faculty of Environmental Ethics which offers a certificate program at the graduate level. The certificate program contains a variety of courses devoted partially or entirely to issues of value and the environment. For information, contact Dr. Peter Hartel, Department of Crop and Soil Sciences, (706) 542-0898.

Geographic Information Science

The University offers a Graduate Certificate in Geographic Information Science. This field comprises all phases of processing spatially-referenced data, including data acquisition (remote sensing, global positioning systems), data analysis (vector- and raster-based representational media, photogrammetry, spatial statistics), data interpretation, and data display (cartography). The program is designed with three components: a set of prerequisite skills necessary to gain entry into the program, a set of courses required of all students enrolled in the program, and a set of elective courses that permit exploration of more advanced themes in geographic information science. For further information, contact Dr. E. Lynn Usery, Department of Geography, GG Building, (706) 542-2345.

Gerontology

The University awards a Certificate in Gerontology to graduate students meeting certain requirements. For information concerning this program, contact Dr. Leonard W. Poon, Director, Gerontology Center, Candler Hall, (706) 542-3954.

Global Policy Studies

The University awards a Certificate in Global Policy Studies to graduate students meeting certain requirements. Students may earn the certificate as a supplement to a regular degree program. For information, contact Dr. William O. Chittick, Center for the Study of Global Issues, Franklin House, (706) 542-6633.

Historic Preservation Studies

The University awards a Certificate in Historic Preservation Studies to graduate students meeting certain requirements. Students are required to complete 18 hours of credit, which includes 9 hours of certificate core requirements with the remaining 9 hours to be selected from the historic preservation curriculum. For additional information contact Professor John C. Waters, Coordinator of Graduate Studies in Historic Preservation, School of Environmental Design, Caldwell Hall, (706) 542-4706.

Marriage and Family Therapy

The University awards a Pre-Professional Certificate in Marriage and Family Therapy to graduate students meeting certain requirements. For information contact the Coordinator of this certificate program, Dr. Arthur Horne, Counseling and Human Development Services, 402 Aderhold Hall, (706) 542-4107.

Women's Studies

A graduate certificate in women's studies is available to those students who either hold a graduate degree or are pursuing one at the University. The purpose of the certificate is to expose students to the rapidly expanding interdisciplinary scholarship on women. For more information contact Dr. Patricia Del Rey, Director of Women's Studies, Room 230K Main Library, (706) 542-2846.

Division of Academic Assistance

233 Milledge Hall, (706) 542-5436
FAX: (706) 542-0476
Homepage URL: http://www.uga.edu/daa

Contact Person: Dr. Sherrie Nist, Director
snist@arches.uga.edu, (706) 542-0459

The primary goal of the Division of Academic Assistance is to enhance the academic success of University of Georgia students by providing a wide range of courses, programs, and services. Entering students, who are mandated by the institution or by the Board of Regents (Developmental Studies students), enroll in Division courses based on placement test results. For mandated students, the Division provides structured courses in English (ACAE), mathematics (ACAM), and reading and study strategies (ACAR.) The Division also provides a variety of additional courses and services open to all University students. UNIV courses, academic counseling, and the Academic Center serve the entire campus.

Student Placement

Any student placing in the Division's English or mathematics courses must complete Academic Assistance requirements before enrolling in credit-bearing English and mathematics courses. With the exception of Developmental Studies students, those placing in the reading/studying course may enroll in credit-bearing courses. Student who are required to enroll in Academic Assistance courses must satisfy all requirements by the time they have earned 20 credit hours. Mandated students are allowed a maximum of 12 semester hours or three attempts, whichever comes first, to complete an area (English, mathematics, and reading/studying).

Academic Assistance Curriculum

Based upon performance on University placement tests, students may be required to take Academic Assistance courses in some or all of the following areas: English, mathematics, and reading/studying. Academic Assistance courses carry institutional credit that does not count toward graduation; however, course credit does count toward maintaining the HOPE Scholarship. Students who are mandated to take courses from only one or two program areas may take regular University courses that do not require the content or skills of the mandated Academic Assistance courses.

ENGLISH (ACAE)

The objective of the English courses is to prepare students for the kinds of writing required in English 1101 and other University courses. To meet that objective, Academic Assistance English courses stress strategies for generating ideas and improving writing fluency, conventions of academic usage and style, patterns for organizing thought and arranging written material, and critical thinking and analysis. In the classroom and in individualized instruction, students receive extensive practice drafting, editing, and revising expository and persuasive essays.

MATHEMATICS (ACAM)

The goals of the mathematics courses are to develop and strengthen the students' mathematics skills so that they can be successful in their entry-level mathematics courses and other courses requiring elementary mathematics reasoning. Academic Assistance mathematics courses develop and strengthen students' thinking, reasoning, and problem-solving abilities, as well as their study strategies. The program offers mathematics courses in intermediate algebra.

READING/STUDYING (ACAR)

The goal of the reading/studying course is to encourage autonomous learning by increasing reading proficiency and by teaching students reading and study strategies prerequisite for success in University courses. Instruction and practice are provided in reading comprehension, general study strategies, vocabulary development, and test preparation techniques. Instruction is linked to University reading/studying demands and the course incorporates applications to university-level texts and supplementary materials.

Academic Counseling

Counselors in the Division offer both individual and small group assistance to students needing academic counseling. Specific academic concerns such as time management, test anxiety, and motivational problems are addressed in these sessions. Counselors also teach structured courses under the UNIV prefix.

UNIV Courses

The Division offers elective courses to all entering and continuing students under the UNIV prefix. Two UNIV courses, UNIV 1102—Learning to Learn and UNIV 1103—Strategies for Academic Success, are the oldest of the series. These courses assist students in becoming life-long learners by focusing on cognitive, metacognitive, and affective strategies that students need to be successful in college. Other UNIV courses focus on improving writing, grammar, critical thinking, problem solving, and mathematics. (See page 540 for a complete listing and description of UNIV courses.)

The Academic Center

The mission of the Academic Center is to assist students in developing the skills necessary to achieve academic success at the University of Georgia. The staff in the Academic Center strive to provide individual, group, audio-visual, and computer-assisted approaches to learning in an effort to improve students' math, writing, reading, learning, thinking, and study skills. The Academic Center houses a Tutorial Program and a Learning Center, and offers an Outreach Service and a series of Academic Workshops. The Center is located on the first floor of Milledge Hall and all services are free to University students.

TUTORIAL PROGRAM

The Tutorial Program provides free individual and small group tutoring to all University students. Trained undergraduate and graduate peer tutors offer assistance in many undergraduate level core courses, including mathematics, chemistry, biology, accounting, economics, statistics, Spanish, French, Italian, and several others. Appointments and walk-in services are available. Call 542-7575 for more information.

LEARNING CENTER

Graduate and professional level staff in the Learning Center work with students individually and in groups in several areas of instruction:

Mathematics: Tutoring and computer-based assistance in Algebra, MATH 1060, 1090, 1101, and 1113.

Study Skills: Help with topics such as test taking, reading rate and comprehension, note-taking, and test preparation skills.

Writing: Help with writing assignments, grammar, English as a Second Language (ESL), and preparation for standardized tests.

Counseling: Academic counseling on topics such as test anxiety, personality assessment, time management, career exploration, and learning styles.

ACADEMIC SUCCESS WORKSHOPS

A series of free workshops are offered throughout the semester on a variety of topics related to academic success, including "Keeping the HOPE," "Avoiding Procrastination," and "Learning Styles." All workshops are offered in Milledge Hall. Times and topics vary by semester. Call 542-7575 for a current schedule.

R.E.A.C.H.*OUT*

Realizing Educational Achievement and Changing Horizons (R.E.A.C.H.*Out*) is a free outreach service available to any campus organization interested in an academic workshop. Topics are similar to those presented in the Academic Success Workshops, but they can also be tailored to specific needs. Call 542-7575 to request a program.

Courses of Instruction

See page 307. Courses offered under the Division of Academic Assistance are listed under the following prefixes:

ACAC	Academic Assistance Counseling
ACAE	Academic Assistance English
ACAM	Academic Assistance Mathematics
ACAR	Academic Assistance Reading
UNIV	University Orientation

Division of the Armed Services

The Division of the Armed Services consists of the Department of Military Science and the Department of Aerospace Studies. The Reserve Officer Training Corps programs are designed to develop leadership qualities and to give students an understanding of the Armed Forces and how they support the national policies and interests of the United States. In particular, ROTC programs are charged with the mission of commissioning second lieutenants who have the qualities, attributes, and educational credentials essential for service as junior officers in the Army or Air Force.

Department of Aerospace Studies

Hardman Hall, (706) 542-1751
Homepage URL: http://www.uga.edu/~afrotc/title.html
Email: AFROTC@arches.uga.edu

Air Force ROTC offers male and female students a course of study designed to complement their individual academic major. Aerospace Studies courses are available to all UGA students. Upper division courses, AIRS 3000 and AIRS 4000 series, require permission of the department. Students enrolled in the program represent a broad cross section of the UGA student body. Enrollment in either the two-year or the four-year program offers each student an additional future career option. The student has an opportunity to explore and evaluate Air Force career opportunities while earning a college degree. Completion of the AFROTC curriculum is the initial step in the education of the professional officer and provides a firm understanding of aerospace concepts, the Air Force mission, organization, and operation. Students who complete officer candidacy requirements are commissioned when they receive a bachelor's degree. Newly commissioned officers may be granted a delay in entering active duty for the purpose of seeking advanced degrees.

GENERAL PROGRAM (GMC and POC)

The Air Force ROTC program consists of two phases: the General Military Course (GMC) and the Professional Officer Course (POC); each phase requires four semesters of study on campus. The GMC materials deal primarily with the various Air Force organizations and their missions, as well as the history of the Air Force. GMC courses meet for three hours each week including two hours of Leadership Lab. The POC materials emphasize student involvement in learning and practicing management and leadership techniques; the senior year course also deals extensively with the political, economic and social factors relating to the formulation and implementation of national security policy. Communicative skills are stressed throughout the entire AFROTC curriculum. The junior and senior cadets meet for five hours each week including two hours of Leadership Lab. Completion of the GMC is not necessarily required for entry into the POC. Transfer students and other students unable to participate in the on-campus GMC may substitute a six-week field training period for the GMC course. Veterans can be awarded full credit for the freshman and sophomore courses based on their active military experience. **Application for the six-week field training session must be accomplished by January 10 preceding the fall semester in which the student becomes a junior.**

Air Force ROTC field training is offered during the summer months at selected Air Force bases throughout the United States. Students in the four-year program participate in four weeks of field training, usually between their sophomore and junior years. Students applying for entry into the two-year program must successfully complete six weeks of field training prior to enrollment in the Professional Officer Course. The major areas of study in the four-week field training program include junior

officer training, aircraft orientation, career orientation, survival training, base functions and Air Force environment, and physical training. The major areas of study included in the six-week field training program are essentially the same as those conducted at four-week field training and in the General Military Course including Leadership Laboratory.

WOMEN CADETS

Air Force ROTC offers its full range of programs to women cadets. Women cadets are eligible to compete for AFROTC college scholarships, and they receive the same benefits as their male counterparts. A commission as an officer (second lieutenant) is tendered at the time the University grants the bachelor's degree to those completing the POC.

PLACEMENT CREDIT

Students who have completed ROTC courses in essentially military preparatory schools or junior colleges may be given appropriate credit. Students who have taken high school ROTC should contact the professor of aerospace studies for placement. Individuals with prior service may also be given placement credit.

SELECTION FOR THE PROFESSIONAL OFFICER COURSE (POC)

Selection for the POC is based on interest in the Air Force together with achievement records of academic ability, observed leadership traits, and the results of a mental officer qualification test and physical examination. Selection into the program is on a competitive basis and all application criteria must be accomplished **prior** to the 1 March deadline.

PAY

When attending either field training course, students are furnished transportation or payment for travel plus pay at the current rate of approximately $375 per month. They are furnished all uniforms and receive free medical and dental care while at field training. A nontaxable allowance of $150 per month during two academic years is paid to all POC and scholarship cadets. This fee is in addition to any other scholarship benefits held by students.

SCHOLARSHIPS

The College Scholarship Program (CSP) is available to selected four, three, and two-year students participating in AFROTC programs. This scholarship consists of payment of tuition fees, book reimbursement allowance, and the monthly allowance of $150 mentioned above, for each scholarship year. Scholarship consideration is predicated on student ability, performance and potential. Special scholarships are available for minority students and for selected technical and non-technical majors. Minimum GPA for application ranges between 2.35 and 3.65, depending on the type of scholarship.

FLIGHT SCREENING PROGRAM

Pilot and navigator candidates are selected during their junior year. These competitive slots are open to all physically qualified male and female students. Eyesight requirement for pilots is 20/50 and 20/200 for navigator candidates.

Pilot candidates will attend a US Air Force-sponsored Light Aircraft Training Program following graduation. This program consists of approximately 21 hours of dual flying and 30 minutes solo flying time in a light single-engine aircraft. The purpose of the Light Aircraft Training Program is to screen those pilot candidates who have the necessary aptitude and attitude for formal USAF undergraduate pilot training.

LEADERSHIP LABORATORY

Leadership Laboratory is taken an average of two hours per week throughout the student's enrollment in AFROTC. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential. Leadership Laboratory involves a study of Air Force customs and courtesies; drill and ceremonies; career opportunities in the Air Force; and the life and work of an Air Force junior

officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes visits to Air Force installations and orientation flights.

STUDENT OBLIGATIONS

When entering the professional officer course, a student must have at least two full academic years remaining to complete his/her college requirements for an undergraduate or graduate degree or a combination of the two. Each POC student is required to enlist in the Air Force Reserve and to execute a written contract with the government. This contract requires a student to complete the POC and to accept a commission as a second lieutenant if tendered. The initial commitment for serving in the Air Force is four years. GMC students do not incur a commitment unless they are on scholarship.

AIR FORCE ROTC UNIFORMS

Uniforms will be issued at no charge to all AFROTC students taking Aerospace Studies classes. After uniform issue, if Aerospace Studies classes are dropped prior to commissioning, uniforms must be returned. Upon commissioning, students may purchase their uniforms for 50% of cost.

Courses of Instruction

See page 307. Courses offered through the Department of Aerospace Studies are listed under the prefix AIRS.

Department of Military Science

Military Building, (706) 542-2612
FAX: (706) 542-0565
Homepage URL: http://www.uga.edu/~army/
Email: goldbar@arotc.uga.edu

The Army ROTC program at the University of Georgia has been commissioning officers in Athens for more than seventy years. It is a long, proud tradition which we are continuing. Currently, more than 150 students are enrolled in Army ROTC at the University.

Army ROTC provides college men and women an opportunity to receive training in basic military skills. Through study and application of the principles of leadership and management, the Army ROTC student develops self-discipline, self-confidence, and leadership skills that will contribute to success in any career.

The Army has a career field to match a student's education and interests with no restrictions on the major field of study or discipline. Army ROTC classes are unique in the college curriculum in offering both instruction and the opportunity to develop leadership. The student who takes Army ROTC may enter after graduation such diverse fields as aviation, engineering, law enforcement, medical services, combat command, communications, finance, management, personnel administration, transportation, and research and development.

BASIC COURSE

The Basic Course is taken during the freshman and sophomore years. The courses cover military skills. There is no military commitment for taking a Basic Course class. The Basic Course of four semesters' duration consists of two hours of classroom work and two hours of leadership laboratory per week. Classes are taken in conjunction with the standard classes a student schedules each semester. The leadership laboratories are often conducted outdoors and may include field trips. In the classroom the student acquires knowledge of basic military skills, military organization, weapons, tactics, history and customs, first aid, foreign doctrines, and basic management techniques. In the field, leadership skills are progressively developed through experience and exposure to leadership situations. Equally important, these courses have the objective of developing the student's leadership, self-discipline, integrity, and sense of responsibility.

ADVANCED COURSE

The Advanced Course consists of three classroom hours and two leadership laboratory hours per week during both the

third and the fourth years. The course work during the Advanced Course emphasizes techniques of management and leadership and the fundamentals and dynamics of the military team. The leadership laboratory provides the student with applied leadership experience. The general objective of this course of instruction is to produce junior officers who by education, training, attitude, and inherent qualities are suitable for continued development as officers in the Army. There are four avenues available for the student to become eligible for entry into the advanced program and obtain a commission as a second lieutenant:

(a) satisfactory completion of, or placement credit for, the basic program at the University of Georgia or at any other school, college, or university offering basic ROTC and meeting the entrance and retention requirements established by the Army.

(b) be an active duty veteran or junior ROTC cadet graduate eligible for placement credit.

(c) satisfactory completion of the five-week ROTC "Camp Challenge" at Fort Knox, Kentucky, during the summer following the sophomore year. (See Two-Year Program.)

(d) completion of Basic/Advanced Individual Training with the National Guard or U.S. Army Reserve.

Advanced Course graduates are commissioned as second lieutenants and serve in the Active Army, the Army Reserve or the National Guard. Graduates may be granted a delay in reporting for active duty to pursue graduate studies. Each year one-third of our graduates are designated as distinguished military graduates and are eligible for Immediate Active Duty Commissions. A few of these distinguished graduates are awarded fellowships that allow these officers to attend graduate school while receiving full pay and allowances as officers.

PROFESSIONAL MILITARY EDUCATION COMPONENT

The professional military education component consists of two essential parts—a baccalaureate degree and successful completion of one of the undergraduate courses from each of the three designated fields of study listed below.

1. Written Communication Skills
   a. Requirement: Develop the ability to communicate effectively in writing.
   b. Recommended courses: ENGL 1101 and 1102, English Composition, are required for all undergraduate degrees at the University of Georgia.
2. Military History
   a. Requirement: Become acquainted with the evolution of warfare, military theory, and the military profession, with particular emphasis on the place of military institutions in society, to develop a sense of military history.
   b. Recommended courses: HIST 3020, United States Foreign Relations since 1914; HIST 3751, War and Society to 1600; HIST 3752, War and Society Since 1500; HIST 4072, The Civil War Period of American History; HIST 4092, The United States in the Era of the Cold War; HIST 4220, The United States and Latin America; HIST 4391, The French Revolution and the First Empire; HIST 4400, The Age of World Wars I and II; HIST 4700, Themes in Comparative History; and HIST 4990, Senior Seminar in History.
3. Computer Literacy
   a. Requirement: Become familiar with personal computer terminology, hardware, and application software to include word processing and the MSDOS system.
   b. Recommended courses: CSCI 1101-1101L, Introduction to Personal Computing; MGMT 2090, Introduction to Information Systems in Business.

Any deviation from the above requirements must be approved after counsel with the Professor of Military Science.

ADVANCED PLACEMENT

Veterans entering the military science program may receive credit for the first two years of ROTC. Students who have completed military science courses in

military preparatory schools or junior colleges may also be given appropriate credit.

FINANCIAL ASSISTANCE

All cadets in the advanced program earn approximately $1500 per year in nontaxable allowances. Non-scholarship cadets can earn as much as $16,500 during their four years of college by being in both the Georgia National Guard or the United States Army Reserve and Army ROTC Simultaneous Membership Program (SMP).

SCHOLARSHIPS

Three-year and two-year Army ROTC scholarships are awarded on a competitive basis. More than 50% of our advanced course students are on scholarship. Freshmen apply for three-year scholarships and sophomores apply for two-year scholarships in January each year. Individuals interested in applying for a scholarship should contact the Professor of Military Science at the University of Georgia. Four-year scholarships are available to high school seniors.

TWO-YEAR PROGRAM

Transfer Students

Students transferring to the University with two years of college remaining, but who have not completed all basic course requirements, can still participate in the advanced course. These students must attend a five-week summer camp prior to entering the advanced program. Students attend camp at Fort Knox, Kentucky, and are paid approximately $700, provided free room and board and a travel allowance to and from camp. Students who intend to enroll in the two-year program should contact the Professor of Military Science by February of their sophomore year.

PROFESSIONAL ACTIVITIES

There are two extracurricular organizations that supplement instruction offered in the classroom. Pershing Rifles Company and Ranger Company improve the student's military skills and offer additional leadership opportunities. There is also the Color Guard, and the Scabbard and Blade Honor Society.

FIELD TRIPS

The battalion conducts one weekend field trip each semester. Previous weekend activities have included mountaineering, weapons qualification, tactics, and land navigation.

ARMY SPECIALTY TRAINING

Selected students attend the United States Army Airborne, Air Assault, and Northern Warfare schools during the summer on a voluntary basis.

CAREER OPPORTUNITIES

Our graduates earn approximately $30,000 a year to start. This amount rises to approximately $50,000 after four years of active duty.

ARMY ROTC UNIFORMS, BOOKS AND SUPPLIES

Students enrolling in the Army ROTC program will be issued all books, uniforms, and materials needed in their ROTC classes. Scholarship students, advanced course students, and extracurricular activity members are issued additional uniforms. Others are issued uniforms and equipment as needed.

FURTHER INFORMATION

For further information, contact the Professor of Military Science by calling (706) 542-2612 or by visiting the Military Building on campus at the corner of Baldwin and Sanford Streets.

Courses of Instruction

See page 307. Courses offered through the Department of Military Science are listed under the prefix MILS.

Student Services and Activities

Student Affairs

The University of Georgia and the Division of Student Affairs assume that students are responsible for their conduct, their participation in the educational opportunities of the University, and the control of their private lives. Institutional policies, regulations, procedures, programs, and services reflect this attitude and philosophy. The Division of Student Affairs of the University of Georgia provides services and programs that help students adjust to, understand, evaluate, and utilize available academic resources; plan, prepare for, and pursue their life work; learn to know, live with, appreciate, and enjoy others in harmony and with fulfillment and mutual respect; and maintain mental and physical health and strength as they integrate personal, professional, and social values.

Office of the Vice President for Student Affairs

The Office of the Vice President for Student Affairs is a focal point for student concerns in an effort to make the educational experience as meaningful as possible. Staff members work to maintain and improve communications and cooperation among students, faculty, and administrators and offer students general advisement, referrals, and information. Leadership, coordination, and budgetary supervision for the Division of Student Affairs are provided by the Vice President.

The Division of Student Affairs provides many programs and services designed to enhance a student's educational experience at the University of Georgia. Departmental staff members work directly with students and other members of the University community to make these services available. The Vice President for Student Affairs has administrative responsibility for twelve departments: Admissions, Career Planning and Placement, Counseling and Testing, Recreational Sports, Registrar, Student Activities, Student Financial Aid, Student Information Systems, University Health Center, and University Housing.

The Office of the Vice President for Student Affairs collaborates with the College of Education in the training of graduate students and is the liaison between the Campus Ministry Association and the University community. Disability Services, the Student Affairs Development Program, and the National Student Exchange Program are administered through this office, (706) 542-3564.

CAMPUS MINISTRY ASSOCIATION

Students may participate in the religious programs of Athens churches and in student organizations sponsored by all major faiths, denominations, and inter/non-denominational organizations. Many of these maintain student religious centers and are members of the Campus Ministry Association. These include: Baptist Student Union, Bulldog Christian Fellowship, Campus Crusade for Christ, Catholic Center, Chi

Alpha Christian Fellowship, Christian Campus Fellowship, Christus Victor Lutheran Church, The Church of Jesus Christ of Latter-Day Saints' Institute of Religion, Episcopal University Center, Georgia Christian Student Center, Hillel Foundation (Jewish Center), Methodist Center (Wesley Foundation), Presbyterian Center, Unitarian-Universalist Campus Ministry, Worldwide Discipleship Association, and Young Life. Religious Affairs Liaison: 201 Academic Building, (706) 542-3564.

DISABILITY SERVICES

The mission of Disability Services is to create an accessible academic, social, and physical environment for students with disabilities at the University of Georgia. Disability Services seeks to eliminate attitudinal barriers that exist on campus and serves as an advocate for students with disabilities. It also encourages students to develop independence and responsibility as they participate in university life.

Disability Services provides services to students who have either a physical or mental impairment which substantially limits one or more major life activities, i.e., ADD/ADHD, cerebral palsy, hearing impairments, psychological disorders, quadriplegia, acquired brain injuries, cardiac disease, deafness and blindness. To qualify for services, students must have a verifiable disability by providing current documentation from a qualified health professional.

Disability Services provides a variety of academic and support services to ensure equal access to University programs and activities. It also provides assistive devices and state-of-the-art adaptive computer equipment specifically designed for people with disabilities.

Centrally located on the first floor of Clark Howell Hall, Disability Services is open Monday-Friday from 8:00 a.m. to 5:00 p.m. For more information, call (706) 542-8719 or visit our web site at: http://iris.dissvcs.uga.edu/~web/.

NATIONAL STUDENT EXCHANGE

The University of Georgia is a member of the National Student Exchange Consortium, which provides exchanges for students to over 140 colleges and universities throughout the United States and its territories. Students on NSE exchange attend the host campus for one quarter/semester up to a full academic year, while paying UGA tuition and fees. There are only a few eligibility requirements, and the deadline for applying for the next year is the first of March. NSE encourages students to experience new life and learning styles, appreciate differing cultural perspectives, learn more about themselves and others, and broaden their educational background through specialized courses or unique programs that may not be available on the home campus. For more information, contact the Office of Student Affairs, 201 Academic Building, (706) 542-3564.

Admissions and Orientation (Undergraduate)

The Admissions Office processes and reviews applications for undergraduate freshman and transfer admission and readmission. This office conducts daily admissions information sessions for prospective students and coordinates recruitment and orientation programs for all new undergraduate students. The office is also responsible for the evaluation and recording of all transfer credit. Admissions staff members are available to discuss general transfer credit issues with currently enrolled students. For more information, see the Admissions section of this Bulletin or contact the Admissions Office, 212 Terrell Hall, (706) 542-2112.

Career Planning and Placement Center

The Career Planning and Placement Center assists UGA students, including postdoctoral candidates, alumni, faculty, and staff in

developing their full career potential through planning and appropriate work experiences. Specifically, the Center assists students seeking part-time and summer employment; assists students and others wanting to learn more about careers and career change; teaches skills necessary in today's competitive job market; provides cooperative education, internships, and other experiential education opportunities; and assists graduating students and alumni who are seeking full-time employment or entrance into graduate or professional school.

Although not an employment agency, the Center helps develop tools required for an effective job search, including interview skills and sound search strategies. In addition, students may conduct interviews in the Center with representatives of employing organizations. Opportunities for suitable employment are often referred to the attention of students and alumni. Because the Center is a conduit between the campus and the world of work, it can advise candidates about employment trends and current opportunities.

To gain maximum benefit, students, alumni, and others should familiarize themselves with, and use, the wide variety of services offered by the Career Planning and Placement Center. Students should contact the Center very early in their university careers.

CAREER PLANNING

To assist students, alumni, and other interested parties, individual appointments may be scheduled for assistance in the career planning process. Many seminars are conducted daily covering general and specific job search topics. In addition to the regularly scheduled seminars, outreach programs are available for presentation for classes, organization meetings, and the like. Special Career Day programs are sponsored throughout the year for students in all majors and all levels—freshmen through alumni.

CAREER PLANNING COURSE (ECHD 3050)

Students may register for a credit course, ECHD 3050, Career and Life Planning, any semester they are enrolled. This two semester academic credit course provides opportunities for students to identify interests, needs, and abilities; to observe work activities; and to develop job-hunting skills.

CAREER INFORMATION LIBRARY

An important part of career planning is having access to information about careers. The materials found in the Center's Career Information Library will provide an excellent base of knowledge for students and alumni seeking this critical information. This information is available during regular business hours, and with special permission, may be checked out for overnight use.

COOPERATIVE EDUCATION/ INTERNSHIPS

Cooperative Education (Co-op) is a structured educational plan alternating or combining periods of work with periods of academic study. An internship provides a one-time (usually one semester) opportunity for a student to utilize his or her academic training in a work setting. Both programs offer students an opportunity to gain practical work experience. These experiences also help students clarify career goals as they relate to academic endeavors.

STUDENT EMPLOYMENT

Frequently students, or spouses, need to secure employment while in school or during their stay in Athens. With this in mind, the Center provides Student Employment service. A number of local employers list part-time job opportunities with the Center. In addition, a number of employers list opportunities for seasonal and/or summer employment. This service is available all year round. Students and spouses may use this service by visiting the Center. No appointment is necessary.

CAREER PLACEMENT

This service assists all students who are seeking suitable employment as the completion of their academic program draws near. For students to realize the full benefit of this service, they should register and begin the process at least twelve months prior to the month in which they will receive their degree. On-campus interviewing with employers from business, industry, education, government, and non-profit organizations is available, as well as resume referrals, mock interviews, and job vacancy announcements. Students are encouraged to participate in all special efforts by the Center. Clark Howell Hall, (706) 542-3375

Counseling and Testing Center

The Counseling and Testing Center, located in Clark Howell Hall, provides a wide range of services designed to help students adjust to and succeed in the university environment. Service options include Career Exploration Services, Personal Counseling Services (individual, couples, and group counseling), Outreach and Consultation Services, and Testing Services.

CAREER EXPLORATION SERVICES

The Center offers a variety of services to students who are unsure about their academic major/career choice or who desire more specific information about career opportunities. To receive career services, students must attend a Career Orientation Seminar (COS) or a Choosing a Major (CAM) workshop, which focus on introducing students to the career decision-making process and matching students with services most appropriate for their needs. Resources that are available to students include the Career Information Center, which contains current information about academic majors and careers, and SIGI-PLUS, an individualized computer program designed to help individuals in making career choices. Additional career services include interest and personality testing (with small group interpretations) and individual career counseling.

PERSONAL COUNSELING SERVICES

The Counseling and Testing Center offers group and individual counseling for students who may be experiencing varying types of concerns related to the changes brought on by the transition to college. All counseling services are provided on a confidential basis.

Individual Counseling: Individual counseling services at the Center are generally offered to currently enrolled students on a short-term basis ranging from a few weeks to a few months, depending on the nature of the student's concern. Self-esteem, stress management, depression, family issues, anxiety, and interpersonal relationships are among the concerns commonly discussed in personal counseling. For longer term or more specialized services, options may include on-campus or off-campus referrals. Students interested in receiving individual counseling are invited to come by the Center for additional information.

Group Counseling: The Center offers a variety of different groups each semester. The groups may assist students in developing interpersonal skills such as assertiveness, stress management, or relationship enhancement. In addition, groups are available for students interested in discussing or gaining support for personal concerns. Topics that this type of group may address include family issues, self-confidence, interpersonal relationships, women's concerns, and minority group concerns. Depending on the topic, groups may meet for a limited number of weeks during the semester or for as long as a full academic year. Each semester, groups are advertised on flyers that are distributed throughout campus and in *The Red and Black*.

OUTREACH AND CONSULTATION SERVICES

Each term the Center offers a number of workshops and programs on topics related to personal growth and development. The "Lunch and Learn" series is advertised on flyers distributed throughout campus and in

The Red and Black. Topics for these programs have included increasing self-esteem, managing stress, communication skills, career issues, maintaining healthy relationships, and interpreting dreams. In addition to these scheduled workshops, student organizations, residence halls, classes, and other campus groups can request similar programs at times more convenient to the group's needs. As an additional service, Center staff are available to provide consultation services to campus departments and organizations.

TESTING SERVICES

The Center is responsible for the administration of University-wide testing programs, including the Regents', U.S. and Georgia Constitution and history tests, Orientation testing, proficiency and entrance testing, language placement testing, and Independent Study exams. Hours are limited and appointments are required for some of the testing programs. Test dates and registration instructions for the group administrations of selected programs are provided in the OASIS (schedule of classes) each term. The Center also administers numerous national testing programs such as the GRE, MAT, MCAT, CLEP, LSAT, TOEFL, SAT, and GED. Computer Based Testing (CBT) is available for the GRE, GMAT, PRAXIS I, and other tests at the Center by appointment. Information and registration packets for national testing programs can be obtained from the lobby of Clark Howell Hall. Further information regarding testing may be obtained by contacting the Center's Testing Information line at 542-TEST (8378).

Students are encouraged to take full advantage of the resources that are offered at the Counseling and Testing Center by visiting the Center, Clark Howell Hall (first floor, south wing), to access available services or by calling 542-3183 for general information and 542-TEST (8378) for testing information.

Judicial Programs

The Office of Judicial Programs provides the basis of support for the University's judicial system, strives to inspire trust and confidence in the University's rules and judicial system, and encourages the incorporation of standards of acceptable behavior into a lasting, individualized value system. In accomplishing this task, the office advises the University Judiciary. This organization helps to ensure that violations of University regulations will be adjudicated in a fair and impartial manner.

Furthermore, in order to maximize the positive aspects of defining the limits on acceptable behavior, students charged with violating University conduct regulations are provided individual counseling before and after the adjudication of their case. The staff also provides advice and assistance in the development of written policies designed to govern the day-to-day functions of both the Division of Student Affairs and the University in areas which involve student life.

Any person may file a complaint if he or she feels a University Conduct Regulation has been violated. A student, faculty member, or staff member who has information regarding what may be a regulation infraction should contact the Office of Judicial Programs. The staff will offer advice and give assistance on properly filing a complaint if this becomes necessary.

The Judicial Programs Office also coordinates the student traffic appeal process. For more information, contact Judicial Programs, 300 Academic Building, (706) 542-1131.

REGULATIONS

The University maintains a code of conduct that is printed in the Student Handbook covering individual conduct and student organization activities. A separate brochure outlines traffic and parking regulations. All students are expected to know and observe these rules and regulations. To adjudicate alleged violations of the code of conduct, a

University Judicial System was established in 1969. A booklet outlining the procedures followed in disciplinary hearings is available in the Office of Judicial Programs.

Minority Services and Programs

The mission of the Office of Minority Services and Programs is to enhance the university environment by promoting student leadership and academic achievement, to celebrate the contributions and heritage of UGA's diverse student body, and to encourage the full participation of African American, Hispanic American, Asian American, Indian American, and Caribbean American students, faculty, and staff in campus life.

The office also houses the *African American Cultural Center*, which sponsors a diverse offering of activities emphasizing African and African American culture.

The goals of the Office of Minority Services and Programs are to promote leadership development, resource awareness, academic success, and multiculturalism. The office specifically advises the following student organizations:

The Black Affairs Council (B.A.C.) is an organization dedicated to assisting the University in meeting the needs of the African American student population. The organizational mission is twofold: (1) to identify specific needs, problems, or concerns to the University administration and (2) to develop and implement strategies to address identified needs.

The Pamoja Dancers is an Afrocentric troupe that provides an outlet for non-dance majors to express themselves through dance. Pamoja is open to any interested student. Concerts are held throughout the school year.

The Black Theatrical Ensemble (B.T.E.) is an African-centered theatrical group for students interested in gaining experience and exposure to acting, directing, writing, and production of commercial as well as original plays and vignettes from a Black point of view. B.T.E. is open to any student seeking this form of expression.

Georgia's Black Educational Support Team (B.E.S.T.) assists and orients new and transfer students to campus life. The purpose of this program of peer helpers/friends is to help lessen the stress and strain of college life. The peer also serves as an information source and referral agent for these students.

The Asian American Student Association (A.A.S.A.) is a group devoted to promoting Asian history and culture on campus and in the community and to assist in the academic success of its members.

The Hispanic Student Association (H.S.A.) sponsors numerous activities to recruit and retain Hispanic students at UGA. H.S.A. also contributes to the University's diversity by hosting an annual Hispanic Awareness Week and co-sponsoring activities with other student groups.

The Caribbean Student Association (CARIBSA) sponsors activities that promote awareness of the history and culture of the Caribbean Islands.

The Indian Cultural Exchange (I.C.E.) is a group dedicated to promoting the rich culture and history of students on campus and in the community whose cultural background is from India by sponsoring various educational programs and events.

Kross Kultures is a student magazine for students of color to express their cultural views and to share information with the entire student body.

To obtain additional information, contact the Office of Minority Services and Programs, 404 Memorial Hall, (706) 542-5773.

Recreational Sports

The University encourages interest in sports by affording students opportunities to be participants and spectators in a variety of intramural sports, outdoor recreation experiences, club sports and informal sports.

The intramural program includes flag football, volleyball, sand volleyball, badminton, basketball, softball, golf, bench press, swimming, tennis, indoor soccer,

outdoor soccer, and racquetball. The Georgia Outdoor Recreation Program offers backpacking, whitewater rafting, caving, horseback riding, and canoeing experiences, among others.

Club sports are student-run organizations which offer competition and instruction in their particular sport. Currently, students have organized rugby, soccer, Tae Kwon Do, lacrosse, and ultimate frisbee, among others.

Sports and recreation facilities available for student use include the new Ramsey Student Center for Physical Activities (4 gyms, swimming pools, weight training/ conditioning room, racquetball and squash courts, multi-purpose and martial arts rooms, indoor track, climbing alcove), 37 acres of playing fields, 22 outdoor and 4 indoor tennis courts, and the beach and beach house at Lake Herrick. Ramsey Student Center for Physical Activities, 330 River Road, (706) 542-5060.

Registrar

The Office of the Registrar is responsible for registering university students, reporting their grades, and maintaining their permanent academic records. In addition, the office provides a variety of related services to students, academic departments, and other constituents.

The Registration Office, 235 Memorial Hall, (706) 542-6792, assists students, faculty, and staff in the registration process, coordinates departmental scheduling of courses, and publishes the *Schedule of Classes* each semester. The office also maintains the OASIS Registration Help Desk, (706) 542-6911.

The Records Services Office, 105 Academic Building, (706) 542-4040, provides assistance to students with name and address changes, enrollment certifications, schedule adjustments after the drop/add period, and transcript requests. Service Representatives will respond to all in-person and telephone inquiries regarding student-related information as allowed by University, state or federal policies.

Requests for transcripts must be in writing as required by the Family Educational Rights and Privacy Act of 1974. A notice of at least 24 hours is required. Standard request forms are available at the Records Services Office; requests in letter form will also be accepted. All transcripts are $2.00 each. FAXed transcripts are $3.00 each ($6.00 for overseas) in addition to the $2.00 basic transcript fee. These charges are subject to change without prior notice.

The Data Entry and Processing Office, 107 Academic Building, (706) 542-4055, is responsible for the creation and maintenance of the permanent academic records of enrolled students. In response to information from the deans' offices this office processes class rolls, grade changes, grade reports, and graduation statistics. This office also certifies veterans and qualified dependents for educational benefits.

VETERANS' CERTIFICATION

Veterans eligible for educational benefits and dependents of deceased or 100% disabled veterans eligible for educational benefits may apply for those benefits through the Veterans Education Benefits Office in the Office of the Registrar, 106 Academic Building, (706) 542-8772. To apply for VA educational benefits, veterans must bring a certified copy of their DD-214, and reservists must supply a copy of their Notification of Basic Eligibility, to the Veterans Education Benefits Office.

At the beginning of each term, enrolled veterans or dependents receiving benefits must submit a Veteran's Enrollment Form to the Veterans Education Benefits Office in order to maintain their eligibility for VA educational benefits. Veterans or dependents receiving compensation who withdraw from the University or reduce their academic load are required to report such action promptly to the Veterans Education Benefits Office. For more information, contact the Registrar's Office: 106 Academic Building, (706) 542-8772.

Student Activities

The Department of Student Activities is a programming and service department and offers a wide variety of both to students and student organizations. It maintains files on all registered student organizations and offers programming and financial advisement to club officers. Personnel of the department advise the University Union and its seven program divisions—Committee for Black Cultural Programs, Cinematic Arts, Visual Arts, Ideas and Issues, Entertainment, Performing Arts, and Summer. They also advise the student radio station, WUOG-90.5 FM, the *Pandora* yearbook, Homecoming, fraternities and sororities, College Bowl, Leadership Development, Special Programs, and Communiversity—a coordinating agency for student community service projects. The department is responsible for the issuing of student identification cards.

Facilities available through the department in Memorial Hall and the Tate Student Center include a game room featuring table tennis and billiards, student lounges, a ballroom, meeting rooms, and club offices. Activities include performing and visual arts, films, lectures, debates, panel discussions, and special presentations. Services provided by the Department of Student Activities include van rental, quick copy and full service printing, technical equipment rental, and a computer room. For more information, contact the Department of Student Activities at 325 Tate Student Center, (706) 542-7774, http://www.uga.edu/STUACT/

STUDENT ORGANIZATIONS

A large number of professional and honorary fraternities and sororities, honor societies, advocacy, international, recreational, and service groups exist on the University campus. A detailed listing of over 430 organizations is available from the Department of Student Activities in the Tate Student Center, (706) 542-7774.

STUDENT COMMUNICATIONS

Student communications include the independent student newspaper, *The Red & Black.* The *Pandora* (yearbook) and WUOG-FM (student radio station) are administered through the Department of Student Activities, (706) 542-7774.

SOCIAL FRATERNITIES AND SORORITIES

Fraternities and sororities offer a wide variety of programs and opportunities for their members, including scholarship, leadership, community service, athletics, and social activities. For more information, contact the Greek Life Office, 216 Memorial Hall, (706) 542-4612.

INTERNATIONAL STUDENT LIFE

The International Student Life Office assists international students at UGA with cross-cultural adjustment, orientation, advising on various personal matters, including initial housing assistance and cultural programming. The office also works with international student organizations that provide an extended support system for all new international students. International Student Life assists all students at UGA with cross-cultural exposure through cultural programming. A weekly Coffee Hour, a Speakers Bureau, orientation sessions, and Community Friend program offer opportunities for international and American students to learn from each other. For more information, call (706) 542-5867.

Student Financial Aid

Student financial aid is the assistance available to help students meet the difference between what they can afford to pay and what it actually costs to attend the University of Georgia. The amount a student and family can afford to contribute will be determined by the University of Georgia's Office of Student Financial Aid (OSFA), employing a uniform need analysis system in accordance with federal guidelines.

The process of establishing the amount of eligibility for financial assistance for a student is based on two major components: Cost of Attendance (reasonable comprehensive costs for an enrollment period), and Total Family Contribution (as determined by a need analysis system).

AID APPLICATION PROCEDURES

Students begin the aid application process by completing the Free Application for Federal Student Aid (FAFSA). Students who apply for admission receive a letter and postcard from the Office of Student Financial Aid to request packets. Most students who received aid the previous academic year will receive a Renewal FAFSA directly from the Federal government; or they may come by OSFA for a copy. Students may also apply electronically using FAFSA on the Web at www.fafsa.ed.gov. By applying for aid, a student will be considered for federal, state, and institutional aid, including the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Work-Study, HOPE Scholarship, Federal Direct Loans, and scholarships administered by the Office of Student Financial Aid.

The HOPE Scholarship Program has made an adjustment to its application process. Students whose parents' adjusted gross income was over $50,000 in 1998 and who do not wish to apply for any other aid through the Office of Student Financial Aid may complete the HOPE Alternate Application (HAA). However, if the parents' adjusted gross income is under $50,000, or a student would like to have eligibility for other aid programs determined, the FAFSA must be completed. Once a student has completed an HAA, his or her HOPE Scholarship will be automatically renewed without having to file another HAA and assuming all eligibility requirements are met.

GENERAL ELIGIBILITY REQUIREMENTS

In general, to be considered for student financial aid, a student must:

1) be a United States citizen or eligible non-citizen of the United States; and,
2) have been accepted for admission to an approved degree-seeking program or Teacher Certification program by the Office of Undergraduate Admissions or the Office of Graduate Admissions; or be currently enrolled in an approved degree seeking program or Teacher Certification Program (students whose degree program status changes should contact OSFA); and,
3) be making progress toward the completion of a course of study according to the "Satisfactory Academic Progress Policy for Student Financial Aid Recipients"; and,
4) not be in default on a Guaranteed Student/ Federal Stafford Loan, Federal PLUS

Loan, Federal Supplemental Loan, National Direct/Defense Student Loan, Federal Perkins Loan, Income Contingent Loan or Federal Consolidation Loan received at any institution; and

5) not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, or Student Incentive Grant received while attending any institution.

HOW YOUR ESTABLISHED FINANCIAL NEED IS DETERMINED

Your Established Financial Need is the difference between the Cost of Attendance at the University of Georgia and the Total Family Contribution. Your Total Family Contribution is derived from a formula that subtracts the allowances (taxes and FICA paid) from the resources (parents' and student's income and assets, including non-taxable income such as Social Security), and then makes adjustments based on the number of people in the family and the number of family members in college. By subtracting the Total Family Contribution from the cost of attending the University of Georgia, need is established. Federal Work-Study, Federal Supplemental Educational Opportunity Grant, Student Incentive Grant, Regents' Scholarship, and Subsidized Federal Direct Loan are awarded based on Established Financial Need.

QUALITY ASSURANCE PROGRAM VERIFICATION REQUIREMENTS

The University of Georgia participates in the Quality Assurance Program sponsored by the U.S. Department of Education. The program is designed to help postsecondary educational institutions improve the delivery of student financial aid. Every fall approximately 255 students are randomly selected to provide verification of application information. Students who do not comply with the requirements will have their future aid cancelled and repayment requested on aid which has already been disbursed.

STUDENT FINANCIAL AID POLICIES

A. Each year OSFA receives requests for more funds than are available. Although Federal Pell Grant, Federal Direct Loan, and Federal Direct PLUS Loan funds are available to eligible students year-round, other funds awarded by OSFA go to eligible students on a first-come, first-serve basis.

B. Full-time for undergraduate students is 12 credit hours per semester; half-time is 6 credit hours per semester. Full-time for graduate students is 9 credit hours per semester; half-time is 5 credit hours per semester.

C. Irregular students, non-degree students, transient students, unclassified post-graduate, provisional, and post-baccalaureate students are not eligible for federal or state student financial aid. However, students enrolled in a Teacher Certification program are eligible to apply for a Federal Direct Loan or Federal Direct PLUS Loan. Students must request a "Teacher Certification Form" from OSFA. Teacher certification students must be enrolled at least 6 hours a semester.

D. Aid is awarded on an academic year basis. Dates to apply for summer aid will be announced by OSFA during the academic year. Students who plan to apply for aid for the first time for a summer semester must mail the FAFSA in time for it to reach the Federal Processor by the 30 June deadline. No aid can be awarded if this deadline is missed.

E. Only the first 30 attempted hours of non-degree credit course work (including mandatory Academic Assistance) will be allowed in determining aid eligibility. Neither voluntary Academic Assistance nor audits will be considered in determining aid eligibility.

F. If you complete the FAFSA, Renewal FAFSA, or FAFSA on the Web, DO NOT submit the Student Aid Report (SAR) you receive to OSFA unless you are making corrections or adding UGA. The Federal Processor will electronically submit your application information to OSFA.

This information will be used to determine your eligibility for aid which includes the Federal Pell Grant, Federal Work-Study, Federal Supplemental Educational Opportunity Grant, Federal Direct Loans, Federal Direct PLUS Loan, HOPE Scholarship, etc.

G. If you receive a Federal Direct Loan or your parent receives a Federal Direct PLUS Loan, you must maintain at least half-time enrollment *at all times*. Dropping below half-time enrollment at any time will result in subsequent loan disbursements being canceled. If you re-enroll at least half-time, you must contact OSFA to re-apply for the loan(s).

H. If you enroll in In-Service Education courses, you *may* be eligible to receive aid if you are enrolled in a degree-seeking program. You must obtain a certification letter (available in OSFA) for each course.

I. Any aid you receive or expect to receive from an outside source must be reported to OSFA, regardless of when you receive notification of the award. This includes scholarships, grants, loans, and assistantships or fee waivers. The receipt of such aid may result in a reduction, cancellation, and/or repayment of your need-based award(s).

J. If you pre-register for classes, you should note the payment deadline on your fee invoice. Your schedule will be canceled if you do not pay fees by the payment deadline on your fee invoice, or contact the Student Loans, Grants, and Scholarships Department in Business Services if you expected a deferment but do not have one. Pre-registered students who have been awarded student financial aid by the fee deferment date each semester should have a deferment until the first day of class. Students who do not pre-register should contact the Student Loans, Grants, and Scholarships Department in Business Services.

K. OSFA uses your *permanent* home address on file in the Registrar's Office. You may update this address during registration, or by completing a change of address form in the Registrar's Office in the Academic Building.

L. OSFA reserves the right, on behalf of the University, to review and cancel awards at any time if you fail to meet the requirements of the Satisfactory Academic Progress Policy for Student Financial Aid Recipients or because of changes in your financial or academic status, academic program, resident status, enrollment status, etc. All student financial aid awards are contingent upon the availability of funds.

M. Applications for each upcoming academic year are available in January. For priority processing, all required documents must be on file in OSFA by 1 March. Applications not on file by that date will be processed as time and funds permit. OSFA will begin processing completed applications for the academic year as soon as federal regulations are issued and tuition rates are determined by the Board of Regents. Processing aid applications can take six weeks or longer during peak processing time. Applications that are not complete by the following deadlines may not be processed by the beginning of that semester: fall, 1 August; spring, 1 November; summer, 1 May. **If you have not completed the application process by the dates given, you should be prepared to pay *all* educational costs**. You should not expect to have student financial aid checks available if you have not returned your signed Award Letter to OSFA **AND** have not returned a correctly completed Federal Direct Loan Promissory Note to the University by the dates given above.

N. The U.S. Department of Education defines "professional student" as a student enrolled in a course of study beyond a Bachelor's degree; therefore, Bachelor's degree students enrolled in Forest Resources, Social Work, and Journalism are not professional students for the purpose of applying for student financial aid. However, PharmD and DVM students are considered professional students.

O. Students applying for Title IV aid as eligible noncitizens and whose citizenship status is not confirmed on their SAR, must provide OSFA with appropriate documentation (Alien Registration Receipt Card—Form I-151 or Form I-551, a passport, or I-94) showing that they are permanent residents or other eligible noncitizens. OSFA will then initiate a secondary confirmation with the Immigration and Naturalization Service (INS). This confirmation must be received before the student is awarded any aid.

P. If your total gift aid (grants and scholarships) exceeds the total of your tuition, fees, books and supplies, you should consult your federal and state income tax instructions when completing your income tax returns.

Q. OSFA will ask students receiving Veterans Benefits to provide documentation of their VA benefits. These benefits are included in your overall aid package.

R. Your official UGA enrollment status is determined each term at the end of Phase III Registration (Drop/Add). If you enroll full-time and receive aid, and then drop to less than full-time during Phase III Registration, you may be asked to repay aid received.

S. You should use your full legal name when applying for aid. Do not use nicknames, abbreviations, or middle names as first names. The U.S. Department of Education requires that the name you use when applying for aid matches your name on Social Security Administration records. You will be asked to provide additional information if that is not the case.

T. Students regularly enrolled in a degree seeking program who are studying abroad and have completed the University's "Study Abroad Credit Approval Form" are eligible for aid. Contact OSFA to document allowable expenses.

U. Students should read the "Fees and Financial Aid" section of each semester's *Schedule of Classes* for details on how student financial aid is disbursed.

V. If the semester(s) for which you are requesting aid have ended AND you are no longer enrolled, you will usually not be eligible for aid. If, however, you are involved in verification when the semester(s) end, you MAY be eligible to receive aid when verification is complete. Contact OSFA if you have questions.

W. When completing the FAFSA, **ALL** items must be answered. In particular, failure to indicate housing status (#84) and enrollment status (#19-22) may delay your Award Letter.

TYPES OF AID

Grants, loans, Federal Work-Study, and a limited number of scholarships are available through this office to help defray educational expenses at the University of Georgia. Grants do not have to be repaid. Most loans must be repaid in cash. Federal Work-Study awards are earned during the period of enrollment. You must be enrolled at least half-time to receive a Federal Direct Loan or Federal Direct PLUS Loan. You must be enrolled full-time to receive University Academic Scholarships. Federal Pell Grants are available for less than full-time students depending on need. HOPE Scholarships are available for one or more hours of enrollment. All student aid will be awarded based on anticipated full-time enrollment unless otherwise noted on your Award Letter.

A. GRANTS/SCHOLARSHIPS

1. **Federal Pell Grant**: is designated for undergraduate students working toward a first bachelor's degree. The amount of your grant is determined by the Cost of Attendance, the Expected Family Contribution provided by the U.S. Department of Education, and your enrollment status. If you are enrolled full-time (12 or more credit hours) you will receive your full eligibility. If you are enrolled 9 to 11 credit hours, you will receive three-fourths of your eligibility. If you are enrolled 6 to 8 credit hours, you will receive one-half of your eligibility. If you are enrolled less than 6 credit hours, you will receive one-fourth of your eligibility.

2. **Federal Supplemental Educational Opportunity Grant (SEOG)**: is designated for undergraduate students working toward a first bachelor's degree. Eligibility is based on Established Financial Need, and funding is limited to students with full Federal Pell Grant eligibility.
3. **Law Enforcement Personnel Dependents Grant (LEPD)**: is designated for eligible Georgia residents who are dependent children of Georgia Law enforcement officers, prison guards, or firemen who were permanently disabled or killed in the line of duty. The amount of the grant is $2000 per academic year. Eligible students should contact OSFA.
4. **Georgia Public Safety Memorial Grant**: is designated for the son or daughter of any Georgia public safety officer who is killed or permanently disabled in the line of duty. This new program, which is funded by the Georgia Lottery for Education, covers the Cost of Attendance at a Georgia public post-secondary institution, minus other aid received, including the Law Enforcement Personnel Dependents Grant.
5. **HOPE Scholarship (Helping Outstanding Pupils Educationally)**: is funded by Governor Zell Miller's Georgia Lottery for Education and is available to eligible Georgia high school graduates. The HOPE Scholarship will cover tuition, fees, and a $150 book allowance per semester. Full-time enrollment is not a requirement. Grade point eligibility for entering freshmen is based on a high school GPA of 3.0 or better as determined by the high school and reported to the Georgia Student Finance Commission (GSFC). University of Georgia students receiving HOPE may continue to receive the HOPE Scholarship as a renewal by maintaining a 3.0 overall grade point average on all attempted course work. Transfer students who received HOPE elsewhere will be evaluated on the basis of their GPA on all previous course work. Students who are returning to college or who were not academically eligible for HOPE as freshmen may be eligible after attempting 30 hours. The HOPE Scholarship is reduced by the amount of Federal Pell Grant or other federal grants the student receives. Students receiving a full Federal Pell Grant and Federal SEOG are only eligible for the book allowance. For further details of the HOPE Scholarship Program, contact GSFC at 1-800-546-HOPE.

B. LOAN PROGRAMS

The University of Georgia participates in the Federal Direct Loan Program. The lender for the students' loans and for the parents' loans is the federal government. The U.S. Department of Education's William D. Ford Federal Direct Loan Program is a way to borrow money to pay for school. The federal government will lend you the money while you attend UGA. The U.S. Department of Education's Direct Loan Repayment Center will handle repayment of your loan(s) and you will be able to choose a repayment plan that fits your needs. If you have previously borrowed, you will now borrow from the federal government and when you leave school, you will be able to consolidate your previous loans directly with the U.S. Department of Education's Direct Loan Repayment Center and make one payment each month. Once you leave school, the point of contact for information about your loan(s) will be 1-800-4-FED-AID.

1. **Federal Direct Loan:**
   a. The subsidized Federal Direct Loan is need-based and the government pays the interest on this loan while the student is in school and during the six-month grace period. An unsubsidized Federal Direct Loan is non need-based and was created for borrowers who do not qualify for federal interest subsidies and thus the student either pays the interest while in school and during the six-month grace period or it is added to the

balance of the loan. These are low-interest loans made to you by the University of Georgia as your lender.

b. Having your eligibility for a Federal Direct Loan determined does not commit you to accepting a loan.

c. Annual interest rates are variable for new borrowers. Contact your lender for specific details.

d. Loan eligibility is based on Established Financial Need (subsidized) or replaces Expected Family Contribution (unsubsidized), and state/lender restrictions. Federal Direct Loan maximums are $2625 per year in the freshman year, $3500 per year in the sophomore year, $5500 per year in the junior and senior years, with a $23,000 cumulative total of subsidized and unsubsidized loans for all undergraduate study. Graduate students may borrow $8500 per year. The cumulative total for undergraduate and graduate subsidized and unsubsidized Federal Direct Loans is $138,500. The University of Georgia defines "per year" as a twelve month period beginning fall semester and ending summer semester.

e. The borrower must pay an origination fee equal to four percent of the amount borrowed. This amount is deducted proportionately from each loan disbursement by the lender and is used to help reduce the cost of making these low-interest loans.

f. When the loan is approved, checks will be available to students at the beginning of each semester. If your loan is approved for only one semester, you will receive half of your loan at the beginning of the semester and the remainder at the midpoint. If you have subsidized and unsubsidized loans, you will receive a single check for both loans each semester.

g. Repayment for most loans begins six months after you leave school. You will sign a promissory note prior to receiving any subsidized and unsubsidized Federal Direct Loan check. This will specify your interest rate and the number of months (grace period) before your repayment begins. The amount of your monthly payment will be determined by the federal government and is based upon your cumulative loan amount and federal regulations.

h. First-time borrowers will be contacted by the Student Loans, Grants, and Scholarships Department in Business Services to satisfy entrance interview requirements.

i. If you are requesting a Federal Direct Loan (subsidized or unsubsidized), do not complete a loan application. By completing the UGA student financial aid process, you will provide enough information to generate a preprinted promissory note.

2. **Regents' Scholarship**: Designated for Georgia residents who are enrolled full-time and ranked academically in the upper 25% of their class and who have Established Financial Need. Maximum amount is $750 per academic year. Repayment may be satisfied by working full-time in the State of Georgia one year for each $1,000 received, or by making cash repayment with three percent interest per annum.

3. **Service Cancellable Loans**: Service-Cancellable Stafford Loans are made by the Georgia Student Finance Authority to Georgia residents who are preparing for professions in which there is a critical shortage in Georgia. You may cancel principal and interest payments by practicing in an approved Georgia location twelve months for each academic year of assistance.

4. **Federal Direct PLUS Loan**:

a. These are educational loans for parents of dependent students. There is no income restriction.

b. The interest rate is variable.

c. Loan eligibility is based on the Cost of Attendance and other aid you may receive. Each year parents may borrow up to the Cost of Attendance minus any other aid received.

d. PLUS repayment begins sixty days after the funds are disbursed. Under specific circumstances, a parent borrower may defer interest and/or principal payments of the loan while the student is attending school.

e. Checks are made payable to the borrower unless the borrower authorizes disbursement to the student, and then the check will be made payable to the student. The Student Loans, Grants, and Scholarships Department in Business Services verifies the student's enrollment, endorses the check, and mails it to the borrower.

C. FEDERAL WORK-STUDY

1. **Federal Work-Study (FWS)**: Eligibility for Federal Work-Study is based on Established Financial Need. Amounts range from $750 to $1500 per semester. Students are assigned jobs located on campus and work schedules are made around the student's class schedule.

NOTE: Students who are not Georgia residents are reminded that there is an agency in most states offering grant assistance. If you are interested in applying for state grant assistance but do not know how to contact the agency that serves your home state, you may telephone the Office of Student Financial Aid (706/542-6147) at the University of Georgia.

Satisfactory Academic Progress Policy for Student Financial Aid Recipients

The U.S. Department of Education mandates institutions of higher education to establish minimum standards of satisfactory academic progress for students receiving Federal aid. These same standards are maintained by the University of Georgia for students receiving institutional aid. The policy is included in the Student Financial Aid Application Packet.

Student Information Systems

Student Information Systems provides computer-based information system services to Student Affairs departments. This service involves: maintenance of existing computer-based systems; assisting and/or training user departments in obtaining various ad hoc or short-term reports; development of new "state of the art" user-oriented application systems for both the mainframe computer and various microcomputers; micro-mainframe interface assistance; data base planning, coordination, and consultation. 158 Boyd Graduate Studies Research Center, (706) 542-6135.

University Health Center

Before their arrival on campus, students *must* complete and return to the University Health Center the health history form and the mandatory immunization record form. Students may not register for classes without documentation for the immunization requirements for new students established by the Board of Regents. Students with special problems or handicaps should have their physicians advise the Health Center of any anticipated needs or medical requests before arrival on campus.

The University Health Center provides primary health care on an outpatient basis to students of the University of Georgia and their spouses. The Health Center is accredited by the Joint Commission on Accreditation of Healthcare Organizations.

During fall and spring terms outpatient care is available on a daily basis. Over the summer term these services are available Monday-Saturday. In general, students are seen on an appointment basis to reduce waiting time. Students with urgent health care problems may be seen on a walk-in basis, or they may call ahead for a same-day appointment.

Outpatient clinics include an acute care clinic, medical clinic, mental health clinic, sports medicine clinic, women's clinic, physical therapy clinic, allergy-immunization clinic, travel clinic, and dental clinic. Pharmacy, laboratory, and x-ray services are available at any time the outpatient clinics are open.

The prepaid student health fee, supplemented by nominal fee-for-service charges, entitles students to a wide range of health care services. A fee-for-service schedule is applicable for student spouses and for students who otherwise may be fee-exempt. The health fee supports an excellent staff of health professionals: physicians, physicians' assistants, nurse practitioners, registered nurses, psychologists, and other health care professionals. The health fees also support a modern health care facility.

Supplemental student insurance is available to provide accident and sickness coverage. This policy has been designed to meet the needs of students and families at a minimum cost. Students may enroll in this plan at the beginning of the school year or at the beginning of each term for the remainder of the year. It is very important that students not covered by parents or other health insurance be enrolled in a supplemental insurance plan.

A health education program (542-8690) is staffed by professionals in the field of health promotion. Educational programs are provided on a variety of health-related topics. Time is available for private consultation as well as for specific program requests. The health education program encourages healthy choices by increasing health awareness and teaching responsibility for personal health and well-being.

Medical information contained in student medical and mental health records is strictly confidential and may not be released without expressed written permission from the patient or upon court order.

University Health Center, (706) 542-1162.

University Housing

RESIDENCE HALLS

General Information

Approximately 6,000 students are housed in 17 residence halls, geographically and administratively divided into two residential areas—the Georgian and the Colonial Residence Halls—on the University of Georgia campus. These residential communities are designed for comfortable living, optimal convenience, and a positive contribution to the educational experience of the residents. Each residence hall features a modern, comfortable environment in which all residents can benefit and take pride. Within each residential area, attractive lounges, computer labs, study and meeting areas, TV rooms, coin-operated laundromats, recreational facilities, and mail facilities are provided. Rooms are furnished with single beds, chests of drawers, desks and chairs, and cable TV and telephone service. A majority of the bath facilities are centrally located and shared by students on each floor in most halls. The combination of physical facilities, staff, and student interest contributes to a stimulating environment in University housing.

Through the residence halls, students have an opportunity to participate in social, educational, and recreational programs and activities designed to enhance their personal, scholastic, and social development.

Housing Contract and Application

Applications for residence halls are mailed to freshmen with their official notices of acceptance and to new senior division students on request. The application and application fee must be returned to the Housing Office in accordance with the accompanying instructions.

The residence hall contract is for the academic year. All students are urged to be familiar with the terms and conditions of the contract prior to signing. Although binding for the fall and spring semesters, provisions are made for mid-year terminations required by academic course programs such as student teaching, internships, and co-ops.

To apply for housing accommodations, applicants must submit an application and a non-refundable $25 application fee to the Department of University Housing.

Students who decide not to enroll at the University after making application for housing should contact the Housing office to cancel their application.

Housing Assignment

Residence hall assignments are made based on the date the completed housing application and application fee are received in the University Housing Office. Students will receive their academic year contracts and notifications of assignments as early as possible before the semester for which application has been made. A signed residence hall contract, accompanied by the housing payment for the first semester, should be forwarded to the University Housing Office by the date specified on the contract.

Every effort is made to honor hall, roommate, and visitation preferences as space permits. Roommate preference will be honored if both applicants request each other in writing and a double room vacancy exists. Students who do not state a preference for a specific person as a roommate will be assigned a roommate without regard to race, age, color, creed, religion, or national origin.

Opening and Closing of Residence Halls

University residence halls typically open at 10:00 a.m. on the day prior to the first day of registration and close at 10:00 a.m. on the day after the last officially scheduled examination. Non-graduating residents may remain in the halls at the end of the semester for 12 hours after their last scheduled examination or until 10:00 a.m. on the day after the last officially scheduled examination as per the official University calendar, whichever is earlier. Room accommodations will be provided for graduating seniors until immediately following graduation exercises. During official holidays within a semester and between semester breaks, the University reserves the right to close certain halls and require students electing to remain on campus to move temporarily to another hall.

The regular semester room rent does not include housing rates for housing between semesters. The University reserves the right to charge extra rent when housing is provided during such times and to make changes in fees or other charges at the beginning of any semester without previous notice.

Students who require year-round housing accommodations should request an assignment in one of the residence halls that provides continuous housing arrangements.

Responsibility for Property

Resident students are held responsible for any damages to their rooms and furnishings. Damages will be assessed by the University and the student billed for repairs or replacements. Students should inform University officials of any damages which exist at the time they occupy their rooms.

Although precaution is taken to maintain adequate security, the University cannot assume responsibility for loss or damage to student possessions. Students or their parents are encouraged to carry appropriate insurance to cover such losses.

FAMILY AND GRADUATE HOUSING

Applications may be obtained from the Family and Graduate Housing Office. To qualify as and to continue to be a resident, students must be married, or be single students with one or more dependents occupying the apartment at least 20 days per month. Either husband, wife, or single parent must be registered in a degree program at the University of Georgia, Athens campus, for the semester in which housing is requested. Graduate students must be enrolled for a minimum of 6 hours; undergraduate students for 12 hours. Post doctoral students and faculty members are not eligible for Family and Graduate Housing.

Assignments

Assignments are made from a waiting list established according to the date applications are received in the Family and

Graduate Housing Office with a $25.00 non-refundable application fee.

Information

For residence halls and general information:

FAX (706) 542-8402
710 East Campus Road
The University of Georgia
Athens, Georgia 30602-4622

Other Student Services and Activities

THE ACADEMIC CENTER

The mission of the Academic Center is to assist students in developing the skills necessary to achieve academic success at the University of Georgia. The Academic Center houses a Tutorial Program and a Learning Center, and offers an Outreach Service and a series of Academic Workshops. The Center is located on the first floor of Milledge Hall and all services are free to University students. See the Division of Academic Assistance, page 103, for further information about the services offered by the Center.

ART, DRAMA, AND MUSIC ACTIVITIES

Art activities include exhibitions by students and faculty of the School of Art as well as occasional traveling exhibitions, slide lectures and informal critiques by visiting artists and various student field trips. Spring, summer, and fall sessions in Cortona, Italy are jointly operated by the School of Art and the School of Environmental Design.

All students are eligible to participate in the regular major productions of the University Theatre in the drama department as well as in numerous smaller stage and media activities. Outstanding professional companies also appear on the campus. A summer Studies Abroad Program in Italy and England is available jointly operated by the Department of Drama and the College of Journalism and Mass Communication.

The School of Music presents weekly programs featuring faculty members, guest artists, and students. Other music activities include performances by student choral organizations, band organizations, and the Symphony Orchestra.

CAMPUS TRANSIT SYSTEM

The Campus Transit System, funded by student transportation fees, provides bus service throughout the campus for students and employees. Frequent service connecting academic areas, parking, and residential areas is provided on nine routes Monday through Friday between the hours of 7:00 a.m. and 6:00 p.m. In addition, three routes operate during the evening hours until 12:30 a.m. A Rider's Guide showing the routes, timetables, and bus stops is available on the buses and at many locations throughout campus. Specially equipped vans provide transportation services for mobility-impaired students throughout the service area of the Campus Transit System. Through an agreement with the Athens-Clarke County Government, students with valid UGA ID also have access to the services provided by the Athens Transit System without payment of fares.

FOOD SERVICE

The University operates three food service facilities for general student use: Bolton Hall, Oglethorpe Hall, and Snelling Hall. The dining halls are located at easy-to-reach locations either by walking or by UGA bus. Two economical meal plans as well as meals on a cash basis are available at these facilities.

The 1998-99 rates for the two meal plan contracts are shown below. Rates for the 1999-00 academic year were not available when this Bulletin was printed, but may be

obtained by calling the Food Services Department, (706) 542-1256.

Academic Year Contract

5 days unlimited meals (Monday-Friday)	$1,884
7 days unlimited meals (Monday-Sunday lunch)*	$2,080

*No evening meal on Sunday

The University Food Services Department offers a variety of special events during the academic year, including a Hawaiian Luau, Steak Night, International Celebration, special holiday dinners and ice cream sprees. Meals are served in a pleasant atmosphere and with an unlimited seconds system of service. There are a number of cash basis only outlets located in several of the academic buildings, the main library, the Georgia Museum of Art, the Creamery, and the UGA Golf Course.

LEARNING DISABILITIES CENTER

The University of Georgia Learning Disabilities Center houses three divisions, the Regents' Center for Learning Disorders, the Learning Disabilities Service Division, and the Distance Learning Division. The Learning Disabilities Center is nationally recognized for generating research pertaining to adults with learning disabilities, and its assistance program for college students with learning disabilities.

The Learning Disabilities Evaluation Division is funded by the Board of Regents of the University System of Georgia to provide assessment resources to students within the University System with learning problems due to a disability. Comprehensive standardized assessments are available to qualified students to provide recommendations regarding how to best maximize students' functioning in college and information related to requests for special accommodations and/or modification. There is a fee attached to the diagnostic evaluation.

The Service Division of the Learning Disabilities Center was established to serve both students and faculty by promoting an understanding of learning disabilities, explaining students' needs and helping students arrange classroom modifications that will help them learn to their potential. To be eligible for services, students must be evaluated at the Regents Center for Learning Disorders and/or meet criteria established by the Board of Regents. Students should contact the Learning Disabilities Center at (706) 542-4589 for information on procedures necessary for becoming eligible for receiving services at the University of Georgia. Services available are based on individual needs and may include early registration, consultation with faculty, textbooks on tape, note takers, computer lab, learning disabilities support group, and testing accommodations. Learning disabilities specialists address individual strengths and weaknesses in special courses and help with learning strategies. There is no cost attached to services.

The Distance Learning Division provides state and national technical assistance via interactive TV, satellite teleconferences, e-mail courses, and traditional training formats. The Division provides satellite teleconferences focusing on topics relevant to the populations with learning disabilities and attention deficit disorders.

PARKING SERVICES DEPARTMENT

All persons parking motor vehicles on the University of Georgia campus between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday, must display a windshield decal, temporary decal, or hanging decal issued by the Parking Services Department. Parking permits for students and employees are issued based on various eligibility criteria, which may include a current University ID card. Parking fees are determined by the type of permit issued. Failure to register a vehicle may result in a $25 fine for each violation and/or impoundment for repetitive citations. A current decal authorizes parking in specifically designated parking spaces. Due to a shortage of parking spaces, the purchase of a parking decal does not guarantee a parking space.

Housing students may choose to park in nearby surface lots or in the 900-space West Campus Parking Deck for the option of reserved parking. The South Campus Parking Deck, located next to the Georgia Center for Continuing Education, provides a limited number of reserved parking spaces for employees and students. The central campus pay lots near the University Bookstore and the Tate Student Center provide short-term parking for visitors and University personnel.

Additional information regarding categories of parking permits, fees, fines, and appeals may be received by visiting the Parking Services Department or by calling 542-PARK (7275). Copies of the latest edition of *The University of Georgia Campus Parking Map and Regulations* booklet will also provide detailed campus parking information. You may also visit us on-line at http://www.busfin.uga.edu/parking/. The Parking Services Building is located in the commuter parking lot at 325 River Road on south campus near the East Campus Parking Deck.

PSYCHOLOGY CLINIC

The Psychology Clinic, located in the Psychology Building, offers a wide range of psychological services to students, faculty, staff, and to the general community. These services include assessment of various psychological problems and treatment to alleviate these problems. Problems dealt with include depression, anxiety, intense fears, headaches, hypertension, chronic pain, eating disorders, interpersonal difficulties, marital problems and children's problems, among others. Appointments and/or information are available by calling the Psychology Clinic at 542-1173. Fees for service are made affordable through a sliding fee scale based on income.

Opportunities and Programs

ACADEMIC COMMON MARKET

The University of Georgia participates in the Academic Common Market, an agreement for sharing specialized academic programs among the participating states of the Southern Regional Education Board (SREB). Participating states are able to make arrangements for their residents who are fully admissible into specific University academic programs to enroll on an in-state tuition basis. Applicants must (1) be accepted for admission into one of the programs listed below, and (2) obtain certification of residency from the Common Market Coordinator in their home state. The following University programs are available to residents of the indicated states :

PROGRAM	*AVAILABLE TO RESIDENTS OF:*
AB in Japanese Language and Literature	Kentucky
AB in Religion	Mississippi
BBA in Risk Management and Insurance	Maryland
BBA in International Business	Kentucky, Louisiana
BFA in Art/Crafts (Jewelry and Metal)	South Carolina
BFA in Art/Interior Design	Maryland
BFA in Photographic Design	Kentucky
BFA in Interdisciplinary Studies (Scientific Illustration)	Maryland, South Carolina, Virginia
(Digital Media)	South Carolina
(Photographic Design)	South Carolina
BLA in Landscape Architecture	Tennessee
BMUS in Music Therapy	Alabama, Kentucky, Maryland, Mississippi, South Carolina, Tennessee
BS in Astronomy and Physics	Kentucky
BS in Environmental Soil Science	Maryland
BS in Genetics	Alabama, Kentucky, Louisiana, Maryland, South Carolina Tennessee
BSA in Landscape and Grounds Management	South Carolina
BSED in Dance Education	Tennessee
BSEH in Environmental Health	South Carolina
BSFCS in Consumer Journalism	South Carolina
BSFCS in Child and Family Development	Maryland
BSFR in Pre-Forest Resources (Wildlife)	Maryland

For further information about the Academic Common Market, contact the Registration Office or the Southern Regional Education Board, 592 Tenth Street, N.W., Atlanta, GA 30318-5790.

ADVANCED PLACEMENT PROGRAM

The purpose of the Advanced Placement Program staff is to coordinate and supervise advanced placement activities instituted by the University of Georgia and to provide liaison among University units in matters concerning both advanced placement and credit by exemption in basic courses.

Generally, advanced placement tests are given to new students during summer orientation sessions prior to fall enrollment. A special session is planned for students admitted to the Honors Program. It provides coordinated placement testing and academic counseling, followed by early class registration for fall semester. Students invited to these sessions are urged to attend, as limited time during fall registration does not permit the same intensive testing and counseling procedure.

In addition to its own Advanced

Placement Program, the University also participates in the Advanced Placement Program of the College Board. Students making an acceptable score on the College Board program are given, on the recommendation of the respective department, advanced placement and credit in all fields.

The University also grants exemption and credit on the basis of the College Board Achievement or Advanced Placement Test scores in foreign languages, mathematics, biology, physics, chemistry, economics, English, American history, European history, art, music, political science, and computer science.

Students planning to enroll at the University of Georgia who took the College Board Achievement Tests and/or participated in the special Advanced Placement Program of the College Board should request that the College Board testing center submit their scores to the Honors Program, University of Georgia, Athens, Georgia 30602-6116. Inquiries concerning the Advanced Placement Program should be directed to the Honors Program, University of Georgia, Athens, GA 30602-6116, (706) 542-3240.

ADVANCED PLACEMENT PROGRAM FOR AP TEACHERS

This program is for high school teachers who are teaching or are planning to teach high school Advanced Placement (AP) courses. Three hours of graduate or undergraduate credit in the specific subject area will be offered for each course. All of the AP courses will be offered as part of an annual two-week summer AP institute, held approximately four weeks after the spring term for the public schools is over.

Faculty members for AP institutes are selected from members of UGA's faculty who are nationally recognized scholars in their field and supplemented by high school teachers who are thoroughly familiar with the College Board's Advanced Placement Program.

Students must register for AP courses through the Special Academic Programs Office. For more information, contact: Ms. Mary Lue Walser, Director, Special Academic Programs, Room 209, Biological Sciences Bldg., (706) 542-7623.

AMERICAN LANGUAGE PROGRAM

The University of Georgia's American Language Program teaches English as a second language to speakers of other languages seeking to improve their communicative skills. In courses offered by the American Language Program, students study English for preparation for enrollment in universities or colleges whose primary language of instruction is English; for cultural adaptation; or for pronunciation, fluency, and accent reduction. Courses are designed on an intensive schedule to help students learn English in the shortest possible time. Admission to the American Language Program is reserved for students who have completed secondary school studies and who can devote a majority of their time to learning English.

American Language Program faculty also teach two graduate academic credit courses specifically designed to prepare international graduate students to become University graduate teaching or laboratory assistants.

Information regarding the American Language Program may be obtained on the department's World Wide Web page, http://www.gactr.uga.edu/alp, by calling (706) 542-4095, or by visiting the offices at 192 Georgia Center.

GOVERNOR'S INTERN PROGRAM

The Governor's Intern Program provides a unique academic experience while giving students a practical, firsthand look at agencies in state and local governments or non-profit organizations throughout Georgia. Internships may be full or part-time and are available for each academic term. Interns must be currently enrolled junior, senior, graduate, or law students with a 2.5 or higher GPA. Interns receive a stipend, and internships may be done for academic credit at the discretion of the student's major department. A report is submitted by each intern to the Governor's Intern Program after each project's completion. Upon

approval by the staff, the report is filed in the Georgia State Archives for future reference. Application deadlines are generally as follows: July 15 for fall semester, October 15 for spring semester, and April 15 for summer semester. Applications and specific deadlines may be obtained from: Career Planning and Placement Center, Clark Howell Hall, or through Governor's Intern Program, 115 State Capitol, Atlanta, GA 30334.

HONORS PROGRAM

The Honors Program provides participants with special Honors classes in the freshmen/sophomore core curriculum, Honors courses in a variety of majors, the opportunity to design and pursue independent interdisciplinary majors, more intensive versions of courses required for departmental majors, and independent study under faculty supervision culminating in an Honors thesis or project. In addition to individualized advising throughout their education, the program provides students with special support for graduate and professional school application, as well as national fellowship and scholarship competitions. The Honors Program is open to qualified undergraduates in all the schools and colleges of the University.

Most Honors classes and seminars have enrollments of 20 students or less and are taught by specially selected faculty. Unlike high school Honors or advanced placement classes, the University's Honors courses do not carry more credit, offer higher grade points, or require substantial additional work beyond regular classes. Rather, they are smaller, enriched in content, and sometimes more specialized. Honors classes provide faculty with opportunities to introduce their disciplines more deeply, employing innovative and more individualized approaches. Students in the program choose from approximately 180 Honors classes offered annually. These classes usually fulfill core curriculum requirements. This bulletin lists Honors classes under the departments in which they are offered. Honors course numbers are followed by an "H."

Honors students may enroll in Upper division classes in the major with Honors Option to pursue a subject more deeply within the setting of a regular course. Students arrange additional readings and other assignments with the class instructor and secure Honors credit for these classes by filing a form with the Honors Program. Honors students may also enroll in directed study classes which enable them to work independently on a sustained research project under the guidance of a faculty member, usually leading to an Honors thesis, often comparable to a Master's thesis. But the outcome may take a different form—a recital, exhibition or performance. Honors directed reading classes (4960H-4980H) and Honors theses classes (4990H) are available in most departments. Additionally, Honors students with sufficient background are encouraged to participate in graduate courses, with the approval of the department, Honors Office, and in cases of 8000 (Ph.D.) level courses, the Dean of the Graduate School.

Students may enter the Honors Program as freshmen, or by collegiate entry after at least one semester's enrollment. The Honors Program accepts transfer students as well.

For further information about the Honors Program consult the Honors Program Student handbook, available from the Honors Program office, or at <http://www.uga.edu/~honors/>. Direct inquiries to The Honors Program, (706) 542-3240.

MEDICAL COLLEGE OF GEORGIA SCHOOL OF NURSING AT ATHENS (SONAT)

In 1974 a program leading to a baccalaureate degree in nursing was established in Athens; this is a satellite to the regular program of the Medical College of Georgia School of Nursing in Augusta. In order to qualify, students must take 60 semester hours of pre-nursing core curriculum. This may be completed as a student at the University of Georgia enrolled in Arts and Sciences, Pre-Nursing.

The student applies to the Medical College of Georgia to take upper division

courses in nursing. These classes are limited to nursing students and are taught by the faculty at the Medical College of Georgia School of Nursing in Athens (SONAT).

SONAT faculty supervise clinical experiences at a variety of health care agencies in the Athens and surrounding areas (may include Atlanta and Augusta).

Students enrolled in the SONAT program have all the rights and privileges of University students and also those of the Medical College of Georgia. Upon graduation from the Medical College of Georgia, students are eligible to take the National Council Licensing Examination.

SONAT offices are located in Athens.

NATIONAL STUDENT EXCHANGE

See page 112 under Office of the Vice President for Student Affairs.

OAK RIDGE ASSOCIATED UNIVERSITIES

Since 1948, students and faculty of the University of Georgia have benefitted from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Sciences and Education, the DOE facility that ORAU manages, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of under represented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the *Resource Guide*, available on the World Wide Web at http://www.orau.gov/orise/resgd.htm, or by calling either of the contacts below.

ORAU's Office of Higher Education Initiatives seeks opportunities for partnerships and alliances among ORAU's members, private industry, and major federal facilities. Activities include faculty development programs, such as the Junior Faculty Enhancement Awards and the Visiting Industrial Scientist Program, and various services to chief research officers.

For more information about ORAU and its programs, contact Mr. Kirk D. Bertram, ORAU Council member, at 706-542-3184; contact Monnie E. Champion, ORAU Corporate Secretary, at 423-576-3306; or the ORAU home page at http://www.orau.gov.

STUDY ABROAD PROGRAMS

The University of Georgia sponsors a variety of study abroad programs. The Office of International Education (OIE) offers advisory services and provides information on study abroad programs for summer, quarter, semester, or academic year periods. The OIE maintains an extensive library for those seeking study, work, and travel abroad opportunities.

Among the University of Georgia's interdisciplinary study abroad programs, the School of Art offers a program in Cortona (Tuscany), Italy, during spring, summer, and fall semesters. Established in 1970, each program consists of a travel period (Rome, Pompeii, Venice, etc.) and residential studio and class work. Graduate and undergraduate credit courses are available in art history, studio art (ceramics, book arts and papermaking, drawing, interior design, jewelry and metalwork, painting, printmaking, photography, sculpture, and watercolor), landscape architecture, and Italian.

Stipends are competitively available. Applications are due approximately fifteen weeks before the beginning of each term. For more information, contact Studies Abroad-Cortona, School of Art, (706) 542-7011.

The UGA Study Abroad Program in Verona, Italy is a summer program which features a wide variety of courses for students in the social sciences. Undergraduate as well as graduate students may take classes in fields such as political science, anthropology, sociology, history, geography, and law. The courses emphasize global, environmental, social, cultural, political, and economic issues. The classes are taught in English by UGA faculty in a congenial environment featuring close student-faculty interaction. Two week-long excursions are included in the program. Verona is ideally located for weekend travel throughout Europe. For further information, please contact Ms. Sylvia Mapp, Globis Center, at (706) 542-2424 or on e-mail: spmapp@arches.uga.edu.

Each spring and summer the University of Georgia departments of English, History, and Political Science offer a program at Oxford University. The participants live at historic Jesus College. Students may earn credit in core courses and courses related to their academic major. The faculty consists of American and British scholars who teach small tutorials. For information, contact Judith Shaw at 342 Park Hall, (706) 542-2244.

The Classics Study Abroad Program in Rome, Italy is operated each summer. The program is designed especially for students who have not previously studied classical civilization. Credit hours can be earned and used to fulfill the literature/humanities and fine arts requirements of many schools. Instruction includes both regular classes and numerous field trips. Knowledge of a foreign language is not required. For further information, contact Dr. Timothy Gantz at (706) 542-2179 in Park Hall.

Another summer program, sponsored by the Department of Drama and the College of Journalism and Mass Communication, takes place in two countries, Italy and England. Students may take courses in drama or journalism. For further information, call John English, College of Journalism and Mass Communication, (706) 542-5028, or Stanley Longman, Department of Drama, (706) 542-2091.

The College of Family and Consumer Sciences in partnership with the American Institute for Foreign Study offers a 6-week study abroad program in London during summer. Students can earn between 3 and 15 credits in major courses. Instruction includes both regular classes and numerous field trips. Areas of study vary, but students from any major in the College may participate. A 6-week part-time internship gaining experience with a British business or organization is also available. For further information, contact Dr. Patricia Hunt-Hurst at 303 Dawson Hall, (706) 542-4853.

The University of Georgia also participates in several other reciprocal exchange programs which allow students to pay UGA tuition and fees while attending academic institutions overseas. These exchanges take place in a variety of countries encompassing many different disciplines. Some exchanges are coordinated by academic departments and others are coordinated by the OIE. See your department head or a study abroad advisor in the OIE for more information.

Student Financial Aid, including the HOPE Scholarship, may be applied to UGA-sponsored study abroad and exchange programs. For initial information about UGA requirements for using financial aid for study abroad, contact the OIE.

In addition to UGA-sponsored study abroad and exchange programs, many other colleges and universities, language institutes, and international organizations offer opportunities for overseas study, travel, work, teaching, and volunteer experiences. Students may obtain information about these options through the OIE.

Some programs sponsored by the University of Georgia offer resident credit (otherwise, international or domestic transfer credit is awarded); students should check with the individual program. Credit earned in programs sponsored by other

institutions or organizations will be recorded as transfer credit if accepted by the University of Georgia. To obtain credit for these programs, students must complete the *UGA Study Abroad Credit Approval Form* before departing. Obtain the form and additional information about UGA and other study abroad and exchange programs from the OIE, 201 Barrow Hall, (706) 542-7903, or visit the OIE web site at <http://www.uga.edu/oie>. Final determination of the transfer of credit will be made by the admissions office and/or the academic departments upon completion of the program and receipt of the final transcript. Student Financial Aid, including the HOPE Scholarship, may be applied to programs sponsored by other institutions, provided the student completes the UGA Study Abroad Credit Approval Form and meets all other UGA requirements for study abroad and financial aid.

UNIVERSITY CENTER IN GEORGIA CROSS REGISTRATION PROGRAM

The University Center in Georgia is a consortium of nineteen public and private institutions of higher learning in the Atlanta/Athens area, including the University of Georgia. Founded in 1938, the consortium provides a structure to enhance educational opportunities through academic cooperation among the member institutions and their communities.

The purpose of cross registration is to provide opportunities for enriched educational programs by permitting students at any University Center institution to take courses at any member institution. To participate, cross registration students must enroll in at least one course at their home institution. Application forms and guidelines for cross registration may be obtained by contacting the University of Georgia cross registration coordinator at (706) 542-6911.

UNIVERSITY STUDIES

University Studies serves traditional and nontraditional students who reside in Athens-Clarke County and surrounding counties which do not include another University System of Georgia college or university. University Studies may also serve students who are enrolled because of special circumstances identified through reviews including those conducted by the Faculty Admissions Committee. In serving students who are seeking to earn degrees and who are in their first and second year of study, University Studies provides academic advising, academic support programs, and student services to enhance students' academic success.

University Studies also establishes and maintains effective partnerships with Athens area institutions, organizations, businesses, and governmental agencies for the purpose of furthering students' educational opportunities and attainments.

Admission

Students must apply for regular undergraduate admission to the University of Georgia. Upon admission they are classified as Arts and Sciences—University Studies and may enroll in any regular academic offering which is consistent with their academic program.

Program Requirements

Students admitted as **freshmen** must complete 30 cumulative UGA semester hours in University Studies and earn a 2.0 cumulative GPA prior to transferring to another academic department (some academic departments have a higher GPA requirement). Freshmen must earn a minimum 2.0 cumulative GPA upon completion of a maximum of 40 semester hours in University Studies to be allowed to continue at the University of Georgia.

Students admitted as **transfer** students with **less than 30 semester hours** of transfer work must complete a minimum of 30 cumulative UGA semester hours in University Studies and must earn a minimum cumulative GPA of 2.0 in order to transfer to an academic major (some academic departments have a higher GPA requirement). Transfer students admitted with less than 30 semester hours of transfer work must earn a minimum cumulative GPA of 2.0 upon completion of 30 cumulative UGA

semester hours or completion of 60 overall semester hours to continue their studies at the University of Georgia.

Students admitted as **transfer** students with **more than 30 semester hours** of transfer work must earn a cumulative GPA of 2.0 upon completion of a maximum of 60 overall semester hours to be allowed to transfer into a major (some academic departments have a higher GPA requirement) and to be allowed to continue their studies at the University of Georgia.

Academic Advising

University Studies requires academic advising for every student prior to registration. University Studies academic advisors assist students in planning their programs of study and in developing meaningful educational plans that are compatible with students' goals. Academic advisors interact individually with the students and monitor their academic progress. Advisors are available by appointment throughout the term to ensure that students' academic needs are met.

Academic Support Programs

Recognizing the significance of the first two years as a foundation for academic success, University Studies offers academic support programs to assist students as they pursue their educational goals, adjust to the collegiate environment, and engage positively in their academic pursuit throughout the freshman and sophomore years. A keystone in the department's academic support program is the course UNIV 1103: Strategies for Academic Success-University Studies, in which all beginning University Studies students are expected to enroll during their first semester in residence.

Student Services

Basic to the University Studies student services program is the goal of fully integrating students into the dynamic social, cultural, and intellectual life of the University, while providing specialized services and activities which offer opportunities for involvement in activities related to their overall success at the University. University Studies provides linkages with and access to the numerous and varied educational, social, cultural, and recreational resources of the University of Georgia. University Studies sponsors socials and an annual honors reception for students who have been named to the University's Dean's List or as Presidential Scholars.

To encourage interaction among students and to provide leadership opportunities, University Studies sponsors student groups and committees. The University Studies Student Activities Committee brings the student perspective to relevant issues and helps to plan various student activities. The Freshman Advisory Group gives students an opportunity to share ideas and issues related to the first-year transition into the University. The Adult/Returning Student Advisory Group brings together students returning to school while balancing work and families with their academic programs.

Community Service and Outreach

University Studies establishes networks and advisory committees, comprising community and business leaders who serve as vital partners for the advancement of educational access and academic excellence for area residents. Pre-enrollment advisement is provided to prospective students who have questions about returning to the classroom. The advisor discusses the decision to return to school, taking into consideration students' academic backgrounds and preparedness as well as their educational goals. The advisor discusses educational opportunities available to area residents. University Studies provides information, access, and academic support for new and returning students in the community and for University of Georgia employees.

UNIVERSITY SYSTEM OF GEORGIA INDEPENDENT STUDY

The mission of University System of Georgia Independent Study is to offer University System academic credit courses to University System students and individuals who are interested in earning academic credit through distance learning methods

and technologies.

Independent Study is a University System of Georgia academic program that provides freedom from the classroom structure. Independent Study allows flexibility of registration, permitting students to register at any time and take several courses simultaneously with up to a year to complete each course. Independent Study is ideally suited for the student who is purposeful, self-directed, and able to exercise self-discipline in completing requirements of a course. Independent Study courses are offered by academic departments located at senior institutions within the University System of Georgia. Faculty of the academic department prepare the courses offered and grade the lessons submitted by students to satisfy requirements of the courses. Academic credits earned through Independent Study are recorded on the student's permanent record in the University of Georgia Registrar's Office and may be used to satisfy degree requirements according to the regulations of the college or university from which the student plans to graduate.

Academic Policies

University of Georgia students who take Independent Study courses taught by UGA faculty have the option of registering for resident credit. The decision to grant resident credit is made at the time of Independent Study course registration and remains in effect until the course is completed. Students must request resident credit on their registration form, and eligibility for resident credit will be verified by Independent Study prior to registration (2.0 in 15 semester hours or more of course work at UGA). Resident credit earned through Independent Study may be used to satisfy the resident hours required by the University of Georgia for a baccalaureate degree. Resident credit will be included in both cumulative and overall grade point averages.

Independent Study courses offered by other University System universities must be taken for nonresident credit. Nonresident credit is considered transfer credit by the University of Georgia. Nonresident credit will be counted in a student's overall grade point average and recorded in a student's official record as transfer credit.

A student on academic or disciplinary dismissal may register for an Independent Study course with written permission from the student's academic dean. The written permission must specify the number of hours the student may earn while on academic or disciplinary dismissal. Students on academic or disciplinary dismissal may not earn resident credit for Independent Study courses.

University System of Georgia Independent Study students are responsible for knowing and abiding by Independent Study policies. Independent Study operates according to the Academic Honesty system of the University of Georgia. Students are responsible for seeking academic advisement prior to registration, and are subject to the academic policies of their institutions.

Registration Information

To insure appropriate course selection, particularly in a major field of study, a student should seek approval and advisement from the appropriate advisor in his or her degree program prior to registering for Independent Study courses. To register for Independent Study, students should complete a registration form (available from the Independent Study office, Web site, or from an Independent Study catalog). Tuition fees must be paid in full at the time of registration. Fees are based on a per-credit-hour rate regardless of credit hours taken or matriculation fees assessed by the University of Georgia. Independent Study will accept an invoice, or authorization to bill, from an outside agency as long as such authorized invoices do not contain conditions to be met before payment is made (e.g., payment may not be based on successful completion of a course). University of Georgia students receiving financial aid through the University may be eligible to apply financial aid awards toward Independent Study tuition fees (for both resident and nonresident credit). UGA students receiving financial aid awards may submit a USGIS

request for a fourteen-day tuition fee deferment.

Independent Study offers several online courses on the World Wide Web which may include bulletin boards, chat rooms, links to related sites, and other resources. Students have the option to submit lessons by fax or e-mail for selected courses.

Registration forms with appropriate fees should be sent to University System of Georgia Independent Study, Georgia Center for Continuing Education, University of Georgia, Athens, GA 30602-3603, or brought to Independent Study in Suite 193 of the Georgia Center. Students may register online, with credit card payment, from the USGIS Web site (www.gactr.uga.edu/usgis). Independent Study registration is continuous Monday through Friday, from 8:00 a.m. to 4:30 p.m. Registration procedures usually take approximately 30 minutes and students should plan their schedules accordingly. Office hours are from 8:00 a.m. to 5:00 p.m. Monday through Friday. The office is closed during University of Georgia holidays. For further information, contact the Independent Study office at (706) 542-3243 or 1-800-877-3243 or e-mail usgis@arches.uga.edu. The Independent Study catalog is available on the World Wide Web at www.gactr.uga.edu/usgis/.

UNIVERSITY SYSTEM CENTER — GWINNETT

The Board of Regents of the University System of Georgia established the University System Center—Gwinnett to provide higher education in Gwinnett County. The University of Georgia, Georgia State University, and DeKalb College participate in a consortium to provide academic courses at the undergraduate and graduate levels.

The University of Georgia offers resident credit courses at the University System Center—Gwinnett that may be used as part of an approved degree program. Classes are taught by faculty approved by academic departments of the schools and colleges of the University.

Continuing education programs in a variety of academic and occupational disciplines are also scheduled at the University System Center—Gwinnett. Instruction is delivered in traditional workshop format, via distance learning, or at other locations in the area.

Additional information concerning programs of study offered at the University System Center—Gwinnett is available by contacting the University of Georgia Gwinnett Office (770) 995-6885.

Campus and Community Resources

CLASSIC CENTER

A community civic and convention center complex, the Classic Center on the east end of downtown Athens features a historic fire hall as its architectural centerpiece. The facility includes a banquet/meeting hall, exhibit hall, plazas, and a performing arts theater.

CLASSROOM AND LABORATORY FACILITIES

Almost 720 rooms support the classroom and laboratory instruction at the University of Georgia. A small number of large lecture halls combine with general classrooms, specialized classrooms, class laboratories, and a few assembly halls to provide a vast array of instructional support facilities. Another 1400 rooms house non-instructional laboratory activities.

The traditional science laboratories are located primarily on south campus in buildings known as the Science Center Complex—six buildings that house the biological sciences, chemistry, physics, geology, geography, food science, and animal sciences. All of the buildings have well-equipped laboratories for instruction and research programs. In addition, a new Life Sciences building houses research and instructional space for the biochemistry and genetics departments.

In addition to the Science Center and the Life Sciences Building, well-equipped laboratories are available throughout the campus for departmental instruction and research programs including those in the College of Agricultural and Environmental Sciences in Conner Hall, The College of Family and Consumer Sciences in Dawson Hall and Spiers Hall, and the Robert C. Wilson School of Pharmacy, the D.B. Warnell School of Forest Resources, and the College of Veterinary Medicine, each in its own building.

Modern instructional techniques require modern equipment. In many classrooms, state-of-the-art technology is used to illustrate and demonstrate instructional concepts. In most buildings, computer laboratories are available to students either in an open access environment or in support of specific courses. In some buildings, both types of computer laboratories are available to the student. The Terry College of Business and other disciplines which utilize the case-style method of teaching generally utilize case-style classrooms. The Henry W. Grady College of Journalism and Mass Communication maintains radio and television studios in addition to other modern electronic communications laboratories.

GEORGIA MUSEUM OF ART

The Georgia Museum of Art was established in 1945 when Alfred H. Holbrook donated his collection of 100 American paintings to the University of Georgia. The museum opened in the basement of the university library in 1948 on north campus, and took over the entire building in the early 1950s when a new library was constructed. A new museum building, at 90 Carlton Street in the Performing and Visual Arts Complex on East Campus, opened in April 1996.

In the years since Holbrook's original gift, the permanent collection has grown by gift and acquisition to more than 7,000 works of art. These works include 19th- and 20th-century American paintings, a Kress Study Collection of Italian Renaissance

paintings, and an extensive collection of prints and drawings by American, European, and Japanese masters.

The museum presents a schedule of changing exhibitions from the permanent collection and private and public collections as well as special traveling exhibitions from the United States and other countries. Lectures, gallery talks, film series, family days, and other events are scheduled to complement these exhibitions. Museum tours and special viewings of works in the permanent collection are available for university classes by request.

The Georgia Museum of Art was designated the Official State Museum of Art by the 1982 Session of the Georgia General Assembly. Partial support for the exhibitions and programs at the Georgia Museum of Art is provided by the Georgia Council for the Arts through the appropriations of the Georgia General Assembly and the National Endowment for the Arts. Hours are: Closed Mondays; Tuesday, Thursday, Friday, Saturday: 10 a.m.-5 p.m.; Wednesday: 10 a.m.-9 p.m.; Sunday: 1-5 p.m; closed on legal holidays. Admission is free.

The Museum Shop, which offers an array of art-related gift items, cards, posters, and books is open Tuesday through Saturday 11 a.m.-4 p.m.; Wednesday: 7-9 p.m.; Sunday: 1-4 p.m.; extended hours during holiday season.

GEORGIA REPERTORY THEATRE

The Georgia Repertory Theatre is a fully professional repertory theatre company established as a resident theatre which presents a spring season in Athens. Presented in cooperation with Actors Equity Association, the professional actors organization, the Georgia Repertory Theatre presents new plays by established American playwrights.

The Georgia Repertory Theatre provides students and the University community and visitors with the opportunity to see the highest level professional theatre.

LIBRARIES

The University of Georgia Libraries are composed of three major on-campus libraries—the Main Library, the Science Library and the Law Library, which is administered by the School of Law. There also are several small collections such as the Curriculum Materials Center (Education), the Georgia Center for Continuing Education Library, the Veterinary Medicine reading room, and various lab collections. The UGA Libraries' system also includes libraries at the experiment stations in Griffin and Tifton, and the marine stations at Sapelo and Skidaway.

The UGA Library is the largest university library in the State of Georgia. It is a member of the prestigious Association of Research Libraries consisting of the largest research libraries in North America and ranks in the top thirty of these libraries.

The Libraries contain more than 3.4 million books, serials and documents, and many other items, including manuscripts, photographs, drawings and newspapers. The map collection incorporates over 590,000 items and the microform collection numbers more than 5.6 million. These collections support the curricular and research needs of the campus and are available to library users both on the campus and across the state.

An outstanding feature of the Main Library is the Hargrett Rare Book and Manuscript Library, a repository of rare and priceless relics. Among the collections are the works and memorabilia of Erskine Caldwell and Margaret Mitchell, the original Confederate Constitution, Confederate imprints, a notable Georgiana collection, many Southern historical manuscripts and the sheet music of many well-known musicians.

The Richard B. Russell Library for Political Research and Studies is located on the west side of the Main Library. Comparable in scope to a presidential library, it houses the papers and memorabilia of the late Sen. Russell, as well as the papers of former Secretary of State Dean Rusk, Sen. Herman E. Talmadge and many other elected officials, government appoin-

tees and civic leaders.

The Peabody Award Archive is housed in the Media Department of the Main Library. It contains most entries to the Peabody Award, which was founded in 1940 and honors excellence in broadcasting. The archive holds over 40,000 titles, with radio programs dating from 1940 and television from 1948.

Special services for students include orientation to the libraries services and collections; individual reference conferences for persons undertaking major research papers; individual stations for audio and video materials, photocopy machines, and access to information in over 130 networked databases. In addition to access through workstations within the Libraries, most of the databases are available on the Internet at the GALILEO homepage (http://www.galileo.peachnet.edu). The Libraries' catalog and selected other electronic resources are available through the UCNS central IBM system menu. In addition, specialized electronic resources are available in the Libraries on dedicated workstations. The Main Library also houses a computer lab operated by UCNS.

For additional information on Libraries collections and services, contact the Office of the University Librarian, University of Georgia, Athens, GA 30602. (706) 542-0621. (http://www.libs.uga.edu)

OFFICE OF INSTRUCTIONAL SUPPORT AND DEVELOPMENT

Director: Dr. William K. Jackson, 542-1355

Associate Director: Dr. Jay Harriman, 542-1582

OISD is a unit within Academic Affairs devoted to the advancement of instruction at the University. OISD is advised by a faculty committee, the Instructional Advisory Committee, and reports directly to the Provost/Senior Vice President for Academic Affairs. The central mission of OISD is to provide campus-wide leadership on matters relating to instruction. The programs, services, and activities of OISD are clustered within five major areas: **TA Support Services** (Workshop for Graduate Teaching/Laboratory Assistants, SPEAK Test for International Teaching Assistants, Teaching Awards, GRSC 7770 for all Teaching Assistants, TA Mentoring Program, *TA Newsletter*, *Handbook for Graduate Teaching/Laboratory Assistants*); **Faculty Development** (Lilly Teaching Fellows Program, Sarah H. Moss Fellowships, Senior Teaching Fellows Program, International Fellows Program, Governor's Teaching Fellows Program, Teaching Enhancement Mentoring Program, Teaching and Learning Seminar, Colloquium for New Faculty, Seminars and Workshops, *Teaching at UGA*, *Keys to Professional and Personal Development for Faculty*); **Course/Instructional Development** (Instructional Consulting, Seminars and Workshops, Instructional Improvement Grants, Instructional Development Laboratory, Distance Learning, Experimental Classroom); **Instructional Resources** (Instructional Media Collection, AV/Presentation Equipment, University Cablevision, Teleconferences/Satellite Programs, Classroom Support Services, Duplication and Transfer); and **Creative Services** (Computer Graphics/Multimedia, Photography, Television, Video, and Audio Recording).

OFFICE OF INTERNATIONAL DEVELOPMENT

The Office of International Development encourages a broader vision and understanding of the increasingly interdependent world and global economy. The Office compiles and maintains information on all faculty and staff with international experience. In addition, International Development systematically identifies opportunities with governments, development banks, and foundations to facilitate faculty involvement in international collaborative research, technology transfer, and exchange relationships with colleagues abroad, particularly in the developing nations. When faculty participate in these opportunities, the office provides assistance in proposal writing and packaging to foster these activities of mutual benefit to UGA and its international partners.

The Office of International Development serves as a clearinghouse for all international activities planned or underway at the University. The office has spearheaded UGA involvement in successful projects in Burkina Faso, Brazil, and Mexico, among many others. International Development facilitates advanced long-term training for scores of foreign students and organizes development programs for faculty and staff at UGA. The Office of International Development's community outreach takes the form of educational programs such as presentations, lectures, and co-sponsorship of international conferences.

The Office of International Development offers several services to the University community:

- Identifies and publicizes international development projects
- Links faculty with requests for technical assistance from donor organizations
- Assists in preparing proposals to international donor organizations
- Serves as liaison with international sponsoring agencies and foundations
- Organizes training programs for international students
- Assists students sponsored by federal and international agencies
- Administers language courses for faculty and staff
- Provides administrative support for Area Studies Centers
- Coordinates and monitors UGA international agreements

PERFORMING ARTS CENTER

The Performing Arts Center, a magnificent facility located within the University's newly constructed Performing and Visual Arts Complex on East Campus, houses two music recital halls: Hugh Hodgson Concert Hall is named for the founder of the UGA School of Music and seats 1,100 in a festival-style setting where seats surround the stage; Ramsey Concert Hall is the smaller venue seating 360 and is named in honor of the late Bernard Ramsey, a major benefactor of the University. Both halls boast superb acoustics and state-of-the art recording systems.

The Performing Arts Center serves as a showcase for world-class performers and ensembles such as pianist Andre Watts, violinist Midori, the Vienna Choir Boys, and the Atlanta Symphony Orchestra. It also provides a home for UGA's faculty and student performers.

RAMSEY STUDENT CENTER FOR PHYSICAL ACTIVITIES

The Ramsey Student Center for Physical Activities encompasses 425,000 square feet and includes five gymnasiums, three swimming pools, three multi-purpose rooms, a climbing wall, ten racquetball courts, two international squash courts, a strength and conditioning room, an 1/8-mile track, an outdoor equipment rental room, and an outdoor resource center. Facilities at the Ramsey Center are available to University of Georgia students, staff, faculty, and their dependents for the appropriately assessed fee. The Ramsey Student Center is open Monday through Friday from 6 a.m. to 11 p.m., Saturdays 9 a.m. to 6 p.m., and Sundays 1 p.m. to 11 p.m.

STATE BOTANICAL GARDEN OF GEORGIA

The State Botanical Garden of Georgia is a public, non-profit, educational facility under the auspices of the University of Georgia. The mission is to foster appreciation, understanding, and stewardship of plants and nature through research, collections and displays, horticultural gardens, and educational programs.

The garden is located at 2450 South Milledge Avenue, one mile south of the Athens South Bypass (U.S. 129/441). Founded in 1968, the garden now encompasses over 300 acres, much of which borders the Middle Oconee River. The garden features a number of specialty gardens and collections plus five miles of nature trails. The Day Chapel is available for weddings and other special events. The Visitor Center/Conservatory features a permanent display of tropical and semi-tropical plants along with classrooms, offices, a gift shop, and a cafe which serves

lunch daily. The garden is open daily from 8 a.m. to dusk. The Visitor Center/Conservatory is open Monday through Saturday from 9 a.m. To 4:30 p.m. and on Sundays from 11:30 a.m. to 4:30 p.m., excepting certain holidays. For more information, call (706) 542-1244.

UNIVERSITY BOOKSTORE

The University Bookstore offers a bright, contemporary atmosphere featuring spacious aisles, uncrowded shelves and expedient check-out lanes. Designed to serve the students, faculty and staff of the University, the store maintains a complete stock of all course-related supplies and textbooks, new and used, as well as a large inventory of general reading books. Microcomputers from several prominent manufacturers are available to qualified buyers at special educational prices. Visitors to the store will also find a wide selection of University of Georgia fashion apparel and gift items, snacks, sundries and campus life accessories. Located next to the Tate Student Center and across from Sanford Stadium, the Bookstore is open from 8:00 a.m. until 5:00 p.m., Monday through Friday with extended hours for special occasions.

Special Services and Facilities

Special services and facilities of the University of Georgia include community education services, various institutes, the Georgia Center for Continuing Education, the University Press, Athletic Association, and Alumni Association. Some of these are described below.

The Georgia Center for Continuing Education

Assistant Vice President for Public Service and Outreach and Interim Director: Grover J. Andrews, (706) 542-3451

The Georgia Center for Continuing Education seeks to serve the learning needs of adults and organizations and to provide leadership in developing the theory and practice of continuing education. One of the major functions of the University is to offer credit and non-credit continuing education programs on campus and throughout the state. The Center draws on the full resources of the University, working closely with the faculty and participating groups to evaluate its various programs and design new services such as those provided for distance learning.

The Georgia Center building on campus provides, in addition to administrative offices for the program, lodging for approximately 300 adults, other conference facilities for up to 1800, two computer labs, as well as studios and production areas for video and WUGA-FM public radio. The Center also provides a variety of other media support services for continuing education and the service function of the University of Georgia, including satellite uplink and downlink communications, and an electronic classroom connected to the statewide GSAMS system.

EDUCATIONAL PROGRAMS

The Georgia Center provides academic credit courses and academic support programs for students who pursue their education in traditional and nontraditional patterns and provides intensive English language instruction for international students.

The Center also coordinates programs offered by the University at the University System Center —Gwinnett, established by the Board of Regents in 1984 as part of a consortium of University System of Georgia institutions. The University offers resident credit upper-level undergraduate and graduate courses and provides continuing education programs at the University System Center—Gwinnett. See the Opportunities and Programs section for information about the following programs:

American Language Program
See page 132.

University Studies
See page 136.

University System of Georgia Independent Study
See page 137.

University System Center— Gwinnett
See page 139.

The Georgia Center plans and implements group and individualized instructional programs by working with faculty from the University of Georgia, other institutions of higher education, and practitioners from diversified backgrounds. Georgia Center faculty design and conduct needs assessments, design educational programs in response to identified needs, develop marketing strategies, conduct

continuing education programs, and conduct evaluations of the programs. For more information, call (706) 542-6618.

Community Education Programs

Community Education Programs provides computer training, non-credit short courses, a learning in retirement program, and certificate courses.

Computer training on current Windows applications is available through workshops and courses. Additionally, every semester, over 80 different courses, ranging from Conversational Italian to Preparing for the GRE, are taught in the evening. For more information, call (706) 542-3537.

Program and Conference Development

Program and Conference Development is involved extensively in the development, delivery, and assessment of non-credit instructional programming locally, statewide, regionally, and nationally within a broad range of academic disciplines and occupational competencies including Business Management and HRD, Communications, Education, Family and Consumer Sciences, Agriculture, Humanities and Social Sciences, and professional education in Law, Forestry, Pharmacy, and Veterinary Medicine. Instruction is delivered via workshops, conferences, seminars, certified job-related curricula, and distance learning technologies, which include compressed video, satellite teleconferences, and web-based computer conferences. For more information, call (706) 542-2335.

Educational Services

The Georgia Center develops, produces, and distributes educational media for adult learners around the state, and throughout the nation.

The Georgia Center provides cultural and educational television productions for Georgia Public Television and also operates WUGA-FM, the University of Georgia's public radio station, an affiliate of National Public Radio and Peach State Public Radio.

Through membership in national organizations, the Center has access to high quality teleconferences from more than 200 institutions of higher education. The Center is also a member of the Georgia Statewide Academic and Medical System—a two-way video instructional system that connects the Center with some 250 other sites in the state for the purpose of information and instruction. With state-of-the-art satellite uplink capability, the Center can provide educational services to some 2,000 downlink sites in the state of Georgia and to the entire nation.

The Center participates in providing WEB-based courses through the Southern Regional Electronic Campus and the State System Independent Study Program (see page 137).

The Center delivers and markets a complex, comprehensive media program including not only television and radio, but print design and production as well as self-directed, interactive learning packages. For information, call (706) 542-3554.

HOTEL AND FOOD SERVICES

The Georgia Center Hotel and Food Services provides support primarily for adult students attending conferences. University faculty, departments, and visitors are also encouraged to use the Georgia Center. The Center's restaurant, "The Savannah Room" and cafe, "The Commons," are open to the public as well as the University. The Center welcomes inquiries concerning special banquets, receptions, and other events. Please call 542-6654 for information. Restaurant reservations may be made by contacting 542-6341; for hotel reservations, call 542-1181.

Centers and Institutes

CENTER FOR ADVANCED ULTRASTRUCTURAL RESEARCH

Director: Dr. Mark A. Farmer, 542-4080

The Center for Advanced Ultrastructural Research serves the University System by providing a repository of facilities and expertise to assist in pursuing research and instructional needs employing light, fluorescence, and electron microscopy.

Facilities include two TEMs, one SEM, two confocal microscopes, X-ray microanalysis, and image processing and analysis workstations. Formal courses in electron microscopy are offered through the Division of Biological Sciences.

CENTER FOR APPLIED ISOTOPE STUDIES

Director: Dr. John E. Noakes, 542-1395
The Center for Applied Isotope Studies is a multidisciplinary group dedicated to research and development in nuclear analytical methods and system technology. The primary activities of the center are to work cooperatively with the academic, scientific, and industrial communities through programs of applied and basic research. Emphasis is placed on applied research, assisted by a unique array of nuclear analytical tools, directed toward the resolution of critical contemporary problems. One of the highest priorities of the CAIS is to direct its programs of research to address environmental problems and issues, focusing on the development of new analytical methods and systems technologies for scientific and industry application. A state-of-the-art service laboratory is maintained by the CAIS for radiocarbon dating, stable isotope measurements, trace element determinations, and low-level detection of radionuclides for environmental monitoring and assessment. The CAIS also serves as a reference center, available to UGA students and faculty, for research design in nuclear methods. The Center is located at the University's Research Park in the Center for Applied Isotope Studies Building.

CENTER FOR ARCHAEOLOGICAL SCIENCES

Director: Dr. George A. Brook, 542-2856
The Center for Archaeological Sciences promotes and coordinates research between the humanities—archaeology, anthropology, and art history—and the sciences—geology, geography, physics, geochemistry, chemistry, and biology. The center coordinates the research of University scholars in fields relating to archaeology and art history, facilitates collaboration with experts outside the University, serves as a resource center of laboratory equipment and technical support for archaeologists and art historians worldwide, and coordinates an interdisciplinary undergraduate and graduate certificate program in archaeological sciences.

CENTER FOR ASIAN STUDIES

Co-Directors: Dr. Thomas Ganschow, 542-2053; Dr. Shanta Ratnayaka, 542-5356
The Center for Asian Studies promotes and guides academic programs and exchanges on Asia for students and faculty. The Asian programs focus on language and area studies and involve faculty and course offerings from various units of the University. Specific activities include the following: (1) expanding and improving instructional programs in Asian languages (presently Chinese, Japanese, and Korean) and area studies (presently East and North Asia) and promoting and facilitating more exchange and involvement of students and faculty with Asia through exchange agreements (presently China and Japan); (2) developing and arranging speakers' and visitors' programs of distinguished Asianists to address and exchange ideas with students, faculty, and community on Asian topics; (3) promoting and facilitating collaborative research activities and programs with Asian scholars and Asian research and educational institutions; (4) developing library, audio-visual, and related instructional and research materials and facilities; and (5) planning and applying for external funding for the expansion of Asian Studies at UGA.

CENTER FOR AUDIT RESEARCH

Director: Dr. Russell M. Barefield, 542-1616
The Center for Audit Research within the School of Accounting seeks to stimulate a continuing commitment to audit research that has practical implications. In the broad context of governmental, internal, and financial statement auditing, the center encourages practitioners and academicians

jointly to explore implementation issues of audit research, and it disseminates research ideas and findings.

CENTER FOR BIOLOGICAL RESOURCE RECOVERY

Director: Lars G. Ljungdahl, 542-7640

The Center for Biological Resource Recovery is composed of investigators from the departments of Biochemistry, Botany, and Microbiology at the University and from the Richard B. Russell Agricultural Research Center. The Center is committed to extending the biotechnology required for the utilization of microorganisms as inexpensive and energy-efficient catalysts for converting our main renewable resource, biomass, to desired products such as fuel and industrial feedstock chemicals. Studies include the physiology, biochemistry, genetics, and ecology of bacteria and fungi that are important in agricultural and industrial processes involving fermentations, forestry, pulp and paper, agriculture, and other biochemical industries.

COMPLEX CARBOHYDRATE RESEARCH CENTER

Co-Directors: Dr. Peter Albersheim, 542-4404; Dr. Alan Darvill, 542-4411

The Complex Carbohydrate Research Center (CCRC), a Department of Energy-funded Center for Plant and Microbial Complex Carbohydrates and the only National Institutes of Health Resource Center for Biomedical Carbohydrates in the country, studies the structures and functions of complex carbohydrates from plants, microbes, and animals. CCRC scientists investigate the chemistry, physiology, and developmental and molecular biology of biologically important complex carbohydrates. The center's 68,000-square-foot home on Riverbend Road is well-equipped for studying complex carbohydrates. CCRC scientists, representing a broad range of expertise, develop and use advanced analytical techniques to analyze the structures and functions of carbohydrates, including mass spectrometry, nuclear magnetic resonance spectroscopy, computer graphics modeling, artificial neural networks, tissue culture, immunocytochemistry, recombinant genetics, and chemical and enzymatic synthesis. The CCRC provides analytical services to scientists, offers four one-week hands-on extramural laboratory training courses each summer, and develops computer software to assist in the study of complex carbohydrates. CCRC personnel are presently engaged in over 100 collaborations with scientists in North and South America, Europe, and Asia. CCRC faculty hold joint appointments in the departments of biochemistry and molecular biology, chemistry, botany, and plant pathology; students can apply to conduct their graduate research, undergraduate projects, or internships with center faculty. Postdoctoral fellows and visiting scientists from around the world regularly come to the CCRC to gain expertise by working on research projects of interest. The center is supported by federal, state, and industrial funds and has annual research funds of about $4 million.

CENTER FOR COMPUTATIONAL QUANTUM CHEMISTRY

Director: Dr. Henry F. Schaefer III, 542-2067

The Center for Computational Quantum Chemistry seeks to develop theoretical and computational methods through mathematical models to describe and understand the movement and function of electrons in molecules and to apply theoretical methods to significant problems of broad chemical interest. Some of the theoretical methods under development include the configuration interaction, coupled cluster, and Brueckner methods and associated analytic gradient techniques. Other theoretical work involves density functional theory, the evaluation of electron repulsion integrals, and the treatment of relativistic effects. Currently applications to several areas of chemistry are of special concern: (1) the potential energy hypersurfaces that govern elementary gas-phase chemical reactions, including systems pertinent to combustion; (2) fundamental problems in physical

organic chemistry involving, for example, carbenes and other biradical species and systems such as the [n] paracyclophanes and [10] annulene; (3) organosilicon chemistry, specifically the prediction and understanding of the properties of silicon analogs of common and unknown hydrocarbon compounds; (4) hydrogen bonding in systems as complicated as the guanine-cytosine base pair; (5) the study of molecular ions and ion clusters pertinent to atmospheric chemistry.

CENTER FOR ECONOMIC EDUCATION

Director: Dr. Elmer D. Williams, 542-7265

The Center for Economic Education, an ongoing program of the Department of Social Science Education, with assistance from the College of Business Administration, exists to increase the level of economic literacy in Georgia through the improvement of economics instruction in Georgia schools. The center provides in-service teacher training, develops instructional materials, and encourages innovation in economics education.

CENTER FOR ENVIRONMENTAL BIOTECHNOLOGY

Director: Dr. Robert E. Hodson, 542-7849

The Center for Environmental Biotechnology, a part of the Institute of Ecology, is made up of an integrated team of scientists, staff and graduate students. The center has as major objectives to address basic questions in microbial ecology via a series of laboratory, field and modeling studies, to develop protocols for risk assessment and product advisement using bioengineered organisms, and to develop long-term linkages between university researchers and industrial users of bioengineered microbes and products.

FANNING LEADERSHIP CENTER

Director: Melba Cooper, 542-1108

The Fanning Leadership Center's mission is to develop effective leaders for the betterment of Georgia communities. The center develops and conducts leadership programs and curricula for potential, emerging, and established adult and youth community leaders, serving communities statewide with training and technical assistance. Collaborating with five other public service units and faculty from several schools and colleges on campus, the Fanning Leadership Center fosters a multidisciplinary approach to leadership development. The center serves as a central source of university-based knowledge and information about community leadership. Its newsletter, published three times annually, reaches over 12,000 readers.

GERONTOLOGY

The University of Georgia has a strong commitment to gerontology training. At present, training in gerontology is primarily at the graduate level although some opportunities for undergraduates are available. The Gerontology Center directs graduate training and awards a Graduate Certificate of Gerontology.

The Gerontology Center. The major purpose of the Gerontology Center is to coordinate and promote activities relating to aging throughout the University. The center's primary responsibilities are to coordinate graduate training and research, and to promote faculty development in gerontology. A Faculty of Gerontology is associated with the Gerontology Center consisting of approximately 39 faculty members from 28 different academic departments on campus. Dr. Leonard W. Poon is the Gerontology Center Director, and Dr. Everett Lee and Dr. Roger W. Morrell are Assistant Directors.

Undergraduate Opportunities in Gerontology. There are opportunities for undergraduate students to enroll in courses and practica relating to the elderly. Interested students should contact their respective department heads, or Dr. Leonard W. Poon, Chairman of the Faculty of Gerontology and Director of the Gerontology Center (542-3954).

CENTER FOR THE STUDY OF GLOBAL ISSUES, GLOBIS

Director: Han S. Park, 542-6633

The Center for the Study of Global Issues (GLOBIS) serves as a mechanism for coordination and promoting international and interdisciplinary research, service and instruction in global studies. The focus of GLOBIS is on issues that are distinctly international, comparative or transnational in character such as the environment, political and economic development, human rights and social change. The primary goals of GLOBIS are to work toward the establishment of new theories and practical policies to confront the most pressing problems of the day and to enrich the training of students in global studies. These goals are met by conducting research and educational activities that examine recent global economic, political and socio-cultural trends. GLOBIS organizes conferences, sponsors lectures by visiting scholars and hosts scholars wishing to do research at the University of Georgia. GLOBIS also runs the annual summer study abroad program in Verona, Italy, and administers the Certificate in Global Studies to qualified undergraduate and graduate students throughout the University. The Center's programs are located on campus at the University of Georgia and abroad at regional offices in Verona, Italy and Kyoto, Japan. These branch offices operate as GLOBIS' coordinating centers for the conduct of off-campus research and educational programs conducted in Asia and Europe. Thus, all of the Center's activities are truly international and interdisciplinary because of the participation of UGA faculty and students from many disciplines, but also participation of professional colleagues and students from other countries.

HOUSING AND DEMOGRAPHICS RESEARCH CENTER

Directors: Dr. Anne L. Sweaney, 542-4877; and Dr. Robert J. Cleveland, (912) 743-0370

The Housing and Demographics Research Center (HDRC) provides sound housing research, promotes a more rational regulatory environment for the building community, and disseminates research findings to policy makers, interested parties and the general public. The HDRC was created in partnership with the Research Center of the National Association of Home Builders and was officially recognized as a center in June 1996. It is part of a network of housing research centers located regionally at major research universities. The faculty have garnered support from the Athens-Clarke County Government, Department of Community Affairs, Georgia Department of Human Resources, Georgia Department of Transportation, the National Association of Housing Counselors and Agencies, Inc., and SMART House Limited Partnership, Inc., among others.

CENTER FOR HUMANITIES AND ARTS

Director: Dr. Betty Jean Craige, 542-3966

The Center for Humanities and Arts promotes scholarly inquiry and creative activity in the humanities and the arts by supporting faculty research grants, lectures, symposia, publications, visiting scholars, visiting artists, collaborative instruction, and public programs, exhibitions, and performances. The humanities may be understood as investigation into the philosophical, historical, social, ethical, legal, aesthetic, religious, and ideological implications of our knowledge of the world; humanistic research includes many kinds of scholarship, such as history, criticism, theory, interpretation, and translation. The arts may be understood as the expression of human experience in various modes, such as literature, theater, music, dance, film, painting, printmaking, sculpture, and design. Under its Humanities-Science interface Initiative, the Center facilitates intellectual exchange and scholarly collaboration among humanists, social scientists, and scientists in the exploration of social and scientific values. In its Initiative for Global Understanding, the center addresses cultural and political issues related to the emergence of a global society.

CENTER FOR INSURANCE EDUCATION AND RESEARCH

Director: Dr. Sandra G. Gustavson, 542-4290

The Center for Insurance Education and Research is designed to conduct research on questions of short- and long-term interest to the insurance community and to provide periodic seminars and conferences on issues facing that industry. The center sponsors continuing education programs for the insurance industry in Georgia and gives financial support to undergraduate and graduate students, as well as faculty of risk management and insurance.

DEAN RUSK CENTER FOR INTERNATIONAL AND COMPARATIVE LAW

Director: Professor Thomas J. Schoenbaum, 542-5140

The Dean Rusk Center for International and Comparative Law was founded in 1977 as part of the School of Law to improve the effectiveness of relations among citizens, private sector entities, and government at the local, state, federal, and international levels. Using advanced electronic, information-processing techniques, the center's professional staff and part-time researchers mobilize university, business, and governmental resources to develop theoretical and practical approaches to improve the efficiency of governance, trade, and investment. On occasion the center also helps implement the approaches by providing the private and public sectors with essential manpower and information. In the past the Dean Rusk Center has developed several major initiatives for federal action concerning North American cooperation and overseas trade regulation and representation. It has also analyzed new approaches for expanding Georgia agricultural exports. The center publishes research reports, holds conferences, and sponsors research for Georgia citizens that cover fiscal and monetary policy, international arrangements, and domestic affairs.

JAMES M. COX CENTER FOR INTERNATIONAL MASS COMMUNICATION TRAINING AND RESEARCH

Director: Dr. Lee Becker, 542-5023

The Center for International Mass Communication Training and Research serves to facilitate international mass communication training and research programs in which scholars from the United States and foreign countries, students, and mass communication professionals can cooperate. The center helps to coordinate efforts to improve the state of knowledge in the field and to encourage practical training, education, and service projects.

CENTER FOR INTERNATIONAL TRADE AND SECURITY

Director: Dr. Gary K. Bertsch, 542-2985

The Center for International Trade and Security is an interdisciplinary and interuniversity research, teaching, and service project designed to promote more informed trade and security policies and further national and state economic and security interests. Its primary function is to study and produce policy-relevant research on U.S. and international economic and security issues. The center encourages and coordinates collaborative research, teaching, and service related activities within the university, the state, nation, and international community. Through e-mail (cits@arches.uga.edu) and the home page (www.uga.edu/~cits) the Center provides networking and information worldwide.

CENTER FOR LATIN AMERICAN AND CARIBBEAN STUDIES

Director: Dr. Brent Berlin, 542-9079
Program Coordinator: Dr. Fausto O. Sarmiento, 542-9079

The Center for Latin American and Caribbean Studies (CLAC) coordinates interdisciplinary research, programmatic campus outreach and public service programs dealing with science, environment, and culture of Latin America and the Caribbean. CLACS is a catalyst of scholarly

discussion of Hispanic and Latino issues in Georgia and bridges the gap of language and culture with countries of the region, promoting academic exchange programs, summer institutes, field courses, and collaborative agreements among prestigious Latin American universities and UGA. The Center offers a certificate program in Latin American Studies for undergraduate students and Field Travel Awards for graduate students to do research in Latin America. Through lectures, seminars, panels, travelogues, film festivals, Ronda Latina, Hispanic gala and exhibitions, CLACS brings together faculty from all UGA colleges and schools engaged in work related to this region. Through the e-mail list (clacs-l@uga.cc.uga.edu) and the home page (www.uga.edu/~clacs) the Center provides networking and update information for the Latin Americanists on campus.

CENTER FOR MANAGEMENT EXCELLENCE

Director: Dr. Archie B. Carroll, 542-3700
The Center for Management Excellence has as its overall goal managerial and organizational productivity increases for Georgia, the Southeast, and the nation through the improvement of human performance in organizations. Functioning as a part of the Department of Management, the center's overriding purpose is to focus on the human element in productivity and performance. Program emphasis is also on computer assisted managerial decision making (Decision Support Systems and Group Decision Support Systems).

CENTER FOR MARKETING STUDIES

Director: Dr. Thomas W. Leigh, 542-3540
The Center for Marketing Studies, established in 1986, seeks to advance professional marketing education and to identify and develop new programs and methods which will better serve the marketing community's needs for education and information. The Master of Marketing Research Program, a nationally recognized graduate program, is administered by the center which is part of the Terry College of Business. The center also works to maintain and strengthen relations with the business community.

CENTER FOR METALLOENZYME STUDIES (CMS)

Co-Directors: Dr. Michael K. Johnson, 542-1949; Dr. Michael W. Adams, 542-1949
The Center for Metalloenzyme Studies (CMS) was established to encourage cooperative research on related biochemical problems by gathering basic knowledge about the working of metalloenzymes that catalyze a variety of life-supporting reactions like nitrogen fixation, sulfur metabolism, carbon monoxide metabolism, and hydrogen production. Using the latest technologies and state-of-the-art analytical equipment, faculty researchers and postdoctorate and graduate students are able to teach and train in genetics, enzymology, fermentation technology, and anaerobic techniques.

THE PLANT CENTER

Director: Dr. Lee H. Pratt, 542-3732
The Plant Center is designed to foster and support interactions between those members of the University of Georgia research community who share a common interest in cellular and molecular aspects of plant growth and development, in plant genome organization and function, in the application of molecular and genetic tools to improve cultivated plants, and in organisms that interact with plants. The Plant Center hosts a regular seminar series, organizes an annual scientific retreat to encourage the development of interdisciplinary research, and sponsors symposia and technical workshops.

POULTRY DIAGNOSTIC AND RESEARCH CENTER

Director: Dr. S.H. Kleven, 542-5644
The Poultry Diagnostic and Research Center carries out basic and applied research programs on the diseases which are of economic importance to the poultry industry of Georgia. Diagnostic, laboratory, and consultative services are provided to individuals and groups in all phases of poultry production.

CENTER FOR PRIVATE ENTERPRISE

Director: Dr. Dwight R. Lee, 542-1311

The Center for Private Enterprise has as its major mission the furtherance of understanding of the principles of private enterprise. The center engages in research studies that demonstrate the benefits of economic decisions made in a competitive environment and in teaching undergraduate and graduate students the principles of private enterprise, the theoretical underpinnings of market economies, and other appropriate subjects. In addition to its teaching research functions, the center also carries on an active service program involving public lectures and seminars dealing with the private enterprise system

CENTER FOR REMOTE SENSING AND MAPPING SCIENCE

Director: Dr. Roy A. Welch, 542-2359

The Center for Remote Sensing and Mapping Science (CRMS) undertakes research and training in the fields of remote sensing, geographic information systems (GIS), photogrammetry, digital image processing, and computer graphics, particularly as applied to the physical and biological sciences. Typical research topics include quantitative methodologies for measuring soil erosion from agricultural lands by photogrammetric techniques, mapping environmental disturbances from aerial photographs and satellite images, development of integrated image processing/GIS software and advanced technologies for monitoring the earth's surface from digital image data. Close associations are maintained with remote sensing organizations and scientists in Canada, Europe, South America, and Asia. The CRMS provides technical assistance to universities and to local, state, and federal agencies.

SELIG CENTER FOR ECONOMIC GROWTH

Director: Jeffrey M. Humphreys, 542-4085

The Selig Center serves the state by bringing college resources to bear on economic growth and development. The Selig Center brings widespread recognition to the University of Georgia through its economic forecasts, major studies, publications, press releases, information services, and data products.

The Selig Center houses the Georgia Economic Forecasting Project, which is primarily concerned with projecting Georgia's future growth. The Center holds a series of economic outlook conferences in Albany, Atlanta, Augusta, Brunswick, Columbus, Macon, Savannah, and Thomasville. The conferences and the *Georgia Economic Outlook* publication provide forecasts and detailed commentary on eight economic sectors: agriculture, construction, public utilities, financial markets, manufacturing, services, hospitality, and trade. The Georgia Economic Forecasting Project also forecasts U.S. and regional retail sales, with special emphasis on the back-to-school and holiday shopping seasons, as well as total and black buying power for the U.S., all states, and Georgia's eight MSAs and 159 counties.

The Selig Center is a primary source of economic information for business leaders, the media, government agencies, and the general public. The Center serves as an advisor/consultant to many groups, including the Atlanta Committee for the Olympic Games, the Georgia World Congress Center Authority, the Northeast Georgia Surface and Air Transportation Commission, the 316 Alliance, Inc., *Georgia Trend* magazine, the Athens Convention and Visitor's Bureau, and the Athens Chamber of Commerce.

The Selig Center is a founding member of the Association for University Business and Economic Research and is a voting member of the National Retail Federation. The Selig Center is an official cooperating agency with the U.S. Bureau of Economic Analysis and serves a similar function for the Construction Statistics Division, U.S. Bureau of the Census.

The Selig Center publishes *Georgia Business and Economic Conditions*, a bimonthly business periodical, and the *Georgia Statistical Abstract*, a comprehen-

sive collection of basic business, economic, and demographic statistics. Visit our home page on the World Wide Web at http://www.selig.uga.edu.

CENTER FOR SIMULATIONAL PHYSICS

Director: Dr. David P. Landau, 542-2908
The Center for Simulational Physics functions as a center for research and training in simulational science with emphasis on the use of high performance computing within a distributed, heterogeneous environment. Because of this focus, close interaction with the University Computing and Networking Services is maintained, and collaborative research programs with major institutions in the United States and Europe are developed. Specially designed courses and a weekly seminar series and annual workshop are organized. The center's staff consists of research and adjunct professors, visiting research scientists, and postdoctoral associates.

BUSINESS OUTREACH SERVICES

Director: Hank Logan, 542-6762
Business Outreach Services is devoted to improving Georgia's economy by educating and advising Georgians, both individually and collectively, on ways to better manage their businesses and to further develop the economies of their communities. The innovative, university-based extension service provides assistance through one-to-one consultation, continuing education, and applied research to business-owners and aspiring entrepreneurs. The organization also offers educational opportunities and consultation to community and regionally-based economic development groups. Supported by the University of Georgia and the U.S. Small Business Administration, business Outreach Services provides business-management and regional economic development assistance to Georgians through its network of 19 offices located throughout the state.

A broad array of services are offered within four general programmatic areas: regional economic development services, minority business enterprises, international expansion support services, and the **Small Business Development Center** program. The staff of professional business consultants, most of whom hold advanced degrees in business and management, not only offer consultation and educational opportunities to help with business start-up, but also aid larger businesses by providing information and consultation on such topics as exporting. Among the many other services offered are extensive research and marketing studies as well as geographical information system maps and statistical reports for individual business-owners, who might be trying to decide whether to expand or relocate, and for community leaders interested in improving local economies.

INSTITUTE FOR AFRICAN AMERICAN STUDIES

Director: Dr. R. Baxter Miller, 542-5197, 542-3071 FAX, www.uga.edu/~IAAS/
The Institute for African American Studies provides a central focus to study the impact of African American contributions upon human culture and social inquiry.

The Institute is dedicated to the production of creative research on the achievements of African Americans and to exciting instruction for a diverse community of thinkers. In addition, the Institute serves as a cultural repository and resource for the citizenry of Georgia.

The Institute offers a certificate upon completion of four courses offered by the Institute, plus an additional two courses approved by the Institute's Director. A major is being submitted to the Board of Regents. For further information, contact the Director of the Institute for African American Studies.

INSTITUTE FOR BEHAVIORAL RESEARCH

Director: Dr. Rex Forehand, 542-1806
The Institute for Behavioral Research is a multidisciplinary research organization. Its purpose is to encourage a pooling of the expertise of faculty members and graduate

students from such areas as Arts and Sciences, Business, Education, and Family and Consumer Sciences. The institute is composed of the Survey Research Center, Center for Family Research, Center for Research on Deviance and Behavioral Health, and Cognitive Studies Group.

INSTITUTE OF COMMUNITY AND AREA DEVELOPMENT (ICAD)

Director: Dr. Joseph W. Whorton, Jr., 542-3350

The Institute of Community and Area Development (ICAD), a service unit of the University of Georgia, has worked for over 30 years helping communities statewide anticipate and plan for growth and its impending changes. Using the resources of the University and working closely with state agencies, local government, and community leaders, ICAD offers a comprehensive work program focusing on growth as it relates to the quality of life of Georgia's citizens. ICAD incorporates the expertise of faculty members from sixteen academic disciplines, each of whom is also skilled and experienced in group process and decision making. Assisting community organizations, local government groups, legislative committees and state agencies, ICAD also offers research and consultation in areas such as community investment, creative problem solving, natural resource management, recreation technical assistance, human resource development, and regional planning and development. ICAD also publishes monographs, reports, manuals, videos, and books designed to aid community developers and public policy officials.

INSTITUTE OF CONTINUING JUDICIAL EDUCATION OF GEORGIA

Director: Mr. Richard D. Reaves, 542-7491

The Institute of Continuing Judicial Education of Georgia, housed at the University of Georgia School of Law, plans and conducts more than 50 seminars each year for the basic professional development and continuing education of judges and other personnel of the Georgia court system. It supports participation by selected personnel of the judicial branch in programs conducted by national training agencies. This past year its programs reached more than 3,000 judges and court support personnel.

INSTITUTE OF CONTINUING LEGAL EDUCATION IN GEORGIA

Executive Director: Mr. Lawrence F. Jones, 369-5664

The Institute's administrative staff is housed in the historic Lumpkin House on Prince Avenue in Athens, Georgia, with the print shop staff in the A.G. Cleveland Building directly behind the Lumpkin House. The Institute was organized in 1965, and is a consortium of the Law Schools of Georgia, Emory, Mercer, and Georgia State Universities and the State Bar of Georgia. Approximately 155 live and 76 video replayed programs in over 50 areas of the law are conducted each year with an approximate attendance of 21,630 (includes attendance at video replays of ICLE seminars). Two of these programs are held in Athens at the Georgia Center. The other seminars are conducted in cities throughout Georgia. The video replay network makes programs available to the majority of Georgia attorneys with a minimum of travel. The Institute has video tapes available to law firms, local bar associations and colleges to assist attorneys in getting their 12 hours of mandatory training each year. Approximately 2,270 registrants take advantage of this program. More than 20 specialized seminars are transmitted to Atlanta live via satellite. These programs are co-sponsored with national CLE providers such as the American Bar Association and Practicing Law Institute. More than 237 persons attend these co-sponsored programs. The Institute print shop prepares more than 150 publications per year.

INSTITUTE OF ECOLOGY

Director: Dr. C. Ronald Carroll, 542-2968

The Institute of Ecology, long known for its

international research reputation, was approved as an academic school of ecology in the Franklin College of Arts and Sciences in 1993. The Institute offers 23 courses for undergraduates and encourages students seeking a B.S. degree in Ecology to complement their classroom education by obtaining credits for internship and research experience.

In addition to the excellent lab facilities on campus, students can obtain field research experience at three local sites administered through the Institute of Ecology. The Horseshoe Bend Research Area adjacent to campus, the McGarity Wetlands Preserve in the flood plain of the Alcovy River, and the Odum Watershed, a self-contained 120 acre (49 hectare) watershed approximately 20 miles from campus near Ila, GA. The Institute of Ecology maintains collaborative relationships with several other regional research laboratories. The Institute has a long-standing relationship with the Savannah River Ecology Laboratory in Aiken, S.C. Long-term collaborative research takes place at the U.S. Forest Service's Coweeta Hydrological Laboratory in Franklin, N.C.; this research is supported by the National Science Foundation and administered by faculty in the Institute of Ecology. The Institute is presently developing research and academic relationships with the Joseph W. Jones Ecological Research Center in southwest Georgia. The Institute supports research in marine and freshwater ecology, ecological toxicology, evolutionary ecology, conservation biology, landscape ecology, restoration ecology, agroecosystem ecology, systems ecology, and resource management.

CARL VINSON INSTITUTE OF GOVERNMENT

Director: Henry M. Huckaby, 542-2736.
The Vinson Institute conducts an interdisciplinary program designed to improve the knowledge and skills of elected and appointed Georgia state and local government officials and others. With expertise in government, public administration, public law, public finance, environmental protection, public management, and personnel administration, Institute faculty formulate and conduct over 850 training programs and conferences each year, offer technical assistance to public officials, and engage in an extensive research and publications program. A program in citizen education offers teachers, students, and citizens of all ages a variety of services that promote better understanding of governmental structure and processes. The Vinson Institute also cooperates with the Department of Political Science in the administration of the Master of Public Administration degree.

INSTITUTE OF HIGHER EDUCATION

Director: Dr. Cameron Fincher, 542-3464
The Institute of Higher Education has been organized to work with other educational agencies and organizations in the development of higher education. The Institute provides a diversity of services to two-year and four-year colleges in the state and surrounding region, cooperates with other institutions in statewide, regional, and national studies, and participates in numerous planning, development, assessment, and evaluation projects.

SCHOOL OF MARINE PROGRAMS

Director: Dr. Robert E. Hodson, 542-5868
The School of Marine Programs, established by the University in 1992, is responsible for the coordination and general management of the Department of Marine Sciences, Marine Institute, Marine Extension Service, the Georgia Sea Grant College Program, and the Environmental Ethics Certificate Program. The Department of Marine Sciences currently offers undergraduate courses in marine biological, chemical, and physical science. The Interdisciplinary Studies major in Marine Sciences is available to students maintaining a B average or better. Students have access to the extensive field and laboratory facilities of the School of Marine Programs in Athens and at Sapelo Island, Skidaway Island, and Brunswick on the Georgia coast.

The **Marine Institute**, located on

Sapelo Island, was established in 1953 and serves as a research facility for resident staff and for campus-based faculty members. Research has centered mainly on basic marsh ecology to provide an understanding of energy flow, cycling of minerals and nutrients through the marshes, and factors regulating the metabolism of the salt marsh ecosystem.

The **Marine Extension Service** addresses problems related to the state's marine resources and provides an outreach program in marine environmental education to students, including K-12, college, post-graduates, and the general public. The Marine Resources Center on Skidaway Island is the major marine education facility for schools and colleges in the state. At the Brunswick Extension Station, specialists work directly with the fishing and seafood processing industries to solve problems of resource management and utilization.

The **Georgia Sea Grant College Program**, part of the National Sea Grant College Program, was established in 1971. In an approach roughly analogous to that of the Land Grant System in working with agriculture, Sea Grant promotes the wise use of marine resources through a coordinated program of research, education, and advisory services. The University of Georgia was designated as the nation's fifteenth Sea Grant College in 1980.

The **Environmental Ethics Certificate Program (EECP)** offers an interdisciplinary curriculum designed to prepare students to understand the complex nature of problems arising from human interactions with the environment. The faculty and students of the EECP come from a wide range of natural and social sciences as well as the arts, humanities, and law. For further information, contact the EECP office at 542-0935 or via e-mail at eecp@arches.uga.edu, or Peter G. Hartel, Department of Crop and Soil Sciences, 542-0898.

INSTITUTE FOR NATURAL PRODUCTS RESEARCH

Director: Dr. S. William Pelletier, 542-5800

The Institute for Natural Products Research carries out a broad range of research on naturally occurring substances of plant origin, with particular attention to plant species of Georgia and the Southeast. Projects involve research on alkaloids, terpenes, antitumor agents, phytoalexins; the development of new synthetic methods; and the application of modern spectroscopic methods to structure elucidation problems. Research involves the isolation and elucidation of chemical structures of new compounds possibly useful as drugs for the treatment of human disease. The institute serves as a training center for visiting faculty and for postdoctorate and graduate students who are working in natural products research.

JAMES M. COX, JR. INSTITUTE FOR NEWSPAPER MANAGEMENT STUDIES

Director: Prof. Conrad C. Fink, 542-5031

The James M. Cox, Jr. Institute for Newspaper Management Studies, founded in 1990, is designed to assist undergraduate and graduate students in learning management skills, as well as journalistic techniques, necessary for efficient, profitable and socially responsible operation of newspapers in today's complex society. The institute also funds research projects with direct application to management and strategic problems confronting the newspaper industry.

Other Services and Activities

ATHLETIC ASSOCIATION

The University of Georgia conducts a broad program of intercollegiate athletics which includes 20 sports (11 women, 9 men). The University is a member of the Southeastern Conference and the National Collegiate

Athletic Association, and abides strictly by the regulations and policies of these groups. The Board of Directors of the Athletic Association, composed of faculty, alumni, and student representation with the President of the University as chairman, has general control of internal policies of the University relating to all phases of intercollegiate athletics.

THE UNIVERSITY OF GEORGIA NATIONAL ALUMNI ASSOCIATION

Originally founded in 1834 as the Georgia Alumni Society, the National Alumni Association is today the organization that represents over 197,000 men and women who have shared the Georgia experience. The goals of the Association are to keep alumni involved and connected, to promote the interests and ideals of the institution, and to encourage continuing loyalty.

The day-to-day business of the Association is administered by the Office of Alumni Relations which is located in the Frank D. Rose Alumni House on South Campus, (706) 542-2251 or 1-800-606-8786, www.uga.edu/~alumni.

UNIVERSITY OF GEORGIA FOUNDATION

The University of Georgia Foundation was organized in 1937 under the sponsorship of the Alumni Society and its officers. The Foundation is a private, non-profit corporation under the laws of the state of Georgia and has a board of trustees, consisting of alumni and friends of the University.

The purposes of the Foundation are to strengthen its financial resources by encouraging gifts to the University, and to receive, hold, and administer such gifts in accordance with the instructions of the donors.

Information regarding the Foundation may be obtained by writing to the Senior Vice President for External Affairs, The University of Georgia, Athens, Georgia 30602.

UNIVERSITY OF GEORGIA PRESS

The University of Georgia Press was established in 1938 as the book-publishing arm of the University of Georgia. Since then it has published over 1,300 books in a variety of disciplines including general nonfiction, southern regional studies, literary nonfiction, novels, short story collections, poetry, and scholarly works. Authors published by the press are from the University of Georgia and institutions throughout the world. The press publishes approximately 80 new books per year for the benefit of both scholars and general laypersons.

For further information or a complete list of publications by the press, contact the University of Georgia Press, Athens, Georgia 30602.

UNIVERSITY OF GEORGIA RESEARCH FOUNDATION, INC.

The University of Georgia Research Foundation, Inc. was incorporated under the laws of the State of Georgia as a nonprofit corporation on November 17, 1978.

In a Memorandum of Understanding dated February 26, 1979, the Board of Regents of the University System of Georgia authorized the Research Foundation to serve as the official grantee of all contracts, grants, and gifts for the conduct of sponsored research at the University of Georgia. In turn, the Research Foundation subcontracts with the University.

The Research Foundation was also organized to assist in the transfer of technology developed through the University of Georgia's research programs or by University personnel to the benefit of the University of Georgia and the general public. It works with inventors to obtain appropriate protection for their discoveries, including patents, plant patents, copyrights, trademarks, and plant variety protection certificates. It then works with industry to license the discoveries for commercial development.

For further information, contact the University of Georgia Research Foundation, Inc., Boyd Graduate Studies Research Center, Athens, Georgia 30602-7411.

Programs of Study

The University of Georgia Core Curriculum

The core curriculum was established within the University System of Georgia as a means of facilitating the transfer of credit for students at the lower division level as they work toward baccalaureate degrees within University System colleges and universities. The various institutions within the University System, in establishing their core curricula, provide for (1) 60 semester credit hours of which a minimum of 42 are in general education and 18 in major-related courses; (2) assurances that all courses satisfactorily completed in the core curriculum of any unit of the University System will be acceptable and transferable to other units of the University System; and (3) the preservation of the maximum possible amount of institutional autonomy.

Honors equivalents for the courses listed below will satisfy Core requirements.

AREA A— ESSENTIAL SKILLS— 9 HOURS

Area A is satisfied by students completing nine hours from the following list. Students must take ENGL 1101 and ENGL 1102 and will select a three-hour math course in consultation with an academic advisor.

ENGL 1101	MATH 1101	MATH 2200
ENGL 1102	MATH 1113	MATH 2200L

AREA B— INSTITUTIONAL OPTIONS— 4 to 5 HOURS

This area will be satisfied by electives selected by the student with approval of an academic advisor.

AREA C— HUMANITIES/FINE ARTS— 6 HOURS

Area C is satisfied by completing two of the following courses. Students may select one course from the Fine Arts list below and one from the Humanities list, or students may select two courses from different departments in the Humanities list.

Fine Arts Electives

ARHI 2100	DANC 2010	DRAM 2130	MUSI 2060
ARTS 2000	DRAM 2000	MUSI 2020	MUSI 2080
ARTS 2050	DRAM 2120	MUSI 2040	

Humanities Electives

CLAS 1000	CMLT 2400	ENGL 2400	RELI 1002
CLAS 1010	EDES 2510	ITAL 2500	RELI 1003
CLAS 1020	EDES 2520	LING 2100	RELI 2004
CMLT 2111	ENGL 2310	PHIL 1000	RELI(AFAM) 2005
CMLT 2210	ENGL 2320	PHIL 1500	ROML 2550
CMLT 2212	ENGL 2330	PHIL 2200	RUSS 2050
CMLT 2220	ENGL 2340	RELI 1001	SPCM 1100
			SPCM 1500

AREA D— SCIENCE, MATHEMATICS AND TECHNOLOGY— 10 to 11 HOURS

Area D for Non-Science Majors (including Sociology and Psychology)— 10 to 11 hours

a. Select one course from the four-hour science course list and one course from the three-hour science course list or select two courses from the four-hour science course list.

b. Select one course from the mathematics or technology course list.

Area D for Science Majors—11 hours
a. Select two courses from the four-hour science course list below.
b. Select one course from the mathematics or technology course list.

Area D: four-hour science courses with laboratory

ASTR 1010	CHEM 1211	CSCI 1301-1301L	GEOL 1122L
ASTR 1010L	CHEM 1211L	GEOG 1111	GEOL 1250-1250L
ASTR 1020	CHEM 1212	GEOG 1111L	GEOL 1260-1260L
ASTR 1020L	CHEM 1212L	GEOG 1112	MARS 1010-1010L
BIOL 1103-1103L	CHEM 2100	GEOG 1112L	MARS 1020-1020L
BIOL 1107-1107L	CHEM 2100L	GEOG 1113	PHYS 1111-1111L
BIOL 1108-1108L	CHEM 2211	GEOG 1113L	PHYS 1112-1112L
BTNY 1210-1210L	CHEM 2211L	GEOL 1121	PHYS 1211-1211L
CHEM 1110	CHEM 2212	GEOL 1121L	PHYS 1212-1212L
CHEM 1110L	CHEM 2212L	GEOL 1122	

Area D: three-hour science courses with or without laboratory—some of the following three-hour laboratory science courses have optional laboratories—see Area D four-hour course with laboratory list

ASTR 1010	ASTR 1870	GEOG 1111	GEOL 1121
ASTR 1020	BIOL 1104-1104L	GEOG 1112	GEOL 1122

Accounting

Degree
Bachelor of Business Administration (B.B.A.)

Contact Person
Patricia G. Hoyt
Program Coordinator
phoyt@cba.uga.edu
(706)542-1616

Department
J. M. Tull School of Accounting
Terry College of Business

Description of the Program

The major in accounting is designed to give the student an understanding of the theory of accounting as it is used in our society. All accounting majors must take 24 hours of required courses. ACCT 5710 and 5720 are allowed to count for the B.B.A.'s "Business Course Outside the Major" in the General Elective Requirements.

Career Opportunities

Students in this major are prepared for accounting careers in private, public or governmental organizations. Accounting education also provides an excellent background for non-business professions such as law, and is a sound basis for advancement to top-level management positions.

Entrance Requirements

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Expectations of Transfer Students and Students in this Major

- Students should expect to commit to a minimum of four semesters to complete the required courses when they begin the major-level accounting courses.
- Accounting majors may transfer only one major-level accounting course into the program. Transfer credit is typically allowed for the equivalent of either ACCT 5200, Audit/Systems I, or ACCT 5400, Tax I. Check with the School of Accounting for any changes to this policy.
- Students are expected to have completed the equivalent of ACCT 2101, Accounting Principles I, within one year before enrolling in ACCT 5000, Intermediate Accounting I. Longer intervals may require a review or "audit" of the Accounting Principles material.
- Students are encouraged to participate in Beta Alpha Psi, the national honorary accounting fraternity.
- All accounting majors should prepare for their job search during the spring and summer before their senior year. Recruiting activities are highlighted with an Accounting Career Day held before fall semester. Details are discussed in ACCT 5710 and 5720, Professional Accounting I and II.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA and the UGA cumulative GPA.

No accounting student is permitted to repeat a major accounting course more than once in order to achieve a grade of C or better, nor is an accounting student permitted to repeat more than two major accounting courses.

Any individual wishing to work in public accounting will be required to take the Certified Public Accountant Examination (CPA Exam). This national exam is given twice each year, in May and in November. A candidate for the CPA exam in Georgia must complete a minimum of 150 semester hours of courses which includes a four-year degree, 30 semester hours of accounting courses beyond the principles courses, and 24 semester hours of business subjects.

This ruling requires accounting students to complete an additional year of education. We believe that a student who is going to stay for a fifth year should earn the master's degree along the way. We encourage our students to apply to either the Master of Accountancy (MAcc) or the Five-Year Program (B.B.A./MAcc). Both approaches require one additional year of study beyond the undergraduate degree and, in either case, the student is awarded the MAcc degree upon completing the program. Because a senior in the Five-Year Program has the standing of a graduate student, financial aid in the form of graduate assistantships may be available. The course requirements are virtually the same in the MAcc and Five-Year Program. However, Five-Year students are able to "mix and match" their last two years of courses to complete their degree requirements.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	36
FINA 3000; MGMT 3000; MSIT 3000; MARK 3000; ACCT 5000, 5010, 5020, 5100, 5200, 5310, 5400, 5710, 5720	
Major Electives:	3
Refer to College-wide requirements when electing general electives.)	
Choose one course from ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000, or RMIN 4000	
General Electives:	21
Five courses in Arts and Sciences	
Two business courses outside department	
Total hours required	**120**

Scholarships, Internships, Cooperative Education

Scholarships are awarded at the annual Accounting Awards Ceremony, held each spring. These awards are sponsored by various public accounting firms, industry, the Georgia Society of CPAs, and CPA review programs. Students must have completed at least their junior year to be eligible for these awards.

Internships are an integral part of the program; however, they are not required and are not guaranteed to a student. Details are made available to students through the ACCT 5710 and ACCT 5720 courses.

Cooperatives are handled through the University's Career Planning and Placement Office's Co-op Division. Call (706) 542-8421 for details.

Advertising

Bachelor of Arts in Journalism (A.B.J.)

Contact Person
Dean M. Krugman
Department Head
dkrugman@arches.uga.edu
(706)542-4791

Department
Advertising and Public Relations
College of Journalism and Mass Communication

Description of the Program

This program is designed to train students as analysts, creative thinkers and planners in advertising and related fields.

Career Opportunities

Career opportunities include entry-level positions in advertising, marketing communication, promotion and other forms of mediated persuasion.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.50, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Expectations of Transfer Students

The academic program for the A.B.J. degree consists of two parts: Areas A-F of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

Admission to the University of Georgia is not a guarantee of admission to the College of Journalism and Mass Communication. All journalism and mass communication majors have been designated as "restricted" which means more students usually apply than can be accepted; therefore, admission is competitive. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and

other resources. In reaching its decisions on how many students may be admitted each semester, the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201, College of Journalism and Mass Communication. The deadline is 4:00 p.m. on Friday of the second full week of classes.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (includes one hour of PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 30 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Advertising major.

A grade of C or higher must be earned in any journalism and mass communication course, or any prerequisite to a course which counts toward satisfaction of requirements for the A.B.J. degree.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred courses in Area E: ANTH 1102 or GEOG 1125-1125D	
Area F:	18
Foreign language sequence through the third semester	
ECON 2105 or 2106	
Choose 9 hours of 1000/2000-level courses from ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT	
Major Requirements:	30
(Student may take ADPR 3140 as an elective if not taken as a requirement.)	
ADPR 3100, 3110, 3120, 3130, 5710, 5740; select either ADPR 3140 or JRLC 5040	
Choose three courses from ADPR 3140, 3520, 5010, 5170, 5760, 5790, 5990	
Any other course in the College	
Major Electives:	15
Choose 15 hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
General Electives:	15
Choose 15 hours of courses at any level in any disciplines other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
Total hours required	**120**

Fees

Some courses require the purchase of a supply card from the University bookstore.

Scholarships

About 25 undergraduate scholarships are administered by the College each academic year. A general application submitted during the spring semester assures consideration for any of the scholarships for which the applicant is qualified.

Internships

Valuable practical experience is gained by serving internships. Although not required, internships are considered essential to a student's total educational experience and greatly enhance job opportunities upon graduation. Academic credit may be earned for successful completion of an internship if:

1. Advance approval is received from the student's department. A written request must be submitted and include a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.

2. Certain basic courses as determined by the department have been completed.
3. The internship covers a minimum number of weeks of full-time employment as determined by the department.
4. During the semester of the internship the student registers concurrently for ADPR 5010, which is included in the maximum semester hours of journalism and mass communication credit that may be earned toward the Advertising major.
5. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.
6. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Agribusiness

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Steven C. Turner
Associate Professor and Undergraduate Coordinator
sturner@agecon.uga.edu
(706)542-0852

Department
Agricultural and Applied Economics
College of Agricultural and Environmental Sciences

Description of the Program

The agribusiness major prepares students for professional careers in agribusiness marketing, management, and finance. Agribusinesses process and market food and fiber products, supply inputs to agricultural production, and manage agricultural production. Agribusiness majors learn economic principles and strategies for agribusiness marketing and management. Students take courses in agribusiness management, marketing, accounting, economic theory, communications, mathematics, computers, and agriculture. Students learn decision-making skills for agribusiness management, finance, marketing, sales, processing, manufacturing, transportation, and international trade. The agribusiness degree provides career flexibility for students planning to work in private industry or government.

Career Opportunities

The agribusiness program is designed to place students in businesses supplying inputs to agricultural production, processing and transportation, in businesses engaged in food and fiber marketing, and in agencies that service and regulate agribusiness industries. Agribusiness majors also develop skills to manage their own businesses. Agribusiness accounts for 22 percent of the nation's total economic activity. The University of Georgia's agribusiness program plays a major role in meeting the agribusiness education needs of the state, region, and nation.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: CHEM 1211,1211L, BIOL 1107-1107L or BTNY 1210-1210L, MATH 2200, 2200L (take under general electives if not taken in Area D)	
Area F:	18

Select 15 hours from AAEC 2020-2020L, 3010, 3040, 3060, 3100, 3200, 3980, 4040-4040L, 4050, 4510, 4760; AAEC (FINA) 4870; AAEC 4930, 4960; ECON 4030 or an elective approved by the student's advisor	
Select six hours of technical agriculture courses from ADSC 2010, 2010L, 3320; CRSS 2010-2010L, 3050-3050L or CRSS(FORS) 3060-3060L, 3270-3270L, 3300; ENGR 3050, 3610; EHSC 3060 or above; ENTO 3740-3740L or above; FORS 3010-3010L or above; FDST 3000 or above; PGEN 3580-3580L; HORT 2000, 3620-3620L; PATH 3530-3530L; POUL 2020-2020L or above	
Select six hours of verbal and written communication courses from foreign language, ENGL 3590 or above; TELE 3010 or above; MARK 4200, 4250, 4600; PHIL 2500; SPCM 2400 or above	
General Electives:	11
Upper-division (0-7 hours)	

Any level (4-11 hours)

At least 12 hours of course work must be 4000-level or above.

Total hours required **120**

Scholarships

Several scholarships are available to agribusiness majors through the College of Agricultural and Environmental Sciences and the Agricultural and Applied Economics Department. Information about these scholarships can be obtained from Steven Turner (sturner@agecon.uga.edu).

Internships

An internship is required for students pursuing the agribusiness major. Dr Forrest Stegelin (fstegelin @agecon.uga.edu) coordinates the internship program for the agribusiness major.

Minor in Agribusiness

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Agricultural Communication

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Christine Langone
Associate Professor and Program Coordinator
clangone@arches.uga.edu
(706)542-0715

Department
Agricultural Leadership, Education, and Communication
College of Agricultural and Environmental Sciences

Description of the Program

The agricultural communication major prepares students to report agricultural information to audiences such as consumers, legislators, homeowners, farmers, agribusinesses, commodity groups, and governmental agencies. Through positions in fields such as public relations, sales, marketing, journalism, photography, and media, students communicate about the importance of agriculture. Students take courses in agriculture and environmental science along with journalism courses in the College of Journalism and Mass Communication. Each student concentrates in one aspect of communication selecting from journalism, public relations, advertising, or telecommunication courses. In addition, journalism electives allow students to develop a broad range of skills and to develop an individualized program of study. Agriculture classes may be taken in one area or selected from numerous departments in the college. Many students complete a minor in an agricultural discipline.

Career Opportunities

People with communication skills who also understand scientific agriculture have numerous opportunities. Every land-grant university employs a staff of journalists to communicate its research, extension, and teaching programs. Several branches of the federal government—USDA, Department of State, Department of the Interior—employ agricultural journalists, as do similar departments in state governments. There are several hundred agriculture-related publications in the United States. Agribusinesses, chemical and machinery companies, advertising agencies, and agriculture associations employ people who are trained in writing, advertising, broadcasting, and public relations.

Entrance Requirements and Expectations of Transfer Students

Students must have completed Core Areas A-E and Area F and must have a minimum 2.5 overall GPA.

Special Requirements

A grade of C or higher is required in journalism and agricultural courses which apply to major-related requirements.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Internships
Students are encouraged, but not required, to complete an internship.

Agricultural Economics

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Steven C. Turner
Associate Professor and Undergraduate Coordinator
sturner@agecon.uga.edu
(706)542-0852

Department
Agricultural and Applied Economics
College of Agricultural and Environmental Sciences

Description of the Program
Agricultural economics applies economic principles to food and fiber production, natural resource management, community and regional economic development, environmental policy, and international trade. Students take courses in economic theory, econometrics, statistics, accounting, technical agriculture, and the physical and biological sciences. A flexible offering of electives allows students to tailor the agricultural economics major to meet their particular interests and career objectives. Agricultural economics provides a strong theoretical background for those entering graduate schools in agricultural economics, economics, and professional schools in law and business administration.

Career Opportunities
Agricultural economics prepares students for careers in applied economics, resource management, public program analysis, economic forecasting, and economic research. Agricultural economics graduates are now working in commercial agriculture, food and fiber industries, resource and environmental management agencies, economic development agencies, state and local governments, and international trade organizations. Position responsibilities include resource management, finance, administration, economic research, and policy analysis with private, non-profit, and public agencies at the state and federal levels. Job opportunities are expanding for graduates with skills in applied economics.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Department
Agricultural Leadership, Education, and Communication
College of Agricultural and Environmental Sciences

Description of the Program

Students in Agricultural Education complete an approved program of course work in the agricultural sciences and teacher education. A one credit school practicum involves observation of agricultural instruction at schools across the state. The practicum helps students understand the job of teaching agriculture, make career choices and select a student teaching center. Apprentice teaching (student teaching) is carried out in an approved secondary school center under the daily supervision of an experienced, successful teacher of agriculture. Supervision is also provided by University of Georgia Agricultural Education faculty.

Career Opportunities

Agricultural Education prepares students for positions in teaching agriculture at the middle school, high school, post-secondary and adult levels. Graduates are eligible for teacher certification in most states, under reciprocity agreements with the State of Georgia. Employment outlook is excellent; there is a national shortage of teachers of agriculture. For the past decade, Georgia has had two to three job openings for every graduate of the program. Graduates are also eligible for a variety of related jobs in agricultural business, industry, extension, and other government agencies.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F. Courses offered in the College of Education require admission to teacher education and a 2.5 UGA GPA.

Expectations of Transfer Students

Students are required to have enrolled in the first course in the professional sequence, EAGR 4340/6340, and be admitted to teacher education prior to continuation in the professional sequence (See Regents' requirements for admission to teacher education in College of Education section).

Special Requirements

Students are expected to enroll in EAGR 4010/6010, Leadership Seminar, each semester that they are on campus. A passing grade on the Agricultural Education version National Praxis exam, General version (Praxis I), and the Praxis II (for technical competence) is also required for certification. Students who score well on the SAT or GRE may exempt Praxis I.

Program Requirements

Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1113
Preferred courses in Area D: BIOL 1107-1107L or BTNY 1210-1210L; CHEM 1211, 1211L; and MATH 2200, 2200L

Area F:	18
EFND 2030; EPSY 2020; choose 12 hours from AAEC 2580; ADSC 2010; AGRI 1010; BIOL 1108-1108L or BTNY 1220-1220L; CHEM 1212, 1212L; CRSS 2010-2010L; CSCI 1100-1100L; HORT 2000; POUL 2020-2020L	
Major Requirements:	21
Choose 21 hours from EAGR 4010 (4 hours), 4340, 4350, 4360, 5460 (12 hours); EOCS 5550	
Major Electives:	31
Select 31 hours from AAEC 3010 or 3040 or 4210; ADSC 3260-3260L or 3270-3270L or 3320 or 3600-3600L or 3610-3610L; BCMB(BIOL)(CHEM) 3100; CRSS 3050-3050L; ENTO 3740-3740L; FORS 3300 or 5730; HORT 3500-3500L and 3510-3510L or 3620-3620L or 3630-3630L or 4050; PATH 3530-3530L; PGEN 3580-3580L; POUL 3600	
General Electives:	8
Any level	
Total hours required	**120**

Scholarships

Several scholarships are available to majors in the College of Agricultural and Environmental Sciences. For more information, contact the office of Academic Affairs in the College. Other scholarships are available through the National FFA Foundation.

Agricultural Engineering

Degree
Bachelor of Science in Agricultural Engineering (B.S.A.E.)

Contact Person
E. Dale Threadgill, P.E.
Department Head
tgill@bae.uga.edu
(706)542-1653

Department
Biological and Agricultural Engineering
College of Agricultural and Environmental Sciences

Description of the Program

The Bachelor of Science in agricultural engineering (B.S.A.E.) curriculum at the University of Georgia is a general engineering program. This versatile engineering program combines the principles of mechanical, electrical, civil, and chemical engineering to prepare graduates for professional careers in both agricultural and non-agricultural industries. Activities in these careers may involve design of machinery and equipment (mechanical); structural and environmental design (civil); water and soil management (civil); processing, manufacturing, and quality measurement (mechanical, chemical, and electrical); and controls, energy use, microelectronics, and electrical machines and equipment (electrical).

This four-year professional engineering curriculum provides graduates with a general engineering degree that includes the basic sciences, humanities, social sciences, engineering sciences and courses in engineering design and analysis. All students complete courses in the basic engineering sciences such as statics, dynamics, strength of materials, fluid mechanics, electric circuits, heat transfer, and thermodynamics. They also select from intermediate engineering science and design courses in mechanism design, structural design, physical unit operations, management of structural environments, natural resource engineering, and electronics. Engineering design is introduced in the freshman year and a design methodology course is taught for sophomores. The capstone engineering design course is required in the senior year. In addition, courses with engineering science and design components are offered throughout the four-year curriculum.

Fifteen credit hours are selected by students during their junior and senior years to develop a desired *engineering emphasis* in one of the following areas: (1) Electrical and Electronic Systems, (2) Mechanical Systems, (3) Natural Resource Management, (4) Process Operations, or (5) Structural Systems. The development of both technical and communication skills is stressed throughout the program. The program establishes an interrelationship between the engineering profession and society.

The B.S.A.E. degree program is accredited by the Accrediting Board for Engineering Technology (ABET) and graduating seniors must complete the Fundamentals of Engineering examination prior to graduation. Successful completion of this exam qualifies the student for Engineer in Training registration which is a prerequisite for the Professional Engineer registration.

The objectives of the B.S.A.E. program are to provide graduates with:

1. Educational experiences using mathematics, natural sciences, engineering sciences and engineering design which motivate and qualify graduates to recognize and solve complex engineering problems.
2. Superb technical skills in the areas of computers, information transfer, and communication; innovative and imaginative attitudes; and an appreciation for the management function.

3. Learning experiences necessary for the synthesis of knowledge across disciplines in the social sciences, humanities, and natural sciences in order to understand the ethical, environmental, and social impacts of decisions.
4. An appreciation for continued professional development throughout life-long learning.

Course work in the B.S.A.E. program is selected to assure that graduates develop the desired competencies in a wide range of engineering topics. The engineering design experience is integrated throughout the B.S.A.E. curriculum. All students are required to take a first-year course in Introduction to Engineering Design, a second-year course in Engineering Design Methodology, and a fourth-year capstone course in Engineering Design. The capstone course draws upon previous course work and includes a major engineering design team project which focuses on professional practice in the student's area of emphasis. The engineering design experience is structured to fulfill the above objectives.

Career Opportunities

The general engineering nature of the agricultural engineering program enables graduates to take advantage of employment opportunities related to agricultural, civil, mechanical, electrical, and food engineering. The versatility of this degree program provides a broad spectrum of career alternatives in engineering design, development, testing, process control, and management. Typical employers of graduates are involved in food processing (e.g., General Foods, Gold Kist, Proctor & Gamble); electrical, electronics, and communications (e.g., Southern Bell, General Electric, Logic Technologies, Reliance); environmental engineering (e.g., CH²M Hill, USGS, EPA); mechanical equipment (e.g., Carrier Transicold, John Deere, FMC); utilities (e.g., Georgia Power Co., Jackson EMC, Duke Power Co.); paper production (e.g., Georgia Pacific, Weyerhauser); structural, construction, and consultants (e.g., Golder and Associates, Haliburton, Trus-Joist-MacMillan)); textiles (e.g., Milliken Industries); and federal, city, and state agencies (e.g., Warner Robins Air Logistics Center, USDA-NRCS).

Entrance Requirements

Entrance requirements for this major include completion of Core Areas A-E and Area F; a grade of C or better and a 2.5 GPA for the following courses: MATH 2200, 2200L, 2210, 2210L, 2500, 2700, PHYS 1211-1211L, 1212-1212L, CHEM 1211, 1211L, 1212, 1212L, BIOL 1107-1107L; and an overall GPA of 2.5.

Expectations of Transfer Students

Students transferring into Agricultural Engineering must have an overall grade point average of 2.5 or higher.

Special Requirements

All students must earn a grade of C or better in all required mathematics and physics courses and ENGR 1120, 2110, 2120, 2130, 2140, 2150, and 2170. Competency in a procedural computer programming language, such as C++, is expected.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 2200, 2200L	
Preferred courses in Area C: SPCM 1100 and one course from CMLT 2210, 2220, 2400; ENGL 2310, 2320, 2330, 2340, 2400 (take under general electives if not taken in Area C)	
Preferred courses in Area D: BIOL 1107-1107L and CHEM 1211, 1211L and MATH 2210, 2210L (take under general electives if not taken in Area D)	
Area F:	18
CHEM 1212, 1212L; MATH 2500, 2700; PHYS 1211-1211L, 1212-1212L	
Major Requirements:	38
ENGR 1120, 1920, 2110, 2120, 2130, 2140, 2150, 2170, 2920, 3140, 3150, 4230, 4240, 4920	
Major Electives:	30
Choose 15 hours from ENGR 2500, 3120, 3270, 3300, 3410, 3540, 3610, 4620	
Choose one of the following Areas of Emphasis: (15 hours)	
Electrical and Electronics Systems	
ENGR 3210, 4210, 4220, 4250; select 3 hours from ENGR 4270, 4280, 4480, 4540, 4940	
Mechanical Systems	
ENGR 4300, 4340, 4350; select 6 hours from ENGR 4220, 4250, 4330, 4360, 4370	
Natural Resource Management	
ENGR 3420, 3440, 4420; select 6 hours from CRSS 3050-3050L, 4600-4600L; ENGR 4480, 4940; FORS 4120	
Process Operations	
ENGR 4220, 4550, 4940; select 6 hours from ENGR 3210, 4250, 4540; FDST 4010, 4050-4050L, 4060-4060L, 4090-4090L; FORS 3500, 4500-4500L, 4510-4510L; MSIT 5130; POUL(FDST) 3860	

Structural Systems
ENGR 4610, 4630; select 9 hours from ENGR 3420, 3440, 4220, 4250, 4330, 4350, 4370, 4420, 4480

Total hours required **130**

Scholarships
The following scholarships are available for B.S.A.E. majors in the Biological and Agricultural Engineering Department: Bruce E. Dixson Scholarship; Bertram S. Reid Scholarships; Georgia Power Freshmen Scholarship; Georgia Section ASAE Scholarship; Rudie Driftmier Scholarship; Goodloe Yancey Scholarships; B. Derrell McLendon Scholarship; Robert H. Brown Scholarship. In addition, many scholarships are available at the College and University levels.

Cooperative Education
The Biological and Agricultural Engineering Department offers its students an opportunity to integrate academic instruction and real-life applications through a cooperative plan of education. Usually beginning after the freshman year, the plan allows for alternating semesters of full-time, off-campus professional work experience in designated industries, agencies, and laboratories arranged by the Department. The student is considered by the University to be in an uninterrupted program of study since the student is enrolled for academic credit while on work-experience semesters. While co-op placement does not imply permanent employment of the student upon graduation, it does provide an extended period for mutual evaluation by the student and the cooperating industry, enhancing the possibility of permanent employment.

Animal Health

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Walter Britton
Professor and Undergraduate Coordinator
wmbritt@arches.uga.edu
(706)542-1366

Department
Poultry Science
College of Agricultural and Environmental Sciences

Description of the Program
The degree program, the Bachelor of Science in Agriculture with a major in animal health, was begun in 1988. This program was designed, in close cooperation with the College of Veterinary Medicine, specifically for students entering veterinary school after three years of pre-veterinary study in the College of Agricultural and Environmental Sciences.

Students who enter the College of Veterinary Medicine upon completion of the degree requirements are eligible to receive the B.S.A. degree with a major in animal health only after successfully completing the first year of study in the College of Veterinary Medicine. Alternatively, students may also use the senior year to complete requirements for a B.S.A. degree in an appropriate major in the College of Agricultural and Environmental Sciences. See section on pre-veterinary medicine programs.

Career Opportunities
This program is designed for students who wish to study veterinary medicine.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F and a minimum GPA of 2.7.

Expectations of Transfer Students
Transfer students with 40 or more credit hours must have a 2.7 overall grade point average for admission.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred course in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: BIOL 1107-1107L and CHEM 1211, 1211L	
Preferred courses in Area E: ANTH 1102 and ECON 2106 (take under general electives if not take in Area E)	
Area F:	18
ADSC 2010, 2010L; BIOL 1108-1108L; CHEM 1212-1212L; PHYS 1111-1111L; POUL 2020-2020L	
Major Requirements:	21-24
ADSC 3300-3300L or POUL 3750; BCMB(BIOL)(CHEM) 3100	
Select 9 hours of Animal Production or Internship courses from ADSC 3600-3600L, 3610-3610L, 3620-3620L, 3630-3630L, 3640-3640L, 3910; POUL 3600, 3910, 4010, 4020, 4030	
Select 6-8 hours from the following with assistance of advisor: CBIO 3000-3000L; CBIO(BIOL) 3300, 3400; GENE(BIOL) 3200 or PGEN 3580-3580L; MIBO 3500, 3510L; POUL 3720, 3800-3800L	

Major Electives: 12
CHEM 2211, 2211L, 2212, 2212L; PHYS 1112-1112L
General Electives: 24-27
Upper division (16-18 hours)
Any level (8-9 hours)
Total hours required **120**

Scholarships
Several scholarships are available to students in the College of Agricultural and Environmental Sciences. For more information, contact the Office of Academic Affairs in the College.

Internships
Internships are available but not required.

Animal Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Robert S. Lowrey
Professor and Undergraduate Coordinator
rlowrey@arches.uga.edu
(706)542-1852

Department
Animal and Dairy Science
College of Agricultural and Environmental Sciences

Description of the Program
The animal science curriculum is designed to provide technical and applied instruction in the biological, physical, and economic aspects of beef, swine, sheep, and horse production. It includes the selection, breeding, nutrition, reproduction, growth, and management of livestock in the production of meat and milk, or of horses as work or companion animals. Courses of a more basic nature may be emphasized by students who desire careers in science-related fields or who wish to pursue graduate or professional study. This major is highly recommended for persons wishing to enter a program of study in veterinary medicine.

Career Opportunities
The curriculum in animal science is designed to prepare students for careers as livestock producers, farm managers, animal science specialists, county extension agents, vocational agriculture teachers, or research technicians. Students are also qualified for careers in agribusiness with meat processing companies, feed manufacturers, breed associations, animal health companies, livestock marketing organizations, livestock equipment and supply companies, livestock publications, or related fields.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Students transferring to this major should have taken the following courses: BIOL 1107-1107L, 1108-1108L; CHEM 1211, 1211L, 1212, 1212L; Organic Chemistry; MATH 1113.

Special Requirements
Students must have an overall 2.0 GPA in major courses.

Program Requirements
Semester Core Curriculum **Hours**
Areas A-E: 42

Anthropology

Degree
Bachelor of Arts (A.B.)

Contact Person
Michael D. Olien
Undergraduate Advisor
molien@arches.uga.edu
(706)542-1478

Department
Anthropology
College of Arts and Sciences

Description of the Program
The program requires one course in each of the five core areas (cultural anthropology, archaeology, biological anthropology, applied anthropology and a culture area) and four additional three-semester-hour elective anthropology courses. Please note that courses cross-listed with other departments should be taken under the ANTH prefix.

Career Opportunities
Career opportunities are limited with only an A.B. degree, but include opportunities in contract archaeology, jobs that involve working with other cultures, and employment requiring general skills of social science.

Entrance Requirements
Students must have completed Core Areas A-E and Area F and must have made a grade of C or better in ANTH 1102 or 2120H.

Expectations of Transfer Students
Six to nine semester credit hours of anthropology, beyond ANTH 1102, may be accepted.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
ANTH 1102	
Choose 15 hours from ECOL 1000-1000L, POLS 1101-1101D, STAT 2000, 2210, or any 1000 or 2000-level courses in GEOG, HIST, LING, PSYC, RELI, SOCI, and WMST

Art (B.F.A.)

Degree
Bachelor of Fine Arts (B.F.A.)

Contact Person
Rick Johnson
rnj@arches.uga.edu
Associate Director
(706)542-1574

Department
Lamar Dodd School of Art
College of Arts and Sciences

Description of the Program

Students are encouraged to develop a personal style in the area or the materials they specialize in. The B.F.A. candidate should achieve an insight into and an understanding of the nature of the materials they choose to work with. In most areas, students are required to present an exhibition before graduation that demonstrates their achievement in developing a mature and cohesive body of work.

Specific course requirements vary for each of the following areas of specialization: Ceramics, Digital Media, Drawing, Fabric Design, Graphic Design, Interior Design, Jewelry and Metal Work, Painting, Photography, Printmaking, Scientific Illustration, and Sculpture. Contact the School of Art or visit the UGA Bulletin web site (bulletin.uga.edu) for a list of requirements for each area.

Career Opportunities

Art majors enter the profession to pursue both fine art practice and applied art in business as well as in education and graduate study. Students are prepared for work in technical as well as creative areas of art and design. Each specialization offers a variety of employment opportunities in areas ranging from mass communications to the service industries.

Entrance Requirements

Entry to the B.F.A. program requires completion of Core Areas A-E and Area F. Students will be accepted as provisional majors until they have completed ARST 1050 and either ARST 1060 or 1080. Students must successfully pass the Portfolio Review.

Expectations of Transfer Students

Transfer students must successfully pass the Portfolio Review. Aspiring B.F.A. candidates who transfer from within the University System of Georgia are urged to fulfill Area F of the Core Curriculum with art courses equivalent to the courses required in Area F by UGA.

Special Requirements

A minimum cumulative average of 2.0 and a C or better in all art courses are required for graduation.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
ARHI 2100; ARST 1050, 1060, 1070, 1080; additional 3-hour ARST course determined by area of specialization	
Major Requirements:	48-60
48-60 hours of Art courses determined by area of specialization	
Major Electives:	0-12
0-12 hours of electives determined by area of specialization	
Total hours required	**120**

Fees

Fees are required to cover the expense of materials in some studio courses.

Scholarships

The Kuzmicki-McCutchen Scholarships are awarded to high school seniors who plan to major in art at the University of Georgia. Submission of portfolios, letters of recommendation and transcripts occurs in December. Contact the School of Art for details.

The Albert Christ-Janer and Lamar Dodd Scholarships are awarded to high school seniors in conjunction with the annual School Art Symposium for study the following year.

The scholarships listed below are open to any full-time student majoring in any area of the visual arts who has completed a minimum of one year of study in the School of Art. Preference is generally given to students who will be juniors or seniors but in the final analysis, all factors are taken into consideration before a decision is reached. Applications will be screened by an appointed faculty committee which will have sole discretion in determining recipients of the awards. Recipients of scholarships may be required to participate in a group exhibition in the Visual Arts Gallery.

Mary Rosenblatt Scholarships: Established primarily to assist students who are planning a career in teaching; however, they are not limited to students majoring in art education.

Betty Cabin Scholarships: To assist worthy students majoring in any program of the school.

Vince Dooley Scholarships: To assist worthy students majoring in any program of the school.

Minor in Art

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Art/Art Education

Degree
Bachelor of Fine Arts (B.F.A.)

Contact Person
Carole Henry
Area Chair
ckhenry@arches.uga.edu
(706)542-1624

Department
Lamar Dodd School of Art
College of Arts and Sciences

Description of the Program

The B.F.A. in Art Education prepares art teachers at the elementary, middle, and high school levels to promote the central role of the visual arts in the lives of their students. The successful B.F.A. candidate will be able to demonstrate a professional knowledge of fundamental art concepts, materials, and teaching techniques.

Students are required to take 45 hours in art courses beyond the 18 that are required in Area F of the core curriculum, including painting, printmaking, ceramics, sculpture, a studio sequence, 9 hours of studio electives, 6 hours in Art Education, and 9 hours in Art History at the 3000-4000 levels. In addition, they must take 18 hours in professional Education including 9 in Student Teaching.

Career Opportunities

Students majoring in Art Education not only have the same opportunities as any art major, but also have additional opportunities in a wide range of teaching situations. Virtually all of the graduates desiring to teach find teaching positions. Salaries usually begin around $24,000 and go beyond $45,000. The primary positions available are as art teachers at the elementary, middle and secondary levels in both private and public schools. As the urban areas are most sought after, it is sometimes easier to find positions in the outlying areas. There are also some positions available in various institutions such as hospitals, day care centers, homes for the elderly, scout groups, camps, art centers, museums and church-related programs.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. Area F courses and EFND 2030 must be completed with a GPA of 2.7. Students will be accepted as provisional majors until they have completed ARST 1050 and either ARST 1060 or 1080. Students must successfully pass the Portfolio Review and submit a 300-word statement outlining reasons for wanting to become an art teacher. The student must also be admitted to Teacher Education. Admission to and retention in the Art Education Program will be determined by review of the student's performance and the availability of placements for student teachers.

Expectations of Transfer Students

Transfer students must successfully pass the Portfolio Review. Aspiring B.F.A. candidates who transfer from within the University System of Georgia are urged to fulfill Area F of the Core Curriculum with art courses equivalent to the courses required in Area F by UGA.

Special Requirements

The B.F.A. in Art Education requires 126 hours, which is six hours more than the University norm of 120 hours. The student must also be admitted to Teacher Education. A 2.5 GPA must be maintained to remain in the Teacher Education program. No grade below C in major courses will be accepted.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
ARHI 2100, 1050, 1060, 1070, 1080; one 2000-level ARST course	
Major Requirements:	66
(Minimum grade of C required)	
ARED 3350, 3360, 4010 or 5500, 5460 (9 hours), 5470; EFND 2030; EPSY 2020; SPED 2000 or ARED 4340; 9 hours ARHI upper division courses (ARHI 4010 recommended if not taken above; it is recommended to take two 3000-level ARHI courses before taking a 4000-level ARHI course); 6 hours ARST Studio sequence; 9 hours ARST Studio electives	
3 hours from the following Painting courses: ARST 2100, 2110, 3110, 3120, 3130, 3140, 3150, 3160, 4100, 4110	
3 hours from the following Printmaking courses: ARST 2300, 2310, 3300, 3310, 3320, 3330, 3340, 3350, 3360, 3370, 3380, 3390, 4300, 4310	
3 hours from the following Ceramics courses: ARST 2500, 3500, 4500, 4590	
3 hours from the following Sculpture courses: ARST 2400, 2410, 3400, 3410, 3420, 3430, 3440, 3450, 3460, 4400, 4410, 4420, 4430, 4440, 4450	
Total hours required	**126**

Fees
Fees are required to cover materials in some studio courses.

Scholarships
W. Robert Nix Art Education Award: To recognize and assist deserving Art Education students. The Awards are given during the academic term that the students are enrolled for their "Student Teaching."

The Kuzmicki-McCutchen Scholarships are awarded to high school seniors who plan to major in art at the University of Georgia. Submission of portfolios, letters of recommendation and transcripts occurs in December. Contact the School of Art for details.

The Albert Christ-Janer and *Lamar Dodd Scholarships* are awarded to high school seniors in conjunction with the annual School Art Symposium for study the following year.

The scholarships listed below are open to any full-time student majoring in any area of the visual arts who has completed a minimum of one year of study in the School of Art. Preference is generally given to students who will be juniors or seniors but, in the final analysis, all factors are taken into consideration before a decision is reached. Applications will be screened by an appointed faculty committee which will have sole discretion in determining recipients of the awards. Recipients of scholarships may be required to participate in a group exhibition in the Visual Arts Gallery.

Mary Rosenblatt Scholarships: Established primarily to assist students who are planning a career in teaching; however, they are not limited to students majoring in art education.

Betty Cabin Scholarships: To assist worthy students majoring in any program of the school.

Vince Dooley Scholarships: To assist worthy students majoring in any program of the school.

Art/Art History

Degree
Bachelor of Arts (A.B.)

Contact Person
Shelley Zuraw
Area Chair
sez@aol.com
(706)542-1590

Department
Lamar Dodd School of Art
College of Arts and Sciences

Description of the Program
Students are expected to achieve a basic knowledge of the history of art within the broader context of social, intellectual, and cultural history. Major-related courses in Area F of the core curriculum include the introductory art history (ARHI 2100 or 2110H, Monuments of World Art) and 15 hours of introductory or survey courses from specified areas, 30 hours of upper level art history courses, and 18 hours of major electives within the humanities, sciences, and social sciences excluding studio art and art history but including a foreign language through the fourth semester.

Career Opportunities
An undergraduate degree in art history provides the student with a broad liberal arts education; it can, therefore, be used as the basis for further study in many fields leading to a variety of professional careers. The student who wishes to pursue a career in art history should consider graduate studies on the M.A. or Ph.D. level. With such advanced degrees, professional employment opportunities include college and university teaching, museum and research positions, as well as careers in restoration and conservation.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Transfer students are urged to take a foreign language.

Special Requirements
Students must earn at least a C in all major courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
ARHI 2100	
Fifteen hours of 1000/2000-level courses selected from the following areas: AFAM; ANTH; ARST; ASTR; BIOL; BTNY; CBIO; CHEM; CLAS; CMLT 2111, 2210, 2212, 2220, 2400; CSCI; ECOL; ECON; GEOG; GEOL; HIST; MARS; MATH; MUSI (2000-level); PHIL; PHYS; POLS; PSYC; RELI; SOCI; WMST	
Major Requirements:	30
(Minimum grade of C required)	
Choose 30 hours of ARHI courses at the 3000/4000 level	
Major Electives:	18
Choose 18 hours from the following areas (include a second literature course and foreign language through the fourth semester): AFAM, ANTH, ARAB, ARTS,	

ASTR, BCMB, BIOL, BTNY, CBIO, CHEM, CHNS, CLAS, CMLT, CSCI, ECOL, ECON, EDES, ENGL, FREN, GENE, GEOG, GEOL, GREK, GRMN, HEBR, HIST, ITAL, JPNS, KREN, LATN, LING, MARS, MATH, MIBO, PHIL, PHYS, POLS, PORT, PSYC, RELI, ROML, RUSS, SEMI, SPAN, SPCM, SOCI, STAT, SWAH, WMST, YORB

General Electives: 12

(Refer to College-wide requirements when selecting general electives.)

Upper division (at least 9 hours if not taken in major electives)

Any level (3 hours or more)

Total hours required **120**

Fees

Fees are required to cover the expense of materials in some studio courses.

Scholarships

The Kuzmicki-McCutchen Scholarships are awarded to high school seniors who plan to major in art at the University of Georgia. Submission of portfolios, letters of recommendation and transcripts occurs in December. Contact the School of Art for details.

The Albert Christ-Janer and *Lamar Dodd Scholarships* are awarded to high school seniors in conjunction with the annual School Art Symposium for study the following year.

The scholarships listed below are open to any full-time student majoring in any area of the visual arts who has completed a minimum of one year of study in the School of Art. Art/Studio Art (A.B.)

Degree
Bachelor of Arts (A.B.)

Contact Person
William A. Marriott
Area Chair
bmarriot@arches.uga.edu
(706)542-1639

Department
Lamar Dodd School of Art
College of Arts and Sciences

Description of the Program

In the A.B. program in Studio Art, students are taught to use techniques and tools associated with studio media; to understand the non-verbal language of art and design in terms of artistic principles and application; to be able to organize visual elements both rationally and intuitively according to understood artistic principles; and to become familiar with the major achievements in the history of art. The program requires 24 hours in studio art beyond the 15 hours in Area F of the core curriculum. Thus, the major requires a total of 39 hours of studio courses. In addition to the Monuments of Art History, students must take 9 hours of art history at the 3000 or 4000 level. Required electives include a second literature course and a foreign language through the fourth semester. The A.B. in Studio Art is intended for students who want more academic courses and freedom to choose electives over a wider range of offerings than is afforded by the B.F.A. programs in Studio Art.

Career Opportunities

This degree program provides the student with a broad liberal arts education; it can, therefore, be used as the basis for further study in many fields, including art, or qualify a person for entry-level positions that require a liberal arts education.

Entrance Requirements

For students who matriculate originally at UGA, completion of Core Areas A-E and Area F and successful completion of Portfolio Review are required.

Expectations of Transfer Students

Because the foundation courses (ARST 1050, 1060, 1070, and 1080), the introductory art history course, and a studio course at the 2000 level are required for the major and are taken in Area F of the Core Curriculum by students who matriculate at UGA, transfer students are urged also to take those courses or their equivalents to fulfill Area F. Successful completion of Portfolio Review is also required.

Special Requirements

Students must earn at least a C in all major courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
ARHI 2100; ARST 1050, 1060, 1070, 1080; one 2000-level ARST course	
Major Requirements:	33
(Minimum grade of C required)	
Two 2000-level ARST courses	
Eighteen hours of ARST courses at 3000/4000 levels	
Nine hours of ARHI courses at 3000/4000 levels (it is recommended to take two 3000-level ARHI courses before taking a 4000-level ARHI course)	
Major Electives:	15
Fifteen hours from the following (include a second literature course and foreign language through the fourth semester): AFAM, ANTH, ARAB, ARTS, ASTR, BCMB, BIOL, BTNY, CBIO, CHEM, CHNS, CLAS, CMLT, CSCI, ECOL, ECON, EDES, ENGL, FREN, GENE, GEOG, GEOL, GREK, GRMN, HEBR, HIST, ITAL, JPNS, KREN, LATN, LING, MARS, MATH, MIBO, PHIL, PHYS, POLS, PORT, PSYC, RELI, ROML, RUSS, SEMI, SPAN, SPCM, SOCI, STAT, SWAH, WMST, YORB	
General Electives:	12
(Refer to College-wide requirements when selecting general electives.)	
Upper division (12 hours)	
If major electives include upper division courses, any level of courses may be taken.	
Total hours required	**120**

Fees

Some studio courses require additional fees.

Scholarships

The Kuzmicki-McCutchen Scholarships are awarded to high school seniors who plan to major in art at The University of Georgia. Submission of portfolios, letters of recommendation and transcripts occurs in December. Contact the School of Art for details.

The Albert Christ-Janer and Lamar Dodd Scholarships are awarded to high school seniors in conjunction with the annual School Art Symposium for study the following year.

The scholarships listed below are open to any full-time student majoring in any area of the visual arts who has completed a minimum of one year of study in the School of Art. Preference is generally given to students who will be juniors or seniors but, in the final analysis, all factors are taken into consideration before a decision is reached. Applications will be screened by an appointed faculty committee which will have sole discretion in determining recipients of the awards. Banking and Finance

Degree
Bachelor of Business Administration (B.B.A.)

Contact
Jean Abbey
Administrative Coordinator
jabbey@cbacc.cba.uga.edu
(706)542-4450

Department
Banking and Finance
Terry College of Business

Description of the Program

The study of finance develops an understanding of financial decisions made by corporations and how capital markets work. Students are provided with the skills and knowledge to value cash flows and assets, analyze the financial performance of firms, determine strategies to enhance the value of the firm, and understand financial innovations in domestic and international capital markets.

The program combines course work in financial management, investment analysis, financial institutions and markets, and international finance to prepare students for positions with major corporations, small business firms, brokerage firms, commercial banks, investment banks, insurance companies, other financial institutions, accounting and consulting firms, and government agencies.

Students are expected to complete course work in financial management, investment analysis, and international finance.

Career Opportunities

Management training positions in various nonfinancial firms as well as financial services firms such as banks, brokerage firms, insurance compa-

nies, etc.; investment banking, retail brokerage; finance positions in small firms.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence.

No finance student is permitted to repeat a major finance course more than once in order to achieve a grade of C or better, nor is a finance student permitted to repeat more than two major finance courses.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	33
FINA 3000; MGMT 3000; MSIT 3000; MARK 3000; FINA 4000, 4200, 4310	
Choose 3 or 4 courses from the following: FINA 4210, 4280, 4320, 4380, 4420, 4600, 4810; AAEC(FINA) 4870; FINA 4920; REAL(FINA) 5100	
If only 3 courses from above were chosen, you must choose one course from approved major-related list (available in the Banking and Finance Department) which includes ACCT, RMIN, MARK, MGMT, REAL.	
Major Electives:	3
Choose one of the following: ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000	
General Electives:	24
(Refer to college-wide requirements when selecting general electives.)	
(At least one course must be upper division)	
Five courses in Arts and Sciences	
One business course outside major	
Two business courses outside department	
Total hours required	**120**

Internships

Finance students can earn three hours credit by completing an internship with a firm or with a government agency and preparing an in-depth research paper relating to banking or finance. Students are responsible for contacting the firm or agency and setting up the internship, which can be paying or non-paying, and must be at least a 30-hour work week. No other courses may be taken for credit at the same time.

Biochemistry and Molecular Biology

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. Michael Adams
adams@bmb.uga.edu
(706)542-2060

Department
Biochemistry and Molecular Biology
College of Arts and Sciences

Description of the Program

The program provides students with a rigorous background in both the biological and physical sciences with an emphasis on the chemistry of life processes. Following introductory courses in biochemistry, genetics, cell biology, and molecular biology, students study advanced topics in biochemistry, including biotechnology, human disease, and physical biochemistry. Two semesters of laboratory research are required, typically as an independent research project in the laboratory of a faculty member, together with electives in microbiology, immunology, genetics, and/or developmental biology.

Career Opportunities

The program is designed for students who will spend their career in the biological sciences or in a closely related field. The program prepares students for post-degree professional schools either

in the life sciences (medicine, pharmacy, dentistry, optometry, etc.) or in scientific research typically via graduate school for careers either in industry or academia.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

To prepare for course work in this major, the following courses are required: BIOL 1107-1107L and 1108-1108L; CHEM 1411, 1411L, 1412, 1412L (or CHEM 1211, 1211L, 1212, 1212L, and 2300, 2300L); CHEM 2211, 2211L and 2212, 2212L and PHYS 1211-1211L and 1212-1212L (or PHYS 1111-1111L and 1112-1112L). Substitution of any of the above courses will be individually considered based on the documentation provided by the student.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and MATH 2200, 2200L (take under general electives if not taken in Area D)	
Preferred course in Area E: ANTH 1102	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L, 2211, 2211L; PHYS 1111-1111L or 1211-1211L; two hours of electives	
Major Requirements:	30
Choose one from the following: BCMB (BIOL)(CHEM) 3100; BCMB 4010	
Take all of the following: BCMB 4020, 4120, 4130, 4960L; BCMB (CHEM) 4110; CBIO(BIOL) 3400; GENE(BIOL) 3200	
Choose one from the following: BCMB 4030L, 4970L	
Choose one from the following: CBIO (BIOL) 3300; CBIO(MIBO) 4100; MIBO 3500	
Major Electives:	12
CHEM 2212, 2212L; MATH 2210, 2210L; PHYS 1112-1112L or 1212-1212L	
General Electives:	18
(Refer to College-wide requirements when selecting general electives.)	
Upper division (9 hours)	
Any level (9 hours)	
Total hours required	**120**

Minor in Biochemistry and Molecular Biology

Biological Engineering

Degree
Bachelor of Science in Biological Engineering (B.S.B.E.)

Contact Person
E. Dale Threadgill, P.E.
Department Head
tgill@bae.uga.edu
(706)542-1653

Department
Biological and Agricultural Engineering
College of Agricultural and Environmental Sciences

Description of the Program

The Bachelor of Science in Biological Engineering (B.S.B.E.) degree program provides students with an excellent professional engineering education in complementary biological and engineering sciences so they may develop as experts, scholars, and entrepreneurs capable of implementing new ideas and technologies in the complex biologically-based industries.

The program meets critically important needs for engineering systems in the rapidly advancing field of biotechnology. Recent discoveries in biological sciences are providing new ways to beneficially manipulate biological systems ranging from individual cells to entire ecosystems. Engineering of biological systems can increase the quality, quantity, and cost effectiveness of production of food and other useful substances. Studies and surveys have identified needs and opportunities for engineering personnel in biomanufacturing, bioprocessing, and biocontrols. Graduates of this program will meet the critical needs of the developing biologically-based industrial and manufacturing sector in the United States.

The four-year professional engineering program provides the student with a balance of basic sciences, humanities, social sciences, engineering sciences, biological sciences, and courses in engineering design and analysis. All students complete biological science courses in biology, organic chemistry, microbiology, and biochemistry with an option to select additional courses in genetics, cell biology, zoology, or botany. Engineering science courses required are statics, fluid mechanics, strength of materials, electrical circuits, heat transfer, and thermodynamics. Three areas of engineering emphasis are provided: 1) Environmental, 2) Bioprocessing, and 3) Biomedical. These em-

phasis areas allow the student to tailor course work toward an area of their primary interest. Based on their selected area, students select from engineering courses in mass transport and rate phenomena, biomaterials, engineering and design of biological processes, biomechanics, environmental engineering, instrumentation for environmental quality and bioprocess monitoring and control. Additional electives are available to enhance the selected area of emphasis. The development of both technical and communication skills is stressed throughout the program. Students are encouraged to participate in professional activities through local and national organizations.

The B.S.B.E. degree program is accredited by the Accrediting Board for Engineering and Technology (ABET) and graduating seniors must complete the fundamentals of Engineering examination prior to graduation. Successful completion of this exam qualifies the student for Engineer in Training registration which is a prerequisite for the Professional Engineer registration.

The objectives of the B.S.B.E. program are to provide graduates with:

1. Educational experiences drawn from biological sciences, engineering sciences, and engineering design which motivate and qualify graduates to recognize and solve engineering problems in biological systems.
2. Superb technical skills in the areas of computers, information transfer, and communication; innovative and imaginative attitudes; and an appreciation for the management function.
3. Learning experiences necessary for the synthesis of knowledge across disciplines in the social sciences, humanities, and natural sciences in order to understand the ethical, environmental, and social impacts of decisions.
4. An appreciation for continued professional development throughout life-long learning.

Course work in the B.S.B.E. program is selected to assure that graduates develop the desired competencies in a wide range of engineering topics. The engineering design experience is integrated throughout the B.S.B.E. curriculum. All students are required to take a first-year course in Introduction to Engineering Design, a second-year course in Engineering Design Methodology, and a fourth-year capstone course in Engineering Design. The capstone course draws upon previous course work and includes a major engineering design team project which focuses on professional practice in the student's area of emphasis. The engineering design experience is structured to fulfill the above objectives.

Career Opportunities

Employment demand for engineers remains among the most favorable of all the professions. A particularly rapid increase in demand has occurred in food, agricultural, environmental, and therapeutic drug industries due to the recent development of processes and tools in biotechnology. Biological engineers will be essential to the solution of many process-development needs if the results from the efforts of life scientists are to be successfully transferred to full-scale production. Solving problems in biocatalysis, heat and mass transfer, efficient energy conversion and product recovery in biological processes requires an integration of the engineering and biological science disciplines.

The estimated number of job openings for biological engineers is about 2,500 per year for the next ten years. These positions include industrial fermentation, cell culture process engineering, filtration engineering, environmental consulting and regulation, and others. A B.S. in Biological Engineering will meet the educational qualifications for each of these positions. Graduates will also be highly qualified for employment in more traditional engineering positions.

Entrance Requirements

Entrance requirements for this major include completion of Core Areas A-E and Area F; a grade of C or better and a 2.5 GPA for the following courses: MATH 2200, 2200L, 2210, 2210L, 2500, 2700, PHYS 1211-1211L, 1212-1212L, CHEM 1211, 1211L, 1212, 1212L, BIOL 1107-1107L; and an overall GPA of 2.5.

Expectations of Transfer Students

Students transferring into this program must have an overall grade point average of 2.5 or higher.

Special Requirements

Students must earn a C or better in all required mathematics and physics courses and ENGR 1120, 2110, 2120, 2140, 2150, and 2170. Competency in a procedural computer language, such as C++, is expected and may be satisfied with ENGR 1140.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 2200, 2200L	
Preferred courses in Area C: SPCM 1100 and one course from CMLT 2210, 2220, 2400; ENGL 2310, 2320, 2330, 2340, or 2400 (take under general electives if not taken in Area C)	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and MATH	

2210, 2210L (take under general electives if not taken in Area D)

Area F: 18

CHEM 1212, 1212L; MATH 2500, 2700; PHYS 1211-1211L, 1212-1212L

Major Requirements: 51

BCMB(BIOL)(CHEM) 3100; BIOL 1108-1108L; CHEM 2211, 2211L; ENGR 1120, 1920, 2110, 2120, 2140, 2150, 2170, 2500, 2920, 3140, 3150, 3520, 4920; MIBO 3500, 3510L

Major Electives: 18-19

Select one course from CBIO 3700; CBIO(BIOL) 3400; CBIO(MIBO) 4100; CRSS 4600-4600L; ECOL (BIOL) 3500-3500L; MIBO 4090; VPHY 3100

Select one of the following Areas of Emphasis:

Environmental Area of Emphasis

ENGR 3410, 3440, 4440, 4450, 4480

Bioprocessing Area of Emphasis

ENGR 4510, 4530, 9 hours from ENGR 3540, 4520, 4940; FDST 4060-4060L

Biomedical Area of Emphasis

ENGR 4740; 12 hours from ENGR 2130, 3300, 4230, 4510, 4530, 4620, 4760, 4940

General Electives: 0-1

Upper division (0-1 hours)

Total hours required **130**

Scholarships

The following scholarships are available for biological engineering majors in the Biological and Agricultural Engineering Department: Bruce E. Dixson Scholarship; Georgia Section ASAE Scholarship; Rudie Driftmier Scholarship; Goodloe Yancey Scholarships; B. Derrell McLendon Scholarship; Robert H. Brown Scholarship. In addition, many scholarships are available at the College and University levels.

Cooperative Education

The Biological and Agricultural Engineering Department offers its students an opportunity to integrate academic instruction and real-life applications through a cooperative plan of education. Usually beginning after the freshman year, the plan allows for alternating semesters of full-time, off-campus professional work experience in designated industries, agencies and laboratories arranged by the Department. The student is considered by the University to be in an uninterrupted program of study since the student is enrolled for academic credit while on work-experience semesters. While co-op placement does not imply permanent employment of the student upon graduation, it does provide an extended period for mutual evaluation by the student and the cooperating industry enhancing the possibility of permanent employment.

Biological Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Birkett Howarth
Professor
bhowarth@arches.uga.edu
(706)542-1369

Department
Poultry Science
College of Agricultural and Environmental Sciences

Description of the Program

This major provides a very flexible program of study integrating both biological and agricultural sciences.

Career Opportunities

This major provides preparation for graduate or professional study as well as for employment in business, industry, or government positions requiring a broad background in the biological sciences. Opportunities for work in biology and agriculture are expected to grow as an increasing human population demands more food, fiber, and wood products, health care, and environmental stewardship.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students must have taken courses in general biology, general chemistry, organic chemistry, precalculus math, and physics (check with advisor of this program for specific course sequence requirement).

Program Requirements

Semester Core Curriculum **Hours**

Areas A-E: 42

See Core Curriculum

Required courses in Area A: ENGL 1101, 1102, and MATH 1113

Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)

Preferred courses in Area D: BIOL 1107-1107L; CHEM 1211, 1211L; and MATH 2200, 2200L (take under general electives if not taken in Area D)

Area F: 18

BIOL 1108-1108L; CHEM 1212, 1212L,

2211, 2211L, 2212, 2212L; PHYS 1111-1111L

Major Requirements: 21-24

BCMB(BIOL)(CHEM) 3100; GENE (BIOL) 3200 or PGEN 3580-3580L; MIBO 3500

Select 6 to 7 hours from BIOL 3700; CBIO(BIOL) 3300, 3400, 3800; ECOL (BIOL) 3500-3500L; GENE (BIOL) 4600

Select 6 to 8 hours from ADSC 3300-3300L, 3310-3310L, 3400-3400L; CBIO 3000-3000L, 3700, 4730; CBIO(BIOL) 3410L; CBIO (MIBO) 4100; ECOL (FORS) 3260-3260L; ECOL(BIOL) 3510; ENTO 3740-3740L; MARS 3450-3450L; PATH 3530-3530L; POUL 3750, 3800-3800L, 4030; VPHY 3100

Major Electives: 19

PHYS 1112-1112L

Fifteen hours of upper division courses in the College of Agricultural and Environmental Sciences

General Electives: 17-20

Upper division (0-3 hours)

Any level (0-20 hours)

Total hours required **120**

Scholarships

Several scholarships are available to students in the College of Agricultural and Environmental Sciences. For more information, contact the Office of Academic Affairs in the College.

Internships

Internships are available but not required.

Biology

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. William Barstow
Associate Decision Chairman and Director of Undergraduate Degree Programs in Biology
barstow@dogwood.botany.uga.edu
(706)542-1691

Department
Biology
College of Arts and Sciences

Description of the Program

The Bachelor of Science (B.S.) degree with a major in biology is a liberal arts degree with a concentration in the biological sciences. It is not a pre-professional degree, but it does prepare students for professional programs in veterinary medicine, dentistry, medicine, pharmacy, etc., as well as for advanced degrees in the biological sciences, i.e., Master of Science (M.S.) and Doctor of Philosophy (Ph.D).

A major in biology is valuable because of the important role that biology plays in our everyday lives. An understanding of basic biological principles is crucial in interpreting the implications of environmental degradation and loss of biodiversity, the impact of genetic engineering and biotechnology in crop improvement, the treatment of disease, forensic medicine, and legal and ethical issues associated with the above.

Career Opportunities

A major in biology offers an excellent background for a variety of careers and advanced training. Many biology majors go into medicine, law, dentistry, veterinary medicine, pharmacy, optometry, and academia. Numerous career opportunities can be found in government, business, pharmaceuticals, biotechnology, environmental survey/control and other industries. In addition, opportunities are available in other disciplines such as journalism, broadcasting, and public policy. A more complete treatment of careers open to those with a biology degree is provided in the *Handbook For Biology Majors.*

Entrance Requirements

Enty to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students who are transferring upon completion of two years of course work are strongly encouraged to complete Areas D and F as specified for the biology major. Students should contact the College of Arts and Sciences or the Biology Program Office for information on how best to fulfill these requirements. Students are strongly encouraged to take a majors' introductory biology sequence if it is available. At least 15 hours of the advanced biology courses required for the major must be taken in residence at UGA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and MATH 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ANTH 1102 or GEOG 1101-1101D, HIST 2111 or 2112, POLS 1101-1101D	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L,	

2211, 2211L; PHYS 1111-1111L, 1112-1112L

Major Requirements: 21-24

BCMB(BIOL)(CHEM) 3100; GENE (BIOL) 3200

Choose three from the following: CBIO (BIOL) 3300, 3400; ECOL (BIOL) 3500-3500L; GENE(BIOL) 4600

Organismal:

Choose one course from BTNY 4650-4650L; CBIO 3000-3000L, 4500-4500L; CBIO(BTNY) 4600-4600L; ECOL (FORS) 3260-3260L; ECOL 4000-4000L, 4070-4070L; ENTO 3140-3140L, 4000-4000L; MARS 3450-3450L; MIBO 3500; PATH(BTNY) 4200-4200L

Laboratory

Option I:

Choose one course from BCMB 4030L; BIOL 3110L, 3710L, 4960, 4960H; BIOL(CBIO) 5050L; CBIO(BIOL) 3410L; ECOL(BIOL) 3510; GENE (BIOL) 3210, 4210L; MIBO 4600L

Option II:

Choose two courses (one of which will count as a biology elective) from BIOL (CBIO) 5050L; BTNY 4230-4230L, 4650-4650L; CBIO 3000-3000L, 4500-4500L; CBIO (BTNY) 4600-4600L; ECOL (FORS) 3260-3260L; ECOL 4000-4000L, 4020-4020L, 4030-4030L, 4040-4040L, 4050-4050L, 4060-4060L, 4070-4070L; ECOL (FORS) 4310-4310L; ENTO 3140-3140L, 3650-3650L, 3740-3740L, 4000-4000L, 4010-4010L, 4400-4400L; MARS 3450-3450L, 4500; MARS (MIBO) 4620-4620L; MIBO 3500, 4700-4700L; PATH (BTNY) 4200-4200L

Major Electives: 21-23

Choose 7-9 hours from 3000-level or above courses from BIOL, BCMB, BTNY, CBIO, ECOL, ENTO, GENE, MIBO; MARS 3450-3450L, 4110, 4500, 4810; MARS (FORS) 4380-4380L, MARS (MIBO) 4620-4620L; PSYC 4120, 4130, 5750, 5760, 5770, 5850

One course from Philosophy or Religion or a second Fine Art (any level)

Foreign Language (Second and Third Semesters)

Choose one course from CHEM 2212, 2212L; MATH 2210, 2210L; or STAT 2210

General Electives: 13-18

(Refer to College-wide requirements when selecting general electives.)

Upper division (6-11 hours)

Any level (2-12 hours)

Total hours required **120**

Minor in Biology

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Botany

Degree
Bachelor of Science (B.S.)

Contact Person
David Porter
Professor
porter@dogwood.botany.uga.edu
(706)542-1782

Department
Botany
College of Arts and Sciences

Description of the Program

The undergraduate core curriculum in Botany is aimed at giving students a broad understanding of plant biology but with experience in chemistry, physics and mathematics. In addition to courses in botany, the undergraduate major will take core biology courses including biochemistry, genetics and ecology. Advanced courses are typically restricted in their enrollment for more interactive learning and typically include laboratory experience as well as lectures. Independent research is an important option available to advanced undergraduates. Directed study in the field or laboratory with a faculty member on a specific research topic gives the student first-hand experience with the actual process of botanical investigation.

Career Opportunities

Careers in Plant Sciences are numerous and diverse. They include research at universities, government laboratories and at biotechnology companies; teaching at the high school, college or university level; management and interpretation as staff biologist with state and federal agencies; and administration and sales with plant and plant product related industries. An undergraduate major in botany also provides a strong background for graduate-level study in botany and other biological sciences.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F. To complete the degree within four years, the student must complete CHEM 1211, 1211L and 1212, 1212L as part of the core curriculum in Areas D or F.

Expectations of Transfer Students

Recommended courses: 1) Botany or general Biology sequence; course content should be very similar to sequences taught at UGA since the introductory course content is prerequisite to the upper division biological sciences courses taught at UGA. Sequences should be completed at one institution; 2) General Chemistry; 3) Calculus.

The courses in biology and chemistry are prerequisite to upper division biology courses. Students who transfer to UGA without these courses will be delayed in completing the requirements for the major.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CHEM 1211, 1211L, 1212, 1212L; MATH 2200, 2200L (take under general electives if not taken in Area D.)	
Area F:	18
Choose one sequence from BIOL 1107-1107L, 1108-1108L or BTNY 1210-1210L, 1220-1220L; PHYS 1111-1111L, 1112-1112L	
2-3 additional hours with approval of advisor	
Major Requirements:	31-32
BCMB(BIOL)(CHEM) 3100; BTNY 3830-3830L, 4230-4230L, 4650-4650L; CBIO(BIOL) 3400; ECOL(BIOL) 3500-3500L; GENE(BIOL) 3200, 4600; PATH(BTNY) 4200-4200L or CBIO (BTNY) 4600-4600L	
Major Electives:	24
CHEM 2211, 2211L	
3rd semester of a foreign language	
2nd semester of literature	
Choose 14 hours from the following:	
CHEM 2212, 2212L; STAT 4210, 4220; MATH 2210, 2210L	
4th semester of foreign language	
General Electives:	4-5
(Refer to College-wide requirements when selecting general electives.)	
Upper division (0-2 hours)	
Any level (2-5 hours)	
Total hours required	**120**

Minor in Botany

Broadcast News

Degree
Bachelor of Arts in Journalism (A.B.J.)

Contact Person
Dr. Alison Alexander
Department Head
alison@arches.uga.edu
(706)542-3785

Department
Telecommunications
College of Journalism and Mass Communication

Description of the Program

This program is designed to train students in the skills necessary for on-air opportunities in gathering, analyzing, and delivering the news in radio and television. The major provides students with professional courses of study in both the theory and practice of Broadcasting.

Career Opportunities

Career choices for students with this major include traditional broadcasting opportunities in radio and television.

Expectations of Transfer Students

The academic program for the A.B.J. degree consists of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional degree program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

It should be understood that admission to the University of Georgia does not guarantee admission to the College of Journalism and Mass Communication. Admission is competitive and all seven journalism and mass communication majors are designated as restricted. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and other resources. In reaching its decisions on how many students may be admitted each semester, the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are considered the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201, College of Journalism and Mass Communication.

The deadline is 4:00 p.m. on Friday of the second full week of classes.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.50, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (includes one hour of PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 30 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Broadcast News major.

A grade of C or higher must be earned in any journalism and mass communication course, or any prerequisite to a course which counts toward satisfaction of requirements for the A.B.J. degree.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred courses in Area E: ANTH 1102 or GEOG 1125-1125D	
Area F:	18
Foreign language sequence through the third semester	
ECON 2105 or 2106	
Choose nine hours of 1000/2000-level courses from the following: ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT	
Major Requirements	30
JRLC 5040; TELE 3010, 3210, 3310, 3410	
News	
TELE 5560, 5570-5570L, 5580-5580L, 5590-5590L	
*Choose three hours from the following: JOUR 5410; JRLC 5080, 5210; TELE 4450, 5010	
*It is strongly suggested that courses be chosen from the areas shown; however, any course offered in the College of Journalism and Mass Communication may be included if prerequisites have been met.	
Major Electives:	15
Choose fifteen hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and any other courses that are developmental, preparatory, or remedial in nature or do not earn graduation credit to complement the broadcast news major.	
General Electives:	15
Choose fifteen hours of courses at any level in any discipline other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, preparatory, or remedial in nature or do not earn graduation credit.	
Total hours required	**120**

Fees

Some courses require the purchase of a supply card from the University bookstore.

Scholarships

The College administers about 25 undergraduate scholarships. Students may submit a general application during the spring semester that assures them of consideration for any of the scholarships for which they qualify for the coming academic year.

Internships

Valuable practical experience is gained by serving internships. Although not required, internships are considered essential to a student's total educational experience and greatly enhance job opportunities upon graduation. Credit hours may be earned

or successful completion of an internship if:

. Advance approval is received from the student's department. A written request must be submitted and include a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.

. Certain basic courses as determined by the department have been completed.

. The internship covers a minimum number of weeks of employment as determined by the department.

. During the semester of the internship the student registers concurrently for TELE 5010, which is included in the maximum semester hours of journalism and mass communication credit that may be earned toward the Broadcast News major.

. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.

. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Business Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Wanda Stitt-Gohdes
Undergraduate Coordinator
wlsg@arches.uga.edu
(706)542-4078

Department
Occupational Studies
College of Education

Description of the Program

A major in business education prepares educators for grades 7-12 in Georgia. The curriculum provides the opportunity for students to take courses in accounting, economics, and legal studies in the Terry College of Business. A series of business education and professional education courses are taken in the College of Education.

Career Opportunities

Students are prepared as teachers for grades 7-12 and post-secondary technical institutes. This educational experience also provides an excellent background for those who may choose to move into the corporate training and development arena.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F with grades of C or better in Area F, a passing score on Praxis I, and an overall GPA of 2.0 (2.5 is required for admission to teacher education).

Expectations of Transfer Students

Recommended courses for transfer students include accounting, business law, precalculus, economics, and psychology. Courses and/or competence in keyboarding is also required for upper level courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area E: ECON 2105, 2106, and PSYC 1101 (minimum grade of C)	
Area F:	18
ACCT 2101 (minimum grade of C), 2102 (minimum grade of C); EFND 2030; EPSY 2020; LEGL 2700 (minimum grade of C); three hours of an elective	
Major Requirements:	49
(Minimum grade of C)	
EBUS 4010, 4020, 5030, 5070, 5090, 5100, 5460 (9 hours), EBUS 5760 or HACE 3200; EOCS 2450 (1 hour), 3010, 3450 (1 hour), 4010, 4350, 4360, 5030, 5550	
Major Electives:	6
Choose two courses from the following and/or other courses related to major and approved by advisor: EBUS 5060; ETES 5010	
General Electives:	5
Any level	
Total hours required	**120**

Special Requirements

A 2.5 GPA is required for admission to teacher education.

Internships

Supervised observations and participation in cooperating schools is required for all students. Full-time student teaching is required for certification.

Cellular Biology

Degree
Bachelor of Science (B. S.)

Contact Person
John S. Willis
Professor
jswillis@cb.uga.edu
(706)542-3310

Department
Cellular Biology
College of Arts and Sciences

Description of the Program

The Bachelor of Science degree in Cellular Biology is a liberal arts degree. Although it is not a preprofessional program, the major in Cellular Biology is often chosen by students who wish to prepare themselves for professional studies in medicine, veterinary medicine, dentistry, or optometry, as well as by those who intend to pursue graduate studies leading to an M.S. or Ph.D.

Cellular Biology is a young discipline in biological sciences and encompasses many of the recent dramatic discoveries relating to the mechanisms of cell life, developmental biology, and immunology. In addition, cellular biology relates to the understanding of the position of protists among living organisms, the relationships between parasites and host animals, and the mechanistic understanding of organismic animal function. Accordingly, the major requires a core of cell and developmental biology, genetics, biochemistry, and practical laboratory experience; beyond this core, electives are available that explore the wider aspects of the subject.

Career Opportunities

Apart from the professional programs listed above, a major in cellular biology qualifies a student to pursue a research career in experimental biology either in graduate school or in industry (see Biology).

Entrance Requirements and Expectations of Transfer Students

Entry to the major requires completion of Core Areas A-E and Area F, including BIOL 1107-1107L, BIOL 1108-1108 for science majors; CHEM 1211, 1212; CHEM 2211, 2211L; CHEM 2212, 2212L; PHYS 1111-1111L; PHYS 1112-1112L.

Special Requirements

Students must maintain a minimum GPA of 2.0 and a minimum grade of C in all major courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L and MATH 2200, 2200L (take under general electives if not taken in Area D)

Chemistry

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. Robert A. Scott
Department Head
(706)542-2726

Department
Chemistry
College of Arts and Sciences

Description of the Program

This program is designed for the student who intends to major in chemistry but may wish to pursue a career in some other science-related

field, including the health sciences, business, and the legal profession. It is often chosen by students who intend to pursue postgraduate studies in medicine, dentistry, or veterinary medicine. The curriculum for this degree consists of a selection of chemistry courses and supporting courses in other areas of physical and biological sciences as well as mathematics. This program is intended to provide the student with a broad background in chemistry and related disciplines.

Career Opportunities

Students who successfully complete this curriculum will possess a broad background in chemistry and related sciences with sufficient depth of knowledge to pursue a wide variety of career options, ranging from employment as chemists in government or industrial laboratories to enrollment in a wide variety of post graduate degree programs, including those offered by professional schools of medicine, dentistry, and law.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

To transfer into chemistry without delay, students must already have credit in two semesters of freshman chemistry, two semesters of organic chemistry, one semester of quantitative analysis, one semester of calculus, and two semesters of non-calculus based physics.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E: See Core Curriculum *Required courses in Area A*: ENGL 1101, 1102, and MATH 1113 *Preferred courses in Area D*: MATH 2200, 2200L; choose two of the following lab science courses: CHEM 1211, 1211L; BIOL 1107-1107L or 1108-1108L (take under general electives if not taken in Area D)	42
Area F: CHEM 1212, 1212L; PHYS 1111-1111L, 1112-1112L Choose two courses from CHEM 2211, 2211L; 2212, 2212L; 2300, 2300L	18
Major Requirements: BCMB(BIOL)(CHEM) 3100; CHEM 3300, 3400, 3511-3511L, 4500 Three other 3-hour upper division chemistry courses	24
Major Electives: Choose one course from the following (not taken in Area F): CHEM 2211, 2211L; 2212, 2212L; 2300, 2300L	4

This program is designed for the student who intends to become a professional chemist. The curriculum for this degree consists of a selection of rigorous chemistry courses as well as supporting courses in related areas of physical science and mathematics. This curriculum meets the standards set for certification by the American Chemical Society.

Career Opportunities

All students who satisfactorily complete this curriculum are certified by the Department of Chemistry to the American Chemical Society as having completed the undergraduate training recommended by the A.C.S. The curriculum for this degree offers training in the field of chemistry and its allied sciences for students who desire to enter commercial or government laboratories or the teaching profession, to become associated with chemical industries in a non-technical position, or to pursue graduate work in chemistry in order to enter some field of research or college teaching.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and a GPA of 2.5 or higher.

Expectations of Transfer Students

To transfer into chemistry without delay, students must already have credit in two semesters of freshman chemistry, two semesters of organic chemistry, one semester of quantitative analysis, two semesters of calculus, and two semesters of

calculus-based physics. No transfer students will be accepted as candidates for this degree later than the beginning of their junior year. Students wishing to obtain this degree should enter the University no later than the beginning of their sophomore year. For further information, contact the head of the Department of Chemistry.

Special Requirements

An average GPA of 2.5 or higher is required in chemistry and in other academic subjects in both lower and upper division programs.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CHEM 1211, 1211L; MATH 2200, 2200L; and choose one course from BIOL 1107-1107L or 1108-1108L (take under general electives if not taken in Area D)	
Area F:	18
CHEM 1212, 1212L; MATH 2210, 2210L; PHYS 1211-1211L, 1212-1212L	
Choose one course from CHEM 2211, 2211L; 2212, 2212L; 2300, 2300L	
Major Requirements:	28
CHEM 3211, 3212, 3300, 3400, 3511-3511L, 3512-3512L, 3600 or 4600, 4500	
Choose one course from CHEM 4100, 4200, 4300, 4400	
Major Electives:	8
Choose two courses from CHEM 2211, 2211L; 2212, 2212L; 2300, 2300L	
General Electives:	24
(Refer to College-wide requirements when selecting general electives.)	
Upper division (11 hours)	
Any level (13 hours)	
Total hours required	**120**

Child and Family Development

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Diane Hodson
Undergraduate Advisor
hodson@fcs.uga.edu
(706)542-4896.

Department
Child and Family Development
College of Family and Consumer Sciences

Description of the Program

This program is designed for students who want a broad background in the area of children and families across the life span. In addition to major courses, students enrolled in this program are required to take an approved secondary area or minor. All approved minors are acceptable. Students pursuing this program may enroll in an internship program providing they meet certain criteria. Those who wish to attend graduate school are encouraged to take courses in research methods, statistics, and computer sciences.

Career Opportunities

This major prepares professionals for jobs requiring a general understanding of the behavior of individuals and families across the life span.

Entrance Requirements

A student must have completed Core Areas A-E and Area F and must be in good standing at UGA with a 2.3 minimum overall GPA to enter the program.

Expectations of Transfer Students

Students transferring into this major should have fulfilled the core curriculum requirements. Those students who have an interest in Child and Family Development should check with the Department of Child and Family Development to determine the actual requirements for entry into these programs. Lacking the basic preparatory courses will add to the time needed to complete the degree in all programs.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: SPCM 1100 or PHIL 2500	

Preferred courses in Area D: BIOL 1103-1103L, 1104-1104L, and MATH 1060 or PHYS 1010 or STAT 2000
Preferred courses in Area E: PSYC 1101 and SOCI 1101 or ANTH 1102
Area F: 18
CHFD 2100, 2950-2950L; CSCI 1100-1100L; FDNS 2100; HACE 2100; three hours of foreign language, speech, or social science
Major Requirements: 43
CHFD 2000, 3110 (3 hours), 3700, 3710, 3920; FDNS 4050; HACE 3100, 3200; TXMI 3550
Choose 9 hours from CHFD 3900, 3930, 4080, 4120, 4130, 4330, 4620, 4700, 4810, 4860, 4870, 5100, 5110, 5120, 5130, 5140, 5160L; CHFD(HACE) 4500; CHFD(SOCI) 4610
Choose 9 hours with the agreement of the advisor which represents a cohesive focus in an area related to Child and Family Development (suggested areas include EFND, EPSY, SOCI (2000-level or above), SOWK, SPED, any 2000-level PSYC course, any education course).
General Electives: 17

Department
Child and Family Development
College of Family and Consumer Sciences

Description of the Program

Graduates with this major (a joint program with the College of Education) are qualified for certification to teach children in preschool through fifth (P-5 certification) grade settings in public and private schools.

Career Opportunities

This program prepares certified teachers for prekindergarten through grade five.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F, completion of Area F and pre-professional courses with a grade of C or better, a passing score on Praxis I, an overall and cumulative GPA of 2.75, documentation of 50 hours of pre-professional experience, submission of a pre-professional portfolio, and less than 12 hours of course work remaining outside of block courses.

Expectations of Transfer Students

Students transferring into this major should have fulfilled the core curriculum requirements. Those students who have an interest in Early Childhood Education should check with the Department of Child and Family Development to determine the actual requirements for entry into this program. Lacking the basic preparatory courses will add to the time needed to complete the degree.

Special Requirements

Students must meet state teacher certification requirements.

Program Requirements

Semester Core Curriculum **Hours**
Area A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1101
Preferred course in Area E: PSYC 1101
Area F: 18
CHFD 2950-2950L*; EFND 2030*; HPRB 2420 or CHFD 2100*; PEDS 2420 or SPED 2000*; three hours in a foreign language*; three hours in a foreign language (second course in same language)* or MATH course*
*Requirement for certification, for entry into professional sequence (blocks), or prerequisite for other coursework. If not included in Area F, must be included elsewhere in program of study.
Major Requirements: 60
Block I: (Field Experience: One full day per week in Pre-Kindgergarten)
CHFD 2000, 4860, 5130; EDEC(CHFD) 4010L; EMAT 3400; SPED(EDEC) 5100
Block II: (Field Experience: Two days (five hours each day) per week in Grades 1-3 or 4-5

EDEC(CHFD) 4020, 4020L; ELAN 3110; EMAT 3410; ESOC 3420 (3 hours); READ 3420

Block III: (Field Experience: Two full days per week for fourteen weeks plus one full week in Grades 1-3 or 4-5)
CHFD(EDEC) 5150; EDEC(CHFD) 4030, 4030L; ELAN 4120; ESCI 4420; READ 3430

Block IV: (Field Experience: Four and one-half days per week in Pre-Kindergarten - Grade 2; one-half day per week on campus)
EDEC(CHFD) 5460 (15 hours)

Total hours required **120**

Classical Culture

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Sarah Spence
Undergraduate Coordinator
sspence@arches.uga.edu
(706)542-0417

Department
Classics
College of Arts and Sciences

Description of the Program

This program provides students with an opportunity to pursue studies in Greek and Roman literature, history, archaeology, art, philosophy, and religion, without concentrating on the ancient languages, although some study in Latin and/or Greek is strongly encouraged.

Archaeology Concentration

The Classics Department offers a concentration in archaeology under the classical culture major. Students may contact the department for details. This program provides students with an opportunity to study the archaeology, languages, art and history of the Greeks and Romans; the program also offers students archaeological field experience on a classical site.

Career Opportunities

Career opportunities for graduates include teaching at the secondary level, non-teaching academic positions, museum work, library work, editorial work, positions in the travel and tourist industry, and government positions in foreign service. The major also prepares students to enter graduate school in classics, comparative literature, linguistics, history, and other fields (for university teaching positions). Other opportunities include careers in law, journalism, and business.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Transfer students should have completed courses in world literature, as well as ancient history or classical culture, and preferably some work in Latin and/or Greek.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: CLAS 1000 or 1010 (take under general electives if not taken in Area C)	
Area F:	18
Seven to eight hours of foreign language 1001-1002 and/or 2001 if 1001 has already been satisfied (preferably GREK or LATN; GREK or LATN required for the Archaeology Concentration)	
CLAS 1020 or CLAS (ANTH) 2000 [CLAS (ANTH) 2000 required for the Archaeology Concentration]	
Choose three courses from CLAS (LING) 2010; CMLT 2210; HIST 2301; PHIL 1500	
Major Requirements:	21-24
Foreign language 2001 (if not taken in Area F) and 2002 (preferably GREK or LATN)	
Six 3000/4000-level CLAS courses (For the Archaeology Concentration, the language must be GREK or LATN and the specific CLAS courses must be approved by the department and may include certain courses in ANTH and GEOL.)	
Major Electives:	9-12
Three or four courses 3000-level or above, in any combination, in CLAS, GREK, or LATN, or courses from the following that have a significant component dealing with the ancient Greco-Roman world: ARHI 3000, 4000, 4010, 4020, 4030; HIST(CLAS) 3310, 3321, 4311, 4312, 4321, 4322; LING 4210; PHIL 4000, 4010; and other courses approved by the Classics Undergraduate Coordinator, or up to 6 hours of 1000- or 2000-level Greek or Latin (when NOT used to satisfy the major's or the College's foreign language requirement). For the Archaeology Concentration, one of these three courses must be 3000/4000-level GREK or LATN, and the other two	

courses must be specifically approved by the department.

General Electives:	27
(Refer to College-wide requirements when selecting general electives.)	
Upper division (12-18 hours)	
Any level (9-15 hours)	
Total hours required	**120**

Scholarship

The Warlick-Mannion Scholarship (up to $1,000 per year) is available to students in this major.

Minor in Classical Culture

College of Family and Consumer Sciences

AREA OF EMPHASIS: TEXTILE AND APPAREL MANAGEMENT

Description of the Program

Courses in textiles and apparel offered in the department are combined in a program of study with courses in the Terry College of Business and the College of Journalism and Mass Communication to provide the student with a dynamic undergraduate program. The program provides students with problem-solving tools needed in today's management environment. A focus of the program is international aspects of textiles and apparel.

Career Opportunities

National and international firms and businesses dealing with production, distribution, quality control, and purchasing of textile and apparel products, materials and auxiliaries employ students with management competencies. Segments of the textile and apparel industry employ graduates with training in advertising, public relations, sales, human resource management and international business. Internships are available for qualified students. Salaries for graduates average $30,000.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

Students transferring into the Clothing and Textiles major with a specialization in Textile and Apparel Management should have fulfilled the core curriculum requirements, including elementary chemistry, economics, psychology, sociology, mathematics, accounting, introduction to computer science, social sciences, English, literature, and speech.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Total hours required	**120**

AREA OF EMPHASIS: TEXTILE SCIENCE

Description of the Program

Textile Sciences in the Department of Textiles, Merchandising, and Interiors in the College of Family and Consumer Sciences offers programs for students interested in practical applications of science in textile processing, dyeing and finishing, polymers and fibers, testing and analysis and environmental processes. Laboratory work is an important dimension of this program and students gain "hands on" experiences in dyeing, finishing, textile testing, fiber and fabric analysis, and microscopy labs.

Career Opportunities

Exciting and well-paying careers are available in research, development, quality analysis, and product testing in textile, chemical and auxiliary industries, and government and private laboratories.

Internship programs are available for qualified, interested students.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

A student transferring into the Textile Science program in the Clothing and Textiles major should have a strong interest in chemistry and mathematics. Students will be required to have taken or to take core curriculum courses in mathematics (MATH 2200, 2200L, 2210, 2210L), psychology, economics, speech communication, elementary chemistry (CHEM 1211, 1211L, 1212, 1212L) and social science.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred course in Area C: SPCM 1100	
Preferred courses in Area D: CHEM 1211, 1211L, 1212, 1212L, and MATH 2200, 2200L	
Preferred courses in Area E: ECON 2105 or 2106 and PSYC 1101	
Area F:	18
CHEM 2211, 2211L, 2212, 2212L; CHFD 2100 or HACE 2100; CSCI 1100-1100L or MGMT 2090; MATH 2210, 2210L	
Major Requirements:	46
CHEM 3211 or MATH 2700; CHEM 2300, 2300L; PHYS 1111-1111L or 1211-1211L; STAT 2210; TXMI 2000, 3500, 3500L, 3520, 3550, 3570, 4100, 4110, 4140; and three of the following: TXMI 4120, 4130, 4150, 4520	
General Electives:	14
Upper division (8 hours)	
Any level (6 hours)	
Total hours required	**120**

Minor in Textile Science

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Cognitive Science

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Paula J. Schwanenflugel
Professor of Educational Psychology and Coordinator of the Cognitive Science Program
pschwane@coe.uga.edu
(706)542-4273

Department
Artificial Intelligence Program
College of Arts and Sciences

Description of the Program

Cognitive science is an emerging new science of mind and intelligent processes in humans, animals, computers, and in the abstract. The field spans a wide variety of standard disciplines including psychology, computer science, anthropology, linguistics, biology, and education. Cognitive science is expected to play a large role in the development of the technologies, training, and intervention programs of the twenty-first century. The curriculum of this interdisciplinary major includes courses in major areas including artificial intelligence, psychological foundations, language and cultural foundations, and philosophical foundations.

Career Opportunities

A cognitive science major is preferable preparation for students who plan to go on to graduate programs in cognitive science, educational technology, artificial intelligence, instructional psychology, cognitive psychology, cognitive philosophy, or cognitive neuroscience. Cognitive science A.B. holders typically find themselves employed in technology-related positions demanding excellent technical, writing, and speaking skills.

Entrance Requirements and Expectations of Transfer Students

Entry to the major requires completion of Core Areas A-E and Area F and a cumulative GPA of 2.5.

Special Requirements

A GPA of 2.5 or better is required; 18 hours of the 24 required hours must be taken in residence.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101 or 1113 (if 1101 is exempted)	
Preferred course in Area C: LING 2100 and PHIL 1000	

Preferred courses in Area D: CSCI 1210 and BIOL 1103-1103L

Communication Sciences and Disorders

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Jane Harvey
Academic Professional and Undergraduate Student Advisor
Jharvey@arches.uga.edu
(706)542-4561

Department
Communication Sciences and Disorders
College of Education

Description of the Program

The CMSD department in the School of Professional Studies offers an undergraduate program leading to a Bachelor of Science in Education degree (B.S.Ed.). Students desiring to practice in the areas of speech-language pathology, audiology, or education of the hearing impaired and to obtain full professional credentials and certification from the Georgia Professional Standards Commission, must obtain a master's degree from an accredited program. Students must apply to the Graduate School for acceptance into a master's program.

Career Opportunities

The master's degree is the entry-level degree for the practice of Speech-Language Pathology and Audiology in hospitals, rehabilitation settings, public schools, etc. The University of Georgia Department of Communication Sciences and Disorders and the College of Education do not endorse individuals for public school certification upon completion of the bachelor's degree in CMSD. Completion of a bachelor's degree does not guarantee acceptance into a master's degree program. These conditions apply to all individuals intending to specialize in any of the three emphasis areas offered at the graduate level: audiology, education of the hearing impaired, and speech-language pathology.

Entrance Requirements and Expectations of Transfer Students

Entry to the major requires completion of Core Areas A-E and Area F, an overall GPA of 2.75, and submission of a departmental application. Students must maintain a cumulative GPA of 2.75.

Program Requirements

Semester Core Curriculum **Hours**

Comparative Literature

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Katarzyna Jerzak
Undergraduate Coordinator
kejerzak@arches.uga.edu
(706)542-2148

Department
Comparative Literature
College of Arts and Sciences

Description of the Program

Comparative Literature is the study of common features in the literatures of more than one culture. It can focus on a genre, a period or a theme, or it can focus very broadly on the materials of literature itself—structure, rhetoric or language. With such a broad focus, Comparative Literature defines itself in terms of theory and method. Students can use a Comparative Literature background in a variety of ways. Generally speaking, anyone who is professionally interested in the interpretation of the written or spoken word—whether lawyer, businessperson, writer or humanities professor—can profit from the theory and methods of comparative literature.

Career Opportunities

Opportunities for graduates include graduate study, education, foreign service, and international business.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

The prerequisites to early courses in the major are stated in the Area F requirements for the major.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: At least one 2000-level CMLT course and other courses in ARHI or ARTS, CMLT, DRAM, MUSI, PHIL, or RELI	
Area F:	18
Foreign language through the second semester; two 2000-level CMLT literature courses (three hours may be satisfied under Area C); 1000/2000-level electives from AFAM, ARAB, ARGD, ARHI, ARID, ARST, ARTS, CHNS, CLAS, DRAM, ENGL, FREN, GREK, GRMN, HIST, ITAL, JPNS, KREN, LATN, LING, MUSI, PHIL, PORT, RELI, ROML, RUSS, SPAN, SWAH, WMST, YORB	
Major Requirements:	30
CMLT 4010, 4020	
Choose one of the following options:	
Option I:	
Seven additional CMLT courses at the 3000/4000-levels, no more than three of which may be taken at the 3000 level.	
Option II:	
a. Three additional CMLT courses at the 3000/4000 levels, no more than one of which may be taken at the 3000 level.	
b. Two 3-hour courses in a national literature other than English at the 3000/4000 level (read in the original language): FREN 3030, 4050, 4060, 4070, 4080, 4120; ITAL 4050, 4060, 4070, 4120; JPNS 4500; PORT 3010, 4010; RUSS 4260, 4270; SPAN 3030, 4040, 4050, 4060, 4070, 4080, 4120	
c. Two additional courses from the list above or two additional 3000/4000-level CMLT courses or two 3000/4000-level ENGL courses.	
Major Electives:	6
Foreign language through third and fourth semesters	
General Electives:	27
Upper division (12 hours)	
Any level (15 hours)	
Total hours required	**120**

Minors in Comparative Literature, Chinese Language and Literature, and Japanese Language and Literature

Computer Science

Degree
Bachelor of Science (B.S.)

Contact Person
J. Rodney Canfield
Department Head
(706) 542-2911

Department
Computer Science
College of Arts and Sciences

Description of the Program

Computer science deals with the logical and mathematical foundations of computing and how to implement problem solutions as programs in a computer language. The computer science curriculum covers the design principles of key computing technologies such as hardware, operating systems, database systems, networks, graphics, and artificial intelligence. Mathematical reasoning is emphasized throughout the program.

Career Opportunities

Computer science continues to be one of the fastest growing career fields in the nation. There are critical demands for technically trained persons to provide technical support for computer operations, and to develop new computer hardware and software systems. Recent graduates of the University of Georgia Computer Science Department are employed by major computer manufacturers, software development corporations, the communications industry, consulting firms, and a host of other areas. Still other graduates have continued their education in Computer Science at excellent graduate schools.

Entrance Requirements and Expectations of Transfer Students

In order to be classified as a major in the Department of Computer Science and eligible to take major level courses, a student must have completed Core Areas A-E and Area F, must have made a grade of B or better in the prerequisite course CSCI 1301-1301L, and must have made a grade of B or better in each of two gateway courses, CSCI 1302 and CSCI(MATH) 2610.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CSCI 1301-1301L and MATH 2200, 2200L (take under general electives if not taken in Area D)	
Area F:	18
MATH 2210, 2210L; CSCI 1302, 2670, 2720; two hours of CSCI or MATH course from Area D	
Major Requirements:	12
CSCI 4720	
Applications Design Group	
CSCI 4050 or 4370	
Systems Design Group	
CSCI 4570 or 4730	
Major Electives:	18
Choose 18 hours from CSCI 4140, 4210, 4350, 4470, 4490, 4500, 4520, 4760, 4810, 4900, 4950; CSCI(ARTI) 4540; CSCI (PHIL) 4550; MATH (CSCI) 4630, 4670, 4690; at most one additional 3000/4000-level MATH course (except MATH 4850)	
General Electives:	30
(Refer to College-wide requirements when selecting general electives)	
Upper division (9 hours)	
Any level (21 hours)	
Total hours required	**120**

Minor in Computer Science

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Consumer Economics

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Anne Sweaney
Professor and Undergraduate Coordinator
asweaney@fcs.uga.edu
(706) 542-4877

Department
Housing and Consumer Economics
College of Family and Consumer Sciences

Description of the Program

This program provides preparation to deal with the management of resources from the household to the corporate level, with emphasis on the analysis of consumer issues and related policy questions. Students may obtain an emphasis in family financial management. The program provides preparation for graduate study, or it may be used as a pre-professional degree for areas such as law or business. The major allows the student to design a course of study best suited to his or her particular career goals and interests.

Career Opportunities

Students are often employed as middle managers

in business, public administration, consumer groups, family advocacy agencies, with public utilities and extension services. Additional career opportunities involve responsibilities in consumer affairs, marketing, financial counseling and media information. An emphasis in family financial management may lead to careers in consumer credit, counseling agencies, financial service firms, or social service agencies.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.0.

Expectations of Transfer Students

Students transferring into the Consumer Economics major should have fulfilled the core curriculum requirements, including social science, humanities, and English. Students should have also completed micro and macroeconomics, introductory statistics, computer science and precalculus mathematics or logic.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: SPCM 1100	
Preferred courses in Area E: ECON 2100, 2105, and 2106	
Area F:	18
ECON 2105, 2106; HACE 2100; MATH 1113; STAT 2000; one course from ACCT 2101, 2102 (required for Family Financial Management Emphasis); CHFD 2100; CSCI 1301-1301L; FDNS 2100; LEGL 2700; MATH 2200, 2200L, 2210, 2210L; PSYC 1101; SOCI 1101; TXMI 2100	
Major Requirements:	40-43
HACE 2000, 3100, 3150, 3200, 3300, 4100, 4200	
Consumer/Family Economic Emphasis:	
HACE 5100, 5150, 5910 (3-6 hours), 12 hours of HACE courses	
Family Financial Management Emphasis:	
FINA 3000; HACE 5200, 5250, 5910 (3 hours); MGMT 2090; MSIT 3000; RMIN 4000	
General Electives:	17-20
Consumer/Family Economics Emphasis	
Any level (17-20 hours)	
Family Financial Management Emphasis	
Upper division (3 hours)	
Any level (17 hours)	
Total hours required	**120**

Consumer Foods

Degree
Bachelor of Science in Family and Consumer Science (B.S.F.C.S.)

Contact Person
Dr. Ruthann Swanson
Assistant Professor
rswanson@fcs.uga.edu
(706)542-4834

Department
Foods and Nutrition
College of Family and Consumer Sciences

Description of the Program

Consumer Foods is directed towards helping consumers select food products that are consistent with their cultural and socioeconomic status and lifestyle preferences. Majors also apply their knowledge about the chemical, physical, and microbiological characteristics of food to the selection, preparation, home processing, storage and serving of safe food to the consumer.

Career Opportunities

Consumer Foods prepares students for careers with food service organizations, the Cooperative Extension Service, and commodity groups; industry, including consumer affairs, test kitchens, and quality control; and research in government, university, and private sector laboratories. A student should confer with his/her advisor to tailor a sequence of supporting courses and electives to meet his/her professional interests.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

It is recommended that students transferring to the Consumer Foods major have courses in English composition, math, elementary statistics, economics, speech communication, and either general chemistry or biology. Foods and nutrition courses taken during the junior year have general chemistry, organic chemistry, and biology as prerequisites.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	

Preferred course in Area C: SPCM 1100 or 1500

Preferred courses in Area D: CHEM 1211, 211L, BIOL 1103-1103L or 1107-1107L, and STAT 2000

Preferred courses in Area E: ANTH 1102 and PSYC 1101

Area F: 18

BIOL 1104-1104L or 1108-1108L; CHEM 1212, 1212L, CHEM 2100, 2100L or 2211, 2211L; CHFD 2100 or HACE 2100; three hours from PSYC 1101; SPCM 1100 or 1500; STAT 2000 or 2210

Major Requirements: 46-50

ADPR 3100; FDNS 2000, 2100, 3100, 3600-3600L, 4600, 4630, 4640, 4650; FDST 3000; HACE 3100; MIBO 2500-2500L or 3500

Equipment Courses

Choose one course from FDNS 3610-3610L; FDST 4080-4080L; HACE 4350

Problem-solving Courses

Choose one of the following: FDNS 4540 and 4050 or 4510; FDNS 4610 and 4620; FDNS 5020 (6 hours); FDST 4090-4090L and 4110-4110L

Communication Courses

Choose one course from EPSY 2020; FDNS 4660; SPCM 1800, 2300, 2510, 2520

Major Electives: 10-14

(0 to 3 hours must be upper division)

Any FDNS or FDST course not taken to meet requirements above

Choose any course from the following, but not taken to fulfull the options under Area F, or major electives: ACCT 1160, 2101, 2102; ADPR 3110, 3120, 3850; BCMB (BIOL)(CHEM) 3100; BIOL 1103-1103L or 1107-1107L; CBIO 2210-2210L or VPHY 3100; CHEM 1211, 1211L, 2212, 2212L; CHFD 2100, 2950-2950L; CHFD 4850 or 4870; ECON 2105, 2106; HACE 2100, 3200, 5100, 5150; HPRB 1190, 1710, 1850, 3020, 4400; LEGL 2700, 4600; PSYC 1101; SPCM 1100 or 1500; STAT 2000 or 2210; STAT 4210

Total hours required **120**

Consumer Journalism

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Teresa Mauldin
Associate Professor
tmauldin@fcs.uga.edu
(706)542-4854

Department
Housing and Consumer Economics
College of Family and Consumer Sciences

Description of the Program

The Consumer Journalism major includes courses from the College of Family and Consumer Sciences and the College of Journalism and Mass Communication. It is designed to prepare graduates for work requiring knowledge from the Family and Consumer Sciences areas enhanced by communication skills.

Students enter a variety of occupations including public relations, magazine writing, newspaper writing, as well as radio and television. The emphasis within an occupation focuses on areas such as consumer economics, consumer foods, merchandising, interiors, housing, or one of the other areas offered in the College.

Career Opportunities

Career opportunities for Consumer Journalism students are endless. Graduates may pursue a career in either concentration or they can combine their concentrations for a more specific career choice. Below are some of the degree combinations and possible careers that can be obtained with them: Consumer Economics/Broadcast News-Consumer Affairs Reporters; Publication Management/Interiors-Editor for home furnishings magazines such as *Southern Living*; Child and Family Development/Public Relations-Community Affairs Director for a Children's Hospital; Fashion Merchandising/Magazine-Retail Buyer; Textiles/newspapers-Textile industry associations; Foods and Nutrition/Telecommunication Arts-Producer for TV shows on nutrition and diet; Housing/newspapers-non-profit housing associations.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 3.0.

Expectations of Transfer Students

Students transferring into the consumer journalism major should have fulfilled the core curriculum requirements, including those under social science, humanities, English, and science. Students should have also completed microeconomics

and a social science class in anthropology, sociology, or psychology.

Criminal Justice

Degree
Bachelor of Arts (A.B.)

Contact Person
Susette M. Talarico, Ph.D.
Director of Criminal Justice Studies
talarico@arches.uga.edu
(706)542-7079

Department
Political Science
College of Arts and Sciences

Description of the Program

Criminal Justice at UGA is an undergraduate program that has been in operation for more than 20 years. The program offers an A.B. in Criminal Justice. Criminal Justice at UGA operates as an interdisciplinary program and draws its courses from cooperating departments. These include Political Science, Psychology, Sociology and other departments in the College of Arts and Sciences. In addition to coordinating this interdisciplinary curriculum, the Criminal Justice Studies Program offers a variety of services and programs for students. These include quarterly newsletters, new major orientation meetings, career seminars and an exchange program with selected universities in England, among others. Additionally, an undergraduate student organization, the Criminal Justice Society, offers several programs for student members.

Career Opportunities

There are a variety of career opportunities for students who study Criminal Justice. These include but are not limited to law enforcement at the local, state or federal level, state or federal probation and parole, corporate security, juvenile services and justice, family services, criminal prosecution or defense, and institutional corrections. Please note that some of these careers may require advanced degrees (e.g., J.D.) in addition to the A.B.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and a GPA of 2.5 or higher. Students with a GPA between 2.3 and 2.5 may apply and receive a faculty review. Applications for the major are due at the mid-point of each semester and are reviewed by a faculty committee for decision.

Expectations of Transfer Students

Potential transfer students should concentrate on core requirements before transferring to UGA and should plan to take most, if not all, major courses at UGA. When applying to transfer, students interested in criminal justice should specify pre-criminal justice/Arts and Sciences on their applications. Criminal Justice at UGA operates on a selective admissions system and transfer students must have a full term in residence at UGA prior to application.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area D: STAT 2000	
Preferred course in Area E: POLS 1101-1101D, PSYC 1101, and SOCI 1101	
Area F:	18
STAT 2000 (if not taken in Area D)	
1000/2000-level courses in ACCT, ECON, HIST, PHIL, POLS, PSYC, SOCI, SPCM, STAT if not taken in Area E	
Three courses in a foreign language (Spanish and Oriental languages are recommended, but students are free to select the specific language.)	

Major Requirements: 33-34
Other social science methodology courses can be substituted with the approval of the JSP director)
POLS 3600; POLS(SOCI) 3700, 5500, 5510, 5520; SOCI 3810
Choose three to five courses from the following (at least two of the following areas must be represented):
Human Behavior, Deviance, and Crime
AFAM(PSYC) 4500; PSYC 3230, 3260, SOCI 2470, 3070, 3820, 3830, 3860
Social Control Institutions
POLS 4740, 4900; PSYC 5850; RELI 4107; SOCI 3140, 3150, 4470
Law and Ethics
HIST 4060; PHIL 2200, 4240; POLS 4700, 4710, 4720, 4730; SOCI 4830
Two courses may be chosen from AFAM(PSYC) 3150, 4550; GEOG 3630, 4630; PHIL 4210; POLS 4560, 4620, 4630, 4640, 4650; PSYC 3300, 3510, 4200, 4230, 4600; SOCI (AFAM) 2020, 2820, 3300, 3310, 4370; SOCI 2420, 2850, 3280, 3320, 3730, 3850, 3950; SPCM 4330, 4510
General Electives: 26-27
(Refer to College-wide requirements when selecting general electives.)
Upper division (5-18 hours)
Any level (8-22 hours)
Total hours required **120**

Internships

All Criminal Justice majors must complete a full semester internship (POLS(SOCI) 5500, 5510, 5520) that consists of work in a criminal justice or related agency and that carries extensive academic requirements. To qualify for this mandatory internship, students must have an overall GPA of 2.2 and a major GPA of 2.5. Also, all prospective interns must sign a waiver of liability form.

Student Exchange Opportunities

As noted earlier, Criminal Justice Studies offers a student exchange program with selected universities in England. UGA Criminal Justice majors may spend one semester or a full academic year at Lancaster or Leicester University in England. Exchange students pay their regular UGA tuition (with all forms of scholarships and student aid except for Work Study applying) and then take courses at one of the two universities specified. Room and board costs in England are comparable to what students pay here at UGA. Exchange students may also intern with a British criminal justice agency.

Minor in Criminal Justice

Contact the program for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Crop Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
William K. Vencill
Associate Professor and Undergraduate Coordinator
wvencill@arches.uga.edu
(706) 542-3117

Department
Crop and Soil Sciences
College of Agricultural and Environmental Sciences

Description of the Program

Crop scientists use plants to produce food and fiber for humans and feed for animals. The program of study includes basic and applied courses that allow students flexibility in preparing for a career in the dynamic field of crop science. Elective courses in genetics, chemistry, computer science, animal sciences, botany, economics, business, engineering, entomology, plant pathology, and other areas are available.

Many courses in the crop science major include laboratories in which students obtain experience related to their course work. A special problems course in crop and soil science awards academic credit for experience in research. Leadership training is provided through the Agronomy Club and other campus activities.

Career Opportunities

Business and Industry: International seed and agricultural chemical companies employ crop scientists as technical, research, marketing, sales, and information specialists. Many crop scientists are also employed by regional and local agricultural firms as production and marketing managers, land use experts, quality control specialists, and information and computer analysts.

Public service: Federal, state, and local agencies employ crop scientists in numerous technical, information, and regulatory agencies such as the Agricultural Extension Service, Natural Resources Conservation Service, Environmental Protection Agency, State Environmental Agencies, Public Health Service, Forest Service, Agricultural Statistics Service, Peace Corps and the Foreign Agriculture Service. Crop scientists also are employed as teachers and researchers in community colleges and universities.

Self-employment: Many crop scientists are self-employed producers of field crops, livestock, fruits, and vegetables. Crop scientists are seed

and agricultural supply dealers, consultants for soil and plant uses, and brokerage and contract agents for agricultural products.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Incoming transfer students must have a minimum 2.3 GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E: See Core Curriculum *Required courses in Area A*: ENGL 1101, 1102, and MATH 1113 *Preferred courses in Area D*: BTNY 1210-1210L; CHEM 1211, 1211L; and STAT 2000	42
Area F: BTNY 1220-1220L; CHEM 1212, 1212L, 2100, 2100L; CRSS 2010-2010L; PHYS 1111-1111L or 1211-1211L	18

Major Electives: Choose 11 hours from ENTO(CRSS) 4250-4250L; CRSS 3270-3270L, 3910, 4040, 4260, 4400	11
General Electives: Any level	21
Total hours required	**120**

Scholarships
Numerous opportunities for financial assistance are available. These include the Georgia Crop Improvement Association scholarship; Georgia Seedsmen's Association Roy C. Jones Scholarship; J. Frank McGill "Up with Peanuts" Scholarship; Agronomy Club Scholarships; Georgia Ag Chem Society Scholarship; Georgia Chapter American Society of Agronomy Scholarship; Georgia Association of Conservation District Supervisor's Scholarship.

Internships
Many Crop Science students obtain valuable training and experience through internships available from industry and public sector. Internships provide practical experience in crop sciences, and students may arrange to receive course credits for internships. Part-time or full-time internships may be arranged with experiment stations, businesses, industries, or government agencies. Scientists in the Department of Crop and Soil Sciences offe work-study opportunities to students to assist ir research.

Minor in Crop Science
Contact the department for requirements or refe to the Bulletin Web site at www.bulletin.uga.edu

Dairy Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Robert S. Lowrey
Professor and Undergraduate Coordinator
rlowrey@arches.uga.edu
(706)542-1852

Department
Animal and Dairy Science
College of Agricultural and Environmental Sciences

Description of the Program
The thriving dairy industry in Georgia is an important segment of the agricultural economy. The modern industry requires personnel trained in business, economics, and management as well as the traditional dairy science courses. Courses of a more basic nature may be emphasized by students who desire careers in science-related fields or who wish to pursue graduate or professional study. This major is highly recommended for persons planning to enter a program of study in veterinary medicine.

Career Opportunities
The curriculum in dairy science prepares the student for a career in dairy farm operation as a manager or owner; in sales of equipment, animal health products or feed; in field services with processing plants, feed manufacturers, breed associations, and marketing agencies; in college research and teaching; as county extension agents, vocational agriculture teachers, or research technicians.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Students should have taken the following courses: BIOL 1107-1107L, 1108-1108L; CHEM 1211, 1211L, 1212, 1212L; Organic Chemistry; MATH 1113.

Special Requirements
Students must have an overall 2.0 GPA in major courses.

Scholarships

Scholarships are available to Dairy Science majors through both the College of Agricultural and Environmental Sciences and the Animal and Dairy Science Department.

Internships

All Dairy Science majors are required to complete an internship as a part of the undergraduate program requirements.

Minor in Dairy Science

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Dance Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Mark Wheeler
Department Head
mwheeler@arches.uga.edu
(706)542-4415

Department Name
Department of Dance
College of Education

Description of the Program

The dance major program is grounded in studio course work in dance technique, with a 28 semester hour requirement in ballet and modern dance and a nine semester hour requirement in jazz, tap, ballroom, improvisation, and world dance forms. Complementing the program's technique component is a range of courses which employ dance as a vehicle for study of the human body, the creative process, musical form, the history of world cultures, psychology, educational theory and practice, and technical design for the stage and for multimedia formats. The curriculum enables dancers to develop technical proficiency and choreographic ability; gain experience in performance, production, and teaching; explore the scientific, philosophical, and historical foundations of dance; consider the relationship of dance to other art forms; experience the power of dance as an educational tool; and encounter dance as a total theatre experience.

An in-depth description of the program is available from the department or at http://www.coe.uga.edu/dance.

Career Opportunities

The dance major program prepares its graduates to pursue careers as performers and choreographers for the concert and theater stage and for film, video and other media; dance educators in schools K-12; teachers in and owners of private studios; arts administrators and advocates; and dance therapists. The program instills in its graduates a resourcefulness which assists them in creating for themselves a means of livelihood in the economically challenging field of dance.

Students wishing to teach dance in Georgia's public and other accredited schools grades K-12 must complete the 120 semester hour degree program along with an additional 9 semester hours of coursework in education and a 9 semester hour student teaching experience. The B.S.Ed. program in dance, along with the 18 semester hours noted above, fulfill all requirements within certification guidelines established by the Department of Education for the State of Georgia. Students from outside Georgia who wish to teach in the schools of their home states find that certification requirements vary little from state to state.

Entrance Requirements and Expectations of Transfer Students

Incoming freshmen and transfer students are required to audition for admission to the dance major program. Interested dancers may contact the Department of Dance at (706) 542-4415 for information on annual auditions occurring in November and January. The audition process is separate from students' admissions applications to the Office of Admissions.

To transfer to the dance degree program from another institution or from another UGA degree program, a student must have completed Core Areas A-E and Area F and possess a GPA of 2.3. Due to the technical performance demands of the program and to the rotation of required course work, some junior transfers should expect to spend three years studying in the dance major program. Highly proficient dancers transferring with credit for required studio and theory courses from other college/university dance programs might be able to fulfill all degree requirements two years after transferring.

Total hours required	**120**

Scholarships

Dance majors audition for Lucy Lampkin Dance Scholarships and for the FRIENDS OF DANCE Senior Scholarship to assist with tuition and other school expenses. The Young Choreographer's Series Scholarship, awarded to dance majors distinguishing themselves in YCS productions, and the Cynthia Jarvis Memorial Scholarship for Summer Study in Dance assist students with costs associated with study in accredited summer dance study programs around the world.

Internships

Students working to complete State of Georgia requirements for school certification in dance fill one-semester-hour teaching internships and nine-semester-hour student teaching internships in public and private schools K-12 throughout the state.

Minor in Dance Education

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Dietetics

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Joan Fischer
Assistant Professor
jfischer@fcs.uga.edu
(706)542-7983

Department
Foods and Nutrition
College of Family and Consumer Sciences

Description of the Program

Optimum food and nutrient intake plays a critical role in disease prevention and health maintenance. There is an increasing demand for professionals in the field of dietetics who can provide quality food and nutrition care services to individuals and groups. The mission of the Didactic Program in Dietetics is to prepare students for successful careers in dietetics and encourage students to assume leadership roles in their profession and in society. The dietetics major is a Didactic Program in Dietetics approved by the Commission on Accreditation/ Approval for Dietetics Education (CAADE) of

he American Dietetic Association. Upon completion of the Didactic Program in Dietetics, students must complete a supervised practice program, such as a CAADE-accredited dietetic internship, to become eligible to take the registration examination for dietitians.

Career Opportunities

The field of dietetics offers many opportunities related to foods and nutrition in health care, management, education, business and industry settings. Clinical dietetics positions are available in hospitals, clinics, health maintenance organizations, long-term care facilities, and private practice. Other opportunities include management of food or nutrition care services in health care facilities, schools or restaurants; public health nutrition; research and/or education in universities, medical centers, and government agencies.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E; completion of Area F with grades of C or better; completion of CHEM 1211, 1211L and BIOL 1103-1103L or 1107-1107L with grades of C or better, and an overall GPA of 2.3.

Expectations of Transfer Students

Students who have completed two years of college work and are planning to transfer into this major should be aware of the following requirements: preferred courses taken as part of the core include statistics, psychology, fundamentals of speech communication, biology, and freshman chemistry. Students should complete the equivalent of BIOL 1103-1103L or 1107-1107L and CHEM 1211, 1211L with a grade of C or better. Entrance to the major requires completion of Area F core requirements for the dietetics major with a grade of C or better in each of the courses. *Note:* General chemistry courses should be equivalent to CHEM 1211, 1211L and 1212, 1212L and the organic chemistry course should be equivalent to CHEM 2211, 2211L.

Special Requirements

To receive a B.S.F.C.S. in dietetics, a student must have at least a C grade in CHEM 1211, 1211L, BIOL 1103-1103L, in all Area F courses, and in all major courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred course in Area C: SPCM 1100	
Preferred courses in Area D: CHEM 1211, 1211L, BIOL 1103-1103L or 1107-1107L, and STAT 2000 or 2210	
Preferred courses in Area E: ANTH 1102 and PSYC 1101	
Area F:	18
BIOL 1104-1104L or 1108-1108L; CHFD 2100 or HACE 2100; CHEM 1212, 1212L, 2211, 2211L; MIBO 2500-2500L	
Major Requirements:	49-50
BCMB(BIOL)(CHEM) 3100; CBIO 2200-2200L; CBIO 2210-2210L or VPHY 3100; FDNS 2000, 2100, 3100, 3600-3600L, 3610-3610L, 4100, 4510, 4520, 4530, 4540, 4600, 4610, 4620	
Major Electives:	10-11
Choose 10 to 11 hours from the following (3 hours must be upper division): ACCT 1160; ANTH 4580-4580L; BIOL 1103-1103L or 1107-1107L; CHEM 1211, 1211L, 2212, 2212L; CLAS 1030; EXRS 4300, 4320, 4630-4630L, 4690-4690L; FDNS 3010, 4560, 4580, 4630, 4640, 4650, 4660, 4720, 5030, 5800; FDST 3000, 4040-4040L; FDST (MIBO) 4030-4030L; HPRB 3020, 3150, 3700; MGMT 2090; PSYC 1101; SPCM 1100 or 1500 or 2100 or 2300 or 2510; SPCM 1800, 2310; SPCM (HPRB) 4610; STAT 2000 or 2210. Up to 8 credits of foreign language or PHYS may be counted.	
Total hours required	**120**

Drama

Degree
Bachelor of Arts (A. B.)

Contact Person
Mrs. Sylvia J. H. Pannell
Undergraduate Coordinator
hillyard@arches.uga.edu
(706) 542-2091

Department Name
Drama and Theater
College of Arts and Sciences

Description of the Program

Students majoring in Drama will pursue the A.B. degree which is designed to offer a liberal arts education with an emphasis in drama. After satisfying a basic core of drama courses, the student may concentrate in acting, design, or writing.

Career Opportunities

Graduates with degrees in Drama frequently attend graduate school in a wide range of fields,

including drama and theatre, business, law, telecommunications, and other people-related disciplines. Drama produces students who are well-rounded people with a wide range of abilities, people who are comfortable working as a team, people who can think on their feet, analyze situations thoroughly, communicate effectively, and produce excellent results under pressure. These are precisely the kinds of abilities employers in business and industry look for in an employee.

Entrance Requirements and Expectations of Transfer Students

Entry to the major requires completion of Core Areas A-E and Area F.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: Choose one course from the following: DRAM 2000, 2120, or 2130	
Preferred courses in Area E: PSYC 1101 and either GEOG 1125-1125D or ANTH 1102	
Area F:	18
Two semesters of a foreign language	
A second 1000/2000-level literature course	
A 1000/2000-level fine arts course from ARHI, ARTS, or MUSI	
Choose one 1000/2000-level course each from two of the following areas: HIST; CLAS or CMLT; PHIL or RELI	
Major Requirements:	21
DRAM 2040, 2050, 3200, 3210, 3290, 3300, 3500, 5051, 5053	
Major Electives:	18
Choose six three-hour DRAM courses numbered 3000-level or above	
General Electives:	21
(Refer to College-wide requirements when selecting general electives.)	
Upper division (2 hours)	
Any level (19 hours)

Early Childhood Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Freida Thornton
Senior Academic Advisor
freida@arches.uga.edu
(706)542-4244

Department
Elementary Education
College of Education

Description of the Program

This program provides extensive field experiences and a broad educational background to teach a variety of subjects in the early grades. Students must be admitted to Teacher Education before entering Block II. In order to move from one block to the next, students must complete all block courses with at least a grade of C, and maintain the 2.75 GPA required by Early Childhood for admittance to Teacher Education.

Career Opportunities

Graduates are certified to teach all subjects in grades P-5.

Entrance Requirements

Entrance requirements include the following: completion of Core Areas A-E and Area F, a passing score on Praxis I, completion of Area F and pre-professional courses with grades of C or better, an overall GPA of 2.75, documentation of 50 hours of pre-professional experience, submission of a pre-professional portfolio, and fewer than 12 hours of course work remaining outside of block courses.

Expectations of Transfer Students

Students must transfer into The College of Education as "unspecified." See "Entrance Requirements."

Ecology

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. Frank B. Golley
Professor
fgolley@arches.uga.edu
(706)542-2968

Department
Institute of Ecology
College of Arts and Sciences

Description of the Program

Ecology, the study of organisms and their environment, is an interdisciplinary science. Ecologists work at the interface of basic science fields such as biology, geology, chemistry, and mathematics, and may draw more broadly on subjects such as economics, public policy, environmental law, anthropology, and geography. There is a growing need to understand how organisms and the environment interact and to examine the influence of humans on the earth and its biodiversity.

This degree is designed mainly to prepare undergraduates for advanced graduate studies in ecology or allied applied disciplines leading to a Masters or Doctoral degree. Students planning to finish their studies at the B.S. level should discuss this with an advisor as soon as possible to design an appropriate program of study.

Students may elect to expand their experience through study abroad programs, internships with the Institute of Ecology or other sponsors, or independent research opportunities. These activities are strongly encouraged but are not required for the degree.

Career Opportunities

Many students completing this major will elect to enter graduate programs in Ecology or allied fields. Employment opportunities exist with consultant or environmental businesses that provide environmental services to local communities or industries. We see substantial opportunities in this sector of the economy, and encourage students to include appropriate broadening courses in their curriculum. These include writing and speaking skills as well as experience in conflict resolution.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students should complete the science foundation courses for the major which include a year of general chemistry, mathematics courses through integral calculus, a year of biology and, if possible, organic chemistry. Students with this background will be ready to immediately enroll in major classes.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Economics

Degrees
Bachelor of Arts (A.B.), Bachelor of Business Administration (B.B.A.)

Contact Person
Matthew King
mking@rigel.econ.uga.edu
(706)542-1311

Department
Economics
Terry College of Business

Description of the Program

Economics is the study of resource allocation by individuals, business enterprises, and nations. A social science, it forms the foundation for understanding the various business disciplines. Its study combines analytical, empirical, and historical methods to reveal how an economy functions. This department offers a wide range of courses providing students with both breadth and depth in the subject. Economics gives a valuable preparation for careers in corporate, governmental, and consulting positions within the United States and internationally. It is an excellent major for those planning to attend law school; those contemplating an MBA degree will find that such programs consider economics majors highly desirable applicants. The field also prepares students for work in public administration, international business, and financial analysis.

Career Opportunities

Economics majors find employment in a variety of public and private sector positions. Economics majors are also well-prepared for graduate, law, or business school programs. Those who study economics at the University of Georgia combine a broad general education with training in analytical methods and economic institutions.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major under the B.B.A.degree must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Students intending to pursue this major under the A.B. degree must complete Core Areas A-E and Area F and must take and pass calculus with a D or better.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements (B.B.A.)

Semester Core Curriculum	**Hours**

English

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Rosemary Franklin
(706)542-2258

Department
English
College of Arts and Sciences

Description of the Program

An A.B. in English emphasizes critical thinking, articulate self-expression, and a broad knowledge of English and American Literature, language history and usage, and the critical contexts that help us to interpret our own age as well as others. Although the program encourages breadth and variety, it also offers ample opportunity for intensive study of particular interests, such as linguistics or creative and technical writing.

Career Opportunities

English is an excellent pre-professional major, whether the goal be study in law, medicine, or literature. Graduates also find professions in public relations, management positions, technical writing, publishing, and any career that demands writing, interpretation and solution of problems, and clear analytic thinking.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Freshman Placement Test

All entering freshmen must take the departmental placement test. Performance on this test places a student in ENGL 1101 or 1102. A student placing in 1102 exempts 1101 with 3 hours credit. Exemption of 1101 or a grade of C or better in 1101, and a combined average of C (2.0) in 1101 and 1102, are both required for graduation.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
Choose two courses in the same foreign language	
Choose one course from ENGL 2310, 2320, 2330, 2340, 2400	
Choose one course from CMLT 2210, 2220; ENGL 2310, 2320, 2330, 2340, 2400	
Choose six hours from ARHI 2100; ARTS 2000, 2050; CLAS 1000, 1010, 1020; CLAS (LING) 2010; DRAM 2000;	

HIST 2051, 2052, 2111, 2112, 2301, 2302, 2701, 2702; LING 2100; MUSI 2020, 2080; PHIL 1000, 1500, 2200, 2400; RELI 1001, 1002, 1003, 2004, RELI (AFAM) 2005

Major Requirements: 21

ENGL 3000 (should be completed in the first year of major course work)

English Literature Before 1800

Choose three courses from ENGL 4210, 4220, 4230, 4240, 4290, 4300, 4320, 4330, 4340, 4350, 4360, 4370, 4390, 4400, 4420, 4430, 4440, 4490

British Literature of the 19th and 20th Centuries

Choose one course from ENGL 4500, 4520, 4530, 4590, 4660, 4670, 4680, 4690

American Literature

Choose one course from ENGL(AFAM) 4620, 4630, 4880; ENGL 4700, 4710, 4720, 4730, 4740, 4750, 4760, 4770, 4780, 4790, 4860

Language, Criticism, and Culture

Choose one course from ENGL(LING) 4000, 4010, 4060, 4110, 4170, 4180; ENGL (LING)(AFAM) 4040; ENGL 4190, 4640, 4650, 4800, 4820, 4830, 4850, 4870, 4890

Major Electives: 9

Choose three 3-hour ENGL electives at the 3000/4000 levels (at least one course at the 4000 level)

General Electives: 30

All electives are free unless two 2000-level literature courses or language competency to the fourth semester were not completed in the core. At least three electives must be taken at the 3000/4000-level.

Total hours required **120**

English Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Carol Spurgeon
Undergraduate Advisor
(706)542-4521

Department
Language Education
College of Education

Description of the Program

This program prepares a student for a professional four-year certificate in Georgia for teaching English in grades 7-12. Requirements and prerequisites in the teaching field should be considered in choosing courses in the freshman and sophomore years. All prospective teachers should plan their program with their advisor. To enter the final teacher preparation program, students must have an overall GPA of 2.6. In addition, a 2.6 GPA must be maintained during the teaching program.

If there are more applicants for the Advanced Professional Education Course Sequence (APECS) than can be accommodated, admission will be determined by the date the applicant declared English Education as his or her major. Students who are delayed because of their late date of declaration will have priority for spaces the next time courses are offered.

Career Opportunities

Graduates are certified to teach English in grades 7-12 in the public schools of Georgia.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F; a passing score on Praxis I; an overall GPA of 2.6; submission of a one-page purpose statement; and submission of a resume documenting work experience relevant to a career in education, extracurricular activities, and academic awards and honors.

Special Requirements

Students in this major must maintain a 2.6 overall GPA, maintain a 2.6 teaching field GPA, and complete 6 of 8 teaching field courses before entering APECS.

Program Requirements

Semester Core Curriculum **Hours**

Areas A-E: 42

See Core Curriculum

Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Area F: 18

SPCM 1100 or 1500; EFND 2030; EPSY 2020

One 2000-level ENGL course

One literature course from CLAS 1000, 1010, 1020; CMLT 2111, 2210, 2212, 2220, 2400; ENGL 2310, 2320, 2330, 2340, 2400; ROML 2550

One semester of foreign language (1110 or above preferred)

Major Requirements: 30

ELAN 4400, 4401, 4460, 4462, 4470, 5460 (9 hours); READ 4030; SPED 2000

Major Electives: 24
ELAN 4410
One course from the following Shakespeare or British Literature courses: ENGL 4210, 4220, 4230, 4240, 4290, 4300, 4320, 4330, 4340, 4350, 4360, 4370, 4390, 4400, 4420, 4430, 4440, 4490, 4500, 4520, 4530, 4590, 4660, 4670, 4680, 4690
One course from the following American Literature courses: ENGL(AFAM) 4620, 4630, 4880; ENGL 4700, 4710, 4720, 4730, 4740, 4750, 4760, 4770, 4780, 4790, 4860
One course from the following World Literature courses: CMLT 4600, 4610, 4620, 4880, 4890; ENGL(AFAM) 4620, 4630, 4880; ENGL 4210, 4220, 4230, 4240, 4290, 4300, 4320, 4330, 4340, 4350, 4360, 4370, 4390, 4400, 4420, 4430, 4440, 4490, 4500, 4520, 4530, 4590, 4660, 4670, 4680, 4690, 4700, 4710, 4720, 4730, 4740, 4750, 4760, 4770, 4780, 4790, 4860
One course from the following Language Study courses: ELAN 5730; ENGL 4830; ENGL(LING) 3030, 4000, 4010, 4110; LING(ENGL) 3020
Three courses from the following: AFAM(DRAM) 4490; CMLT 3200, 4050, 4400, 4510, 4600, 4610, 4620, 4880, 4890; DRAM 3020, 4480; LING(ENGL) 3020; any ENGL 3000/4000 level
General Electives: 6
Any level
Total hours required **120**

Entomology

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
John All
Professor
jall@bugs.ent.uga.edu
(706) 542-7589

Department
Entomology
College of Agricultural and Environmental Sciences

Description of the Program

World-wide, insects destroy about one-third of the food and fiber we produce, and they transmit some of the most devastating pathogens of plants and animals. On the other hand, insects pollinate many valuable food and forest crops, significantly increase the productivity of soils, and are important components in most food chains. A graduate in entomology should have a strong background in general biology and an understanding of the scientific method. Students learn to identify insects and other arthropods and study the biology and ecology of pests and beneficial insects in order to manage them efficiently. They should acquire a basic knowledge of agricultural production principles and how insects influence crop production. Students should also become knowledgeable about the effects of abiotic and biotic factors on insect development, population growth, species interactions, physiological requirements, and insect behavior.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Career Opportunities

Career opportunities are available for entomology graduates in industry, extension, consulting, and public research, including university laboratories and experiment stations, state and federal departments of agriculture, and the U.S. Public Health Service. A graduate will also be prepared to enter a program leading to the M.S. and Ph.D. degrees.

Program Requirements

Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1113
Preferred courses in Area D: BIOL 1107-1107L or BTNY 1210-1210L, CHEM 1211, 1211L, and MATH 2200, 2200L
Area F: 18
BIOL 1108-1108L; CHEM 1212, 1212L; CHEM 2100, 2100L or 2211, 2211L
Choose 6 hours from BTNY 1220-1220L; CHEM 2212, 2212L; GEOG 1112, 1112L, 1113, 1113L; GEOL 1121, 1121L, 1122, 1122L; MATH 2200, 2200L, 2210, 2210L; PHYS 1111-1111L, 1112-1112L, 1211-1211L, 1212-1212L; STAT 2000, 2210
Major Requirements: 14-16
ENTO 4000-4000L, 4010-4010L
Choose 3 courses from ENTO 2500-2500L, 3140-3140L, 3650-3650L, 3740-3740L, 3820-3820L, 4400-4400L, 4740-4740L, 4820-4820L, 4960; ENTO(BIOL) 2010; ENTO(CRSS) 4250-4250L; CRSS (ENTO)(PATH) 3500
Major Electives: 29-30
Select 29 to 30 hours in any of the following departments, but not to exceed 9 hours in a single department (with at least 15 hours of upper division course work): ,

College of Arts and Sciences: BCMB, BIOL, BTNY, CBIO, CHEM, CSCI, ECOL, EETH, GENE, GEOG, GEOL, MARS, MATH, MIBO, PHYS, STAT [Preferred courses: BCMB(BIOL) (CHEM) 3100; ECOL(BIOL) 3500-3500L; GENE(BIOL) 3200]
College of Agricultural and Environmental Sciences: AAEC, ADSC, AGCM, CRSS, EAGR, EHSC, ENGR, ENTO, FDST, HORT, PATH, POUL
School of Forest Resources: FORS
School of Environmental Design: EDES, HIPR, LAND
General Electives: 14-17
Upper division (0-16 hours)
Any level (1-14 hours)
Total hours required **120**

Scholarships
Departmental scholarships include the P.W. Fattig Scholarship and the Georgia Entomological Society Scholarship; contact the department for information. College-wide scholarships are also available. For more information, contact the Office of Academic Affairs in the College.

Internships
Internships are available but not required.

Environmental Economics and Management

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Steven C. Turner
Associate Professor and Undergraduate Coordinator
sturner@agecon.uga.edu
(706)542-0852

Department
Agricultural and Applied Economics
College of Agricultural and Environmental Sciences

Description of the Program
The environmental economics and management (EEM) major prepares students for public and private positions in natural and environmental resource analysis and management. EEM majors are trained to understand and appreciate the non-economic aspects of resource and environmental problems, including social, ecologic, physical, and legal considerations. EEM majors can serve effectively as members of interdisciplinary teams involved in resource and environmental management, planning, and analysis. An EEM major is designed for individuals who desire to "make a difference" when it comes to wise, efficient, and productive management of public and private natural and environmental resources.

Career Opportunities
The linkages between economic activity and natural and environmental resources will be a major local, national, and global concern in the coming decades. Natural resource and environmental problems create a demand for individuals who can offer alternative solutions to these problems. Government job opportunities currently include management, planning, and analysis positions with federal, state, and local government agencies. Private company opportunities include similar positions with utility companies, banks, consulting firms, and resource management companies. An EEM major also provides an excellent foundation for work on an advanced degree in natural resource and environmental management. An advanced degree may lead to a teaching, research, or public service career at a college or university, law school, or a position with a private research company.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Program Requirements
Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1113
Preferred courses in Area C: SPCM 1100 or 1500 (take under major electives if not taken in Area C).
Preferred courses in Area D: CHEM 1211, 1211L, BIOL 1107-1107L or BTNY 1210-1210L, and MATH 2200, 2200L (take under general electives if not taken in Area D)
Area F: 18
AAEC 2580 or ECON 2106; STAT 2000; MATH 2110, 2210 or 2210L; 6 to 7 hours of 1000/2000-level electives; excess hour from Area D
Major Requirements: 31
AAEC 3060, 3580-3580L, 3610-3610L, 4650, 4930 or AAEC (EHSC) 4250; CRSS 3050-3050L or CRSS(FORS) 3060-3060L; ECOL(BIOL) 3500-3500L; EHSC 3060; ENGL 3590
Major Electives: 18
Select 18 hours from the following list: AAEC 2020-2020L, 3610-3610L, AAEC 3690 or FINA 3000, AAEC 3910, 4050,

4510, 4710, 4800, 4980; ANTH 4000; CRSS 4340, 4340L, 4400; ECOL 3070; ECON 4150, 4200, 4300, 4400; EETH (AGRI) 4190; EHSC 4150, 4490; ENGR 3050, 3410; FINA 4600; FORS 3300, 4710-4710L, 4800-4800D, 5410, 5850; GEOG 3620, 4630, 4670, 4810; LEGL (REAL) 5200; MGMT 3000, 4000, 4240, 4610, 5220, 5420, 5440, 5580, 5920; MARK 3000; PHIL (EETH) 4220; POLS 4630; REAL 4000, 5080; REAL (FINA) 5100; RLST 4870; RLST (FORS) 5400-5400L; STAT 4210, 4220, or an elective approved by the student's advisor

General Electives: 11

Any level

At least 12 hours of course work must be 4000-level or above.

Total hours required **120**

Scholarships

Several scholarships are available to environmental economics and management majors through the College of Agricultural and Environmental Sciences and the Agricultural and Applied Economics Department. Information about these scholarships can be obtained from Steven Turner (sturner@agecon.uga.edu). For information about college-wide scholarships, contact the Office of Academic Affairs in the College.

Internships

Internships are available, but not required, for students pursuing the environmental economics and management major.

Environmental Health Science

Degree
Bachelor of Science in Environmental Health (B.S.E.H.)

Contact Person
Harold Barnhart
Professor and Interim Department Head
(706) 542-2454

Department
Environmental Health Science
College of Agricultural and Environmental Sciences

Description of the Program

Environmental health scientists are in demand by private industries, consulting firms, governmental agencies, and institutions. A wide range of opportunities for employment exist in corporate environmental and occupational health departments, public health agencies, solid and hazardous waste management, general sanitation engineering, and pollution control. Environmental health scientists are employed in programs of water and air pollution control, industrial hygiene, occupational health and safety, and a variety of other activities by a significant number of agencies and commercial concerns.

The need for environmental health scientists in Georgia is increasing and employment opportunities for academically qualified personnel are increasing proportionately. The demand for trained environmental health scientists, however, is not restricted to the state of Georgia. Due to the limited availability of college training programs for this field, numerous other states rely upon the resources of the University of Georgia for graduates in this subject matter area. Students successfully completing the program of study receive the Bachelor of Science in Environmental Health (B.S.E.H.) degree. Students may pursue their interests in the areas of environmental protection, industrial hygiene, or public health. The degree program is nationally accredited and is the only undergraduate environmental health program in Georgia.

Entrance Requirements and Expectations of Transfer Students

Entrance requirements include completion of Core Areas A-E and Area F and a minimum 2.3 cumulative grade point average. The decision for admission to the EHS program is made by an EHS faculty committee based on the student's qualifications and availability of space and resources.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CHEM 1211, 1211L, BIOL 1107-1107L, STAT 2000 (take under general electives if not taken in Area D)	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L, 2211, 2211L; CBIO 2210-2210L; PHYS 1111-1111L	
Major Requirements:	36
AAEC (EHSC) 4250; CHEM 2212, 2212L; EHSC 2010, 3060, 3800, 3910 (3 hours), 4080, 4150, 4490; MIBO 3500; MMIB 4800; PHYS 1112-1112L; SPCM 1100	
Major Electives:	18
Choose 18 hours from the following with approval of an advisor (at least two courses must be selected from the listed EHSC courses excluding EHSC 3700): BCMB (BIOL) (CHEM) 3100; CHEM	

2300, 2300L; CRSS 3050-3050L or CRSS (FORS) 3060-3060L; ECOL (BIOL) 3500-3500L; ENGR 4480; EHSC 3260, 3700, 4100-4100L, 4350-4350L, 4590-4590L, 4610; FDST(EHSC)(MIBO) 4310-4310L, 4320-4320L; ENTO 3650-3650L; GEOL 4220 or FORS 4110; HPRB 4450; MMIB 4220

General Electives: 6
Any level (6 hours)

Total hours required **120**

Scholarships

Scholarships include the Rowe Award and the John J. Sheuring Scholarship. College-wide scholarships are also available. For more information, contact the Office of Academic Affairs in the College.

Internships, Cooperative Education

All environmental health students are required to complete an internship or co-op as a part of the Undergraduate Program Requirements.

Environmental Soil Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
William K. Vencill
Associate Professor & Undergraduate Coordinator
wvencill@arches.uga.edu
(706) 542-3117

Department
Crop and Soil Sciences
College of Agricultural and Environmental Sciences

Description of the Program

Environmental soil scientists are in demand by governmental agencies, private industry, consulting firms and institutions. Opportunities for employment exist in various specialized programs within public agencies, such as the Environmental Protection Agency and the Natural Resource Conservation Service, in such areas as land disposal of hazardous and other industrial and agricultural wastes, water pollution control, and soil conservation. The need for environmental scientists in Georgia and the nation is increasing rapidly with a proportional increase in employment, promotional, and professional opportunities for academically qualified personnel.

Career Opportunities

Business and industry: International seed and agricultural chemical companies employ environmental soil scientists as technical, research, and information specialists. Regional and local agricultural firms also employ many environmental soil scientists as land use experts, quality control specialists, and information and computer analysts. Environmental consulting firms employ environmental soil scientists to assess environmental conditions, monitor soil and water pollutants, reclaim disturbed lands, and prepare environmental policy.

Public service: Federal, state, and local agencies employ environmental soil scientists in numerous technical, information, and regulatory agencies such as the Agricultural Extension Service, Natural Resources Conservation Service, Environmental Protection Agency, State Environmental Agencies, Public Health Service, Forest Service, Agricultural Statistics Service, Peace Corps and the Foreign Agriculture Service. Environmental soil scientists also are employed as teachers and researchers in community colleges and universities.

Self-employment: Many environmental soil scientists are self-employed as consultants for soil and plant uses, and to assess environmental conditions, monitor soil and water pollutants, reclaim disturbed lands, and prepare environmental policy.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113

Scholarships

Numerous opportunities for financial assistance are available. These include the Georgia Plant Food Educational Society J. Fielding Reed Scholarship; Georgia Association of Conservation District Supervisors Ladies Auxiliary; Agronomy Club Scholarship; Georgia Chapter American Society of Agronomy; Frederick B. Smith Soil Science Scholarship; and Georgia Association of Conservation District Supervisor's Scholarship. Also, college-wide scholarships are available. For more information, contact the Office of Academic Affairs in the College.

Internships

Environmental Soil Science students are required to complete an internship as a degree requirement. Internships provide environmental soil science students with valuable training and experience through industry and the public sector.

Minor in Environmental Soil Science

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Exercise and Sport Science

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Priscilla Carter
Academic Advisor
pcarter@arches.uga.edu
(706) 542-5050

Department
Exercise and Sport Science
College of Education

Description of the Program

The undergraduate major in Exercise and Sport Science is designed to provide students an in-depth exposure to the scientific basis of physical activity, exercise and sport. Knowledge and skills related to exercise and sport biomechanics, physiology, psychology, epidemiology, physical fitness and conditioning, measurement theory, and other associated areas are obtained through prescribed and elective course work, independent study, and laboratory and field experience. All majors take 60 semester hours of liberal arts education (University Core), including science, mathematics, social science, and humanities, and 23 semester hours of exercise science courses (EXRS Core), including exercise physiology, scientific principles of conditioning and fitness, biomechanics, exercise and sport psychology, measurement, and exercise epidemiology. An additional 30 semester hours of elective course work and practical experiences are selected based on the students academic interests and career goals. Recommendations for elective course work are available for the following seven program options: Athletic Training, Fitness Specialist, Pre-Physical Therapy, Pre-Graduate Study in Biomechanics, Pre-Graduate Study in Exercise Physiology, Pre-Graduate Study in Exercise and Sport Psychology, and Pre-Graduate Study in Measurement.

Atheletic Training Program

The Athletic Training program is an emphasis within the Exercise Science major. The Athletic Training program prepares students to pass the NATA Board of Certification examination and to gain employment in a sports medicine setting. The program will develop cognitive and psychomotor skills related to risk management, assessment and evaluation of injuries, acute care, general medical conditions and disabilities, pathology of injury/illness, pharmacological aspects of injury/illness, nutrition, therapeutic exercise, therapeutic modalities, professional development and responsibilities, and health care administration. Student education occurs in course instruction and in a variety of clinical experiences. The student is required to earn a minimum of 800 hours of clinical experience to qualify for the certification examination.

Courses specific to the Athletic Training emphasis are as follows: EXRS 2100, 2130, 3100, 3110, 3470, 4100, 4110, and 4120.

Career Opportunities

The major prepares students for a variety of possible careers in allied health occupations, fitness and sport enterprises, athletic training, education, sport science and coaching, or business and industry. With a B.S.Ed. degree, positions can be obtained as exercise and sport science specialists in various settings (corporation, hospital, sport medicine clinic, YMCA, community recreation, government, military, sport team). Many graduates go on to graduate or professional schools

majoring in sport medicine (physical therapy, athletic training, or other medical specialties) or specialized areas of exercise science (adult fitness and cardiac rehabilitation, exercise physiology, exercise psychology, biomechanics, and measurement). Following advanced study and/or certification, positions may be obtained as physical therapists, athletic trainers, sports medicine physicians, higher-level exercise specialists or directors of cardiac rehabilitation and adult fitness programs in hospital, corporate, YMCA and community settings, and as exercise scientists (teaching and/or research) in higher education, government or industry.

Entrance Requirements and Expectations of Transfer Students

Entrance requirements include completion of Core Areas A-E and Area F; completion of CHEM 1211, 1211L, CHEM 1212, 1212L, CBIO 2200-2200L, CBIO 2210-2210L, and PHYS 1111-1111L with a grade of C or better; an overall GPA of 2.75; and submission of a statement of purpose.

Special Requirements

Exercise Science core courses must be taken in residence and graded C or above to count for graduation.

Program Requirements

Total hours required	**120**

Fees

There is a special $35 per semester fee for EXRS 3470, Practicum in Athletic Training.

Internships

Internship opportunities in physical therapy, athletic training, adult fitness or cardiac rehabilitation are available with corporations, hospitals, clinics, commercial fitness facilities or community programs in the state of Georgia and nationally.

Family and Consumer Sciences Education

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Helen Hall
hchall@arches.uga.edu
(706)542-1682

Department
Leadership and Lifelong Learning
College of Education

Description of the Program

The major in family and consumer sciences education is offered jointly by the College of Family and Consumer Sciences and the College of Education. Students completing this program fulfill the requirements for a teacher's certificate in home economics.

Career Opportunities

Family and consumer sciences education graduates teach middle and high school students to improve the quality of life for individuals and families. A graduate might teach courses in nutrition, parenting, child care/elder care, clothing/apparel design and construction, single and family living, interior design, food service occupations, and/or consumer education. Graduates are also employed as extension agents and are hired by businesses to market food and food preparation equipment, consult on home or clothing design, and advise on family resource management or child development. Graduates with advanced degrees may be employed by colleges and universities.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

A 2.5 GPA is required for admission to the Teacher Education program and enrollment in professional education courses.

Expectations of Transfer Students

Recommended courses: Chemistry sequence, psychology, economics, foundations of education, human development and the educative process, and computer technology.

Fashion Merchandising

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Patricia Hunt-Hurst
Associate Professor
phunt@fcs.uga.edu
(706)542-4853

Department
Textiles, Merchandising and Interiors
College of Family and Consumer Sciences

Description of the Program

The curriculum combines business studies with the technical, scientific, and aesthetic factors associated with marketing apparel and textile products. The program emphasizes the skills and competencies needed for careers in retailing, buying, wholesaling, merchandising and promotion. Computer skills are an integral part of the program and an excellent computer center is located in Dawson Hall.

Career Opportunities

Graduating students have exciting employment opportunities as buyers, store managers, fashion directors, entrepreneurs, merchandise managers, sales representatives, and special events coordinators with leading retailers.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

Students transferring into the Fashion Merchandising major should have fulfilled the core curriculum requirements, including macro or microeconomics, psychology, sociology, speech, statistics, elementary chemistry, English, literature, and introduction to computing.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: SPCM 1100	
Preferred courses in Area D: CHEM 1110, 1110L and STAT 2000	
Preferred course in Area E: PSYC 1101	
Area F:	18
ACCT 2101; ARTS 2000; CHFD 2100 or HACE 2100; CSCI 1100-1100L; ECON 2105 or 2106; SOCI 1101	
Major Requirements:	42
MARK 3000, 4100; TXMI 2000, 3210, 3240, 3500, 3500L, 3520, 3530, 4220, 4230, 4290, 4520, 5240, 5900; choose 3 hours from MARK 4700; TXMI (DRAM) 4270; TXMI 3570, 4530, 4540, 4550, 4580, 5710	
Major Electives:	9
Choose 9 hours from TXMI 5910 or other TXMI courses	
General Electives:	9
Any level	
Total hours required	**120**

Internships

Internships are available on a competitive basis, but not required. They are an important part of many students' programs of study.

Fisheries and Aquaculture

Degree
Bachelor of Science in Forest Resources (B.S.F.R.)

Contact Person
Bruce C. Bongarten
Associate Dean
bongarte@smokey.forestry.uga.edu
(706)542-4284

Department
School of Forest Resources

Description of the Program

The Fisheries and Aquaculture major is designed to give undergraduate students a strong background in the biological and managerial aspects of the fisheries profession. Courses in the basic biological and physical sciences provide the background information necessary for specific courses in fisheries. Courses such as fisheries management, limnology, ichthyology, ecology, aquaculture, water quality, and fish physiology provide students with the information needed to appreciate, understand, and manage aquatic systems. Other courses in the Fisheries major include statistics, communication, and policy. These provide the skills to analyze data, communicate effectively, and understand the regulatory aspects of fisheries management. Graduates from this major meet the educational requirements for certification by the American Fisheries Society. Course work in this program provides students with the background necessary for admission to graduate programs in fisheries. There are no designated areas of emphasis in this major.

Career Opportunities

Graduates can find jobs as fisheries technicians or biologists with state and federal agencies. Other areas of employment are private firms and aquaculture or hatchery operations.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and an overall GPA of 2.5.

Admission to the Professional Program

Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Application forms for admission to the Warnell School of Forest Resources are available from the Associate Dean's office. Students may apply for fall or spring semester admission. A maximum of 60 students will be admitted each semester. Applications for fall semester admission are due April 1. Applications for spring semester admission are due September 15. *(Note that these deadlines may be earlier than University of Georgia application deadlines).* To be eligible for admission to the Professional Program, students must have completed the 60 hour pre-Professional curriculum, except that up to 8 credits of electives (and/or SPCM 1100) may be deferred if an equal number of credits have been completed from the following courses: ECOL(FORS) 3260-3260L (Wildlife and Fisheries and Aquaculture majors only), FORS 3010-3010L, FORS 3020-3020L, and CRSS(FORS) 3060-3060L. For information on the admissions process, see the Warnell School of Forest Resources section of this Bulletin.

Expectations of Transfer Students

Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Admission to the major is not granted until the 60 credit pre-Professional Program is completed. Transfer students should contact the Associate Dean, Warnell School of Forest Resources, for information on pre-Professional Program requirements and confirmation of transfer credit.

Special Requirements

The Fisheries and Aquaculture major requires 124 semester credits: 64 in the Professional Program and 60 in the pre-Professional Program.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and MATH 2200, 2200L (take under major electives if not taken in Area D)	
Preferred course in Area E: ECON 2106 (take under major electives if not taken in Area E)	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L, 2211, 2211L; SPCM 1100; STAT 2000	
Major Requirements:	55
CRSS(FORS) 3060-3060L; ECOL (FORS) 3260-3260L, 4310-4310L; ECOL 4050-4050L, 4070-4070L; ENGL 3590; FORS 3000-3000L; FORS 3020-3020L or ECOL (BIOL) 3500-3500L; FORS 3300, 3610-3610L, 3710-3710D, 4730 or 4750, 4800-4800D, 5360-5360L, 5380-5380L; PGEN 3580-3580L	

Major Electives:	9
Total hours required	**124**

Fees
Tuition in the Professional Program is approximately 10% greater than for non-Professional programs.

Scholarships
In addition to the financial assistance offered through the University's Office of Student Financial Aid, a number of scholarships and awards are available specifically for undergraduate students in forest resources. These awards total about $80,000 annually, and are made possible by donations from forest-related industries and organizations, and from alumni and other interested individuals.

Selection for these scholarships is based on academic achievement, leadership ability, and financial need. Application forms may be obtained from the Office of the Associate Dean.

Internships
An active internship program gives students opportunity to supplement their classroom studies with practical experience in forest resource management. Students may work with private companies, landowners, conservation organizations, and federal and state agencies.

Cooperative Education
The school also offers a Cooperative Education Program with federal and state agencies such as the U.S. Fish and Wildlife Service, the U.S. Forest Service, and the Georgia Department of Natural Resources. Students may alternate semesters of off-campus work with semesters of on-campus study. Although we make every effort to facilitate cooperative education, the arrangement for such programs is usually left to student initiative.

Food Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Robert Shewfelt
Professor and Undergraduate Coordinator
shewfelt@arches.uga.edu
(706) 542-5136

Department
Food Science and Technology
College of Agricultural and Environmental Sciences

Description of the Program
Food Science combines a knowledge of science, technology, and engineering to solve problems of food production, processing, packaging, distribution, preparation, evaluation, and use. Therefore, instruction in the food science major emphasizes the principles of biology, chemistry, engineering, and other sciences as they relate to foods and the conversion of raw materials into processed foods. During the first two years, students take courses in chemistry, biochemistry, microbiology, physics, mathematics, and statistics. During the junior and senior years, food science majors take required course work in addition to approved electives to allow specialization in preparing for careers. Science electives are ideal for students who wish to enter graduate or professional programs, such as veterinary medicine. Advanced degrees provide additional opportunities for career development in industry, teaching, and government. Technology electives offer more practical training in production and allows graduates with experience to move into managerial or supervisory positions in many aspects of food industry. Food Engineering electives are best for students who want the skills required to work in food process engineering or development. Graduates who combine their technical knowledge and skills with business find excellent opportunities in technical sales, consulting, or management in the food industry.

Career Opportunities
Students completing the food science major have received excellent training and experience appropriate for employment in the world's largest and most diverse industry. Food scientists develop new foods and new ways to use them, such as converting inexpensive soybeans, fish meal, or single-cell proteins into nutritious and tasty foods. They also check the safety of ingredients and food processing methods. By applying their knowledge of chemistry, microbiology, engineering, and other sciences, they test foods for flavor, color, texture, and nutrition. Career opportunities are available in industry, education, and government agencies. Food science graduates are involved in research and development work, processing, packaging, quality control, marketing, consulting, teaching, writing or enforcing government regulations, and jobs dealing with foreign trade.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Courses recommended for transfer students include calculus, statistics, general chemistry, organic chemistry, biology and physics.

Program Requirements
Semester Core Curriculum	Hours
Areas A-E:	42

Total hours required **120**

Scholarships
Food science majors may be eligible for scholarships provided by the Food Science Scholarship Fund, which is made up of contributions from food industries and alumni. Scholarships are also available from the Institute of Food Technologists, the College of Agricultural and Environmental Sciences and the University of Georgia. For more information about college-wide scholarships, contact the Office of Academic Affairs.

Internships
Internships with food companies are available and encouraged to provide a well-rounded education.

Minor in Food Science
Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Foreign Language Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Carol Spurgeon
Undergraduate Advisor
(706)542-4522

Department
Language Education
College of Education

Description of the Program
This program prepares a student for a professional four-year certificate in Georgia for teaching French, German, Latin, or Spanish in grades P-12. Requirements and prerequisites in the teaching field should be considered in choosing courses in the freshman and sophomore years. All prospective teachers should plan their program with their advisor. Only students who have met the entrance requirements are eligible to apply for the program.

Career Opportunities
This program prepares students to teach French, German, Latin, or Spanish in grades P-12 in the public schools of Georgia.

Entrance Requirements
Entrance requirements include completion of Core Areas A-E and Area F; a passing score on Praxis I; an overall GPA of 2.6; an overall GPA of 3.0 for all Area F courses; submission of a resume documenting relevant work experiences, skills, and abilities; and submission of a statement of purpose.

Special Requirements
Students in this major must maintain a 2.6 overall GPA, maintain a 2.6 teaching field GPA, and complete 6 of 9 teaching field courses before entering TE courses.

Program Requirements
Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Area F: 18

Contact Person
Bruce C. Bongarten
Associate Dean
bongarte@smokey.forestry.uga.edu
(706)542-4284

Department
School of Forest Resources

Description of the Program
This major is designed to prepare students for professional practice in the environmental sciences or for graduate education. Course work may be tailored to individual interests, and may include environmental assessment, wetlands delineation and remediation, forest hydrology and soil science, environmental systems, and land application of wastes. Students in this major must elect to follow one of three designated Areas of Emphasis: 1) Soils and Water Resources, 2) Hydrology and Environmental Systems, 3) Environmental Resource Assessment.

Career Opportunities
Graduates are prepared for careers in industry, government agencies, and consulting firms.

Entrance Requirements
Entry to the major requires completion of Core Areas A-E and Area F and an overall GPA of 2.5.

Admission to the Professional Program
Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Application forms for admission to the Warnell School of Forest Resources are available from the Associate Dean's office. Students may apply for fall or spring semester admission. A maximum of 60 students will be admitted each semester. Applications for fall semester admission are due April 1. Applications for spring semester admission are due September 15. *(Note that these deadlines may be earlier than University of Georgia application deadlines).* To be eligible for admission to the Professional Program, students must have completed the 60 hour pre-Professional curriculum, except that up to 8 credits of electives (and/or SPCM 1100) may be deferred if an equal number of credits have been completed from the following courses: ECOL(FORS) 3260-3260L (Wildlife and Fisheries and Aquaculture majors only), FORS 3010-3010L, 3020-3020L, and CRSS(FORS) 3060-3060L. For information on the admissions process, see the Warnell School of Forest Resources section of this Bulletin.

Expectations of Transfer Students
Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Admission to the major is not granted until the 60 credit pre-Professional Program is completed. Transfer students should contact the Associate Dean, Warnell School of Forest Resources, for information on pre-Professional Program requirements and confirmation of transfer credit.

Special Requirements
The Forest Environmental Resources major requires 122-124 semester credits: 62-64 in the Professional Program and 60 in the pre-Professional Program.

Bruce C. Bongarten
Associate Dean
bongarte@smokey.forestry.uga.edu
(706) 542-4284

Department
School of Forest Resources

Description of the Program

The Forestry major emphasizes the biological, social, and management aspects of forestry. A student in the Forestry major will learn the scientific principles governing tree growth in various ecosystems and will develop the management skills necessary to sustain forests in good health to meet society's consumptive and non-consumptive needs from the forest. The graduate from this major will be a professional forester responsible for the resolution of competing uses of the forest and forest resources, and for the management of healthy, productive forests in meeting the owner's objectives. Long range planning for the management of forests and forest land is emphasized. Students may use electives to fulfill any of seven Areas of Emphasis, including: Forest Management, Forest Business, Forest Biology, Forest Recreation, Forest Policy and Administration, Urban Forestry, and Wood Utilization.

Career Opportunities

Forestry focuses on the management and use of forest land to produce wood and wood fiber to satisfy the demands of society. Students study how forests grow and develop, and learn how to manage, to regenerate and harvest this renewable resource. Graduates pursue careers as industrial foresters, as forestry consultants and as foresters with government agencies.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and an overall GPA of 2.5.

Admission to the Professional Program

Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Application forms for admission to the Warnell School of Forest Resources are available from the Associate Dean's office. Students may apply for fall or spring semester admission. A maximum of 60

students will be admitted each semester. Applications for fall semester admission are due April 1. Applications for spring semester admission are due September 15. *(Note that these deadlines may be earlier than University of Georgia application deadlines).* To be eligible for admission to the Professional Program, students must have completed the 60 hour pre-Professional curriculum, except that up to 8 credits of electives (and/or SPCM 1100) may be deferred if an equal number of credits have been completed from the following courses:ECOL(FORS) 3260-3260L (Wildlife and Fisheries and Aquaculture majors only), FORS 3010-3010L, FORS 3020-3020L, and CRSS(FORS) 3060-3060L. French

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Doris Kadish
(706)542-1075

Department
Romance Languages
College of Arts and Sciences

Description of the Program

Students majoring in French will take courses that combine the study of literature, language, culture, and linguistics, which will lead to a development of language proficiency and an understanding of the French-speaking world.

Career Opportunities
Many students majoring in French will become teachers or go on to graduate school, but proficiency in a foreign language also helps majors find employment in the public and private sectors.

Entrance Requirements
Entry to the major requires completion of Core Areas A-E and Area F.

Placement Test
A student continuing a language taken in high school must take either the language achievement test of the College Entrance Examination Board or the placement test administered by the University of Georgia Counseling and Testing Center. Students will be placed in the appropriate course on the basis of their scores and other pertinent information. The Advanced Placement examinations in French Language and Literature may also be submitted for placement and possible credit.

Expectations of Transfer Students
Four courses or 14 semester hours of beginning and intermediate French language course work, equivalent to UGA FREN 1001-2002, are required. Study abroad courses can be used to fulfill part or all of these prerequisites, upon permission of advisors in the department.

Special Requirements
A minimum grade of C is required in course work for this major.

No student may receive credit for any course which is a prerequisite to a course for which college credit has already been received. Exceptions may be made only by the head of the department.

Certain courses in the Department of Romance Languages are not open to native speakers of that language. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was French, Italian, Portuguese, or Spanish.

Study Abroad
The Department of Romance Languages encourages all students to participate in an accredited study abroad program for an academic year, a semester, or the summer. Prior departmental approval is required for credit. Contact the Office of International Education (542-1557) for information about programs. Check with the department for the maximum number of hours that will count for a major or minor.

Minor in French
Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Furnishings and Interiors

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Ms. Linda Tepfenhart
Lecturer
ltepfenhart@fcs.uga.edu
(706) 542-4914

Department
Textiles, Merchandising and Interiors
College of Family and Consumer Sciences

Description of the Program
The Furnishings and Interiors curriculum combines drafting classes with historic studies to explore rendering, color, perspective, architecture, interiors, furniture and decorative arts. The program emphasizes the skills and competencies needed for careers in furnishings and interiors. Computer skills are focused on the curriculum. An

excellent computer center in the College is readily accessible to students.

Career Opportunities

Exciting employment opportunities are available in architectural/design firms, as sales representatives for textiles, furniture, and lighting; kitchen and bath designers; and designers of historic reproductions.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F, an overall GPA of 2.3, completion of ARST 1050 in Area F with a grade of C or better, and submission of a portfolio of work from ARST 1050.

Expectations of Transfer Students

Students transferring into the Furnishings and Interiors major should have fulfilled the core curriculum requirements, including psychology, statistics, elementary chemistry, English, literature, speech, math, and social sciences.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: EDES 2510 or 2520	
Preferred courses in Area D: CHEM 1110, 1110L and STAT 2000	
Preferred courses in Area E: PSYC 1101	
Area F:	18
ARST 1050, 1060; ARTS 2000; CHFD 2100 or HACE 2100; CSCI 1100-1100L; SPCM 1100	
Major Requirements:	41
TXMI 2000, 3350, 3360, 3380, 3500, 3500L, 3520, 3570, 4350, 4360, 4370, 4380, 5310, 5320, 5330	
Major Electives:	9
TXMI 5910 (9 hours) or three TXMI courses	
General Electives:	10
Any level	
Total hours required	**120**

Internships

Internships are available on a competitive basis, but not required. They are an important part of many students' programs of study.

General Business

Department
Terry College of Business

Description of the Program

Students entering the Terry College of Business may choose this program during their freshman and sophomore years, later selecting a major field of study after exposure to several business areas. Individuals who retain General Business as a major are allowed flexibility in choosing major course work. As part of the curriculum, students are required to take ACCT 5000 to graduate.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	

Area F: 18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090
Major Requirements: 33
ACCT 5000, 5010; FINA 3000; MARK 3000; MGMT 3000; MSIT 3000;
Choose five courses from the following (no more than two from any prefix): ECON 4010, 4020; FINA 4200, 4310; LEGL 4300, 4400; MARK 4000, 4100; MGMT 5440, 5500, 5700; REAL 4000; REAL (FINA) 5100; RMIN 4000, 5100
Major Electives: 3
Choose one of the following: ACCT 4000; ECON 4000; FINA 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000
General Electives: 24
(Refer to College-wide requirements when selecting general electives.)
Five courses in Arts and Sciences
One business course outside major
Two business courses outside department

Total hours required **120**

Genetics

Degree
Bachelor of Science (B.S.)

Contact Person
Michael Bender
bender@arches.uga.edu

Department
Genetics
College of Arts and Sciences

Description of the Program

The Genetics Department was formed in 1980 and currently consists of 20 faculty members reflecting a diverse yet complementary range of research interests. The undergraduate major in genetics was established in 1983 and started out with only 20 students. As of fall 1997, there were 120 genetics majors. In addition to taking a challenging series of required courses, genetics majors are encouraged to participate in research projects conducted in individual faculty members' laboratories. The average GPA of graduating genetics majors since inception of the program is 3.40.

For more information about the Genetics Department and the major in genetics, consult the Department's web site at http: //www. genetics. uga.edu.

Career Opportunities

The genetics major provides a strong base for biological science-oriented careers. Ninety percent of genetics graduates go on to pursue advanced degrees in research and/or medicine.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students should complete undergraduate biology, inorganic and organic chemistry, and biochemistry in preparation for transferring to the genetics major.

Program Requirements

Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1113
Preferred courses in Area D: BIOL 1107-1107L and CHEM 1211, 1211L and MATH 2200, 2200L
Preferred course in Area E: ANTH 1102
Area F: 18
BIOL 1108-1108L; CHEM1212, 1212L; CHEM 2211, 2211L; CHEM 2212, 2212L; MATH 2210, 2210L
Major Requirements: 31-32
BCMB (BIOL) (CHEM) 3100; CBIO (BIOL) 3400; GENE 4950 (2 hours); GENE (BIOL) 3200, 3210*, 4200, 4210L*, 4600; *GENE 4960 (may substitute for either GENE (BIOL) 3210 or 4210L); PHYS 1211-1211L, 1212-1212L
Major Electives: 9-12
Choose 9-12 hours at 3000 level or above from the following (no more than 4 hours from independent research): BCMB, BIOL, BTNY, CBIO, CHEM, CSCI, ECOL, ENTO, GENE, MATH, MIBO, STAT
General Electives: 16-20
(Refer to College-wide requirements when selecting general electives.)
Upper division (3-7 hours)
Any level (9-17 hours)

Total hours required **120**

Scholarships, Internships

Research assistant positions are occasionally available for undergraduates in the laboratories of genetics faculty members. The Genetics Department sponsors a "Summer Undergraduate Fellowships in Genetics (SUNFIG)" program. Underrepresented minority students are especially encouraged to apply.

Minor in Genetics

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Department
Department of Geography
College of Arts and Sciences

Description of the Program

The major in geography requires at least 24 hours of geography courses at the 3000-4000 level and must include GEOG 3510-3510L. A minimum grade of C must be earned in each course. For the A.B. degree, 3000-4000-level course work in the major must include 6 hours of human geography courses, 3 hours of physical geography courses, and 12 additional elective hours in geography; at least 6 hours must comprise 4000-level courses in human geography or techniques. For the B.S. degree, 3000-4000-level course work in the major must include 6 hours of physical geography courses, 3 hours of human geography courses, and 12 additional elective hours in geography; at least 6 hours must be 4000-level courses in physical geography or techniques.

Career Opportunities

The breadth of geography as a discipline together with the flexibility of the undergraduate program allows students to tailor their coursework to suit the needs of a wide range of employers in business, government, and education. Opportunities in the technical fields of geographic information systems and mapping sciences continue to grow rapidly (see details of the interdisciplinary undergraduate certificate program in Geographic Information Sciences). Opportunities remain strong in location analysis, regional development, urban planning, environmental assessment, and atmospheric and earth sciences. For more details, contact the Undergraduate Advisor.

Entrance Requirements and Expectations of Transfer Students

Students intending to enter the geography major should complete Areas A-F of the core curriculum. Preferred courses in Areas D and E are listed under Program Requirements (A.B. and B.S.), as are Area F requirements specific to each degree.

Program Requirements (A.B.)

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area D: GEOG 1111, 1111L or (1112, 1112L and 1113, 1113L) (take under general electives if not taken in Area D)	
Preferred course in Area E: GEOG 1101-1101D (take under general electives if not taken in Area E)	
Area F:	18
GEOG 2300 or STAT 2000; foreign language (3rd semester)	
Four courses from any of the following (not taken in Area E):	
No more than two courses from the following: [GEOG 1103-1103D, 1125-1125D, 2610; GEOG (ANTH)(CMLT)(HIST)(SOCI) 2100]	
AFAM 2000; ECON 2105, 2106; PHIL 1500; SOCI 1600; WMST 2010	
No more than one from the following: [fourth semester of a foreign language; one 2000-level SOCI course not listed above; one 2000-level HIST course beyond the course taken in Area E]	
(If GEOG 2300 or STAT 2000 and a foreign language through the third semester have already been satisfied, students may make up their 18 hours with other courses from the above list.)	
Major Requirements:	24-26
(A minimum grade of C must be earned in each upper-division course.)	
GEOG 3510-3510L; choose two courses from Group A below; choose one course from Group B below; choose four courses from the three groups below (at least two of the seven courses must be 4000-level courses from Group A and/or C)	
Group A: Human/Regional Geography	
Systematic focus: GEOG 3620, 3630, 4610, 4620, 4630, 4640, 4650, 4660, 4670	
Regional focus: GEOG 4710, 4720, 4730, 4740	
Group B: Physical Geography	
Geomorphology: GEOG 3010, 4020, 4030, 4040, 4060	
Climatology: GEOG 3110, 4120, 4140, 4160	

Biogeography: GEOG 3210, 4810; GEOG (BTNY) 4220, 4240
Group C: Geographic Techniques
GEOG 3990, 4300, 4310-4310L, 4330-4330L, 4350-4350L, 4370-4370L, 4410-4410L, 4430-4430L, 4470-4470L, 4920, 4970H, 4980H, 4990H
General Electives: 34-36
(Refer to College-wide requirements when selecting general electives.)
Upper Division (19-30 hours)
Any level (4-17 hours)

Total hours required **120**

Program Requirements (B.S.)

Semester Core Curriculum	**Hours**
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: GEOG 1111, 1111L or (1112, 1112L and 1113, 1113L) (take under general electives if not taken in Area D)	
Preferred course in Area E: GEOG 1101-1101D (take under general electives if not taken in Area E)	
Area F:	18
GEOG 2300 or STAT 2000; MATH 2200, 2200L or 2210, 2210L*; CSCI 1100-1100L or 1301-1301L; two lab science courses beyond those required under Area D in BIOL, CHEM, GEOG, GEOL, or PHYS (both courses can be from the same department)	
*MATH 2210, 2210L strongly encouraged for a meteorology/climatology focus.	
(If the above requirements have been satisfied, students may make up their 18 hours with 1000/2000-level courses in BIOL, CHEM, CSCI, ECOL, GEOG, GEOL, MATH (2000-level), PHYS, or STAT.)	
Major Requirements:	24-26
(A minimum grade of C must be earned in each upper-divison course)	
GEOG 3510-3510L; choose two courses from Group B below; choose one course from Group A below; choose four courses from the three groups below (at least two of the seven courses must be 4000-level courses from Group B and/or C)	
Group A: Human/Regional Geography	
Systematic focus: GEOG 3620, 3630, 4610, 4620, 4630, 4640, 4650, 4660, 4670	
Regional focus: GEOG 4710, 4720, 4730, 4740	
Group B: Physical Geography	
Geomorphology: GEOG 3010, 4020, 4030, 4040, 4060	
Climatology: GEOG 3110, 4120, 4140, 4160	
Biogeography: GEOG 3210, 4810; GEOG(BTNY) 4220, 4240	
Group C: Geographic Techniques	
GEOG 3990, 4300, 4310-4310L, 4330-4330L, 4350-4350L, 4370-4370L, 4410-4410L, 4430-4430L, 4470-4470L, 4920, 4970H, 4980H, 4990H	
General Electives:	34-36
(Refer to College-wide requirements when selecting general electives.)	
Upper division (19-30 hours)	
Any level (4-17 hours)	
Total hours required	**120**

Contact
Raymond P. Freeman-Lynde
Undergraduate Coordinator
rfreeman@gly.uga.edu
(706) 542-2391

Department
Geology
College of Arts and Sciences

Description of the Program

The undergraduate curriculum prepares students for careers in the geosciences. Course work can be selected to emphasize a variety of geoscience specialities including geophysics, geoarchaeology, sedimentary geology, paleobiology, geochemistry, geohydrology, and environmental geology.

The Department of Geology offers a newly designed curriculum that provides the undergraduate student with flexibility while still covering the basic geoscience curriculum. A required four-course sequence covers the basic concepts of earth materials, surface and internal earth processes, and the life and sedimentary environments of the earth's past. The field experience is a strong part of the undergraduate geology curriculum. All the required classes take field trips. Two courses, Field Methods and Geology Field School (taught in the summer in the Rocky Mountains of Colorado) emphasize the collection and interpretation of geologic information in the field. Electives on a variety of topics allow the student to specialize in fields of interest.

The typical undergraduate geology major continues on in a graduate program (the professional degree in geology is the masters degree). However, some undergraduates do find employment in the geosciences upon graduation. Career possibilities include work in petroleum and mineral exploration, environmental remediation, education, and various governmental agencies.

Career Opportunities

Over half of the geology undergraduates go on to do graduate study in geology. Some of these students stay at Georgia, but many go to other graduate programs. Most of the employment opportunities in the geosciences require a graduate degree. The Masters degree is considered the professional degree, the degree most often held by professional geologists. However, some entry-level jobs do exist for geoscientists with undergraduate degrees, especially if they have some prior work experience.

The employment outlook in the geosciences, as in any profession, varies with the economic climate of the country. The long-range outlook is good at this time. Dwindling energy, mineral and water resources, increasing environmental concerns, global issues such as rising sea levels, and hazard assessment present new challenges to geoscientists. Career opportunities are increasing in environmental science and hydrogeology with the growing need to maintain Earth's natural environments and meet society's demands for Earth materials.

According to the American Geological Institute's *Geoscientific Employment and Hiring Survey — 1991*, about 85,000 geoscientists work in the United States. Most earth scientists are employed by industries related to oil and gas, mining and minerals and water resources.

Many geoscientists are self-employed as geological consultants or work with consulting firms. Most consulting geologists have had extensive professional experience in industry, teaching or research.

Also, many geoscientists work for the federal or state government. Most work for the U.S. Geological Survey (Department of Interior), but others work for the Department of Energy, Forest Service, National Aeronautics and Space Administration, National Oceanic and Atmospheric Administration, U.S. Army Corps of Engineers, or a state geological survey.

Salary scales vary depending on the career path, location, qualifications of the geoscientist and, of course, the economy. In the early 1990s, the range of average starting salaries for graduates with bachelor's degrees was $21,000 to $36,000. Starting salaries for master's degrees ranged from $24,000 to $38,500 and from $30,000 to $44,000 for Ph.D.'s.

Recent graduates from the Department of Geology at UGA have followed the trends outlined above. Most have been hired by consulting firms doing work on environmental problems. Some of the students have been hired in the more traditional fields of mineral and petroleum exploration. A few graduates have gone into teaching at both the high school and university level while others have gone on to work for Government organizations.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Program Requirements (A.B. and B.S.)

Semester Core Curriculum (A.B.)	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1103-1103L, CSCI 1301-1301L, and one of the following lab science courses (the other three in Area F): CHEM 1211, 1211L, 1212, 1212L; GEOL 1250-1250L or 1121, 1121L; or GEOL 1260-1260L or 1122, 1122L (take under general electives if not taken in Area D).	
Preferred course in Area E: ANTH 1102	
Area F:	18
Choose three of the following lab science courses not taken in Area D: CHEM 1211, 1211L, 1212, 1212L; GEOL 1250-1250L or 1121, 1121L; GEOL 1260-1260L or 1122, 1122L	
Choose six hours from the following: MATH 2200, 2200L; PHYS 1010; CSCI 1301-1301L	

Semester Core Curriculum (B.S.)	Hours
Area A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: MATH 2200, 2200L and two of the following lab science courses: CHEM 1211, 1211L, 1212, 1212L; GEOL 1250-1250L or 1121, 1121L; GEOL 1260-1260L or 1122, 1122L (take under general electives if not taken in Area D).	
Preferred course in Area E: ANTH 1102	
Area F:	18
Choose three of the following lab science courses not taken in Area D: CHEM 1211, 1211L, 1212, 1212L; GEOL 1250-1250L, 1260-1260L (GEOL 1121, 1121L and 1122, 1122L will be accepted to satisfy degree requirement)	

Choose one from the following: Organic Chemistry; PHYS 1111-1111L
Major Requirements (A.B. and B.S.): 33
GEOL 3010-3010L, 3020-3020L, 4010-4010L, 4020-4020L, 4250, 4270
Choose three courses from the following: GEOL 4050, 4060, 4090, 4110, 4220, 4300, 4310, 4330, 4500, 4510 or 4520, 4600, GEOL(ANTH) 4700
Major Electives: 4
MATH 2210, 2210L
General Electives: 23
(Refer to College-wide requirements when selecting general electives.)
Upper division (6 hours)
Any level (17 hours)
Total hours required **120**

Department
Germanic and Slavic Languages
College of Arts and Sciences

Description of the Program

The undergraduate major in German is designed to provide students with communicative proficiency in the German language and knowledge of important aspects of German culture. Students are strongly encouraged to take courses from the survey sequence during the junior year and to enroll in German 4001.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. GRMN 2002 is a prerequisite for upper-division courses.

Expectations of Transfer Students

Students transferring as juniors should have completed four semesters of German study equivalent to UGA courses GRMN 1001-2002.

Special Requirements

Students must earn a minimum grade of C in each course. With permission of the department, up to 6 semester hours of upper-division transfer credit from the UGA-affiliated Studies Abroad Program (Erlangen-Nürnberg or Rostock) may be applied towards fulfillment of the major requirements, provided that credit for GRMN 2002 was earned before participation in the program. Otherwise, all courses fulfilling the major requirements must be taken in residence.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
GRMN 2001, 2002; LING 2100	
Nine additional hours preferably taken in the following: an additional foreign language, literature, art, music, theater, philosophy, geography, world history, economics, international studies, women's studies, linguistics, communications, and anthropology	
Major Requirements:	21
GRMN 3001, 3002, 4520, 3250 or 3260, GERM(LING) 3380 or 4460	
Six additional hours of GRMN courses at the 3000-4000 level (excluding GRMN 3500)	
General Electives:	39
(Refer to College-wide requirements when selecting general electives.)	
Upper division (18 hours)	
Any level (21 hours)	
(It is recommended that students complement course work in the major with courses in German/European History, Philosophy, Literature, Linguistics, Art or Music History, Government, Economics, or other related subjects.)	
Total hours required	**120**

Greek

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Sarah Spence
Undergraduate Coordinator
sspence@arches.uga.edu
(706) 542-0417

Department
Classics
College of Arts and Sciences

Description of the Program

This program provides students with an opportunity to pursue studies in Greek literature, history, archaeology, art, philosophy, and religion while concentrating on the Greek language.

Career Opportunities

Career opportunities for graduates include teaching at the secondary level, non-teaching academic positions, museum work, library work, editorial work, positions in the travel and tourist industry, and government positions in foreign service. The major also prepares students to enter graduate school in classics, comparative literature, linguistics, history, and other fields (for university teaching positions). Other opportunities include careers in law, journalism, and business.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Ideally transfer students should have completed fourth-semester Greek and courses in ancient history or classical culture.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: CLAS 1000 and 1010 (take under general electives if not taken in Area C)	
Area F:	18
GREK 1001, 1002, 2001 (if 1001 already satisfied); CLAS 1020 or CLAS(ANTH) 2000	
Select three courses from the following: CMLT 2210; HIST 2301; LING 2100; PHIL 1500	

Major Requirements: 24-27
GREK 2001 (if not taken in Area F), 2002
Two courses 3000-level or above in CLAS, GREK, LATN
Five courses from the following: GREK 4010, 4020, 4030, 4040, 4050, 4060, 4070, 4080, 4090, 4100, 4200
Major Electives: 6-9
Two or three courses 3000-level or above, in any combination, in CLAS, GREK, or LATN, or courses in ANTH, ARHI, CMLT, HIST, LING, PHIL that have a significant component dealing with the ancient Greco-Roman world and are approved by the Classics Department, or 1000- or 2000-level Latin.
General Electives: 27
(Refer to College-wide requirements when selecting general electives.)
Upper division (12-18 hours)
Lower division (9-15 hours)
The hours vary depending upon whether or not any 1000/2000-level Latin courses are chosen in the Major Electives category; if none are taken, majors must complete at least 12 more hours of Upper Division course work and up to 15 hours of Lower Division course work; if one 1000/2000-level course is taken in the Major Electives category, the student must complete at least 15 hours of Upper Division electives and up to 12 Lower Division hours; if two 1000/2000-level courses are taken in the Major Electives category, the student must complete at least 18 hours of Upper Division electives and up to 9 Lower Division hours.

Total hours required **120**

Scholarship
The Warlick-Mannion Scholarship (up to $1,000 per year) is available.

Contact Person
Dr. Wilma Harrington
Physical Education Program Coordinator
wilmah@arches.uga.edu
(706) 542-5947

Department
Physical Education and Sport Studies
College of Education

Description of the Program
Completion of this program prepares the student for certification to teach health and physical education, grades P-12, in Georgia. An athletic coaching minor is also available for those students wishing to prepare for coaching responsibilities.

Career Opportunities
The State of Georgia requires that physical education be taught daily in the elementary and middle schools and one unit is required in the secondary schools; therefore, the demand for certified teachers in health and physical education will remain viable.

Entrance Requirements
Entrance requirements include completion of Core Areas A-E and Area F, a passing score on Praxis I, and an overall GPA of 2.3 (2.5 required for admission to teacher education).

Expectations of Transfer Students
Students transferring at the junior level should have completed Areas A, C, D, E, and F in the UGA Core Curriculum. Area D (Science, Math, and Technology) should include the equivalent of CHEM 1110, 1110L and BIOL 1103-1103L. Area E (Social Sciences) should include the equivalent of HIST 2111 or 2112 and POLS 1101-1101D. Area F (major-related courses) should include the equivalent of CBIO 2200-2200L, CBIO 2210-2210L, EPSY 2020, and EFND 2030.

Special Requirements
To complete the degree, a student must be admitted to teacher education. To receive a student teaching assignment, a student must have at least a 2.5 overall grade point average.

Program Requirements
Semester Core Curriculum **Hours**
Areas A-E: 42
See Core Curriculum
Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Preferred courses in Area D: BIOL 1103-1103L and CHEM 1110, 1110L

Area F: 18

CBIO 2200-2200L, 2210-2210L; EFND 2030; EPSY 2020; 4 hours of 1000/2000-level electives

Major Requirements: 60

EXRS 3600, 3700; HPRB 1710, 3400, 5060, 5210; PEDS 3100, 3110, 3120, 3210, 3220, 3301, 3302, 3360, 3720, 4300-4300L, 4330-4330L, 4610-4610L, 4750, 4900, 5460

Total hours required **120**

Scholarships

The Coach Mike Castronis Scholarship, the Clifford Lewis Scholarship, and the Mary Ella Soule Scholarship are given annually to upper division students in the major.

Minor in Physical Education/Athletic Coaching

Health Promotion and Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
David Hayes
Undergraduate Coordinator
dmhayes@arches.uga.edu
(706)542-4369

Department
Health Promotion and Behavior
College of Education

Description of the Program

Students majoring in Health Promotion and Education may choose one of two areas of emphasis: School Health or Health Promotion and Wellness. Depending on the area of emphasis, students are prepared either to work in schools with P-12 teacher certification, or to work in health promotion and wellness positions in community, health care and worksite settings.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F, a passing score on Praxis I, and and overall GPA of 2.0 (0-30 semester hrs.), 2.2 (61-90 semester hrs.), or 2.3 (91 or more semester hrs.). An overall GPA of 2.5 is required for admission to Teacher Education.

Admission to Teacher Education

Standards for admission of freshmen to the College of Education are the same as for those admitted to the University. Enrollment in the College of Education does not constitute admission as a candidate for a degree in teacher education or professional certification in other professional fields. Each student who seeks a professional teaching degree or professional teacher certification must apply for admission to Teacher Education through the College's Educational Field Experience Office, 315 Aderhold Hall.

AREA OF EMPHASIS: SCHOOL HEALTH

Career Opportunities

A major in Health Promotion and Education in the school health area leads to P-12 teacher certification with professional employment opportunities in public and private schools, day care facilities and community agencies.

Special Requirements

1) An overall 2.5 GPA is required before HPRB 3450 Practicums and HPRB 5460 Student Teaching.
2) A student must be admitted to Teacher Education Program before enrolling in HPRB 3400 and 5460.
3) Application for Teacher Education can be made after completion of EFND 2030, SPCM 1100 or 1500, ENGL 1101 and 1102, an overall GPA of 2.5, passing of Regents test, and one semester enrolled at UGA.
4) Application for Student Teaching must be completed through Room 315 Aderhold by the end of the first week of the semester preceding student teaching.
5) A student must be certified in First Aid and CPR before student teaching. This requirement may be satisfied with ARC or AHA cards or by taking HPRB 1190.
6) A grade of C or better is required for all courses included in the Common Major Requirements and the Area of Emphasis.
7) It is recommended that all HPRB students compile and maintain a portfolio documenting and exhibiting work or experiences gained throughout the undergraduate program including the practicums and student teaching.

Internships

Practicums and student teaching assignments are arranged through the HPRB department and the College of Education. Students will consult with HPRB department Student Teaching Coordinator to initiate this process.

AREA OF EMPHASIS: HEALTH PROMOTION AND WELLNESS

Career Opportunities

Professional positions are available in public and private community agencies, business and industry, and health care facilities.

Special Requirements

1) An overall 2.5 GPA is required before enrolling in HPRB 4400 and 5560.
2) CBIO 2200-2200L and 2210-2210L are prerequisites for EXRS 4310, 4630-4360L, and 4640-4640L.
3) A grade of C or better is required for all courses included in the Common Major Requirements and the Area of Emphasis.
4) First Aid and CPR certification is required. May be satisfied with ARC or AHA cards or by taking HPRB 1190.
5) Application for HPRB 5560 Field Experience must be completed by midterm of the semester preceding the field experience in order to be cleared to register. Field Experience application packets are available from the Field Experience Coordinator.
6) It is recommended that all HPRB students compile and maintain a portfolio documenting and exhibiting work or experiences gained throughout the undergraduate program including the practicums and field experience.

Internships

Practicums and field experiences are arranged by the students in cooperation with the HPRB department Field Experience Coordinator. Paid field experiences are not to be expected.

History

Degree
Bachelor of Arts (A.B.)

Contact Person
Coordinator
(706) 542-2503 or 542-2053

Department
Department of History
College of Arts and Sciences

Description of the Program

Students are encouraged to develop an understanding of history and culture of medieval as well as modern times, and to supplement this with the use of a foreign language.

Career Opportunities

Students who decide to major in history embark upon a course of study that promises both academic and professional rewards. A sound component of a liberal education, history also serves practical needs, providing a solid background for careers in law, journalism, government service, and history preservation. The history major also meets an important need of the business world by providing general training in analysis and writing, and by developing a sense of balanced judgment. For those who choose to teach history or social studies in secondary schools, the history major provides the necessary subject-matter content. Finally, the history major and especially the area of emphasis in Historical and Area Studies prepare the student not only for graduate work in history but also for other professional careers which call for a satisfactory acquisition of knowledge and skills related to the study of the past.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. Anyone who decides to become a history major must first file a "Declaration of Major" form with the College of Arts and Sciences. The prospective major then must go to the Department of History Main Office (LeConte

220) to arrange for a meeting with the Undergraduate Advisor and fill out an advisee information card. A permanent faculty member will be assigned to the student for advisement. These steps should be taken during the last semester of the sophomore year or the first semester of the junior year. If the student is a last-semester sophomore, he or she should bring an official college check sheet to the history office. If a check sheet is not available or cannot be secured from the office of the Dean of Arts and Sciences, it is advisable to request an official transcript from the Registrar's office. New history majors, especially transfers from other colleges, should always present an official transcript of accepted courses from the University of Georgia Registrar's Office.

Expectations of Transfer Students

The major in history requires at least one 1000-2000 level history course in **each** of at least **three** of the following areas: US/North American history, Latin American history, European history, African history, Middle Eastern history, Asian history, or world history. At least 18 semester hours of course work must be taken in residence at the University of Georgia.

Special Requirements

At least 15 hours of electives for this major must be in courses numbered 3000 or above and 18-19 hours in courses at any level. A C average in history courses is required.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
One foreign language course	
Select three hours at the 1000/2000-level from the following list of humanities prefixes: ANTH, ARHI, CLAS, CMLT, GEOG, PHIL, POLS, RELI, SOCI	
An additional three hours of a foreign language or an additional three hours from the humanities list above	
At least one course in each of three of the following areas:	
U.S./North America: HIST 2111, 2111H, 2112, 2112H	
Latin America: HIST 2221, 2222	
Western Civilization: HIST 2301, 2302, 2311H, 2312H	
Africa: HIST 2501, 2502	
Middle East: HIST 2560	
Asian History: HIST 2601, 2602	
World History: HIST 2701, 2702	
Major Requirements:	24
HIST 4990	
At least 21 hours in courses numbered 3000-level or above (one course must be 4000-level) from the following: at least one advanced course in each of three geographical areas; four additional courses for a total of eight courses. (One of the courses that satisfies the requirements above must focus on the period before 1600 and one course must focus on the period after 1600.)	
Geographic Areas	
North America: HIST 3020, 3030, 3050, 3051, 3060, 3071, 3072, 3073, 3080H, 3090, 3101, 3102, 3250, 4000, 4030, 4040, 4050, 4060, 4071, 4072, 4074, 4075, 4080, 4091, 4092, 4100, 4110; RELI(HIST) 3150

Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Josef M. Broder
Assistant Dean, Academic Affairs
jbroder@agecon.uga.edu
(706)542-1611

Department
College of Agricultural and Environmental Sciences

Description of the Program

Students may major in honors interdisciplinary studies under the Bachelor of Science in Agriculture degree. The major is administered by the College through the University Honors Program and is open only to Honors students enrolled in the College of Agricultural and Environmental Sciences. Students may pursue the honors interdisciplinary studies major in any academic department within the College. The major is available to Honors students who seek an interdisciplinary, cohesive program of study not allowed under existing disciplinary majors.

An honors interdisciplinary studies major is designed to allow an Honors student to build an integrated program in a coherently defined interdisciplinary combination of courses. The definition of area may be applied as a chronological, geographical, subject matter, or any other logical and cohesive program of study.

Career Opportunities

Students may develop their own degree program to prepare for careers as consultants, business owners, engineers, environmental protection agents, graduate students, bankers, farmers, teachers, or any other profession in agricultural and environmental sciences.

Entrance Requirements and Expectations of Transfer Students

The honors interdisciplinary studies major (HIS) is open only to Honors students enrolled in the College of Agricultural and Environmental Sciences. Students must complete Core Areas A-E and Area F and submit a program of study to be approved by the dean and the Honors Council.

Program Requirements

Semester Core Curriculum	Hours

Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. Anne Sweaney
Professor and Undergraduate Coordinator
asweaney@fcs.uga.edu
(706)542-4877

Department
Housing and Consumer Economics
College of Family and Consumer Sciences

Description of the Program

The Housing major focuses on the socio-economic aspects of housing. Special emphasis is given to housing needs and the manner in which the family, the private sector, and government policy respond to those needs. The program features an in-depth study of housing finance and the range of housing alternatives. The program may also be used as preparation for graduate study or as a pre-professional degree. Certification as a housing counselor and study in housing for the elderly are also available.

Career Opportunities

Students with a housing major are prepared for employment with local, state, and federal housing agencies, helping tenants with housing use and maintenance practices, and in retrofitting older houses to meet minimum housing standards in structure and/or energy consumption. Graduates may enter employment in real estate firms, utility companies, planning commissions, and with manufacturers of housing and housing components, including manufactured homes, kitchens, and storage units. Other sources of employment are financial institutions involved with housing loans, extension service, and property management firms. Students have an opportunity to earn a housing counselor's certificate which enables them to work with clients and families in home buying when encountering housing problems.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

Students transferring into the housing major should have fulfilled the core curriculum requirements, including social science, humanities, and English. Students should have also completed micro and macroeconomics, introductory statistics, computer science and introductory sociology, math or logic.

Interdisciplinary Studies

Degrees
Bachelor of Science (B.S.), Bachelor of Arts (A.B.), Bachelor of Fine Arts (B.F.A.)

Contact Person
Robert L. Anderson
Dean's Office
College of Arts and Sciences.
rla@arches.uga.edu
(706)542-3400

Description of the Program

A student with academic interests for which no suitable major is offered by any single department in the College of Arts and Sciences may pursue an Interdisciplinary Studies (IDS) major. An IDS major plans a program of study and senior thesis with a faculty advisor and an advisory committee, who are chosen by the student and the IDS Coordinator. The Interdisciplinary Studies major

consists of a minimum of 24 hours of courses plus a Senior Thesis (3 hours) on a topic of special interest. The 24 hours of the major must be drawn from two or more departments of the College of Arts and Sciences. Some programs may include courses from other colleges within the University, although programs of study involving more than 9 hours outside of Arts and Sciences may require special permission.

Applicants for an IDS major must have completed 27 credit hours of college courses, but not more than 75, with a GPA of 3.0 or higher. Students must maintain at least a 3.0 average on all courses taken in order to remain as IDS majors. Programs that reflect an attempt to "pull something together" near the end of the undergraduate program or to look back and attempt to create a theme to fit courses already completed are not in keeping with the spirit of the IDS major.

The IDS program is a rigorous one that requires early planning on the student's part. The first step for students interested in an IDS major is to contact the Coordinator of the Division of Interdisciplinary Studies for further information.

Minor in Interdisciplinary Cognitive Science

Contact the Coordinator of the Division of Interdisciplinary Studies for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Department
International Business Programs
Terry College of Business

Description of the Program

A growing number of foreign and U.S. companies transact a significant and continually expanding portion of their business through international channels. More and more businesses are having to go abroad to find new markets as domestic markets mature. Even those corporations conducting business strictly in this country have to compete with foreign imports. As a result, major corporations that are taking advantage of international opportunities have a "competitive edge."

The Terry College of Business has designed its International Business Program to give its graduates a "competitive edge." While providing opportunities for students to gain the knowledge and skills required for international business careers, the program also assists them in developing an understanding of the mechanisms and institutions of the international economy.

The curriculum is designed to develop a broad background of knowledge in a business field as well as a strong concentration in a foreign language. In addition to the basic undergraduate business curriculum, international business majors are required to take four of the following six courses: Using Accounting Information in a Multinational Setting, the International Business Environment, International Finance, Internship or Cooperative Education, International Legal Transactions for Business, International Strategic Management, or International Marketing.

Students also choose an area of concentration in either Banking and Finance, Accounting, Real Estate, Economics, Marketing, Management, or Global Studies. The Global Studies Certificate is administered through the Center for Global Policy Studies. In this program students conduct additional research in a chosen geographic area, gaining in-depth knowledge of its culture, economics, politics, and religion.

The International Business program is the only major in the Terry College of Business requiring a foreign language sequence. Students may choose to complete a minor in a language as part of the International Business program. The final course in a language sequence must be 3000-level or above.

Many undergraduate international business majors broaden their cultural horizons and earn degree credit simultaneously by participating in various study abroad programs. By participating in these programs, students obtain firsthand knowledge of a foreign language and culture as well as develop an awareness of economic and political issues which affect commerce and characterize foreign marketplaces.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also

expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	24
FINA 3000; MARK 3000; MGMT 3000; MSIT 3000	
Choose four courses from ACCT 4000; ECON 4040; FINA 4810; LEGL 4900; MARK 4700; MGMT 5560	
Major Electives:	12
Choose one course from ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000	
Choose three business courses outside the major from one of the following groups:	
Management, Human Resource: MGMT 5820, 5860, MGMT (SPCM) 5870	
Management, Production: MGMT 4240, 4250, plus one other MGMT course	
Management, General: MGMT 4240, 5400, 5420, 5920	
Marketing: MARK 4000, 4200, plus one other MARK course	
Economics: ECON 4010, 4020, plus one other ECON course	
Accounting: ACCT 5000, plus two other ACCT courses	
Insurance: RMIN 4000, 5100, 5110	
Finance: FINA 4200, 4310, plus one other FINA course	
Real Estate: REAL 4000, plus two other REAL courses	
Legal Studies: LEGL 4300, plus two other LEGL courses	
General Electives:	24
(Refer to College-wide requirements when selecting general electives.)	
Five courses in foreign language (proficiency to 3000-level or above)	
Choose Option I or Option II:	
Option I: Language Minor	
Choose three language courses from the department in which you are minoring	
Option II: Business Concentration	
Choose three business courses outside the major	
Total hours required	**120**

Italian

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Doris Kadish
(706)542-1075

Department
Romance Languages
College of Arts and Sciences

Description of the Program

Students majoring in Italian will take courses that combine the study of literature, language, culture, and linguistics, which will lead to a development of language proficiency and an understanding of the Italian-speaking world.

Career Opportunities

Many students majoring in Italian will become teachers or go on to graduate school, but proficiency in a foreign language also helps majors find employment in the public and private sectors.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Placement Test

A student continuing a language taken in high school must take either the language achievement test of the College Entrance Examination Board or the placement test administered by the University of Georgia Counseling and Testing Center. Students will be placed in the appropriate course on the basis of their scores and other pertinent information. Students with a knowledge of Italian should contact the department for placement.

Expectations of Transfer Students

Four courses or 14 semester hours of beginning and intermediate Italian course work, equivalent to UGA ITAL 1001-2002, are required. Study abroad courses can be used to fulfill part or all of these prerequisites, upon permission of advisors in the department.

Special Requirements

A minimum grade of C is required in course work for this major.

No student may receive credit for any course which is a prerequisite to a course for which college credit has already been received. Exceptions may be made only by the head of the department.

Certain courses in the Department of Romance Languages are not open to native speakers of that language. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was French, Italian, Portuguese, or Spanish.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Upper division (12 hours)	
Any level (21 hours)	
Total hours required	**120**

Study Abroad

The Department of Romance Languages encourages all students to participate in an accredited study abroad program for an academic year, a semester, or the summer. Prior departmental approval is required for credit. Contact the Office of International Education (542-1557) for information about programs. Check with the department for the maximum number of hours that will count for a major or minor.

Minor in Italian

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Japanese Language and Literature

Bachelor of Arts (A.B.)

Contact Person
Dr. Katarzyna Jerzak
Undergraduate Coordinator
kejerzak@arches.uga.edu
(706)542-2148

Department
Comparative Literature
College of Arts and Sciences

Description of the Program

The program pays equal attention to the four language skills of speaking, listening, reading, and writing. Graduates should be able to read diverse Japanese texts with little external help except from dictionaries, and should also be able to express ideas about complex social and literary issues orally and in writing in grammatical Japanese.

Career Opportunities

Opportunities for graduates include graduate study, education, foreign service, and international business.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Special Requirements

Students are required to attend the computer lab regularly to practice Japanese writing.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: At least one 2000-level literature course (take under major electives if not taken in Area C)	
Area F:	18
JPNS 1001, 1002	
Two 2000-level literature courses (3 hours may be satisfied under Area C in the core)	
Remaining hours taken in courses relevant to the study of language and literature, to be selected from transferable courses in AFAM, ARTS, CHNS, CLAS, LATN, GREK, JPNS, KREN, DRAM, ENGL, GRMN, RUSS, HIST, LING, MUSI, PHIL, RELI, ROML, ITAL, PORT, SPAN, FREN, SWAH, WMST, YORB	

Major Requirements:	27
Choose three courses from JPNS 3010, 3020, 4110, 4120	
Choose three Asian Literature courses from CMLT 4600, 4610, 4620; JPNS 4500	
Choose three Asian Culture courses from ARHI 3040, 4620, 4930 (if the course topic is Asian art); CMLT(ANTH) 3180; GEOG 4740; HIST 3601, 3602, 4600; POLS 4390; RELI 3300, 4401, 4402, 4403, 4404, 4910; a fourth Asian Literature course (CMLT 4600, 4610, 4620, or JPNS 4500)	
Major Electives:	6
JPNS 2001, 2002	
General Electives:	27
(Refer to College-wide requirements when selecting general electives.)	
Upper division (15 hours)	
Any level (12 hours)	
Total hours required	**120**

Minor in Japanese Language and Literature

(706) 542-4715

Marsha M. Grizzle
Degree Program Specialist
mgrizzle@arches.uga.edu
(706) 542-4725

Department
School of Environmental Design

Description of the Program

The undergraduate program leading to the degree of Bachelor of Landscape Architecture includes 156 credit hours and is designed as a professional curriculum. The professional curriculum contains 96 hours of Landscape Architecture courses, which includes 8 hours of Internship and one course in surveying. During five years of study, students are progressively introduced to the complexities of environmental design through a series of graduated studio exercises. These are augmented by lecture classes on theoretical, philosophical and technical subjects. Consultants visit the School to lecture on new ideas and philosophies and students are required to participate in several prescribed field trips arranged on a class by class basis to visit important projects in the southeast. During part of the fourth year, students are required to obtain approved employment as interns with professional design offices to gain professional experience.

Career Opportunities

Landscape architecture implies a problem-solving orientation. Theoretical knowledge is applied to arrive at practical solutions in a variety of settings. In preparation for careers, students work in a professional internship. The range of professional employment includes: private landscape design and planning firms; local, state and regional park and planning agencies; and federal agencies concerned with design, planning and management of large land areas such as national forests and parks.

Entrance Requirements

There are no special entrance requirements for freshmen. Students transferring to the School from other majors inside the University and from schools other than UGA must have completed Core Areas A-E and Area F.

Expectations of Transfer Students

Recommended background preparation for transfer includes courses in botany, horticulture, engineering, graphic arts, and physical science.

Program Requirements

Semester Core Curriculum	**Hours**
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area D: BIOL 1103-1103L or BTNY 1210-1210L and GEOG 1113 and CSCI or MATH or STAT	
Area F:	18
EDES 1500, 2210, 2220, 2510; ENGR 1020; LAND 2310, 2320	
Major Requirements:	88
EDES 2520, 3230, 4240; LAND 1600, 2010, 2020, 3030, 3040, 3330, 3340, 3410, 3420, 3530, 3540, 4050, 4060, 4070, 4250, 4360, 4370, 4380, 4390, 4550, 4560, 4570, 4700, 4710, 4720, 4900	
Major Electives:	8
Eight hours from the following prefixes: ARTS, BTNY, CRSS, EDES, ENTO, FORS, GEOG, GEOL, HORT, LAND, LEGL, REAL	
Total hours required	**156**

Fees
Students are responsible for various tools and materials necessary for studio classes and for fees incurred for class field trips.

Scholarships
A number of scholarships are provided to the School of Environmental Design through the generosity of individuals, clubs and the School alumni society. These scholarships are granted based on academic performance in the School, leadership and need. The scholarships are awarded in September for the academic year. A request for applications is posted in spring semester, well in advance of the deadline. Availability of specific scholarships and amounts may vary from year to year. Students may obtain complete information regarding scholarships in 609 Caldwell Hall.

Landscape and Grounds Management

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Tim Smalley
Associate Professor & Undergraduate Coordinator
tsmalley@arches.uga.edu
(706)542-0788

Department
Horticulture
College of Agricultural and Environmental Sciences

Description of the Program
This program is designed to educate students in the application of basic principles to the installation and management of environmentally sound landscapes, grounds, and interiorscapes. These functions include wetlands reclamation, replacement, and enhancement; minimization of the impact of agricultural chemicals on the environment; landscape waste management; and water quality and conservation in the home landscape and grounds, on the golf course, at amusement parks, commercial buildings and offices, and outdoor athletic facilities.

Career Opportunities
This major provides skills needed to own a landscape contracting or grounds management business or to work at the management level. Graduates may work for world renowned theme parks such as Disney World, beautiful public gardens such as Callaway Gardens, world renowned golf courses such as Augusta National, or well-known athletic facilities such as Sanford Stadium. Opportunities are also available in sales, government, agricultural extension, and other agencies. Graduates may continue their education in graduate school, which could lead to a research and/or teaching career at a major university or in industry.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Courses in chemistry, biology/botany, and precalculus are desirable.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E: See Core Curriculum *Required courses in Area A*: ENGL 1101, 1102, and MATH 1113 *Preferred course in Area C*: SPCM 1100 *Preferred courses in Area D*: BTNY 1210-1210L or BIOL 1107-1107L; (CHEM 1211, 1211L) and CSCI 1101-1101L or STAT 2000	42
Area F: AAEC 2110 or ECON 2106; BTNY 1220-1220L or BIOL 1108-1108L; CHEM 1212, 1212L; ENGR 1020; 5-6 hours of 1000/2000-level electives	18
Major Requirements: AAEC 3100 or AAEC 3040; AAEC 3980; CRSS 3050-3050L, 3270-3270L; CRSS (ENTO)(PATH) 3500; ENGR 3070; ENTO(CRSS) 4250-4250L; HORT 3500-3500L, 3510-3510L, 3700, 3710, 4000, 4090, 4110, 4210, 4440-4440L; HORT(LAND) 3450; PATH 3530-3530L	50
General Electives: Any level	10
Total hours required	**120**

Scholarships
Numerous general national and college scholarships and two scholarships specific to horticulture are available. For more information about college-wide scholarships, contact the Office of Academic Affairs

Internships
An internship is highly recommended but not required. Numerous national and state internships are available.

Latin

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Sarah Spence
Undergraduate Coordinator
sspence@arches.uga.edu
(706)542-0417

Department
Classics
College of Arts and Sciences

Description of the Program

This program provides students with an opportunity to pursue studies in Roman literature, history, archaeology, art, philosophy, and religion while concentrating on the Latin language.

Career Opportunities

Employment opportunities include teaching at the secondary level, non-teaching academic positions, museum, library, editorial work, travel and tourist industry, government positions in foreign service, graduate school in classics, comparative literature, linguistics, history, and other fields (for University teaching positions). Other opportunities include careers in law, journalism, or business.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Ideally, transfer students should have completed fourth semester Latin, or three to four years of high school Latin and courses in ancient history or classical culture.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: CLAS 1000 and CLAS 1010 (take under general electives if not taken in Area C)	
Area F:	18
LATN 1001, 1002, 2001 (if 1001 has already been satisfied); CLAS 1020 or CLAS (ANTH) 2000	
Three courses from CMLT 2210; HIST 2301; LING 2100; PHIL 1500	
Major Requirements:	21-24
LATN 2001 (if not taken in Area F), 2002, 3010	
Five courses from the following: LATN 4010, 4020, 4030, 4040, 4050, 4060, 4070, 4080, 4090, 4100, 4200, 4210, 4220, 4300, 4310, 4320, 4400	
Major Electives:	9-12
Three or four courses 3000-level or above, in any combination, in CLAS, GREK, or LATN, or courses in ANTH, ARHI, CMLT, HIST, LING, PHIL that have a significant component dealing with the ancient Greco-Roman world and are approved by the Classics Department, or up to 6 hours of 1000- or 2000-level Greek.	
General Electives:	27
(Refer to College-wide requirements when selecting general electives.)	
Upper division (12-18 hours)	
Lower division (9-15 hours)	
The hours vary depending upon whether or not any 1000/2000-level Greek courses are chosen in the Major Electives category; if none are taken, majors must complete at least 12 more hours of Upper Division course work and up to 15 hours of Lower Division course work; if one 1000/2000-level course is taken in the Major Electives category, the student must complete at least 15 hours of Upper Division electives and up to 12 Lower Division hours; if two 1000/2000-level courses are taken in the Major Electives category, the student must complete at least 18 hours of Upper Division electives and up to 9 Lower Division hours.	
Total hours required	**120**

Scholarship

The Warlick-Mannion Scholarship (up to $1,000 per year) is available.

www.linguistics.uga.edu

Department
Linguistics Program
College of Arts and Sciences

Description of the Program

Linguistics is an interdisciplinary program whose faculty are based in many departments in the Franklin College of Arts and Sciences and in the College of Education. Its undergraduate curriculum is designed to offer students the opportunity to learn about the many different ways that human language can be studied. Linguistics is not the same as the study of many different languages, although exposure to several languages is required in Area F of the Core requirements for the major. Foundation courses teach basic concepts about speech sounds, words, and their arrangement into meaningful patterns. Linguistics at UGA offers four applied areas: Cognitive Linguistics, Second Language Acquisition, Historical Linguistics, and Language Variation/Sociolinguistics. Majors and minors must take two foundation courses, and then will select other courses to gain experience in the applied areas and to pursue their interests.

Career Opportunities

While there are no jobs waiting for Linguistics majors as there might be for engineers or nurses, employers do value the Linguistics major. Exposure to languages promises communication skills, and the technical aspects of the study of language suggest that majors will be able to cope with technical materials; technical writing is one field in which Linguistics majors are likely to find employment. Students with extensive computer training will find that Linguistics may offer them an edge for jobs in the expanding field of natural language processing and artificial intelligence. For those students who wish to continue their studies, the Linguistics major can provide a good foundation for professional programs or for graduate programs in Anthropology, Cognitive Sciences, English or another modern language, Psychology, and other fields besides Linguistics itself.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Transfer students who have taken Linguistics courses at other universities should contact the director of the Linguistics Program for evaluation and assignment of the appropriate equivalents in UGA courses.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E: See Core Curriculum *Required courses in Area A*: ENGL 1101, 1102, and MATH 1101	42
Area F: LING 2100; one modern foreign language through the fourth semester; two courses in non-Indo-European language (Arabic, Chinese, Hebrew, Japanese, Korean, Swahili, Yoruba, and others); additional hours to fulfill Area F from the following 1000/2000-level courses: ANTH, ARTI, CLAS, CMLT, ENGL, FREN, GEOG 1101-1101D, 1125-1125D, GEOG (ANTH)(CMLT)(HIST)(SOCI) 2100, GREK, GRMN, ITAL, LATN, PHIL, PORT, RELI, ROML, RUSS, SPAN, SPCM, SWAH	18

The magazines major is designed to help students prepare for careers in magazines, specialized publications, and other employment areas which require expertise in information gathering, analysis of information, writing, and editing.

Career Opportunities

Magazine graduates typically begin their careers as reporters, writers, copy editors, or layout and design specialists.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.5, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Expectations of Transfer Students

The academic program for the A.B.J. degree consists of two parts: Areas A-F of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

Admission to the University of Georgia is not a guarantee of admission to the College of Journalism and Mass Communication. All journalism and mass communication majors have been designated as "restricted" which means more students usually apply than can be accepted; therefore, admission is competitive. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and other resources. In reaching its decisions on how many students may be admitted each semester the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201, College of Journalism and Mass Communication. The deadline is 4:00 p.m. on Friday of the second full week of classes.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (including one hour of PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 32 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Magazines major.

A grade of C or higher must be earned in any journalism and mass communication course or any prerequisite to a course which counts toward satisfaction of requirements for the A.B.J. degree.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred course in Area E: ANTH 1102 or GEOG 1125-1125D	

Area F: 18
Foreign language sequence through the third semester
ECON 2105 or 2106
Choose 9 hours of 1000/2000-level courses from ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT

Major Requirements: 30-32
JOUR 3310, 3410 or 3410H, 3510, 5580; JRLC 5040
Choose 13 to 15 hours (4 to 5 courses) from the following (up to 6 hours may be chosen from any courses in the College; at least 6 hours must be in writing/editing courses*): JOUR 3610, 3710, 5010, 5170, 5300*, 5360*, 5370, 5410, 5530*, 5590*, 5600*, 5620, 5700*, 5800*, 5990*; JRLC 5080, 5210, 5490

Major Electives: 15
Choose 15 hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.

General Electives: 13-15
Choose 13 to 15 hours of courses at any level in any disciplines other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.

Photojournalism Emphasis
Students seeking a photojournalism emphasis must take JOUR 3610, 3710, 5370, and one course from JOUR 5170, 5350, 5360, 5990

Total hours required **120**

Fees
Some courses require the purchase of a supply card from the University bookstore.

Scholarships
About 25 undergraduate scholarships are administered by the College each academic year. A general application submitted during the spring semester assures consideration for any of the scholarships for which the applicant is qualified.

Internships
Valuable practical experience is gained by serving internships. Although not required, internships are considered important to a student's total educational experience and greatly enhance job opportunities upon graduation. Academic credit may be earned for successful completion of an internship if:

1. Advance approval is received from the student's department. A written request must be submitted that includes a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.
2. Certain basic courses as determined by the department have been completed.
3. The internship covers a minimum number of weeks of full-time employment as determined by the department.
4. During the semester of the internship the student registers concurrently for JOUR 5010, which is included in the maximum semester hours of journalism and mass communication credit which may be earned toward the Magazines major.
5. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.
6. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Department
Management
Terry College of Business

Description of the Program
A primary objective of the Management major is to help students develop the perspective, the skills, and the knowledge needed to manage and lead the modern organization more effectively. What makes the life of a manager so interesting is that it requires one to address such a wide variety of problems — financial, material, human, legal, political, and environmental — almost every day. No other career provides such a rich mixture of challenges. To be successful under such condi-

tions, students must be able to work with and through groups of people toward a common end and be able to communicate with others (in both written and oral form) the mission, goals, objectives, and direction of the organization which they are chosen to lead. Further, in an increasingly complex and global business environment, students must be able to think creatively with regard to problem solving in all areas of the enterprise. The common program of study for students who are candidates for the Bachelor of Business Administration (B.B.A.) offers excellent opportunities to select course work which may well serve a variety of personal development goals in meeting the professional challenges outlined above. Within the Management major itself, the required "Management Core" (Operations, Human Resource Management, Ethics, Organizational Behavior, and Strategic Management) is designed to provide students with exposure to the central issues and competencies required for managers facing the twenty-first century.

Through appropriate selection of major elective courses, students may better prepare for career opportunities that utilize the specialized knowledge and skills offered in more specific areas, such as human resource management, association or non-profit management, operations management, or small business management.

In addition to course work, there are other means of achieving personal developmental needs for a career in management. For a complete listing, stop by the Information Desk at the Tate Center. Because managers are "joiners" and leaders, the best way to develop and demonstrate the qualities necessary for successful management is by joining and by leading whenever and wherever an opportunity occurs. Campus organizations provide just such an opportunity.

Career Opportunities

Many management majors join a major firm as management trainees. This experience prepares the new graduate for the challenges specific to a particular organization or industry and also gives senior managers the opportunity to assess a beginner's potential for higher-level leadership.

On the other hand, some students may choose to take a job with a hospital, a governmental agency, or some public sector organization, or start an entrepreneurial venture or join a family business. Others end up in such specialized areas as sales, manufacturing, purchasing, or human resource management. The career opportunities in management are limited only by a student's own dreams, aptitudes, ambition, and perseverance.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	33
FINA 3000; MGMT 3000; MSIT 3000; MARK 3000; MGMT 4240, 5400, 5440, 5820, 5920	
Choose two of the following: MGMT 4250, 4260, 4270, 4800 (3 hrs. only), 4990H, 5000, 5210, 5220, 5230, 5420, 5500, 5530, 5560, 5580, 5860, 5870, 5970, 5980; MGMT(SPCM) 5960	
Major Electives:	3
Choose one of the following: ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000	
General Electives:	24
(Refer to College-wide requirements when selecting general electives.)	
(At least one course must be upper division)	

Five courses in Arts and Sciences
One business course outside major
Two business courses outside department
Total hours required **120**

Scholarships

In addition to a wide range of scholarships available to all students regardless of major, there are several scholarships specifically available to Management majors. The T. W. Reed Scholarship is awarded annually to the junior with the highest grade point average. The National Association of Purchasing Management (NAPM) Georgia Scholarship is awarded annually to an outstanding senior to support and promote the study of materials management and purchasing. The Frank and Nancy Moore Scholarship is awarded each spring to a Management major who has demonstrated superior achievement both in and out of the classroom. The David Haven Etheredge and John McCrea Etheredge Memorial Scholarship Fund is awarded to assist outstanding freshman Management majors.

Internships and Cooperative Education

Internships and cooperative education opportunities are designed to give students a meaningful work experience in their chosen fields as a formal part of the academic program. Some of the organizations providing such opportunities for Management majors include: Atlanta Gas Light, Shaw Industries, Mount Vernon Mills, IBM, Wachovia, Blue Cross/Blue Shield, State Farm Insurance, Southern Electronic Distributors, Media One, Coca-Cola, Southern Company, Merrill Lynch, Hyatt Hotels, Charter Hospitals, Clarke County School District, Georgia Pacific, and McMaster-Carr Supply Company.

Management Information Systems

Bachelor of Business Administration (B.B.A.)

Contact Person
Barbara Lillith
Undergraduate Coordinator
blillith@cbacc.cba.uga.edu
(706) 542-3581

Department
Management
Terry College of Business

Description of the Program

The Department of Management's undergraduate program in MIS is designed to educate future information systems professionals and managers. The program is not designed to train students to be computer scientists, programmers, or technicians. The emphasis is placed on the management of information systems so that graduates may ultimately assume managerial positions at the vice-presidential level. In some companies, information systems are of such strategic importance that managers with an MIS background are becoming chief executive officers.

The MIS course work prepares students for a variety of jobs. The program is interdisciplinary in nature with specialized training in information systems, management, and information technology. It builds on the Terry College of Business common core, which includes course work in accounting, economics, legal studies, mathematics, statistics, computer programming, finance, marketing, production, and management. The program's educational objectives are realized through a variety of instructional methods, including "hands-on" computer experience; class lecture and discussion; textbook and article study; class assignments, laboratory projects, and applied team projects in the business community; demonstrations; field trips; and presentations by MIS practitioners.

Specifically, the MIS program requires 21 hours (7 courses) of major course work beyond the TCB common core. Six courses (Computer Programming in Business, Data Management, Systems Analysis and Design, Decision Support Systems, Telecommunications and Networking, and Managing the Information System Resource) are taken by all MIS majors. The remaining major course may be chosen from such areas as Rapid Application Development, Knowledge-Based Systems, and Business Application Software.

Career Opportunities

The MIS field is widely recognized for its current and future career potential. Specific career opportunities depend on personal interests. Graduates may directly enter the MIS function and rise through the MIS ranks or become MIS specialists in a given functional area, such as production or finance, and serve as the liaison between MIS and that functional area. Some graduates go into end-user support, often working in an information center. Employment opportunities exist with such organizations as hardware vendors, software vendors, and consulting firms that provide MIS products and services. Typical entry-level positions include applications programmer, systems analyst, information analyst, and end-user support specialist.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements*:	33
FINA 3000; MARK 3000; MGMT 3000, 4600, 4610, 4620, 5620, 5640, 5670; MSIT 3000	
Choose one course from MGMT 4800 (3 hrs. only), 5600, 5630, 5660, 5680, 5710	
*Note that MGMT 4600 and 4610 are prerequisites for all other courses in the program. Due to these and other prerequisites, the major courses cannot be completed in fewer than three semesters.	
Major Electives:	3
Choose one of the following: ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000	
General Electives:	24
(Refer to College-wide requirements when selecting general electives.)	
(At least one course must be upper division)	
Five courses in Arts and Sciences	
One business course outside major	
Two business courses outside department	
Total hours required	**120**

Scholarships

In addition to a wide range of scholarships available to all students regardless of major, the various companies represented on the UGA-MIS Industry Advisory Board annually award scholarships to outstanding undergraduate MIS majors.

Internships and Cooperative Education

Internships and cooperative education opportunities are designed to provide a meaningful work experience in Management Information Systems as a formal part of the academic program. Some of the organizations providing such opportunities for MIS majors include Andersen Consulting, Lotus Development Corporation, IBM, CNN Interactive, Wachovia, Citicorp Credit Services, BellSouth Telecommunications, HBO, Ernst & Young, Walt Disney World, Towers Perrin, Continental Airlines, Norfolk Southern, and Hewlett-Packard.

Marketing

Department
Marketing and Distribution
Terry College of Business

Description of the Program

Marketing is an integral part of our everyday activities and experiences. It is concerned with developing, transporting, promoting, and selling the vast assortment of products and services needed to satisfy the diverse wants and needs of consumers. It is an indispensable part of business practice and a challenging field for study and research.

All marketing majors are required to take a core of courses devoted to the development of analytical skills. These required courses draw heavily upon both the behavioral and quantitative sciences and are designed to help students gain an understanding of the analytical methods and research procedures used in identifying and solving marketing problems. Specialized study is available in advertising and sales promotion, sales and sales

management, logistics management, services marketing, direct marketing and international marketing.

The marketing faculty at UGA brings a broad range of perspectives and experiences to the classroom. All are dedicated teachers and active contributors to the marketing profession. Many are known nationally and internationally for their achievements, and studies in marketing journals consistently place UGA among the top marketing departments in the nation.

Throughout their program, marketing students work closely with the department's advisor, who provides assistance in course selection, individual program progress, and long-range planning.

The department sponsors a very active student organization which offers students valuable business contacts, leadership experience and social interaction. There are two marketing honor societies designed to recognize outstanding academic performance.

Career Opportunities

The purpose of the marketing major at UGA is to provide students with a basic understanding of marketing and its vital role in society. The marketing curriculum is future-oriented and emphasizes the skills needed for successful and responsible careers in advertising, sales, sales management, wholesaling, research, physical distribution, product management, and related areas. The curriculum is designed to develop the broad background of knowledge required for continuing professional growth in a changing world that is constantly demanding better trained people for executive positions. There are more than 350 undergraduate marketing majors at UGA; more than 150 of them complete Program Requirements for the B.B.A. in marketing each year. Many UGA marketing graduates move directly into lucrative sales or management training programs; others go on to graduate programs, such as the Master of Marketing Research (M.M.R.), to prepare for academic or professional careers.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	33
FINA 3000; MGMT 3000; MSIT 3000; MARK 3000, 4000, 4100, 4900	
Choose four of the following: MARK 4200, 4250, 4300, 4400, 4500, 4600, 4700, 4800 (The combination of MARK 4200 and MARK 4250 constitutes a Sales Sequence.)	
Major Electives:	3
Choose one of the following: ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000

Department
Occupational Studies
College of Education

Description of the Program

The marketing education program prepares individuals to teach a cluster of marketing and marketing-related courses in public secondary and postsecondary institutions. Majors enroll in a cross-section of courses in marketing and management offered by the Terry College of Business as well as marketing education and professional education courses from the College of Education. Additional opportunities for marketing internships and occupational updates in business and industry are provided for majors in marketing education.

Career Opportunities

Students are prepared as teachers for grades 7-12 and post-secondary technical institutes. These educational experiences also enhance the ability of the marketing education major to seek other positions in both the public and private sectors related to the areas of training and development and marketing management.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F, grades of C or better in Area F courses, a passing score on Praxis I, and an overall GPA of 2.0 (2.5 required for admission to teacher education).

Expectations of Transfer Students

Recommended courses for transfer students include accounting, business law, economic, psychology, and computer technology.

Special Requirements

A 2.5 GPA is required for admission to teacher education. Appropriate occupational experience in marketing is required for teacher certification.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area E: ECON 2105, 2106, and PSYC 1101 (minimum grade of C)	
Area F:	18
ACCT 2101, 2102 (minimum grade of C); EFND 2030; EPSY 2020; MGMT 2090; three hours of 1000/2000-level electives	
Major Requirements:	49
(Minimum grade of C required)	
EMKT 4100, 4110, 4120, 5460 (9 hours); EOCS 2450 (1 hour), 3010, 3450 (1 hour), 4010, 4350, 4360, 5030, 5450 (3 hours), 5550; LEGL 2700; MARK 3000; MGMT 3000	
General Electives:	11

Leonard Chastkofsky
Associate Department Head
lenny@alpha.math.uga.edu
(706)542-2211

Department
Mathematics
College of Arts and Sciences

Description of the Program

The Mathematics major at the University of Georgia is demanding yet versatile. The skills emphasized by this major include problem solving and analysis, mathematical modeling, and abstract conceptual thinking. The importance of these skills is recognized in the variety of career opportunities available to the mathematics major. The mathematics major is sometimes used as a stepping stone to professional schools such as law, business, or medicine; it can lead to applied careers in actuarial sciences, computer modeling and applications, and optimization and control theory; it can lead to academic positions, from high school teacher to college professor. Mathematics classes

are generally small, offering students a great amount of personal attention. State-of-the-art computer labs are available to mathematics students. And finally, an active Math Club offers students opportunities to interact with each other, graduate students, and faculty. Visit our Web Page at http://www.math.uga.edu/ for further information.

Career Opportunities

Some of our recent graduates have gone on to doctoral work at various top-ranked universities while others have chosen careers in industry. Some employers who have hired recent mathematics majors are: Arthur Anderson, C&S Bank, Delta Airlines, Hansen Inc., NASA, National Security Agency, Southern Bell, and the U.S. Navy.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students are ordinarily expected to have completed the calculus sequence (through MATH 2500), Introduction to Linear Algebra (MATH 3000), Sequences and Series (MATH 3100), and Elementary Differential Equations (MATH 2700) before beginning their junior-year course work. Earliest possible completion of Introduction to Higher Mathematics (MATH 3200) will facilitate the timely fulfillment of major requirements. Mathematics majors are encouraged to take Introductory Physics for Science and Engineering Students—Mechanics, Waves, Thermodynamics (PHYS 1211-1211L) and Introductory Physics for Science and Engineering Students—Electricity and Magnetism, Optics, Modern Physics (PHYS 1212-1212L), as well as Introduction to Computing and Programming (CSCI 1301-1301L).

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: MATH 2200, 2200L and two of the following: PHYS 1211-1211L, 1212-1212L, and CSCI 1301-1301L (take under general electives if not taken in Area D)	
Area F:	18
Math 2210, 2210L	
Choose either MATH 2500 or 2700	
Choose two courses from the following which have not been taken in Area D: PHYS 1211-1211L, 1212-1212L; CSCI 1301-1301L, 1302, 2670, 2720	
Choose one course from PHIL 2500; any Biological Science course approved for Area D; any Chemistry course approved for Area D at or above the level of CHEM 1211; any 2nd, 3rd, or 4th semester foreign language courses; any 1st semester foreign language course not studied in high school	
Major Requirements:	24
MATH 4000	
Choose one course from MATH 4100, 4150, 4250	
Six additional 3-hour MATH courses at the 3000 level or above	
General Electives:	36
(Refer to College-wide requirements when selecting general electives.)	
Upper division (15 hours)	
Any level (21 hours)	
Total hours required	**120**

Scholarships

The Strahan Award is a scholarship awarded to the outstanding junior majoring in mathematics.

Description of the Program

This program prepares students to teach mathematics in secondary schools.

Career Opportunities

Apart from preparing students to teach mathematics in Georgia, grades 7-12, the program prepares students for graduate studies in mathematics and for careers that call for mathematics, computer science, and interpersonal skills.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and an overall GPA of 2.5.

Expectations of Transfer Students

Students transferring into Mathematics Education at the beginning of their junior year should have completed all core requirements, including the calculus sequence MATH 2200, 2200L, 2210, 2210L. An overall GPA of 2.5 is required.

Special Requirements

A minimum grade of C is required in each mathematics course, in each education course, and in requirements for admission to Teacher Education.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E: See Core Curriculum *Required courses in Area A*: ENGL 1101, 1102, and MATH 1113 (or MATH 2200, 2200L if 1113 is exempted) *Preferred courses in Area D*: MATH 2200, 2200L or 2210, 2210L (if 2200, 2200L are taken in Area A)	42
Area F: EFND 2030; EPSY 2020; SPED 2000; three courses from the following: CSCI 1301-1301L; EMAT 2000; MATH 2210, 2210L or 2500 or 2700; PHYS 1111-1111L or 1112-1112L or 1211-1211L or 1212-1212L; SPCM 1110 or 1800	18
Major Requirements: EMAT 3450 (2 hours), 3500, 4360, 4500, 4680, 4950, 5360, 5460 (10 hours); *MATH 3000, 3200, 4000, 5200 or approved equivalents; STAT 4070 or approved equivalent *Students are encouraged to move into 3000-level MATH courses as early as possible	45
Major Electives: Two 3000-level or above MATH electives (6 hours); three hours of an elective in EMAT or MATH or STAT (3000-level or above)	9
General Electives: Any level	6
Total hours required	**120**

Microbiology

Degree
Bachelor of Science (B.S.)

Contact Person
T. R. Hoover
Associate Professor
trhoover@arches.uga.edu
(706) 542-2675

Department
Microbiology
College of Arts and Sciences

Description of the Program

The Department of Microbiology offers courses of instruction in general microbiology, procaryotic biology, pathogenic microbiology, bacterial genetics, medical mycology, environmental microbiology, and biotechnology. Although a laboratory experience is included with some of these courses, the department also provides the opportunity for a student to take intensive laboratory courses that deal primarily with the research aspects of the discipline.

Career Opportunities

A major in microbiology represents a suitable program of study for graduate school in a number of related disciplines such as Biochemistry or Molecular Biology. The major is especially suitable for pre-medical, pre-dental, and pre-veterinary students. Positions as laboratory technicians are also available to graduated majors in academia, industry, and government.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. Students must earn a grade of C or better in each of the following courses: CHEM 1211, 1211L, 1212, 1212L (or 1311H, 1311L, 1312H, 1312L); BIOL 1107-1107L, 1108-1108L; CHEM 2211, 2211L, 2212, 2212L; MATH 1113.

Expectations of Transfer Students

The initial courses in microbiology are MIBO 3500 and MIBO 3510L. It is recommended that these courses be taken at this University, preferably in the first semester of the junior year. Introductory microbiology courses taken elsewhere are usually not accepted. Prerequisites are BIOL 1108-1108L and CHEM 2211. It is recommended that BCMB (BIOL) (CHEM) 3100 be taken prior to, or concurrently with, MIBO 3500. There are no placement examinations or mandatory co-curricular activities.

Fees

Fee cards for MIBO 3510L and 4700-4700L must be purchased at the bookstore. The current cost is about $18.00 per card.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: MATH 2200, 2200L, and either of the following lab science sequences (the other sequence to be taken in Area F): CHEM 1211, 1211L and 1212, 1212L or BIOL 1107-1107L and 1108-1108L	
Area F:	18
Either of the lab science sequences not taken in Area D; CHEM 2211, 2211L; Foreign Language (2nd & 3rd semesters)	
Major Requirements:	26-28
BCMB(BIOL)(CHEM) 3100; GENE (BIOL) 3200; MIBO 3500, 3510L, 4090	
Choose one of the following: MIBO 4400L, 4600L, 4700-4700L, 4800L, 4900L	
Choose one of the following: MIBO 4220, 4300; MARS(MIBO) 4620-4620L	
Choose one of the following: CBIO (MIBO) 4100; MIBO 4220, 4300, 4400L, 4600L, 4700-4700L, 4800L, 4900L, or MARS (MIBO) 4620-4620L	
Choose one three-hour course from the following: Any 3000-or 4000-level course in MIBO, BIOL, BCMB, CBIO, BTNY, MARS, ECOL, or GENE, or FDST (MIBO) 4030-4030L, 4120-4120L; FDST (EHSC)(MIBO) 4310-4310L, 4320-4320L; CRSS (MIBO) 4610-4610L	
Major Electives:	18-19
PHYS 1111-1111L and 1112-1112L or 1211-1211L and 1212-1212L; CHEM 2212, 2212L	
Choose one of the following: CSCI 1210; MATH 2210, 2210L; STAT 2000	
Choose three hours of electives from philosophy, literature, religion, or fine arts	
General Electives:	13-16
(Refer to College-wide requirements when selecting general electives.)	
Upper division (11-13 hours)	
Any level (0-5 hours)	
Total hours required	**120**

Middle School Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Joyce Brown
Academic Advisor
jcbrown@arches.uga.edu
(706)542-4244

Department
Elementary Education
College of Education

Description of the Program

The Middle School Education program has two cohorts starting each fall semester. Each cohort is limited to 22 students, for a total of 44 students entering the program each year. Each cohort consists of four semesters of course work, including one semester of student teaching. Only students who have met the entrance requirements are eligible to apply to the program. Applicants must apply for a specific fall semester (e.g., the 1999 fall semester). Contact the Elementary Education Department for an application and deadlines.

Career Opportunities

An individual with a teaching certificate in middle grades education is licensed to teach all subjects offered in grades 4-8.

Entrance Requirements

To be considered for admission to the program in Middle School Education, a student must have completed Areas A-F of the core curriculum; have grades of C or better in Area F and pre-professional courses; have an overall GPA of 2.75; have a passing score on the Praxis I (by test score or exemption); have completed 50 hours of pre-professional experience; and have submitted a satisfactory essay to the Middle School Education Admissions Committee.

Expectations of Transfer Students

Students are encouraged to contact the academic advisor for specific transfer information.

Program Requirements

Note: Students in this major choose a primary specialization (Specialization I) and a secondary specialization (Specialization II) from the following: Language Arts, Mathematics, Science, or Social Science. Electives in Area F and courses in the major are chosen based on specialization areas.

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	

Required courses in Area A: ENGL 1101, 1102, and MATH 1101
Preferred course in Area C: One course in CLAS, CMLT, or ENGL
Preferred course in Area D: MATH 1113 (if not taken in Area A)
Area F: 18
EDIT 2000; EFND 2030; EPSY 2020; SPED 2000
Elective—3 hours in Specialization Area I and 3 hours in Specialization Area II as determined by Specialization Area: CHEM 1110, 1110L (Science); 3-hour ENGL elective (Language Arts); ECON 2105, GEOG 1101-1101D, or any 1000/2000-level HIST course (Social Science); or MATH 2200, 2200L (Mathematics)
Major Requirements: 58-60
EDMS 5020, 5030, 5460 (15 hours); ELAN 5200; READ 3530
Choose one Specialization I and one Specialization II in different areas
Language Arts Specialization I
ELAN 5210, 5220; 12 hours of electives (must include one American Literature course 3000-level or above). Other electives may be selected from ENGL 3000-level or above, CLAS, CMLT 3000-level or above, DRAM, ELAN, JOUR, LING, READ, or SPCM
Mathematics Specialization I
EMAT 5280, 5290, 5310, 5320; MATH 5020, 5030
Science Specialization I
Four-hour CHEM elective approved by Middle School Education advisor; ENTO 5730-5730L; ESCI 4430, 4440; GEOL 4750
Social Science Specialization I
ESOC 4400; choose 15 hours of Social Science electives from ESOC(HIST) 4150; ESOC 5010, 5520; HIST 3000-level or above
Language Arts Specialization II
ELAN 5210, 5220; 9 hours of electives (must include one American Literature course 3000-level or above). Other electives may be selected from ENGL 3000-level or above, CLAS, CMLT 3000-level or above, DRAM, ELAN, JOUR, LING, READ, or SPCM.
Mathematics Specialization II
MATH 5020, 5030; EMAT 5280, 5290, 5320
Science Specialization II
Four-hour CHEM elective approved by Middle School Education advisor; ESCI 4430, 4440; GEOL 4750
Social Science Specialization II
ESOC 4400; choose 12 hours of Social Science electives from ESOC(HIST) 4150; ESOC 5010, 5520; any HIST courses 3000-level or above
Major Electives: 0-2
EDMS 4000 (if needed)
Total hours required **120**

Music

Degree
Bachelor of Arts (A.B.)

Contact Person
Suzanne Caruso
Degree Program Assistant
Undergraduate Office
scaruso@rameau.music.uga.edu
(706)542-2764

Department
School of Music
College of Arts and Sciences

Description of the Program

The Bachelor of Arts degree with a major in Music is designed to allow students to study music without the focus of a particular professional major. The program is structured to provide a strong emphasis in applied music, theory, and music literature with a broad block of general education studies. The degree provides a foundation for professional pursuits in music and prepares the student to enter graduate study in music or other disciplines which accept a general liberal arts degree for entry. The degree is also useful for those who plan to pursue a career which requires a liberal arts education but no specific vocational training.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field following the completion of their baccalaureate degree. Some music majors choose to attend graduate school in pursuit of further music studies. Other UGA music graduates go on to pursue degrees in fields outside of music such as law, business, medicine, or computer science.

Entrance Requirements and Expectations of Transfer Students

Admission to the School of Music is accomplished

by completing Core Areas A-E and Area F and by successfully auditioning on a major instrument or voice. This applies to incoming freshmen as well as to transfer students. Students must be admitted into major-level study, which consists of private applied lessons at two credits or higher. Auditions are scheduled through the Undergraduate Office of the School of Music and are evaluated by a faculty jury in the appropriate area of applied music. Students are expected to be prepared to play or sing representative works from their repertoire. For specific detailed audition requirements, contact the School of Music Undergraduate Office.

All music majors are required to take music theory. Transfer students are required to take the Theory Diagnostic Exam offered prior to the beginning of every semester. Contact the Undergraduate Office of the School of Music for the exact date and location of the exam.

Music Major Checksheets listing all the Program Requirements are available in the Undergraduate Office in the School of Music. A School of Music Undergraduate Booklet is also available upon request from the Undergraduate Office. This booklet gives detailed information about the various music majors, music organizations, audition requirements, and scholarship information.

Special Requirements

Further requirements for all music majors include: 1) receiving a grade of C or better in all major courses; 2) passing a keyboard proficiency test; 3) participating in the performing organization appropriate to the major performance medium each semester (e.g., string majors participate in orchestra, voice majors participate in choral organizations, etc.); and 4) attendance and participation in a minimum number of recitals per semester. The student pursuing an A.B. with a major in music may choose to perform a 15-minute minimum senior recital or to perform a jury in place of the recital.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: Six hours from RELI 2004, RELI(AFAM) 2005, or ENGL 2400	
Preferred courses in Area D: GEOL 1121, 1121L, 1122, 1122L	
Preferred course in Area E: ANTH 1102	
Area F:	18
MUSI 1100, 1110, 1120, 1130, 1810 (2 hours), 1820 (2 hours)	
Choose one of the following: MUSI 2400 and 2410 or MUSI 2500 and 2510	
Choose four hours of Performing Organization courses from the following: MUSI 2700, 2710, 2720, 2730, 2740, 2750, 2760, 2770, 2800, 2840	
Major Requirements:	29
Applied Study: Primary Instrument or Voice	
Choose 12 hours from the following: MUSI 2810, 2820, 3810, 3820, 3910, 4810, 4820, 5910	
Secondary Applied	
Choose either of the following: MUSI 2420 and 2430; MUSI 2520 and 2530	
Music Theory/Ear Training	
MUSI 2100, 2110, 2120, 2130, 3240	
Music History	
MUSI 3210, 3220	
Major Electives:	11
Choose four hours of Performing Organization courses from the following: MUSI 2700, 2710, 2720, 2730, 2740, 2750, 2760, 2770, 2800, 2840, 4700, 4710, 4720, 4730, 4740, 4750, 4760, 4770, 4800, 4840	
Choose four hours of ensemble courses from the following: MUSI 4780, 4790, 4800	
Three hours of foreign language through the third semester	
General Electives:	20
(Refer to College-wide requirements when selecting general electives.)	
Upper division (12-20 hours)	
Any level (0-8 hours)	
Total hours required	**120**

Fees

Music majors are required to pay for the following services. For more specific information on these items, students should contact the School of Music Office, (706) 542-3737.

1) Recitals: All students are required to pay a recording fee for every recital they perform. The length of the recital and the time of day of the program affect the cost of the recital fee.
2) Recital Cards: Music majors are required to attend a minimum number of recitals per semester and are required to purchase a recital card which will be presented and punched to record attendance at each recital on campus. The recital card lasts for one academic year. Recital cards are available from the Music Office.

Scholarships

Financial aid available through the School of Music includes both School of Music sponsored and band sponsored scholarships. These scholarships are renewable each year with a maximum contract length of four years as long as the student's level of achievement is satisfactory. One audition satisfies both the admission and scholarship consideration requirements. The School of Music and University Bands Scholarship applications and additional information on the application process are found in the Undergraduate Booklet, which may be obtained from the Undergraduate Office: (706) 542-2764.

Department
School of Music
College of Arts and Sciences

Description of the Program

The Bachelor of Music with a major in Composition is designed to prepare the student to begin professional work or to pursue graduate study. The program provides three years of applied study on a major instrument, as well as three years of intensive study in composition, during which the student participates in weekly seminars that focus on the analysis of contemporary music and evaluation of student compositions. The program includes a strong foundation in theory and music literature along with applied study on a secondary instrument. Performance of contemporary music is emphasized. The senior recital requires a multi-movement or large-form composition for an ensemble.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field after completing their baccalaureate degree. Some music majors choose to attend graduate school in pursuit of further music studies. Other UGA music graduates go on to pursue degrees in fields outside of music such as law, business, medicine, or computer science.

Entrance Requirements and Expectations of Transfer Students

Admission to the School of Music is accomplished by completing Core Areas A-E and Area F and by successfully auditioning on a major instrument or voice. This applies to incoming freshmen as well as to transfer students. Students must be admitted into major-level study, which consists of private applied lessons at two credits or higher. Auditions are scheduled through the Undergraduate Office of the School of Music and are evaluated by a faculty jury in the appropriate area of applied music. Students are expected to be prepared to play or sing representative works from their repertoire. For specific detailed audition requirements, contact the School of Music Undergraduate Office, (706) 542-2764.

All music majors are required to take music theory. Freshman music majors begin their music theory study in the first semester of the freshman year. Transfer students are required to take the Theory Diagnostic Exam offered prior to the beginning of every semester. Contact the Undergraduate Office of the School of Music for the exact date and location of the exam.

Music Major Checksheets listing all the Program Requirements are available in the Undergraduate Office in the School of Music. A School of Music Undergraduate Booklet is also available upon request from the Undergraduate Office. This booklet gives detailed information about the various music majors, music organizations, audition requirements, and scholarship information.

Special Requirements

Further requirements for all music majors include: 1) receiving a grade of C or better in all major courses; 2) passing a keyboard proficiency test; 3) participating in the performing organization appropriate to the major performance medium each semester (e.g., string majors participate in orchestra, voice majors participate in choral organizations, etc.); and 4) attendance and participation in a minimum number of recitals per semester. Composition majors give recitals in both their instrument or voice applied lessons and in composition.

Students are expected to earn grades of B or better in all theory and ear training classes in order both to be admitted and to be retained in the composition program. *Note:* Conditional accep-

tance into/rejection from the composition program will be made at the end of the first semester of the sophomore year; only the instructor is responsible for this decision, unless he or she wishes to have additional opinions from the rest of the composition faculty.

Full acceptance is granted at the end of the sophomore year; this requires a jury before the full composition faculty with selected works written during the sophomore year being presented. The jury to determine full acceptance will take place at the end of the second semester of the sophomore year.

Program Requirements

The program requirements for the B.Mus. in Music Composition are undergoing revision. Please contact the School of Music or refer to the Bulletin Web site at www.bulletin.uga.edu. for current information.

Description of the Program

The program of study leading to the degree Bachelor of Music with a major in Music Education is designed for the student preparing for a career in teaching. Students completing the program are recommended for certification to teach music in the public school systems of Georgia. The program is comprehensively structured to allow for continued study at the graduate level. In accordance with state certification requirements, students may elect to pursue one of four programs of study: Choral Music Education with a concentration in voice, Choral Music Education with a concentration in piano, Instrumental Music Education with a concentration in piano, or Instrumental Music Education with a concentration in a band or orchestral instrument. With additional study the degree may be earned with more than one emphasis.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field following the completion of their baccalaureate degree. Some music majors choose to attend graduate school in pursuit of further music studies. Description of the Program

The program of study leading to the degree Bachelor of Music with a major in Performance is designed for the student preparing for a career as a professional performer, a studio teacher, or a college professor. The curriculum for the degree is designed to develop a strong foundation in music history, music theory, and performance, and to insure flexibility for continued study at the graduate level. The degree provides for maximum development of individual musicianship and the various competencies necessary to the contemporary performer. The student has numerous opportunities to perform including required junior and senior solo recitals.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field following the completion of

Scholarships

Financial aid available through the School of Music includes both School of Music-sponsored and band-sponsored scholarships. These scholarships are renewable each year with a maximum contract length of four years as long as the student's level of achievement is satisfactory. One audition satisfies both the admission and scholarship consideration requirements. The School of Music and University Bands Scholarship applications and additional information on the application process are found in the Undergraduate Booklet, which may be obtained from the Undergraduate Office: 706) 542-2764.

Music Theory

Department
School of Music
College of Arts and Sciences

Description of the Program

The program of study leading to the degree Bachelor of Music with a major in Music Theory is designed to prepare the student for graduate stud-

ies in research-oriented degrees. The curriculum is structured to give a strong foundation in the academic study of music theory with concentrations in music history, performance, and an introduction to composition. The course of study in music theory includes the areas of form and analysis, counterpoint, and compositional techniques, and culminates in a research project which demonstrates the student's knowledge and abilities in the field.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field following the completion of their baccalaureate degree. Some music majors choose to attend graduate school in pursuit of further music studies. Other UGA music graduates go on to pursue degrees in fields outside of music such as law, business, medicine, or computer science.

Entrance Requirements and Expectations of Transfer Students

Admission to the School of Music is accomplished by completing Core Areas A-E and Area F and by successfully auditioning on a major instrument or voice. This applies to incoming freshmen as well as to transfer students. Students must be admitted into major-level study, which consists of private applied lessons at two credits or higher. Auditions are scheduled through the Undergraduate Office of the School of Music and are evaluated by a faculty jury in the appropriate area of applied music. Students are expected to be prepared to play or sing representative works from their repertoire. For specific detailed audition requirements, contact the School of Music Undergraduate Office, (706) 542-2764.

All music majors are required to take music theory. Transfer students are required to take the Theory Diagnostic Exam offered prior to the beginning of every semester. Contact the Undergraduate Office of the School of Music for the exact date and location of the exam.

Music Major Checksheets listing all the Program Requirements are available in the Undergraduate Office in the School of Music. A School of Music Undergraduate Booklet is also available upon request from the Undergraduate Office. This booklet gives detailed information about the various music majors, music organizations, audition requirements, and scholarship information.

Special Requirements

Further requirements for all music majors include: 1) receiving a grade of C or better in all major courses; 2) passing a keyboard proficiency test; 3) participating in the performing organization appropriate to the major performance medium each semester (e.g., string majors participate in orchestra, voice majors participate in choral organizations, etc.); and 4) attendance and participation in a minimum number of recitals per semester.

Music majors interested in pursuing a major in Music Theory must take a Music Theory Interview with the Music Theory faculty at the end of the freshman year.

Program Requirements

The program requirements for the B.Mus. in Music Theory are undergoing revision. Please contact the School of Music or refer to the Bulletin Web site at www.bulletin.uga.edu. for current information.

Fees

Music majors are required to pay for the following services. For more specific information on these items, students should contact the School of Music Office, (706) 542-3737.

1) Recitals: All students are required to pay a recording fee for every recital they perform. The length of the recital and the time of day of the program affect the cost of the recital fee. Contact the Music Office for more information.
2) Recital Cards: Music majors are required to attend a minimum number of recitals per semester and are required to purchase a recital card which will be presented and punched to record attendance at each recital on campus. The recital card lasts for one academic year. Recital cards are available from the Music Office.

Scholarships

Financial aid available through the School of Music includes both School of Music-sponsored and band-sponsored scholarships. These scholarships are renewable each year with a maximum contract length of four years as long as the student's level of achievement is satisfactory. One audition satisfies both the admission and scholarship consideration requirements. The School of Music and University Bands Scholarship applications and additional information on the application process are found in the Undergraduate Booklet, which may be obtained from the Undergraduate Office, (706) 542-2764.

Department
School of Music
College of Arts and Sciences

Description of the Program

The program of study leading to the degree Bachelor of Music with a major in Music Therapy prepares the student for a career in the use of music for the restoration, maintenance, or improvement of mental and/or physical health. The Music Therapy curriculum includes a strong emphasis in psychology and the social sciences. It is structured to provide a foundation in the scientific application of music in rehabilitative environments such as hospitals, retardation centers, and special education programs within the framework of the public school system. Students completing the degree program are eligible to become members of the National Registry of Music Therapists upon completion of a six-month internship in an approved Music Therapy Program.

Career Opportunities

Many jobs in the market today require skills that musicians inherently possess. Such skills as diligence, determination, and detail work are second-nature to most musicians because of the nature of musical study. Many music majors find jobs in the music field following the completion of their baccalaureate degree. Some music majors choose to attend graduate school in pursuit of further music studies. Newspapers

Degree
Bachelor of Arts in Journalism (A.B.J.)

Contact Person
Ernest C. Hynds
Department Head
ehynds@arches.uga.edu
(706) 542-5030

Department
Journalism
College of Journalism and Mass Communication

Description of the Program

This major is designed to help students prepare for careers in newspapers, news services, and other employment areas which require expertise in information gathering, analysis of information, writing, and editing.

Career Opportunities

Newspaper graduates typically begin their careers as reporters, writers, copy editors, or layout and design specialists.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.5, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Expectations of Transfer Students

The academic program for the A.B.J. degree consists of two parts: Areas A-F of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

Admission to the University of Georgia is not a guarantee of admission to the College of Journalism and Mass Communication. All journalism and mass communication majors have been designated as "restricted" which means more students usually apply than can be accepted; therefore, admission is competitive. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and other resources. In reaching its decisions on how many students may be admitted each semester, the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201, College of Journalism and Mass Communication. The deadline is 4:00 p.m. on Friday of the second full week of classes.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (includes one hour of PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 32 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Newspapers major.

A grade of C or higher must be earned in any journalism and mass communication course, or any prerequisite to a course which counts toward satisfaction of requirements for the A.B.J. degree.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred courses in Area E: ANTH 1102 or GEOG 1125-1125D	
Area F:	18
Foreign language sequence through the third semester	
ECON 2105 or 2106	
Choose 9 hours of 1000/2000-level courses from ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT	
Major Requirements:	30-32
JOUR 3310, 3410 or 3410H, 3510, 5300; JRLC 5040	
Choose 13 to 15 hours (4 to 5 courses) from the following (up to 6 hours may be chosen from any courses in the College; at least 6 hours must be in writing/editing courses*): JOUR 3610, 3710, 5010, 5170, 5350*, 5370, 5410, 5530*, 5580*, 5590*, 5600*, 5670, 5800*, 5990*; JRLC 5080, 5210, 5490	
Major Electives:	15
Choose 15 hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
General Electives:	13-15
Choose 13 to 15 hours of courses at any level in any disciplines other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
Photojournalism Emphasis	
Students seeking a photojournalism emphasis must take JOUR 3610, 3710, 5370, and one course from JOUR 5170, 5350, 5360, 5990	
Total hours required	**120**

Fees

Some courses require the purchase of a supply card from the University bookstore.

Scholarships

About 25 undergraduate scholarships are administered by the College each academic year. A general application submitted during the spring semester assures consideration for any of the scholarships for which the applicant is qualified.

Internships

Valuable practical experience is gained by serving an internship. Although not required, internships are considered important to a student's total educational experience and greatly enhance job opportunities upon graduation. Academic credit may be earned for successful completion of an internship if:

1. Advance approval is received from the department. A written request must be submitted that includes a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.
2. Certain basic courses as determined by the department have been completed.
3. The internship covers a minimum number of weeks of full-time employment as determined by the department.
4. During the semester of the internship the student registers concurrently for JOUR 5010, which is included in the maximum semester hours of journalism and mass communication credit which may be earned toward the Newspapers major.
5. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.
6. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Nutrition Science

Degree
Bachelor of Science in Family and Consumer Sciences (B.S.F.C.S.)

Contact Person
Dr. James Hargrove
Associate Professor
jhargrov@fcs.uga.edu
(706) 542-4872

Department
Foods and Nutrition
College of Family and Consumer Sciences

Description of the Program

This major is designed to provide basic training in nutrition and related sciences. Students interested

in research, college teaching, or administrative positions in nutrition will be prepared for graduate study with this major. Selection of appropriate electives permits adaptation of this major to the student's primary interest area. This major is an excellent preparation for entry into the various fields of medicine.

Career Opportunities

Nutrition Science majors pursue a range of careers due to their broad science training. They have excellent backgrounds for medical or dental school. Graduates may be employed by agricultural commodity groups; food and pharmaceutical manufacturers in research, development, public relations, or education sections. They find careers in government food or health agencies at the national, state, or local level. Agencies such as the Food and Drug Administration and Departments of Agriculture, Health and Human Resources, or Education also employ graduates of this major. Many positions in nutrition require graduate study.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.3.

Expectations of Transfer Students

Students who have completed two years of college work and are planning to transfer into this major are expected to have completed Biology 1107-1107L and 1108-1108L or the equivalent. In addition, it is crucial that the students have completed Freshman Chemistry 1211, 1211L and 1212, 1212L with a grade of C or better. Satisfactory progress requires completion of Organic Chemistry 2211, 2211L prior to the end of fall semester during the junior year, in preparation for FDNS 3100.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CHEM 1211, 1211L, 1212, 1212L, and STAT 2000	
Preferred courses in Area E: ANTH 1102 and PSYC 1101	
Area F:	18
BIOL 1107-1107L, 1108-1108L; CHEM 2211, 2211L; CHFD 2100 or HACE 2100; FDNS 2100	
Major Requirements:	47-48
BCMB(BIOL)(CHEM) 3100; BCMB 4010, 4020; BCMB 4030L or BIOL 3110L; CBIO 2200-2200L or 3000-3000L; CBIO 2210-2210L; CSCI 1301-1301L; FDNS 2000, 2400, 3100, 4100, 4510, 4530, 4550; MATH 2200, 2200L	
Major Electives:	12-13
Choose 12 to 13 hours from CBIO(BIOL) 3400; CBIO 4730; FDNS 4540, 4580, 4600, 4900, 5010; GENE(BIOL) 3200	
Total hours required	**120**

Note: Pre-medical students who select this major must take either PHYS 1111-1111L and 1112-1112L or PHYS 1211-1211L and 1212-1212L. It is recommended that they take CBIO 3000-3000L and VPHY 3100 instead of CBIO 2200-2200L and 2210-2210L. To accommodate this modified plan, it is recommended that pre-medical students take only 17 hours of the electives in major electives.

Pharmacy

Philosophy

Degree
Bachelor of Arts (A.B.)

Contact Person
Robert Burton
Undergraduate Coordinator
rburton@arches.uga.edu
(706)542-2823

Department
Philosophy
College of Arts and Sciences

Description of the Program

The program of the department is designed to guide the student in the systematic investigation of such basic issues as the nature of reality, knowledge, value, and obligation. This involves studying the major figures of the western philosophical tradition and assessing the major options that have emerged. The student acquires the philosophical skills of inquiry, including critical thinking, the discovery and evaluation of basic assumptions, the analysis of concepts, the analysis of experience, and the construction and assessment of arguments.

Career Opportunities

The philosophy major develops analytic and critical thinking skills essential to all professions. The

najor program can be tailored for careers in law, business, education, and many other professions.

Entrance Requirements and Expectations of Transfer Students

Entrance to the major requires completion of Core Areas A-E and Area F.

Special Requirements

Philosophy majors and minors should acquire an e-mail account and notify the department of his/her e-mail address.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
PHIL 1000, 2200, 2500	
Choose three 3-hour courses from HIST 2301, 2302, or courses in Art, African American Studies, Classics, Comparative Literature, Drama, English, Linguistics, Music, Philosophy, Religion, or Women's Studies	
Major Requirements:	24
PHIL 3000, 3010	
Minimum of six additional 3-hour courses with a PHIL prefix numbered above 3010	
Major Electives:	3-15
Fourth semester of a foreign language	
Take the following if not satisfied in the core: two courses in literature, PHIL 2200, 2500	
General Electives:	21-33
(Refer to College-wide requirements when selecting general electives.)	
Upper division (15 hours)	
Any level (12-18 hours)	
Total hours required	**120**

Minor in Philosophy

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Physics

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. Jeffrey A. Templon
Undergraduate Academic Advisor
templon@hal.physast.uga.edu
(706)542-2843

Department
Physics and Astronomy
College of Arts and Sciences

Description of the Program

Physics is the study of how the universe works. Students majoring in physics will study the theories of classical mechanics, electricity and magnetism, and quantum mechanics. Practical applications of these theories are covered in other required courses such as Optics and Electronics. Throughout the course of study, emphasis is placed on using one's understanding of the theories to solve problems.

Career Opportunities

Physicists are trained to solve problems by thinking critically, logically, and systematically. A physicist can work effectively in any career which requires these skills. Some students continue in physics research and are ultimately employed in private or government research laboratories, or at universities. Other students go to graduate school in other fields, the most frequent choices being Computer Science, Engineering, Medicine, and Law. Many Ph.D. physicists are employed outside of physics, for example in computer-related professions, or as financial analysts, or in nuclear medicine.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students intending to pursue a major in physics should begin calculus as soon as possible and at least by the second semester of their freshman year and complete it through MATH 2500. They should begin the PHYS 1211-1211L, 1212-1212L sequence by the second semester of their freshman year. A grade of C or better in PHYS 1211-1211L, and 1212-1212L (or PHYS 1111-1111L and 1112-1112L) must be earned before a physics major enrolls in more advanced PHYS courses. We recommend that all physics majors take PHYS 3700 and 3900 in the spring of their sophomore year to prepare adequately for the upper-division courses in the junior year. We recommend that sophomore students who transfer into the program later than spring semester either be familiar with this material or delay their entry into upper-division

course work until PHYS 3700 and 3900 have been taken.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CHEM 1211, 1211L, 1212, 1212L and MATH 2200, 2200L (take under general electives if not taken in Area D).	
Area F:	18
PHYS 1211-1211L (or 1111-1111L), 1212-1212L (or 1112-1112L); MATH 2200, 2200L (if taken in Area D, select additional hours in mathematics, computer science, or chemistry); MATH 2210, 2210L, 2500	
Major Requirements:	24
MATH 2700; PHYS 3320-3320L, 3330-3330L, 3700, 4101, 4201, 4300, 4701	
Major Electives:	3
Choose one course from PHYS 4102, 4202, 4702	
General Electives:	33
(Refer to College-wide requirements when selecting general electives.)	
Upper division (15 hours)	
Any level (18 hours)	
Total hours required	**120**

Scholarships

The Hendren Memorial Scholarship is available to students in this major. A number of research opportunities also exist for undergraduate students, and many carry a stipend.

Minor in Physics

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Physics and Astronomy

Degree
Bachelor of Science (B.S.)

Contact Person
J. Scott Shaw
Undergraduate Academic Advisor

(706) 542-2485

Department
Physics and Astronomy
College of Arts and Sciences

Description of the Program

The Physics and Astronomy major combines the fundamental study of physics with observational astronomy and astrophysics. Emphasis is placed on applying theory to current astronomical and astrophysical problems and on individual research.

Career Opportunities

Career opportunities include employment in private and government laboratories, teaching, in planetaria, in the armed forces, or in teaching.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Students intending to pursue a major in physics and astronomy should begin calculus as soon as possible, at least by the second semester of their freshman year, and complete it through MATH 2500. They should complete the PHYS 1211-1211L, 1212-1212L and the ASTR 1010, 1010L; ASTR 1020, 1020L sequences before the first semester of their junior year. A physics and astronomy major must have a grade of C or better in PHYS 1211-1211L, and 1212-1212L (or PHYS 1111-1111L and 1112-1112L) before enrolling in more advanced PHYS courses and a grade of C or better in ASTR 1010 and ASTR 1020 (or ASTR 1110H and ASTR 1120H) before enrolling in more advanced ASTR courses.

Department
Plant Pathology
College of Agricultural and Environmental Sciences

Description of the Program
The plant protection and pest management major is designed to provide education in the many principles essential for the diagnosis and management of diseases that affect the crops that provide our needs in food, forage and fiber, and bring beauty to our landscapes. The program emphasizes understanding the biology of the cause, nature, and control of diseases, the social and economic impacts of plant diseases, and the importance of diseases in both the rural and urban environment.

Career Opportunities
Graduates are prepared to pursue careers in the public and private sectors in the science and business of managing plant diseases. The program also provides the student with the opportunity to be prepared to pursue graduate education in plant pathology or other biological sciences.

Entrance Requirements
Entry to this major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Transfer students should have taken either BIOL 1107-1107L and 1108-1108L or BTNY 1210-1210L and 1220-1220L as well as CHEM 1211, 1211L and 1212, 1212L.

Special Requirements
A grade of C or better is required in major courses.

Preferred courses in Area D: BIOL 1107-1107L or BTNY 1210-1210L; CHEM 1211, 1211L; and STAT 2000 or 2210	
Area F:	18
BIOL 1108-1108L or BTNY 1220-1220L; CHEM 1212, 1212L; PHYS 1111-1111L or 1211-1211L; select 6 or 7 hours from AAEC 2110; CSCI 1100-1100L; ECOL 1000-1000L; GEOG 1101-1101D, 1112, 1112L, 1125-1125D; HORT 2000	
Major Requirements:	18
(Minimum grade of C required.)	
Select 18 hours from CRSS 3050-3050L, 4340, 4340L, 4590-4590L; ENTO 3740-3740L; ENTO(CRSS) 4250-4250L; PATH 3530-3530L, 4280-4280L	
Major Electives:	27
Select 27 hours from AAEC 2580; BCMB (BIOL)(CHEM) 3100; BTNY 3830-3830L; CHEM 2100, 2100L, 2211, 2211L; CRSS 2010-2010L; CRSS (ENTO) (PATH) 3500; CRSS (MIBO) 4610-4610L; CSCI 1100-1100L, 1301-1301L; MIBO 3500; PATH (ANTH) (BTNY) 3010; PATH 3830-3830L, 3910, 3990; PATH(BTNY) 4200-4200L; PGEN 3580-3580L	
General Electives:	15
Upper division (0-15 hours)	
Any level (0-15 hours)	
Total hours required	**120**

Scholarships
Two departmental scholarships are offered annually. In addition, more than 100 competitive scholarships are available from the College of Agricultural and Environmental Sciences. For more information about college-wide scholarships, contact the Office of Academic Affairs in the College.

Internships
The department employs students on a part-time basis and also assists them in locating summer jobs and internships with agribusiness and the Cooperative Extension Service.

Political Science

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Arnold Fleischmann
Undergraduate Coordinator
polugrad@arches.uga.edu
(706) 542-2057

Department
Political Science
College of Arts and Sciences

Description of the Program

Political Science offers students interested in developing a broader and deeper understanding of politics the opportunity to do so within a structured program of study. The faculty's interests cover most specialities within political science. A range of courses covers politics in the United States, other political systems, relations among nations, important debates in political philosophy, legal and constitutional issues, research skills and other topics.

Career Opportunities

Like all good liberal arts majors, political science helps students develop their analytical and problem-solving abilities, as well as improve their written and oral communications skills. It provides excellent preparation for graduate education in law and public administration, as well as doctoral programs in political science. Political science is also a good foundation for careers in public service, campaign work, and various management positions in the private sector.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. All students must complete POLS 1101-1101D before taking advanced courses in Political Science.

Expectations of Transfer Students

Transfer students should have completed at least POLS 1101-1101D or equivalent, which is the prerequisite for all courses in the major. No more than 12 semester hours of transfer credit will be accepted for the major.

Special Requirements

No more than 6 hours taken at the 2000-level and no more than 12 hours in transfer credit may be counted toward the major.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: PHIL 1000, 1500, or 2200	
Preferred courses in Area D: STAT 2000 or 2210	
Preferred courses in Area E: ECON 2105 or 2106	
Area F:	18
Completion or exemption through the third semester of one foreign language required.	
1000/2000-level courses from the following: ANTH, ECON, HIST, MATH 1060 or 1113, PHIL, SOCI, SPCM, STAT, and foreign languages recommended	
Major Requirements:	24
Twenty-four hours with at least six in each of the department's three fields (Theory and Method, American Studies, Global Studies). The last six hours may be taken in any of the three fields or courses labeled "Special."	
Theory and Method	
POLS 3000, 4010, 4020, 4030, 4040, 4050, 4060, 4070, 4150, 4190	
American Studies	
POLS 4510, 4520, 4530, 4540, 4550, 4560, 4570, 4600, 4610, 4620, 4630, 4640, 4650, 4660, 4700, 4710, 4720, 4730, 4740, 4790	
Global Studies	
AFAM(POLS) 4200; POLS 3200, 3300, 4210, 4220, 4230, 4250, 4300, 4360, 4370, 4380, 4390, 4480, 4490	
Special Courses	
POLS 3600; POLS(SOCI) 3700; POLS 4900, 4960, 4990H, 5000; POLS(SOCI) 5500, 5510, 5520	
General Electives:	36
(Refer to College-wide requirements when selecting general electives.)	
Upper division (15 hours)	
Any level (21 hours)	
Total hours required	**120**

Internships

The department maintains information on the Governor's Intern Program, which is offered every academic term, and the Georgia Legislative Intern Program, which has positions during the spring semester, when the Georgia General Assembly holds its annual session. Other information on internships with government agencies, election campaigns, interest groups, private firms, and other organizations is available at Career Planning and Placement in Clark Howell Hall. All internships have specific upper-division courses as prerequisites and must be approved in advance (see the

department's "Undergraduate Manual" for details).

Minor in Political Science

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Poultry Science

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Henry L. Marks
Department Head
hmarks@arches.uga.edu
(706)542-1333

Department
Poultry Science
College of Agricultural and Environmental Sciences

Description of the Program

All students in the Department of Poultry Science are encouraged to obtain a well-rounded education in the humanities and social sciences as well as the biological, chemical, and physical sciences. Students receive a minimum of 36 semester credit hours of poultry science dealing with production, management, breeding, nutrition, anatomy and physiology, processing, and diseases. To complete their program of study, poultry science students may elect additional courses in either agribusiness or science. Fundamental education in agricultural business, marketing, finance, and management prepares students for entering the dynamic poultry industry in a wide variety of positions. In-depth courses in biological and agricultural sciences prepare students who aspire to careers in teaching, research, and development for entering graduate or professional schools.

Career Opportunities

Poultry is Georgia's largest agricultural industry. The agribusiness complex related to poultry in Georgia is a multi-million dollar industry and is the largest employer in the agricultural sector. Students who major in poultry science have excellent opportunities for employment and career advancement.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area C: SPCM 1100 or 1500	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and 3 hours from CSCI 1100-1100L, 1210; MATH 2200, 2200L, 2210, 2210L; STAT 2000, 2210	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L, 2100, 2100L; PHYS 1010; POUL 2020-2020L, 2040	
Major Requirements:	28
AVMD 3730; MIBO 2500-2500L; POUL 3600, 3710, 3720, 3750, 3790, 3800-3800L; POUL(FDST) 3860	
Choose one course from POUL 4010, 4020, 4030	
Major Electives:	17-19
Select 17 to 19 hours from the following (15 hours must be upper division courses): AAEC 2110 or ACCT 1160; AAEC 2580, 3040, 3100, 3690, 3980 or 4980; ADSC 3400-3400L; BCMB(BIOL)(CHEM)3100; CBIO 3000-3000L, 3700, 4730; CBIO(MIBO)4100; CHEM 2212, 2212L; FDST 2010; MARK 3000; MGMT 3000; PGEN 3580-3580L; POUL 2040, 3910, 4330; STAT 2210	
General Electives:	13-15
Any level (13-15 hours)	
Total hours required	**120**

Scholarships

The following scholarships are available for Poultry Science majors: Mr. and Mrs. J. B. Gay Memorial Fund; Roy and Maye Durr Scholarship; Assist Scholarship Fund; Harrison Poultry Science Scholarship; Till M. Huston Scholarship; Charles M. Rose Memorial Scholarship (Graduate Student).

Internships

Internships are available but not required.

Minor in Poultry Science

Pre-Professional Programs

See the Pre-Professional Programs section, page 300, for information on programs in Pre-Journalism, Pre-Law, Pre-Medicine, Pre-Dentistry, Pre-Optometry, Pre-Nursing, Pre-Pharmacy, Pre-Theology, and Pre-Veterinary Medicine.

Psychology

Degree
Bachelor of Science (B.S.)

Contact Person
Dr. Stuart Katz, Chair
Undergraduate Studies Committee
skatz@arches.uga.edu
(706)542-3039

Department
Department of Psychology
College of Arts and Sciences

Description of the Program

The major in psychology is designed to convey knowledge about the phenomena, laws, and theories of behavior and mental processes, as well as the experimental methods necessary to acquire that knowledge.

Career Opportunities

Opportunities for graduates include careers in industrial, government, and other organizational settings; mental health settings; college/university teaching and research; and other professional areas.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. Prospective Psychology majors must have the following three prerequisites for PSYC 2980 (the first course in the major): PSYC 1101, STAT 2000 (or MATH 2200), and BIOL 1103-1103L (or 1107-1107L) or Honors equivalents. The GPA for these three courses must be at least 2.3 with no grade lower than a C.

Expectations of Transfer Students

Transfer students must have certain prerequisites for the first course in the major (see Entrance Requirements). No courses transferred at the 2000 level or lower, except PSYC 2980 and PSYC 2990, can be used as credit toward the major.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area D: BIOL 1103-1103L or 1107-1107L, any other Lab science course, STAT 2000 or MATH 2200, 2200L (take under general electives if not taken in Area D)	
Preferred course in Area E: PSYC 1101	
Area F:	18
Choose 18 hours from the following:	
PSYC 1101 (if not taken in Area E); BIOL 1103-1103L or 1107-1107L; STAT 2000 (if not taken in Area D)	
If the courses listed above were taken in Areas A-E, select remaining hours from the following:	
Foreign language (up to three courses; credit not permitted for first elementary course)	
No more than six hours from PSYC 2100, 2101, 2520, 2530, 2540, 2560, 2570; PSYC(AFAM) 2150	
Social science courses (AFAM, ANTH, ECON, EDES, GEOG, HIST, POLS, PSYC, SOCI, SPCM, WMST)	
Biological science courses (BIOL, BTNY, CBIO, ECOL, MARS, MIBO)	
Major Requirements:	18
PSYC 2980; 2990	
Choose one from Group A: PSYC 4100, 4110, 4120, 4130	
Choose one from Group B: PSYC 4200, 4210, 4220, 4230	
One additional core major course from Group A or B	
Major Electives:	9
Select 9 hours from AFAM(PSYC) 4500, 4550; PSYC 3230, 3260, 3300, 3510, 3810, 4100, 4110, 4120, 4130, 4200, 4210, 4220, 4230, 4650, 4600, 4700, 4800, 4850, 4910, 4920, 4930, 5100, 5750, 5760, 5770, 5850	
General Electives:	33
(Refer to College-wide requirements when selecting general electives.)	
Upper division (18 hours)	
Any level (15 hours)	
Total hours required	**120**

Minor in Psychology

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Public Relations

Degree
Bachelor of Arts in Journalism (A.B.J.)

Contact Person
Dean M. Krugman
Department Head
dkrugman@arches.uga.edu
(706)542-4791

Department
Advertising and Public Relations
College of Journalism and Mass Communication

Description of the Program

This program is designed to train students as analysts, creative thinkers, writers, planners and policy makers in public relations.

Career Opportunities

Career opportunities include entry-level positions in public relations such as corporate relations, image management and other forms of mediated persuasion.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.5, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30, or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Expectations of Transfer Students

The academic program for the A.B.J. degree consists of two parts: Areas A-F of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

Admission to the University of Georgia is not a guarantee of admission to the College of Journalism and Mass Communication. All journalism and mass communication majors have been designated as "restricted" which means more students usually apply than can be accepted; therefore, admission is competitive. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and other resources. In reaching its decisions on how many students may be admitted each semester, the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201, College of Journalism and Mass Communication. The deadline is 4:00 p.m. on Friday of the second full week of classes.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (includes one hour PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 31 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Public Relations major.

A grade of C or higher must be earned in any journalism and mass communication course or any prerequisite to a course which counts toward satisfaction of requirements for the A.B.J. degree.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred courses in Area E: ANTH 1102 or GEOG 1125-1125D	
Area F:	18
Foreign language sequence through the third semester	
ECON 2105 or 2106	
Choose 9 hours of 1000/2000-level courses from ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT	
Major Requirements:	31
ADPR 3520, 3850, 5910, 5920, 5950; JOUR 3410; JRLC 5040	
Choose one course from the following: ADPR 3130; MARK 4000; POLS 4150; SOCI 3600; SPCM 3700	
Choose any two 3-hour courses in the college	
Major Electives:	15
Choose 15 hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and	

any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.

General Electives: 14

Choose 14 hours of courses at any level in any disciplines other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.

Total hours required **120**

Fees

Some courses require the purchase of a supply card from the University bookstore.

Scholarships

About 25 undergraduate scholarships are administered by the College each academic year. A general application submitted during the spring semester assures consideration for any of the scholarships for which the applicant is qualified.

Internships

Valuable practical experience is gained by serving internships. Although not required, internships are considered essential to a student's total educational experience and greatly enhance job opportunities upon graduation. Academic credit may be earned for successful completion of an internship if:

1. Advance approval is received from the student's department. A written request must be submitted and include a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.
2. Certain basic courses as determined by the department have been completed.
3. The internship covers a minimum number of weeks of full-time employment as determined by the department.
4. During the semester of the internship the student registers concurrently for ADPR 5011, which is included in the maximum semester hours of journalism and mass communication credit that may be earned toward the Public Relations major.
5. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.
6. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Judy Bolen
Adminstrative Coordinator
jbolen@cbacc.cba.uga.edu
(706) 542-8532

Department
Insurance, Legal Studies, Real Estate, and Management Science
Terry College of Business

Description of the Program

The major offers a background for students planning careers in real estate sales, leasing, management, or appraising. Real Estate is the study of site selection, acquisition (lease or purchase), management and disposition of real property.

Career Opportunities

Potential career positions include junior appraiser, lease negotiator, leasing agent, sales associate, and right of way agent.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Area A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: SPCM 1100 or 1500 (take under general electives if not taken in Area C)	
Preferred courses in Area D: MATH 1113 or 2200, 2200L (take under general electives if not taken in Area D)	
Preferred courses in Area E: ECON 2100 or 2200 (take under general electives if not taken in Area E)	
Area F:	18
ACCT 2101, 2102; ECON 2105, 2106; LEGL 2700; MGMT 2090	
Major Requirements:	33
FINA 3000; MGMT 3000; MSIT 3000; MARK 3000; REAL 4000, 5080, 5090; REAL(FINA) 5100	
Choose one of the following: REAL 5070; LEGL(REAL) 5200	
Choose six hours from the following: Any REAL course not counted elsewhere, including REAL 4800 (internship); any 4000- or 5000-level course (excluding 4800 internship courses) in ACCT, MGMT, ECON, MARK, FINA, MSIT, LEGL or RMIN	
Major Electives:	3
Choose one of the following: ACCT 4000; FINA 4000; ECON 4000; MARK 4000; MGMT 4000; REAL 4000; RMIN 4000	
General Electives:	24
(Refer to College-wide requirements when selecting general electives.)	
(At least one course must be upper division)	
Five courses in Arts and Sciences	

One business course outside major
Two business courses outside department
Total hours required **120**

Fees
Voluntary membership in the Real Estate Society and inclusion in the resume book involves a small fee.

Scholarships
The Real Estate Society sponsors scholarships each semester.

Internships
Internships may be done for credit and are encouraged.

Recreation and Leisure Studies

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Douglas A. Kleiber
Department Head
dkleiber@arches.uga.edu
(706)542-5064

Department
Recreation and Leisure Studies
College of Education

Description of the Program
The Department of Recreation and Leisure Studies Undergraduate Program prepares students for positions in recreation, parks and leisure services. Students have the opportunity to specialize in one of three areas: administration of leisure services, recreation resource management, or therapeutic recreation. The program of study is generally divided into the general university core, major core courses, and emphasis area course work. All students must complete practica, work experience and an internship related to the student's emphasis area.

Career Opportunities
Students in the Administration of Leisure Services emphasis area have career opportunities in the administration and management of park and recreation agencies, health and fitness, corporate recreation and other public, private, civic, and social agencies. Students in the Therapeutic Recreation emphasis area have career opportunities as Therapeutic Recreation Specialists in rehabilitation centers, long term care facilities, psychiatric facilities, senior centers and other community facilities. Students in the Recreation Resource Management emphasis area have career opportunities in national, state and county parks, nature centers, environmental education centers, and wildlife preserves as administrators, interpreters, environmental educators, park rangers or recreation planners.

Entrance Requirements and Expectations of Transfer Students
Entrance requirements include completion of Core Areas A-E and Area F and an overall GPA of 2.0 (0-30 semester hours), 2.1 (31-60 semester hours), 2.2 (61-90 semester hours), or 2.3 (91 or more semester hours).

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area C: ARTS 2050; CMLT 2400; DRAM 2130; ENGL 2400, RELI 2004; RELI (AFAM) 2005	
Preferred courses in Area D: BIOL 1104-1104L (Therapeutic Recreation); CSCI 1100-1100L (Administration of Leisure Services); GEOG 1112, 1112L and 1113, 1113L or GEOL 1121, 1121L and 1122, 1122L (Recreation Resource Management)	
Preferred course in Area E: PSYC 1101	
Area F:	18
EPSY 2020 or CHFD 2950-2950L; HPRB 1710; MGMT 2090 or CSCI 1100-1100L; PSYC 1101; SOCI 1101 or 1600; SPCM 1100 or 1500	
Major Requirements:	49-53
RLST 2030, 2800, 2800L, 3450, 3850, 4870, 4890, 4900, 5700; RLST(FORS) 3310	
Choose one of the following Options:	
Option I: Administration of Leisure Services	
ACCT 2101; ADPR 3850; RLST(FORS) 5400-5400L; RLST 5340	
Option II: Recreation Resource Management

Bachelor of Arts (A.B.)

Contact Person
Dr. Thomas B. Slater
Undergraduate Coordinator
tslater@arches.uga.edu
(706)542-5356

Department
Religion
College of Arts and Sciences

Description of the Program
The major in religion provides a broad academic study of religion from a humanistic point of view. It covers the principal religions of the world, including Judaism, Christianity, Islam, Hinduism, Buddhism, Jainism, Taoism, Confucianism, and Shintoism. In addition, it offers courses in African-American religion and native American religion, as well as programs in classical Hebrew and Arabic. Comparative studies are strongly encouraged, the major requiring course work in two or more areas of concentration. The program is located in the College of Arts and Sciences and plays an important role in the Humanities and the Social Sciences. It treats religious studies as an educational matter only, having no doctrinal preference or denomination orientation. Its focus is on the historical, political, sociological, and philosophical aspects of religion.

Career Opportunities
Career opportunities for a major in religion encompass a broad range of professions, including religious ministry, teaching, law, business, government, and law enforcement. In addition, a major in religion provides a sound basis for doing graduate work in many other academic fields.

Entrance Requirements
Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students
Transfer students may transfer two upper division courses in religion to apply toward the A.B.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
One course from RELI 1001, 1002, 1003, 2004; RELI (AFAM) 2005	
Choose five courses from Literature, History, Foreign Language (1st semester), Art, Drama, Music, Philosophy, Classics	
Major Requirements:	21
(All RELI courses must receive a grade of C or above to count toward major.)	
Choose one course from RELI(AFAM) 3000; RELI(HIST) 3150, or RELI 4001-4303	
Choose one course from RELI 3300 or 4400-4404	
Choose one course from RELI 4071, 4072, 4101, 4102, 4301, 4303, 4510, 4520, 4530, or RELI(PHIL) 4500	
Four other courses with RELI prefix	
Major Electives:	15
Foreign Language (2nd and 3rd semester)

Risk Management and Insurance

Degree
Bachelor of Business Administration (B.B.A.)

Contact Person
Judy Bolen
Adminstrative Coordinator
jbolen@cbacc.cba.uga.edu

Department
Insurance, Legal Studies, Real Estate, and Management Science
Terry College of Business

Description of the Program
The major offers a unique program of study designed to give the student a broad understanding of the roles and functions of risk-bearing institutions, knowledge of basic principles necessary for ad-

equately managing economic risk, and the opportunity for professional advancement in the field of risk management and insurance.

Career Opportunities

Potential career positions for the student with a major in risk management and insurance include risk analyst, risk manager, underwriter, employee benefits analyst, insurance administrator, claims adjuster, agent, and loss control specialist, to name a few.

Entrance Requirements and Expectations of Transfer Students

Students intending to pursue this major must meet the following requirements: completion of 60 semester hours, completion of Core Areas A-E, completion of Area F for the B.B.A. degree, and achievement of an overall GPA of 2.6. Students may not enroll in the Terry College of Business while on academic probation or dismissal from another college.

Special Requirements

In addition to the UGA residence policy, B.B.A. students must complete at least 30 semester hours as students in the Terry College. Students are also expected to complete all major courses in residence. In some cases, with departmental permission, a student may receive transfer credit for one major course.

Grades of 2.0 in the following are required for B.B.A. degree certification: ENGL 1101 and 1102 combined, major courses, business cumulative GPA, and the UGA cumulative GPA.

Program Requirements

Semester Core Curriculum	Hours
Area A-E:	42
Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Romance Languages

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Doris Kadish
(706) 542-1075

Department
Romance Languages
College of Arts and Sciences

Description of the Program

Students majoring in Romance languages will take courses that combine the study of literature, language, culture, and linguistics, which will lead to a development of language proficiency and an understanding of the cultures of areas of the world where these languages are spoken.

Career Opportunities

Many students majoring in Romance Languages will become teachers or go on to graduate school, but proficiency in two foreign languages also helps majors find employment in the public and private sectors.

Entrance Requirements
Entry to the major requires completion of Core Areas A-E and Area F.

Placement Test
A student continuing a language taken in high school must take either the language achievement test of the College Entrance Examination Board or the placement test administered by the University of Georgia Counseling and Testing Center. Students will be placed in the appropriate course on the basis of their scores and other pertinent information. The Advanced Placement examinations in Spanish and French Language and Literature may also be submitted for placement and possible credit.

Expectations of Transfer Students
For one of the two languages chosen, four beginning and intermediate semester language courses equivalent to UGA FREN/ITAL/PORT/SPAN 1001-2002 are required. Study abroad courses can be used to fulfill part or all of these prerequisites, upon permission of advisors in the department.

Special Requirements
A minimum grade of C is required in course work for this major.

No student may receive credit for any course which is a prerequisite to a course for which college credit has already been received. Exceptions may be made only by the head of the department.

Certain courses in the Department of Romance Languages are not open to native speakers of that language. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was French, Italian, Portuguese, or Spanish.

Program Requirements
Semester Core Curriculum — **Hours**

Areas A-E: 42

Required courses in Area A: ENGL 1101, 1102, and MATH 1101

Area F: 18
2001 (in major and minor language); 2002 (in major and minor language); LING 2100; choose three hours from the follwing (waived courses with no hourly credit do not count): ARHI 2100; CLAS 1000, 1010, 1020; CMLT 2210, 2220; DRAM 2000, 2120; ENGL 2310, 2320, 2400; GEOG(ANTH)(CMLT)(HIST)(SOCI) 2100; HIST 2221, 2222, 2301, 2302, 2502; ITAL 2500, 2600; MUSI 2020; PHIL 1000; PORT 2600; RELI 1001, 1002, 1003, ROML 2550; SPAN 2550; WMST 1110-1110D, 2010; 1000/2000-level courses in any language; 1000/2000-level foreign language study abroad courses

Major Requirements: 30
(18 hours in major language; 12 hours in minor language)
Select Option I, II, or III

Option I: Select a major language, French or Spanish, and a minor language, Spanish or French
Major Language: French or Spanish
FREN/SPAN 3010, 3030, FREN(LING) 3090 or SPAN(LING) 3050, FREN/SPAN 4010; choose two courses from SPAN 4040, FREN/SPAN 4050, 4060, 4070, 4080, 4120, 4150, FREN(LING) 4630 or SPAN(LING) 4650
Minor Language: Spanish or French
FREN/SPAN 3010, 4010; choose two courses from SPAN 4040, FREN/SPAN 4050, 4060, 4070, 4080, 4120, 4150, FREN(LING) 4630 or SPAN (LING) 4650

Option II: Select a major language, Italian or Portuguese, and a minor language, French or Spanish
Major Language: Italian
ITAL 3010, 4010, 4050, 4060, 4070, 4120
Major Language: Portuguese
PORT 3010, 4010, 4050, 4060, 4070, 4080
Minor Language: French
FREN 3010, 3030, 4010, FREN(LING) 3090
Minor Language: Spanish
SPAN 3010, 3030, 4010, SPAN (LING) 3050

Option III: Select a major language, French or Spanish, and a minor language, Italian or Portuguese
Major Language: French
FREN 3010, 3030, 4010, FREN(LING) 3090; choose two courses from FREN 4050, 4060, 4070, 4080, 4120, 4150, FREN(LING) 4630
Major Language: Spanish
SPAN 3010, 3030, 4010, SPAN(LING) 3050; choose two courses from SPAN 4040, 4050, 4060, 4070, 4080, 4120, 4150, SPAN(LING) 4650
Minor Language: Italian
ITAL 3010, 4010; choose two courses from ITAL 4050, 4060, 4070, 4120
Minor Language: Portuguese
PORT 3010, 4010; choose two courses from PORT 4050, 4060, 4070, 4080

General Electives:	30
(Refer to College-wide requirements when selecting general electives.)	
Upper division (9 hours)	
Any level (21 hours)	
Total hours required	**120**

Study Abroad

The Department of Romance Languages encourages all students to participate in an accredited study abroad program for an academic year, a semester, or the summer. Prior departmental approval is required for credit. Contact the Office of International Education (542-1557) for information about programs. Check with the department for the maximum number of hours that will count for a major or minor.

Minor in French, Italian, Portuguese, or Spanish

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Russian

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Paul Popov
ppopov@arches.uga.edu
(706)542-2442

Department
Germanic and Slavic Languages
College of Arts and Sciences

Description of the Program

The undergraduate program in Russian is designed to provide students with communicative proficiency in the Russian language and knowledge of important aspects of Russian culture.

Career Opportunities

Russian is the first language of approximately 150 million people and has long served as a lingua franca for millions more in the former republics of the Soviet Union and the countries of Eastern Europe. Russian continues to play an important role in global politics, and there is a wide variety of career opportunities in both governmental and non-governmental organizations with an international focus. Russia's reentry into the world economic system has also opened up a vast and largely unexploited market for Western goods and services, and business opportunities in the region can only increase over time. Furthermore, most large employers in the U.S. are international corporations which need employees who have the knowledge and experience to function successfully in foreign settings and to deal with their international business partners; foreign language majors are a definite asset to such companies.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. RUSS 2002 is a prerequisite for upper-division courses.

Expectations of Transfer Students

Students transferring as juniors should have completed four semesters of Russian study equivalent to UGA courses RUSS 1001-2002.

Special Requirements

Students must earn a minimum grade of C in each course. With permission of the department, up to six semester hours of upper-division transfer credit may be applied towards fulfillment of the major requirements; otherwise, all courses fulfilling the major requirements must be taken in residency.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Area F:	18
RUSS 2001, 2002; LING 2100	
Nine hours from the following areas: beginning/intermediate courses in a second foreign language, art, music, theater, literature, history, geography, anthropology, economics, international studies, linguistics, philosophy, communications and political science	
Major Requirements:	21
RUSS 3001, 3002, 4250 or 4260, 4270	
Nine additional hours of RUSS courses from the following, including no more than one directed study course and no more than one course in translation (RUSS 4050, 4060): RUSS 3000, 3200, 3990, 4001, 4050, 4060, 4250, 4260, 4510, 4960H, 4970H, 4990H	
General Electives:	39
(Refer to College-wide requirements when selecting general electives.)	
Upper division (18 hours)	
Any level (18 hours)	
Total hours required	**120**

Minor in Russian

Social Science Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Renee Dobbs
Academic Advisor
rdobbs@arches.uga.edu
(706)542-7265

Department
Social Science Education
College of Education

Description of the Program

The program prepares teachers for social science/social studies teaching positions in grades 7-12 and meets Georgia Professional Standards Commission initial teacher certification requirements. Students may choose to meet the requirements for the following certification categories: broad field social sciences, history, geography, political science, economics.

Career Opportunities

In social science/social studies education, the quantity of teachers supplied exceeds the quantity

demanded, although in specific locales the imbalance is larger or smaller. Because metropolitan and suburban school systems are more attractive to teacher candidates than small town and rural school systems, job markets are more competitive in urban areas. Opportunities in social science/social studies education are related to academic performance, general aptitude, character, personality, job search strategies and effort, and willingness to move to the location of job openings. Social studies teachers who also can serve as coaches or provide other services schools need compete better in the current job market.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F, a passing score on Praxis I, an overall GPA of 2.5, field experience (ESOC 2450), and submission of a video presentation and essay.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Degree
Bachelor of Social Work (B.S.W.)

Contact person
Katheryn B. Davis
Director, Undergraduate Program
(706)542-5425

Department
School of Social Work

Description of the Program

The Bachelor of Social Work degree is the first professional social work degree. This program of study prepares the student for beginning professional practice as a social worker. The liberal arts base combined with appropriate professional courses provide the fundamental knowledge and skill needed to assume the role of a beginning practitioner. The appropriate social work value and ethical base necessary for professional practice is also a central part of the curriculum. The student exits the B.S.W. program as a generalist in the field of social services.

Career Opportunities

Graduates holding a baccalaureate degree in social work will be prepared for practice in a wide variety of human service programs, for example, hospital social services, juvenile corrections, programs for the elderly, mental health and retardation centers, and child protective services. These are but a few of the settings in which social workers provide clients with such services as

counseling, problem solving, linkage with resources, case management, information, and referral.

Entrance Requirements

The academic program for students seeking the B.S.W. degree is composed of two parts: (1) Pre-professional enrollment for freshmen, sophomores, juniors and transfer students preparing for entry into the professional program; and, (2) the professional foundation program completed during the senior year.

Pre-professional enrollment is open to students meeting regular admission requirements at the University of Georgia. Admission to the professional foundation program occurs at the junior level. All students entering the professional foundation or senior year of study must have an overall and cumulative GPA of 2.5 and meet professional and liberal arts objectives of the program (see B.S.W. office for details). Prior to entering the professional program, all applicants must complete 50 clock hours of an advisor-approved human service experience and provide proof of professional liability insurance (see program director for details). In addition, throughout the program student evaluations will determine the student's compatibility to the professional practice of social work.

Expectations of Transfer Students

Students who plan to transfer to the B.S.W. program, in addition to meeting the requirements for entry into the professional program outlined above, should plan to complete the following courses or their equivalents as determined by the B.S.W. program director: PSYC 3230, STAT 2000, CHFD 2100, one course in multicultural studies, one course in women's studies, and one course in information technology. Transfer students should also plan to take the following courses as part of their core requirements: foreign language through the third semester, BIOL 1103-1103L, SOWK 2101, 2154, PSYC 1101, and SOCI 1101.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred courses in Area D: BIOL 1103-1103L and STAT 2000 (take under general electives if not taken in Area D)	
Preferred courses in Area E: PSYC 1101 and WMST 1110-1110D or 2010	
Area F:	18
CHFD 2100; CSCI 1100-1100L; SOCI 1101 or 1600; SOWK 2101, 2154	
Choose one course from: DRAM 2110; ENGL 2400; GEOG 1103-1103D; HIST 2051, 2052; MUSI 2080; PSYC 2100; PSYC(AFAM) 2150; RELI(AFAM) 2005; ROML 2550; SOCI(AFAM) 2020, 2820; SOCI 2850; SPCM 1800; SPCM (AFAM) 2810; WMST 1110-1110D, 2010	
Major Requirements:	36
SOWK 5326, 5524, 5534, 5544, 5701, 5757, 5767, 5835, 5845	
Major Electives:	14
PSYC 3230; modern foreign language through third semester	
General Electives:	16
Any level (15-19 hours)	
Total hours required	**126**

Scholarships

The Heather Christina Wright Memorial Scholarship is available to qualified applicants. Selection is based on a desire and commitment to work with cancer patients and their families and financial need.

Sociology

Degree
Bachelor of Arts (A.B.)

Contact Person
Academic Director
klou@arches.uga.edu
(706) 542-3195

Department
Sociology
College of Arts and Sciences

Description of the Program

The major is designed to teach undergraduate students the sociological perspective, which has three central aspects. The first is the recognition of the preeminence of social structures and their influences, and of micro- and macro-level social processes. The second is the role of logic and of the scientific method in the acquisition of knowledge. The final aspect is the enduring link between the individual's experience and larger social processes.

In achieving its purpose, the sociology curriculum provides repeated experiences wherein students pose sociological questions and bring data to bear on them, making full use of computer technologies. Courses underscore the centrality of race, class, gender and culture in society and in sociological analysis. In the process, they expose students to comparative and international materials. More generally, the major develops student

capacity for abstract thought, and for effective written and oral communication.

Career Opportunities

Sociology is a liberal-arts specialty that leads to a wide range of career options in government or business. In addition, a sociology major provides a solid foundation for further post-graduate study in law, business, and the social sciences.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Expectations of Transfer Students

Transfers into the major should have completed an introductory sociology course and STAT 2000. Students seeking credit for sociology courses taken at other colleges and universities must provide a syllabus for the course they wish to transfer and complete a *Request for Course Substitution/ Prerequisite Waiver* form, obtained from the Academic Director's Office, Department of Sociology. No more than ten quarter hours or six semester hours of transfer credit will be applied toward requirements for the major.

Special Requirements

Sociology majors must complete Introductory Sociology (SOCI 1101) and STAT 2000. The statistics course is essential preparation for the rigorous methods requirement (SOCI 3600), which entails research design, data collection and data analysis. Sociology majors must also complete SOCI 3220 (Development of Sociological Theory), and six electives with a grade of C or better. Five of the six electives must be at the 3000 level or higher, and must be taken in residence.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Upper division (15-18 hours)	
Any level (18-21 hours)	
Total hours required	**120**

Scholarships

The Phyllis Jenkins Barrow Scholarship is awarded annually to a major with senior status, UGA residence, and demonstrated academic performance. The Department also gives the Ray Payne Award to a major of senior status whose performance demonstrates commitment to sociology and a high potential for professional development in the discipline.

Study Abroad Programs

Juniors and seniors may study sociology for a semester or an academic year at the University of Leicester or the University of Lancaster in the United Kingdom. Students receive non-resident credit toward their degree at UGA and pay their normal UGA tuition. All costs of room and board, travel, and miscellaneous fees are borne by the student. Interested students should contact the Academic Diretor, Department of Sociology. The Sociology Department is also affiliated with the University of Georgia Summer Study Abroad Program in Verona, Italy. This program focuses on global environmental problems, and its courses provide resident credit. There is a set fee for this program that covers tuition, room and board, and travel. Interested students should contact the Academic Director.

Minor in Sociology

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Spanish

Degree
Bachelor of Arts (A.B.)

Contact Person
Dr. Doris Kadish
(706)542-1075

Department
Romance Languages
College of Arts and Sciences

Description of the Program

Students majoring in Spanish will take courses that combine the study of literature, language, culture, and linguistics, which will lead to a development of language proficiency and an understanding of the Spanish-speaking world.

Career Opportunities

Many students majoring in Spanish will become teachers or go on to graduate school, but proficiency in a foreign language also helps majors find employment in the public and private sectors.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F.

Placement Test

A student continuing a language taken in high school must take either the language achievement test of the College Entrance Examination Board or the placement test administered by the University of Georgia Counseling and Testing Center. Students will be placed in the appropriate course on the basis of their scores and other pertinent information. The Advanced Placement examinations in Spanish Language and Literature may also be submitted for placement and possible credit.

Expectations of Transfer Students

Four semester courses or 14 semester hours of beginning and intermediate Spanish language course work, equivalent to UGA SPAN 1001-2002, are required. Study abroad courses can be used to fulfill part or all of these prerequisites, upon permission of advisors in the department.

Special Requirements

A minimum grade of C is required in course work for this major.

No student may receive credit for any course which is a prerequisite to a course for which college credit has already been received. Exceptions may be made only by the head of the department.

Certain courses in the Department of Romance Languages are not open to native speakers of that language. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was French Italian, Portuguese, or Spanish.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42

Upper division (9 hours)	
Any level (21 hours)	
Total hours required	**120**

Study Abroad

The Department of Romance Languages encourages all students to participate in an accredited study abroad program for an academic year, a semester, or the summer. Prior departmental approval is required for credit. Contact the Office of International Education (542-1557) for information about programs. Check with the department for the maximum number of hours that will count for a major or minor.

Minor in Spanish

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Special Education

Degree
Bachelor of Science in Education (B.S.Ed.)

Contact Person
Cheri Hoy
Department Head
cherihoy@arches.uga.edu
(706)542-4617

Department
Special Education
College of Education

Description of the Program

The undergraduate program in Special Education offers a Bachelor of Science in Education degree leading to initial state certification in interrelated. Students develop skills to work with individuals with mild intellectual and behavior disabilities. Students may choose to concentrate at the preschool/elementary level or middle/high school level. Students are required to take at least two field-based practicums and 10 hours of student teaching. These supervised field experiences should help the student develop skills in working with the preschool through high-school age range.

Career Opportunities

Career opportunities include teaching in public or private schools and educational consultancy.

Entrance Requirements

Entrance requirements include completion of Core Areas A-E and Area F, a passing score on Praxis I, an overall grade point average of 2.7, completion of pre-major service hours, submission of a one-page purpose statement, and submission of a departmental application with a resume citing experiences and extracurricular activities working with individuals with special needs.

Being accepted as a major in special education does not guarantee permission to enroll in our "majors only" courses. Faculty use the following procedures to select students to complete the last two years of the program: During the fall semester of each year, the special education faculty will select 30 students (sophomores and above) to progress into the last two years of the program. The 30 students will be selected based on a rank ordering of all students with over 15 hours. The rank order will be based equally on (1) overall grade point average and (2) date of matriculation at the University. Students are encouraged to bring a copy of their acceptance letter to their first advisement appointment with a special education faculty member. A copy of this letter will be kept in the student's departmental file and will be used to document the matriculation date. Students not selected to continue in the program will be advised to change majors. Students may elect to be reconsidered the following year. Please note that reconsideration will be based on their rank order the following year. As students enter their junior year they must also document 60 hours of community involvement with children and adolescents (see special requirements).

Expectations of Transfer Students

Transfer students may write a letter to the department head appealing to be admitted to the group beginning the fall after their transfer. Students who have 15 semester hours and the required 2.7 overall GPA will be admitted to the groups as space becomes available through attrition.

Special Requirements

Special Education majors will document 60 hours of community involvement with children and adolescents prior to the junior year. The scope of the experiences can involve combinations of volunteerism in school (residential facilities, center-based programs, etc.), or community-based programs (tutoring, scouts, parks and recreation programs). The community service requirement is intended to give students reference points for course content, as well as to provide them with enriching experiences in settings that are comprised of diverse populations.

Speech Communication

Degree
Bachelor of Arts (A.B.)

Contact Person
Ms. Jeanette Reid
Office Manager
jreid@arches.uga.edu
(706)542-4893

Department
Speech Communication
College of Arts and Sciences

Description of the Program
Speech Communication majors receive instruction in both interpersonal communication and public communication. They acquire an understanding of both theory and application in these areas. They also become familiar with the methods of inquiry and research used by scholars in communication and rhetorical studies. After taking an introductory class in public speaking and another in interpersonal communication, majors typically take two or three advanced skills-based courses (e.g., small group communication, interviewing, advanced public speaking). They are required to take a course in Empirical Research Methods (SPCM 3700) and also a methods course in Rhetorical Criticism (SPCM 3200). Majors complete their programs of study with four to seven upper-division courses in such topics as Nonverbal Communication, Persuasion, Health Communication, or Women and U.S. Public Discourse.

Career Opportunities
Applied and theoretic knowledge of communication processes are the most valuable foundations for any career. Graduates in Speech Communication pursue a wide variety of career options. Some of the most popular post-graduate careers include personnel management, organizational administration, sales, corporate education and training, and public relations in private or public sector organizations. A major in Speech Communication is also excellent preparation for law school, business school, or other professional and graduate training.

Entrance Requirements
Entrance requirements include completion of Core Areas A-E and Area F and grades of C or better in STAT 2000 or 2210, SPCM 1100, and SPCM 1500.

Expectations of Transfer Students
Introductory courses in both interpersonal communication and public speaking are required as part of Core Area F. These may be transferred from other institutions, as may a sophomore-level course (e.g., advanced public speaking). The two required methodology classes must be taken at UGA. Upper division courses in the major must also be taken at UGA for credit toward the major. If taken at another institution, these courses can count for general elective credit.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: PHIL 1500 (if not taken in Area F)	
Preferred courses in Area D: STAT 2000* or 2210* (if not taken in Area F)	
Area F:	18
SPCM 1100*, 1500*	
Choose one course from the following: Fourth semester of any foreign language; AFAM 2000; CMLT 2400; DRAM 2130; ENGL 2400; GEOG (HIST) (ANTH) (CMLT) (SOCI) 2100; HIST 2052, 2222, 2502, 2560, 2602; PSYC 2100; PSYC (AFAM) 2150; RELI 1002, 2004; RELI(AFAM) 2005; RUSS 2050; SPCM 1800; SPCM(AFAM) 2810; WMST 1110-1110D, 2010	
Choose one course from CSCI 1100-1100L; MGMT 2090; WMST(CSCI) 2040-2040L	
Choose one course from the following (if either is taken in Area D, an elective may be taken): STAT 2000*, 2210*	
Choose one course from CSCI 1210; ECON 1100, 2105, 2106; LING 2100; PHIL 1500, 2500, 2200, 2400	
*Grade of C or better required.	
Major Requirements:	27
SPCM 3300, 3700; choose seven courses from the following: 0-2 SPCM courses at 2000 level; 5-7 SPCM courses at 3000/4000/5000 level	
General Requirements:	33
(Refer to College-wide requirements when selecting general electives.)	
Upper division (12-18 hours)	
Any level (15-21 hours)	
Total hours required	**120**

Scholarships
The Olive M. Cone Scholarship is awarded each year to a Speech Communication major who exemplifies high academic achievement and commitment to the discipline. A limited number of scholarships are also available to students who participate in the Georgia Debate Union.

Internships
Internship credit may be available to students who exceed a 2.5 overall GPA, who exceed a 3.0 major GPA, who have completed SPCM 3700 and SPCM 3200, and who have also taken at least one 4000 level course in Speech Communication.

Minor in Speech Communication
Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Sport Studies

Degree
Bachelor of Science in Education (B.S. Ed.)

Contact Person
Dr. Carolyn Lehr
Sport Studies Coordinator
clehr@arches.uga.edu
(706) 542-4362

Department
Physical Education and Sport Studies
College of Education

Description of the Program
The major focuses on a study of sport from economic, political, cultural, philosophical, historical, sociological, behavioral, and artistic perspectives. In addition to this interdisciplinary foundation, students will select an area of interest in either sport leadership, sport business, or sport communication.

Career Opportunities
The burgeoning sport industry accounts for 4.5 million jobs and $100 billion in annual revenues. Job listings for sport-related careers increase daily in the retail sporting goods industry, sports facilities management, recreational sport management, sports broadcasting, and a variety of youth sports and athletic settings.

Entrance Requirements
This is a restricted major. All students must have completed Core Areas A-E and Area F and have a minimum overall GPA of at least 2.3 for acceptance into the program. A second consideration will be an application in which students will list their previous associations with sport and their future goals. To graduate, a student must have at least a 2.3 overall grade point average.

Expectations of Transfer Students
Students transferring at the junior level should have completed Areas A, C, D, E, and F in the UGA Core Curriculum.

Program Requirements

Semester Core Curriculum	Hours

hutch@stat.uga.edu
homepage: http:/www.stat.uga.edu
(706)542-8232

Department
Statistics
College of Arts and Sciences

Description of the Program

A Statistics major will select a degree option of either Data Analysis or Mathematical Statistics. The Data Analysis option is designed to prepare an individual for a statistical career with only an undergraduate degree. The Mathematical Statistics option is designed to prepare an individual for graduate school and for further training in Statistics.

Career Opportunities

Employment opportunities exist in industry in a variety of fields and locations. Many students with a bachelor's degree in Statistics work as software developers, quality control analysts, data analysts and consultants.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F. Students must complete the following courses with a grade of C or better: STAT 2000; CSCI 1301; and MATH 2200, 2200L, MATH 2210, 2210L, or MATH 2500.

Expectations of Transfer Students

Transfer students are welcomed but will be expected to meet the entrance requirements.

Special Requirements

Specific course requirements vary for each area of specialization; see Program Requirements below.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: CSCI 1301-1301L, MATH 2200, 2200L, 2210, 2210L, or STAT 2000	
Area F:	18
Choose 18 hours from CSCI 1301-1301L; MATH 2200, 2200L, 2210, 2210L, 2500; PHIL 2500; STAT 2000	
Major Requirements:	24-36
Select Option I or Option II	
Option I (Data Analysis):	
STAT 4210, 4220, 4230, 4270, 4510	
One 4000-level STAT course	
Two 4000-level courses from STAT, MATH, or CSCI	
Option II (Mathematical Statistics):	
STAT 4510, 4520, 4710, 4720; MATH 3000, 3200, 4100	
One 4000-level STAT course	
Four 4000-level courses from STAT, MATH (preferably MATH 4110 and 4120) or CSCI	
General Electives:	24-36
(Refer to College-wide requirements when selecting general electives.)	
Upper division (3-15 hours)	
Any level (21 hours)	
Total hours required	**120**

Minor in Statistics

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Contact Person
Wanda Stitt-Gohdes
Undergraduate Coordinator
wlsg@arches.uga.edu
(706)542-4078

Department
Occupational Studies
College of Education

Description of the Program

The technological studies program leads to teacher certification in technology education, trade and industrial, and health occupations education. The program has a core of courses which prepare individuals to understand technology and the impacts technology is having in the world today and in the future. Each specialization has a suggested core of courses that range from technical courses in the technical clusters of energy and power, production and communication to pedagogical courses that help individuals to prepare for teaching and industrial settings. Emphasis is placed on assisting individuals to develop the ability to think critically, create, learn, and problem solve in technological environments through structured learning experiences that utilize interdisciplinary, interactive, and inquiry-oriented instructional approaches.

Career Opportunities
Students are prepared as teachers for grades 7-12 and postsecondary technical institutes. This educational experience also provides an excellent background for those who may choose to move into the corporate training and development arena.

Entrance Requirements
Entrance requirements include completion of Core Areas A-E and Area F, a passing score on Praxis I, and an overall GPA of 2.0 (2.5 required for admission to teacher education).

Expectations of Transfer Students
Recommended courses for teacher certification in technology education include a physics sequence, college algebra and trigonometry, sociology or economics, and computer technology. For teacher certification in Trade and Industrial, demonstrated competence assessed by the National Occupational Competency Testing Institute (NOCTI) for Health Occupations, a health care credential, is required and computer literacy is recommended.

Special Requirements
A 2.5 GPA is required for admission to teacher education.

Supervised observations and participation in cooperating schools is required for all students. Full-time student teaching is required for certification.

Telecommunications

Degree
Bachelor of Arts in Journalism (A.B.J.)

Contact Person
Alison F. Alexander
Department Head
alison@arches.uga.edu
(706)542-3785

Department
Telecommunications
College of Journalism and Mass Communication

Description of the Program
This program is designed to train students in production, electronic media studies, and management emphases. The major provides students with professional courses of study in both the theory and practice of electronic media.

Career Opportunities
Traditional programming, management, and sales are being supplemented by opportunities in cable, corporate communications, production and post-production, and web and other new communications technologies.

Expectations of Transfer Students
The academic program for the A.B.J. degree consists of two parts: Areas A-F of the core curriculum taken during the freshman and sophomore years at UGA or another institution and the professional program taken after formal admission to the College. Pre-Journalism students at the University of Georgia are enrolled in the College of Arts and Sciences.

Admission to the University of Georgia is not a guarantee of admission to the College of Journalism and Mass Communication. All journalism and mass communication majors have been designated as "restricted" which means more students usually apply than can be accepted; therefore, admission is competitive. A maximum number of spaces in each major is determined by the availability of teaching staff, classroom space, lab facilities and other resources. In reaching its decisions on how many students may be admitted each semester, the Admissions Committee is governed by the number already enrolled in each major, the number expected to graduate and the number applying. Grade point averages and test scores are the primary measures upon which admission decisions are based. It is recognized that the inclusion of talented students of diverse international and racial backgrounds is an indispensable part of the educational process and the Committee considers the need for such diversity in reaching its decisions.

Applications must be submitted directly to the Office of Undergraduate Services, Room 201,

College of Journalism and Mass Communication. The deadline is 4:00 p.m. on Friday of the second full week of classes.

Entrance Requirements

Applications are accepted only from students who have met minimum requirements in number of credit hours (at least 60 semester hours and satisfactory completion of Areas A-F of the Core Curriculum), cumulative and overall grade point averages of at least 2.5, and English proficiency (recentered SATV score of at least 650, ACTV score of at least 30 or at least 77 on an English proficiency test administered by UGA's Testing Center). Meeting *minimum* requirements assures consideration but is not a guarantee of admission.

A point system based on academic achievement and test scores determines a student's standing among other applicants. Those presenting the highest qualifications are accepted each semester of the academic year.

Special Requirements

No more than two courses or seven semester credit hours in journalism and mass communication courses earned before admission to the College, whether at UGA or another institution, may be applied toward satisfaction of requirements for the A.B.J. degree. At least 20 semester credit hours of journalism and mass communication courses which satisfy A.B.J. degree credit must be earned at the University of Georgia.

A total of 121 semester hours (includes one hour PE) must be successfully completed to earn the A.B.J. degree. At least 90 semester hours must be taken outside the college, of which at least 65 must be in liberal arts and sciences courses. No more than 30 semester credit hours in journalism and mass communication courses may be applied toward requirements for the Telecommunications major.

A grade of C or higher must be earned in any journalism and mass communication course or any prerequisite to such a course which counts toward satisfaction of requirements for the A.B.J. degree.

Fees

Some courses require the purchase of a supply card from the University bookstore.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1101	
Preferred course in Area C: One literature course from CLAS, CMLT, ENGL	
Preferred course in Area D: STAT 2000	
Preferred courses in Area E: ANTH 1102 or GEOG 1125-1125D	
Area F:	18
Foreign language sequence through the third semester	
ECON 2105 or 2106	
Choose 9 hours of 1000/2000-level courses from ANTH, ARTS, CLAS, CMLT, DRAM, ENGL, GEOG, HIST, PHIL, POLS, PSYC, RELI, SOCI, SPCM, STAT	
Major Requirements:	30
JRLC 5040; TELE 3010, 3210, 3310, 3410	
Choose 15 hours from an Area of Emphasis:	
Production	
TELE 3110, 4250-4250L or 5250, 4290-4290L or 5260	
*Choose 6 hours from TELE 4250-4250L, 4270, 4290-4290L, 5010, 5250, 5260	
Media Studies	
TELE 3110, 4420, 4450	
*Choose 6 hours from JOUR 5410; JRLC 5080, 5210; TELE 4350, 5010, 5170, 5440, 5990	
Management	
TELE 3110, 4350, 4450	
*Choose 6 hours from JOUR 5410; JRLC 5080, 5210; TELE 5010, 5170, 5990	
*It is strongly suggested that courses be chosen from the areas shown; however, any course offered in the College may be included if prerequisites have been met.	
Major Electives:	15
Choose 15 hours of upper division electives *in no more than two disciplines* other than journalism and mass communication, academic assistance, physical education, military, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
General Electives:	15
Choose 15 hours of courses at any level in any discipline other than journalism and mass communication, academic assistance, physical education, university orientation, and any other courses that are developmental, remedial, or preparatory in nature or do not earn graduation credit.	
Total hours required	**120**

Scholarships

The College administers about 25 undergraduate scholarships. Students may submit a general application during the spring semester that assures them of consideration for any of the scholarships

for which they qualify for the coming academic year.

Internships

Valuable practical experience is gained by serving internships. Although not required, internships are considered essential to a student's total educational experience and greatly enhance job opportunities upon graduation. Credit hours may be earned for successful completion of an internship if:

1. Advance approval is received from the student's department. A written request must be submitted that includes a job description, length of internship, name of supervisor and rate of pay. Also, a letter verifying the internship offer must be submitted by the employer prior to the first day of the semester in which the internship is served.
2. Certain basic courses as determined by the department have been completed.
3. The internship covers a minimum number of weeks of employment as determined by the department.
4. During the semester of the internship the student registers concurrently for TELE 5010, which is included in the maximum semester hours of journalism and mass communication credit that may be earned toward the Telecommunications major.
5. A written report is submitted by the employer prior to the last day of the semester in which the internship is served describing the intern's duties and the quality of performance.
6. A final, written report of week-by-week activities is submitted by the student to the department prior to the last day of the semester in which the internship is served.

Turfgrass Management

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Persons
Dr. Keith Karnok
Professor
kkarnok@arches.uga.edu
(706) 542-0931

Dr. Bill Randle
Associate Professor
wrandle@arches.uga.edu
(706) 542-2471

Department
Crop and Soil Sciences; Horticulture
College of Agricultural and Environmental Sciences

Description of the Program

Turfgrass management is the study of the science and culture of fine grasses that are used on golf courses, athletic fields, home lawns, and other areas requiring an attractive but functional ground cover. Increasing interest in outdoor recreational activities as well as aesthetically appealing landscaped areas has created a demand for professional turfgrass managers. The turfgrass management major at the University of Georgia is unique in that it is the only 4-year turf program in the United States that is jointly administered by two departments. The combined effort of the departments of Crop and Soil Sciences and Horticulture provide greater resources to students in terms of laboratories, teaching equipment, demonstration field plots, faculty expertise, and course offerings.

The curriculum is designed for maximum flexibility that allows students the opportunity to select one of two paths depending on their interest and future goals. Both paths will enable students the ability to secure any of the jobs discussed above as well as to enter graduate school. Specifically, the curriculum educates students in the principles and applications of both applied and basic sciences necessary for the successful establishment and maintenance of fine turfgrass areas. Students completing the turfgrass management curriculum will be knowledgeable in all aspects of plant and soil science. Particular emphasis is placed on learning environmentally sound strategies for controlling common turfgrass pests such as weeds, insects, and diseases. A careful balance of applied and basic sciences with courses in economics, business management, and accounting combined with on-the-job training opportunities will prepare students for an exciting career in the turfgrass/landscape industry.

Career Opportunities

The turfgrass industry is one of the fastest growing industries in the United States. In Georgia, it is estimated at more than one billion dollars. Completion of the turfgrass management major will allow a student the opportunity to pursue a career in golf course, athletic field, park, school, and commercial grounds management. There are many openings in the relatively new chemical lawn care industry as well as with sod production, lawn maintenance, and landscaping firms. Other opportunities include the need for well-trained individuals in the areas of turfgrass seed, chemical, and equipment sales and service. Some graduates have obtained employment in the irrigation design and installation segment of the industry, while others have found challenging careers in university research, private consulting, or with the Cooperative Extension Service. The current and future outlook for job availability is excellent. For example, two-thirds of the respondents of a recent nationwide survey of 4-year turf programs indicated between 2 to 4 jobs

per graduating student. Almost 40 percent of the respondents also indicated that they expected job availability to increase over the next several years. In short, the future looks extremely bright for careers in turfgrass management.

Entrance Requirements

Entry to this major requires completion of Core Areas A-E and Area F.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113

Scholarships

Numerous opportunities for financial assistance are available. These include the Georgia State Golf Association Scholarship; Agronomy Club Scholarship; Georgia Ag Chem Society Scholarship; Georgia Chapter American Society of Agronomy Scholarship; and the AgrEvo Turf Scholarship. Also, several scholarships are available to students in the College of Agricultural and Environmental Sciences. For more information, contact the Office of Academic Affairs in the College.

Internships

Numerous internship opportunities are available to provide Turfgrass Management students with training and experience.

Minor in Turfgrass Management

Contact the department for requirements or refe to the Bulletin Web site at www.bulletin.uga.edu

Veterinary Medicine

See Pre-Veterinary Medicine programs on pag 301 of this Bulletin, see the College of Veterinar Medicine on page 88, or contact the College for copy of the *College of Veterinary Medicin Bulletin* for information on professional and gradu ate programs.

Wildlife

Degree
Bachelor of Science in Forest Resources (B.S.F.R.)

Contact Person
Bruce C. Bongarten
Associate Dean
bongarte@smokey.forestry.uga.edu
(706)542-4284

Department
School of Forest Resources

Description of the Program

The Wildlife major provides a strong backgroun in the biological, ecological, and managerial as pects of the wildlife profession. Courses in biol ogy, ecology, and zoology provide a basic under standing of wildlife populations. Courses in botany and forestry are required because of their impor tance in managing wildlife habitat. Communica tion and policy courses help educate wildlife biolo gists to communicate effectively with the public and work within political and regulatory arenas Graduates from the Wildlife major meet the edu cational requirements for certification as Associate Wildlife Biologists by the Wildlife Society.

Career Opportunities

Graduates may work for a variety of employers including government agencies, consulting companies, and conservation organizations.

Entrance Requirements

Entry to the major requires completion of Core Areas A-E and Area F and an overall GPA of 2.5.

Admission to the Professional Program

Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Application forms for admission to the Warnell School of Forest Resources are available from the Associate Dean's office. Students may apply for fall or

spring semester admission. A maximum of 60 students will be admitted each semester. Applications for fall semester admission are due April 1. Applications for spring semester admission are due September 15. *(Note that these deadlines may be earlier than University of Georgia application deadlines).* To be eligible for admission to the Professional Program, students must have completed the 60 hour pre-Professional curriculum, except that up to 8 credits of electives and/or SPCM 1100) may be deferred if an equal number of credits have been completed from the following courses: ECOL (FORS) 3260-3260L (Wildlife and Fisheries and Aquaculture majors only), FORS 3010-3010L, FORS 3020-3020L, and CRSS(FORS) 3060-3060L. For information on the admissions process, see the Warnell School of Forest Resources section of this Bulletin.

Expectations of Transfer Students

Entry to the major requires admission to the Warnell School of Forest Resources in addition to admission to the University of Georgia. Admission to the major is not granted until the 60 credit pre-Professional program is completed. Transfer students should contact the Associate Dean, Warnell School of Forest Resources, for information on pre-Professional Program requirements and confirmation of transfer credit.

Special Requirements

The Wildlife major requires 123 semester credits: 63 in the Professional Program and 60 in the pre-Professional Program.

Program Requirements

Semester Core Curriculum	Hours
Areas A-E:	42
See Core Curriculum	
Required courses in Area A: ENGL 1101, 1102, and MATH 1113	
Preferred courses in Area D: BIOL 1107-1107L, CHEM 1211, 1211L, and MATH 2200, 2200L (take under major electives if not taken in Area D)	
Preferred course in Area E: ECON 2106 (take under major electives if not taken in Area E)	
Area F:	18
BIOL 1108-1108L; CHEM 1212, 1212L; SPCM 1100; STAT 2000; elective	
Major Requirements:	56
CRSS(FORS) 3060-3060L; ECOL (FORS) 3260-3260L; FORS 3000-3000L, 3010-3010L, 3020-3020L, 3300; FORS (ECOL) 3580-3580L; FORS 3610-3610L, 3710-3710D, 3910-3910L, 4010-4010L, 4300-4300L, 4320, 4730 or 4750, 4800-4800D, 5310-5310L	
Major Electives:	7
Total hours required	**123**

Fees

Tuition in the Professional Program is approximately 10% greater than for non-Professional programs.

Scholarships

In addition to the financial assistance offered through the University's Office of Student Financial Aid, a number of scholarships and awards are available specifically for undergraduate students in forest resources. These awards total about $80,000 annually, and are made possible by donations from forest-related industries and organizations, and from alumni and other interested individuals.

Selection for these scholarships is based on academic achievement, leadership ability, and financial need. Application forms may be obtained from the Office of the Associate Dean.

Internships, Cooperative Education

An active internship program gives students opportunity to supplement their classroom studies with practical experience in forest resource management. Students may work with private companies, landowners, conservation organizations, and federal and state agencies.

The school also offers a Cooperative Education Program with federal and state agencies such as the U.S. Fish and Wildlife Service, the U.S. Forest Service, and the Georgia Department of Natural Resources. Students may alternate semesters of off-campus work with semesters of on-campus study. Although we make every effort to facilitate cooperative education, the arrangement for such programs is usually left to student initiative.

Women's Studies Program
College of Arts and Sciences

Description of the Program

Students from any school or college may pursue a certificate or minor in Women's Studies. For information on the certificate program, see the Undergraduate Certificate Programs section of this Bulletin.

Scholarships and Internships

The Women's Studies Program keeps a current copy of the *Directory of Financial Aid for Women* in its library. This resource book contains information on scholarships, fellowships, loans, grants, awards, and internships set aside for women. For more information, call (706) 542-2846.

Minor in Women's Studies

Contact the department for requirements or refer to the Bulletin Web site at www.bulletin.uga.edu.

Pre-Professional Programs

Pre-Journalism

The Henry W. Grady College of Journalism and Mass Communication enrolls undergraduate students in the junior and senior years only. Freshmen and sophomore students who plan to apply to the College of Journalism are admitted to, and advised in, the Franklin College as "pre-journalism" majors until they enter the College of Journalism or until the beginning of their junior year, whichever comes first. Academic advising for pre-journalism students takes place in 106 New College. Details regarding admission to and degree requirements of the College of Journalism appear in that section of this Bulletin.

Pre-Law

Advisor
Ms. Wanda F. Wilcox
106 New College

The University of Georgia does not offer a degree with a major in pre-law. Students may be accepted declaring pre-law as their intention, but they should work with their academic advisors to choose specific degrees and majors. All students enrolled in the Franklin College of Arts and Sciences who are interested in attending law school should seek advice from the pre-law advisor. Additionally, a Pre-Law Guide is available, in print in 106 New College and on-line at http://ben.franklin.uga.edu/saga/lawcont.htm.

Pre-Medicine, Pre-Dentistry, and Pre-Optometry

Chief Health Professions Advisor
Dr. R. Alan Langford, M.D.
210 New College

In almost all cases, baccalaureate degrees are required for admission to schools of medicine and dentistry. At The University of Georgia, "pre-med" and "pre-dent" are not majors, so students who plan to attend medical or dental school should select majors and follow regular degree programs. There is no one "best" major for students interested in these areas, but it is critical that course selection includes both those science courses needed to assure a good score on the standardized admissions tests and course prerequisites for admission to the medical or dental schools to which the student is interested in applying.

A booklet, "Guidelines for Premedical/Predental Students at UGA" is available. Additionally, three helpful on-line web sites are: http://www.franklin.uga/premed/ (UGA Health Professions Advising Office), http://www.biosci.uga.edu (Division of Biological Sciences) and http://www.aamc.org (Association of American Medical Colleges).

Occasionally, students who demonstrate truly exceptional ability and performance are admitted to the Medical College of Georgia School of Medicine or School of Dentistry before completion of the baccalaureate degrees. If such students satisfy certain requirements, they *may* be awarded Bachelor of Science degrees, in Pre-Medicine or Pre-Dentistry, following the satisfactory completion of the first year of professional school. For information about this program, students should contact the Chief Health Professions Advisor early in their academic programs of study.

Pre-Nursing and Other Allied Health Sciences

Advisor
Ms. Jane G. Hudson
106 New College

The University of Georgia does not offer degrees in nursing, physical or occupational therapy, or any other allied health areas, but academic advising is available for students who wish to complete the freshmen and sophomore requirements for such programs prior to transferring to institutions which

lo offer these majors. Additionally, a complete Pre-Nursing Handbook can be found on the web at http://ben.franklin.uga.edu/saga/data/nurse1.htm.

Pre-Pharmacy

Advisor
Dr. Jeanne Prine
College of Pharmacy

To be admitted to the professional program in the College of Pharmacy, a student must have completed 60 semester hours of specified pre-pharmacy coursework. Applicants should take the Pharmacy College Admission Test during the Fall semester prior to the one in which they plan to enter the College of Pharmacy. Students with high academic averages and 60 semester hours of credit may be admitted with not more than 3 semester hours of deficiencies in non-science required courses, provided such deficiencies will be completed before the second professional year. For information concerning the pre-pharmacy curriculum, refer to the College of Pharmacy section of this Bulletin.

Pre-Theology

Students planning to enter theological seminaries following graduation from the University of Georgia should consult with the faculty advisor in the Department of Religion no later than the beginning of their junior years.

Pre-Veterinary Medicine (B.S.)

Academic advising information for Franklin College students who wish to complete baccalaureate degrees prior to entering colleges of veterinary medicine is available from **Ms. Jane G. Hudson, Senior Academic Advisor, Franklin College of Arts and Sciences, 106 New College.**

Occasionally, students are granted admission to the University of Georgia College of Veterinary Medicine prior to completion of their baccalaureate degrees. Such students may, after the successful completion of all baccalaureate degree core curricular requirements and of their first year of professional school, be awarded a B.S.- Pre-Veterinary Medicine degree from the Franklin College of Arts and Sciences. Students considering this option should realize that admission to the University of Georgia College of Veterinary Medicine is highly competitive and would be well-advised to have an alternative plan in mind, i.e., the pursuit of a baccalaureate degree program with a specific major. For additional information about this program, students should consult the Admissions Information and Bulletin of the College of Veterinary Medicine or contact the Associate Dean for Academic Affairs, College of Veterinary Medicine.

Pre-Veterinary Medicine (B.S.A.)

Degree
Bachelor of Science in Agriculture (B.S.A.)

Contact Person
Walter Britton
Professor and Undergraduate Coordinator
wmbritt@arches.uga.edu
phone: (706) 542-1366

Department
Poultry Science
College of Agricultural and Environmental Sciences

Description of the Program

Admission to the University of Georgia College of Veterinary Medicine requires a rigorous program of undergraduate study in the basic sciences. Students are encouraged to plan their program of undergraduate study carefully so that they will receive a Bachelor of Science in Agriculture whether or not they are later admitted to the College of Veterinary Medicine.

The College of Veterinary Medicine has a limited enrollment policy. Selection of the best qualified applicants for admission is the responsibility of a faculty committee within the College. The committee considers applicants who have met the minimum academic requirements including at least three years of study, or its equivalent, at an accredited college.

Students normally apply for admission to the College of Veterinary Medicine during their third year of study in the College of Agricultural and Environmental Sciences pre-veterinary medicine program. Students not admitted to Veterinary Medicine may continue their study in the College of Agricultural and Environmental Sciences for a fourth year to complete the requirements for the B.S.A. degree in any major they choose. Several degree programs within the College are compatible with the pre-veterinary medicine program.

The program of study will meet the dual objectives of completing the requirements for admission to the College of Veterinary Medicine and the requirements for a Bachelor of Science degree in the College of Agricultural and Environmental Sciences. Students should contact the Associate

Dean for Academic Affairs, College of Veterinary Medicine, for a more detailed description of requirements for admission to that college.

Entrance Requirements

Most students pursuing a pre-veterinary medicine program of study choose the Animal Health major. However, pre-veterinary medicine study may also be completed by enrollment in several other related majors such as Animal Science, Biological Science, Dairy Science, Environmental Health Science, or Poultry Science.

Scholarships

Several scholarships are available to students in the College of Agricultural and Environmental Sciences. For more information, contact the Office of Academic Affairs in the College.

Internships

Internships are available but not required.

Undergraduate Certificate Programs

African Studies

Contact Person
B. Ikubolajeh Logan
Director, African Studies Program
(706) 542-2856

Department
Geography
College of Arts and Sciences

Description of the Program

The certificate program in African Studies is designed for the student who wishes to learn about Africa generally, and to focus on a specific sociocultural aspect of the of the region, for example, language, religion, or literature. In addition to providing regional education, the certificate program offers students an opportunity to complement majors in a wide array of disciplines including anthropology, sociology, geography, business, journalism, and education. Students can simultaneously satisfy the requirements of the certificate program while completing their college and university electives requirements.

For specific program requirements, contact the director of the African Studies Program.

African American Studies

Contact Person
Dr. R. Baxter Miller
Director, Institute for African American Studies

Description of the Program

The Institute for African American Studies provides a central focus for study of the impact of African American contributions upon human culture. The Institute is dedicated to creative research on the achievements of African Americans and to stimulating instruction for a diverse community of thinkers. In addition, the Institute serves as a cultural repository and resource for the citizenry of Georgia.

The Institute offers a certificate upon completion of four courses offered by the Institute, plus an additional two courses approved by the Institute's Director. A major is being submitted to the Board of Regents. For further information, contact the Director of the Institute for African American Studies.

Environmental Ethics

Contact Person
Lisa Vogel
Environmental Ethics Certificate Program
School of Marine Programs
eecp@arches.uga.edu
(706) 542-0935

Description of the Program

The Environmental Ethics Certificate Program trains students to make decisions about environmental problems that involve competing values. Students benefit from viewing environmental issues from an interdisciplinary perspective. The undergraduate program, established in 1994, parallels the graduate program which began in 1983 and complements the University's environmental literacy requirement. The certificate program was the first of its type in the United States.

The certificate is awarded to undergraduate students who successfully complete at least 18 hours of undergraduate course work, including at least 7 credit hours in core courses (one 3- or 4-hour course in ecology, one 3-hour course in ethics, and one 1-hour course in environmental ethics seminar), 7 or 8 hours in approved elective courses, and 3 hours for an approved research paper in environmental ethics.

To be eligible for admission to the program, an undergraduate student must have completed at least three quarters or two semesters of full-time enrollment (must be a rising sophomore). For

further information, contact the EECP office, 542-0935, or the coordinator, Peter G. Hartel, Department of Crop and Soil Sciences, 542-0898.

French Studies

Contact Person
Jean-Pierre J. Piriou,
Coordinator, French Studies Program
(706)542-3138
jppiriou@arches.uga.edu

Department
Romance Languages
College of Arts and Sciences

Description of the Program

The French Studies Program at the University of Georgia offers the student an opportunity to share in a current national interest in French Studies and, at the same time, to develop a humanistic understanding of French civilization through the study of the French language, history, art, government, geography, literature, and philosophy.

The French Studies Program is based on a departmental major leading to the Bachelor of Arts or Bachelor of Science degree. Interested students must apply and be admitted to the program before the end of the first semester of their sophomore year. Students completing the requirements of this special program of study will receive the Certificate in French Studies upon graduation.

Applications for admission to the program and further information may be obtained from the coordinator of the French Studies Program.

Geographic Information Science

Contact Person
Dr. E. Lynn Usery
(706)542-2346

Department
Geography
College of Arts and Sciences

Description of the Program

The Geographic Information Science Certificate Program is designed to prepare undergraduates with the basic training necessary to enter the rapidly expanding field of geographic information science (GIS). There are three components to the curriculum: a set of prerequisite courses necessary to gain entry to the program, a set of core courses required of all students enrolled in the certificate program, and a set of elective courses that permit exploration of more advanced themes in GIS and/or development of individual research projects or internships in GIS. The certificate program consists of 15-16 credit hours divided into 9 core hours and 6-7 elective hours, following 8-12 prerequisite hours.

Special Requirements

Students must maintain a 3.0 GPA in the five core and elective courses that constitute the certificate program. Certificates will be awarded only in conjunction with completion of baccalaureate requirements in one of the academic units at UGA. This stipulation is waived for post-baccalaureate students.

German Studies

Contact Person
Dr. Paul Popov
Coordinator, German Studies Program

Department
Germanic and Slavic Languages
College of Arts an d Sciences

Description of the Program

The German Studies Program, established in 1979, offers the student a thorough and systematic study of German which will augment his or her particular discipline or major. The study of foreign languages, German in particular, is becoming increasingly important and greatly enhances the student's possibilities for entering and advancing in a broad variety of careers and occupations.

The student may earn the German Language Certificate and/or the Certificate in German Studies in conjunction with his or her work for the Bachelor's Degree. The former emphasizes the study of the language with primary emphasis on conversation, composition, stylistics and techniques of translation. The latter program is interdisciplinary and is designed to integrate the study of German with other disciplines such as art, economics, geography, history, music, philosophy, political science, etc.

Interested students are urged to apply and be admitted to the program of their choice before the end of their sophomore year. Further information may be obtained from the coordinator of the German Studies Program.

Dr. Markus M.L. Crepaz
Program Coordinator
mcrepaz@arches.uga.edu
(706)542-2947

Department
College of Arts and Sciences

Description of the Program
The Certificate in Global Studies is designed to offer a global perspective, to facilitate the ability to communicate in different languages, to help develop an appreciation for other cultures, and to promote informed analysis of global issues. The certificate serves both educational and vocational purposes through the advancement of an understanding of global affairs and other cultures and preparation for a growing number of international careers in government, business, and non-governmental organizations.

Career Opportunities
Employment opportunities exist in international organizations (government and non-government), multinational civic and economic organizations, and nonprofit humanitarian institutions.

International Agriculture

Contact Person
Edward T. Kanemasu
Regents Professor and Coordinator
Office of International Agriculture
ekanema@arches.uga.edu
(706)542-7803

College
College of Agricultural and Environmental Sciences

Description of the program
Undergraduate students in Agricultural and Environmental Sciences may focus their degree programs on the special problems of international agriculture and trade relationships. The Certificate in International Agriculture is designed to add a global dimension to all programs in the College.

To obtain a Certificate in International Agriculture, students include courses in foreign language, geography, economic development, and international marketing. Careful planning will allow most students to qualify for the Certificate in International Agriculture by taking these courses as general electives while meeting degree requirements. Admission to the program and further information may be obtained from the Office of Academic Affairs, 102 Conner Hall.

Entrance Requirements
Student must major in an area within the College of Agricultural and Environmental Sciences.

Career Opportunities
Employment opportunities exist in international agribusiness, government service, international scientific companies, import/export companies, freight forwarders, international marketing firms, teaching abroad/teaching foreign students, non-governmental organizations (NGOs), and multinational companies

Latin American Studies

Contact Persons
Brent Berlin
CLACS Director and Graham Perdue Professor of Anthropology

Fausto O. Sarmiento
CLACS Program Coordinator
fsarmien@arches.uga.edu
(706)542-9079

Department
Center for Latin American and Caribbean Studies
College of Arts and Sciences

Description of the Program
The Latin American Studies Program was established to coordinate and develop facilities at the University to provide interdisciplinary preparation for students who are planning careers that require specialized knowledge of the Latin American republics and the Inter-American system.

Career Opportunities
Students who earn a Certificate in Latin American Studies enhance their opportunities to work in international business and finance, consulting, international development, technology cooperation and in overseas positions with American companies in Latin America and the Caribbean. Besides their formal major, the certificate entitles the prospective UGA graduate recognition of his/her mastery of the language and culture of the region and facilitates more connections at the local level. Graduates have found employment in corporations such as Coca-Cola, AT&T, and BellSouth; in organizations such as CARE, the Peace Corps, the Nature Conservancy; and in colleges teaching Spanish or Portuguese.

Entrance Requirements
Open to students who have completed 30 hours with grade C or better, with demonstrable knowledge of a language of the region (Spanish, Portuguese, French, Tzotzil, Tzetzal, Quichua, Guarani,

Aymara, etc.), and willingness to further Latin Americanism on campus.

Applications for admission to the program and further information may be obtained from the CLACS Program Coordinator.

Medieval Studies

Contact Person
Dr. Jonathan Evans
Director, Medieval Studies Program
jdmevans@arches.uga.edu
(706)542-2229;542-1261

Department
English
College of Arts and Sciences

Description of the Program

Regardless of their major, students of the medieval period have discovered that an interdisciplinary approach is necessary to achieve understanding and expertise in their area of study. Established in 1974, The University of Georgia Medieval Studies Program is the only program of its kind in the state and the earliest-established certificate program supported by the University of Georgia. Through the UGA Medieval Studies Program, undergraduate students can establish an interdisciplinary concentration leading to the Certificate in Medieval Studies while completing their degree in one of the established departments.

The individual student program is developed in consultation with the student's major professor and approved by the Steering Committee of the Medieval Studies Program. Upon completion of the approved plan of study, the A.B. candidate is awarded the Certificate in Medieval Studies with the baccalaureate diploma.

For specific requirements, contact the coordinator of the Medieval Studies Program.

Women's Studies

Contact Person
Heather S. Kleiner
Associate Director
Women's Studies Program
hkleiner@arches.uga.edu
(706)542-2846

Department
Women's Studies Program
College of Arts and Sciences

Description of the Program

The Women's Studies Program is an academic program providing an interdisciplinary perspective on women. The program cooperates with departments of all schools and colleges of the University in developing courses that focus on women and in integrating the new scholarship on women into existing courses. Traditional academic disciplines have devoted little systematic attention to gender. In the past 30 years, feminist scholars have contributed to the reinterpretation of existing data and to the presentation of new knowledge about the diversity of women's experiences. Through course work, the Women's Studies Program offers students an opportunity to explore women's roles, contributions, and perspectives, and in doing so, rectifies omissions in the existing curriculum. We communicate with the University community through our listserv (ugawsp-l@listserv.uga.edu) and our web page (http://www.uga.edu/wsp).

Two courses, WMST 1110-1110D (1110H) Multicultural Perspectives on Women in the United States and WMST 2010 (2010H) Introduction to Women's Studies, are social science options in the College of Arts and Sciences' core. Also, WMST 1110-1110D (1110H) and WMST 3110 Gender, Race and Class are options which can fulfill the College of Arts and Sciences' multicultural education requirement.

The Certificate in Women's Studies is awarded upon completion of 18 semester hours of approved courses. All candidates must include (1) WMST 1110-1110D or 1110H or 2010 or 2010H, *and* (2) WMST 4010 Introduction to Feminist Theories in their programs of study. The 12 hours remaining will be drawn primarily from a list of Primary Course Options, courses devoted exclusively or primarily to topics pertaining to women and gender. With special permission, a student may take three hours of WMST 4950 Directed Studies in Women's Studies, *or* three hours of directed studies in a department, *or* three hours of a related course in which there is an opportunity to study women through units offered by the instructor or through term papers. The Women's Studies advisor can provide current information on primary and related courses.

Depending upon the student's degree program, Certificate courses may count toward general studies, the major, or elective offerings. A grade of C or better is required in each course. With the exception of WMST courses, no more than 6 semester hours may be taken in the same department (or have the same prefix). No more than 6 semester hours may be taken with the same instructor. No more than 6 semester hours of course work taken at other colleges or universities may be applied toward the Certificate. Interested students will need to discuss their plans for the Certificate with their own advisors early in their

academic careers so that proper sequencing of prerequisites, where required, can be allowed for. Also, they must contact the Women's Studies advisor to complete an application, to declare a proposed course of study, and to secure information about semester course offerings.

Career Opportunities

A Certificate in Women's Studies complements any academic major and opens career opportunities in fields of law, women's health, education, counseling, public relations, politics, and many others.

Courses of Instruction

Prefix Abbreviations

Courses in this section are listed in alphabetical order by prefix. Courses under prefixes for which no page numbers are indicated are graduate or professional level and therefore do not appear in this Bulletin. For a complete list of all courses offered at the University, see the Bulletin Web site at http:// www.bulletin.uga.edu.

(AAEC) Agricultural and Applied Economics

College of Agricultural and Environmental Sciences, Department of Agricultural and Applied Economics

AAEC 2020-2020L. Introduction to Computers in Agribusiness and Natural Resources. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week. Computer technology, and the application of computer technology for the solution of business and economic problems in agriculture and natural resources. Applications will include spreadsheets, word processing, electronic mail, and locating and obtaining information over the Internet.

AAEC 2110. Agribusiness Accounting. 3 hours.
Not open to students with credit in ACCT 2101 or ACCT 1160.
Accounting for agribusiness firms with emphasis on financial statement preparation and analysis of accounting information for managerial purposes. Special emphasis is given to problems of income measurement and asset valuation for agribusiness firms.

AAEC 2580. Applied Microeconomic Principles. 3 hours.
Not open to students with credit in ECON 2106.
Individual consumer and producer behavior in a market economy using economic principles to analyze, and solve problems in resource allocation, food production, distribution, environmental management, economic development, and international trade.

AAEC 3010. Farm Organization and Management. 3 hours.
Prerequisite: AAEC 2580 or ECON 2106.
The study of individual farm programs for the purpose of determining methods to be used for increasing farm income.

AAEC 3040. Agribusiness Marketing. 3 hours.
Prerequisite: AAEC 2580 or ECON 2106.
Agribusiness marketing for farm products describing and analyzing agribusiness marketing functions to have a comprehensive understanding of the principles of agribusiness marketing.

AAEC 3060. Principles of Resource Economics. 3 hours.
Prerequisite: AAEC 2580 or ECON 2106.
Basic theoretical concepts and analytical tools necessary to evaluate resource use, allocation, and policy. Emphasis is placed upon theoretical applications to natural, rural, and agricultural resources which impact both public sector and private sector economic activities.

AAEC 3100. Food and Fiber Marketing. 3 hours.
Not open to students with credit in MARK 3000.
Prerequisite: AAEC 2580 or ECON 2106.
Basic concepts of marketing food and fiber and related services and for making essential marketing decisions; approaches food and fiber product marketing as being individual and organization activities aimed at facilitating and expediting exchanges within a set of dynamic environmental factors.

AAEC 3200. Selling in Agribusiness. 3 hours.
Sales and merchandising techniques appropriate for agricultural selling and marketing. The psychology of selling, the selling process, spatial marketing strategies, and communication skills are emphasized, as used in agribusiness.

AAEC 3400. Introduction to Agricultural Policy. 3 hours.
Prerequisite: (AAEC 2580 or ECON 2106) and ECON 2105.
Domestic and international government policies affecting agriculture, agribusinesses, and rural economies. Policy alternatives aimed at solving economic and environmental problems of the food and agricultural sector are identified and evaluated.

AAEC 3510. Agricultural Credit. 3 hours.
Prerequisite: AAEC 2580 or ECON 2106.
The techniques and principles of finance of the farm firm and a study of needs, sources, and problems associated with credit and capital use among individual farm business units.

AAEC 3580-3580L. Intermediate Economic Principles. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in ECON 4010.
Prerequisite: (AAEC 2580 or ECON 2106) and [MATH 2110 or (MATH 2210 and MATH 2210L)].
Competitive and imperfect markets in the allocation of consumer goods and input factors in the free enterprise economy.

AAEC 3610-3610L. Applied Econometrics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AAEC 3580-3580L and STAT 2000.
Basic applied econometric analysis, including simple regression analysis, hypothesis testing, model selection, and data collection techniques. Applications are an integral part of the course, with students using computers to solve problems common in agricultural and environmental sciences.

AAEC 3690. Agribusiness Finance. 3 hours.
Prerequisite: (AAEC 2580 or ECON 2106) and (AAEC 2110 or ACCT 2101).
Financial concepts and analysis related to agribusiness

firms, including analysis based on financial statements, business and financial risk, valuation, and capital budgeting.

AAEC 3910. Internships. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Junior standing and permission of department.
Educational experience gained while performing an internship for an agribusiness, governmental, environmental management, or natural resource agency or organization.
Non-Traditional Format: Internship.

AAEC 3980. Introduction to Agribusiness Management. 3 hours.
Not open to students with credit in AAEC 4980/6980.
Prerequisite: AAEC 2580 or ECON 2106.
Managerial concepts, procedures, and techniques in agribusiness management. Techniques of planning, organization, staffing, directing, and controlling functions of management.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

AAEC 4040-4040L. Quantitative Approaches to Agribusiness Management. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: STAT 2000.
Agribusiness decision making and forecasting using probabilities and simulation.

AAEC 4050. Agribusiness Law. 3 hours.
Legal principles as they apply to agribusiness, directed toward making students aware of rights and obligations of agribusiness firms. The materials should enable students to recognize and avoid legal problems, and effectively utilize legal counsel.

AAEC 4210/6210. Production Economics: Theory with Applications. 3 hours.
Prerequisite: Undergraduate level only: AAEC 3580-3580L.
Fundamental economic principles in determining efficient adjustments in agricultural resource use consistent with economic growth, and changing technology and economic conditions.

AAEC(EHSC) 4250. Environmental and Public Health Law. 3 hours.
Not open to students with credit in AAEC 4930/6930.
Basic legal principles and procedures as they relate to environmental regulations and public health. Coverage of common law, torts, nuisances, regulatory standards, and state and federal environmental laws. Delineation of significant constitutional and federal regulations that affect managerial decisions.

AAEC 4510/6510. Farm Appraisal. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
The models of appraisal to farm property, including factors influencing farm land and building values, such as land use, soils, crops, livestock, and buildings.

AAEC 4650. Environmental Economics. 3 hours.
Prerequisite: AAEC 2580 or ECON 2106.
Economic theory and methods applied to environmental problems and policies. Policies affecting individual and business decisions about environmental quality, policy formation, and incentive-based solutions; alternatives for reform evaluated for political and economic acceptability.

AAEC 4710/6710. Rural Economic Development and Growth. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Inputs and outputs between agriculture and agricultural businesses; analysis of factors affecting development and economic growth in developing areas.

AAEC 4760. The Economics of Agricultural Processing and Marketing. 3 hours.
Prerequisite: AAEC 3580-3580L.
The economics of the agricultural processing and marketing sectors. Economics of assembly line production; efficient plant size, location, and operation; the economics of commodity storage; the economics of the marketing sector; spatial competition; and price and quantity competition among firms with market power.

AAEC 4800/6800-4800L/6800L. Water Resource Economics. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
The economic aspects of the use, supply, development, and management of water resources with special emphasis on river basin and project planning, benefit-cost analyses, water demands, and multiple use management of water resources.

AAEC(FINA) 4870/6870. Futures and Option Markets. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Development, functions, and importance of futures and option markets. Futures and option contracts; issues such as speculation, the roles of commission houses, commodity exchanges, and clearinghouses; and the use of future contracts as instruments for financing business activities. Technical and fundamental trading theories.

AAEC 4930/6930. Environmental Law and Governmental Regulation. 3 hours.
Not open to students with credit in AAEC(EHSC) 4250.
Regulatory theory, externalities and market failures, definition of key regulations affecting agribusiness, overview of local government law, and delineation of environmental laws relating to agriculture. Current

environmental issues are related to statutory, administrative, and regulatory authorities.

AAEC 4960. International Agricultural Trade Policy. 3 hours.
Prerequisite: AAEC 3580-3580L or ECON 4010.
Basic international trade theory, its application to agricultural commodity trade, and the effects of international relations and agricultural policy on world trade.

AAEC 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

AAEC 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

AAEC 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

AAEC 4980/6980. Agribusiness Management. 3 hours.
Prerequisite: Undergraduate level only: (AAEC 2110 or ACCT 2101) and (AAEC 3040 or AAEC 3100).
The basic skills needed to be an effective manager of an agribusiness; applying and integrating these skills into a workable approach to management; provides a step-by-step approach to the application of basic practical management skills in marketing, demand analysis, forecasting, finance, plant operations, and personnel.

AAEC 4990. Special Topics in Agricultural and Applied Economics. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Special problems in agricultural, environmental, or other applied economics analysis, decision making, and policy studies.

AAEC 4990H. Honors Thesis. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

(ACAC) Academic Assistance Counseling

Division of Academic Assistance

ACAC 0097. Academic Reentry Skills. 2-3 hours.
Provides students a better understanding of unique challenges associated with reentry to an academic setting.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAC 0098. Introduction to Academic Assistance. 2-3 hours.
Provides students a better understanding of realistic study goals, academic motivation, time management, and multi-modal information processing. Special attention will be given to delineating the differences between successful and less successful students.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAC 0099. Academic Skills for Success. 2-3 hours.
Development of personal, social, and career exploration skills which facilitate success and achievement in a university setting.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ACAE) Academic Assistance English

Division of Academic Assistance

ACAE(ENGL) 0097. Fundamentals of Effective Writing. 3 hours.
Covers major sentence and syntax errors and basic organization of paragraphs and short narrative and expository papers. Writing topics include personal and expository topics. Emphasis on drafting and revising.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAE(ENGL) 0098. Basic Composition for Multilingual Writers. 3 hours.
Not open to students with credit in ACAE(ENGL) 0099.
For multilingual students only. Course covers elements of effective style, careful proofreading, logical organization, and convincing development of expository and persuasive essays. Emphasis on problems multilingual students typically experience with proofreading, revision, and writing for an American academic audience.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAE(ENGL) 0099. Basic Written Composition. 3 hours.
Not open to students with credit in ACAE(ENGL) 0098.
Covers elements of effective style, careful proofreading, logical organization, and convincing development

of college-length expository and persuasive essays. Emphasis on proofreading, revision, and analytic and interpretive thinking and writing.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ACAM) Academic Assistance Math

Division of Academic Assistance

ACAM(MATH) 0097. Intermediate Algebra I. 3 hours.
Concepts of fractions, decimals, percents, and signed numbers. Methods for solving first degree equations, systems, and related applications, and graphing linear equations.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAM(MATH) 0098. Intermediate Algebra II. 3 hours.
Concepts of factoring, functions, polynomials. Methods for solving second degree and rational equations and related applications. Operations regarding polynomials, exponents, and radicals.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAM(MATH) 0099. Introduction to College Algebra. 3 hours.
Concepts of factoring, exponents, polynomials, radicals, fractions, and graphing. Methods for solving equations: rational, first and second degree, absolute value, inequalities, and systems and their related applications.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ACAR) Academic Assistance Reading

Division of Academic Assistance

ACAR(READ) 0097. Academic Assistance Reading. 3 hours.
College reading and vocabulary skills.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAR(READ) 0098. Developing Reading and Studying Fluency. 4 hours.
Critical reading and thinking skills, reading fluency, and vocabulary development.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAR(READ) 0099. Reading and Studying in College. 3 hours.
Study strategies needed to be successful in college using content from a variety of disciplines, includes reading rate and vocabulary development.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

ACAR(READ) 0099L. Preparation for the Collegiate Placement Exam (CPE). 1 hour. 1 lab period of 1 hour each per week.
Computer instruction on reading rate and test preparation for Collegiate Placement Exam (CPE).
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ACCT) Accounting

Terry College of Business

ACCT 1120H. Principles of Accounting I (Honors). 3 hours.
Not open to students with credit in ACCT 2101.
Prerequisite: Permission of Honors.
Financial accounting and the accounting environment. Students learn to record business transactions, post accounts, and prepare financial statements. The latitude given managers in preparing financial statements, and the role played by the external auditor in attesting statement presentations. A research project is required.

ACCT 1130H. Principles of Accounting II (Honors). 3 hours.
Not open to students with credit in ACCT 2102.
Prerequisite: ACCT 1120H and permission of Honors.
The analysis, interpretation, and reporting of managerial accounting information for management's use in operating a business. Concepts and methods, such as capital budgeting and break-even analysis, are related to other business disciplines.

ACCT 1160. Survey of Accounting. 3 hours.
Prerequisite: Permission of department.
The analysis and interpretation of financial statements commonly found in the private sector. Not open to Business Administration students.

ACCT 2101. Principles of Accounting I. 3 hours.
Not open to students with credit in ACCT 1120H.
Basic accounting systems, concepts, and principles. The analysis and design of financial controls and the preparation, analysis, and interpretation of financial statements. Time value of money and ratio analysis are discussed as they relate to other disciplines such as finance and marketing.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ACCT 2102. Principles of Accounting II. 3 hours.
Not open to students with credit in ACCT 1130H.
Prerequisite: ACCT 1120H or ACCT 2101.
Basic managerial accounting systems, concepts, and principles. The analysis, interpretation, and reporting of cost data for management's decision making needs. Cost-volume-profit analysis, budgeting, and performance reporting are discussed as they relate to other business disciplines.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ACCT 4000. Accounting Information in a Multinational Setting. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
The use of domestic and international accounting information in the valuation of business enterprises and prediction of earnings, cash flow, and equity value.

ACCT 4400. Principles of Taxation for Non-Accountants. 3 hours.
Not open to students with credit in ACCT 5400/7400.
Prerequisite: ACCT 2101.
The principles of federal income taxation as they apply to individuals and business entities.

ACCT 4990. Directed Study in Accounting. 1-6 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: ACCT 1130H or ACCT 2102.
Directed study or research in the area of accounting.
Non-Traditional Format: Directed readings or study under the direction of a faculty member done independently of regularly scheduled classes.

ACCT 4990H. Honors Thesis. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual research leading to an honors thesis under the guidance of a thesis director.
Non-Traditional Format: Research project under the direction of a faculty member done independently of the regularly scheduled classes.

ACCT 5000. Intermediate Accounting I. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
Corequisite: ACCT 5710.
Accounting concepts, critical thinking skills, and techniques involved in the accounting process and the preparation of financial statements. Most asset categories and current and long-term liabilities. The financial statements from the perspective of both preparers and users. The accounting standard-setting process and the economic consequences of accounting standards on a form's stakeholders.

ACCT 5010. Intermediate Accounting II. 3 hours.
Prerequisite: ACCT 5000.
Corequisite: ACCT 5720.
A continuation of Intermediate Accounting I. Topics from accounting are reinforced with new topics concerning owners equity, earnings per share, accounting changes and errors, income taxes, pensions, leases, and other topics.

ACCT 5020. Intermediate Accounting III. 3 hours.
Prerequisite: ACCT 5010.
A continuation of Intermediate Accounting II.

ACCT 5030/7030. Advanced Financial Accounting. 3 hours.
Prerequisite: ACCT 5020.
Application of accounting theory to complex business entities, including accounting for equity investments, business combinations, and international operations. Accounting for not-for-profit organizations. The preparation of consolidated financial statements, including the use of electronic spreadsheets.

ACCT 5100/7100. Managerial Accounting I. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
The design of accounting systems to serve the internal needs of management with an emphasis on underlying theory. Product costing, including activity-based costing; budgeting and other planning applications, information for decision making, planning and control application for decentralized organizations.

ACCT 5200/7200. Audit/Systems I. 3 hours.
Prerequisite: ACCT 5020 and ACCT 5100/7100.
Assurance services with focus on the audit of financial statements. The basic financial statement audit process is discussed including the concepts of evidence, materiality, and risk. The role of professional ethics and legal liability in the auditing profession.

ACCT 5310/7310. Audit/Systems II. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
Accounting information systems (AIS), including the role of such systems in an organization, electronic data processing, AIS applications, AIS analysis and design, AIS controls, and the audit of AIS.

ACCT 5400/7400. Taxation I. 3 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
A basic federal income tax course covering concepts of taxation applicable to all taxable entities but primarily relating to individuals. Introduces research approaches to tax problems as well as methods of analysis most appropriate to taxation issues.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ACCT 5410/7410. Taxation II. 3 hours.
Prerequisite: ACCT 5400/7400.
The federal taxation of business entities and owners, primarily focusing on corporations and shareholders. The tax provisions governing business entities, as well as the impact of those provisions on business decisions and choice of entity form.

ACCT 5420/7420. Partnership Taxation. 3 hours.
Prerequisite: ACCT 5730/7730 and permission of department.
The fundamental tax and legal concepts involved in the income taxation of partnerships and partners.

ACCT 5430/7430. Estate and Gift Taxations. 3 hours.
Prerequisite: ACCT 5730/7730 and permission of department.
The structure and fundamental concepts involved in estate and gift taxation and the income taxation of estates and trusts. Personal financial planning concepts are also introduced.

ACCT 5440/7440. Corporate Tax I. 3 hours.
Not open to students with credit in ACCT 5410/7410.
Prerequisite: ACCT 5400/7400.
The federal taxation of business entities and owners, primarily focusing on corporations and shareholders, for students planning to pursue a concentration in taxation.

ACCT 5710. Professional Accounting I. 1.5 hours.
Prerequisite: ACCT 1130H or ACCT 2102.
Corequisite: ACCT 5000.
Areas of accounting emphasis and their pertinence to alternative accounting careers. Written assignments and discussion with speakers used to enhance communication skills.

ACCT 5720. Professional Accounting II. 1.5 hours.
Prerequisite: ACCT 5000.
Corequisite: ACCT 5010.
Professional development and professional responsibilities of accountants in public and private practice.

ACCT 5730/7730. Tax Policy and Research. 3 hours.
Prerequisite: ACCT 5400/7400 and permission of department.
Development of tax research tools and the development of an understanding of tax policy issues as they arise in social policy and professional accounting settings.

ACCT 5740/7740. Accounting Policy and Research. 3 hours.
Prerequisite: ACCT 5200/7200 and permission of department.
Development of accounting research tools and an understanding of accounting policy issues as they arise in social policy and professional accounting settings.

ACCT 5800/7800. Internship/Cooperative Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Applied professional experience or experience with the profession in another culture.
Non-Traditional Format: Relevant professional work experience that augments topics covered in regular classes.

(ADPR) Advertising and Public Relations

College of Journalism and Mass Communication, Department of Advertising and Public Relations.

ADPR 3100. Principles of Advertising. 3 hours.
Advertising concepts, organization, and practices. Topics include advertising preparation and placement, research, and advertising's economic and social impact.

ADPR 3110. Advertising Message Strategy. 3 hours.
Prerequisite or corequisite: (ADPR 3100 or MARK 3000) and permission of major.
Strategy and execution of advertising copy and layout. Study of solutions of advertising/marketing communication problems through preparation of advertisements for a variety of media.

ADPR 3120. Media Planning. 3 hours.
Prerequisite: ADPR 3100 and [(STAT 2000 or STAT 2210 or STAT 4210) or (MSIT 3000] and permission of major.
Media planning and its role within the marketing function. Attention is directed toward the creative selection, scheduling, and evaluation of media vehicles to deliver advertising and promotion messages to target audiences in an effective and efficient manner.

ADPR 3130. Advertising and Consumer Research. 3 hours.
Prerequisite: ADPR 3100 and [(STAT 2000 or STAT 2210 or STAT 4210) or (MSIT 3000] and permission of major.
Advertising and consumer research techniques in strategic planning, message development, understanding consumer behavior, measurement of media audiences, and evaluation of advertising efforts and spending. Emphasis on theories of advertising response, consumer behavior, objective setting, and measurement of advertising effects.

ADPR 3140. Advertising and Society. 3 hours.
Prerequisite: ADPR 3100 and permission of major.
Designed to foster a critical understanding of advertising and promotion as an institution, and its role in communication, society, culture, and our economy. Students develop a framework in which to understand the continuing dialogue between supporters and critics, and confront issues related to the institution's ethical conduct, regulatory issues, and social responsibility.

ADPR 3520. Graphic Communications. 3 hours.
Prerequisite: Permission of major.
Printing processes, typography, photoengraving, layout and design, production planning, and related topics.

ADPR 3850. Public Relations. 3 hours.
Principles and techniques of public relations. Research in interpersonal and mass communications with emphasis on effectiveness and studies among various publics.

ADPR 4960H. Independent Reading/Research Project in Advertising and Public Relations (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual project in advertising, public relations, and related communication fields under the direction of a sponsoring faculty member.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

ADPR 4970H. Independent Reading/Research Project in Advertising and Public Relations (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual project in advertising, public relations, and related communication fields under the direction of a sponsoring faculty member.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

ADPR 4980H. Independent Reading/Research Project in Advertising and Public Relations (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual project in advertising, public relations, and related communication fields under the direction of a sponsoring faculty member.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

ADPR 4990H. Honors Thesis in Advertising and Public Relations. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual research in advertising, public relations, and related communication fields under the direction of a sponsoring faculty member.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

ADPR 5010. Advertising Internship. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and permission of department.
Supervised experience in advertising. Interns are required to work full time for sponsoring organizations and to complete a journal describing weekly assignments with examples of completed work. Performance is evaluated by representatives of the internship sponsor and by the assigned faculty supervisor.
Non-Traditional Format: Internship.

ADPR 5011. Public Relations Internship. 3 hours.
Prerequisite: JOUR 3410 and ADPR 3850 and permission of department.
Supervised experience in public relations. Interns are required to work full time for sponsoring organizations and to complete a journal describing weekly assignments with examples of completed work. Performance is evaluated by representatives of the internship sponsor and by the assigned faculty supervisor.
Non-Traditional Format: Internship.

ADPR 5170. Advanced Studies in Advertising and Public Relations. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Independent study of any area of advertising, public relations, or related communications function. Students are responsible for finding a faculty sponsor. Written proposal outlining the area of study must be submitted and receive approval from the sponsoring instructor.
Non-Traditional Format: Independent study.

ADPR 5710. Advertising and Communication Management. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of major.
Managerial and decision making processes of advertising and related marketing communication functions. Emphasis on determining opportunities, integrating with other elements of the promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.

ADPR 5740/7740. Advertising and Communication Campaigns. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of department.
Corequisite: ADPR 5710.
Managerial and decision making processes in simulated situations with student groups functioning as advertising agencies to plan, implement, and manage advertising and communication campaigns for assigned clients.

ADPR 5760. Direct and Interactive Advertising and Communications. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of major.
Direct mail, direct response advertising, sales promotion, and interactive communication technologies. Attention is given to evaluating direct and interactive advertising and promotion strategies, the role and uses of new communication technologies, audience targeting, message design and creation, specialized media and message-delivery methods, and consumer databases.

ADPR 5790/7790. Advertising Portfolio Seminar. 3 hours.
Prerequisite: ADPR 3110 and ADPR 3120 and ADPR 3130 and permission of major.
Student production and development of an advertising portfolio of their best creative work with emphasis on both verbal and visual skills.

ADPR 5910. Public Relations Administration. 3 hours.
Prerequisite: ADPR 3850 and JOUR 3410 and permission of major.
Operation and objectives of corporate public relations programs using the case study approach. Emphasis is given to relating the management function of decision making and policy formation to the communication process.

ADPR 5920. Public Relations Communications. 3 hours.
Prerequisite: ADPR 3850 and JOUR 3410 and permission of major.
Writing course designed to help the student understand news releases, feature stories, speeches, letters, scripts, cutlines, memoranda, and other tools basic to the practice of public relations. Emphasis will be placed on the strategies and techniques behind public relations writing.

ADPR 5950/7950. Public Relations Campaigns. 3 hours.
Prerequisite: ADPR 5910 and ADPR 5920 and permission of department.
Research, planning, and preparation of an integrated public relations campaign. Campaigns will alternate among business, governmental, and organization problems.

ADPR 5990. Seminar in Advertising and Public Relations. 1-3 hours.
Prerequisite: (Junior standing or senior standing) and permission of department.
Seminar designed to synthesize and integrate many of the theoretical and practical approaches to the study and application of advertising, public relations, and related communication fields. Emphasis is on critical thinking, analytical processes, and acquisition of specialized knowledge pertaining to the seminar topic.

(ADSC) Animal and Dairy Science

College of Agricultural and Environmental Sciences, Department of Animal and Dairy Science

ADSC 2000-2000L. Practicum in Animal and Dairy Science. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
Care and techniques of farm animal management, handling, movement, restraint, and facilities needed for efficient and profitable animal production.

ADSC 2010. Introductory Animal and Dairy Science. 3 hours.
Corequisite: ADSC 2010L.
Basic principles of breeding, feeding, and management of beef cattle, dairy cattle, sheep, swine, and horses.

ADSC 2010L. Introductory Animal and Dairy Science Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Corequisite: ADSC 2010.
Basic principles of breeding, feeding, and management of beef cattle, dairy cattle, sheep, swine, and horses.

ADSC 2300. Companion Animal Care. 2 hours.
Companion animal care with emphasis on nutrient requirements, digestion and absorption, commercial feeds, reproduction, diseases, parasites, behavior, and the animal role in human health and disease.

ADSC 2630-2630L. Pleasure Horse Management. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Pleasure horse management, including conformation, breeds, nutrition, reproduction, diseases, behavior, and current issues of the equine industry.

ADSC 3010-3010L. Meat Merchandising. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
The conversion of domestic livestock to retail and food service products. Emphasis on slaughter, fabrication, pricing, packaging, and sanitation technologies.

ADSC 3110. Introduction to Genetics of Livestock Improvement. 3 hours.
Prerequisite: ADSC 2010 and ADSC 2010L and BIOL 1107-1107L.
Genetics and statistics as related to the genetic improvement of farm animals.

ADSC 3180-3180L. Meats Judging I. 2 hours. 2 lab periods of 2 hours each per week.
Grading and evaluating beef, pork, and lamb carcasses and their wholesale cuts. Terminology to describe and detect differences among carcasses of the same species. Written reasons describing detectable differences.

ADSC 3190-3190L. Meats Judging II. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ADSC 3180-3180L or permission of department.
Selecting and grading carcasses and wholesale cuts of beef, pork, and lamb. Terminology required to describe and detect differences among carcasses and primal cuts in addition to written reasons describing detectable differences. The meats judging team which represents the University in intercollegiate Meats Judging Contests will be selected from the students in this course.

ADSC 3200-3200L. Evaluation and Composition. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Evaluation of livestock and their carcasses for composition and selection criteria for the breeding herd. Emphasis will be on development of value-determining traits and how they can be controlled to influence livestock value.

ADSC 3210-3210L. Livestock Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ADSC 3200-3200L or permission of department.
The selection of livestock for the breeding herd and for slaughter. The team representing the University in the annual Spring Intercollegiate Livestock Judging Contests will be chosen from the students in this course.

ADSC 3220-3220L. Advanced Livestock Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ADSC 3210-3210L or permission of department.
A continuation of Livestock Evaluation and Selection. The team representing the University in the annual Fall Intercollegiate Livestock Judging Contests will be chosen from the students in this course.

ADSC 3230-3230L. Light Horse Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Evaluation of horses relating to riding qualities and anatomical structure. Prerequisite for competing in collegiate horse judging contests.

ADSC 3250-3250L. Advanced Horse Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ADSC 3230-3230L.
Evaluation of conformation and performance of various breeds. Teams will be selected to compete in intercollegiate horse judging contests.

ADSC 3260-3260L. Dairy Cattle Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Principles and practices concerned with the evaluation of type in dairy cattle, with special emphasis on show ring judging.

ADSC 3270-3270L. Advanced Dairy Cattle Evaluation and Selection. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ADSC 3260-3260L.
A continuation of Dairy Cattle Evaluation and Selection. The University will be represented at national intercollegiate judging contests in the fall by students chosen from this course.

ADSC 3300-3300L. Animal Nutrition and Metabolism. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ADSC 2010 and ADSC 2010L and [(CHEM 2100 and CHEM 2100L) or (CHEM 2211 and CHEM 2211L)].
Animal nutrition and metabolism. The chemical composition of nutrients, biochemical reactions and their regulation as related to the metabolic pathways associated with the assimilation of nutrients and application of these concepts in the growth and performance of animals of economic importance.

ADSC 3310-3310L. Feeds and Feeding. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
Prerequisite: ADSC 3300-3300L.
Composition and properties of feedstuffs and application of principles of nutrition in the use of these feedstuffs in feeding livestock.

ADSC 3320. Animal Nutrition and Feeding. 3 hours.
Not open to students with credit in ADSC 3300-3300L or ADSC 3310-3310L.
Animal nutrition followed by feed identification and ration formulation. This course is designed for non-animal science majors.

ADSC 3400-3400L. Physiology of Reproduction in Farm Animals. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ADSC 2010 and ADSC 2010L and BIOL 1108-1108L.
Physiology of reproduction in farm animals.

ADSC 3420. Physiology of Lactation in Farm Animals. 2 hours.
Prerequisite: BIOL 1108-1108L.
The anatomy, physiology, and function of the mammary gland of farm animals.

ADSC 3600-3600L. Beef Cattle Production and Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Two of the following: ADSC 3110 or ADSC 3310-3310L or ADSC 3400-3400L.
Breeding, feeding, and management of beef cattle.

ADSC 3610-3610L. Pork Production and Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Two of the following: ADSC 3110 or ADSC 3310-3310L or ADSC 3400-3400L.
Breeding, feeding, and management of swine.

ADSC 3620-3620L. Dairy Cattle Production and Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Two of the following: ADSC 3110 or ADSC 3310-3310L or ADSC 3400-3400L.
Effects of environment and its interactions with physiology and inheritance upon performance of the cow and the cost of producing milk. This includes the effects of climate, health, sanitation, forage systems, housing, equipment, and waste management.

ADSC 3630-3630L. Horse Production and Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Two of the following: ADSC 3110 or ADSC 3310-3310L or ADSC 3400-3400L.
Breeding, feeding, and management of horses.

ADSC 3640-3640L. Sheep and Goat Production and Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Two of the following: ADSC 3110 or ADSC 3310-3310L or ADSC 3400-3400L.
Breeding, feeding, and management of sheep and goats.

ADSC(FDST) 3650-3650L. Introductory Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Meat science focusing on the meat industry, role of muscle foods in the human diet, meat inspection, muscle structure and function, conversion of muscle to meat, anatomy, factors influencing meat quality, meat processing, and meat safety and quality control.

ADSC 3700. Special Problems in Animal and Dairy Science. 2-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Individual study, readings, and research projects in laboratories or on experimental farms involving animal or meat-related topics.
Non-Traditional Format: Special problems course; students and faculty set times as needed.

ADSC 3810. Animal and Dairy Science Orientation. 1 hour. 1 lab period of 1 hour each per week.
Areas of specialization with programs of study, course offerings, career opportunities, and leaders in related Animal and Dairy Science businesses.

ADSC 3830. Equine Science Seminar. 1 hour. 1 lab period of 1 hour each per week.
Industry awareness and exploration of various topics associated with equine health and production.

ADSC 3910. Internship in Animal and Dairy Science. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Work experiences in livestock production and management, agribusiness or service organizations.
Non-Traditional Format: Internships require students and faculty to hold discussions on non-traditional schedules.

ADSC 4010. Issues in Animal Agriculture. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ADSC 3600-3600L or ADSC 3610-3610L or ADSC 3620-3620L or ADSC 3630-3630L or ADSC 3640-3640L.
Impact of livestock production on society and the environment; role of animal products in the human diet ecological aspects of animal production, animal welfare media relations.

ADSC 4100/6100. Advanced Genetics of Livestock Improvement. 3 hours.
Prerequisite: ADSC 3110 or permission of department
The development of practical and genetically sound programs involving the study and application of genetic principles underlying selection, systems of mating, and performance testing. Major emphasis will be on characters of economic importance in meat animals.

(ADSC)FDST 4140/6140-4140L/6140L. Advanced Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L and FDST 4040/6040-4040L/6040L.
Meat processing and technology, scientific basis for meat as a food, USDA and FDA regulations governing meat processing, and the latest innovations in commercial meat processing.

ADSC 4150/6150. Microbial Ecology of the Rumen 3 hours.
Prerequisite: BCMB 4020/6020 or MIBO 4090/6090 or permission of department.
The rumen microbial ecosystem that will examine the biochemistry, ecology, nutrition, physiology, and taxonomy of rumen microorganisms. The symbiotic relationship between rumen microorganisms and the nutrition of the ruminant animal. Manipulation of rumen fermentation to maximize host-animal production.

ADSC 4200. Livestock Merchandising. 2 hours.
Prerequisite: ADSC 3600-3600L or ADSC 3610-3610L or ADSC 3620-3620L or ADSC 3630-3630L.
Principles and activities involved in successfully promoting and merchandising livestock. Presentations by industry leaders in the field of livestock merchandising. A livestock auction will be held at the conclusion of the course.

ADSC 4300. Food Animal Growth and Development 3 hours.
Prerequisite: ADSC 3300-3300L or BCMB(BIOL) (CHEM) 3100 or permission of department.
Physiological, nutritional, and genetic regulation of growth, development, and body composition in food animals. Emphasis will be placed on skeletal muscle, adipose tissue, and bone development, as it relates to the whole-body growth and composition.

(ADSC)ANNU 4360/6360. Ruminant Nutrition. 3 hours.
Prerequisite: ADSC 3300-3300L and BCMB (BIOL) (CHEM)3100.
Digestive physiology and metabolism of the rumen. Treats systematically the diversity of function, complex symbiotic relationships of the rumen microflora/microfauna, and the physiology and metabolism of the rumen

as related to digestion, absorption, and utilization of nutrients.

(ADSC)ANNU(POUL) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM) 3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

ADSC 4400/6400-4400L/6400L. Applied Reproduction in the Horse. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ADSC 3400-3400L.
Management of reproduction in the horse for efficient production. Application of reproductive management systems.

ADSC 4410/6410-4410L/6410L. Applied Reproductive Management in Cattle and Swine. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ADSC 3400-3400L.
Management of reproduction in farm animals for efficient livestock production. Application of reproductive management, principles associated with artificial insemination, embryo transfer, pregnancy detection, semen collection, and reproductive record management.

ADSC 4500-4500L. Operant Conditioning and Training of Horses. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ADSC 3630-3630L or permission of department.
Behavior modification principles applied to training young horses.

(AFAM) African American Studies

College of Arts and Sciences

AFAM 2000. Introduction to African American Studies. 3 hours.
Cultural, social, and historical movements among Americans of African descent.

AFAM 2000H. Introduction to African American Studies (Honors). 3 hours.
Prerequisite: Permission of Honors.
Cultural, social, and historical movements among Americans of African descent.

(AFAM)RELI 2005. African American Religions: An Introduction. 3 hours.
Major and selected contemporary religious groups and movements among African Americans.

(AFAM)SOCI 2020. African American Society. 3 hours.
The class, status, and power relations of African Americans as part of both the United States social structure and the African diaspora.

(AFAM)PSYC 2150. Understanding Cultural Diversity. 3 hours.
Cross-cultural psychology, including an examination of issues such as conformity, leadership, and attributional style as they vary across different cultures, with consideration of their implications for the emerging world.

(AFAM)SPCM 2810. Communication in African American Communities. 3 hours.
Not open to students with credit in SPCM(AFAM) 4810.
Rhetorical strategies and patterns of orality in African American communication, communication styles in conflict, and skill development for cultural interaction.

(AFAM)SOCI 2820. Race and Ethnicity in America. 3 hours.
The causes and consequences of race and ethnic discrimination in America, with a focus on ethnic competition and conflict.

(AFAM)MUSI 2960. African American Percussive Music: From Africa to the Americas. 3 hours. Repeatable for maximum 6 hours credit.
Traditional and contemporary African American percussion music beginning with its African heritage and tracking its development throughout the Americas, with particular emphasis on the United States. Teaching/learning strategies include in-class performance, demonstrations, audiovisuals, and lectures. No previous music performance background is required.

(AFAM) RELI 3000. The Bible in the Third World. 3 hours.
Prerequisite: RELI 1001 or RELI 1002 or permission of department.
Interpretations of the Bible in Africa, Asia, Central and South America and the influence upon minority communities in the United States.

AFAM (PSYC) 3150. Introduction to Black Psychology. 3 hours.
Prerequisite: Permission of department.
Deconstruction of traditional thought, behavior, and development as well as reconstruction of the same on contemporary terms; testing of nuances and varieties of multicultural and indigenous models. The designs and projected future of the Black Psychology Movement.

(AFAM) ENGL 3230. Development of African American Literature. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
African American literature since 1773, particularly 1830 to the present: Frederick Douglass, Harriet Jacobs, Zora

Neale Hurston, Langston Hughes, Richard Wright, Dorothy West, Ralph Ellison, James Baldwin, Alice Childress, Lorraine Hansberry, Amiri Baraka, Toni Morrison, Alice Walker, and August Wilson, including diverse voices rooted in the folk origins for literary forms.

(AFAM) SOCI 3300. Global Perspectives on Racism and Sexism. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Race and gender relations and discrimination around the globe; the origins and practice of race and gender domination and empowerment in the Americas, Africa, Asia, Europe, the Middle East, and the Pacific Rim.

(AFAM) SOCI 3310. Race and Culture. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Evolution of cultures among racial groups as part of, and in contrast to, Western civilization. Particular attention is given to the ways race and culture intersect to provide styles, practices, and patterns of living for individuals in contemporary society.

AFAM 3880. African American Folklore. 3 hours.
Prerequisite: ENGL 3010 or permission of department.
African American folk expressions: their functions and their relationships with folk expressions of other peoples. Folk speech (proverbs, riddles, signifying, playing the dozens), folk narrative (animal tales, slave stories, modern legends, jokes, toasts, rap songs), folk songs (African songs, gospel songs, work songs, ballads, blues songs).

(AFAM)ENGL(LING) 4040. Language Use in the African American Community. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

(AFAM)HIST 4055/6055. Historical Survey of African American Thought. 3 hours.
This course examines representative works of such nineteenth- and twentieth-century social, cultural, and political thinkers as Frederick Douglass, Cornel West, Anna J. Cooper, and Angela Davis among other outstanding women and men who have contributed significantly to the intellectual life of the African American community.

AFAM(POLS) 4200. African American Social Change. 3 hours.
Prerequisite: POLS 1101-1101D and AFAM 2000.
African American social movements, principally those in the United States, such as the convention and colonizing movements of the nineteenth century and the Civil Rights and Black Power movements of the twentieth century.

(AFAM)RELI 4201/6201. African American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The religious traditions of African Americans from Colonial times to the present; major religious movements, personalities, and ideas and their relationship to various aspects of American culture.

(AFAM)RELI 4202/6202. Southern Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The origins, growth, and current practices of religion in the American South. The interaction between religion and other aspects of Southern culture, such as racial and gender concerns, education, Darwinian science, temperance, and politics.

(AFAM) RELI 4203/6203. The Bible in the Black Church. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Biblical interpretation in black America from 1865 to the present.

AFAM 4250. African American Seminar. 3 hours.
Repeatable for maximum 15 hours credit.
Prerequisite: (AFAM 2000 and AFAM 3880) or AFAM(POLS)4200.
Recurring topics and themes in African American life from the perspective of the behavioral sciences and humanities.

(AFAM)SOCI 4370. Seminar in Race and Ethnicity. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Special topics in race and ethnicity for advanced undergraduates.

AFAM(DRAM) 4490/6490. African American Women in Cinema: Image and Aesthetics. 3 hours.
Prerequisite: Permission of department.
Selected films by and about African and African American women. A historical/critical overview of the presentation of these women in cinema with emphasis on contemporary African and African American women film makers.

AFAM(PSYC) 4500/6500. Psychology of Prejudice. 3 hours.
Prerequisite: (PSYC 1101 or SOCI 1101) and senior standing.
Motivational, cognitive, social, and cultural factors that lead to discrimination in our society and various perspectives found in the research on discrimination.

AFAM(PSYC) 4550/6550. Classic Studies in Black Psychology. 3 hours.
Prerequisite: AFAM(PSYC) 3150 or permission of department.
Studies which have had major social or scientific impact on the lives of Black Americans and the way black people have been viewed within psychology. Approach is historical and interdisciplinary.

(AFAM)ENGL 4620. African American Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
African American poetry from the colonial period to the present, including slave and folk songs of the mid-nineteenth century, the Harlem Renaissance of the 1920's, and contemporary poetry. Emphasis on such figures as Langston Hughes, Margaret Walker, Gwendolyn Brooks, Sonia Sanchez, Amiri Baraka, and others.

(AFAM)ENGL 4630. African American Fiction. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Important African American stories and novels from the nineteenth and twentieth centuries, including works by such authors as Frances Harper, Jean Toomer, Ralph Ellison, James Baldwin, Alice Walker, and Toni Morrison.

(AFAM) SPCM 4810. African American Rhetoric and Communication. 3 hours.
The history and criticism of the communication of African American speakers, with emphasis upon oral rhetoric relating to social-political development since 1860.

AFAM 4850. Directed Major Projects in African American Studies. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
An independent directed course for advanced undergraduate students with a major interdisciplinary project that goes beyond the disciplinary boundaries of a traditional department. The student has two major projects, one each for Georgia State Leadership, through the Fanning Center, and the Washington Center's Minority Leadership Fellowship Program.
Non-Traditional Format: Besides a 20 page paper of revised excellence, a practicum for the project (two months study in The Washington Center's Minority Leader Fellowship Program, for example) will complete a very rigorous enrichment through out-of-class learning.

AFAM(ROML) 4860/6860. Topics in Afro-Hispanic Identity. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Representations of Africa and African American culture in Hispanic Literature by writers of African descent. By covering a variety of genres, the course will provide discussion about a cultural identity that is constantly in dialogue with dominant discourses. The course will incorporate critical texts.

(AFAM)ENGL 4880. Topics in African American Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Selected topics in African American literature such as African American autobiography, Harlem Renaissance, Gwendolyn Brooks and Richard Wright, and Black American literature and aesthetics.

(AGCM) Agricultural Communications

College of Agricultural and Environmental Sciences, Department of Agricultural Communications

AGCM 3910. Internship in Agricultural Communication. 2-6 hours. Repeatable for maximum 6 hours credit.
Experiential and applied learning in an agricultural communication organization.
Non-Traditional Format: Internship.

AGCM 4000. Special Problems in Agricultural Communication. 1-3 hours. Repeatable for maximum 3 hours credit.
Directed study of topic applicable to student's program of study.
Non-Traditional Format: Students will work independently on individual topics.

(AGRI) Agriculture

College of Agricultural and Environmental Sciences

AGRI 1010. Orientation to Agriculture. 1 hour.
Designed to assist College of Agricultural and Environmental Sciences undecided freshmen and transfers in deciding on a major, and to provide information related to campus services and activities.

AGRI 3000. Agricultural Leadership and Organizational Skills. 3 hours.
Leadership, group process, and problem solving techniques needed when working with agricultural procedures, organizations, and related personnel.

AGRI 3150. Topics in International Agriculture. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Junior standing or permission of department.
Individual or group study through reading and/or research of selected topics in international agriculture.
Non-Traditional Format: Students will work independently on individual topics and turn in a paper at the end of the semester. No formal class time is required.

AGRI 3910. International Agriculture Internship. 3 hours.
Prerequisite: Junior standing or permission of department.
Placement with an international public or private organization in a foreign country. If located near a university, student may also enroll in a course.
Non-Traditional Format: Internship abroad.

(AGRI)EETH 4190/6190. Agricultural Ethics. 1 hour. 1 lab period of 2 hours each per week.
Ethical issues in agriculture. Topics include animal rights/animal welfare, agriculture as a business/agriculture as a way of life, sustainable agriculture, (bio)technology, migrant farm workers, foreign aid, world hunger, and related topics.

AGRI 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or research projects under the direction of a faculty director.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

AGRI 4990H. Honors Thesis. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Honors thesis under the guidance of a faculty member.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

AGRI 5050. Communication in the Agricultural Professions. 3 hours.
Theory and skill development of effective communication strategies for success in agricultural professions. Organizational, team, and interpersonal contexts with special focus on diversity issues, communication for change, enhancing the perception of agriculture, and effects of communication technology on information dissemination.

(AIRS) Aerospace Studies

Division of the Armed Services, Department of Aerospace Studies

AIRS 1001. The Air Force Today I. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
The Air Force in the contemporary world. Study of total force structure, strategic offensive and defensive forces, general purpose forces, and aerospace forces. Introduces tactical air forces and operations, and aerospace support forces. Leadership laboratory activities are included.

AIRS 1002. The Air Force Today II. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 1001 or permission of department.
Continues study of tactical air forces and operations, counterinsurgency and special operations, and aerospace support forces. Aerospace defensive forces, including manned aircraft and missile defensive forces. Introduction to Army, Navy, and Marine general purpose forces. Leadership laboratory activities are included.

AIRS 2001. Development of Air Power I. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 1002 or permission of department.
Development of air power from balloons and dirigibles up to the Korean War. Students gain an understanding of the use of air power and the technological changes occurring during this period. Leadership laboratory activities are included.

AIRS 2002. Development of Air Power II. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 2001 or permission of department.
Continues the study of air power following the Korean War. It deals with the peaceful employment of United States air power in relief missions and civic action programs and the air war in South East Asia. Leadership laboratory activities are included.

AIRS 3001. Defense Management and Administration I. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 2002 or permission of department.
Emphasizes the individual as a manager in an Air Force environment. Individual motivation and behavioral processes, leadership, communication and group dynamics provide a foundation for the development of the junior officer's professional skills as an Air Force officer. Basic managerial processes involving decision making, utilization of analytic aids in planning, organizing, and controlling in a changing environment.

AIRS 3002. Defense Management and Administration II. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 3001 or permission of department.
Managerial and leadership problems found in industry

and government. Actual Air Force cases are used to enhance the learning and communication process. Organizational and personal values, management of forces in change, managerial strategy and tactics. Application of learned theories to potential problems the new officer may encounter.

AIRS 4001. National Security Forces in Contemporary American Society I. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 3002 or permission of department.
The evolution and formulation of American national security policy, especially as it concerns the military instrument of national power. Examines selected regional security issues. Impact of technological and international developments on strategic preparedness: nuclear, limited, and low-intensity conflicts; arms control and peacekeeping. Examines the military officer's role in national security.

AIRS 4002. National Security Forces in Contemporary American Society II. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: AIRS 4001 or permission of department.
Role of professional military officer in carrying out national policy; traditional and contemporary aspects of professionalism; and professional relationships and ethics. The military legal system is introduced. Finalizes the student's preparation for commissioning and active duty Air Force service.

(ANNU) Animal Nutrition

College of Agricultural and Environmental Sciences

ANNU(ADSC) 4360/6360. Ruminant Nutrition. 3 hours.
Prerequisite: ADSC 3300-3300L and BCMB(BIOL)(CHEM)3100.
Digestive physiology and metabolism of the rumen. Treats systematically the diversity of function, complex symbiotic relationships of the rumen microflora/microfauna, and the physiology and metabolism of the rumen as related to digestion, absorption, and utilization of nutrients.

ANNU(ADSC)(POUL) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM)3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

(ANTH) Anthropology

College of Arts and Sciences, Department of Anthropology

ANTH 1102. Introduction to Anthropology. 3 hours.
Not open to students with credit in ANTH 2120H.
Variation in human culture and biology from the earliest beginnings to the present, including relationships between human biology, culture, and the environment, and an understanding of contemporary cultural differences.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

(ANTH)CLAS 2000. Introduction to Classical Archaeology. 3 hours.
Concepts and principles of archaeology, including site formation, survey and excavation techniques, artifact retrieval and analysis, chronology, archaeological theory, and contemporary issues such as "ownership" of the past; focus on sites from Greek and Roman antiquity.

(ANTH)HONS 2040H. Honors Social Sciences. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGL 1101 and permission of Honors.
Concepts integrating history, government, and the social and behavioral sciences through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and student presentations.

(ANTH)HONS 2050H. Honors Social Science. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGL 1101 and permission of Honors.
Concepts integrating history, government, and the social and behavioral sciences through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and student presentations. May be offered daily during May session, or as part of a Study Abroad program.

ANTH 2070H-2070L. Culture and Human Biology (Honors). 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
The biological bases of human social and cultural behavior from the perspective of biological anthropology. Includes instruction in laboratory methods. Evolutionary history, primate behavior, and human biological diversity will be applied to understanding the interrelationship of biology, culture, and society.

(ANTH)GEOG(CMLT)(HIST)(SOCI) 2100. Introduction to Africa. 3 hours.
The history, physical environment (landforms, vegetation, and climate), and sociocultural environment (artistic, political, and social development) of Africa.

ANTH 2120H. Introduction to Anthropology (Honors). 3 hours.
Not open to students with credit in ANTH 1102.
Prerequisite: Permission of Honors.
Variation in human culture and biology from the earliest beginnings to the present, including relationships between human biology, culture, and the environment, and an understanding of contemporary cultural differences.

ANTH 2310. Archaeology of Georgia. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Twelve thousand years of life in Georgia with an emphasis on relationships to the environment. Examines lifeways of prehistoric and early historic peoples, and the history of Georgia archaeology.

(ANTH)PATH(BTNY) 3010. Fungi: Friends and Foes. 3 hours.
Impact of fungi on human affairs. Historical and current uses of fungi by humans as well as the roles of fungi in various ecosystems.

ANTH 3060. Introduction to Paleoanthropology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of department.
Paleoanthropology as the integrative biocultural study of early human evolution, drawing on human paleontology and paleolithic archaeology to give a holistic understanding of the transitions leading to Homo Sapiens.

ANTH(LING) 3080. Anthropology of Language. 3 hours.
Prerequisite: ANTH 1102 or LING 2100 or permission of department.
Anthropological studies in language, including origins and evolution, prehistory, geographical distribution, typology and classification, language and speech communities. Relationships between language and culture, language and society, and language and environment will be emphasized.

ANTH 3090. Evolution of Human Ecosystems. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of department.
Prehistoric and historic human ecosystems, from hunting and gathering to states and empires, viewed from a biocultural perspective. Changing human-environment relations over the past 10,000 years.

ANTH 3100. Peoples of the World. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
The way of life of a number of societies from around the world, including hunting and gathering bands, farming and herding tribes and chiefdoms, and pre-industrial states and peasantry.

(ANTH)CMLT 3180. Introduction to East Asian Cultures. 3 hours.
Cultures of China, Japan, Korea, and Vietnam, with emphasis on the formation of Chinese culture and its diffusion and variation within the other national groups.

(ANTH)CMLT 3190. Myth in Culture. 3 hours.
Literary and anthropological approaches to the study of myth in culture.

ANTH 3220. Introduction to Prehistoric Archaeology. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Basic concepts and principles of archaeology. Topics covered include history of archaeology, site formation processes, survey and excavation techniques, artifact typology and analysis, chronology, activity analysis, and general archaeological theory.

ANTH 3250. Old World Archaeology. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Cultural developments in the Old World from the first hominid to the beginnings of urban civilization. Emphasis on bio-cultural and environmental adaptation in prehistory.

ANTH 3260. The Aztecs and the Maya. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Two indigenous urban societies of the Americas, from farming village beginnings to the Spanish conquest, and their lasting impact on modern middle American culture. Topics include ecology, economy, political organization, urbanism, militarism, beliefs, art, architecture, and literature.

ANTH 3270. New World Archaeology. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Cultural variation in the Americas from the end of the Pleistocene to the time of intensive European contact, with emphasis on human/environmental interactions.

ANTH 3280. Archaeology of the Southwest. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Change and continuity in human life in North America's greater southwest, from the end of the Pleistocene to the twentieth century.

ANTH 3410. Contemporary Native America. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Cultural diversity of contemporary Native American tribes of the United States, Canada, and Mexico, including lifestyles, politics, literature, music, art, and socioeconomic conditions.

ANTH 3430. Indians of Mexico and Central America. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
The native peoples of Mexico and Central America, including their past, traditional culture, and problems they face in the modern world.

(ANTH)HORT(BTNY) 3440. Herbs, Spices, and Medicinal Plants. 2 hours.
Historical and contemporary significance of herbs, spices, and medicinal plants in human culture and commerce; chemical and biological characteristics; commercial production techniques; application in modern and traditional medical systems.

(ANTH)SOCI(POLS) 3450. Sociopolitical Ecology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The relationship between humans and their environment; ecological and social theories about environmental policies and problems.

ANTH 3460. Africa: Peoples and Institutions. 3 hours.
Prerequisite: ANTH 1102 or ANTH 2120H or permission of department.
Peoples and institutions of Africa, south of the Sahara, starting with earliest evidence of indigenous peoples, with special emphasis on current changes.

ANTH 3530. Anthropology of Folk Medicine. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
A contrast of indigenous medical knowledge and practitioners with ancient formal systems of medicine and modern biomedicine, including medical pluralism in multi-ethnic societies, and the political economy of medicine.

ANTH 3540. Multicultural Health Care. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Multicultural diversity of beliefs and practices about health and illness of ethnic groups in the United States as it impacts on health care. Specific consideration of African Americans, Hispanic Americans, Native Americans, and Asian Americans.

ANTH 4000/6000. Anthropology of Economic Systems. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Models and methods used by anthropologists to study production, distribution, and consumption of goods in subsistence and market economies. Topics from the ethnographic literature include feasting, money, managing commons, pre-capitalist markets, and capitalist penetration of subsistence economies.

ANTH 4020/6020. Indians of North America. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
North American Indian cultures at the time of European contact. Additional topics include origin and development of Indian culture, impact of European contact on native cultures, and problems faced by Native Americans today.

(ANTH)HONS 4040H. Special Problems Seminar in Social and Behavioral Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the social and behavioral sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during the May session, or as part of a Study Abroad program.

ANTH 4040/6040. Visual Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Anthropological uses of film, video, and photographs in field research and in the presentation of research results, especially in relation to portrayal of indigenous people.

(ANTH)HONS 4050H. Special Problems Seminar in Social and Behavioral Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the social and behavioral sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

ANTH 4050/6050. Cultural Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
The analysis and cross-cultural comparison of human institutions.

ANTH 4070. Cultural Ecology. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
The influence of the environment on human behavior and analysis of common adaptive responses among human populations to particular environments, emphasizing the role of culture in the ecological process.

ANTH(LING) 4090/6090. Cognitive Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Folk systems of knowledge, with an emphasis on how people in different societies culturally identify, define, label, and classify phenomena such as color terms, plants, animals, and other environmental resources.

ANTH 4200/6200. Field Methods in Archaeology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Corequisite: ANTH 4240/6240.
Archaeological reconnaissance, survey, excavation, laboratory preparation and analysis of collected materials.
Non-Traditional Format: This course is taught in the field at an archaeological site, followed by laboratory preparation and analysis of collected materials. Contact hours exceed the average of three hours per week.

ANTH(ECOL) 4210/6210. Zooarchaeology. 3 hours.
Prerequisite: ANTH 1102 or BIOL 1104-1104L or BIOL 1108-1108L or permission of major.
Animal remains recovered from archaeological sites, studied in light of zoological and archaeological methods and theories and interpreted in terms of human and animal behavior.

ANTH 4240/6240. Laboratory Methods in Archaeology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Corequisite: ANTH 4200/6200.
Environmental, chronological, preservational, and analytical methods and techniques of archaeological research.
Non-Traditional Format: This course is taught in the field at an archaeological site. Many more contact hours are involved beyond an average of three per week.

ANTH(ECOL) 4290/6290. Environmental Archaeology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of major.
Prehistoric and historic human subsistence patterns through the methods and techniques of zooarchaeology, paleobotany, and paleonutrition. Theories of environmental reconstruction.

ANTH(BTNY) 4300/6300-4300L/6300L. Ethnobotany. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
Ethnobotanical research, with focus on knowledge and utilization of the plant world in traditional societies. Comparisons of societies in tropical forest ecosystems and evaluation of issues relating to intellectual property rights and traditional peoples' knowledge of plant species with potential economic value.

ANTH 4310/6310. Archaeology of Eastern North America. 3 hours.
Prerequisite: ANTH 3220 or permission of major.
Prehistoric and early historic aboriginal cultural variation in Eastern North America.

(ANTH)GEOL 4340/6340. Archaeometry. 3 hours.
Prerequisite: GEOL(ANTH) 4700/6700.
Methods of archaeometric analysis including chronometric and instrumental techniques. Absolute age dating and characterization of archaeological materials by physico-chemical analysis.

ANTH(HIST) 4470. The Rise and Fall of the Southeastern Chiefdoms. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Development of the native societies of the southeastern United States, the exploration of the area by Spain in the sixteenth century, and the consequences of the meeting of the two peoples.

ANTH(HIST) 4480. The Indians of the Old South. 3 hours.
Prerequisite: ANTH 1102 or permission of department
Social history of the native peoples of the southern United States from the beginnings of the Spanish missions and the English deerskin and slave trade through Indian removal.

ANTH 4540/6540-4540L/6540L. Environment and Health. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Bio-cultural medical anthropology focusing on the interaction among environment, biology, culture, and society as determinants of health and health problems

ANTH 4550/6550. Ethnohistory. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
The methods used by anthropologists to reconstruct the history of preliterate societies from archaeological evidence, documentary evidence, and oral traditions. The ethnohistory of southeastern United States.

ANTH 4560/6560. Anthropology of Development. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Relationships among development, culture and environment from the world system perspective. Concepts of dependence, hegemony, inequality, and resistance are brought to bear in exploring interlinkages between (and among) underdevelopment, resource exploitation and local autonomy and self-reliance.

ANTH 4570/6570. Maritime Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Coastal and marine regions of the world in terms of human occupation, resource utilization, social organization, and human-environmental relationships. Identification of issues in traditional and contemporary management of coastal and marine ecosystems.

ANTH 4580/6580-4580L/6580L. Ecology of Food, Diet, and Nutrition. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
The impact of cultural behavior on the acquisition, preparation, and consumption of potentially edible natural resources.

ANTH 4590/6590. Ecology and Evolution of Human Disease. 3 hours.
Prerequisite: Undergraduate level only: (ANTH 1102 and BIOL 1104-1104L) or permission of major; Graduate level only: ECOL(BIOL) 3500-3500L or permission of major.
Ecological, evolutionary, and biocultural aspects of human disease. Subjects include the ecology of infectious/parasitic disease pathogens and their human hosts, the evolution of human host-pathogen interactions, the impact of cultural and demographic change in human populations, and the effects of global environmental change on human disease patterns.

ANTH 4630/6630. Field Methods in Cultural Anthropology. 6 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ANTH 1102 and permission of major.
Supervised research projects in a field setting. Individual projects related to a central problem or issue, using research methods and techniques in cultural anthropology; interviews, surveys, participant-observation, and questionnaires are included.
Non-Traditional Format: Since research projects are supervised in a field setting, the amount of contact hours varies. Contact hours exceed the minimum.

(ANTH)RELI 4640/6640. Anthropology of Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Anthropological approaches to the world's major religions as they relate to complex societies.

(ANTH)GEOL 4700/6700. Archaeological Geology. 3 hours.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Archaeological geology examines the use of earth science methods and theories in the study of archaeological sites and their contents. The four major areas covered include: (1) the archaeological site and geology; (2) age determination techniques; (3) exploration techniques; (4) artifact characterization.

ANTH 4710/6710-4710L/6710L. Human Origins. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 and permission of major.
The evolutionary history of the human species through examination of the fossil record. The fossil record is introduced using precision casts of fossil specimens. Scientific methods are developed by rediscovering major findings. The influence of changing interpretations on the culture of science is demonstrated.

ANTH 4740. Primate Ecology. 3 hours.
Not open to students with credit in PSYC 5770/7770.
Prerequisite: ANTH 1102 or permission of department.
Nonhuman primates in their natural habitats, including biogeography, feeding and ranging behavior, structure and social organization of groups in relation to environment, and primates as members of communities. Specific consideration of conservation issues, especially confrontation with human populations related to land use and development

ANTH 4790/6790. Human Adaptation. 3 hours.
Prerequisite: Undergraduate level only: ANTH 1102 and permission of major; Graduate level only: Permission of major.
Human diversity as response to environmental stress, from both a biological and cultural perspective. Topics include adaptation to heat, cold, altitude, malnutrition, and infectious disease; the impact of westernization and technological advancement on human biological function; and growth and development of the individual under environmental stress.

(ANTH)LING 4860/6860. Sociolinguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The study of language as a cultural and social phenomenon. Topics include language and meaning, language and world view, language and social behavior, and language and social issues.

ANTH 4900/6900. Special Topics in Anthropology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ANTH 1102 or permission of major.
Current topics in anthropology.

ANTH 4910. Senior Seminar in Anthropology. 3 hours.
Prerequisite: Permission of department.
Reading and discussion of contemporary issues in Anthropology. Students write and present a formal paper relating current method and theory to their research interests.

(ANTH)CRSS(HORT) 4930/6930. Agriculture and Ecology in Tropical America Field Trip. 3 hours. Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4920/6920.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country.
Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

(ANTH)CRSS(HORT) 4940/6940. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

ANTH 4950. Individual Special Topics in Anthropology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ANTH 1102 and permission of department.
Semi-independent study including reading and discussions of current developments in anthropology carried out as a contract between an individual student and an appropriate instructor.
Non-Traditional Format: Professor and student will meet as needed.

ANTH 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects with faculty direction.
Non-Traditional Format: Professor and student will meet as needed.

ANTH 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects with faculty direction.
Non-Traditional Format: Professor and student will meet as needed.

ANTH 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects with faculty direction.
Non-Traditional Format: Professor and student will meet as needed.

ANTH 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Professor and student meet as needed.

(ARAB) Arabic

College of Arts and Sciences, Department of Religion

ARAB 1001. Elementary Modern Standard Arabic I. 4 hours.
Fundamentals of grammar, pronunciation, reading, composition, and conversation of standard (including classical) Arabic.

ARAB 1002. Elementary Modern Standard Arabic II. 4 hours.
Prerequisite: ARAB 1001.
A continuation of Elementary Modern Standard Arabic I, including review and introduction of new content.

ARAB 2003. Intermediate Standard Arabic I. 3 hours.
Prerequisite: ARAB 1002.
Intermediate grammar, reading, conversation, and composition in standard (including classical) Arabic. Particular attention will be given to readings in Islamic literature.

ARAB 2004. Intermediate Standard Arabic II. 3 hours.
Prerequisite: ARAB 2003.
A continuation of Intermediate Standard Arabic I, including review and introduction of new content.

ARAB 4100/6100. Reading and Research in Arabic and Islamic Literature. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: ARAB 2004 or permission of department.
Arabic and Islamic texts with emphasis upon extensive reading and individual and/or group research projects. Qualified students may study Persian and/or Turkish texts.

ARAB 4960H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

ARAB 4970H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

ARAB 4980H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

ARAB 4990H. Honors Thesis. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Directed study.

(ARED) Art Education

College of Arts and Sciences, School of Art

ARED 3050. Art and the Child. 3 hours. 3 lab periods of 2 hours each per week.
Child creative development including experiences in drawing, painting, graphics, sculpture, and crafts appropriate to children. (May not be used for credit by art education majors.)

ARED 3350. Basic Curriculum in Art Education. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Planning and developing procedures for implementing curriculum at the elementary level. An investigation into the literature, materials, and procedures appropriate to children of different ages, including studio experiences.

ARED 3360. Teaching Procedures in Art Education. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Planning and implementing art instruction for middle and secondary students. Specific teaching procedures, materials, and techniques developed from Art Education philosophy, research, and studio practices.

ARED 3450. School Practicum in Art Education. 1-2 hours. Repeatable for maximum 2 hours credit.
School practicum in Art Education.
Non-Traditional Format: By arrangement of student.

ARED 4010/6010. Techniques of Art Appreciation and Criticism. 3 hours.
Analyzing, interpreting, and evaluating art; the construction of art appreciation curricula; critical methodology as employed in classroom teaching strategies.

ARED 4340/6340. Art for the Exceptional Child. 3 hours.
Nature, identification, and treatment of children's disabilities through art. Emphasizes the role of art for emotional, social, educational, and vocational adjustment of gifted or disabled students.

ARED 5130/7130. Studio Techniques for Art Education. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Use of tools, materials, and processes in adapting the studio arts to children at various age levels and in integrating studio with a total program.

ARED 5230/7230. Special Problems in Art Education I. 3 hours.
Prerequisite: Permission of department.
Specific problem areas, according to individual needs, are investigated, discussed, and evaluated.
Non-Traditional Format: Directed study.

ARED 5240/7240. Special Problems in Art Education II. 3 hours.
Prerequisite: Permission of department.
Specific problem areas with adult populations, e.g., prisoners and the aged, are investigated, discussed, and evaluated.
Non-Traditional Format: Directed study.

ARED 5250/7250. Special Problems in Art Education III. 3 hours.
Prerequisite: Permission of department.
Specific problem areas in mental health facilities are investigated, discussed, and evaluated.
Non-Traditional Format: Directed study.

ARED 5260/7260. Special Problems in Art Education IV. 3 hours.
Prerequisite: Permission of department.
Specific problem areas with handicapped children are investigated, discussed, and evaluated.
Non-Traditional Format: Directed study.

ARED 5270/7270. Special Problems in Art Education V. 3 hours.
Prerequisite: Permission of department.
Specific problem areas in community recreation and cultural centers and museums are investigated, discussed, and evaluated.
Non-Traditional Format: Directed study.

ARED 5310/7310. Multicultural and Cross-Cultural Study in Art Education. 3 hours.
Prerequisite: Permission of department.
Various cultural traditions in the United States with emphasis on multicultural and cross-cultural art education curricula.

ARED 5350/7350. Teaching of Art in the Elementary School. 3 hours.
Prerequisite: Permission of department.
Recommended practices in qualitative curriculum planning; laboratory experiments that identify philosophical, motivational, and evaluative problems in elementary school art.

ARED 5360/7360. Teaching of Art in the Secondary School. 3 hours.
Prerequisite: Permission of department.
Recommended practice in qualitative curriculum planning, together with laboratory projects that identify philosophical, motivational, and evaluative problems in secondary school art.

ARED 5460/7460. Student Teaching in Art Education. 9 hours.
Prerequisite: Permission of department.
Corequisite: ARED 5470/7470.
Supervised internship in teaching art.
Non-Traditional Format: Visits by college supervisor and seminars by arrangement.

ARED 5470/7470. Issues and Practices in Teaching Art. 3 hours.
Corequisite: ARED 5460/7460.
Varied approaches to art issues; practices relevant to art education. Must be taken during student teaching.

ARED 5500/7500. Approaches to Art in the Museum. 3 hours.
Prerequisite: Permission of department.
History and current practices in museum education. Emphasis on approaches to aesthetics and art criticism in the museum environment.

(ARGD) Art Graphic Design

College of Arts and Sciences, School of Art

ARGD 3010. Design Drawing Techniques. 3 hours. 3 lab periods of 2 hours each per week.
Basic technical and perspective drawing, leading into felt marker illustration.

ARGD 3020. Electronic Design. 3 hours. 3 hours lecture and 3 lab periods of 1 hour each per week.
The Macintosh system and utilities with emphasis on page layout and illustration programs.

ARGD 3030. Typography. 3 hours. 3 lab periods of 2 hours each per week.
Principles of lettering, letter construction, and basic typography in relation to visual communication. Experience in lettering as it is used and reproduced today is a major component of this course.

ARGD 3040. Concepts in Design. 3 hours. 3 lab periods of 2 hours each per week.
Development of techniques to improve formulation of ideas and creative skills in design.

ARGD 3050. Illustration. 3 hours. 3 lab periods of 2 hours each per week.
Stresses the importance of technique in a variety of media as the basis for solving design problems.

ARGD 3060. Layout. 3 hours. 3 lab periods of 2 hours each per week.
Beginning design of page layout for printed materials using symmetry and asymmetry to create compositions with type and image.

ARGD 3070. The History of Graphic Design. 3 hours.
A comprehensive history of graphic design from antiquity until the present.

ARGD 3080. Internship in Graphic Design. 3 hours.
Entry-level experience working in commercial design office or advertising agencies.
Non-Traditional Format: Internship.

ARGD 3310. Fundamentals of Scientific Illustration. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Scientific illustration and experience with the commonly used media, including pencil, ink, scratchboard, and carbon dust. Portfolio development and common business practices are important components of this course.

ARGD 3320. Intermediate Scientific Illustration. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
A continuation of Fundamentals of Scientific Illustration but introducing plate layout and design, working from a publisher's specifications, the production of illustrations for portfolio, and contract negotiations.

ARGD 3330. Advanced Color for Scientific Illustration. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Development of skills in color illustration using multiple techniques and for multiple audiences. An introduction into editorial, conceptual, and commercial design. Techniques include digital software Adobe Photoshop, Illustrator and Macromedia freehand, watercolor, airbrush, gouache, and color pencil. Subjects will include natural and medical science.

ARGD 3340. Art Graphic Design Directed Study in Scientific Illustration. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Materials and methods used for scientific illustration in color and for the production of illustrations of professional caliber on specific subjects (entomology, archeology, etc.) for inclusion in a portfolio.

ARGD 4010. Graphic Design Reproduction. 3 hours. 3 lab periods of 2 hours each per week.
A series of projects to acquaint students with the advantages and limitations of current printing technologies.

ARGD 4020. Environmental Graphic Design. 3 hours. 3 lab periods of 2 hours each per week.
The design of graphic elements in the built and natural environment including informational signs and symbols, client identity, exhibit design and ornamentation systems.

ARGD 4030. Advanced Typography. 3 hours. 3 lab periods of 2 hours each per week.
Functional communication utilizing creative manipulation of lettering, typography, images, and technical processes.

ARGD 4040. Advanced Illustration. 3 hours. 3 lab periods of 2 hours each per week.
Stresses the development of an individual visual style through in-depth exploration of a selected technique.

ARGD 4050. Calligraphy. 3 hours. 3 lab periods of 2 hours each per week.
Use of the fifteenth-century Humanist Hand and its italic variant, the Chancery Hand, and the familiarity with other historical calligraphic hands.

ARGD 4060. Advanced Layout. 3 hours. 3 lab periods of 2 hours each per week.
Comprehensive design projects in book design, posters, and other printed material.

ARGD 4070. Three-Dimensional Graphic Design. 3 hours. 3 lab periods of 2 hours each per week.
Comprehensive structural and graphic development of three-dimensional, promotional objects such as pop-ups, packaging, and displays.

ARGD 4080. Special Problems in Graphic Design. 1-3 hours. Repeatable for maximum 9 hours credit. 1-3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Advanced research in graphic design media and techniques with application to a comprehensive project in visual communication.

ARGD 4090. Advanced Electronic Design. 3 hours. 3 lab periods of 2 hours each per week.
Use of desk-top computer for image editing and related applications.

ARGD 4100. Graphic Design Business and Promotion. 3 hours. 3 lab periods of 2 hours each per week.
Business practices in graphic design, including portfolio formats, personal promotion, resumes, contracts, and professional ethics.

ARGD 4110. Portfolio Project. 3 hours. 3 lab periods of 2 hours each per week.
A capstone course developing a comprehensive project of choice.

(ARHI) Art History

College of Arts and Sciences, School of Art

ARHI 2100. Monuments of World Art. 3 hours.
A chronological survey of major monuments of world art.

ARHI 2110H. Monuments of World Art (Honors). 3 hours.
Prerequisite: Permission of Honors.
A chronological survey of major monuments of world art.

ARHI 2111H. Introduction to Art History (Honors). 3 hours.
Prerequisite: Permission of Honors.
Methodological strategies for the study of the history of art through concentration on the art of a particular era.

ARHI 3000. Ancient Art. 3 hours.
Major monuments of art from the ancient world from the Paleolithic era through the Roman Empire.

ARHI 3010. Medieval Art. 3 hours.
European art from the fourth century through the fourteenth century with an emphasis on the impact of Christianity on Europe's classical Roman and non-classical heritage.

ARHI 3020. Renaissance Art. 3 hours.
Major monuments, artists, and subjects of art from the late fourteenth through the sixteenth century in Europe.

ARHI 3030. Baroque Art. 3 hours.
Formal and contextual history of the arts of the Baroque period, roughly from 1590 through 1750 throughout Europe focusing on major developments in Italy, Spain, France, Flanders, and Holland.

ARHI 3040. Asian Art. 3 hours.
The arts of India, central and southeast Asia, China, and Japan with emphasis on religions and cultural interchanges in Asian history.

ARHI 3050. American Art. 3 hours.
Art in the United States from the Colonial period through the Depression of the 1930s. The social, political, and intellectual contexts of American visual culture will be stressed.

ARHI 3060. Nineteenth- and Twentieth-Century Art. 3 hours.
Prerequisite: ARST 2100.
Survey of major artists and movements in Europe from the French Revolution to World War Two, and subsequent developments in American art.

ARHI 3070. American Architecture. 3 hours.
American buildings, their architects, and architectural theory in the continental United States from the seventeenth through the twentieth centuries.

ARHI 4000/6000. Early Greek Art. 3 hours.
Prerequisite: Permission of department.
Vase painting, sculpture, and architecture from the Geometric through the Archaic periods.

ARHI 4010/6010. Classical and Hellenistic Greek Art. 3 hours.
Prerequisite: Permission of department.
Sculpture, architecture, and some vase painting from the Classical and Hellenistic periods emphasizing major monuments, including the Temple of Zeus at Olympia, the Parthenon, and the Great Altar of Zeus and Athena at Pergamon.

ARHI 4020/6020. Roman Art and Architecture. 3 hours.
Prerequisite: Permission of department.
Buildings and wall painting of Pompeii, Roman Republican portraiture, Imperial portraiture, and major buildings and their associated architectural sculpture located in Rome and other sites within the Empire.

ARHI 4030/6030. Classical Tradition in the Visual Arts. 3 hours.
Prerequisite: Permission of department.
The influence of classical antiquity on the art and architecture of post-classical eras tracing formal affinities and the myths of classical gods and heroes.

ARHI 4100/6100. Early Medieval Art. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting in Western Europe from the seventh through the eleventh centuries.

ARHI 4110/6110. Romanesque Art. 3 hours.
Prerequisite: Permission of department.

Architecture, sculpture, and painting in Western Europe of the eleventh and twelfth centuries with particular emphasis on France.

ARHI 4120/6120. Gothic Art. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting of the twelfth and thirteenth centuries in Europe with special emphasis on France.

ARHI 4130/6130. Late Gothic Art in Italy. 3 hours.
Prerequisite: Permission of department.
Principal monuments and artists of the thirteenth and fourteenth centuries in Italy emphasizing figures such as Giotto, Duccio, Simone Martini, and Ambrogio Lorenzetti.

ARHI 4200/6200. Early Renaissance in Italy. 3 hours.
Prerequisite: Permission of department.
Architecture, sculpture, and painting of the fifteenth century focusing on Tuscany, and the emergence and development of the new art principles in Florence represented in the work of such artists as Masaccio, Brunelleschi, Donatello, Alberti, Fra Angelico, Filippo Lippi, Ghirlandaio, Pollaiuolo, and Botticelli.

ARHI 4210/6210. High Renaissance and Mannerism in Italy. 3 hours.
Prerequisite: Permission of department.
The climactic period of the Renaissance in Italy with special emphasis on such key figures as Leonardo, Michelangelo, Raphael, Protormo, Rosso Fiorentino, and Bronzino.

ARHI 4220/6220. Northern Renaissance. 3 hours.
Prerequisite: Permission of department.
Painting north of the Alps, primarily in Flanders and Germany from the fourteenth to the sixteenth century, with special attention to the van Eycks, van der Weyden, Bosch, Durer, and Grunewald.

ARHI 4290/6290. Renaissance and Baroque Sculpture. 3 hours.
Prerequisite: Permission of department.
The development of period styles and an analysis of the role of function and tradition in European sculpture for ca. 1260-1700, with special attention to the work of Donatello, Michelangelo, and Bernini.

ARHI 4300/6300. Italian Baroque Art and Architecture. 3 hours.
Prerequisite: Permission of department.
Baroque art and architecture in Italy, with special emphasis on Rome, and such important figures as the Carracci, Caravaggio, Bernini, and Borromini.

ARHI 4310/6310. Northern Baroque Art. 3 hours.
Prerequisite: Permission of department.
French and Dutch art of the seventeenth century with emphasis on such key figures as Rubens, Velasquez, Rembrandt, and Poussin.

ARHI 4350/6350. Art and Architecture of the City of Rome. 3 hours.
Prerequisite: Permission of department.
The continuity of an artistic tradition in relation to the history of the seat of the Roman Empire, the Catholic Church, and modern Italy. Attention is given to specific sites, artistic types, and public processions.

ARHI 4400/6400. Romanticism and Neoclassicism. 3 hours.
Prerequisite: Permission of department.
European art and architecture from ca. 1760 through 1865 including the sublime, the beautiful, the picturesque, historical revivalism, exoticism, rationalism, and eclecticism.

ARHI 4410/6410. American Art from Colonial Settlement through the Civil War. 3 hours.
Prerequisite: Permission of department.
The formation of a national identity and assimilation of European styles in painting, sculpture, and cultural artifacts such as photographs and popular illustrations. Artists include, Copley, Peale, Allston, Cole, Church, Quidor, Mount, Bingham, Heade, Bierstadt, and Homer.

ARHI 4420/6420. American Art of the Fin de Sie'cle 1876-1913. 3 hours.
Prerequisite: Permission of department.
The transition in American art from Victorianism to early Modernism in an age of science, progress and decay, tradition and ethnicity, motherhood and the "new woman." A key cultural referent will be the World's Columbian Exposition of 1893.

ARHI 4440/6440. American Modernism 1900-1946. 3 hours.
Prerequisite: Permission of department.
The creation of radical forms of artistic expression, and their seeming rejection by the Regionalists in relation to two world wars, the modern city, the depression, and revolutions in space, time, and technology. Special emphasis will be placed on the diverse group of artists mentored by Alfred Stieglitz.

ARHI 4500/6500. Realism and Impressionism. 3 hours.
Prerequisite: Permission of department.
The rise and development of naturalism in mid-nineteenth-century art in Europe.

ARHI 4510/6510. Modern Art in Europe from 1886 to 1918. 3 hours.
Prerequisite: Permission of department.
Painting and sculpture from Post-Impressionism to the end of World War I, the Cubo-Futurist revolution and approaches to expressionism and abstraction.

ARHI 4520/6520. Spirituality in Modern Art. 3 hours.
Prerequisite: ARHI 3050 or ARHI 3060 or ARHI 3070 or permission of department.
Myth and spirituality in the abstract art of the late

nineteenth and twentieth centuries, as exemplified in Gauguin, Kandinsky, Klee, Brancusi, Pollock, and Rothko, among others.

ARHI 4540/6540. European Art Between the Great Wars. 3 hours.
Prerequisite: Permission of department.
High modernism in the twentieth century. Topics include Dada, Constructivism, Surrealism, the Bauhaus, and other major trends between the two World Wars.

ARHI 4550/6550. Art Since 1945. 3 hours.
Prerequisite: Permission of department.
Major artists and movements in art after 1945.

ARHI 4600/6600. Art of India. 3 hours.
Prerequisite: ARHI 3040 or permission of department.
Traditional art of India from the Indus valley civilization to the Muslim conquest. Major monuments of architecture, sculpture, and painting are investigated in the context of political and religious developments in the Indian subcontinent, including influences of the Indic religions of Buddhism, Hinduism, and Jainism.

ARHI 4610/6610. Arts of China. 3 hours.
Prerequisite: ARHI 3040 or permission of department.
Major trends in the arts of China from the Neolithic age to the eve of the modern period, ca. 2500 BCE to the nineteenth century CE. Factors affecting important developments in style and subject matter will be studied in the context of contemporary cultural phenomena.

ARHI 4620/6620. Japanese Art. 3 hours.
Prerequisite: ARHl 3040 or permission of department.
History of Japanese art of the proto-historic period to the exposure of Japan to the West in the mid-nineteenth century. The Buddhist arts of Japan during the imperial period, the evolution of Japanese pictorial art, religious and secular architecture, and Shinto-influenced arts.

ARHI 4700/6700. Guided Foreign Study. 3 hours.
Prerequisite: Permission of department.
Travel to selected works in foreign collections, and sites. Local library, archival resources used. Preparatory and on-site lecture and discussion.

ARHI 4710/6710. Guided Foreign Study. 3 hours.
Prerequisite: ARHI 4500/6500.
Various topics related to Italian art.

ARHI 4900/6900. Topics in Ancient and Medieval Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in Ancient and Medieval art and architecture treated in depth.

ARHI 4910/6910. Topics in Renaissance and Baroque Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in Renaissance and Baroque art and architecture treated in depth.

ARHI 4920/6920. Topics in Modern Art. 3 hours.
Prerequisite: Permission of department.
Particular topics in modern art and architecture from Europe or America treated in depth.

ARHI 4930/6930. Topics in Asian or Non-Western Art. 3 hours.
Prerequisite: ARHI 4600/6600 or ARHI 4610/6610 or ARHI 4620/6620 or permission of department.
Particular topics in Asian and non-western art and architecture treated in depth.

ARHI 4940/6940. Gender Issues and Art History. 3 hours.
Prerequisite: Permission of department.
The impact of feminist theory and gay and lesbian studies on recent art historical scholarship.

ARHI 4950/6950. Independent Study. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Special projects in fields in which the student has demonstrated the ability to conduct research and write a fully and correctly annotated paper.

ARHI 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Directed study.

ARHI 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Directed study.

ARHI 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Directed study.

ARHI 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(ARID) Art Interior Design

College of Arts and Sciences, School of Art

ARID 1010. Introduction to Interior Design. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: ARST 1050.
Principles of design in relation to the human environment in interior design and related fields. The profession of interior design is introduced in its organization and practice.

ARID 2000. Drawing for Interior Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1060 and ARST 1070.
Standard conventions in drawing, including projection of plans, elevations, sections, oblique, axonometric, and one- and two-point perspective drawings. Attention is given to the development of technical skills with appropriate media as well as interior design and presentation.

ARID 2010. Rendering for Interior Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 2000.
Color, free-hand sketching techniques, layout, and composition in two-dimensional projects relating to the process of interior design.

ARID 2110. Studio I: Single Family Residential Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 2000.
Symbolic language of interior design, measuring and scaling interior spaces and furnishings, and the application of principles of design for a single-family residence.

ARID 3110. Studio II: Documenting Interior Design Projects. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 2010 and ARID 2110 and permission of major.
All design phases in the development of a comprehensive interior design project from programming through contract documents. Development of skills in creating working drawings and oral presentations.

ARID 3120. Studio III: Space Programming and Office Design. 4 hours. 4 lab periods of 2 hours each per week.
Prerequisite: ARID 3110 and permission of major.
Office design with emphasis on defining the needs and values of the user, the client, and society, and their interrelationships. Initiation of project goals and viable design concepts.

ARID 3130. Studio IV: Design for Special Populations. 4 hours. 4 lab periods of 2 hours each per week.
Prerequisite: ARID 3120 and permission of major.
Development and presentation of a studio design project for people with varying special needs. Projection of documents of advanced complexity, application of specialized knowledge from prerequisite courses, and familiarity with relevant codes, standards, and guidelines.

ARID 3210. History of the Decorative Arts I. 3 hours.
Prerequisite: ARHI 2100 and permission of major.
A historical survey of architecture; concepts of interior space, furniture, and allied crafts as a background for contemporary design.

ARID 3220. History of the Decorative Arts II. 3 hours.
Prerequisite: ARID 3210 and permission of major.
Decorative arts of Europe and America beginning with the Arts and Crafts Movement of the nineteenth century and continuing through the twentieth century.

ARID 3310. Building Systems. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 2010 and ARID 2110 and permission of major.
Standard building systems, such as acoustical, electrical, plumbing, heating, and air-conditioning, as they relate to the built environment and affect decisions in interior design.

ARID 3320. Interior Finishes and Materials. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARID 3110 and ARID 3310 and ARID 3410.
Materials and finishes in interior design; factors affecting their selection and specification, and their incorporation into contract documents.

ARID 3330. Lighting for Interior Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 3120 and ARID 3320 and ARID 3420 and permission of major.
Technical and behavioral factors affecting lighting design. Special emphasis on calculations, selection, and specification.

ARID 3340. Furniture Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 3120 and ARID 3320 and ARID 3420 and permission of major.
Cabinetry and furniture design, including construction methods, drawings, and design presentation.

ARID 3410. Computer-Aided Design for Interiors. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 2010 and ARID 2110 and permission of major.
The creation of two- and three-dimensional drawings using computer aided design.

ARID 3420. Computer-Based Business/Professional Application. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARID 3410.
Computer-based design project management utilizing appropriate software for CAD, desktop publishing, spread sheets, databases, and presentations.

ARID 4010. Interior Design Internship. 3 hours.
Prerequisite: ARID 3130 and ARID 3330 and ARID 3340 and permission of major.
Minimum of four hundred hours working in an approved interior design- related firm. Requirements include portfolio preparation, job interviews, and selection of position one term before registration. Responsibility for finding position rests with student.
Non-Traditional Format: On-the-job learning at internship in field.

ARID 4110. Studio V: Large-Scale, Non-Residential Design. 4 hours. 4 lab periods of 2 hours each per week.
Prerequisite: ARID 4010 and permission of major.
Completion of project from programming to final presentation of non-residential, multi-purpose design of advanced complexity.

ARID 4150/6150. Special Topics in Interior Design. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ARID 3110 and ARID 3310 and ARID 3410 and permission of major.
Special topics for advanced students with a formal written and/or graphic presentation of the results.
Non-Traditional Format: Only to be taken by students who have indicated that they can handle directed studies responsibility.

ARID 4350/6350. Interior Design Practicum. 1-3 hours.
Prerequisite: ARID 3110 and ARID 3310 and ARID 3410 and permission of major.
Individualized projects arranged with clients to explore various aspects of the interior design profession.
Non-Traditional Format: Only to be taken by students who have indicated that they can handle directed studies responsibility.

ARID 4610. Senior Treatise I. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: ARID 4110 and permission of major.
Systematic design methodology in the preparation of a written prospectus of advanced complexity and scope in an area of specialization within the broader field of interior design.

ARID 4620. Senior Treatise II. 5 hours. 1 lab period of 5 hours each per week.
Prerequisite: ARID 4610 and permission of major.
Development and completion of the design project defined by the prospectus from Senior Treatise I. The course culminates in the oral and graphic presentation of the research findings and respondent design proposals.

(ARST) Studio Art

College of Arts and Sciences, School of Art

ARST 1040. Proseminar in Studio Art. 1 hour.
The profession of artist and fields of concentration in studio art.

ARST 1050. Drawing I. 3 hours. 3 lab periods of 2 hours each per week.
The techniques, materials, and principles of drawing.

ARST 1060. Color/Composition. 3 hours. 3 lab periods of 2 hours each per week.
Color emphasizing and its role in composition and two-dimensional design.

ARST 1070. Drawing II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1050.
A continuation of Drawing I with an emphasis on figure drawing.

ARST 1080. Three-Dimensional Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1050 and ARST 1060.
Three-dimensional forms and space using various materials and methods.

ARST 2010. Intermediate Drawing. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
Varied approaches to drawing incorporating experience with still life, landscape, models, composition, analytical, and expressive drawing, and the use of basic drawing media.

ARST 2100. Introductory Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070.
Fundamentals of painting related to subject matter, composition, and color. Preparation of supports and grounds, and knowledge of basic painting materials will be stressed.

ARST 2110. Intermediate Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2100.
Painting applied to still life, landscape, abstraction, and the human figure from live models.

ARST 2200. Introductory Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 1050.
The art of photography, its history and criticism, including basic processing techniques and optical principles using standard cameras and black and white materials. Picture making concepts and interpretation are emphasized.

ARST 2300. Printmaking: Relief Processes I. 3 hours. 3 lab periods of 2 hours each per week.

Prerequisite: ARST 1070 and ARST 1080.
Various relief printmaking techniques with concentrated work in the processes of woodcut, wood engraving, and linoleum cut.

ARST 2310. Printmaking: Intaglio I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
Various printmaking techniques with concentrated work on intaglio.

ARST 2400. Fundamentals of Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
Technical fundamentals of carving, modelling, and constructive methods of sculpture and their aesthetic implications in terms of form and content.

ARST 2410. Portrait and Figure Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2400.
Sculpting the human form directly from the model.

ARST 2500. Introduction to Ceramics. 3 hours. 3 lab periods of 2 hours each per week.
Development of personal expression using the ceramic process.

ARST 2600. Jewelry and Metalwork. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.
Fundamental techniques of forming, casting, fabrication, and finishing metals such as sterling, gold, copper, and iron.

ARST 2700. Fundamentals of Fabric Structure. 3 hours. 3 lab periods of 2 hours each per week.
Woven and non-woven fabric structure and the relation between process and material.

ARST 2710. Fundamentals of Fabric Decoration. 3 hours. 3 lab periods of 2 hours each per week.
Fabric decoration utilizing dyes and pigments.

ARST 3000. Introduction to Figure Drawing. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2010.
Compositional, expressive, and anatomical approaches to drawing the human figure, traditional media such as charcoal, conte crayon, graphite, and ink will be used.

ARST 3010. Advanced Drawing. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3000.
Advanced drawing stressing individual projects and experimental approaches.

ARST 3110. Transparent Watercolor. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2100 or permission of department.
Transparent watercolor including landscape, still life, and the human figure. Personal imagery and non-representational painting will also be explored.

ARST 3120. Aqueous Media. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2110.
Synthetic media (acrylics), casein, and water media other than transparent watercolor.

ARST 3130. Figure Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2110 and ARST 3000.
Compositional, expressive, and anatomical aspects of painting the human figure; work from the model, both nude and clothed, and other sources.

ARST 3140. Painting Studio. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2110.
Inquiry into varied approaches in painting, both representational and non-representational. Experimental attitudes and personal ideas and solutions are encouraged.

ARST 3150. Figure Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3140.
Painting the human figure emphasizing structure and painting techniques. Media include oil and acrylic paints and grounds.

ARST 3160. Painting Materials and Techniques. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3110.
Historical techniques such as egg tempera, fresco, encaustic, and Venetian mode oil painting as they apply to contemporary needs; modern materials such as alkyd and polymer resins are introduced. Consideration is given to the properties of pigments, binders, grounds, and supports.

ARST 3200. Intermediate Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 2200.
Camera skills and processing techniques for black and white negatives and prints with emphasis on visual concepts and articulation of ideas.

ARST 3210. Color Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3200.
Color photography including color theory, color temperature, lighting, and color printing. Concepts are presented in the context of contemporary trends and practices.

ARST 3220. Medium and Large Format. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3200.
Medium and large format cameras using roll, pack, and

sheet films. Techniques of advanced camera handling, lighting, film processing, and refined printing. Historical and contemporary practices considered.

ARST 3230. Internship in Photography. 2-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ARST 2200.
Practical experience with professionals including photographers, designers, and computer specialists. Independent projects and research with editors, curators, teachers, and historians. Assist photography faculty in creative work with emphasis on studio and lab production.
Non-Traditional Format: Internship.

ARST 3300. Printmaking: Lithography I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
Various printmaking techniques with concentrated work on lithography.

ARST 3310. Book Art/Papermaking I. 3 hours. 3 lab periods of 2 hours each per week.
Hand papermaking as a support for other media and as a creative medium in two or three dimensions.

ARST 3320. Book Art/Letterpress I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2300 and ARST 2400.
Letterpress printing and book arts as they relate to the creative synthesis of text and image in book and broadside form.

ARST 3330. Printmaking: Special Topics I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2310 and ARST 3300 and ARST 3310 and ARST 3320.
Special projects for advanced students.

ARST 3340. Printmaking: Relief Processes II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2300.
Relief for advanced students stressing their aesthetic development.

ARST 3350. Printmaking: Intaglio II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2310.
Intaglio for advanced students stressing their aesthetic development.

ARST 3360. Printmaking: Lithography II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3300.
Lithography for advanced students stressing aesthetic development.

ARST 3370. Book Art/Papermaking II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3310.
The book as an art form, its structure including various binding techniques in relation to its content.

ARST 3380. Printmaking: Book Art/Letterpress II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3320.
Special letterpress project for advanced students stressing their aesthetic development with further technical instruction.

ARST 3390. Special Topics II: Printmaking. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3330.
Special topics for advanced students stressing aesthetic development with further technical instruction.

ARST 3400. Sculpture: Construction in Metal. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2400.
Beginning welding techniques and the use of metal in sculptural composition.

ARST 3410. Intermediate Construction in Metal. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3400.
Advanced welding techniques and the use of mixed media.

ARST 3420. Sculpture: The Subtractive Process. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2400 or ARST 2410.
Direct carving in wood or stone.

ARST 3430. Carving Wood and Stone. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2400 or ARST 2410.
Carving wood and stone, both representational and non-representational, with emphasis on aesthetic development.

ARST 3440. Fundamentals of Casting Metal Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2400 or ARST 2410.
Fundamental techniques for producing metal sculpture using refractory molds and sand casting.

ARST 3450. Intermediate Casting in Metal. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3440.
Production of sculpture in refractory molds and sand casting, both representational and non-representational, with emphasis on aesthetic development.

ARST 3460. Intermediate Portrait and Figure Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2410.
Sculpting the human form based on the live model. Anatomy, composition, and sculptural techniques are emphasized as means for creative expression.

ARST 3500. Intermediate Ceramics. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2500.
Sculptural and functional ceramic forms with an emphasis on personal expression and individual style.

ARST 3610. Jewelry. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2600.
Traditional and contemporary forms, materials, ornament, adornment, and techniques of surface enrichment.

ARST 3620. Metalwork. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2600.
Forging, raising, and surface enrichment as applied to hollow ware, flatware, and architectural ornaments.

ARST 3700. On-Loom Weaving. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2700.
Utilization of the floor loom to study basic weaves and their application to hand-crafted and industrial textiles.

ARST 3710. Advanced Weaving. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2700.
Woven structures on multi-harness looms.

ARST 3720. Basics of Non-Woven Fabrics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2700.
Construction techniques of non-woven fabrics and their creative applications.

ARST 3730. Silkscreen Processes. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2710.
Utilization of the silkscreen for fabric printing, including simple stencils and photographic processes.

ARST 3750. History of Fabric Design. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The development of the fabric arts from prehistoric periods to the present in conjunction with studio projects.

ARST 3760. Japanese Fabrics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2700 and ARST 2710.
Japanese fabrics in a historical and cultural context and their application to contemporary fiber art in conjunction with studio projects.

ARST 3770. Peruvian Fabrics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2700 and ARST 2710.
Peruvian fabrics in historical and cultural context and their application to contemporary fiber art in conjunction with studio projects.

ARST 3780. Fabric Manipulation and Embellishment. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
Fabric manipulation and embellishment, including technical processes such as shibori (tie dye), layering and piecing of fabrics, surface embellishment, dyeing, and other processes that are not covered in the introduction courses and that are processes not needing horizontal production space.

ARST 3800. The Computer in Art. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 1070 and ARST 1080.
The computer as an aid in designing personal creative work for a variety of careers in art.

ARST 4000. Directed Study in Drawing. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3010 or permission of department.
Independent projects for advanced drawing and painting majors.

ARST 4020. Figure Drawing/Anatomy. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3000.
Figure drawing with consideration of the human skeletal and muscular systems, surface anatomy, and biomechanical concerns.

ARST 4090. Senior Exit in Drawing. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3010 and ARST 4020.
Projects in drawing towards the presentation of a BFA exhibition. The course includes preparation for professional activity and/or application to graduate school, and should be taken during last semester of studio course work.

ARST 4100. Directed Study in Painting. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2110 and (ARST 3010 or ARST 3120 or ARST 3130 or ARST 3150 or ARST 3160).
Advanced independent study for drawing and painting majors. Studio meetings arranged.

ARST 4110. Senior Exit in Painting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2110 and (ARST 3010 or ARST 3120 or ARST 3130 or ARST 3150 or ARST 3160).
Projects in painting towards the presentation of a BFA exhibition. The course includes preparation for professional activity and/or application to graduate school, and should be taken during last quarter of studio course work.

ARST 4200. Advanced Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3210 and ARST 3220.
Advanced applications of the medium. Experimental camera handling and laboratory work is emphasized. Intensive practice of traditional and new technologies from the photogram to the electronic image.

ARST 4210. Special Topics in Photography. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 3210 and ARST 3220.
Major historical movements in photography including comparative studies of contemporary trends and criticism with an emphasis on research and the development of library archives.

ARST 4220. Senior Exhibition and Portfolio. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ARST 4200.
Creation and presentation of a finished body of original work in photography for BFA degree, with a written statement concerning the work.

ARST 4300. Printmaking: Internship. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Practical experiences with related professions in the field of print, paper and book collections, and print shops; work with printmaking faculty in the studio or print facility.
Non-Traditional Format: Internship.

ARST 4310. Senior Exit in Printmaking. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Individual research, creation, and presentation of a finished body of original work in printmaking for senior exhibition or portfolio with written statement and visual documentation.

ARST 4400. Advanced Casting in Metal. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3450.
Refinement of technical and expressive skills in producing cast metal sculpture.

ARST 4410. Advanced Portrait and Figure Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3460.
Refinement of technical and expressive skills in sculpting the human form.

ARST 4420. Sculpture and Spatial Context. 3 hours. 3 lab periods of 2 hours each per week.
Production of a fully realized three-dimensional maquette or full scale sculpture beginning with drawing of objects, landscape, architecture, and the human figure.

ARST 4430. Advanced Stone Carving. 3 hours. 3 lab periods of 2 hours each per week.
Refinement of technical and expressive skills in carving stone.

ARST 4440. Advanced Construction in Metal. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3410.
Refinement of technical and expressive skills in construction in metal.

ARST 4450. Senior Exit in Sculpture. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Directed independent study towards the presentation of a BFA exhibition, including preparation for professional activity and/or application to graduate school.

ARST 4500. Advanced Ceramics. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3500.
Specific projects for experienced students selected in consultation with the instructor.

ARST 4590. Senior Exit Show in Ceramics. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Nine hours of ARST 4500.
Independent study directed towards the presentation of a BFA exhibition, including preparation for a career and/or application to graduate school.

ARST 4600. Jewelry. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3610 and ARST 3620.
Advanced design and fabrication of jewelry emphasizing individual research.

ARST 4610. Advanced Metalwork. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3610 and ARST 3620.
Advanced design, forming, and embellishment of metals emphasizing individual research.

ARST 4620. BFA Project in Jewelry or Metalwork. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 3610 and ARST 3620.
Directed independent study towards the presentation of a BFA exhibition including preparation for professional activity and/or application to graduate school.

ARST 4700. Advanced Decoration. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 2710.
Development of a professional portfolio for careers in the textile industry.

ARST 4710. BFA Project in Fabric Design. 3 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Directed independent study towards the presentation of a BFA exhibition, including preparation for professional activity and/or application to graduate school.

ARST 4800/6800. Special Topics in Computer Art. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of major.

Computer-generated art and design including advanced computer generated imaging, computer aided drafting, scanned image manipulation, animation, desktop publishing and presentation, and two-dimensional and three-dimensional representation of fiber and sculpture arts.

ARST 4810/6810. Three-Dimensional Computer Art. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 4800/6800 and permission of major.
Three-dimensional, computer-generated art using modelling, rendering, animation, and output technique.

ARST 4820/6820. Computer Aided Design. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: ARST 4800/6800.
Contemporary concepts and trends in art computing. The development and presentation of a substantial body of individual imagery is a major aspect of the course.

ARST 4900. Technical Problems. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
For students qualified to carry out individual projects in studio areas.

ARST 4910/6910. Aspects of Folk Culture. 3 hours. Art of folk, self-taught, and visionary artists as distinct from mainstream and academic traditions.

ARST 4930. Internship in Art. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Supervised experience in a professional environment such as cooperative programs, agencies, or artists' studios.
Non-Traditional Format: The equivalent of lecture or studio course amounting to three credit hours to be agreed upon by the outside agency and the School of Art.

(ARTI) Artificial Intelligence

College of Arts and Sciences

(ARTI)EPSY(PSYC) 3020. Introduction to Cognitive Science. 3 hours.
Prerequisite: PSYC 1101 or PHIL 1000 or EPSY 2020.
Interdisciplinary study of mind and intelligent activity that forms cognitive sciences. Contributions of psychology, philosophy, linguistics, biology, anthropology, computer science, and education toward uncovering important aspects of the mind and intelligent activity are discussed.

(ARTI)CSCI 4540/6540. Symbolic Programming. 3 hours.
Prerequisite: CSCI 1302 or permission of department.
Prerequisite or corequisite: CSCI(PHIL) 4550/6550.
Programming in LISP and PROLOG, with emphasis on artificial intelligence techniques. Other languages used for artificial intelligence work will be presented more briefly.

(ARTS) Art

College of Arts and Sciences, School of Art

ARTS 2000. Art Appreciation. 3 hours.
Understanding painting, sculpture, architecture, and design to enhance aesthetic appreciation.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ARTS 2050. Cultural Diversity in American Art. 3 hours.
Past and present art created by African Americans, Asian Americans, Hispanic Americans and Native Americans.

ARTS 4920/6920. Seminar in Contemporary Art. 3 hours.
Contemporary art from the point of view of studio artists.

ARTS 4960H. Directed Projects in Honors. 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Arranged between student and advisor.

ARTS 4970H. Directed Projects in Honors. 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Arranged between student and advisor.

ARTS 4980H. Directed Projects in Honors. 3 hours.
Prerequisite: Permission of Honors.
Special projects under the direction of an approved advisor for Honors students of senior division standing.
Non-Traditional Format: Arranged between student and advisor.

ARTS 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research under an approved advisor for an Honors student in the field of his/her major or in a closely related field.
Non-Traditional Format: Arranged between student and advisor.

(ASTR) Astronomy

College of Arts and Sciences, Department of Physics and Astronomy

ASTR 1010. Astronomy of the Solar System. 3 hours.
Not open to students with credit in ASTR 1110H.
Astronomy from early ideas of the cosmos to modern observational techniques. The solar system planets, satellites, and minor bodies. The origin and evolution of the solar system.

ASTR 1010L. Astronomy of the Solar System Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in ASTR 1110L.
Prerequisite or corequisite: ASTR 1010.
Astronomy laboratory to accompany Astronomy of the Solar System.

ASTR 1020. Stellar and Galactic Astronomy. 3 hours.
Not open to students with credit in ASTR 1120H.
The study of the sun and stars, their physical properties and evolution, interstellar matter, star clusters, our galaxy and other galaxies, and the origin and evolution of the Universe.

ASTR 1020L. Stellar and Galactic Astronomy Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in ASTR 1120L.
Prerequisite or corequisite: ASTR 1020.
Astronomy laboratory to accompany Stellar and Galactic Astronomy.

ASTR 1110L. Introduction to Astronomy Laboratory (Honors). 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in ASTR 1010L.
Prerequisite or corequisite: ASTR 1110H.
Astronomy laboratory to accompany Introduction to Astronomy (Honors).

ASTR 1110H. Introduction to Astronomy (Honors). 3 hours.
Not open to students with credit in ASTR 1010.
Prerequisite: Permission of Honors.
The development of astronomy from ancient times. Telescopes and astronomical observations. The solar system: planets and their satellites, asteroids, comets, etc. The origin and evolution of the solar system.

ASTR 1120L. Introduction to Astronomy Laboratory (Honors). 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in ASTR 1020L.
Prerequisite or corequisite: ASTR 1120H.
Astronomy laboratory to accompany Introduction to Astronomy.

ASTR 1120H. Introduction to Astronomy (Honors). 3 hours.
Not open to students with credit in ASTR 1020.
Prerequisite: Permission of Honors.
Our sun and other stars, their physical properties and evolution. Interstellar matter and star formation. The origin and evolution of our galaxy, other galaxies, quasars and the Universe.

ASTR 1420. Life in the Universe. 3 hours.
The astronomical, chemical and physical conditions for extraterrestrial life. The origins of terrestrial life. Search for extraterrestrial life and extraterrestrial intelligence. Strategies for communication with extraterrestrial intelligence.

ASTR 1540. Science, Science Fiction, and Pseudoscience. 3 hours.
Science facts versus speculation in science fiction books and films; examples of violations of scientific principles; debunking of UFOs, alien abductions, astrology, creationism and other pseudosciences.

ASTR 1660. History of Astronomy. 3 hours.
Discussion of the historical development of key astronomical ideas from ancient times to the modern age.

ASTR 1870. Black Holes. 3 hours.
History and development of general relativity, supernovae and compact objects. Observational evidence for stellar and supermassive black holes. Primordial black holes, wormholes, and the Big Bang. Contributions of Einstein, Chandrasekhar, Oppenheimer, Zwicky, Wheeler, Zel'dovich, Hawking, and Penrose.

ASTR 3010. Astronomical Observations and Techniques I. 3 hours.
Prerequisite: ASTR 1020 and ASTR 1020L.
Telescopes and astronomical observations, including photometry and spectroscopy. Laboratory exercises include visual, photographic, and photoelectric observations and data analysis with standard astronomical software.

ASTR 3020. Astronomical Observations and Techniques II. 3 hours.
Prerequisite: (ASTR 3010 and PHYS 1212-1212L) or permission of department.
Concepts, techniques, skills, and resources needed to plan, obtain, reduce, and interpret observations of astronomical objects.

ASTR 4010/6010. Astrophysics I. 3 hours.
Prerequisite: ASTR 1010 and ASTR 1020 and PHYS 3700 and PHYS 4101/6101.
Stellar astrophysics, stellar structure and atmospheres, formation of spectral lines and spectral classification, stellar evolution from star formation to planetary nebulae and supernovae and the resulting compact objects.

ASTR 4020/6020. Astrophysics II. 3 hours.
Prerequisite: ASTR 4010/6010.
Systems of stars, the interstellar medium and stellar populations, galaxies, their classification and evolution, extragalactic astronomy and cosmology.

ASTR 4330/6330. Astronomy Seminar. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: ASTR 1010 and ASTR 1020.
Prerequisite or corequisite: ASTR 3010 or ASTR 3020 or ASTR 4010/6010 or ASTR 4020/6020.
Seminar on contemporary topics in astronomy and astrophysics.

ASTR 4660. Astronomical Research. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ASTR 3010.
Observations using modern techniques and equipment to investigate astronomical phenomena.
Non-Traditional Format: Independent study and research.

ASTR 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Meetings with project director will be arranged.

ASTR 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Meetings with project director will be arranged.

ASTR 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Meetings will be arranged with thesis advisor.

(AVMD) Avian Medicine

College of Veterinary Medicine, Department of Avian Medicine

AVMD 3730. Poultry Health. 3 hours.
Prerequisite: POUL 3600 and MIBO 3500 and permission of school.
Common infections, parasitic, and nutritional diseases of poultry: their causes, diagnosis, prevention, and control. Offered to students majoring in poultry science and others who are qualified.

(BCMB) Biochemistry and Molecular Biology

College of Arts and Sciences, Department of Biochemistry and Molecular Biology

BCMB(BIOL)(CHEM)3100. Introductory Biochemistry and Molecular Biology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
The structure and function of biological molecules; enzymology, metabolism and bioenergetics, and recombinant DNA technology.

BCMB 4010/6010. Biochemistry and Molecular Biology I. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
A comprehensive treatment of biochemistry and molecular biology stressing structures of biological molecules, including proteins, nucleic acids, carbohydrates and lipids, enzymology and selected aspects of metabolism and bioenergetics.

BCMB 4020/6020. Biochemistry and Molecular Biology II. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
A comprehensive treatment of biochemistry and molecular biology stressing aspects of metabolism, metabolic regulation, bioenergetics, and recombinant DNA methodologies.

BCMB 4030L/6030L. Laboratory Techniques in Biochemistry and Molecular Biology. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Basic techniques in biochemistry and molecular biology, including enzyme assays and purification, nucleic acid purification and characterization, chromatography, spectroscopy, and other modern methods.

BCMB(CHEM) 4110/6110. Physical Biochemistry. 3 hours.
Prerequisite: MATH 2210.
Prerequisite or corequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
The principles of physical chemistry applied to biological molecules and systems, including current approaches in structural biology.

BCMB 4120/6120. Human Biochemistry and Disease. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Integrated treatment of human biochemistry and selected topics on the biochemical basis of human disease. Examples will be given of inheritable and acquired disorders.

CMB 4130/6130. Biotechnology. 3 hours.
erequisite: BCMB(BIOL)(CHEM) 3100 or BCMB
)10/6010.
pplied aspects of biochemistry and molecular biology
various fields, with emphasis on the use of recombi-
nt DNA methods and protein engineering.

**CMB 4960L. Laboratory Research in Biochemis-
y and Molecular Biology I.** 3-5 hours. 3-5 lab peri-
ls of 3 hours each per week.
erequisite: BCMB(BIOL)(CHEM) 3100 or BCMB
)10/6010.
asic techniques in biochemistry and molecular biol-
gy, application of the scientific method, and prepara-
on of a written scientific report. For students with little
r no laboratory experience.

**CMB 4960H. Laboratory Research in Biochemis-
y and Molecular Biology I (Honors).** 3-5 hours. 3-
lab periods of 3 hours each per week.
rerequisite: BCMB(BIOL)(CHEM) 3100 or BCMB
010/6010 or permission of Honors.
asic techniques in biochemistry and molecular biol-
gy, application of the scientific method, and prepara-
on of a written scientific report. For Honors students
vith little or no laboratory experience.

**BCMB 4970L. Laboratory Research in Biochemis-
ry and Molecular Biology II.** 3-5 hours. Repeatable
or maximum 10 hours credit. 3-5 lab periods of 3 hours
ach per week.
Prerequisite: BCMB 4030L/6030L or BCMB 4960H.
Advanced techniques in biochemistry and molecular
iology, application of the scientific method, and prepa-
ation of a written scientific report. For students with
ome laboratory experience.

**BCMB 4970H. Laboratory Research in Biochemis-
ry and Molecular Biology II (Honors).** 3-5 hours.
Repeatable for maximum 10 hours credit. 3-5 lab
periods of 3 hours each per week.
Prerequisite: BCMB 4030L/6030L or BCMB 4960H or
permission of Honors.
Advanced techniques in biochemistry and molecular
biology, application of the scientific method, and prepa-
ration of a written scientific report. For Honors students
with some laboratory experience.

**BCMB 4990H. Honors Thesis in Biochemistry and
Molecular Biology.** 3-5 hours. 3-5 lab periods of 3
hours each per week.
Prerequisite: (BCMB 4010/6010 and BCMB 4030L/
6030L) or BCMB 4960H or permission of Honors.
Prerequisite or corequisite: BCMB 4020/6020.
Laboratory research in biochemistry and molecular
biology under the supervision of a faculty member. A
thesis summarizing the literature in the field and the
student's research findings is required.

(BIOL) Biology

College of Arts and Sciences, Department of Biology

BIOL 1103-1103L. Basic Concepts in Biology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BTNY 1210-1210L or BIOL 1107-1107L.
Science as a process, evolution, energy transfer, genetic continuity, complementarity of structure and function, regulation and homeostasis, interdependence in nature. Topics include chemistry of life, cells, cellular energetics, heredity, molecular genetics, growth and development, evolutionary biology, principles of ecology.

BIOL 1104-1104L. Organismal Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BTNY 1220-1220L or BIOL 1108-1108L.
A general biology course focused on organisms, including diversity and phylogeny, structure and function, interaction with the environment, global issues.

BIOL 1107-1107L. Principles of Biology I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1211 and CHEM 1211L.
Biological chemistry, cell structure and function, bioenergetics, mitosis and meiosis, genetics, gene expression and regulation, gene technology, population genetics, evolution.

BIOL 1107H. Principles of Biology I (Honors). 1 hour.
Not open to students with credit in BIOL 1107-1107L.
Prerequisite: Permission of Honors.
Corequisite: BIOL 1107-1107L.
Seminars, readings, and discussions of topics related to general biology.
Non-Traditional Format: This seminar course meets for 60-90 minutes weekly.

BIOL 1108-1108L. Principles of Biology II. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Microbial diversity and physiology; plant and animal diversity, growth, reproduction and physiology; ecology.

BIOL 1108H. Principles of Biology II (Honors). 1 hour.
Not open to students with credit in BIOL 1108-1108L.
Prerequisite: Permission of Honors.
Corequisite: BIOL 1108-1108L.
Seminars, readings, and discussion of topics related to general biology.
Non-Traditional Format: This seminar course meets for 60-90 minutes weekly.

BIOL 1990. Orientation to Biology Degree Programs. 1 hour.
Introduces students to the Division of Biological Sciences, its departments and the requirements for the biology degree, careers in the biological sciences.

(BIOL)ENTO 2010. Insects and the Environment. 3 hours.
Designed to acquaint students with our dependence on and interaction with insects in today's world.

(BIOL)HONS(CHEM)(GEOL)(PHYS) 2070H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in PHYS 1010 or CHEM 1110.
Prerequisite: (ENGL 1101 or MATH 1101) and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Occasional weekend field trips required.

(BIOL)HONS(CHEM)(GEOL)(PHYS) 2080H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or GEOL 1121.
Prerequisite: HON 2070H and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Weekend field trips required.

BIOL 2990H. Seminar in Modern Biology (Honors). 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: (BIOL 1103-1103L or BIOL 1104-1104L or BIOL 1107-1107L or BIOL 1108-1108L) and permission of Honors.
Discussion of topics in modern biology with faculty members from the biological sciences. Topics will vary from year to year and several topics will be considered each semester.
Non-Traditional Format: This seminar course meets 60-90 minutes weekly.

(BIOL)BCMB(CHEM) 3100. Introductory Biochemistry and Molecular Biology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
The structure and function of biological molecules, enzymology, metabolism and bioenergetics, and recombinant DNA technology.

BIOL 3110L. Basic Skills in the Laboratory. 4 hours. 3 lab periods of 4 hours each per week.
Prerequisite: BIOL 1107-1107L and CHEM 2211 and CHEM 2211L.
An intensive laboratory course emphasizing acquisition of skills in common use in research laboratories. Techniques range from solution preparation to isola tion and analysis of DNA and protein. Includes prope procedures for keeping a laboratory notebook, labora tory safety, and time management.

(BIOL)GENE 3200. Genetics. 3 hours.
Prerequisite or corequisite: (BIOL 1104-1104L or BIOL 1108-1108L) and BCMB(BIOL)(CHEM) 3100.
Genetic mechanisms in viruses, bacteria, and eukaryotic cells in a comparative sense. Topics include molecular genetics and gene action, transfer systems and mapping, cytological, quantitative, and populatio genetics.

(BIOL)GENE 3210. Experimental Genetics. 3 hours 3 lab periods of 2 hours each per week.
Prerequisite or corequisite: GENE(BIOL) 3200.
Drosophila, bacteria, phage and fungal systems for the analysis of mutation, transfer systems, mapping, comple mentation, population studies, and other genetic principles.

(BIOL)CBIO 3300. Developmental Biology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Prerequisite or corequisite: GENE(BIOL) 3200 or PGEN 3580-3580L.
Cell differentiation and morphogenesis, primarily in animal development. Gene regulation at the molecular level, gametogenesis, fertilization, normal embryonic development, cell and tissue interactions, hormonal regulation, and developmental aspects of cancer and the immune response.

(BIOL)CBIO 3400. Cell Biology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Prerequisite or corequisite: GENE(BIOL) 3200.
Structure and function of cells: cell architecture and organization, cell cycle, membrane phenomena, organellogenesis, energy transduction, and cellular control mechanisms.

(BIOL)CBIO 3410L. Laboratory in Cellular and Developmental Biology. 4 hours. 2 lab periods of 5 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Cell biology research techniques in cell cycle and cell differentiation, cell adhesion, motility, molecular transport, and cell metabolism. Cell culture, cell fractionation, fluorescence and laser-confocal microscopy, electron microscopy, immunocytochemistry, DNA isolation, polymerase chain reaction, and DNA sequencing.

(BIOL)ECOL 3500-3500L. Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in GEOG 3210.
Prerequisite: BIOL 1108-1108L and MATH 2200 and MATH 2200L and CHEM 1211 and CHEM 1211L.
Population structure and dynamics, organization and classification of communities, and nutrient and energy flows in ecosystems.

Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

(BIOL)ECOL 3510. Ecology Laboratory. 3-4 hours. Repeatable for maximum 10 hours credit.
Prerequisite: ECOL(BIOL) 3500-3500L.
Techniques and methodologies to assess organismal, population, community, or ecosystem interactions.
Non-Traditional Format: A field course taught for blocks of time off-campus (semester breaks or summer). Additional on-campus lecture hours may be added depending upon the field schedule.

BIOL 3700. Animal Behavior. 3 hours.
Prerequisite: BIOL 1108-1108L.
Principles of animal behavior, integrating genetic, physiological, developmental, and evolutionary aspects. Topics include communication, reproduction, sociality, foraging, defense, migration, habitat selection, and learning.

BIOL 3710L. Animal Behavior Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: BIOL 3700.
Firsthand experience with diverse living animals illustrates behavior principles and provides experience with methods and techniques of behavior research. Data analysis and written communication of experimental results are important components.

(BIOL)CBIO 3800. Neurobiology. 3 hours.
Prerequisite: BIOL 1108-1108L.
Structural organization, cell biology, physiology, development, and integration of the nervous system. This course integrates individual nervous system cells into neural systems for motivation, locomotion, perception, and learning.

BIOL 3900. Readings in Biology. 1-3 hours. Repeatable for maximum 3 hours credit.
Individual study or readings under the direction of a faculty member.
Non-Traditional Format: Individual study or readings under the direction of a faculty member.

BIOL 3900H. Readings in Biology (Honors). 1-3 hours.
Not open to students with credit in BIOL 3900.
Prerequisite: Permission of Honors.
Individual study or readings under the direction of a faculty member.
Non-Traditional Format: The hours for this reading course are arranged by the student and the professor.

(BIOL)GENE 4200/6200. Advanced Genetics. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Prokaryotic, fungal, and mammalian genetic systems which form the basis of our understanding of molecular genetics. Techniques used in the analysis of the structure and function of viral and eukaryotic genomes.

(BIOL)GENE 4210L. Molecular Genetics Laboratory. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: GENE(BIOL) 3200.
Lab techniques in molecular genetics for advanced undergraduate students. Basic genetic and recombinant DNA approaches in contemporary molecular biology: use of computers for database searches, DNA sequence analysis, and molecular modeling.

(BIOL)BTNY(CRSS) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

(BIOL)GENE 4600/6600. Evolutionary Biology. 3 hours.
Prerequisite: BIOL 1108-1108L.
An introduction to the processes of evolution. Topics include population genetics, speciation, systematics, coevolution, chemical origin of life, history of life, geological record, and evolution of humans.

BIOL 4960. Undergraduate Research in Biology. 4 hours. Repeatable for maximum 12 hours credit. 3 lab periods of 4 hours each per week.
Prerequisite: Permission of department.
Laboratory research conducted under the supervision of a faculty member in biological sciences. Arrangements must be made in advance. A final paper/report is required to receive credit toward the Biology major.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BIOL 4960H. Undergraduate Research in Biology (Honors). 4 hours. 3 lab periods of 4 hours each per week.
Not open to students with credit in BIOL 4960.
Prerequisite: Permission of Honors.
Laboratory research conducted under the supervision of a faculty member in biological sciences. Arrangements must be made in advance. A final paper/report is required to receive credit toward the Biology major.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BIOL 4970H. Undergraduate Research in Biology (Honors). 4 hours. 3 lab periods of 4 hours each per week.
Prerequisite: Permission of Honors.
Laboratory research conducted under the supervision of a faculty member in Biological Sciences. Arrangements must be made in advance. A final paper/report is required.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BIOL 4980H. Undergraduate Research in Biology (Honors). 4 hours. 3 lab periods of 4 hours each per week.
Prerequisite: Permission of Honors.
Laboratory research conducted under the supervision of a faculty member in biological sciences. Arrangements must be made in advance. A final paper/report is required.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BIOL 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Ten hours of research per week.

BIOL(CBIO)(VPAT) 5040/7040. Electron Microscopy. 3 hours.
Prerequisite: [(CHEM 1212 and CHEM 1212L) or (CHEM 1412 and CHEM 1412L)] and PHYS 1112-1112L.
Instrument theory and theory of specimen preparation for both transmission and scanning electron microscopy. Fundamentals of X-ray microanalysis, image processing, and image analysis.

BIOL(CBIO) 5050L/7050L. Electron Microscopy Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: BIOL(CBIO)(VPAT) 5040/7040 or permission of department.
Operation of both transmission (TEM) and scanning electron microscopes (SEM). Preparation of specimens (ultramicrotomy, critical point drying, negative staining) for examination in both TEM and SEM. Basics of X-ray microanalysis.

BIOL 5080. Current Topics in Biology. 3 hours.
Current topics in biology for high school teachers.

(BTNY) Botany

College of Arts and Sciences, Department of Botany

BTNY 1210-1210L. Principles of Plant Biology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BIOL 1103-1103L or BIOL 1107-1107L.
Basic principles of biology with an emphasis on plants, including science as a process, cell biology, biochemistry, plant structure and function, energy metabolism, genetics, evolution, ecology.

BTNY 1210H. Principles of Plant Biology (Honors). 1 hour. 1 lab period of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or BIOL 1107H or BIOL 1107-1107L.
Prerequisite: Permission of Honors.
Corequisite: BTNY 1210-1210L.
Basic principles of biology with an emphasis on plants including science as a process, cell biology, biochemistry, plant structure and function, energy metabolism genetics, evolution, ecology.

BTNY 1220-1220L. Organismal Plant Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BIOL 1040-1040L or BIOL 1108-1108L.
Plant biology course focused on organisms. Topics include evolution and diversity of plants, algae, and fungi; environmental interactions; global environmental issues; ethnobotany.

BTNY 1220H. Organismal Plant Biology (Honors). 1 hour. 1 lab period of 1.5 hours each per week.
Not open to students with credit in BIOL 1104-1104L or BIOL 1108H or BIOL 1108-1108L.
Prerequisite: Permission of Honors.
Corequisite: BTNY 1220-1220L.
Plant biology course focused on organisms. Topics include evolution and diversity of plants, algae, and fungi; environmental interactions; global environmental issues; ethnobotany.

(BTNY)PATH(ANTH) 3010. Fungi: Friends and Foes. 3 hours.
Impact of fungi on human affairs. Historical and current uses of fungi by humans as well as the roles of fungi in various ecosystems.

(BTNY)HORT(ANTH) 3440. Herbs, Spices, and Medicinal Plants. 2 hours.
Historical and contemporary significance of herbs, spices, and medicinal plants in human culture and commerce; chemical and biological characteristics; commercial production techniques; application in modern and traditional medical systems.

BTNY 3830-3830L. Plant Physiology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 2100 and CHEM 2100L.
Plant physiology for students with cell physiology or biochemistry background. Water relations, mineral nutrition, transport of materials, respiration, photosynthesis, growth and development.

BTNY 3900. Readings in Botany. 1-3 hours. Repeatable for maximum 9 hours credit.
Individual or small group directed readings from scientific journals in a selected area of Botany.
Non-Traditional Format: Independent research.

BTNY 3900H. Readings in Botany (Honors). 1-3 hours. Repeatable for maximum 9 hours credit.
Not open to students with credit in BTNY 3900.
Prerequisite: Permission of Honors.

ndividual or small group directed readings from scien-tific journals in a selected area of Botany.
Non-Traditional Format: Independent research.

BTNY)PATH 4200/6200-4200L/6200L. Introductory Mycology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Morphology, biology, and taxonomy of fungi. Representatives of all major groups of fungi are considered.

BTNY)GEOG 4220/6220. Ecological Biogeography. 3 hours.
Prerequisite: GEOG 3210 or ECOL(BIOL) 3500-3500L.
Patterns of plant distribution in contemporary landscapes and underlying processes, including vegetation dynamics, disturbance ecology, biogeo morphology, dendrochronology, and environmental history.

BTNY 4230/6230-4230L/6230L. Plant Anatomy. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L and CBIO(BIOL) 3400) or permission of department.
Structure and growth of meristems; development and structure of cells, tissues, and tissue systems; comparative anatomy of stems, roots, leaves, flowers, and fruits; survey of recent advances in study of growth and development of form and emphasis on experimental approaches. Assumes elementary knowledge of cell and tissue structure.

BTNY)GEOG 4240/6240. Plant Geography. 3 hours.
Prerequisite: BIOL 1104-1104L and (GEOG 1112 and GEOG 1112L) and [GEOG 3210 or ECOL(BIOL) 3500-3500L].
Phytogeographical zonation, plant-geographic processes, and current potential natural vegetation. Includes physical and environmental factors, plant-environment relationships, plant roles and types, vegetation dynamics, geographic responses to disturbance, and vegetation of main world biomes. Emphasis on global-scale patterns and relationships.

BTNY 4250/6250. Biology of Natural Plant Products. 3 hours.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L or permission of department.
The biological/ecological role of natural plant products or metabolites such as alkaloids, terpenes, and pigments in relationships and interactions among plants and between plants and animals.

(BTNY)ANTH 4300/6300-4300L/6300L. Ethnobotany. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ANTH 1102 or permission of major.
Ethnobotanical research, with focus on knowledge and utilization of the plant world in traditional societies. Comparisons of societies in tropical forest ecosystems and evaluation of issues relating to intellectual property rights and traditional peoples' knowledge of plant species with potential economic value.

BTNY(CRSS)(BIOL) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

(BTNY)CBIO 4600/6600-4600L/6600L. Biology of Protists. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Protists (algae, protozoa, and zoosporic fungi) with an emphasis on cell structure, evolution, and life histories. Laboratories will concentrate on examination of living and fixed materials and will include methods of isolation and culturing of protists.

BTNY 4650/6650-4650L/6650L. Plant Taxonomy. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L or permission of department.
History of taxonomy, nomenclature, characters, identification principles, classification, taxonomic relationships, taxonomic literature, species biology, collecting and herbarium, floristic studies.

BTNY 4850/6850-4850L/6850L. Vegetation Analysis. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (ECOL(BIOL) 3500-3500L and STAT 6220) or permission of department.
Rationale and protocols for various methods of studying vegetation at the population, community and landscape levels. Both field sampling and data analysis techniques will be covered with introduction to several software packages.

BTNY 4960. Independent Research in Botany. 1-3 hours. Repeatable for maximum 12 hours credit.
Independent research and research participation in a selected area of Botany.
Non-Traditional Format: Independent research.

BTNY 4960H. Independent Research in Botany (Honors). 3 hours.
Not open to students with credit in BTNY 4960.
Prerequisite: Permission of Honors.
Independent research and research participation for Honors students in a selected area of Botany.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BTNY 4970H. Independent Research in Botany (Honors). 3 hours.
Prerequisite: Permission of Honors.
Independent research and research participation for Honors students in a selected area of Botany.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BTNY 4980H. Independent Research in Botany (Honors). 3 hours.
Prerequisite: Permission of Honors.
Independent research and research participation for honors students in a selected area of Botany.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

BTNY 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Independent research and research participation for Honors students in a selected area of Botany.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(CBIO) Cellular Biology

College of Arts and Sciences, Department of Cellular Biology

CBIO 2200-2200L. Anatomy and Physiology I. 4 hours. 2.5 hours lecture and 1 lab period of 2.5 hours each per week.
Not open to students with credit in CBIO 3200-3200L.
Systematic study of the anatomy and physiology of the human body at cellular, tissue, and gross levels.

CBIO 2210-2210L. Anatomy and Physiology II. 4 hours. 2.5 hours lecture and 1 lab period of 2.5 hours each per week.
A continuation of Anatomy and Physiology I.

CBIO 3000-3000L. Comparative Vertebrate Anatomy. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in ECOL(FORS) 3260-3260L.
Prerequisite or corequisite: BIOL 1108-1108L.
Comparative systemic vertebrate anatomy emphasizing structure and function.

CBIO(BIOL) 3300. Developmental Biology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Prerequisite or corequisite: GENE(BIOL) 3200 or PGEN 3580-3580L.
Cell differentiation and morphogenesis, primarily in animal development. Gene regulation at the molecular level, gametogenesis, fertilization, normal embryonic development, cell and tissue interactions, hormonal regulation, and developmental aspects of cancer and the immune response.

CBIO(BIOL) 3400. Cell Biology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Prerequisite or corequisite: GENE(BIOL) 3200.
Structure and function of cells: cell architecture and organization, cell cycle, membrane phenomena, organellogenesis, energy transduction, and cellular control mechanisms.

CBIO(BIOL) 3410L. Laboratory in Cellular and Developmental Biology. 4 hours. 2 lab periods of 5 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100.
Cell biology research techniques in cell cycle and cell differentiation, cell adhesion, motility, molecular transport, and cell metabolism. Cell culture, cell fractionation, fluorescence and laser-confocal microscopy, electron microscopy, immunocytochemistry, DNA isolation, polymerase chain reaction, and DNA sequencing.

CBIO 3700. Principles of Animal Physiology. 3 hours.
Prerequisite: BIOL 1108-1108L.
Physiology and variations related to lifestyle and complexity among animals. Cellular bases of organismic function: homeostasis, neural and endocrine function, muscle function, metabolism, secretion, absorption, osmoregulation, and thermoregulation.

CBIO(BIOL) 3800. Neurobiology. 3 hours.
Prerequisite: BIOL 1108-1108L.
Structural organization, cell biology, physiology, development, and integration of the nervous system. This course integrates individual nervous system cells into neural systems for motivation, locomotion, perception, and learning.

CBIO(MIBO) 4100/6100. Immunology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and GENE (BIOL) 3200.
Immunology from an experimental perspective. Anatomy, development, and function of the immune system. Immune system in infectious diseases. Mechanisms and pathogenesis of immunological disorders. Evolution of immunological concepts.

CBIO 4340/6340. Biology of Aging. 3 hours.
Prerequisite: Permission of department.
Biological processes accompanying aging in human and other organisms. Emphasis on physiological decline; theoretical explanations; attempts to prolong life; and the utility and limitations of model systems used to analyze human aging.

CBIO 4500/6500-4500L/6500L. Medical Parasitology. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Major protozoan and metazoan endo- and ectoparasites of humans. Principles of parasitism and general biology of each parasite. Vector biology, epidemiology,

control, and treatment of parasitic diseases are discussed. Laboratory stresses diagnosis and identification, and introduces pathology through the use of fixed and living material.

CBIO(BTNY) 4600/6600-4600L/6600L. Biology of Protists. 4 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
Protists (algae, protozoa, and zoosporic fungi) with an emphasis on cell structure, evolution, and life histories. Laboratories will concentrate on examination of living and fixed materials and will include methods of isolation and culturing of protists.

CBIO 4730/6730. Endocrinology. 3 hours.
Prerequisite: BIOL 1108-1108L or permission of department.
Vertebrate endocrinology and the principles of chemical integration, emphasizing the physiology of regulatory mechanisms and the cellular and molecular bases of hormone action.

CBIO 4960H. Directed Reading and/or Laboratory Research (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or laboratory research directed by faculty of the Cellular Biology department.

CBIO 4970. Directed Reading. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Oral and written evaluation of original papers and reviews in cellular biology directed by a member of the department faculty.
Non-Traditional Format: Directed study.

CBIO 4970H. Directed Reading and/or Laboratory Research (Honors). 4 hours.
Not open to students with credit in CBIO 4970.
Prerequisite: Permission of Honors.
Individual study, reading, or laboratory research directed by faculty of the Cellular Biology department.
Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 4980. Research in Cellular Biology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent laboratory research directed by departmental faculty members. Two semesters may fulfill the departmental techniques requirement.
Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 4980H. Directed Reading and/or Laboratory Research (Honors). 3 hours.
Not open to students with credit in CBIO 4980.
Prerequisite: Permission of Honors.
Individual study, reading, or laboratory research directed by faculty of the cellular biology department.
Non-Traditional Format: Independent research under the direction of a faculty member.

CBIO 4990. Seminar in Cellular Biology. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 1 hour each per week.
Presentation of original research and critical surveys of cellular biology literature. Required of all cellular biology majors.

CBIO 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Preparation of Honors thesis under supervision of departmental faculty.
Non-Traditional Format: Independent research and thesis preparation.

(CBIO)BIOL(VPAT) 5040/7040. Electron Microscopy. 3 hours.
Prerequisite: [(CHEM 1212 and CHEM 1212L) or (CHEM 1412 and CHEM 1412L)] and PHYS 1112-1112L.
Instrument theory and theory of specimen preparation for both transmission and scanning electron microscopy. Fundamentals of X-ray microanalysis, image processing, and image analysis.

(CBIO)BIOL 5050L/7050L. Electron Microscopy Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: BIOL(CBIO)(VPAT) 5040/7040 or permission of department.
Operation of both transmission (TEM) and scanning electron microscopes (SEM). Preparation of specimens (ultramicrotomy, critical point drying, negative staining) for examination in both TEM and SEM. Basics of X-ray microanalysis.

(CHEM) Chemistry

College of Arts and Sciences, Department of Chemistry

CHEM 1060-1060L. Physical Science for Teachers. 4 hours. 3 hours lecture and 3 lab periods of 1 hour each per week.
Physical science for education majors planning to teach science at the middle school level. Limited to candidates for B.S. in Education degrees.

CHEM 1110. Elementary Chemistry. 3 hours.
A one-semester, non-mathematical study of chemical principles with an emphasis on environmental issues.

CHEM 1110L. Elementary Chemistry Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Corequisite: CHEM 1110.
Laboratory experiments performed to illustrate the reactions, principles, and techniques presented in Elementary Chemistry.

CHEM 1211. Freshman Chemistry I. 3 hours.
Not open to students with credit in CHEM 1311H or CHEM 1411.
Prerequisite or corequisite: MATH 1113.
The chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1211L. Freshman Chemistry Laboratory I. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1311L or CHEM 1411L.
Corequisite: CHEM 1211.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Freshman Chemistry I.

CHEM 1212. Freshman Chemistry II. 3 hours.
Not open to students with credit in CHEM 1312H or CHEM 1412.
Prerequisite: CHEM 1211 or CHEM 1311H or CHEM 1411.
Second semester of an in-depth study of the chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1212L. Freshman Chemistry Laboratory II. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1312L or CHEM 1412L.
Prerequisite: CHEM 1211L or CHEM 1311L or CHEM 1411L.
Corequisite: CHEM 1212.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Freshman Chemistry II.

CHEM 1311L. Advanced Freshman Chemistry Laboratory I (Honors). 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1211L or CHEM 1411L.
Prerequisite or corequisite: MATH 1113.
Corequisite: CHEM 1311H.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Advanced Freshman Chemistry I.

CHEM 1311H. Advanced Freshman Chemistry I (Honors). 3 hours.
Not open to students with credit in CHEM 1211 or CHEM 1411.
Prerequisite: Permission of Honors.
Prerequisite or corequisite: MATH 1113.
The chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1312L. Advanced Freshman Chemistry Laboratory II (Honors). 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1212L or CHEM 1412L.
Prerequisite: CHEM 1211L or CHEM 1311L or CHEM 1411L.
Corequisite: CHEM 1312H.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Advanced Freshman Chemistry II.

CHEM 1312H. Advanced Freshman Chemistry II (Honors). 3 hours.
Not open to students with credit in CHEM 1212 or CHEM 1412.
Prerequisite: (CHEM 1211 or CHEM 1311H or CHEM 1411) and permission of Honors.
Second semester of a rigorous in-depth study of the chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1411. Advanced Modern Chemistry I. 3 hours.
Not open to students with credit in CHEM 1211 or CHEM 1311H.
Prerequisite or corequisite: MATH 1113.
First semester of a rigorous in-depth study of the chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1411L. Advanced Modern Chemistry Laboratory I. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1211L or CHEM 1311L.
Prerequisite or corequisite: MATH 1113.
Corequisite: CHEM 1411.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Advanced Modern Chemistry I.

CHEM 1412. Advanced Modern Chemistry II. 3 hours.
Not open to students with credit in CHEM 1212 or CHEM 1312H.
Prerequisite: CHEM 1211 or CHEM 1311H or CHEM 1411.
Second semester of a rigorous in-depth study of the chemical principles involved in stoichiometry, structure, bonding, and reactivity.

CHEM 1412L. Advanced Modern Chemistry Laboratory II. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 1212L or CHEM 1312L.
Prerequisite: CHEM 1211L or CHEM 1311L or CHEM 1411L.
Corequisite: CHEM 1412.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Advanced Modern Chemistry II.

(CHEM)HONS(BIOL)(GEOL)(PHYS) 2070H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in PHYS 1010 or CHEM 1110.
Prerequisite: (ENGL 1101 or MATH 1101) and permission of Honors.

Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Occasional weekend field trips required.

(CHEM)HONS(BIOL)(GEOL)(PHYS) 2080H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or GEOL 1121.
Prerequisite: HON 2070H and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Weekend field trips required.

CHEM 2100. Elementary Organic Chemistry. 3 hours.
Not open to students with credit in CHEM 2211.
Prerequisite: CHEM 1110 or CHEM 1211 or CHEM 1311H or CHEM 1411.
A brief one-semester introduction to organic chemistry, covering elementary aspects of nomenclature, structures, and common reactions of organic compounds.

CHEM 2100L. Elementary Organic Chemistry Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 2211L.
Corequisite: CHEM 2100.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Elementary Organic Chemistry.

CHEM 2211. Modern Organic Chemistry I. 3 hours.
Not open to students with credit in CHEM 2100.
Prerequisite: CHEM 1211 or CHEM 1311H or CHEM 1411.
First semester of a two-semester sequence of organic chemistry for students majoring in sciences and for pre-medical, pre-dental, pre-pharmaceutical, and pre-veterinarial students.

CHEM 2211L. Modern Organic Chemistry Laboratory I. 1 hour. 1 lab period of 3 hours each per week.
Not open to students with credit in CHEM 2100L.
Corequisite: CHEM 2211.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Modern Organic Chemistry I.

CHEM 2212. Modern Organic Chemistry II. 3 hours.
Prerequisite: CHEM 2211.
Second semester of a two-semester sequence of organic chemistry for students majoring in sciences and for pre-medical, pre-dental, pre-pharmaceutical, and pre-veterinarial students.

CHEM 2212L. Modern Organic Chemistry Laboratory II. 1 hour. 1 lab period of 3 hours each per week.
Corequisite: CHEM 2212.
Students will perform experiments to illustrate the reactions, principles, and techniques presented in Modern Organic Chemistry II.

CHEM 2300. Quantitative Analytical Chemistry. 3 hours.
Prerequisite: CHEM 1212 or CHEM 1312H or CHEM 1412.
Quantitative analysis using statistical evaluation of data, gravimetric, volumetric, and selected instrumental methods, including spectrophotometry and separations.

CHEM 2300L. Quantitative Analytical Chemistry Laboratory. 1 hour. 1 lab period of 3 hours each per week.
Corequisite: CHEM 2300.
Selected quantitative analytical chemical topics, including gravimetric and volumetric methods, potentiometry, spectrophotometry, and separations.

CHEM 2600. Introduction to Research I. 1-4 hours.
Repeatable for maximum 4 hours credit.
Prerequisite: CHEM 1211 or CHEM 1311H or CHEM 1411.
Students will pursue directed research with a chosen faculty member, and will prepare a written report of their research progress for credit.
Non-Traditional Format: Students are expected to spend four hours per week in the research laboratory for each hour of credit.

(CHEM)BCMB(BIOL) 3100. Introductory Biochemistry and Molecular Biology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
The structure and function of biological molecules, enzymology, metabolism and bioenergetics, and recombinant DNA technology.

CHEM 3110. Fundamentals of Physical Chemistry. 3 hours.
Not open to students with credit in CHEM 3211.
Prerequisite: PHYS 1111-1111L and CHEM 2300 and MATH 2200.
A one-semester course which covers the basic concepts and techniques of physical chemistry. This course is designed for non-professional chemistry majors.

CHEM 3211. Modern Physical Chemistry I. 3 hours.
Prerequisite: CHEM 2300 and CHEM 2300L and MATH 2210 and PHYS 1212-1212L.
The first semester of a two-semester sequence covering basic concepts and techniques of physical chemistry. The level of coverage is designed for chemistry majors.

CHEM 3212. Modern Physical Chemistry II. 3 hours.
Prerequisite: CHEM 3211.
The second semester of a two-semester sequence covering basic concepts and techniques of physical chemistry. The level of coverage is designed for chemistry majors.

CHEM 3300. Modern Instrumental Methods of Analysis. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2300.
Prerequisite or corequisite: CHEM 2212.
Advanced topics in analytical chemistry. Fundamental principles of quantitative instrumental methods of analysis, including elementary aspects of instrumentation and signal processing; absorption, emission and scattering methods of optical spectrometry; mass spectrometry; electrochemistry; and separations.

CHEM 3400. Modern Inorganic Chemistry. 3 hours.
Prerequisite: CHEM 3110 or CHEM 3211.
Modern inorganic chemistry, including structure and bonding in solids, advanced concepts in periodicity, descriptive inorganic, organometallic, and bioinorganic chemistry.

CHEM 3511-3511L. Experimental Methods I. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite or corequisite: [BCMB(CHEM) 4110/6110 or CHEM 3110 or CHEM 3211] and CHEM 3300.
An integrated course incorporating elements of instrumental analysis, physical chemistry, and inorganic chemistry. Primary emphasis will be on fundamental aspects of each of the above disciplines.

CHEM 3512-3512L. Experimental Methods II. 3 hours. 1 hour lecture and 2 lab periods of 3 hours each per week.
Prerequisite: CHEM 3511-3511L.
Prerequisite or corequisite: CHEM 3212 and CHEM 3400.
Inorganic chemistry, physical chemistry, and instrumental analysis. Synthesis and modern physical and chemical methods of characterization.

CHEM 3600. Introduction to Research II. 1-4 hours. Repeatable for maximum 4 hours credit.
Prerequisite: CHEM 2211.
Students will pursue directed research with a chosen faculty member, and will prepare a written report of their research progress for credit.
Non-Traditional Format: Students will spend four hours per week in the research laboratory for each hour of credit.

CHEM 4100. Special Topics in Organic Chemistry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: CHEM 2212 and CHEM 2300.
Advanced concepts in organic chemistry will be presented, the detailed content varying from year to year.

(CHEM)BCMB 4110/6110. Physical Biochemistry. 3 hours.
Prerequisite: MATH 2210 or BCMB(BIOL)(CHEM) 3100 or BCMB 4010/6010.
Corequisite: BCMC(BIOL)(CHEM) 3100 or BCMB 4010/6010.
The principles of physical chemistry applied to biological molecules and systems, including current approaches in structural biology.

CHEM 4190/6190. Introduction to NMR Spectroscopy. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Instrumental aspects of NMR spectroscopy including pulsed Fourier transform techniques, proton and carbon-13 techniques used in the analysis of organic compounds, polypeptides and other small molecules. The focus is on the operation of NMR spectrometers presently available in the University of Georgia Chemistry Department.

CHEM 4200. Special Topics in Physical Chemistry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: CHEM 2212 and CHEM 2300 and (CHEM 3110 or CHEM 3211).
Advanced concepts in physical chemistry will be presented, the detailed content varying from year to year.

CHEM 4300. Special Topics in Analytical Chemistry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: CHEM 2212 and CHEM 3300.
Advanced concepts in analytical chemistry will be presented, the detailed content varying from year to year.

CHEM 4400. Special Topics in Inorganic Chemistry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: CHEM 2212 and CHEM 2300 and CHEM 3400.
Advanced concepts in inorganic chemistry will be presented, the detailed content varying from year to year.

CHEM 4500. Introduction to the Chemical Literature. 3 hours.
Prerequisite: CHEM 2212 and CHEM 2300.
Modern information technology and its uses in accessing the chemical scientific literature. Computer- and web-based databases and search engines will be described and demonstrated. Students will also receive hands-on training in presentation and verbal communication skills.
Non-Traditional Format: Lectures will be given in a master classroom with student access to workstations.

CHEM 4600. Independent Research. 4 hours.
Prerequisite: CHEM 2212 and CHEM 2300.
Students will pursue directed research with a chosen faculty member, and will prepare a written report of their research progress for credit.
Non-Traditional Format: Students will spend four hours in the research laboratory for each hour of credit.

CHEM 4960H. Directed Reading and/or Projects. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: CHEM 2211.
This course affords Honors students of senior division standing the opportunity to engage in individual study, reading, or projects under the direction of a project director.

CHEM 4970H. Directed Reading and/or Projects. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: CHEM 4960H.
This course affords Honors students of senior division standing the opportunity to engage in individual study, reading, or projects under the direction of a project director.

CHEM 4980H. Directed Reading and/or Projects. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: CHEM 4970H.
This course affords Honors students of senior division standing the opportunity to engage in individual study, reading, or projects under the direction of a project director.

CHEM 4990H. Honors Thesis. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: CHEM 4960H.
This course provides the opportunity for an Honors student to undertake individual research in the field of his/her major or in a closely related field.

(CHFD) Child and Family Development

College of Family and Consumer Sciences, Department of Child and Family Development

CHFD 2000. Introduction to Family and Consumer Sciences. 1 hour.
The specialties and professions comprising the fields in family and consumer sciences. Systems perspective is emphasized in examining quality of life issues. Discussions include the personal, professional, and technical elements involved in career development.

CHFD 2100. Development Within the Family. 3 hours.
Ecological approach to individual development and interpersonal relationships through consideration of family processes across the life span. Practice in application of principles.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CHFD 2950-2950L. Introduction to Child Development. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PSYC 1101.
Physical, cognitive, social, and emotional development of children from birth through adolescence.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CHFD 3010. Special Problems in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study and research.
Non-Traditional Format: Directed study.

CHFD 3110. Professional Development/Community Activities. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Career opportunities related to child and family development and preparation needed to enhance successful career development.
Non-Traditional Format: Individualized instruction organized as lectures and service learning experiences.

CHFD 3700. Adolescence and Young Adulthood Survey. 3 hours.
Prerequisite: CHFD 2950-2950L.
Adolescent and young adult development in the context of families. Special attention is given to the transactional nature of adolescent/young adult and family development, with application of theory and research to understanding problems associated with adolescence and early adulthood.

CHFD 3710. Midlife/Elder Years Survey. 3 hours.
Prerequisite: CHFD 2100 and CHFD 2950-2950L.
Individual and family development during middle and later years. Emphasis is on importance of physical, psychological, and social development within multigenerational relationships.

CHFD 3900. Prenatal and Infant Development. 3 hours.
Prerequisite: CHFD 2950-2950L.
Growth and development from conception to second year of life. Guidance of infants and toddlers within family and group care settings.

CHFD 3920. Issues in Family Systems. 3 hours.
Prerequisite: CHFD 2100.
Family processes and transition throughout the life span. Emphasis is on contemporary issues relevant to families.

CHFD 3930. Development of Interpersonal Relationships. 3 hours.
Prerequisite: CHFD 2100 or PSYC 1101 or SOCI 1101.
Developmental approach to close relationships. Includes processes of attraction, interdependence, love, commitment, and conflict. A variety of close relationships is explored in various contexts, including friendships, romance, and family relationships.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

(CHFD)EDEC 4010. Orientation to Early Childhood Education. 1 hour.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD)4010L.
Translation of theories about how children learn into ideas for application in the classroom. Bases for developmentally appropriate practices are examined in light of the students' own experiences as learners.

(CHFD)EDEC 4010L. Orientation to Early Childhood Education Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4010.
Translation of theories about how children learn into ideas for application in the classroom. Bases for developmentally appropriate practices are examined in light of the students' own experiences as learners. Field experiences in classroom settings.

(CHFD)EDEC 4020. Decision Making for Planning, Teaching, and Organizing Early Childhood Classrooms. 3 hours.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4020L.
Reflective decision making that incorporates the major themes, concepts, and skills involved in organizing, planning, and developing instruction in early childhood classrooms.

(CHFD)EDEC 4020L. Decision Making for Planning, Teaching, and Organizing Early Childhood Classrooms Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4020.
Reflective decision making that incorporates the major themes, concepts, and skills involved in organizing, planning, and developing instruction in early childhood classrooms. Field experiences in classroom settings.

(CHFD)EDEC 4030. Integrated Curricular Practices in Early Childhood Education. 3 hours.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4030L.
Develop philosophical perspectives of teaching and classroom management, consider effective parent-teacher relations, and connect with the wider community as a resource context for teaching and learning. Plan and teach an integrated, thematic curriculum unit for prekindergarten through grade five as part of the field component.

(CHFD)EDEC 4030L. Integrated Curricular Practices in Early Childhood Education Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4030.
Develop philosophical perspectives of teaching and classroom management, consider effective parent-teacher relations, and connect with the wider community as a resource context for teaching and learning. Plan and teach an integrated, thematic curriculum unit for prekindergarten through grade five as part of the field component. Field experiences in classroom settings.

(CHFD)EDEC 4040. Special Topics in Early Childhood Education. 3 hours.
Corequisite: EDEC(CHFD) 5460.
A forum for issues of professionalism connected to professional teaching experiences. Topics may vary depending on student-generated issues and concerns.

CHFD 4080/6080. Advanced Human Development. 3 hours.
Prerequisite: Undergraduates only: CHFD 2950-2950L.
Theoretical perspectives and philosophical issues in human development across the life span from an interdisciplinary perspective. Special reference to techniques of child guidance.

CHFD 4090/6090. Advanced Infant Development. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CHFD 3900.
Emotional, social, cognitive, and physical development in infancy. Supervised observation in Infant Center and in selected homes.

CHFD 4120. Child Care, Work, and the Family. 3 hours.
Prerequisite: CHFD 2100 and CHFD 2950-2950L.
A developmental-contextual analysis of child care, work, and family functioning. Examination of current child care arrangements to work roles in families, historical and cross-cultural comparisons of child care and family work patterns, and the developmental impact of child care and work on family members. Policy implications discussed.

CHFD 4130. Family Policy. 3 hours.
Prerequisite: CHFD 2100 and CHFD 2950-2950L.
Relevance of government and business policies to the lives of children and families. Assessment of the influence of policies using criteria drawn from the field of child and family development.

CHFD 4330. Diversity in Human Development and Family Systems. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Variability in family development, organization, identity structure, and values with an emphasis on culture, gender, race, ethnicity, sexual orientation, and physical characteristics of family members.

CHFD(HACE) 4500/6500. Second Half of Life. 3 hours.
Prerequisite: Junior standing or permission of department.
Second half of life; resource management, living patterns, and housing, sexuality, roles, family relationships, community and organization involvement, and career opportunities.

CHFD 4600/6600. Older Individuals. 3 hours.
Prerequisite: CHFD(HACE) 4500/6500.
Older individuals in marriage, family, and society. Special attention given to marital relationships, widowhood, parent and adult-child relationships and care

giving, social networks and ecological issues as they affect older individuals and their families.

CHFD(SOCI) 4610/6610. The Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Family study utilizing data from the fields of anthropology, individual and social psychology, history, sociology, economics, and psychiatry.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CHFD 4620/6620. Women in the Family and Society. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Women's experiences and gender issues in relation to family and individual development. Research and policy implications are examined.

CHFD 4700/6700. The Family and Adolescence. 3 hours.
Prerequisite: Undergraduate level only: CHFD 3700.
Advanced consideration of unique features of the family that includes an adolescent member. Special attention is given to dual processes of adolescent development and family development.

CHFD 4810/6810. Hospitalized Child and the Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 and CHFD 2950-2950L and permission of department.
Developmental and psychosocial issues of hospitalized children and their families. Organization and services in health care settings investigated.

CHFD 4850/6850. Family Development. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 or SOCI 1101.
Families as social groups that develop their own patterns, meanings, and processes across family life cycle in both conventional and alternative family forms.

CHFD 4860/6860. Parent Education and Child Guidance. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100 and CHFD 2950-2950L.
Application of theory, research, and developmental practice to understanding the role of parents, teachers, and community leaders in guiding the behavior of children from birth through adolescence, and to establishing mutually satisfying parent-child relationships through the life cycle. Programs for parents and parental interactions with schools and other social institutions.

CHFD 4870/6870. Human Sexuality Across the Life Span. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Attitudes toward and values associated with human sexuality, based on substantive and theoretical information, with emphasis on how development and interactions across the life span are affected by familial, social, cultural, and psychological factors.

CHFD 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

CHFD 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

CHFD 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

CHFD 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in Child and Family Development or a closely related field.
Non-Traditional Format: Individual research with a faculty member.

CHFD 5100. Family Intervention. 3 hours.
Prerequisite: Senior standing or permission of department.
Theoretical concepts and behavioral skills as applied to the intervention process with help-seeking individuals and families.

CHFD 5110. Research Methods in Child and Family Development. 3 hours.
Prerequisite: Senior standing or permission of department.
The evaluation of research in the field of Child and Family Development and common problems incurred in applied research which affect the interpretation of data.

CHFD 5120/7120. Observation and Assessment Techniques. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2950-2950L.
Directed experiences in observing, recording, and assessing behavior and interaction among children and families, and examination of program assessment

CHFD 5130/7130. Creative Activities for Young Children. 3 hours.
Prerequisite: CHFD 4860/6860.
Quality individual and group programming for young children based upon current theory, research, and developmentally appropriate practice. Special emphasis will be placed upon the integration of creative activities

including art, music, movement, nutrition, health, dramatic play and computer applications.

CHFD 5140/7140. Group Programs for Young Children. 9 hours. 5 hours lecture and 4 lab periods of 4 hours each per week.
Prerequisite: Undergraduate level only: CHFD 3900.
Developmental and educational theories applied to the design, content, and implementation of group programs for young children.

CHFD(EDEC) 5150. Families, Schools, and Communities. 3 hours.
Prerequisite: CHFD 3920 and EDEC(CHFD) 4020 and CHFD 4860/6860 and permission of department.
Families and their relationship with schools and communities. Implications for selected areas of practice, such as early childhood educational practices, emphasized.

CHFD 5160L/7160L. Administration of Children's Programs. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHFD 4860/6860 and CHFD 5140/7140.
Theories and administration of child care programs. Topics include planning, scheduling, enrollment, certification, and evaluation. Laboratory work required.

(CHFD)EDEC 5460. Student Teaching in Early Childhood Education. 3-15 hours.
A prekindergarten through grade five classroom teaching experience under the direction of a teacher and an early childhood education faculty member.
Non-Traditional Format: Student teaching/field based in schools.

CHFD 5710/7710. Study Tour in Child and Family Development. 3-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Selected topics in child and family development. Combined with site visits to relevant locations.
Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

CHFD 5900/7900. Preinternship Orientation. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Junior or senior standing or permission of department.
Orientation to and preparation for doing an internship.

CHFD 5910/7910. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in settings with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

CHFD 5920/7920. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in programs for children under six with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

CHFD 5930/7930. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in human development programs with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

CHFD 5940/7940. Internship in Child and Family Development. 1-12 hours.
Prerequisite: Permission of department.
Supervised professional practice in special needs programs with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

CHFD 5950/7950. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised professional practice in administrative programs with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

CHFD 5960/7960. Internship in Child and Family Development. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: CHFD 5900/7900 and permission of department.
Supervised professional practice in Child Life programs with employed persons with a degree in Child and Family Development or related field.
Non-Traditional Format: Internship.

(CHNS) Chinese

College of Arts and Sciences, Department of Comparative Literature

CHNS 1001. Elementary Chinese I. 4 hours.
Fundamentals of grammar, pronunciation, composition, and conversation.

CHNS 1002. Elementary Chinese II. 4 hours.
Prerequisite: CHNS 1001.
A continuation of Elementary Chinese I.

CHNS 2001. Intermediate Chinese I. 3 hours.
Prerequisite: CHNS 1002.
Intermediate grammar, reading, conversation, and composition.

CHNS 2002. Intermediate Chinese II. 3 hours.
Prerequisite: CHNS 2001 or permission of department.
A continuation of Intermediate Chinese I.

CHNS 3010. Advanced Chinese I. 3 hours.
Prerequisite: CHNS 2002 or permission of department.
Advanced grammar, reading, conversation, and composition.

CHNS 3020. Advanced Chinese II. 3 hours.
Prerequisite: CHNS 3010 or permission of department.
A continuation of Advanced Chinese I.

CHNS 3990. Directed Study in Chinese Language and/or Literature. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent study and research under the direction of individual faculty members.
Non-Traditional Format: Directed study.

(CLAS) Classical Culture

College of Arts and Sciences, Department of Classics

CLAS 1000. Greek Culture. 3 hours.
Not open to students with credit in CLAS 1000H.
The characteristics of Greek literature and culture, taught principally through translations of selections from Greek authors.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CLAS 1000H. Greek Culture (Honors). 3 hours.
Not open to students with credit in CLAS 1000.
Prerequisite: Permission of Honors.
The characteristics of Greek literature and culture, taught principally through translations of selections from Greek authors.

CLAS 1010. Roman Culture. 3 hours.
Not open to students with credit in CLAS 1010H.
The characteristics of Roman literature and culture, taught principally through translations of selections from Roman authors.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CLAS 1010H. Roman Culture (Honors). 3 hours.
Not open to students with credit in CLAS 1010.
Prerequisite: Permission of Honors.
The characteristics of Roman literature and culture, taught principally through translations of selections from Roman authors.

CLAS 1020. Classical Mythology. 3 hours.
Not open to students with credit in CLAS 1020H.
The myths and sagas of the Greeks and Romans, taught in particular through ancient literature.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CLAS 1020H. Classical Mythology (Honors). 3 hours.
Not open to students with credit in CLAS 1020.
Prerequisite: Permission of Honors.
The myths and sagas of the Greeks and Romans, taught in particular through ancient literature.

CLAS 1030. Medical Terminology. 3 hours.
Medical terminology derived from Greek and Latin, concentrating on the meanings of the components of medical terms and the principles that govern their arrangement, with some attention to the history of ancient medicine.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CLAS(ANTH) 2000. Introduction to Classical Archaeology. 3 hours.
Concepts and principles of archaeology, including site formation, survey and excavation techniques, artifact retrieval and analysis, chronology, archaeological theory, and contemporary issues such as "ownership" of the past; focus on sites from Greek and Roman antiquity.

CLAS (LING) 2010. The Nature of the English Vocabulary. 3 hours.
The nature and composition of the English vocabulary, with particular attention to Greek and Latin elements, and its development among diverse cultures and societies; techniques of morphological analysis, allomorphy, derivational morphology, formal and semantic change, and Indo-European etymology.

(CLAS) HIST 3310. Ancient History. 3 hours.
The political and economic world from the Stone Age to the end of the Western Roman Empire in 476 A.D.

(CLAS) HIST 3321. History of Women in the Ancient World. 3 hours.
The history of women in many of the ancient civilizations of the Mediterranean and Middle East. The social, religious, and political roles played by women of different classes within the patriarchal framework of these societies. Emphasis will be placed on the reading and discussion of primary sources.

CLAS 4010/6010. Archaic Greece. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1020 or HIST 3250 or HIST 4311/6311 or permission of department.
The expanding world of Greek culture in the period from 750 to 480 BC, including consideration of the many new and influential developments in art, literature, history, political science, and philosophy, and their interrelationships.

CLAS 4020/6020. Greek Sanctuaries and Festivals. 3 hours.
Prerequisite: CLAS 1000 or HIST 3250 or HIST 3310 or HIST 4311/6311 or HIST 4312/6312 or permission of department.
The major Greek sanctuaries and their physical remains, and the Greek religious calendar and its important festivals, including the Olympic Games and the Panathanaia.

CLAS 4030/6030. The Archaeology of the Greek Colonies. 3 hours.
Prerequisite: CLAS 1000 or HIST 2301 or HIST 3250 or HIST 4311/6311 or HIST 4312/6312 or ARST 2310 or permission of department.
The archaeology of the Greek colonies in Ionia, Magna Graecia, and the Black Sea area is examined to identify and explain the combination of Greek and indigenous cultures in these areas on the fringes of the Greek world.

CLAS 4040/6040. The Hellenistic World. 3 hours.
Prerequisite: CLAS 1000 or HIST 3250 or HIST 4311/6311 or HIST 4321/6321 or HIST 4322/6322 or permission of department.
Archaeology, art, culture, and history of Greece and the East from the rise of Alexander to Rome's annexation of Egypt.

CLAS 4100/6100. Ancient Cities of Greece and Rome. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or permission of department.
Selected Greek and Roman cities and their architecture; principles upon which they are planned and laid out. Theories of Hippodamus and others, and the writings of Vitruvius. Detailed study of the topography of Athens and Rome.

CLAS 4110/6110. The Etruscans and Early Rome. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or permission of department.
The art and culture of the people of Northern Italy known as the Etruscans, with special attention to their relationship with the Greek world and their role in the development of Rome as a city.

CLAS 4120/6120. Pompeii and Herculaneum: The Buried Cities. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or permission of department.
Pompeii, Herculaneum, and the area destroyed by the eruption of Mt. Vesuvius. Concentration will be on political, social, religious, and economic life, combined with a study of the painting, sculpture, and architecture of the excavated cities and villas.

CLAS 4130/6130. The Archaeology of Rome's Provinces. 3 hours.
Prerequisite: CLAS 1010 or CLAS(ANTH) 2000 or permission of department.
The archaeology of the Western and/or Eastern provinces of the Roman Empire, concentrating on the major cities and sanctuaries and their physical remains.

CLAS 4140/6140. Archaeology of Punic and Roman Carthage. 3 hours.
Prerequisite: CLAS 1000 or CLAS(ANTH) 2000 or permission of department.
Corequisite: CLAS 4150/6150.
The civilization of Roman North Africa from the Punic period through the Arab Conquest, using the important city of Carthage as a model.
Non-Traditional Format: Open only to students participating in the University's Carthage excavation.

CLAS 4150/6150. Practicum in Classical Archaeology. 3 hours.
Prerequisite: CLAS 1010 or CLAS(ANTH) 2000 or permission of department.
Corequisite: CLAS 4140/6140.
All aspects of modern field archaeology on a classical site, including excavation techniques, the keeping of field records, and the classification and conservation of finds from the moment of recovery to their final disposition in museums.
Non-Traditional Format: Open only to students participating in the University's Carthage excavation.

CLAS 4200/6200. Ancient Comedy. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.
Ancient comedy in English translation, concentrating on fifth-century Athens, and tracing its changing focus through Menander to Plautus and Terence; also considered will be the theoretical basis of comedy as discussed by Aristotle and others, as well as the place of comedy within the history of genres.

CLAS 4210/6210. Ancient Tragedy. 3 hours.
Prerequisite: Permission of department.
The conventions of classical tragedy as exemplified in the plays (in English translation) of the Greek dramatists Aeschylus, Sophocles, and Euripides, as well as the Roman tragedian Seneca.

CLAS 4220/6220. Roman Epic Poetry. 3 hours.
Prerequisite: CLAS 1010 or HIST 3250 or HIST 4321/6321 or HIST 4322/6322 or permission of department.
The epic poetry of ancient Rome with special emphasis on Ennius, Vergil, and Lucan. The historical background of epic will be examined and the poems will be read in English translation, some attention being given to Renaissance and modern translations.

CLAS 4230/6230. Classical Rhetoric. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or SPCM 1100.
Classical rhetoric, with special attention to Plato, Aristotle, and Cicero.

CLAS 4240/6240. Theory and Analysis of Classical Mythology. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.

The interpretation and analysis of ancient myths, particularly those of Greece and Rome.

CLAS 4250/6250. Ancient Novel. 3 hours.
Prerequisite: CLAS 1000 or CLAS 1010 or CLAS 1020 or permission of department.
Ancient prose fiction (in English translation), including the Latin novels of Petronius and Apuleius and examples of the Greek novel. Topics include the relationship between the novel and other literary genres, the social and intellectual background of the authors, the themes of love, travel, and magic, and the novel's audience. Course may be taken through UGA Studies Abroad program in Classics in Rome.

CLAS 4300/6300. Selected Topics in Ancient Civilization. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: CLAS 1000 or CLAS 1010 or permission of department.
Special topics in the civilization of Greece and Rome. Topics will vary as demand requires.

CLAS 4310. Directed Readings in Classical Culture. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Individual study, reading, or projects under the direction of a faculty project director.
Non-Traditional Format: Directed study.

(CLAS) HIST 4311/6311. Greek History. 3 hours.
Greek history to the time of Alexander the Great.

(CLAS) HIST 4312/6312. The Hellenistic World. 3 hours.
Problems in Hellenistic history from 330 B.C. to the Roman conquest with emphasis on the Antigonid, Seleucid, and Ptolemaic dynasties.

(CLAS) HIST 4321/6321. The Roman Republic. 3 hours.
Roman history to the end of the republic.

(CLAS) HIST 4322/6322. The Roman Empire. 3 hours.
History of the Roman Empire from 27 B.C. to A.D. 337 with special emphasis on the government of Augustus, reasons for its decline, and the final attempt at unification of the empire under Constantine.

(CLAS) LING 4610/6610. Sanskrit I. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The phonology, morphology, and syntax of the classical Sanskrit language, emphasizing the position of Sanskrit within the Indo-European language family and its importance for Indo-European linguistics.

(CLAS) LING 4620/6620. Sanskrit II. 3 hours.
Prerequisite: LING(CLAS) 4610/6610.
Continued studies in both the synchronic and diachronic grammar of classical Sanskrit.

CLAS 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the supervision of a project director.
Non-Traditional Format: Directed study.

CLAS 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the supervision of a project director.
Non-Traditional Format: Directed study.

CLAS 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the supervision of a project director.
Non-Traditional Format: Directed study.

CLAS 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or a closely related field.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

(CMLT) Comparative Literature

College of Arts and Sciences, Department of Comparative Literature

(CMLT)HONS 2010H. Honors Humanities. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of Honors.
Concepts integrating literature and the fine arts through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion sections will include writing and critiquing papers, and student presentations. May be offered daily during May session, or as part of a Study Abroad program.

(CMLT)HONS 2020H. Honors Humanities. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of Honors.
Concepts integrating literature and the fine arts through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and students presentations

(CMLT)GEOG(ANTH)(HIST)(SOCI) 2100. Introduction to Africa. 3 hours.
The history, physical environment (landforms, vegeta-

tion, and climate), and sociocultural environment (artistic, political, and social development) of Africa.

CMLT 2111. World Literature I. 3 hours.
Prerequisite: ENGL 1102.
World literature from antiquity to the seventeenth century.

CMLT 2210. Western World Literature I. 3 hours.
Prerequisite: ENGL 1102.
Western World Literature from Homer to the seventeenth century.

CMLT 2212. World Literature II. 3 hours.
World literature from the seventeenth century to the present.

CMLT 2220. Western World Literature II. 3 hours.
Prerequisite: ENGL 1102.
Western World Literature from the seventeenth to twentieth century.

CMLT 2250H. Western World Literature I (Honors). 3 hours.
Not open to students with credit in CMLT 2210.
Prerequisite: ENGL 1102 and permission of Honors.
Western World Literature from Homer to the twentieth century.

CMLT 2260H. Western World Literature II (Honors). 3 hours.
Not open to students with credit in CMLT 2220.
Prerequisite: ENGL 1102 and permission of Honors.
Western World Literature from Homer to the twentieth century.

CMLT 2270H. World Literature I (Honors). 3 hours.
Prerequisite: ENGL 1102 and permission of Honors.
World literature from antiquity to the seventeenth century.

CMLT 2280H. World Literature II (Honors). 3 hours.
Prerequisite: ENGL 1102 and permission of Honors.
World literature from the seventeenth century to present.

CMLT 2400. Asian-American Literature. 3 hours.
Works of literature by Asian-American writers, including works written in English and translations of works originally written in Asian languages.

CMLT 2410H. Asian-American Literature (Honors). 3 hours.
Prerequisite: Permission of Honors.
Works of literature by Asian-American writers, including works written in English and translation of works originally written in Asian languages.

(CMLT)HONS 3010H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the Arts and Humanities to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held during May session as daily seminars.

CMLT 3100. Speculative Fiction. 3 hours.
Prerequisite: ENGL 1102.
Historical and thematic treatment of fictional speculation about scientific matters from the dialogues of Plato to the contemporary science fiction of Vonnegut.

CMLT 3110. Literature of the Self. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ENGL 1102.
Comparative study of the self as presented in literature of the first person (such as lyric poetry and autobiography) with particular emphasis on questions of genre, rhetoric, and poetics.

CMLT 3140. Women Writers. 3 hours.
Prerequisite: ENGL 1102.
World literature represented by women writers from the seventh century B.C. through the seventeenth century A.D.

CMLT 3150. Introduction to Modern African Literature. 3 hours.
Prerequisite: ENGL 1102.
The literature of twentieth-century Africa in translation with emphasis on the African novel.

CMLT 3160. Myth and Oral Tradition. 3 hours.
Prerequisite: ENGL 1102.
A discussion of twentieth-century literary works (emphasis on narrative and drama) dealing with the reinterpretation of ancient classical myths, inclusive of English, American, Italian, French, German, and Russian Literatures.

CMLT 3170. Detective Fiction. 3 hours.
Prerequisite: ENGL 1102.
The evolution of the mystery story in the United States, England, and Europe, based on readings from such masters of the genre as Poe, Doyle, Christie, Simenon, Hammett, Chandler, et al. All readings in English.

CMLT(ANTH) 3180. Introduction to East Asian Cultures. 3 hours.
Cultures of China, Japan, Korea, and Vietnam, with emphasis on the formation of Chinese culture and its diffusion and variation within the other national groups.

CMLT(ANTH) 3190. Myth in Culture. 3 hours.
Literary and anthropological approaches to the study of myth in culture.

CMLT 3200. Contemporary Literature. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ENGL 1102.
Selected works of contemporary world literature, with emphasis on works from Eastern Europe, the Middle East, Asia, Africa, and Latin America.

CMLT 3250. Children's Literature. 3 hours.
Prerequisite: Permission of department.
Selected works written for children from antiquity to the nineteenth century. Special emphasis on historical, cultural, religious, social, and linguistic contexts.

CMLT 3990. Directed Study in Comparative Literature. 3 hours.
Prerequisite: Permission of department.
Independent study and research under the direction of individual faculty members.
Non-Traditional Format: Directed study.

CMLT 4010. Approaches in Comparative Literature. 3 hours.
Prerequisite: Permission of department.
The methods and literary theories encompassed by the discipline of Comparative Literature.

(CMLT)HONS 4010H. Special Problems Seminar in Humanities. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the Humanities which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

CMLT 4020. Senior Seminar in Comparative Literature. 3 hours.
The capstone course for the undergraduate major in comparative literature, focusing on a particular theme, methodology, theory or problem.

(CMLT)HONS 4020H. Special Problems Seminar in Humanities. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the Humanities which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

CMLT 4050/6050. Literature and Ideas of Nature. 3 hours. Repeatable for maximum 6 hours credit.
Literary and philosophical texts of various historical periods that trace changes in how human beings understand their non-human environment.

CMLT 4070/6070. Renaissance European Literature. 3 hours.
Literature of Western Europe (Italian, French, Spanish, Germanic, and English) 1450-1600, with emphasis on literary types and prevailing ideas.

CMLT 4080/6080. Romantic European Literature. 3 hours.
The rise and development of Romanticism in the eighteenth and nineteenth centuries, with reading of selected literature and criticism.

CMLT 4090/6090. Poetry. 3 hours.
Lyric poetry from the mid-nineteenth century to the present.

CMLT 4100/6100. Mannerist and Baroque Literature. 3 hours.
Literary forms and issues in Europe ca. 1550-1700, with special attention to the intellectual background and the interrelationships between literature and other arts and sciences.

CMLT 4110/6110. Medieval European Literature. 3 hours.
The literatures of medieval Europe with emphasis on major literary genres and the philosophical and social presuppositions which inform them.

CMLT 4120/6120. Eighteenth-Century European Literature. 3 hours.
The literature of England, France, and Germany in the eighteenth century, with emphasis on literary types and prevailing ideas.

CMLT 4150/6150. The Novel. 3 hours.
The novel as a genre. Origins of prose fiction, theory of the novel, and representative readings of novels from the sixteenth through the twentieth centuries will be included.

CMLT 4200/6200. Literature and the Visual Arts. 3 hours.
Formal, philosophical, and thematic relationships between literature and one or more of the visual arts in a given period.

CMLT 4210/6210. Literature and Cinema. 3 hours. Repeatable for maximum 6 hours credit.
Formal, philosophical, and thematic relationships between literature and cinema.

CMLT 4220/6220. East Asian Cinema. 3 hours.
A survey of major works of East Asian cinema from literary, historical, cultural, and interdisciplinary perspectives.

CMLT 4250/6250. Drama. 3 hours.
Drama as a genre from its beginnings to the present.

CMLT 4300/6300. Modernism and Postmodernism. 3 hours.
Modernism and postmodernism as literary movements, with reading of selected literature and criticism.

CMLT 4350/6350. Nineteenth-Century Literature. 3 hours.
Readings in major writers and works of nineteenth-century European and world literature

CMLT 4400/6400. East Central European Literature and Culture. 3 hours.
The works of major modern East Central European writers, with some attention to representative cinema.

CMLT 4510/6510. Literature and Music. 3 hours.
The forms, relationships, and aesthetics of music and literature.

CMLT 4600/6600. Survey of East Asian Literature I. 3 hours.
Poetry, prose, and drama in traditional China and Japan. The works will be in English translation.

CMLT 4610/6610. Survey of East Asian Literature II. 3 hours.
Poetry, prose, and drama in China and Japan from the nineteenth and twentieth centuries. The works will be in English translation.

CMLT 4620/6620. East Asian Novel. 3 hours.
The major/minor novelists and their works, especially those of the nineteenth and twentieth centuries. The novels are in English translation.

(CMLT)LING 4740/6740. Discourse Analysis. 3 hours.
Prerequisite: LING 2100 or permission of department.
An interdisciplinary study of language use, text analysis, and evaluation. The course will provide students with the ability to investigate and evaluate structural features of language and to identify the strategies used by different writers based on style and cultural backgrounds.

(CMLT)LING 4870/6870. Language, Gender, and Culture. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The role of language and culture in the formation of philosophical assumptions about gender differentiation in society.

CMLT 4880/6880. Survey of African Literature I. 3 hours.
African literature from its ancient oral traditions to the European colonial period based on works of African authors written in English and English translations of the African works.

CMLT 4890/6890. Survey of African Literature II. 3 hours.
African literature since the independence of the African people from European colonial rule.

CMLT 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.

CMLT 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.

CMLT 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field under the guidance of a project director.

(CMSD) Communication Sciences and Disorders

College of Education, Department of Communication Sciences and Disorders

CMSD 4000. Special Problems in Communication Sciences and Disorders. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Adaptation of the Communication Sciences and Disorders curriculum to meet students' individual needs: supervised or directed reading, research, or clinical experiences.
Non-Traditional Format: Students work independently under the direction of a faculty member. Meetings between students and supervising faculty are arranged independently.

CMSD 4090/6090. Introduction to Phonetics. 2 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Identification, discrimination, and IPA transcription of segmental and supra-segmental elements of American English. Emphasis on branches of phonetics; classification schemes; narrow transcription of variants associated with regional dialects, speech disorders, and non-native pronunciations; dialects as manifestations of cultural diversity.

CMSD(LING) 4120/6120. Anatomy and Physiology of Speech, Voice, and Hearing. 3 hours.
Prerequisite: Permission of department.
Anatomical structures and basic physiological functions underlying audition, respiration, phonation, articulation, resonance, and swallowing.

CMSD 4130/6130. Language Science. 3 hours.
Prerequisite: Permission of department.
Components and structures of language, including analysis of sentences. Language variation and bilingualism.

CMSD(LING) 4140/6140. Introduction to Speech and Voice Science. 3 hours.
Prerequisite: CMSD 4090/6090 and CMSD(LING) 4120/6120 and PSYC 1101 and (MATH 1101 or PHYS 1010 or permission of department).
Application of basic physical principles to production and perception of speech and voice. Biomechanics of vocal fold oscillation; acoustics of voice source; reso-

nance; acoustic phonetics; psychoacoustics of speech and voice. Interpretation of objective measures and outputs of computational models.

CMSD 4150/6150. Hearing Science. 3 hours.
Prerequisite: CMSD(LING) 4120/6120 or permission of department.
Physics of sound and the physiological and psychological bases of auditory function.

CMSD 4160/6160. Intermediate Speech and Voice Science: Clinical Applications. 3 hours.
Prerequisite: (CMSD(LING) 4140/6140 and CMSD 4150/6150 and CMSD 4530 and CMSD 6600) or permission of department.
Application of recent theory and objective measurement techniques to assessment and intervention in speech pathology. Readings include research articles in the "sciences" of speech and voice. Informal laboratory demonstrations and hands-on activities as class size permits. Designed for beginning master's level speech-language pathology majors on a non-thesis track.

CMSD(LING) 4500/6500. Study of Language Development. 3 hours.
Prerequisite: CMSD 4130/6130 or permission of department.
Normal development of children's reception, integration, and expression of linguistic information; cultural, gender, socioeconomic, cognitive, and prelinguistic influences on language development.

CMSD 4520. Language Disorders of Children. 3 hours.
Prerequisite: CMSD(LING) 4500/6500 or permission of department.
Etiology and pragmatic, semantic, syntactic, and morphologic characteristics of children's language disorders; emphasis on various exceptional populations. Field observations and analyses of children with language disorders.

CMSD 4530. Speech Disorders. 3 hours.
Prerequisite: CMSD(LING) 4140/6140 or permission of department.
Etiology and characteristics of articulation, phonological, voice, fluency, and acquired motor speech disorders. Field observations of children or adults with speech disorders.

CMSD 4710. Introduction to Audiology. 3 hours.
Prerequisite: (CMSD(LING) 4120/6120 and CMSD 4150/6150) or permission of department.
Applying the basic physics of sound to the measurement of hearing; introduction to the pathologies of hearing; hearing loss associated with pathologies; medical and/or rehabilitation strategies.

CMSD 4730/6730. Psychosocial Characteristics of Deafness. 3 hours.
Prerequisite: CMSD 4710 or permission of department.
Development, adjustment, and educational needs of deaf individuals. Cognitive, personality, and socioemotional development; aptitudes, special abilities, and cultural perspectives.

CMSD 4810/6810. Basic Sign Language. 3 hours.
Prerequisite: Permission of department.
History and description of sign language systems. Practice in expressive and receptive use of sign language and finger spelling.

CMSD 5000. Basic Clinical Procedures in Communication Sciences and Disorders. 1 hour. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: (CMSD 4520 and CMSD 4530) or permission of department.
Principles of professional clinical practice: following administrative case procedures, writing clinical reports, developing treatment plans. Assigned observations in the University of Georgia Speech and Hearing Clinic.

CMSD 5790/7790. Rehabilitative Audiology. 3 hours.
Prerequisite: CMSD 4710 and permission of department.
Theories and procedures used in the rehabilitation of children and adults with hearing loss.

(CRSS) Crop and Soil Sciences

College of Agricultural and Environmental Sciences, Department of Crop and Soil Sciences

CRSS 2010-2010L. Introduction to Crops. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L or BTNY 1220-1220L.
Crop species and world centers of production; origin of crops, their uses and climatological requirements for growth, classification, morphology, reproduction, growth, and improvement.

CRSS 2830. Introduction to Turfgrass Management. 1 hour.
Turfgrasses and their management. Emphasis will be placed on how turfgrasses are used in society. Guest speakers from the turfgrass industry (golf course, sports fields, lawn care, etc.) who will discuss management systems and career opportunities.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CRSS 3050-3050L. Principles of Soil Science. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in CRSS(FORS) 3060-3060L.
Prerequisite: CHEM 1212 and CHEM 1212L.

Soil formation; physical, chemical, and biological properties of soils; commercial fertilizers, lime, and organic matter; and soil management practices.

CRSS(FORS) 3060-3060L. Soils and Hydrology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in CRSS 3050-3050L.
Prerequisite: CHEM 1212 and CHEM 1212L.
Soil formation and morphology, physical and chemical properties, soil-water interactions, hydrologic processes and water balance in the landscape, and soil and water quality. Emphasis on landscape management of soil and water resources for both productivity and environmental quality.

CRSS 3270-3270L. Principles of Turfgrass Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1107-1107L or BTNY 1210-1210L.
Turfgrass management practices and systems. Species selection, establishment, irrigation, mowing, fertilization, cultivation, as well as weed, insect, and disease control. Discussions will include the benefits of turfgrasses to society and various environmental issues impacting the turfgrass industry.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

CRSS 3300. Physiology of Crop Growth and Development. 3 hours.
Prerequisite: CRSS 2010-2010L or permission of department.
Physiological development of crops from seed metabolism through fruit ripening. Growth of crop communities and physiological changes that occur as a result of abiotic stress.

CRSS(ENTO)(PATH) 3500. Turfgrass Pest Management. 3 hours.
Prerequisite: CRSS 2830 or CRSS 3270-3270L.
Identification and control of turfgrass weeds, insects, and diseases. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests.

CRSS 3910. Crop and Soil Science Internship. 1-3 hours.
Prerequisite: Permission of department.
Provides experiences which include pastures and turf, plant breeding and genetics, weed science, soil chemistry and fertility, soil physics, soil biology, soil conservation and morphology.
Non-Traditional Format: This course provides students credit for internship experience. The credit hours available are variable contingent on the intensity of the internship experience.

CRSS 3990. Special Problems in Crop and Soil Sciences. 1-3 hours.
Research on problems in crop, soil, or turfgrass management area to be conducted in laboratory, field or library; report required, directed by crop and soil science staff.
Non-Traditional Format: This course will provide student credit for conducting a research problem under the direction of a faculty member in Crop and Soil Sciences. Credit is variable dependent upon the scope of the research project.

CRSS 4040/6040. Plant Breeding. 3 hours.
Prerequisite: PGEN 3580-3580L or permission of major.
Fundamental principles and theories utilized in the science of plant breeding and cultivar development and the role breeding plays in crop improvement.

CRSS 4090. Advanced Turfgrass Science. 2 hours.
Prerequisite: CRSS 2830 or CRSS 3500-3270L or permission of major.
The effects of the environment on turfgrass growth and quality management strategies for overcoming high and low temperature stress, as well as light and water deficits. Other topics include soil modification, golf green construction, developing fertilization programs, and discussions of various pesticide/environmental issues.

CRSS 4220/6220. Topics in Crop and Soil Sciences. 1-3 hours. Repeatable for maximum 12 hours credit.
Topics and methods in Crop and Soil Sciences with a different timely topic each semester, including new areas of inquiry in crop and soil sciences.
Non-Traditional Format: This course provides students with exposure to evolving areas of crop and soil sciences. Credit hours are variable based upon topic covered in a particular semester.

(CRSS)ENTO 4250/6250-4250L/6250L. Pesticide Management and Utilization. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L and [(CHEM 2100 and CHEM 2100L) or (CHEM 2211 and CHEM 2211L)].
Practical management and utilization of pesticides in urban and agricultural environments. Subject areas include classification of insecticides, herbicides, and fungicides, etc., their general chemical and toxicological properties, deployment philosophy, hazards and environmental impact, formulation and application, safety and disposal, and management of pesticide resistance.

CRSS 4260/6260. Forage Management and Utilization. 3 hours.
Prerequisite: CRSS 2010-2010L or permission of department.
Characteristics of forage species; establishment, physiology, and morphology effects on management; forage quality and utilization by livestock; grazing management; hay and silage; forages for wildlife and conservation.

CRSS 4270. Crop and Soil Science Seminar. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Junior standing or senior standing.
Seminar in topics related to crops and soils. Participation required for credit.

CRSS 4300/6300. Crop Production and Management. 3 hours.
Prerequisite: (CRSS 3050-3050L and CRSS 3300) or permission of department.
Conventional and alternative crop management systems, principles, and practices of crop science are used in discussion of management problems related to agronomic crops grown in Georgia.

CRSS 4340/6340. Weed Science. 3 hours.
Prerequisite: (BIOL 1107-1107L and CHEM 1211 and CHEM 1211L) or permission of department.
Fundamentals of weed biology; cultural and chemical weed control; properties and uses of herbicides and herbicide application equipment; and current systems for weed management in cropping programs.

CRSS 4340L/6340L. Weed Science Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Corequisite: CRSS 4340/6340.
Weed identification; symptomology of herbicide action; calibration of herbicide application equipment.

CRSS 4370/6370. Heavy Metals in the Environment. 1 hour.
Prerequisite: [CHEM 1212 and CHEM 1212L and (CRSS 3050-3050L or CRSS(FORS)3060-3060L)] or permission of major.
The natural level and sources of, and human activity affecting, the heavy metal composition of soils and plants, and their potential hazards to plant life and introduction into the food chain.

CRSS 4400/6400. Crop Ecology. 3 hours.
Prerequisite: CRSS 2010-2010L or BTNY 1210-1210L or permission of major.
World population growth and food production problems; origin, distribution, and adaptation of tropical, subtropical, and temperate crop plants as influenced by environment with emphasis on climatic factors.

(CRSS)BTNY(BIOL) 4500/6500. Introduction to Gene Technology. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Methods and applications of gene technology (recombinant DNA) and related concepts in molecular biology. These will include structure and synthesis of macromolecules; cDNA and genomic cloning, polymerase chain reaction; molecular markers and mapping; gene isolation strategies; and various host-vector systems.

CRSS 4510. Contaminants in Soils. 3 hours.
Prerequisite: [CRSS 4600/6600-4600L/6600L and CRSS(MIBO)4610/6610-4610L/6610L and CRSS 4670/6670] or permission of major.
Fate and transport of contaminants; monitoring and remediation of pollution; sources, extent, and characteristics of pollution; risk assessment and management.

CRSS 4520/6520. Field Soil and Site Assessment. 3 hours.
Prerequisite: (CRSS 4540/6540-4540L/6540L and CRSS 4600/6600-4600L/6600L) or permission of department.
How to assess a site to determine if the soil places any limitations on land use. Topics covered include soil sampling, soil landscapes, wetland and hydric soils, septic systems, and land application of waste.

CRSS 4540/6540-4540L/6540L. Pedology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L or permission of department.
Soils as a natural component of the ecosystem, including morphology, landscape distribution, formation, identification of diagnostic horizons and features, and classification.
Non-Traditional Format: A one-day trip to North Georgia and a two-day trip to the Coastal Plain will be required at student's expense.

CRSS 4590/6590-4590L/6590L. Soil Fertility. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS)3060-3060L or permission of major.
Soil conditions affecting availability of plant nutrients; methods of determining soil fertility and insufficiency of plant nutrients in soils, and interpretation of chemical and biological measurements as related to fertility maintenance and good soil management.

CRSS 4600/6600-4600L/6600L. Soil Physics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: [(CRSS 3050-3050L or CRSS(FORS) 3060-3060L) and MATH 2200 and MATH 2200L and (PHYS 1111-1111L or PHYS 1211-1211L)] or permission of major.
Physical properties and process of soils. Water, heat, and solute movement in soils.

CRSS(MIBO) 4610/6610-4610L/6610L. Soil Microbiology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Microorganisms in soil and their effect on nutrient recycling, especially as it relates to environmental quality and crop production.

CRSS 4660/6660-4660L/6660L. Chemical Analysis of Environmental Samples. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 2300 and CHEM 2300L.
Analysis of soils, sediment, rocks, water for important organic and inorganic contaminants. Chromatography, atomic adsorption, and plasma emission spectroscopy.

field sampling and measurements. Quality assurance/ quality control, data reporting, computer use in analysis.

CRSS 4670/6670. Environmental Soil Chemistry. 3 hours.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L or permission of department.
Environmental soil chemistry applies and extends the concepts of chemistry and physics to the investigation of problems related to the physical, chemical, and biological characteristics of soil and their importance in relation to the management of contaminants, pesticides, and production inputs.

CRSS 4670L/6670L. Environmental Soil Chemistry Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: (CRSS 3050-3050L or CRSS(FORS) 3060-3060L) and CHEM 2300 and CHEM 2300L.
Corequisite: CRSS 4670/6670.
Laboratory evaluation of soil chemical properties.

CRSS(HORT)(ANTH) 4930/6930. Agriculture and Ecology in Tropical America Field Trip. 3 hours. Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4920/6920.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country.
Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

CRSS(HORT)(ANTH) 4940/6940. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

(CSCI) Computer Science

College of Arts and Sciences, Department of Computer Science

CSCI 1100-1100L. Introduction to Personal Computing. 3 hours. 2 hours lecture and 2 lab periods of 1 hour each per week.
Computer technology as currently used in universities, businesses, and homes. This course covers fundamental hardware, software, and networking concepts, plus the social, economic, and legal impact of information systems. Hands-on laboratory exercises cover advanced document preparation, mathematical modeling, and multimedia. Networks and the internet are emphasized throughout.

CSCI 1210. Introduction to Computational Science. 3 hours.
The use of computer models of scientific systems with examples from physical, social, medical, biological, economic, and ecological systems.

CSCI 1301-1301L. Introduction to Computing and Programming. 4 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: MATH 1113.
Algorithms, programs, and computing systems. Fundamental techniques of program development and supportive software tools. Programming projects and applications in a structured computer language. Hands-on experience using microcomputers.

CSCI 1302. Software Development. 4 hours.
Prerequisite: CSCI 1301-1301L.
Software development techniques in an object-oriented computer language. An intermediate programming course emphasizing systems methods, top-down design, testing, modularity, and structured techniques. Applications from areas of numeric and non-numeric processing and data structures.

CSCI 1710-1710L. Introduction to Computer Science and Computer Systems. 4 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: CSCI 1301-1301L.
The basics of computer hardware and systems from the viewpoint of a potential computer science major. The associated laboratory uses the personal computer as a case study for computer architecture and operating systems. Students study and become familiar with the machine and its operating system by writing programs in a low-level (assembler) language.

(CSCI)WMST 2040-2040L. Gender and Computing: Information Systems Design. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Computers and the internet as tools of knowledge to empower the user. Issues raised will be from gender and technology literature. Laboratory sessions will provide hands-on experience with information systems design and computer programming culminating in the creation of a community-based information system.

CSCI(MATH) 2610. Discrete Mathematics for Computer Science. 4 hours.
Prerequisite: CSCI 1301-1301L.
The fundamental mathematical tools used in computer science: sets, relations, and functions; propositional logic, predicate logic, and inductive proofs; summations, recurrences, and elementary asymptotics; counting and discrete probability; undirected and directed graphs; introductory linear algebra, with applications in computer science.

CSCI 2670. Introduction to Theory of Computing. 4 hours.
Prerequisite: CSCI(MATH) 2610.
The theory of computing, including finite automata, regular expressions and languages, context-free grammars and languages, push-down automata, pumping lemmas, the Chomsky hierarchy of language classes, Turing machines and computability, undecidability of the halting problem, reducibilities among decision problems and languages, time and space complexity, and NP-completeness and tractability.

CSCI 2720. Data Structures. 4 hours.
Prerequisite: CSCI 1302 and CSCI(MATH) 2610.
The design, analysis, implementation, and evaluation of the fundamental structures for representing and manipulating data: lists, arrays, trees, tables, heaps, graphs, and their memory management.

CSCI 4050/6050. Software Engineering. 4 hours.
Prerequisite: CSCI 2720.
Full cycle of a software system development effort, including requirements definition, system analysis, design, implementation, and testing. Special emphasis is placed on system analysis and design. The design phase includes development of a user interface. A large term project incorporates the full software life cycle.

CSCI 4140/6140. Numerical Methods and Computing. 4 hours.
Prerequisite: CSCI 1302 and MATH 2210 and MATH 2210L.
Prerequisite or corequisite: MATH 3000.
Numerical methods and computing. Topics include: computer arithmetic; numerical solutions of nonlinear equations; polynomial interpolation; numerical differentiation and integration; numerical solutions of systems of linear equations, initial and boundary value problems, systems of ordinary differential equations, spline functions, and the method of least squares.

CSCI 4210/6210. Simulation and Modeling. 4 hours.
Prerequisite: CSCI 2720.
The modeling and simulation of existing or planned systems for the purpose of studying their correctness, reliability, or performance. Topics to be addressed include discrete-event simulation, continuous simulation, analysis and modeling methodologies, animation, virtual reality, and Web-based simulation.

CSCI 4350/6350. Global Information Systems. 4 hours.
Prerequisite: CSCI 4370/6370 or CSCI 4570/6570.
Provides intermediate to advanced understanding of the use of Internet, World Wide Web, and network computing (including Java) technologies for management (search, access, integration, presentation) of multimedia information. Topics discussed include key techniques, tools and technologies for creating such systems, developing novel applications, and their impact on business.

CSCI 4370/6370. Database Management. 4 hours.
Prerequisite: CSCI 2720.
The theory and practice of database management. Topics to be covered include efficient file access techniques, the relational data model as well as other data models, query languages, database design using entity-relationship diagrams and normalization theory, query optimization, and transaction processing.

CSCI 4470/6470. Algorithms. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Algorithms, covering basic analysis techniques, basic design techniques (divide-and-conquer, dynamic programming, greedy, and branch-and-bound), basic graph algorithms, and NP-completeness.

CSCI 4490/6490. Algorithms for Computational Biology. 4 hours.
Prerequisite: CSCI 4470/6470 or permission of department.
Application of discrete algorithms to computational problems in molecular biology. Topics are drawn from such areas as classical sequence comparison, multiple sequence alignment, DNA sequence assembly, DNA physical mapping, genome rearrangement, evolutionary tree construction, and protein folding. Background in molecular biology is not required.

CSCI 4500/6500. Programming Languages. 4 hours.
Prerequisite: CSCI 1302.
Prerequisite or corequisite: CSCI 2720.
Several modern programming languages and the paradigm — procedural programming, object-oriented programming, functional programming, and logic programming — that each strives to accommodate. Projects involve at least three languages.

CSCI 4520/6520. Functional Programming. 4 hours.
Prerequisite: CSCI 2720 and CSCI(MATH) 2610.
The functional programming paradigm: functions and types, type inference and polymorphism, higher order functions and recursion, evaluation strategies, abstract data types and modules, lists, trees, and lazy data structures, reasoning about functional programs.

CSCI(ARTI) 4540/6540. Symbolic Programming. 3 hours.
Prerequisite: CSCI 1302 or permission of department.
Prerequisite or corequisite: CSCI(PHIL) 4550/6550.
Programming in LISP and PROLOG, with emphasis on artificial intelligence techniques. Other languages used for artificial intelligence work will be presented more briefly.

CSCI(PHIL) 4550/6550. Artificial Intelligence. 3 hours.
Prerequisite: CSCI 1302 or [PHIL 2500 and (PHIL 3010 or PHIL 3020 or PHIL 3610)] or permission of department.
Prerequisite or corequisite: CSCI(ARTI) 4540/6540.
The artificial intelligence approach to modeling cogni-

tive processes. Topics include an introduction to heuristic methods, problem representation and search methods, classic AI techniques, and a review of the controversial issues of the AI paradigm of cognition as computation.

CSCI 4570/6570. Compilers. 4 hours.
Prerequisite: CSCI 4720/6720.
Design and implementation of compilers for high-level programming languages. Topics include all phases of a typical compiler, including scanning, parsing, semantic analysis, intermediate code generation, code optimization, and code generation. Students design and develop a compiler for a small programming language. Emphasis is placed on using compiler development tools.

(CSCI)MATH 4630/6630. Mathematical Analysis of Computer Algorithms. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Discrete algorithms (number-theoretic, graph-theoretic, combinatorial, and algebraic) with an emphasis on techniques for their mathematical analysis.

(CSCI)MATH 4670/6670. Combinatorics. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Basic counting principles: permutations, combinations, probability, occupancy problems, and binomial coefficients. More sophisticated methods include generating functions, recurrence relations, inclusion/exclusion principle, and the pigeonhole principle. Additional topics include asymptotic enumeration, Polya counting theory, combinatorial designs, coding theory, and combinatorial optimization.

(CSCI)MATH 4690/6690. Graph Theory. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Elementary theory of graphs and digraphs. Topics include connectivity, reconstruction, trees, Euler's problem, hamiltonicity, network flows, planarity, node and edge colorings, tournaments, matchings, and extremal graphs. A number of algorithms and applications are included.

CSCI 4720/6720. Computer Architecture and Organization. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Structure and function of modern computing systems. Topics studied include combinational and sequential logic, number systems and computer arithmetic, hardware design and organization of CPU, I/O systems and memory systems, instruction set and assembly language design, and current trends and developments in computer architecture and organization.

CSCI 4730/6730. Operating Systems. 4 hours.
Prerequisite: CSCI 4720/6720.
Coverage of the key concepts in modern operating systems. Specific topics include process management, synchronization mechanisms, scheduling strategies, deadlock detection/avoidance, memory management, file systems, protection and security, and distributed systems. Concepts will be reinforced through programming projects using a realistic operating system.

CSCI 4760/6760. Computer Networks: Technology and Applications. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
In-depth coverage of computer networks, including: digital data transmission and encoding, layered protocol models, Internet protocol, Internet client-server software, and network design methodology. Topics also include discussion of recent network technologies, legal, corporate and public-interest aspects and case studies involving public and private enterprises.

CSCI 4810/6810. Computer Graphics. 4 hours.
Prerequisite: CSCI 2720 and CSCI 2670.
Principles of two-dimensional and three-dimensional interactive raster graphics. Principles of scan conversion algorithms for two-dimensional and three-dimensional graphics primitives; data structures and modeling techniques for raster graphics; interaction, visual realism, animation and user interface design; ray tracing, illumination, shading, data storage/retrieval, software engineering and parallel computing for graphics.

CSCI 4900/6900. Special Topics in Computer Science. 1-4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Various advanced topics in Computer Science.

CSCI 4950/6950. Directed Study in Computer Science. 1-4 hours. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Content will vary in response to the interests, needs, and capability of the students and faculty involved. Individual, guided study in computer science.
Non-Traditional Format: Directed study.

CSCI 5080/7080-5080L/7080L. Personal Computer System Administration. 4 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: CSCI 1100-1100L.
Management of Windows and Macintosh computer systems. Topics covered include configuration, backups, hardware and software troubleshooting, and setting up for Internet access. Hands-on laboratory emphasized.

(DANC) Dance Education

College of Education, Department of Dance Education

DANC 1250. Performance Company I. 1 hour. Repeatable for maximum 2 hours credit. 2 lab periods of 2 hours each per week.
Participation as a dancer in a faculty-choreographed dance piece.

DANC 1605. Modern Dance Foundations. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Foundation training necessary for the development of skill proficiency in modern dance.

DANC 1606. Ballet Foundations. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Foundation training necessary for the development of skill proficiency in ballet.

DANC 1650. Modern Dance I. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
The acquisition and development of technical skills in modern dance. Techniques basic to this dance form plus motional properties as they relate to dance will be emphasized.

DANC 1660. Ballet I. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Designed to build the strength, flexibility, endurance, and control necessary for performance of low intermediate-level ballet barre exercises, adagio sequences, and allegro enchainments. An understanding of proper body mechanics and the French vocabulary for ballet will also be emphasized.

DANC 2000. Production Assignment I. 1 hour. 3 lab periods of 2 hours each per week.
Experience in publicity, graphic design, stage lighting, stage management, and costuming through faculty-supervised and monitored participation as a member of the production crew for three dance concerts sponsored by the department of Dance.

DANC 2010. Dance Appreciation. 3 hours.
All aspects of the dance experience, exploring related roles of the dancer, choreographer and spectator. Historical and critical readings and illustrated lectures will acquaint the student with masterpieces of dance theatre art and develop the student's responsiveness to dance.

DANC 2250. Performance Company II. 1 hour. Repeatable for maximum 2 hours credit. 2 lab periods of 2 hours each per week.
Participation as a dancer in a faculty-choreographed dance piece.

DANC 2300. Dance Improvisation I. 2 hours. 1 hour lecture and 2 lab periods of 1 hour each per week.
Provides the individual an opportunity to explore movement initiated through various sources including internal motivation. Emphasis will be on individual and group interaction within structured and free improvisational situations, all for the purpose of developing the student's creative approach to composing and performing.

DANC 2600. Tap Dance and Rhythmic Analysis. 3 hours.
Fundamentals of rhythm and musical form relevant to the needs of the dance educator, performer, and choreographer. Tap dance will serve as a basis of study.

DANC 2620. World Dance Forms. 1 hour. Repeatable for maximum 3 hours credit. 1 lab period of 2 hours each per week.
Dance forms indigenous to specific regions of the world.

DANC 2630. Methods of Teaching Social Dance. 2 hours. 1 hour lecture and 2 lab periods of 1 hour each per week.
Methods of teaching ballroom, folk, line, and square dance to grades kindergarten through twelve.

DANC 2640. Jazz Dance I. 2 hours. 2 lab periods of 2 hours each per week.
Movement application for improving the technical execution and stylistic definition of jazz dance.

DANC 2650. Modern Dance II. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Intermediate-level course designed to aid the student in continued acquisition and development of technical skills in modern dance. Techniques basic to this dance form plus motional properties as they relate to dance will be emphasized.

DANC 2660. Ballet II. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Designed to build the strength, flexibility, endurance, and control necessary for performance of intermediate-level ballet barre exercises, adagio sequences, and allegro enchainments. An understanding of proper body mechanics and the French vocabulary will also be emphasized.

DANC 2670. Pointe I. 1 hour. 2 lab periods of 1 hour each per week.
Basic vocabulary and skills of classical ballet transferred to dancing on pointe.

DANC 2680. Pas de Deux I. 1 hour. 1 lab period of 2 hours each per week.
Designed to develop the intermediate level dance student's ability to transfer classical ballet skills into partnered pas de deux work.

DANC 2690. Ballroom Dance I. 2 hours. 2 lab periods of 2 hours each per week.
Designed for the student possessing a foundation in social dance. Universally popular ballroom dances from the American style syllabus will be presented at the beginning level.

DANC 2850. Pre-Professional Performance Company I. 1 hour. Repeatable for maximum 2 hours credit. 3 lab periods of 2 hours each per week.
The practice and experience of dancer performance in a dance company. Training and participation in all areas critical to the operation of a dance company, including mainstage performance, touring, and management of all production concerns.

DANC 3000. Production Assignment II. 1 hour. 3 lab periods of 2 hours each per week.
Continued experience in publicity, graphic design, stage lighting, stage management, and costuming through faculty-supervised and monitored participation as a member of the production crew for three dance concerts sponsored by the Department of Dance.

DANC 3200. Teaching Practicum in Dance I. 1 hour. 2 lab periods of 1 hour each per week.
Directed observation and teaching of dance classes preschool through college.

DANC 3210. Teaching Practicum in Dance II. 1 hour. 2 lab periods of 1 hour each per week.
Prerequisite: DANC 3200.
Directed observation and teaching of dance classes preschool through college.

DANC 3250. Performance Company III. 1 hour. Repeatable for maximum 2 hours credit. 2 lab periods of 2 hours each per week.
Participation as a dancer in a faculty-choreographed dance piece.

DANC 3400. Introduction to Dance Composition. 2 hours. 1 hour lecture and 2 lab periods of 1 hour each per week.
The principles of dance composition, with emphasis upon the development of solo, duet, and trio studies.

DANC 3640. Jazz Dance II. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 2640.
Movement applications for improving technical proficiency, performance dynamics, and stylistic clarity. Dance combinations will explore pop, funk, adagio, blues, and Broadway jazz styles.

DANC 3650. Modern Dance III. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 2650.
High intermediate-level course designed to aid the student in continued acquisition and development of technical skills in modern dance. Technique and theory basic to this dance form plus motional properties as they relate to dance will be emphasized.

DANC 3660. Ballet III. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 2660.
Designed to build the strength, flexibility, endurance, and control necessary for performance of high intermediate-level ballet barre exercises, adagio sequences, and allegro enchainments. Pointe work may be included.

DANC 3670. Pointe II. 1 hour. 2 lab periods of 1 hour each per week.
Prerequisite: DANC 2670.
Develops the beginning to intermediate pointe student's ability to transfer to pointe work the vocabulary and skill learned in Ballet II.

DANC 3680. Pas de Deux II. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: DANC 2680.
Designed to develop the advanced-intermediate level dance student's ability to transfer classical ballet skills into partnered pas de deux work.

DANC 3690. Ballroom Dance II. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 2690.
Designed for the student having mastered steps at the beginning level of the American style syllabus. Intermediate level steps and figures will be presented, with proper technique and alignment stressed.

DANC 3700. Dance Pedagogy I. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Designed to introduce the teacher to the skills and activities of creative movement and rhythm for children from nursery school through sixth grade.

DANC 3720. Topics in Multicultural Education I. 2 hours. Repeatable for maximum 4 hours credit. 3 lab periods of 2 hours each per week.
Provides dance performance and production experiences to students through the development and presentation of lecture demonstrations. Through residencies in schools and community centers, the student will become familiar with dance as a tool for multicultural interdisciplinary education.

DANC 3850. Pre-Professional Performance Company II. 1 hour. Repeatable for maximum 2 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DANC 2850.
The continued practice and experience of dance performance in a dance company. Training and participation in all areas critical to the operation of a dance company, including mainstage performance, touring, and management of all production concerns.

DANC 4000. Independent Study in Dance Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Independent study in a selected dance topic.
Non-Traditional Format: Independent study.

DANC 4010. Dance Science and Movement Analysis. 3 hours. 1 hour lecture and 2 lab periods of 1 hour each per week.
Exploration of scientific approaches to dance training and Laban Movement Analysis SM. Emphasis will be placed upon proper training techniques, injury prevention and rehabilitation, and development of the student's ability to describe, record, and analyze movement.

DANC 4020. Theories of Movement. 2 hours. 1 hour lecture and 2 lab periods of 1 hour each per week.
Theoretical and applied principles of human movement embodied in alternative training systems which serve the dancer.

DANC 4030. Classical Ballet Forms. 2 hours.
Technique systems, story-telling devices, and corps work specific to classical ballet.

DANC 4250. Performance Company IV. 1 hour. Repeatable for maximum 2 hours credit. 2 lab periods of 2 hours each per week.
Participation as a dancer in a faculty-choreographed piece.

DANC 4300. Dance Improvisation II. 2 hours. 1 lab period of 2 hours each per week.
Continued exploration of movement initiated through various sources including internal motivation. Students will gain experience in the leading of improvisational structures.

DANC 4400. Dance Composition and Technology Interface. 3 hours. 2 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: DANC 3400.
Dance composition specifically applied to the development of group choreography. Students will explore the role technology plays in dance art of the twenty-first century.

DANC 4500. World Dance History. 3 hours.
Dance as a reflection of culture and as an art form from the times of earliest lineage-based societies to the present. Socio-cultural influence and the contributions of individual artists will be investigated.

DANC 4510. Dance History II. 3 hours.
Prevalent twentieth-century dance forms. Socio-cultural influences and the contributions of individual artists will be investigated.

DANC 4640. Jazz Dance III. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 3640.
Extension of material in Jazz Dance II with technical performance emphasis.

DANC 4650. Modern Dance IV. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 3650.
Advanced-level course designed to aid the student in the continued acquisition and development of technical skills in modern dance. Technique and theory basic to this dance form plus motional properties as they relate to dance will be emphasized.

DANC 4660. Ballet IV. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 3660.
Designed to build the strength, flexibility, endurance, and control necessary for performance of advanced-level ballet barre exercises, adagio sequences, allegro enchainments, and pointe work. Style, perfection, and performance quality will be emphasized.

DANC 4670. Pointe III. 1 hour. 2 lab periods of 1 hour each per week.
Prerequisite: DANC 3670.
Develops the intermediate pointe student's ability to transfer to pointe work the vocabulary and skill learned in Ballet III.

DANC 4680. Pas de Deux III. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: DANC 3680.
Designed to develop the advanced level dance student's ability to transfer classical ballet skills into partnered pas de deux work.

DANC 4690. Ballroom Dance III. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 3690.
Designed for the student having mastered steps and figures at the intermediate level of the American style syllabus. Dances from the international or English style syllabus will be presented with proper technique and alignment stressed.

DANC 4700. Dance Pedagogy II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Content, methods, and materials for dance instruction of the secondary level student. Historical development of dance in education, specific teaching procedures, and assessment are emphasized.

DANC 4720. Topics in Multicultural Education II. 2 hours. Repeatable for maximum 4 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DANC 3720.
Provides enhanced dance performance and production experiences to students through the development and presentation of lecture demonstrations. Through residencies in schools and community centers, the student will become familiar with dance as a tool for multicultural and interdisciplinary education.

DANC 4850. Pre-Professional Performance Company III. 1 hour. Repeatable for maximum 2 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DANC 3850.

The continued practice and experiences of dance performance in a dance company. Training and participation in all areas critical to the operation of a dance company, including mainstage performance, touring, and management of all production concerns.

DANC 4900. Senior Choreographic Project. 2 hours. 2 lab periods of 4 hours each per week.
Fully produced studio presentation of the student's original choreographic piece.

DANC 5460. Student Teaching in Dance Education. 9 hours.
Prerequisite: DANC 3700 and DANC 4700 and permission of department.
Thirteen-week, full-time teaching assignment in a cooperating school.
Non-Traditional Format: Student teaching.

DANC 5650. Modern Dance V. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 4650.
Highly advanced-level course designed to aid the student in the continued acquisition and development of technical skills in modern dance. Technique and theory basic to this dance form plus motional properties as they relate to dance will be emphasized.

DANC 5660. Ballet V. 2 hours. Repeatable for maximum 4 hours credit. 2 lab periods of 2 hours each per week.
Prerequisite: DANC 4660.
Designed to build the strength, flexibility, endurance, and control necessary for performance of highly advanced-level ballet barre exercises, adagio sequences, allegro enchainments, and pointe work. Style, perfection, and performance quality will be emphasized.

DANC 5670. Pointe IV. 1 hour. 2 lab periods of 1 hour each per week.
Prerequisite: DANC 4670.
Develops the advanced pointe student's ability to transfer to pointe work the vocabulary and skills learned in Ballet IV.

DANC 5680. Pas de Deux IV. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: DANC 4680.
Designed to develop the highly advanced level dance student's ability to transfer classical ballet skills into partnered pas de deux work.

DANC 5850. Pre-Professional Performance Company IV. 1 hour. Repeatable for maximum 2 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DANC 4850.
The continued practice and experience of dance performance in a dance company. Training and participation in all areas critical to the operation of a dance company, including mainstage performance, touring, and management of all production concerns.

(DRAM) Drama

College of Arts and Sciences, Department of Drama

DRAM 2000. Appreciation of Dramatic Art. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Aesthetics and craft of the theatrical experience on stage, screen, and television. Discussions and analyses of all aspects of the theatrical arts; critical viewing of performances both in and out of class with written analyses. May not be used for credit towards the drama major.

DRAM 2010. Introduction to Acting. 3 hours. 3 lab periods of 1 hour each per week.
Basic acting skills for the non-drama major.

DRAM 2040. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Individual production and/or performance crew assignments.

DRAM 2050. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Individual production and/or performance crew assignments.

DRAM 2060. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Individual production and/or performance crew assignments.

DRAM 2100H. Appreciation of Theatre (Honors). 3 hours.
Not open to students with credit in DRAM 2000.
Prerequisite: Permission of Honors.
All aspects of the theatrical experience on stage and screen, emphasizing the role of the audience as well as that of the artist. May not be used for credit towards the drama major.

DRAM 2110. Voice of Diversity in Contemporary American Drama. 3 hours.
Dramatic works which foreground issues of race, gender, culture, and/or ethnicity. Concepts of perception and identity, group relationships, and social/political protest.

DRAM 2120. Introduction to Cinema. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Film aesthetics and film as an art form, including critical viewing of selected films in laboratory, and papers on topics in film and audience values.

DRAM 2130. American Ethnic Cinema. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Cultural history of the most important ethnic film makers in the American cinema from the 1920's to the present, with emphasis on stories and styles of the films, as well as on the underlying economic and social contexts.

DRAM 3020. Basic Dramatic Writing. 3 hours.
The principles and process of dramatic writing.

DRAM 3200. Foundations of Theatre History. 3 hours.
History of theatre and dramatic arts from their beginning to 1800.

DRAM 3210. Foundations of Modern Theatre History. 3 hours.
History of theatre and dramatic arts from 1800 to the present, examining the interplay of theatre with photography, film, radio, television, and computer-based story telling.

DRAM 3290. Script Analysis. 3 hours.
A method for analyzing scripts intended for performance. Course may be taken through UGA Studies Abroad program in Parma.

DRAM 3300. Foundations of Performance Design. 3 hours.
Basic principles and techniques of design in contemporary performing arts, including the development and practice of scenery, costume, lighting, and other design aspects of stage and media production, with a look at major contemporary designers.

DRAM 3330. Costuming for the Performance Arts. 3 hours.
Prerequisite: DRAM 3300.
Planning and design of performance costumes, including exploration of drawing, painting, production, and play analysis.

DRAM 3340. Scenery Fabrication and Painting. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: DRAM 3300.
Planning, construction, painting, and installation of scenery, props, and rigging.

DRAM 3500. Acting I: Foundations of Acting. 3 hours. 3 lab periods of 2 hours each per week.
Participation in a series of group and individual activities designed to develop basic acting skills. The course also includes exercises for the actor's voice and body. Open only to drama majors.

DRAM 3520. Makeup for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300.
Fundamental principles and practices in makeup for stage and media. Drawing and face painting skills as well as practice in use of cosmetics, wigs, hair pieces, and work with departmental productions.

DRAM 4000/6000. Dramatic Writing I. 3 hours.
Prerequisite: DRAM 3020.
Planning, writing, and polishing the short script for performance.

DRAM 4250/6250. History of Cinema I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: DRAM 2120.
The development of the international film and of film theories from 1895 to 1945, with emphasis on cinema as a dramatic medium.

DRAM 4260/6260. History of Cinema II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: DRAM 2120.
The development of international film and film theories from 1945 to the present, with emphasis on cinema as a dramatic medium.

(DRAM)TXMI 4270/6270. History of Costume: Antiquity to Nineteenth Century. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationships of costume and social, cultural, political, and economic environments from antiquity to the nineteenth century.

DRAM 4280/6280. Women in Performance. 3 hours.
Women's contributions to the performing arts, focusing on contemporary American artists in such fields as theatre, film, dance, performance art, and other contemporary performance genres.

DRAM 4330/6330. Shakespeare. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3500 or permission of department.
Performance of Shakespeare's plays.

DRAM 4400/6400. Asian Theatre and Drama. 3 hours.
Genres of performance in India, China, Japan, and Southeast Asia. Focus on social and cultural significance of performances, including examples of Noh, Kabuki, Beijing Opera, Kathakali, Kutiyattam, Wayang Kulit, and Topeng.

DRAM 4460/6460. History of Dramatic Art in Italy. 3 hours.
Dramatic art in Italy and England from the Greek colonists to the present. Special emphasis on field trips to archaeological sites and special museums. Visits to contemporary performances.
Non-Traditional Format: Must be registered in the Studies Abroad program and participate on-site.

DRAM 4480/6480. History of African American Drama and Theatre. 3 hours.
The emergence of a distinct and conscious African American theatre in the United States.

(DRAM)AFAM 4490/6490. African American Women in Cinema: Image and Aesthetics. 3 hours.
Prerequisite: Permission of department.
Selected films by and about African and African American women. A historical/critical overview of the presentation of these women in cinema with emphasis on contemporary African and African American women film makers.

DRAM 4800/6800. Topics in History. 3 hours. Repeatable for maximum 6 hours credit.
Topical issues in theatre or cinema, combining history and critical analysis of specific significant topics (e.g., national theatre or cinema, animation, authorship, genre).

DRAM 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.

DRAM 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.

DRAM 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.

DRAM 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.

DRAM 5010. Acting II: Scene Study. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3500 and permission of department.
Concentration on voice, movement, and character study for actors.

DRAM 5051. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: DRAM 2040 or DRAM 2050 or DRAM 2060 or permission of department.
Open only to drama majors. Individually assigned production and/or performance crew.

DRAM 5052. Applied Drama Laboratory. 1 hour. Repeatable for maximum 2 hours credit. 1 lab period of 2 hours each per week.
Prerequisite: DRAM 5051.
Open only to drama majors. Individually assigned production and/or performance crew.

DRAM 5053. Senior Seminar. 3 hours.
Prerequisite: Senior standing or permission of department.
The current status of dramatic arts with specific planning and preparation to enter into the profession. The course includes Senior Exit Examination. Open only to drama majors.

DRAM 5110/7110. Stage Management. 3 hours.
Prerequisite: Permission of department.
A survey of the organization and practical application and execution of performance events.

DRAM 5310/7310. Technical Problems. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3340.
Special topics in advanced theory and techniques of performance technology, including scenery construction and rigging, costume construction, lighting technology, and sound.

DRAM 5320/7320. Computer-Aided Design for the Performance Arts. 3 hours. Repeatable for maximum 6 hours credit. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300 and permission of department.
Techniques of computer-aided design and drafting in the performing arts.

DRAM 5330/7330. Costume Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300.
Costume design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5340/7340. History of Costume and Decor. 3 hours.
Prerequisite: DRAM 3300.
The styles of costuming, architecture, furnishing, and ornamentation in significant theatrical periods.

DRAM 5351/7351. Scenic Design for the Performance Arts. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: DRAM 3300.
Prerequisite or corequisite: DRAM 3300.
Scenic design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5352/7352. Lighting Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300.
Lighting design for the performing arts, emphasizing conceptualization and application for basic research and technology to meet dramatic needs.

DRAM 5380/7380. Design Technology for the Performance Arts. 3 hours.
Prerequisite: DRAM 3300.
Basic technology for performance production. Costume materials and construction, scenery rigging and movement, lighting equipment and technology, and sound equipment and practices.

DRAM 5500. Acting III: Advanced Acting. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5010.
Role analysis and the problems and techniques of creating subtext with special relation to text and improvisation.

DRAM 5510. Actor Training I: Physical Actor. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5500 and permission of department.
Intensive study in physical techniques for the actor.

DRAM 5530. Actor Training II: Voice for the Actor. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5500 and permission of department.
Intensive training in voice techniques for the actor.

DRAM 5560. Acting in Period Styles. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5500 and permission of department.
Problems and techniques of acting in periods and styles through intensive scene study and performance.

DRAM 5570. Acting for the Camera. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: (DRAM 5500 or DRAM 5530) and permission of department.
Applying theatre acting techniques to the demands of modern media. Practical work in class with emphasis on the vocal and physical demands of dramatic material designed for television and cinema.

DRAM 5590. Special Projects in Drama. 1-3 hours.
Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Special projects for the advanced student, including internships.
Non-Traditional Format: Directed study.

DRAM 5600. Play Direction. 3 hours. 3 lab periods of 2 hours each per week.
Basic methods and procedures of the art of dramatic directing.

DRAM 5610/7610. Play Direction Laboratory. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5600.
The director's analysis of the script, the actor-director relationship, and theatrical style. Each student directs a one-act play or short film.

DRAM 5620/7620. Dramatic Writing II. 3 hours.
Prerequisite: DRAM 4000/6000.
Developing the full length script for performance.

DRAM 5630/7630. Producing the New Script. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Critical and practical work in producing new scripts for writers, actors, directors, and designers.

DRAM 5640/7640. Directing for the Cinema. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5600 or permission of department.
Theories and techniques of the dramatic cinema.

DRAM 5730/7730. Advanced Costume Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5330/7330.
Projects in costume design for the performing arts, emphasizing multi-character and highly complex designs using traditional and complex methods and technologies.

DRAM 5751/7751. Advanced Scenic Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5351/7351.
Advanced scenic design for the performing arts, emphasizing multi-character and highly complex designs using traditional and complex methods and technologies.

DRAM 5752/7752. Advanced Lighting Design for the Performance Arts. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5352/7352.
Projects in design (scenery, costume, lighting, sound) with an emphasis on multi-character, multi-setting and highly complex designs using current and advanced methods and technologies.

DRAM 5810/7810. Computer Animation for Dramatic Media I. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 3300 and permission of department.
Computer animation in television, film, and theatre from the perspective of the director/animator. The hardware and software necessary to create computer animation is accompanied by the principles of kinetics and narrative story-telling in a visual medium.

DRAM 5820/7820. Computer Animation for Dramatic Media II. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5810/7810 or permission of department.
Advanced computer animation techniques and digital compositing which integrate live action with computer generated environments.

DRAM 5830/7830. Computer Animation for Dramatic Media III. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: DRAM 5820/7820 or permission of department.
Preparation of a portfolio-quality computer animation project, including a narrative script story book, preproduction meetings, schedules and budgets, production and post-production.

DRAM 5860/7860. Interactive Multimedia as a Dramatic Medium. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Practice and theory of interactive multimedia as a dramatic medium. Multimedia hardware and software, principles of interactive design, and comparison of development tools and delivery systems including CD-ROM and the World Wide Web.

DRAM 5870/7870. Interactive Multimedia and Live Performance. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The use of computers to trigger and manipulate media events, including sound, lighting, digital images and video, and techniques allowing performers and spectators to interact with such media events in real time. Topics include sensors, motion capture, MIDI, and theoretical issues concerning the interaction between live performance and media.

(EAGR) Agricultural Education

College of Education, Department of Occupational Studies

EAGR 4010/6010. Agricultural Education Leadership Seminar. 1 hour. Repeatable for maximum 5 hours credit. 1 lab period of 1 hour each per week.
Current problems in teaching agricultural education and training in specialized areas relevant to the needs of future teachers of agricultural education.
Non-Traditional Format: Involvement in off-campus Agricultural Education/FFA activities will also be required in order to succeed in the class.

EAGR 4340/6340. Developing Community Programs in Agriculture. 3 hours.
Developing the components of high school agriculture education programs, including collection and use of demographic data to design and implement community based programs.

EAGR 4350/6350. Curriculum Planning in Agricultural Education. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for agricultural education.

EAGR 4360/6360. Instructional Strategies in Agricultural Education. 3 hours.
Study and evaluation of teaching materials, methods, techniques, and strategies utilized in agricultural education.

EAGR 5460. Student Teaching in Agricultural Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Full-time supervised student teaching experience in an existing agricultural education program.
Non-Traditional Format: Supervised full-time experience in school setting.

(EBUS) Business Education

College of Education, Department of Occupational Studies

EBUS 4010/6010. Business Communication. 3 hours.
Theory and practice of thinking, reading, writing, speaking, and listening processes involved in business education.

EBUS 4020/6020. Computer Concepts and Operating Systems for Occupational Studies. 3 hours.
Computer hardware and software operating procedures, data organization and representation. Current trends in occupational uses of computer technology and instructional approaches for teaching operating systems.

EBUS 4350. Curriculum Planning in Business Education. 3 hours.
Prerequisite: Permission of department.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for business education.

EBUS 5030/7030. Word Processing Applications. 3 hours.
Prerequisite: Permission of department.
Word processing with popular software packages. Focus is on advanced features of word processing packages, including merging, sorting, mathematical functions, and desktop publishing and instructional approaches for teaching word processing in occupational studies.

EBUS 5060/7060. Desktop Publishing in Occupational Studies. 3 hours.
Computer applications for electronic publishing, including elements of page design, effective publications, presentations, instructional materials, and instructional approaches for teaching desktop publishing in occupational studies.

EBUS 5070/7070. Office Management. 3 hours.
Office management, including practices, supervision, information management, methods and procedures, job organization, evaluation, selection, and training of office personnel.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

EBUS 5090/7090. Spreadsheet and Presentation Applications in Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Spreadsheet and presentation software, including spreadsheet commands, graphs, data sorting, querying, and macro design and presentation software commands, design, sequencing and practice demonstration. Instructional approaches for teaching spreadsheets and presentation software in occupational studies.

EBUS 5100/7100. Systems Analysis and Design for Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Technical background and knowledge for teaching information systems development and implementation in occupational studies. Instructional strategies for project management, documentation standards, hardware and software considerations, systems design, and program languages.

EBUS 5460. Student Teaching in Business Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised student teaching experience in a business education program.
Non-Traditional Format: Supervised full-time experience in school setting.

EBUS 5760/7760. Consumer Financial Planning. 3 hours.
Prerequisite: ECON 2105.
Consumer problems encountered during and after school years. How the economy functions, wise purchase decisions, managing money, evaluating sales and advertising practices, and guarding against unwise buying practices. Instructional approaches for teaching financial planning in occupational studies.

(ECHD) Counseling and Human Development Services

College of Education, Department of Counseling and Human Development Services

ECHD 3010. Paraprofessional Helping Strategies. 1-3 hours. Repeatable for maximum 6 hours credit.
Development of basic skills needed by student peer helpers and other paraprofessionals in various educational settings.

ECHD 3050. Career and Life Planning. 1-3 hours. Repeatable for maximum 6 hours credit.
The process of career and life planning and developing skills necessary for informed career decision making. Focus is on the processes of self-assessment, decision making, career exploration, and preparation for employment.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECHD 4000. Special Problems in Counseling and Human Development Services. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Current philosophical, psychological, sociological, and developmental trends, unique interests, special training needs, and research efforts of students.
Non-Traditional Format: May be taught as an independent study for an individual or group, or as a formal class for all students.

ECHD 4020/6020. Interpersonal Relationships. 3 hours.
Prerequisite: Permission of department.
Interpersonal skills are taught and demonstrated by the instructor. Students practice the skills in role-playing situations. Skills included are physical attending, psychological attending, listening, perceiving surface and underlying feelings, basic responding skills, personalizing skills, and initiating skills. Intended for nonmajors.

(ECOL) Ecology

College of Arts and Sciences, Institute of Ecology

ECOL 1000-1000L. Ecological Basis of Environmental Issues. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in GEOG 1125-1125D or ECOL 3070.
Ecological concepts that form the basis for understanding environmental issues confronting us; population growth, loss of diversity, resource limitation, pollution, and global climate change.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECOL 3070. Environment and Humans. 3 hours.
Not open to students with credit in ECOL 1000-1000L or GEOG 1125-1125D.
Macro-environmental problems currently faced by humans placing them in historical perspective, and relating them to the natural laws and ecological processes which govern the outcome of human-environmental interactions.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECOL(FORS) 3260-3260L. Vertebrate Diversity and Evolution. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Not open to students with credit in CBIO 3000-3000L.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or permission of department.
The evolution, diversity, and higher order relationships of vertebrate animals and their principal adaptations to life.

ECOL(BIOL) 3500-3500L. Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in GEOG 3210.
Prerequisite: BIOL 1108-1108L and MATH 2200 and MATH 2200L and CHEM 1211 and CHEM 1211L.
Population structure and dynamics, organization and classification of communities, and nutrient and energy flows in ecosystems.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECOL(BIOL) 3510. Ecology Laboratory. 3-4 hours. Repeatable for maximum 10 hours credit.
Prerequisite: ECOL(BIOL) 3500-3500L.
Techniques and methodologies to assess organismal, population, community, or ecosystem interactions.
Non-Traditional Format: A field course taught for blocks of time off-campus (semester breaks or summer). Additional on-campus lecture hours may be added depending upon the field schedule.

ECOL 3520. Ecological Applications. 3 hours.
Prerequisite: ECOL(BIOL) 3500-3500L.
Current ecological approaches used to quantify impacts of natural and human disturbances on ecosystem structure and function. Case studies illustrate impacts and management strategies in fields such as environmental toxicology, conservation ecology, agroecosystem ecology, and restoration ecology.

(ECOL)FORS 3580-3580L. Vertebrate Natural History. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Life history strategies of vertebrates with emphasis on ecology, behavior, taxonomy, and systematics.

ECOL 3900. Directed Reading. 2-3 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Junior or senior standing and permission of department.
Detailed study of a restricted area of ecology through reading and discussion of original papers and reviews under the direction of a faculty supervisor.
Non-Traditional Format: Faculty members will arrange contact hours with individual student.

ECOL 4000/6000-4000L/6000L. Organismal, Population, and Community Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L.
The evolution, physiology, and diversity of organisms; the birth, death, and movement of organisms, with particular reference to population dynamics; the forces that structure communities of plants and animals.

ECOL 4010/6010-4010L/6010L. Ecosystem Ecology. 4 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L and STAT 4210 and senior standing.
Ecosystem structure and function with emphasis on energetic and biogeochemical processes in natural and managed ecosystems. Methodology of ecosystem analysis, including field, laboratory, and computer techniques.
Non-Traditional Format: Weekend field trips.

ECOL 4020/6020-4020L/6020L. Field Systems Ecology. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L and MATH 2210 and MATH 2210L.
Ecology, field biology, and dynamic processes of terrestrial and aquatic ecosystems integrated by empirical monitoring and systems modeling within a campus watershed. Field trips to the Smoky Mountains and Georgia coast will extend the principles to a regional geographic scale.
Non-Traditional Format: The projects will be conducted on an unscheduled basis, requiring open access to laboratory and computer facilities.

ECOL 4030/6030-4030L/6030L. Mammalogy. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L or permission of department.
Taxonomy, distribution, ecology, and evolution of mammals.

ECOL 4040/6040-4040L/6040L. Herpetology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Evolution, ecology, behavior, structure, and physiology of amphibians and reptiles.

ECOL 4050/6050-4050L/6050L. Ichthyology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L.
Taxonomy, distribution, ecology, evolution, and conservation of the marine and freshwater fishes.

ECOL 4060/6060-4060L/6060L. Ornithology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.

Identification, classification, life histories, evolution, and behavior of birds, with an emphasis on Georgia species.

ECOL 4070/6070-4070L/6070L. Invertebrate Zoology. 4 hours. 3 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.
Functional morphology, taxonomy, phylogeny, and general biology of invertebrates.

ECOL 4110/6110. Insect Diversity. 4 hours. 1 hour lecture and 3 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
The biodiversity of tropical and temperate insects, including theoretical issues, natural history, and methods for study.

ECOL(EETH) 4200/6200-4200L/6200L. Ecological Concepts. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
A general ecology course for non-science majors, which is a core course for the environmental ethics certificate. Based on lectures, readings, and laboratories. The course is designed to examine ecological phenomena from global patterns to individual interactions.

(ECOL)ANTH 4210/6210. Zooarchaeology. 3 hours.
Prerequisite: ANTH 1102 or BIOL 1104-1104L or BIOL 1108-1108L or permission of major.
Animal remains recovered from archaeological sites, studied in light of zoological and archaeological methods and theories and interpreted in terms of human and animal behavior.

ECOL 4240/6240-4240L/6240L. Physiological Ecology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1108-1108L.
Physiological responses of organisms to environmental factors.

(ECOL)ANTH 4290/6290. Environmental Archaeology. 3 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: ANTH 1102 or permission of major.
Prehistoric and historic human subsistence patterns through the methods and techniques of zooarchaeology, paleobotany, and paleonutrition. Theories of environmental reconstruction.

ECOL(FORS) 4310/6310-4310L/6310L. Limnology. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or FORS 3300.
Aquatic ecosystems (lakes and streams) and their biota. Linkages between terrestrial and aquatic ecosystems.

ECOL 4940. Internship in Ecology. 2-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ECOL(BIOL) 3500-3500L and permission of department.
Supervised work experience with public agencies, nonprofit environmental organizations, or industry concerning ecological topics.
Non-Traditional Format: Faculty members will arrange work hours with sponsoring agency. Faculty will arrange meetings with student to discuss progress.

ECOL 4950. Senior Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Prerequisite: Senior standing or permission of department.
Discussion and critical appraisal of reports of original research and/or surveys of the technical literature in ecology. Students will be responsible for oral presentations on current topics.

ECOL 4960. Research. 2-4 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Junior or senior standing and permission of department.
Independent research in ecology under direction of individual faculty members.
Non-Traditional Format: Faculty members will arrange contact hours with individual student.

ECOL 4990. Senior Thesis. 3 hours.
Prerequisite: ECOL 4960 and permission of department.
Preparation of a written thesis, based upon research carried out under direction of a faculty supervisor.
Non-Traditional Format: Faculty will arrange contact hours with individual student.

(ECON) Economics

Terry College of Business, Department of Economics

ECON 1100. Analysis of Strategic Games. 3 hours.
The analysis of players' strategies and their outcomes when each player's best strategy depends on the (expected) actions of others. Circumstances leading to both cooperative and noncooperative outcomes are considered, with economic and other applications.

ECON 2100. Economics of Environmental Quality. 3 hours.
Not open to students with credit in ECON 4150.
Prerequisite: ECON 2106 and ECON 2105.
The economic analysis of environmental issues, with discussions of current environmental quality problems, their underlying causes, and command vs. market-based solutions.

ECON 2105. Principles of Macroeconomics. 3 hours.
Explanations of economic growth and the business cycle, aimed at shedding light on economy-wide problems such as inflation and unemployment, with special attention to the role played by monetary and fiscal policies.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECON 2105H. Principles of Macroeconomics (Honors). 3 hours.
Not open to students with credit in ECON 2105.
Prerequisite: Permission of Honors.
Explanations of economic growth and the business cycle, aimed at shedding light on economy-wide problems such as inflation and unemployment, with special attention to the role played by monetary and fiscal policies.

ECON 2106. Principles of Microeconomics. 3 hours.
Laws governing the use of scarce resources by producers and consumers in market economies, with emphasis on the role played by prices. The consequences of government involvement in the economy are studied, with examples taken from current policy issues.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECON 2106H. Principles of Microeconomics (Honors). 3 hours.
Not open to students with credit in ECON 2106.
Prerequisite: Permission of Honors.
Laws governing the use of scarce resources by producers and consumers in market economies, with emphasis on the role played by prices. The consequences of government involvement in the economy are studied, with examples taken from current policy issues.

ECON 2200. Economic Development of the United States. 3 hours.
Not open to students with credit in ECON 2200H or ECON4700.
Prerequisite: ECON 2106 and ECON 2105.
The United States' growth and transformation into an industrialized nation, exploring the contributions of diverse cultural groups. The rise of the corporation, slavery, government regulation, banking, transportation, the economic role of women and minorities, the Great Depression, and rapid post-World War II growth.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECON 2200H. Economic Development of the United States (Honors). 3 hours.
Not open to students with credit in ECON 2200 or ECON4700.
Prerequisite: ECON 2106 and ECON 2105 and permission of Honors.
The United States' growth and transformation into an industrialized nation, exploring the contributions of diverse cultural groups. The rise of the corporation, slavery, government regulation, banking, transportation, the economic role of women and minorities, the Great Depression, and rapid post-World War II growth.

ECON 4000. The Economics of Human Resources. 3 hours.
Not open to students with credit in ECON 4600.
Prerequisite: ECON 2106 and ECON 2105.
The application of microeconomic principles to the study of the behavior of individuals and business firms in the labor market. The roles of private institutions and public policies in affecting worker compensation, employment, unemployment, and the distribution of labor-market earnings.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ECON 4010. Intermediate Microeconomics. 3 hours.
Prerequisite: ECON 2106 and ECON 2105 and MATH 2200 and MATH 2200L.
Resource allocation in a market economy, with an emphasis on the workings of the price system under competitive and monopolistic conditions. The welfare costs of departures from perfect competition are examined, and students are introduced to game theory and the economics of information.

ECON 4020. Intermediate Macroeconomics. 3 hours.
Prerequisite: ECON 2106 and ECON 2105 and MATH 2200 and MATH 2200L.
Theories aimed at explaining observed levels of national income, unemployment, inflation, interest rates, and exchange rates, with critical evaluations of alternative domestic and international fiscal and monetary policies.

ECON 4030. Money and Banking. 3 hours.
Not open to students with credit in ECON 4100.
Prerequisite: ECON 2106 and ECON 2105.
Money and banks in the economy, with lectures on financial intermediation, how interest rates are determined, domestic banking regulations, international banking and exchange rates, and monetary theory and policy.

ECON 4030H. Money and Banking (Honors). 3 hours.
Not open to students with credit in ECON 4030 or ECON4100.
Prerequisite: ECON 2106 and ECON 2105 and permission of Honors.
Money and banks in the economy, with lectures on financial intermediation, how interest rates are determined, domestic banking regulations, international banking and exchange rates, and monetary theory and policy.

ECON 4040. The International Business Environment. 3 hours.
Not open to students with credit in ECON 4550.
Prerequisite: ECON 2106 and ECON 2105.
Trade, macroeconomic policy, and financial-market issues and theories of relevance to multi-national firms, with applications to recent events.

ECON 4100. Monetary Economics. 3 hours.
Not open to students with credit in ECON 4030 or ECON4030H.

Prerequisite: ECON 4010 or ECON 4020.
Money and financial markets, emphasizing the evolution and economic rationale of money and financial institutions, determinants of the price level and interest rates, alternative monetary policies, and international monetary relations.

ECON 4150. Environmental Economics. 3 hours.
Prerequisite: ECON 4010.
The economic foundations of global environmental problems, including air and water pollution and the depletion of natural resources, with discussions of alternative (command and market-based) solutions.

ECON 4200. Economic Growth and Development. 3 hours.
Prerequisite: ECON 4010.
Problems and programs of economic growth; specific attention directed to underdeveloped areas, national economies, and regions. International agencies and coordinated efforts in economic development processes will be appraised within a theoretical reference.

ECON 4300. Public Sector Economics. 3 hours.
Prerequisite: ECON 4010.
Government's economic role, with discussions of what governments should (or shouldn't) do, and of what they do in fact. Major tax and spending programs are critically examined, and proposals for changing them are considered.

ECON 4350/6350. Industrial Economics. 3 hours.
Prerequisite: ECON 4010.
Firms' performances and conduct toward rival firms, suppliers, and customers under different market structures, including perfect competition and monopoly. The rationale and consequences of antitrust regulation and other public policies.

ECON 4400/6400. Economics of Public and Regulated Enterprises. 3 hours.
Prerequisite: ECON 4010.
The economic analysis of regulated and nationalized industries and organizations, with emphasis on the regulation of electric, natural gas, and telecommunications enterprises. Methods and implications of privatization of traditionally "public" enterprises are also considered.

ECON 4450/6450. Economic Analysis of Law. 3 hours.
Prerequisite: ECON 4010.
An efficiency-based perspective on major areas of the law, including contract, tort, and nuisance law, which points to the reduction of transactions costs as unifying legal principle.

ECON 4500. Monetary Policy. 3 hours.
Prerequisite: ECON 4010 and (ECON 4030 or ECON 4030H or ECON 4100).
The theory and practice of monetary policy, including discussions of rationales for government involvement in money and banking, actual central bank behavior, the choice of monetary rules versus discretion, and how alternative monetary regimes might work.

ECON 4550. International Trade: Theory and Policy. 3 hours.
Prerequisite: ECON 4010.
The determinants of world trade patterns, with discussions of immigration, capital mobility, inter-industry trade, transfer payments, and recent developments in international trade policy.

ECON 4600. Labor Economics. 3 hours.
Prerequisite: ECON 4010.
The application of microeconomics to the study of labor markets. The demand for and supply of labor, compensating wage differentials, human capital investment, alternative compensation policies, unions, discrimination, and unemployment.

ECON 4650/6650. Economics of Organizations and Management. 3 hours.
Prerequisite: ECON 4010.
Decision making within firms and public organizations, using standard microeconomic tools. Transaction costs and the size of the firm, the compensation and motivation of workers, mergers and corporate control, team production, and the theory of bureaucracy.

ECON 4700. Economic History of the United States. 3 hours.
Prerequisite: ECON 4010.
Economic analysis is combined with historical narrative to explore the evolution of the United States' economy from its agrarian origins to its current status as an industrialized nation. Basic economic reasoning is used to explain the course, sources, and consequences of United States economic change, with particular emphasis on the twentieth century.

ECON 4750. Introduction to Econometrics. 3 hours.
Prerequisite: ECON 4010 and STAT 2000.
Estimation and hypothesis-testing techniques using the linear regression model, with emphasis on the least-squares estimator and its performance under different statistical assumptions. A hands-on approach, stressing applications to empirical problems in economics.

ECON 5900. Senior Thesis. 1 hour.
Prerequisite: ECON 4010 and senior standing.
An extensive economics research paper, written under the direction of a faculty member. This course should be taken during the term just prior to the student's planned graduation.
Non-Traditional Format: Directed study.

ECON 5900H. Senior Thesis (Honors). 3 hours.
Not open to students with credit in ECON 5900.
Prerequisite: ECON 4010 and senior standing and permission of Honors.
An extensive economics research paper, written under the direction of a faculty member. This course should

be taken during the term just prior to the student's planned graduation.
Non-Traditional Format: Independent research and thesis preparation.

ECON 5960H. Tutorial (Honors). 1-9 hours.
Prerequisite: ECON 4010 and senior standing and permission of Honors.
Reading and independent research on a specified topic beyond normal course offerings and supervised by a faculty member.
Non-Traditional Format: Directed study. Students must apply to the department head at least five weeks in advance of registration.

ECON 5970H. Tutorial (Honors). 1-9 hours.
Prerequisite: ECON 4010 and senior standing and permission of Honors.
Reading and independent research on a specified topic beyond normal course offerings and supervised by a faculty member.
Non-Traditional Format: Directed study. Students must apply to the department head at least five weeks in advance of registration.

ECON 5980H. Tutorial (Honors). 1-9 hours.
Prerequisite: ECON 4010 and senior standing and permission of Honors.
Reading and independent research on a specified topic beyond normal course offerings and supervised by a faculty member.
Non-Traditional Format: Directed study. Students must apply to the department head at least five weeks in advance of registration.

ECON 5990. Economics Tutorial. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ECON 4010 and senior standing.
Reading and independent research on a specified topic beyond normal course offerings and supervised by a faculty member.
Non-Traditional Format: Directed study. Students must apply to the department head at least five weeks in advance of registration.

(EDEC) Early Childhood Education

College of Education, Department of Elementary Education

EDEC 3000. Orienting Practicum. 1-4 hours. Repeatable for maximum 12 hours credit.
Short term (20-30 hours) field experience during which the student will observe and become minimally involved in the teaching/learning processes of each of the levels of early childhood education (nursery, kindergarten, and primary) coupled with occasional scheduled seminars.
Non-Traditional Format: Practicum.

EDEC 4000. Special Problems in Early Childhood Education. 1-3 hours. Repeatable for maximum 6 hours credit.
Selected students are permitted to secure specialized training appropriate to the needs of the individual. The student's project may involve intensive library investigation in a special field or the collection and analysis of original data pertinent to a given problem.
Non-Traditional Format: Individual/special projects.

EDEC(CHFD) 4010. Orientation to Early Childhood Education. 1 hour.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4010L.
Translation of theories about how children learn into ideas for application in the classroom. Bases for developmentally appropriate practices are examined in light of the students' own experiences as learners.

EDEC(CHFD) 4010L. Orientation to Early Childhood Education Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4010.
Translation of theories about how children learn into ideas for application in the classroom. Bases for developmentally appropriate practices are examined in light of the students' own experiences as learners. Field experiences in classroom settings.

EDEC(CHFD) 4020. Decision Making for Planning, Teaching, and Organizing Early Childhood Classrooms. 3 hours.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4020L.
Reflective decision making that incorporates the major themes, concepts, and skills involved in organizing, planning, and developing instruction in early childhood classrooms.

EDEC(CHFD) 4020L. Decision Making for Planning, Teaching, and Organizing Early Childhood Classrooms Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4020.
Reflective decision making that incorporates the major themes, concepts, and skills involved in organizing, planning, and developing instruction in early childhood classrooms. Field experiences in classroom settings.

EDEC(CHFD) 4030. Integrated Curricular Practices in Early Childhood Education. 3 hours.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4030L.
Develop philosophical perspectives of teaching and classroom management, consider effective parent-teacher relations, and connect with the wider community as a resource context for teaching and learning. Plan and teach an integrated, thematic curriculum unit for

prekindergarten through grade five as part of the field component.

EDEC(CHFD) 4030L. Integrated Curricular Practices in Early Childhood Education Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Corequisite: EDEC(CHFD) 4030.
Develop philosophical perspectives of teaching and classroom management, consider effective parent-teacher relations, and connect with the wider community as a resource context for teaching and learning. Plan and teach an integrated, thematic curriculum unit for prekindergarten through grade five as part of the field component. Field experiences in classroom settings.

EDEC(CHFD) 4040. Special Topics in Early Childhood Education. 3 hours.
Corequisite: EDEC(CHFD) 5460.
A forum for issues of professionalism connected to professional teaching experiences. Topics may vary depending on student-generated issues and concerns.

EDEC 5000. Organization in Early Childhood Classrooms. 3 hours.
Investigation of early childhood education principles and practices which are germane to organizing and operating the classroom for learners in prekindergarten through grade five. Students will acquire knowledge of important theoretical approaches in this area as well as practical skills applicable to their work with young children.

(EDEC)EDMS 5060. Service Learning. 3 hours.
History, rationale, research, methodology, and outcomes of service learning. Students will conceptualize, plan, and participate in a service learning project. Emphasis is on how service can be incorporated into curriculum with a primary focus on learning.

(EDEC)SPED 5100. Introduction to Early Childhood Special Education. 3 hours.
Prerequisite: Permission of department.
Meeting individual needs of children with disabilities in early childhood education environments. Emphases on methods for including young children with disabilities in typical environments. Topics include history and rationale for ECSE, family focused intervention, methods for teaming, embedding developmentally appropriate objectives in natural contexts.

(EDEC)CHFD 5150. Families, Schools, and Communities. 3 hours.
Prerequisite: CHFD 3920 and EDEC(CHFD) 4020 and CHFD 4860/6860 and permission of department.
Families and their relationship with schools and communities. Implications for selected areas of practice, such as early childhood educational practices, emphasized.

EDEC(CHFD) 5460. Student Teaching in Early Childhood Education. 3-15 hours.
A prekindergarten through grade five classroom teaching experience under the direction of a teacher and an early childhood education faculty member.
Non-Traditional Format: Student teaching/field based in schools.

(EDES) Environmental Design

School of Environmental Design

EDES 1500. Design and the Environment. 3 hours.
The built environment and its effects on natural systems. Focus is on the design of the built environment as an ongoing activity integrating ecological, social, and cultural values. Topics include land use patterns and policies, development and resource management, community design issues, and strategies for improving environmental integrity and quality of life.

EDES 2210. Design Communication I. 2 hours. 2 lab periods of 2 hours each per week.
Manual and computerized drafting skills/design drawing with an emphasis on the development of basic visual and computer literacy.

EDES 2220. Design Communication II. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: EDES 2210.
A continuation of Design Communication I, with emphasis on applying design drawing/presentation graphics and verbal presentation skills to express and explore design ideas.

EDES 2510. History of the Built Environment I. 3 hours.
Architecture, landscape architecture, and urban design from ancient times through the Renaissance. Emphasis is on the relationship between design of the built environment and socio-cultural, technological, aesthetic, and environmental factors.

EDES 2520. History of the Built Environment II. 3 hours.
Architecture, landscape architecture, and urban design from 1600 to the present. Emphasis is on the relationship between design on the built environment and socio-cultural, technological, aesthetic, and environmental factors.

EDES 3230. Design Communication III. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: EDES 2220.
Traditional and computer media and resource access or material and cultural resource analysis, and land planning. Skill development in GIS, electronic communication, process and presentation graphics.

EDES 4090/6090. Architectural Design. 4 hours. 2 lab periods of 4 hours each per week.

Prerequisite: LAND 4060 or LAND 6020.
Major design determinants in architecture. Inquiry into structural, functional/programmatic, theoretical, and environmental issues will be focused on developing an understanding of the relationship between architecture and landscape.

EDES 4100/6100. Historic Preservation Design Studio. 4 hours. 2 lab periods of 4 hours each per week.
An advanced design studio focused on contemporary preservation issues. Emphasis will be placed on new design and community planning.

EDES 4240. Design Communication IV. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230.
Advanced multimedia and desktop publishing techniques and their application to environmental design projects.

EDES 4250/6250. Advanced Computer-Aided Design. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of computer-aided design software for the development of environmental design and land planning projects.

EDES 4260/6260. Computer Rendering and Animation. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of computer rendering and animation software for the visualization of site design and land planning projects.

EDES 4270/6270. Environmental Design Uses of Geographic Information Systems. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Lecture/studio in the use of geographic information systems software for the development of environmental design and land planning projects.

EDES 4610/6610. Vernacular Architecture. 3 hours.
Vernacular or folk architecture around the world and through history. Emphasis will be on how built form is a response to natural/physical and socio-cultural determinants. Both anthropological and art historical approaches to the subject will be explored.

EDES 4620/6620. Evolution of American Architecture. 3 hours.
Prerequisite: (EDES 2510 and EDES 2520) or EDES 6510.
History of American architecture from colonial times to World War II. Emphasis is on the development of both built form and the intellectual and social currents influencing that form.

EDES 4630/6630. The History and Theory of Twentieth-Century Architecture. 3 hours.
Prerequisite: EDES 2520 or permission of school.
The major monuments and theories of world architecture from the early modern period to the present. Major monuments will be presented in slide lecture; theory in readings and discussions.

EDES 4640/6640. The History of Urban Planning. 3 hours.
Prerequisite: (EDES 2510 and EDES 2520) or EDES 6510 or permission of school.
Major movements and monuments in the history of urban planning. The first half of the course will cover the world from ancient times to the present; the second half will focus on America from colonial times to the present.

EDES 4650/6650. City Planning. 2 hours.
The study of urban places. Planning processes and regulatory tools and techniques used by urban communities to achieve community goals and objectives.

EDES 4660/6660. Environment and Behavior: Theory and Practice. 2 hours.
The interactions and relationships between people and their physical environments. Focuses on the social, behavioral, and cultural aspects of design.

EDES 4670/6670. History of Landscape Technology and Management. 2 hours.
Prerequisite: EDES 2520 or EDES 6510.
Technological influence upon attitudes toward nature and natural resources that result in a changed landscape.

EDES 4680/6680. Conservation of Culturally Significant Resources in Rural Areas. 2 hours.
Prerequisite: Junior standing.
The cultural evolution of rural landscapes in the United States. Exploration of approaches and methodologies used in identifying and protecting significant features, both natural and cultural, in a constantly changing environment.

EDES 4920/6920. Directed Study in Computer Application. 1-3 hours. Repeatable for maximum 9 hours credit. 1-3 lab periods of 2 hours each per week.
Prerequisite: EDES 3230 or EDES 6220.
Supervised research into computer-generated visualizations as they may be applied in environmental design and land planning.

(EDHI) Higher Education

College of Education, Department of Higher Education

EDHI(HIST) 4900/6900. History of American College and University. 3 hours.
Prerequisite: HIST 2111 and HIST 2112.
History of American colleges and universities from 1619 to the present. Major topics include student life, European antecedents, the nature of the university, the impact of religion, the rise of athletics, the culture of collegiate life, and the influence of society.

(EDIT) Instructional Technology Education

College of Education, Department of Instructional Technology

EDIT 2000. Introduction to Computers for Teachers. 3 hours.
Not open to students with credit in EDIT 2010 or EDIT 2020.
The computer and its educational applications for preservice teachers. Computer-based education in the areas of instruction, text and data processing, multimedia, and telecommunications. Emphasis on integrating computer tools into class instruction.

EDIT 2010. Basic Instructional Technology Competencies. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in EDIT 2000 or EDIT 2020.
Introduces the use of a variety of resources in teaching. Design and creation of products for learning environments using various technologies.

EDIT 2020. Teaching with Technology. 3 hours. 2 hours lecture and 2 lab periods of 1 hour each per week.
Not open to students with credit in EDIT 2000 or EDIT 2010.
Focuses on creating teaching and learning environments using technology. Design and creation of products for learning environments will take place through numerous activities with various technologies. Activities anchored in a problem-centered context.

EDIT 4170/6170. Instructional Design. 3 hours.
Systematic procedures for designing, developing, evaluating, and revising instruction to meet identified goals and objectives.

EDIT 4180/6180. Instructional Development. 3 hours.
Prerequisite: EDIT 4170/6170.
Developing instructional materials for a defined context applying a learner-centered, systematic design philosophy. Working within a team environment while applying contemporary learning theories. Engaging in situational assessment, learner analysis, performance specification, test construction, strategies selection, materials design, and evaluation.

EDIT 4500/6500. Educational Television Production. 3 hours.
Design, production, and use of digital and analog video. Laboratory experiences with studio and portable cameras; editing and other equipment suitable for school use.

(EDMS) Middle School Education

College of Education, Department of Middle School Education

EDMS 4000. Special Problems in Middle School Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study of issues related to middle school education.
Non-Traditional Format: Individual/special projects.

EDMS 5020. Educating Young Adolescents. 3 hours.
Prerequisite: Permission of department.
The concept of a separate organization and program for young adolescents, types of curricular plans for the middle school, aspects of teaching in the middle school, and the organization and staff of the middle school. A supervised field experience is included.

EDMS 5030. The Middle School Curriculum. 3 hours.
Prerequisite: EDMS 5020.
Curriculum planning, implementation, and evaluation for teaching middle school students. A supervised field experience is included.

EDMS 5040. Teaching in the Middle School. 1-3 hours.
Repeatable for maximum 3 hours credit.
Prerequisite: EDMS 5030.
Various roles of middle school teachers, with emphasis on classroom, team, school, and community issues.

EDMS(EDEC) 5060. Service Learning. 3 hours.
History, rationale, research, methodology, and outcomes of service learning. Students will conceptualize, plan, and participate in a service learning project. Emphasis is on how service can be incorporated into curriculum with a primary focus on learning.

EDMS 5460. Student Teaching in the Middle School. 15 hours.
Prerequisite: EDMS 5030.
Full-time laboratory experience in a middle grade during which the student assumes major responsibility for instruction.
Non-Traditional Format: Student teaching/field based in schools.

(EDUC) Education

College of Education

EDUC 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, readings, or projects under the direction of a faculty member.
Non-Traditional Format: Independent study under the direction of a faculty member.

EDUC 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, readings, or projects under the direction of a faculty member.
Non-Traditional Format: Independent study under the direction of a faculty member.

EDUC 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Independent research under the direction of a faculty member.

(EETH) Environmental Ethics

College of Arts and Sciences

EETH 4000. Environmental Ethics Seminar. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Seminars in environmental ethics. Topics range from animal rights/animal welfare to ecofeminism and deep ecology.

EETH 4010. Undergraduate Research. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research project under the direction of a faculty member done independently of regularly scheduled classes.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

EETH 4020/6020. Readings in Environmental Ethics. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Discussion of selected books and articles pertaining to environmental ethics.

EETH(AGRI) 4190/6190. Agricultural Ethics. 1 hour. 1 lab period of 2 hours each per week.
Ethical issues in agriculture. Topics include animal rights/animal welfare, agriculture as a business/agriculture as a way of life, sustainable agriculture, (bio)technology, migrant farm workers, foreign aid, world hunger, and related topics.

(EETH)ECOL 4200/6200-4200L/6200L. Ecological Concepts. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
A general ecology course for non-science majors, which is a core course for the environmental ethics certificate. Based on lectures, readings, and laboratories. The course is designed to examine ecological phenomena from global patterns to individual interactions.

(EETH)PHIL 4220/6220. Environmental Ethics. 3 hours.
Prerequisite: PHIL 2200 or permission of department.
Major professional and nonprofessional writings in the field of environmental ethics.

(EETH)PHIL 4250/6250. Technology and Values. 3 hours.
Prerequisite: Permission of department.
Technology in its broadest human context, with emphasis on the mutual influence between means and ends and the impact of technology on shaping the beliefs and attitudes of a civilization. Includes alternative assessments of technology and illustrates with specific crucial issues of our time.

EETH(JURI) 5870/7870. Environmental Dispute Resolution. 2 hours.
Conflict management, anatomy of negotiation, planning and conduct of negotiations, and resolving multiparty environmental disputes.

(EFND) Foundations of Education

College of Education, School of Teacher Education

EFND 2030. Foundations of Education. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: Sophomore standing.
Contemporary and historical issues in American education, including the nature and purpose of schooling, the relationship between race, class, and gender and educational achievement, school reform, and the rights and responsibilities of teachers and students.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

(EHEC) Home Economics Education

College of Education, Department of Occupational Studies

EHEC 4350. Curriculum Planning in Home Economics Education. 3 hours.
Content identification, program organization, preparation of instructional objectives, guidelines for selection

and development of instructional materials for home economics education.

EHEC 5460. Student Teaching in Home Economics Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Full-time supervised student-teaching experience in a secondary home economics education program.
Non-Traditional Format: Supervised full-time experience in school setting.

(EHSC) Environmental Health Science

College of Agricultural and Environmental Sciences, Department of Food Science and Technology

EHSC 2010. Orientation to Environmental Health. 1 hour.
Environmental health science, including environmental protection, industrial hygiene, toxicology, risk assessment, and public health.

EHSC 3060. Introduction to Environmental Health Science. 3 hours.
The fundamentals of environmental health, covering environmental control agencies, elements of the environment suffering from pollution, environmental pollutants and their sources, effects of environmental pollution, and methods of pollution control.

EHSC 3260. Shelter and Institutional Environments. 2 hours.
Prerequisite: EHSC 3060 and MIBO 3500.
Environmental health practice associated with housing and special institutional environments.

EHSC 3700. Special Problems in Environmental Health Science. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Research or intensive study in a specialized area of environmental health under the direction of a staff member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

EHSC 3800. Environmental Health Seminar. 1 hour.
Prerequisite: Permission of department.
Selected topics in Environmental Health. Papers to be presented by students.

EHSC 3910. Internship in Environmental Health Science. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: EHSC 3060 and permission of department.
Practical work experience; familiarizes the student with various aspects of environmental health science.
Non-Traditional Format: Experiential education and training in a specialized area of environmental health science under the direction of a faculty member.

EHSC 4080/6080. Environmental Air Quality. 2 hours.
Prerequisite: CHEM 2211 and CHEM 2211L.
Sources and control of community air pollution; effects of air pollutants on human health and the environment; regulatory and public policy issues.

EHSC 4100/6100-4100L/6100L. Industrial Hygiene. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 2211 and CHEM 2211L.
The anticipation, recognition, evaluation, and control of those environmental factors, arising in or from the workplace, which can cause sickness, impaired health and well-being, or significant discomfort and inefficiency among workers or among community citizens.

EHSC 4150/6150. Solid and Hazardous Waste Management. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and MATH 1113 and STAT 2000.
Regulatory, chemical, and engineering aspects of solid and hazardous waste management, including RCRA, CERCLA, landfill and incinerator design, pollutant transport and fate, and potential for human health impacts.

(EHSC)AAEC 4250. Environmental and Public Health Law. 3 hours.
Not open to students with credit in AAEC 4930/6930.
Basic legal principles and procedures as they relate to environmental regulations and public health. Coverage of common law, torts, nuisances, regulatory standards, and state and federal environmental laws. Delineation of significant constitutional and federal regulations that affect managerial decisions.

(EHSC)FDST(MIBO) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

(EHSC)FDST(MIBO) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

EHSC 4350/6350-4350L/6350L. Environmental Chemistry. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EHSC 4150/6150.
Chemical principles of environmental processes which result from natural or human-generated phenomena; air,

water, and soil chemical reactions involving pollutants and wastes; measurement of pollutants in the environment.

EHSC 4490/6490. Environmental Toxicology. 3 hours.
Prerequisite: CHEM 2211 and CHEM 2211L and (BIOL 1104-1104L or BIOL 1108-1108L).
Extent and significance of toxic agents in the environment, and the physical, chemical, and biological processes which determine their behavior, fate, and ultimate effect on human health.

EHSC 4590/6590-4590L/6590L. Water and Wastewater. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Chemistry and microbial life of water and wastewater, domestic and industrial, with scrutiny of current treatment processes. Sampling methods will be demonstrated. Effects of different types of waste on microbial population of rivers and streams.

EHSC 4610/6610. Water Pollution and Human Health. 3 hours.
Prerequisite: EHSC 3060.
Prerequisite or corequisite: CHEM 2211 and CHEM 2211L.
Human health issues related to water consumption and use, focusing on water contamination from municipal, industrial, and agricultural practices.

(ELAN) Language Education

College of Education, Department of Language Education

ELAN 3110. Children's Literature and Oral Language. 3 hours.
Literary genres suitable for elementary school children. Includes issues of book selection, censorship, and responding to children's literature in a diverse society. Addresses the socially-constructed, dynamic nature of oral and written language and how to help children use and expand upon the language they bring to school.

ELAN 3460. Introduction to English Education. 3 hours.
Prerequisite: Permission of department.
Community work with adolescents (mentoring, tutoring, etc.), common readings in education, and interactions with professional educators. Hands-on experiences help English education majors decide if public school teaching of adolescents is a profession they want to pursue.
Non-Traditional Format: Discussion hour plus community service work.

ELAN 3461. Issues in English Education. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: ELAN 3460.
Community work with adolescents (mentoring, tutoring, etc.), common readings in education, and interactions with professional educators. English education majors build on individual and shared experiences and readings to examine issues of English education in public schools. They construct a portfolio of insights and experiences.
Non-Traditional Format: Discussion hour plus community service work.

ELAN 4080/6080. Special Problems in Language Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Selected topics related to teaching language arts or a foreign language.
Non-Traditional Format: Independent study with faculty member.

ELAN 4120. Whole Language Teaching in Early Childhood Education. 3 hours.
Recent research and theory on oral and written language acquisition, development, and variation and the implications for classroom practices. Whole language instructional techniques for the development of written and oral language.

ELAN 4400/6400. Teaching as Planning in Context. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Historical, political, economic, and social factors that influence how the language arts are taught, how schools operate, and how teachers function.

ELAN 4401/6401. Teaching as Collaborative Inquiry. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Literacy research for practitioners including research design, methodology, data analysis and interpretation for questions about students as readers/writers/language users.

ELAN 4410/6410. Adolescent Literature. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4460/6460 or ELAN 4470/6470.
Adolescent literature and its selection and use in the middle school and high school to promote engagement with literature and as a bridge to the classics.

ELAN 4460/6460. Supervised Field Experience in English, Grades 7-12. 3 hours.
Prerequisite: Permission of department.

Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4470/6470.
Observation and work in public school English classrooms.

ELAN 4462/6462. Student Teaching Seminar. 3 hours.
Prerequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Corequisite: ELAN 5460.
Issues of classroom teaching. Students plan for and examine their concurrent student teaching experience in light of research and theory, peers' experiences in other school settings, and their own teaching and learning histories.
Non-Traditional Format: Intensive two-week planning seminar prior to student teaching and two-week debriefing seminar following student teaching. Ten weeks of two-hour weekly discussions concurrent with student teaching.

ELAN 4470/6470. Guided Field Research. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460.
Supervised observation and participation in school settings.

ELAN 4530. Foreign Language Curriculum and Methodology in the Elementary and Middle Schools. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4531.
Foundations of second language learning, curricular and materials design, and methods of teaching foreign languages in the elementary and middle schools.

ELAN 4531. Foreign Language Curriculum and Methodology in the Secondary School. 3 hours.
Prerequisite: Permission of department.
Corequisite: ELAN 4530.
Curricular design of foreign languages and the techniques and strategies for teaching and evaluating language acquisition.

ELAN 4630/6630. TESOL Methods and Materials. 3 hours.
Principles, methods, materials, and activities for the teaching of English to adult speakers of other languages.

ELAN 5030. American Language and Cultural Studies for International Students. 3 hours.
Designed to help international students develop advanced English skills in understanding academic lectures, comprehending reading materials, speaking with grammatical accuracy and acceptable pronunciation, and writing for academic purposes.

ELAN 5040. Language and Culture in the Classroom. 3 hours.
Exploration of topics on the relationship between language and culture and on pedagogical principles of multicultural education.

ELAN 5200. Literature and Language Arts Across the Middle School Curriculum. 3 hours.
Uses writing as a teaching strategy in elementary and middle school content area classrooms. Students experience writing as a process to develop their writing skills, plan content area assignments, evaluate writing, and understand how young people think about and learn content material through writing.

ELAN 5210. Children's Literature and Oral Language in the Middle School. 3 hours.
Children's and adolescent literature appropriate for middle school students, including development of criteria for book selection, strategies for promoting enjoyment and appreciation, and methods for responding to diverse literature.

ELAN 5220. Teaching Composition in the Middle School. 3 hours.
Strategies for building a literate learning community. Students write fiction, poetry, and information texts, engaging in as well as studying the pedagogy of writing development, conference, revision, assessment, and publishing.

ELAN 5312/7312. Poetry in Elementary and Middle School Classrooms. 3 hours.
Poems and enrichment activities for use in elementary and middle school classes; ways of encouraging children to respond to published poetry, to understand poetic devices, and to write poetry.

ELAN 5314/7314. Informational Literature in Elementary and Middle Schools. 3 hours.
Reading of informational literature and examining selection criteria and ways to integrate informational books into language arts and content area curricula appropriate for preschool through 8th grade.

ELAN 5318/7318. Culturally Diverse Children's Literature. 3 hours.
Prerequisite: Undergraduate level only: ELAN 5210; Graduate level only: ELAN 6310 or ELAN 7310.
Children's fiction, poetry, and nonfiction literature dealing with the experiences of diverse cultures comprising American society. Development of criteria for evaluation and strategies for incorporating literature into the curriculum.

ELAN 5332/7332. Drama in Elementary and Middle Grade Classrooms. 3 hours.
Integrating drama across the curriculum, including improvisational process drama, connecting to issues associated with children's literature, reading, writing, storytelling, and thematic oriented units of study with students in grades prekindergarten to middle school.

ELAN 5390/7390. Problems of Literacy Teaching and Learning. 3 hours.
Issues related to preschool through 8th grade readers and writers with diverse learning paths, including learning disabilities, English as a second language, and histories of school failure. Effective teaching strategies include culturally-responsive teaching, student-generated curriculum and assessment links, interdisciplinary connections, and family involvement.

ELAN 5460. Student Teaching in English Education. 9 hours.
Prerequisite: ELAN 4400/6400 or ELAN 4401/6401 or ELAN 4410/6410 or ELAN 4460/6460 or ELAN 4470/6470.
Corequisite: ELAN 4462/6462.
Student teaching English in the public school setting under the supervision of faculty members.
Non-Traditional Format: Student teaching in public school setting.

ELAN 5550. Field-Based Practicum in Foreign Language Education. 3 hours.
Prerequisite: ELAN 4530 and ELAN 4531 and permission of department.
Corequisite: ELAN 5460.
Provides orientation to foreign language education in public school settings through class discussions, and on-site observations and experiences.
Non-Traditional Format: Field-based experience in public school foreign language classrooms (five-ten hours per week).

ELAN 5555. Supervised Foreign Language Internship. 3-12 hours.
Prerequisite: ELAN 4530 and ELAN 4531 and permission of department.
Supervised foreign language internship in a public school for teachers employed with a provisional certificate.
Non-Traditional Format: Supervised teaching in public schools.

ELAN 5560. Student Teaching in Foreign Language Education. 3-12 hours.
Prerequisite: ELAN 4530 and ELAN 4531 and permission of department.
Corequisite: ELAN 5550.
Student teaching in a public school under supervision of a faculty member.
Non-Traditional Format: Student teaching in public school setting.

ELAN 5630. ESOL in P-12 Settings. 3 hours.
Foundations of second language learning, curricular and materials design, and methods of teaching non-native speakers of English in primary through secondary school settings.

ELAN 5730/7730. First and Second Language Acquisition and Development. 3 hours.
Native and second language acquisition processes, with attention to regional, social, and functional variation in language and contrasts between English and other selected languages.

(EMAT) Mathematics Education

College of Education, Department of Mathematics Education

EMAT 2000. Foundations of Mathematics Education. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Role of mathematics in society; contemporary issues in mathematics education; role of professional mathematics educator, including ethical and effective practice; social, historical, and philosophical perspectives and methods of inquiry in analysis of mathematics education issues; and sociological and psychological bases for learning mathematics. Technologies used in teaching mathematics.

EMAT 3400. Children's Mathematical Learning. 3 hours.
Prerequisite: MATH 1700 or permission of department.
Corequisite: EDEC(CHFD) 4010.
Children's mathematical learning from pre-numerical stages through the acquisition of advanced numerical and spatial processes and operations. Research-based development of a theory of children's learning. Includes field component.

EMAT 3410. Mathematics Teaching and Curriculum in PreK-5th Grade. 3 hours.
Prerequisite: EMAT 3400.
Corequisite: EDEC(CHFD) 4020.
Mathematics teaching and curriculum in preK through 5th grade. Content and materials appropriate for preK through 5th grade mathematics curriculum is integrated with an analysis of mathematics teaching, including the use of technology. Includes a field component.

EMAT 3450. School Practicum in Secondary Mathematics. 1-2 hours. Repeatable for maximum 2 hours credit.
A school-based planned practicum experience.
Non-Traditional Format: Part-time practicum in school.

EMAT 3500. Concepts in Secondary School Mathematics. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
The basic concepts in the secondary mathematics curriculum, including concepts from algebra, functions, shape and space, and number systems.

EMAT 4000/6000. Special Problems in Mathematics Education. 1-6 hours. Repeatable for maximum 9 hours credit.

Topics in mathematics education.
Non-Traditional Format: Independent study.

EMAT 4200/6200. Technology in Teaching Elementary School Mathematics. 3 hours.
Prerequisite: Permission of department.
Use of technological tools in teaching elementary mathematics. Current computer software for mathematical explorations.

EMAT 4360/6360. Teaching and Learning Secondary School Mathematics. 3 hours.
Prerequisite: EMAT 4680/6680 and permission of department.
Corequisite: EMAT 5360/7360.
Instructional strategies, classroom management, assessment techniques, lesson planning, multicultural and gender issues in mathematics education.

EMAT 4500/6500. Connections in Secondary School Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
The secondary mathematics curriculum, with attention to applications of mathematics and to connections within mathematics and between mathematics and other subjects.

EMAT 4550/6550. Contemporary School Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
The contemporary secondary and collegiate mathematics curriculum, with an emphasis on data handling, modeling, infinite processes, stochastic processes, and discrete mathematics.

EMAT 4600/6600. Problem Solving in Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
Mathematical problems with emphasis on exploring various mathematical contexts, on posing and extending problems, and on communicating mathematical problems and solutions.

EMAT 4650/6650. Historical and Cultural Foundations of Mathematics. 3 hours.
Prerequisite: [EMAT 3500 or (MATH 2210 and MATH 2210L)] or permission of department.
Development of mathematics across time, geography, and cultures with attention to the content of school mathematics.

EMAT 4680/6680. Technology and Secondary School Mathematics. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Mathematical investigations appropriate to the secondary school using various technology tools.

EMAT 4690/6690. Technology Enhanced Instruction in Secondary School Mathematics. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Use of technology in mathematics instruction and development of materials for mathematics instruction enhanced by technology.

EMAT 4700/6700. Advanced Explorations with Technology in Mathematics Instruction. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MATH 2210 and MATH 2210L.
Use of technology in mathematics instruction, with an emphasis on the organization of materials for secondary mathematics courses.

EMAT 4950/6950. Professional Seminar in Teaching Mathematics. 3 hours.
Prerequisite: EMAT 4360/6360.
Corequisite: EMAT 5460/7460.
Issues identified from the student teaching experience in mathematics with consideration of various avenues for professional development.

EMAT 5280/7280. Teaching Number Systems in the Middle School. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L and permission of department.
Corequisite: MATH 5020/7020.
Didactics of number systems for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing natural, integer, rational, and real number structures. Evaluation through the examination of mathematics content, with emphasis on the mathematical operations, models, and problem solving.

EMAT 5290/7290. Teaching Geometry and Measurement in the Middle School. 3 hours.
Prerequisite: EMAT 5280/7280.
Corequisite: MATH 5030/7030.
Didactics of geometry for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing geometric and measurement concepts. Evaluation through the examination of mathematics content, with emphasis on statistics, probability, and mathematical applications.

EMAT 5310/7310. Teaching Mathematics in the Middle School. 3 hours.
Prerequisite: EMAT 5290/7290.
Methods and materials for teaching mathematics in the middle school, with emphasis on integration of mathematical topics.

EMAT 5320/7320. Teaching Algebra in the Middle School. 3 hours.
Prerequisite: EMAT 5290/7290.
Didactics of algebra and number theory for middle school mathematics. Teaching methods, curriculum materials, psychological factors for developing algebraic concepts.

EMAT 5360/7360. Secondary School Mathematics Field Experience. 3 hours.
Prerequisite: EMAT 4680/6680 and permission of department.
Corequisite: EMAT 4360/6360.
Supervised observations, interviews, tutoring, teaching practice, and professional goal development.
Non-Traditional Format: Forty-five hours of field work per semester.

EMAT 5460/7460. Student Teaching in Secondary School Mathematics. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: EMAT 4360/6360.
Corequisite: EMAT 4950/6950.
Supervised mathematics teaching in a secondary school.
Non-Traditional Format: In school for ten weeks, all day.

(EMKT) Marketing Education

College of Education, Department of Occupational Studies

EMKT 4100/6100. Economic Foundations for Work-Based Education. 3 hours.
Economic principles and concepts of free-market economies in work-based education programs, with emphasis on instructional approaches.

EMKT 4110/6110. Marketing and Business Foundations of Work-Based Education. 3 hours.
Business and marketing concepts, business environments, and managerial systems in work-based education, with emphasis on instructional strategies.

EMKT 4120/6120. Human Resource Applications in Marketing Education. 3 hours.
Human relations, communications, mathematics, management, and career development in work-based education programs, with emphasis on instructional strategies.

EMKT 4350. Curriculum Planning in Marketing Education. 3 hours.
Prerequisite: Permission of department.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for marketing education.

EMKT 5460. Student Teaching in Marketing Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Full-time supervised student teaching experience in an existing marketing education program.
Non-Traditional Format: Supervised full-time experience in school setting.

(EMUS) Music Education

College of Education

EMUS 4000. Special Problems in Music Education 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Specialized training in music education appropriate to the needs of the individual.

EMUS 5460. Senior Practicum. 12 hours. Repeatable for maximum 13 hours credit.
Prerequisite: Permission of department.
Teaching assignment at appropriate level school with practicum/seminar component prior to field experience.
Non-Traditional Format: This course involves supervised student teaching at an approved site and, as such, involves various instructional modes that will require an eight-hour per day commitment from the student for the majority of the semester the course is taken.

(ENGL) English

College of Arts and Sciences, Department of English

(ENGL)ACAE 0097. Fundamentals of Effective Writing. 3 hours.
Covers major sentence and syntax errors and basic organization of paragraphs and short narrative and expository papers. Writing topics include personal and expository topics. Emphasis on drafting and revising.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ENGL)ACAE 0098. Basic Composition for Multilingual Writers. 3 hours.
Not open to students with credit in ACAE(ENGL) 0099.
For multilingual students only. Course covers elements of effective style, careful proofreading, logical organization, and convincing development of expository and persuasive essays. Emphasis on problems multilingual students typically experience with proofreading, revision, and writing for an American academic audience.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ENGL)ACAE 0099. Basic Written Composition. 3 hours.
Not open to students with credit in ACAE(ENGL) 0098.
Covers elements of effective style, careful proofreading, logical organization, and convincing development of college-length expository and persuasive essays. Emphasis on proofreading, revision, and analytic and interpretive thinking and writing.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(ENGL)RGTE 0199. Review of Written English. 3 hours.
Prerequisite: Permission of department.

Review of usage, sentence structure, mechanics of writing, diction, paragraph structure, and theme development. A refresher course in the elements of composition. May not be used for graduation credit.
Non-Traditional Format: Most students will elect to complete requirements through directed study. This course carries institutional credit and will not count toward graduation.

ENGL 1030. Multicultural English Composition. 3 hours.
Not open to students with credit in ENGL 1102 or ENGL 1050H.
Themes on fiction, poetry, and drama using multicultural literature.

ENGL 1050H. Composition and Literature (Honors). 3 hours.
Not open to students with credit in ENGL 1102 or ENGL 1030.
Prerequisite: ENGL 1101 and permission of Honors.
Close analysis of literary works as the basis of effective critical writing.

ENGL 1060H. Composition and Multicultural Literature (Honors). 3 hours.
Not open to students with credit in ENGL 1102 or ENGL 1030 or ENGL 1050H.
Prerequisite: ENGL 1101 and permission of Honors.
Close analysis of multicultural literary works as the basis of effective critical writing.

ENGL 1101. English Composition I. 3 hours.
Expository themes on both general and literary topics developed by basic rhetorical methods.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 1102. English Composition II. 3 hours.
Not open to students with credit in ENGL 1030 or ENGL 1050H.
Themes on fiction, poetry, and drama.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 2310. English Literature from the Beginnings to 1700. 3 hours.
Not open to students with credit in ENGL 2350H.
Prerequisite: ENGL 1102 or ENGL 1030.
Writers typically include the *Beowulf* poet, *Gawain* poet, Chaucer, Spenser, Sidney, Marlowe, Donne, Jonson, Shakespeare, and Milton.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 2320. English Literature from 1700 to the Present. 3 hours.
Not open to students with credit in ENGL 2360H.
Prerequisite: ENGL 1102 or ENGL 1030.
Writers typically include Pope, Swift, Johnson, Blake, Wordsworth, Coleridge, Keats, Tennyson, Arnold, Browning, one or two nineteenth-century novelists, Yeats, Woolf, and Joyce.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 2330. American Literature from the Beginnings to 1865. 3 hours.
Not open to students with credit in ENGL 2370H.
Prerequisite: ENGL 1102 or ENGL 1030.
Significant work by writers in America from the seventeenth-century colonists through the Revolution to the Civil War. Writers may include Anne Bradstreet, Benjamin Franklin, Washington Irving, Nathaniel Hawthorne, Ralph Waldo Emerson, Frederick Douglass, Herman Melville, Harriet Beecher Stowe, Emily Dickinson.

ENGL 2340. American Literature from 1865 to the Present. 3 hours.
Not open to students with credit in ENGL 2380H.
Prerequisite: ENGL 1102 or ENGL 1030.
Significant work by American writers between the end of the Civil War and the present. Writers may include Mark Twain, Henry James, Edith Wharton, William Faulkner, Langston Hughes, T.S. Eliot, Zora Neale Hurston, Richard Wright, Elizabeth Bishop, Saul Bellow, and Adrienne Rich.

ENGL 2350H. English Literature from the Beginnings to 1700 (Honors). 3 hours.
Not open to students with credit in ENGL 2310.
Prerequisite: (ENGL 1102 or ENGL 1030) and permission of Honors.
Writers typically include the *Beowulf* poet, *Gawain* poet, Chaucer, Spenser, Sidney, Marlowe, Donne, Jonson, Shakespeare, and Milton.

ENGL 2360H. English Literature from 1700 to the Present (Honors). 3 hours.
Not open to students with credit in ENGL 2320.
Prerequisite: (ENGL 1102 or ENGL 1030) and permission of Honors.
Writers typically include Pope, Swift, Johnson, Blake, Wordsworth, Coleridge, Keats, Tennyson, Arnold, Browning, one or two nineteenth-century novelists, Yeats, Woolf, and Joyce.

ENGL 2370H. American Literature from the Beginnings to 1865 (Honors). 3 hours.
Not open to students with credit in ENGL 2330.
Prerequisite: (ENGL 1102 or ENGL 1030) and permission of Honors.
Significant work by writers in America from the seventeenth-century colonists through the Revolution to the Civil War, including Anne Bradstreet, Benjamin Franklin, Washington Irving, Nathaniel Hawthorne, Ralph Waldo

Emerson, Frederick Douglass, Herman Melville, Harriet Beecher Stowe, and Emily Dickinson.

ENGL 2380H. American Literature from 1865 to the Present (Honors). 3 hours.
Not open to students with credit in ENGL 2340.
Prerequisite: (ENGL 1102 or ENGL 1030) and permission of Honors.
Significant work by American writers between the end of the Civil War and the present including Mark Twain, Henry James, Edith Wharton, William Faulkner, Langston Hughes, T.S. Eliot, Zora Neale Hurston, Richard Wright, Elizabeth Bishop, Saul Bellow, and Adrienne Rich.

ENGL 2390H. Multicultural Literature in America (Honors). 3 hours.
Not open to students with credit in ENGL 2400.
Prerequisite: (ENGL 1102 or ENGL 1030) and permission of Honors.
Important writers and movements in the mosaic of American culture and literature with special attention to African American, Native American, Hispanic American, and Asian American literatures.

ENGL 2400. Multicultural Literature in America. 3 hours.
Not open to students with credit in ENGL 2390H.
Prerequisite: ENGL 1102 or ENGL 1030.
Important writers and movements in the mosaic of American culture and literature with special attention to African American, Native American, Hispanic American, and Asian American literatures.

ENGL 3000. Introduction to English Studies. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The skills and knowledge necessary for successful pursuit of a degree in English: close reading, critical writing, acquaintance with current theoretical issues, and familiarity with bibliographic and electronic resources. Required of all English majors.

ENGL 3010. Introduction to Folklore. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The discipline of folklore, its aims, methods, and subject matter. The major genres of verbal folklore—folk speech, proverbs, riddles, rhymes, legends, folktales, ballads, and folksong—along with folk customs, festivals, and material culture.

(ENGL)LING 3020. Language Variation. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Theory and assessment of regional and social language variation within one language, including the relationship of variation to language change. Historical and present-day illustrations come primarily from English, with consideration of the significance of language variation in our modern social context.

ENGL(LING) 3030. Introduction to the English Language. 3 hours.
Prerequisite: ENGL 1102 or ENGL 1030.
The history, structure, and modern varieties of the English language.

ENGL 3050. Introduction to Poetry. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Formal and thematic traditions of poetry in English, with emphasis on techniques of reading and of writing critical essays.

ENGL(HIST) 3100. Introduction to British Culture I. 3 hours.
Prerequisite or corequisite: CMLT 2210 or CMLT 2220 or CMLT 2250H or CMLT 2260H or ENGL 2310 or ENGL 2320 or ENGL 2340 or ENGL 2350H or ENGL 2360H or ENGL 2370H or ENGL 2380H or ENGL 2390H or ENGL 2400.
Corequisite: ENGL(HIST) 3110.
Interdisciplinary, writing-intensive course in British literature and history for University of Georgia at Oxford students. Readings organized around geographical sites in Britain using newest Web technologies.
Non-Traditional Format: Web-based remote delivery course that students will take from their hometowns during the "downtime" between the start of the spring semester at the University of Georgia and the beginning of the Oxford Trinity term.

ENGL(HIST) 3110. Introduction to British Culture II. 3 hours.
Prerequisite or corequisite: CMLT 2210 or CMLT 2220 or CMLT 2250H or CMLT 2260H or ENGL 2310 or ENGL 2320 or ENGL 2340 or ENGL 2350H or ENGL 2360H or ENGL 2370H or ENGL 2380H or ENGL 2390H or ENGL 2400.
Corequisite: ENGL(HIST) 3100.
Interdisciplinary, writing-intensive course in British literature and history for University of Georgia at Oxford students. Readings organized around geographical sites in Britain using newest Web technologies.
Non-Traditional Format: Web-based remote-delivery course. Course will be offered via the Web during "downtime" between start of the University of Georgia's spring semester and Oxford term.

(ENGL)LING 3150. Generative Syntax. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Techniques and formalisms for analyzing syntactic phenomena of human languages within the framework of generative grammar. Examples will be drawn primarily from English.

ENGL(AFAM) 3230. Development of African American Literature. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
African American literature since 1773, particularly 1830 to the present: Frederick Douglass, Harriet Jacobs, Zora Neale Hurston, Langston Hughes, Richard Wright, Dorothy West, Ralph Ellison, James Baldwin, Alice Childress, Lorraine Hansberry, Amiri Baraka, Toni Morrison, Alice Walker, and August Wilson, including diverse voices rooted in the folk origins for literary forms.

ENGL 3300. Women in Literature. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Reading and analysis of works in British and American literature by and about women.

ENGL 3590. Technical and Professional Communication. 3 hours.
Prerequisite: ENGL 1102 or ENGL 1030.
Writing in the professional domains, with an emphasis on research methods, clear and accurate presentation of ideas and data, and computer-mediated communication.

ENGL 3600. Advanced Composition. 3 hours.
Prerequisite: ENGL 1102 or ENGL 1030.
Writing as a process, with an emphasis on the conventions of discourse situations, invention, revision, editorial skills, and document design.

ENGL 3610. Introduction to Fiction. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Short fiction in English, with some attention to historical development of the genre, narrative techniques, and the development of critical strategies for reading and writing.

ENGL 3650. Introduction to Drama. 3 hours.
Prerequisite: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Drama in English. Focus may be historical development of the genre, representative themes, the relation between theory and practice, or the relation between text and performance. The course will include critical writing.

ENGL 3800. Introduction to Creative Writing. 3 hours.
Prerequisite: ENGL 1102 or ENGL 1030.
Elements of writing poetry, fiction, and creative nonfiction through selected readings and discussion of student writing.

ENGL(LING) 4000/6000. History of the English Language. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of present English through the stages of Old English, Middle English, and early Modern English. Study of elementary phonetics, phonemics, sound change, and dialect variation.

ENGL(LING) 4010/6010. American English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The history, present status, and future prospects of American English, including standards and internal variation.

ENGL(LING)(AFAM) 4040. Language Use in the African American Community. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

ENGL(LING) 4060/6060. Old English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The language and literature of England before the Norman Conquest, with reading of selected texts.

ENGL(LING) 4110/6110. English Grammar. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English grammar in the scholarly tradition of Curme and Jespersen.

ENGL(LING) 4170/6170. Second Language Acquisition. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Linguistic theories of second language acquisition, with emphasis on the acquisition of English. Topics include order of acquisition, sociocultural factors with linguistic bases, and neurolinguistic models.

ENGL(LING) 4180/6180. ESL Error Analysis. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.

Psycholinguistic theory applied to problems in second language learning, and the prediction of language behavior through the use of contrastive analysis.

ENGL 4190. Topics in the English Language. 3 hours.
Prerequisite: Permission of department.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4210/6210. Old English Literature. 3 hours.
Prerequisite: ENGL(LING) 4060/6060 and two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Prose and poetry of the Old English period, exclusive of *Beowulf*, with emphasis on poetry. Works will be read in Old English, with supplementary translations.

ENGL 4220/6220. Beowulf. 3 hours.
Prerequisite: ENGL(LING) 4060/6060 and two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The poem in the original Old English, with attention to important critical studies.

ENGL 4230. Medieval Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Masterpieces of medieval literature, exclusive of Chaucer. Some works will be read in Modern English translation.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 4240/6240. Chaucer. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Canterbury Tales, *Troilus and Criseyde*, and minor poems.

ENGL 4290. Topics in Medieval Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4300/6300. Elizabethan Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Poetry of the earlier English Renaissance, such as works by Wyatt, Surrey, Sidney, Spenser, and Marlowe, and the sonnets of Shakespeare.

ENGL 4320/6320. Shakespeare: Part I. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The early plays of Shakespeare.

ENGL 4330/6330. Shakespeare: Part II. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The later plays of Shakespeare.

ENGL 4340/6340. Renaissance Drama. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English drama from 1576 to 1642, exclusive of Shakespeare, emphasizing dramatists such as Marlowe, Jonson, Webster, and Middleton.

ENGL 4350/6350. Seventeenth-Century Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Major English poets of the period, such as Donne, Jonson, Herbert, and Marvell.

ENGL 4360. Renaissance Prose. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Prose of the sixteenth and seventeenth centuries, such as works by More, Sidney, Bacon, Donne, Browne, and Bunyan.

ENGL 4370. Milton. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The works and times of John Milton.

ENGL 4390. Topics in Renaissance Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4400/6400. Restoration and Eighteenth-Century English Drama. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Outstanding dramatists of the period: Dryden, Wycherley, Addison, Goldsmith, Sheridan, and others.

ENGL 4420/6420. Early Eighteenth-Century Prose and Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Poetry and prose of the earlier eighteenth century, emphasizing Addison, Steele, Defoe, Swift, and Pope.

ENGL 4430. The Eighteenth-Century English Novel. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The English novel from Defoe to 1800, including novels by Richardson, Fielding, Smollett, and Sterne, the Gothic novel, and the novel of purpose.

ENGL 4440/6440. The Age of Johnson. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English literature of the late eighteenth century, emphasizing Johnson, Boswell, and their group.

ENGL 4490. Topics in Eighteenth-Century Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4500. Romantic Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
British literature, 1785-1832. An introduction to genres, themes, and contexts of the Romantic period. Authors studied may include Blake, Wordsworth, Coleridge, Byron, Keats, Mary and Percy Shelley.

ENGL 4520. The Nineteenth-Century British Novel. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of the British novel in the nineteenth century.

ENGL 4530. Victorian Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
British literature from the first Reform Bill (1832) to the death of Queen Victoria (1901), with emphasis on the poetry and non-fiction prose of writers such as Tennyson, Elizabeth and Robert Browning, Arnold, Carlyle, Mill, Ruskin, and Christina and Dante Gabriel Rossetti.

ENGL 4590. Topics in Nineteenth-Century British Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL(AFAM) 4620. African American Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
African American poetry from the colonial period to the present, including slave and folk songs of the mid-nineteenth century, the Harlem Renaissance of the 1920's, and contemporary poetry. Emphasis on such figures as Langston Hughes, Margaret Walker, Gwendolyn Brooks, Sonia Sanchez, Amiri Baraka, and others.

ENGL(AFAM) 4630. African American Fiction. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Important African American stories and novels from the nineteenth and twentieth centuries, including works by such authors as Frances Harper, Jean Toomer, Ralph Ellison, James Baldwin, Alice Walker, and Toni Morrison.

ENGL 4640. Film as Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The interpretation of films, with emphasis on the relationships between motion pictures and British and American literature.

ENGL 4650. Modern Drama. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The drama of Europe and America from the realism of Ibsen and Strindberg to the present.

ENGL 4660. Twentieth-Century British Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
British poetry since the 1890's.

ENGL 4670. The Twentieth-Century British Novel. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Fiction of such representative British novelists of the twentieth century as Bowen, Conrad, Forster, Joyce, Lawrence, Waugh, Woolf, and Greene.

ENGL 4680. Modern Irish Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Fiction, poetry, and drama of the Irish Renaissance and after.

ENGL 4690. Topics in Twentieth-Century British Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4700. People of Paradox: American Colonial Voices. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The literary engagement with cultural pluralism in Colonial America. Writers may include Bradford, Mather, Bradstreet, Taylor, Cooke, Rowlandson, Byrd, Jefferson, Franklin, Brown, and Irving.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

ENGL 4710. Emancipated Imagination: American Renaissance. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
American poetry, fiction, and prose written between 1820 and 1865. Writers may include Cooper, Poe, Caroline Kirkland, Emerson, Thoreau, Hawthorne, Stowe, Harriet Jacobs, Douglass, Melville, Whitman, and Dickinson.

ENGL 4720. American Realism and Naturalism. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Regionalism, realism, and naturalism from 1865 to 1918 with attention to the themes of ethical conflict, determinism, urbanization, the New Woman, and the contributions of ethnic minorities. Writers may include Twain, James, Wharton, Jewett, Dunbar-Nelson, Zitkala-Sa, Chopin, Chesnutt, Crane, Howells, Dreiser, and Sui Sin Far.

ENGL 4730. The American Novel to 1900. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The growth of the novel in America from its inception in the Romantic to the development of the Realistic novel. Writers may include Cooper, Hawthorne, Melville, Twain, Simms, James, Howells, Stowe, Chesnutt, Dreiser, Norris, and Crane.

ENGL 4740. Southern Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The literature of the South from its roots through the modern renaissance. Writers may include Byrd, Cooke, Longstreet, Simms, Poe, Timrod, Lanier, Chopin, Twain, the Agrarians, Toomer, Roberts, Faulkner, Hurston, Welty, Porter, O'Connor, Wolfe, Percy, Crews, Berry, Kenan, Tyler, Dickey, Chappell, Alice Walker, and McCarthy.

ENGL 4750. American Modernism. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The fiction, poetry, drama, and non-fiction prose that expresses the literary experimentation and social transformations of the period from 1918 to 1960. Writers may include Eliot, Pound, Stein, Fitzgerald, Hemingway, Faulkner, Toomer, Miller, O'Neill, Williams, Larsen, Steinbeck, Salinger, and O'Connor.

ENGL 4760. Contemporary American Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT

2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Various aspects of American fiction, poetry, drama, or non-fiction prose since 1960. The emphasis will vary from semester to semester following new developments in literature.

ENGL 4770. Twentieth-Century American Poetry. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Ideas and forms in American poetry in the twentieth century. Writers may include Eliot, Pound, H.D., Stein, Stevens, Rich, Sexton, Roethke, Harjo, Lorde, Perlman, Howe, Ashbery, Lowell, Moore, Williams, and Frost.

ENGL 4780. Twentieth-Century American Novel. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of the American novel from Naturalism through Modernism and Post-Modernism. Writers may include Cather, Hemingway, Fitzgerald, Wright, Steinbeck, Faulkner, Porter, O'Connor, Ellison, Heller, Morrison, and Percy.

ENGL 4790. Topics in American Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4800. Advanced Creative Writing. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ENGL 3800 or permission of department.
Advanced instruction in writing. Focus, which will vary with professor and semester, may be fiction, poetry, fiction and non-fiction, or all genres.

ENGL 4820. Literary Theory. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Representative texts from Aristotle to Derrida and beyond, exemplifying a range of contemporary critical approaches and providing a historical context for current theoretical debates.

ENGL 4830. Advanced Studies in Writing. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: ENGL 3590 or ENGL 3600 or permission of department.
Advanced study of writing as process and product, focusing on particular discourse situations or kinds of texts. Topics might typically be advanced technical communication, academic writing for literary scholars, or text and hypertext.

ENGL 4850. Rhetoric, Literature, and Textuality. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The relationship between rhetoric and the practice of writing, both literary and non-literary; from classical to contemporary theories of rhetoric (especially the role of writing in each theory) and the practical analysis of texts.

ENGL 4860. Multicultural Topics in American Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Topics in multicultural studies, with primary focus on literature by members of one or more traditionally marginalized cultural groups within the United States and with attention to historical context and theoretical aspects.

ENGL 4870. Folklore Studies. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
One or more folk groups, folklore genres, or topics concerning folklore.

ENGL(AFAM) 4880. Topics in African American Literature. 3 hours.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
Selected topics in African American literature such as African American autobiography, Harlem Renaissance, Gwendolyn Brooks and Richard Wright, and Black American literature and aesthetics.

ENGL 4890. Topics in Criticism and Culture. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Two of the following: CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
A special topic not otherwise offered in the English curriculum. Topics and instructors vary from semester to semester.

ENGL 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

ENGL 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project leader.
Non-Traditional Format: Directed study.

ENGL 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

ENGL 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(ENGR) Engineering

College of Agricultural and Environmental Sciences, Department of Biological and Agricultural Engineering

ENGR 1020. Surveying. 2 hours. 1 lab period of 4 hours each per week.
Prerequisite: MATH 1113.
Surveying methods, instruments, and computations related to field problems in distance measuring, leveling, directions, curves, and land surveying. Topographic mapping techniques will be emphasized. Not for credit toward an engineering major.

ENGR 1120. Engineering Graphics. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: MATH 2200 and MATH 2200L.
Standards and techniques for engineering drawings. Orthographic and isometric drawings through descriptive geometry. Computer graphics using AutoCAD software.

ENGR 1140. Computational Engineering Methods. 2 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Computer programming and matrix techniques used in the analysis of engineering problems

ENGR 1920. Freshman Engineering. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: MATH 2200 and MATH 2200L.
Engineering design will be reviewed and practiced through the use of a term project. The engineering discipline will be introduced through speakers and case studies.

ENGR 2110. Engineering Decision Making. 3 hours.
Prerequisite: MATH 2210 and MATH 2210L.
Economics, finance, and computer modelling are applied to engineering decisions

ENGR 2120. Engineering Statics. 3 hours.
Prerequisite: PHYS 1211-1211L.
Prerequisite or corequisite: ENGR 1140.
Corequisite: MATH 2500 and ENGR 1120.
Two and three dimensional force systems, equilibrium, rigid structures, centroids, friction, and area moments of inertia.

ENGR 2130. Dynamics. 3 hours.
Prerequisite: ENGR 2120.
Particles and rigid bodies that are moving with respect to a reference system. Kinematics deals with motion in terms of displacement, velocity, and acceleration. Kinetics includes the effect of forces on particles and bodies.

ENGR 2140. Strength of Materials. 3 hours.
Prerequisite: ENGR 2120.
Elements of stress analysis, resistance, and design as applied to engineering materials and structures.

ENGR 2150. Fluid Mechanics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2120 and MATH 2700.
Elements and engineering applications of the laws of fluid behavior to evaluate the forces and energies generated by fluids at rest and in motion.

ENGR 2170. Electrical Circuits. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PHYS 1212-1212L.
Corequisite: MATH 2700.
Circuit element, circuit models, and techniques for circuit analysis. The course emphasizes the application of Kirchhoff's laws in determining the transient and steady state response of circuits.

ENGR 2500. Introduction to Biological Engineering. 3 hours.
Prerequisite: BIOL 1108-1108L and PHYS 1212-1212L.
Corequisite: CHEM 2100 and CHEM 2100L and MATH 2700.
Biological and engineering principles are utilized to produce practical products, processes, or systems that serve the needs of society.

ENGR 2920. Engineering Design Methodology. 2 hours.
Prerequisite: PHYS 1211-1211L and MATH 2500 and ENGR 1920.
Corequisite: ENGR 2120.
Design methodology will be taught and practiced through use of term projects. Students will learn QFD

for problem definition, conceptual design techniques and analysis procedures for detailed design.

ENGR 3050. Soil and Water Resource Conservation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: [MATH 1113 and PHYS 1111-1111L and CHEM 1212 and CHEM 1212L and (CRSS 3050-3050L or CRSS(FORS) 3060-3060L)] or permission of department.
The science of hydrology and presentation of methods for management of runoff, erosion, and associated water quality issues. Not for credit toward an engineering major.

ENGR 3070. Turf and Landscape Irrigation System. 2 hours.
Prerequisite: (BIOL 1107-1107L or BTNY 1210-1210L) and MATH 1113.
Engineering technology involved in component selection, installation, and operation of turfgrass and landscape irrigation systems. Not for credit toward an engineering major.

ENGR 3120. Engineering Measurements. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MATH 1113.
Methods, instrumentation, and computations related to leveling, distance measuring, direction determination, curve layouts, and land surveying, with additional emphasis on Global Positioning and Geographic Information Systems.

ENGR 3140. Thermodynamics. 2 hours.
Prerequisite: MATH 2500 and PHYS 1212-1212L.
The science of energy analysis from an engineering perspective. Focus on forms of energy, transformations of energy, and energy flows. Study applications in biological and traditional engineering systems.

ENGR 3150. Heat Transfer. 3 hours.
Prerequisite: MATH 2700.
Theory of heat transmission by conduction, convection, and radiation. The solution of steady and unsteady state engineering problems involving heat transfer.

ENGR 3210. Electrical Machines and Power Distribution. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
DC and AC motors and generators. The design and analysis of electrical power distribution systems.

ENGR 3270. Electronics I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
Diodes, transistors, and operational amplifiers.

ENGR 3300. Mechanism Design I. 3 hours.
Prerequisite: ENGR 2130 and ENGR 2140.
Basic mechanical parts, kinematic analysis of mechanisms, application of static and fatigue failure theories, dimensioning and tolerancing, material selection, basic manufacturing processes.

ENGR 3410. Introduction to Natural Resource Engineering. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2150 or permission of department.
Engineering hydrology, soil erosion, channel design, flow measurement techniques, engineered containment structures, water distribution and non-point water quality.

ENGR 3420. Introduction to Soil Mechanics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2120.
Topics including soil shear strength, shallow foundations, slope stability, lateral earth pressure and soil compaction, design of shallow foundations for agricultural structure, retaining walls, and engineered slopes will be discussed.

ENGR 3440. Water Management. 3 hours.
Prerequisite: ENGR 3410.
Science and design methods associated with managing water on a field scale. Topics will include the management of excess and deficient surface and ground water conditions that may impact activities such as agricultural production, construction, bioremediation, and environmental restoration.

ENGR 3520. Mass Transport and Rate Phenomena. 3 hours.
Prerequisite: ENGR 2150 and ENGR 2500 and MATH 2700.
Mass transport and rate phenomena in the analysis of engineering problems in biological systems.

ENGR 3540. Physical Unit Operations. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2150 and ENGR 3150.
Physical unit operations for processing plants. Systems for handling liquids or gases include pump or fan driven systems. Physical separation of solids in liquid or gas medium. Psychometrics for process environment control. Water or solvent transport from materials.

ENGR 3610. Structural Design. 3 hours.
Prerequisite: ENGR 2140.
Deals with the relationships between loads and deflections which occur in structures as well as designing with wood and concrete.

ENGR 3720. Engineering Physiology. 3 hours.
Prerequisite: ENGR 2120 and ENGR 3520 and VPHY 3100.
Topics will be discussed which identify physical features and engineering principles governing the behavior of organisms.

ENGR 3900. Cooperative Work Experience. 1 hour. Repeatable for maximum 8 hours credit.
Coordinated and planned work experience with cooperating industries or agencies.
Non-Traditional Format: Student will be away from campus in a cooperative work experience with an approved employer.

ENGR 4210/6210. Linear Systems. 3 hours.
Prerequisite: ENGR 3250.
Corequisite: MIBO 3500 and BCMB(BIOL)(CHEM) 3100.
Time and frequency domain analysis of linear systems, convolution, fourier series, and fourier transforms with applications.

ENGR 4220/6220. Feedback Control Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
The analysis and design of continuous and discrete time, and linear feedback control systems.

ENGR 4230/6230. Sensors and Transducers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170.
Fundamentals of the sensing process, transducers and their environments and the measurement problem. Transducer types and modeling. Displacement, motion, pressure, fluid-flow, temperature measurements.

ENGR 4240. Introduction to Microcontrollers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 2170 and ENGR 4230/6230.
Microcontrollers in engineering monitoring and control applications. The MC68HCII is used to demonstrate 1) the use of the MC as an integral part of modern electronic and electromechanical systems 2) design techniques for interfacing MC's to digital input/output devices and analog transducers 3) development tools 4) real-time control.

ENGR 4250/6250. Advanced Microcontrollers. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3270 and ENGR 4240.
Using the MC68HCII to solve practical engineering monitoring and control problems. A project-oriented course.

ENGR 4270. Electronics II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3270.
Linear large-scale integrated circuits, power components, active filters and communication circuits.

ENGR 4280/6280. Measurement Automation and Control. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 1140 and ENGR 2170.
The analysis, design, and programming of systems used for automatic data acquisition, measurement, and control.

ENGR 4300. Mechanism Design II. 2 hours.
Prerequisite: ENGR 3300.
Design and selection of machine elements and components.

ENGR 4330. Plastics and Composites. 3 hours.
Prerequisite: ENGR 2140.
Material properties of plastic and composite materials and the design of these type members for structural and mechanical uses.

ENGR 4340. Machine Hydraulics. 3 hours.
Prerequisite: ENGR 2150.
Fundamental understanding of power hydraulic components and hydraulic system design.

ENGR 4350/6350. Introduction to Finite Element Analysis. 3 hours.
Prerequisite: ENGR 2140 and MATH 2700.
Fundamental finite element theory for the solution of engineering problems. Geometrical modelling techniques, element selection, and tests for accuracy. Emphasis on problems in structural mechanics and elasticity.

ENGR 4360/6360. Advanced Topics in CAD/CAM. 3 hours.
Prerequisite: ENGR 3300.
The use of computer aided design/computer aided manufacturing. Computer modeling of solid objects, advanced mechanism modelling, rapid prototyping and virtual reality.

ENGR 4370/6370. Material Science and Experimental Stress Analysis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3300.
Properties and selection of engineering materials. Structure of solids and the effects of solidification, forming and heat treating operations on material properties. Measurement of stresses in materials using strain gage and photoelastic technology.

ENGR 4420/6420. Industrial Ventilation Design and Control. 3 hours.
Prerequisite: ENGR 2150 and ENGR 3150.
Engineering design of industrial ventilation systems including selection of fans, ductwork, diffusers, hoods, air cleaners, and humidifiers.

ENGR 4440/6440. Environmental Engineering I. 3 hours.
Prerequisite: ENGR 3410 and ENGR 3440.
Engineering science and design related to treatment of drinking water and wastewater as well as the treatment and ultimate disposal of the sludges created during water treatment.

ENGR 4450/6450. Environmental Engineering II. 3 hours.
Prerequisite: ENGR 3520 and ENGR 4440/6440 and ENGR 4480/6480.
Engineering science and design related to environmental modeling, solid waste management, and hazardous waste management. Concepts of risk assessment will also be introduced.

ENGR 4480/6480. Instrumentation for Environmental Quality. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MATH 2700 and PHYS 1212-1212L.
Operation of instrumentation used to measure physical variables which determine environmental quality. The engineering design and application of measuring systems for airborne particulates, gaseous atmospheric contaminants, solar and environmental radiation, and noise will be emphasized.

ENGR 4510/6510. Engineering and Design of Biological Process I. 3 hours.
Prerequisite: ENGR 3520 and BCMB 4010/6010 and MIBO 3500.
Design and analysis of enzymatic and microbial biological reaction systems.

ENGR 4520/6520. Engineering and Design of Biological Processes II. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGR 4510/6510.
Unit operations used for biological processing including filtration, centrifugation, cell disruption, isolation, purification, and polishing.

ENGR 4530/6530. Monitoring and Control of Biological Processes. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGR 4510/6510.
Concepts of biological process controls; modern control techniques and optimization of batch, fed-batch and continuous bioreactors, and other biological systems.

ENGR 4540/6540. Applied Machine Vision. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Automated vision systems to identification, measurement and quality control. Electromagnetic spectrum, illumination design, imaging sensor election, vision system calibration. Implementation of image processing algorithms for object recognition and classification.

ENGR 4550/6550. Processing Plant Design. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 3540.
Design of systems for processing, primarily based upon unit operations processes. Process simulation or modelling for optimization purposes will be applied to processing systems. Plant layout required for processing will be included.

ENGR 4610. Design of Light Steel Structures. 3 hours.
Prerequisite: ENGR 3610.
Design of light frame steel structures. Theory and behavior of these type members under load and their connections.

ENGR 4620. Management of Structural Environments. 3 hours.
Prerequisite: ENGR 3150.
Environmental factors affecting animal and plant production; heat and vapor flow in buildings; design of ventilation systems.

ENGR 4630. Engineering Design of Residential Structures. 3 hours.
Prerequisite: ENGR 2110 and ENGR 2140 and ENGR 2150 and ENGR 2170 and ENGR 3150.
Design of foundations, structural members; heating and cooling systems; water supply and distribution; waste removal; electrical systems; and lighting. Selection of thermal insulation, vapor barriers, windows and doors, and HVAC equipment determined by engineering principles.

ENGR 4740/6740. Biomaterials. 3 hours.
Prerequisite: BIOL 1108-1108L and ENGR 2140.
Biomaterials and groundwork for topics such as mechanical, chemical, and thermal properties of replacement materials and tissues. Implantation of materials in the body is studied for the biological point of view.

ENGR 4760/6760. Biomechanics. 3 hours.
Prerequisite: BIOL 1108-1108L and ENGR 2130 and ENGR 2140.
The application of engineering principles to body dynamics is discussed. The student should understand the mechanics of the musculoskeletal system. A term design project is required.

ENGR 4920. Engineering Design Project. 4 hours. 1 lab period of 4 hours each per week.
Prerequisite: ENGR 2920 and permission of department.
Engineering design experience including completion of a design project under the supervision of a project director.
Non-Traditional Format: Students will meet with a faculty review panel every two weeks. The faculty will evaluate progress and feasibility of the work.

ENGR 4940. Introductory Systems Modeling. 3 hours.
Prerequisite: ENGR 1140 and ENGR 2110 and MATH 2700.
Computer modeling of biological and agricultural processes and the solution of engineering/management problems in agro-industrial systems through computer simulation. Four methodologies will be presented: statistical data fitting, system dynamics, bond graph, and discrete event modeling.

ENGR 4980. Special Topics in Engineering. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Special problems in engineering design, analysis, or synthesis.

ENGR 5930/7930. GPS with Engineering and GIS Applications. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENGR 1120 or GEOG 4370/6370-4370L/6370L.
The Global Positioning System, Differential GPS, and Real Time Kinematic GPS. Applications of GPS to engineering and geographic information systems.

(ENTO) Entomology

College of Agricultural and Environmental Sciences, Department of Entomology

ENTO(BIOL) 2010. Insects and the Environment. 3 hours.
Designed to acquaint students with our dependence on and interaction with insects in today's world.

ENTO 2500-2500L. Bees and Beekeeping. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L.
The life history, ecology, behavior, and pollinating activities of honey bees and other bees of the Southeast, including theory and practice of beekeeping.

ENTO 3140-3140L. Insect Natural History. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L.
Insect biology, with emphasis on factors that have made insects one of the most abundant and successful animal groups. Topics include the behavior, ecology, and evolution of the major insect groups. Most laboratory periods will be spent in the field.

(ENTO)CRSS(PATH) 3500. Turfgrass Pest Management. 3 hours.
Prerequisite: CRSS 2830 or CRSS 3270-3270L.
Identification and control of turfgrass weeds, insects, and diseases. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests.

ENTO 3590-3590L. Urban Entomology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or permission of department.
Urban entomology, including identification, biology, and control of insects and selected arthropod pests with emphasis on the efficacy and environmental impact of pest control tactics in the urban habitat.

ENTO 3650-3650L. Medical Entomology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L.
Arthropods of medical and veterinary importance, and the diseases they transmit.

ENTO 3740-3740L. Agricultural Entomology. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L.
An introduction to entomology followed by a study of the recognition and control of insect pests of crops and animals. An introductory course designed for non-entomology majors.

ENTO 3820-3820L. Forest Protection Entomology. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L.
Major groups of insects and related arthropods. Identification, biology, and management techniques for major forest insects in North America.

ENTO 3900. Special Problems in Entomology. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
A course designed to permit interested and well-prepared undergraduate students to pursue an entomology problem approved by the staff member under whom the work will be done.
Non-Traditional Format: Course requirements are individually negotiated between the student and instructor.

ENTO 4000/6000-4000L/6000L. General Entomology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1107-1107L and BIOL 1108-1108L
Functional anatomy and physiology, behavior, ecology, insects as vectors of pathogens, chemical and biological control of pests. Laboratory sessions are devoted primarily to collecting and the identification of major families of insects.

ENTO 4010/6010-4010L/6010L. Insect Taxonomy. 3 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Insect identification, classification, and phylogeny collection and preparation techniques for insect specimens; introduction to theoretical and practical aspects of systematics.

ENTO(CRSS) 4250/6250-4250L/6250L. Pesticide Management and Utilization. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L and [(CHEM 2100 and CHEM 2100L) or (CHEM 2211 and CHEM 2211L)].

Practical management and utilization of pesticides in urban and agricultural environments. Subject areas include classification of insecticides, herbicides, and fungicides, etc., their general chemical and toxicological properties, deployment philosophy, hazards and environmental impact, formulation and application, safety and disposal, and management of pesticide resistance.

ENTO 4400/6400-4400L/6400L. Insect Behavior. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENTO 4000/6000-4000L/6000L.
Principles of behavior; communication, sexual behavior, anti-predator adaptations, insect-plant interactions, and insect sociality.

ENTO 4740/6740-4740L/6740L. Insect Pest Management. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: ENTO 3740-3740L or permission of department.
Major applied insect control techniques; the advantages and limitations of these tactics including practicality, economics, environmental impact, etc. Integrated control systems for development of a pest management program.

ENTO 4820/6820-4820L/6820L. Entomology in Natural Resources Management. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or permission of department.
Arthropods important in management of forest resources including timber, wildlife, and recreation.

ENTO 4960. Undergraduate Research in Entomology. 4 hours. Repeatable for maximum 12 hours credit.
Prerequisite: ENTO 4000/6000-4000L/6000L or permission of department.
Directed research on insects in the laboratory or field.
Non-Traditional Format: Students will conduct original supervised research requiring at least twelve hours in the laboratory per week.

ENTO 4960H. Directed Reading and/or Projects (Honors). 4 hours.
Prerequisite: Permission of Honors.
This course affords Honor students of senior standing the opportunity to engage in individual directed study.
Non-Traditional Format: Directed research on insects in the laboratory or field.

ENTO 4970H. Directed Reading and/or Projects (Honors). 4 hours.
Prerequisite: Permission of Honors.
This course affords Honor students of senior division standing the opportunity to engage in individual directed study.
Non-Traditional Format: Directed research on insects in the laboratory or field.

ENTO 4990H. Honors Thesis. 4 hours.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Directed research leading to an honors thesis.

ENTO 5730/7730-5730L/7730L. Entomology for Teachers. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Insects and related forms, their identification, and life habits, with emphasis on their use in pre-college life science curricula.

(EOCS) Occupational Studies

College of Education, Department of Occupational Studies

EOCS 2450. Practicum in Occupational Studies I. 1-3 hours. Repeatable for maximum 3 hours credit.
Initial supervised field experience related to teaching individuals in programs of occupational education.
Non-Traditional Format: Supervised experience in school or occupational setting.

EOCS 3010. Introduction to Occupational Studies. 3 hours.
Teaching in an occupational studies discipline with emphasis on programs which prepare individuals for the workforce.

EOCS 3450. Practicum in Occupational Studies II. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: EOCS 2450.
Supervised field experience related to teaching individuals in programs of occupational education.
Non-Traditional Format: Observation and participation experience in a school setting.

EOCS 4000/6000. Directed Readings in Occupational Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Individual research in an occupational studies discipline under the direction of a faculty member.
Non-Traditional Format: Independent study completed under supervision of a faculty member.

EOCS 4010. Student Assessment in Programs of Occupational Studies. 2 hours.
Planning and implementing traditional and authentic assessment strategies, methods, and techniques to assess student learning and development in programs of occupational studies.

EOCS 4100/6100. Principles and Practices of Career Education. 3 hours.
Career education in elementary, middle, and secondary schools; major theories of career development; use of standardized assessment, career information resources,

and curriculum materials; special issues and trends influencing work and careers.

EOCS 4350/6350. Curriculum Planning in Occupational Studies. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for occupational studies programs.

EOCS 4360/6360. Instructional Strategies in Occupational Studies. 3 hours.
Teaching materials, methods, techniques, and strategies utilized in programs of occupational studies.

EOCS 4450. Professional Development in Occupational Studies. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: EOCS 2450.
Various roles of occupational education teachers with emphasis on preparing to enter the teaching profession.

EOCS 4990/6990. Topics in Occupational Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Contemporary issues in occupational studies with emphasis on the effect of these issues on education and the workplace.

EOCS 5030/7030. Organizing and Coordinating Work and Community-Based Education Programs. 3 hours.
Planning, implementing, and directing various school-to-career transition models in education.

EOCS 5050/7050. Problems of Teaching Occupational Studies. 3 hours.
Prerequisite: Permission of department.
Selection, utilization, and evaluation of strategies that support effective teaching in occupational studies.

EOCS 5060/7060. Student Organizations in Occupational Studies. 2 hours.
Student organizations in occupational studies programs, emphasizing contributions of organizations to the curricula. Planning, directing, and evaluating activities such as group and individual projects. Techniques of leadership and group development are included.

EOCS 5120/7120. Needs Analysis in Occupational Studies. 3 hours.
Techniques in analyzing occupations, industry, human resources, and communities to determine instructional and training content.

EOCS 5450/7450. Internship in Business and Industry. 1-3 hours. Repeatable for maximum 6 hours credit.
Guided learning experiences in a business or industry for the purpose of updating a student's knowledge or skills in an occupational area.
Non-Traditional Format: Supervised experience in an occupational setting.

EOCS 5460. Student Teaching in Occupational Studies. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Full-time supervised student teaching experience in an existing occupational studies program.
Non-Traditional Format: Supervised full-time experience in school setting.

EOCS 5550/7550. Students With Special Needs in Programs of Occupational Studies. 3 hours.
Learning characteristics of students with special needs, including those who are disabled, economically and academically disadvantaged. Implications for occupational studies are considered and modifications of curriculum and instruction are identified.

(EPSY) Educational Psychology

College of Education, Department of Educational Psychology

EPSY 2020. Learning and Development in Education. 3 hours.
Not open to students with credit in EPSY 2020H.
Major theories, ideas, and research findings about learning, and child and adolescent development, including development of motivation, with special emphasis on practical implications for school teaching and learning.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

EPSY 2020H. Learning and Development in Education (Honors). 3 hours.
Not open to students with credit in EPSY 2020.
Prerequisite: Permission of Honors.
Learning and developmental processes and their application to educational settings. Special emphasis is placed on cognitive theory as it relates to school learning and experimental methods for conducting studies of the learner.

EPSY 3010. Child and Adolescent Development for Education. 3 hours.
Prerequisite: EPSY 2020.
Cognitive, sociocultural, emotional, and moral development from infancy to early adulthood, with particular emphasis placed on developmental issues relevant to education.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

EPSY 3010H. Child and Adolescent Development for Education (Honors). 3 hours.
Not open to students with credit in EPSY 3010.
Prerequisite: EPSY 2020 and permission of Honors.
Child and adolescent development is examined in-depth

from an educational perspective. Cognitive, emotional, moral, and social aspects of development are emphasized.

EPSY(PSYC)(ARTI) 3020. Introduction to Cognitive Science. 3 hours.
Prerequisite: PSYC 1101 or PHIL 1000 or EPSY 2020.
Interdisciplinary study of mind and intelligent activity that forms cognitive sciences. Contributions of psychology, philosophy, linguistics, biology, anthropology, computer science, and education toward uncovering important aspects of the mind and intelligent activity are discussed.

EPSY 4000/6000. Independent Study in Educational Psychology. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study agreed upon by the student and sponsoring professor.
Non-Traditional Format: Prior arrangement with professor is made for course work assignment and hours to be completed.

EPSY 4060. Psychological Interventions in the Schools. 3 hours.
The roles, functions, and practices of child psychologists in schools and other applied settings.

EPSY 4310/6310. Prevention and Remediation of Classroom Behavior Problems. 3 hours.
Prevention and management of classroom behavior problems using behavioral, humanistic, and motivational strategies. Focuses on prevention of problem behaviors through effective teaching and classroom design.

(ERSH) Educational Research and Measurement

College of Education

ERSH 4200/6200. Methods of Research in Education. 3 hours.
Diverse research approaches used in behavioral science settings, including critical review and interpretation of published research.

ERSH 4600/6600. Applied Educational Assessment. 3 hours.
Development, administration, scoring, analysis, and interpretation of classroom educational assessments used in the service of instruction and accountability objectives. Traditional as well as current approaches (portfolios, performance assessments). Although classroom approaches are emphasized, standardized measures are also studied.

(ESCI) Science Education

College of Education, Department of Science Education

ESCI 3450. Practicum in Science Education. 1 hour.
Intensive school-based experiences in grades 7 through 12 requiring students to teach in varied cultural and regional settings.
Non-Traditional Format: One hour a week in a school based practicum.

ESCI 4000/6000. Special Problems in Science Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Specialized study appropriate to the needs of the individual.
Non-Traditional Format: Independent study.

ESCI 4030/6030. Teaching Science to Students with Special Educational Needs. 3 hours.
Basis and practice of modifying science programs/teaching for students with special educational needs and introductory skills for modifying science programs/teaching strategies.

ESCI 4420. Science for Early Childhood Education. 3 hours.
Prerequisite: Permission of department.
Science curriculum, instructional practices, and assessment techniques for young children. Content selection and organization, lesson and unit planning, teaching and assessment materials.

ESCI 4430. Science Curriculum for the Middle Grades. 3 hours.
Prerequisite: Permission of department.
Corequisite: GEOL 4750/6750.
Examination and selection of science curriculum materials and assessments. Evaluating and reformulating materials for relevance to middle grades classrooms. Special attention to examples and problems drawn from the life, earth, and environmental sciences.

ESCI 4440. Science Teaching Methods in the Middle Grades. 3 hours.
Prerequisite: Permission of department.
Science teaching methods using classroom, laboratory, and field experiences. Development of a range of strategies appropriate for use with middle grades students. Special attention to examples and problems drawn from the physical sciences.

ESCI 4450/6450. Science Curriculum and Learning. 3 hours.
Prerequisite: EPSY 2020 and EFND 2030.
Science curriculum models for students in grades 7 through 12 in relation to goals for science education and classroom practice. Development, selection, and evaluation of curricular materials based on research in learning.

ESCI 4460/6460. Methods of Science Teaching. 3 hours.
Prerequisite: EPSY 2020 and EFND 2030.
Corequisite: ESCI 3450 and ESCI 4450/6450.
Science instructional strategies and classroom assessment for students in grades 7 through 12. Classroom management, lesson planning, and safety in the science classroom.

ESCI 4470/6470. Special Topics in Science Teaching. 2 hours.
Selected modules on science teaching and learning on special topics such as applications of life science teaching; applications of physical science teaching; interdisciplinary science teaching; multimedia and computers in science teaching; reading, writing, and literacy in science.

ESCI 4480/6480. Technological Capabilities for Science Teaching. 3 hours.
Prerequisite: Permission of department.
Corequisite: ESCI 4450/6450.
Classroom applications of electronic technologies to science teaching, including analog audiovisual media, microcomputers, telecommunications networks, and their interactions. Technology-facilitated teaching strategies and curriculum integration in science teaching at the middle and secondary school levels.

ESCI 5460/7460. Science Education Student Teaching. 11 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5470/7470 and ESCI 5480/7480.
School-based experiences in grades 7 through 12 under the supervision of a university supervisor.
Non-Traditional Format: Eleven weeks, full-time experience.

ESCI 5470/7470. Reflection on Science Teaching. 2 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5460/7460 and ESCI 5480/7480.
Topics following student teaching include development as a reflective practitioner, preparation for being a first year teacher, and professional portfolio development.

ESCI 5480/7480. Philosophy and Leadership in Science Classroom Practice. 2 hours.
Prerequisite: ESCI 3450 and ESCI 4450/6450 and ESCI 4460/6460 and ESCI 4470/6470.
Corequisite: ESCI 5460/7460 and ESCI 5470/7470.
Historical, cultural, social, political, and professional influences related to science classroom practice in grades 7 through 12.

(ESOC) Social Science Education

College of Education, Department of Social Science Education

ESOC 2380. Using Computers in Social Science Education. 1 hour. 1 lab period of 2 hours each per week.
Computer technology skills, including social science education applications.

ESOC 2450. Initial Field Experience in Social Science Education. 1 hour.
In-school observation of middle and secondary grades in social studies.
Non-Traditional Format: In-school observation of middle and secondary grades social studies supervised by faculty.

ESOC 3420. Early Childhood Social Studies. 2-3 hours.
Prerequisite: Permission of department.
Social studies curriculum and instruction for young children; content selection, lesson and unit planning, teaching methods, materials, and evaluation strategies.

ESOC 4000/6000. Special Problems in Social Science Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Intensive study of a problem in social science education through library research or collection and analysis of primary data.
Non-Traditional Format: Individual study supervised by a faculty member.

ESOC(HIST) 4150/6150. Teaching United States History. 3 hours.
Classic historiography and current debates among historians over major themes and events in United States history. Examination of ways in which this historical scholarship can be incorporated into social studies teaching. Evaluation of materials and methods used to teach United States history in secondary and middle schools.

ESOC 4350/6350. Social Science Curriculum in Secondary Schools. 3 hours.
Prerequisite: ESOC 2450 or permission of department.
Current status of and trends in the social science curriculum in secondary schools, with illustrations of selected curriculum models for both cognitive and affective learning.

ESOC 4360/6360. Methods of Teaching Social Science in Secondary Schools. 3 hours.
Prerequisite: Permission of department.
Instructional objectives and the examination and application of instructional procedures, utilization of media, and methods of evaluation.

ESOC 4400/6400. Teaching Social Studies in the Middle Grades. 3 hours.
Prerequisite: Permission of department.
Instructional procedures and materials focusing upon the cognitive and affective processes relevant to middle grades social studies education.

ESOC 4450. Senior Field Experience in Social Science Education. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Observation and practical experience in middle and secondary grades social studies.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

ESOC 5010/7010. Teaching of Geography. 3 hours.
Prerequisite: Permission of department.
Geographic principles and the history of geography in the school curriculum; the literature of the field, including textbooks; the application of special techniques; and geographic evaluation.

ESOC 5200/7200. Economic Education in the Social Science Curriculum. 3 hours.
Instructional strategies and materials for teaching basic economic concepts in an integrated kindergarten through grade 12 social science curriculum, with emphasis on utilizing a decision-making model for analyzing contemporary economic problems.

ESOC 5460/7460. Student Teaching in Social Science Education. 1-10 hours. Repeatable for maximum 20 hours credit.
Prerequisite: Permission of department.
Teaching social studies in the middle or secondary grades under supervision of school and university professional personnel.
Non-Traditional Format: In-school teaching experience in middle and secondary grades social studies supervised by faculty.

ESOC 5520/7520. Teaching Politics, Government, and Citizenship. 3 hours.
Prerequisite: Permission of department.
Rationale for and resources in political science and civic/citizenship education, the role of teachers and schools in political socialization, and teaching procedures for instruction on state and local citizenship in middle grades and high schools.

(ETES) Technological Studies

College of Education, Department of Occupational Studies

ETES 2010. Internship in Technological Studies. 1-3 hours. Repeatable for maximum 9 hours credit.
Supervised educational experiences to address specified goals and objectives for teaching technological studies.
Non-Traditional Format: Supervised experience in school or occupational setting.

ETES 3100. Technical Field Theory. 3-12 hours. Repeatable for maximum 12 hours credit.
Corequisite: ETES 3110.
Achievement in technical theory associated with occupational fields evaluated through National Occupational Competency Testing Institute or official scores submitted from a health care credential agency. Technological studies students are administered written examination to determine competence. Credit recommended by comparing scores with national norms.
Non-Traditional Format: Credit awarded based on test score/performance.

ETES 3110. Technical Field Skills. 3-12 hours. Repeatable for maximum 12 hours credit.
Corequisite: ETES 3100.
Performance achievement in technical field evaluation through National Occupational Competency Testing Institute or official scores submitted from a health care credential agency. Technological studies students are administered comprehensive performance examination on tasks common to specific occupational field. Credit recommended by comparing scores with national norms.
Non-Traditional Format: Credit awarded based on test score/performance.

ETES 3320. Creative Activities for Teachers. 3 hours. 1 hour lecture and 3 lab periods of 2 hours each per week.
Demonstration and hands-on learning, including problem solving, designing, construction, and testing of prototypes, and activities that increase aesthetic, psychomotor, and cognitive development.

ETES 4350/6350. Developing Programs in Technological Studies. 3 hours.
Content identification, program organization, preparation of instructional objectives, and guidelines for selection and development of instructional materials for technological studies.

ETES 5010/7010. Technology and Society. 3 hours.
Impact of technology on society and culture. Included is the investigation of positive and negative aspects of various technologies, with specific attention to the technology education curriculum.

ETES 5020/7020. Communication Systems. 3 hours.
Communication technology in business and industry. Use of microcomputer applications for computer graphics, desktop publishing, electronic presentation, and telecommunications, including layout and design principles and procedures, graphic production systems, photographic processes, societal impacts, and innovative technologies.

ETES 5030/7030. Manufacturing Systems. 3 hours.
Manufacturing through the design, planning, and development of a specific product.

ETES 5040/7040. Construction Systems. 3 hours.
Construction practices used to produce structures in residential and commercial settings. Special emphasis placed on safety in laboratory-based education.

ETES 5060/7060. Energy Systems. 3 hours.
Present and future applications of the technical, economic, and environmental aspects of energy systems and evaluation of their advantages and disadvantages.

ETES 5070/7070. Research and Experimentation in Technological Studies. 3 hours.
Solving technological problems through the analysis and implementation of technical research and experimentation methods. Suitable research and experimentation activities will be developed and analyzed for technology education programs in secondary schools.

ETES 5140/7140. Laboratory Planning, Management, and Safety. 3 hours.
Planning and managing laboratories, including the development of a safety program and selection of equipment, tools, and supplies.

ETES 5460. Student Teaching in Technological Studies. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Supervised student teaching experience in an existing technological studies program.
Non-Traditional Format: Supervised full-time experience in school setting.

(EXRS) Exercise Science

College of Education, Department of Exercise Science

EXRS 2010. Introduction to Exercise Science. 2 hours.
The exercise and sport sciences, including history, elementary concepts, methodologies, applications, and career opportunities.

EXRS 2100. Introduction to Athletic Training. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Modern principles in the prevention, care, treatment, rehabilitation, and management of athletic related injuries and illnesses.

EXRS 2130. Athletic Training Emergency Care. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 2100 and EXRS 3470 and permission of school.
Rapid assessment, resuscitation, packaging, and transportation techniques for injured athletes.

EXRS 3100. Recognition and Evaluation of Athletic Injuries I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 2100.
Methods and techniques in the recognition and evaluation of athletic injuries to the upper body.

EXRS 3110. Recognition and Evaluation of Athletic Injuries II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 2100.
Methods and techniques in the recognition and evaluation of athletic injuries to the lower body.

EXRS 3450. Practicum in Fitness and Conditioning. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of major.
Individual practical experience in exercise leadership, fitness testing, and clinical exercise testing conducted at the University of Georgia fitness center and recreational activity facilities.
Non-Traditional Format: Contact hours established by supervisor.

EXRS 3460. Practicum in Physical Therapy. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of major.
Individual practical experience in physical therapy conducted at clinical settings under the supervision of certified physical therapists.
Non-Traditional Format: Contact hours established by supervisor.

EXRS 3470. Practicum in Athletic Training. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of school.
Study and treatment of athletic injuries under the guidance and direct supervision of physicians and certified athletic trainers.
Non-Traditional Format: Contact hours established by supervisor.

EXRS 3480. Practicum in Exercise Science Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of school.
Individual practical experience assisting with research in exercise science.
Non-Traditional Format: Contact hours established by supervisor.

EXRS 3600. Applied Biomechanics. 2 hours.
Not open to students with credit in EXRS 4200/6200-4200L/6200L.
Prerequisite: CBIO 2200-2200L and MATH 1101.
Biomechanical principles of human motion and the structure of the human body. Laws of mechanics and tissue biomechanics concepts are applied to sport, dance, daily living activities, physical training, and injury etiology and prevention. Designed for the non-exercise-science major.

EXRS 3700. Applied Exercise Physiology. 2 hours. Not open to students with credit in EXRS 4630/6630-4630L/6630L.
Prerequisite: CBIO 2200-2200L and CBIO 2210-2210L.
Physiological responses to exercise and adaptations to training. Influence of physical activity on health, design of conditioning programs, physical activity in select populations and conditions. Designed for non-exercise-science majors.

EXRS 3830. Measurement and Evaluation in Exercise Science. 3 hours.
Prerequisite: EXRS 2010 and MATH 1113 and permission of school.
Methods in measuring and evaluating physical performance, knowledge, and attitudes; procedures for evaluating tests and their results; data analysis techniques.

EXRS 4000. Special Problems in Exercise and Sport Science. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Independent study of selected topics in exercise and sport science.
Non-Traditional Format: Variable hours established by faculty.

EXRS 4100. Therapeutic Modalities in Athletic Training. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 2100.
Therapeutic modalities in the treatment of athletic injuries, including cryotherapy, thermotherapy, electrical stimulation, ultrasound, traction, mobilization, and massage.

EXRS 4110. Rehabilitation Techniques in Athletic Training. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 2100.
Rehabilitative techniques involving structured exercise for improving joint range of motion, strength, muscular endurance, balance, proprioception, and cardiovascular fitness used in the treatment of athletic injuries.

EXRS 4120. Administration of Sports Medicine. 3 hours.
Prerequisite: EXRS 4100 and EXRS 4110 and permission of school.
Advanced organization and administration principles in athletic training and sports medicine. Emphasizes the objectives, principles, and problems in the management of a comprehensive sports medicine program.

EXRS 4200/6200-4200L/6200L. Biomechanics I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and (PHYS 1111-1111L or PHYS 1211-1211L) and permission of school; Graduate level only: Permission of school.
Mechanical principles to human movement, equipment design, and injury.

EXRS 4300/6300. Exercise Epidemiology. 3 hours.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Health-related aspects of exercise, physical activity, and physical fitness from the perspective of epidemiology. Biological mechanisms for healthy adaptations to physical activity and the behavioral determinants of exercise participation.

EXRS 4310/6310. Physical Fitness Programs. 3 hours.
Prerequisite: Permission of school.
Physical fitness programs for adults and special populations. Topics include program goals and objectives, principles and methods of physical fitness development and testing, evaluation of existing programs, and administrative and programming considerations.

EXRS 4320/6320. Physical Activity and Aging. 3 hours.
Prerequisite: EXRS 4630/6630-4630L/6630L and permission of school.
Biological and psychological effects of aging in relation to physical activity and exercise.

EXRS 4400/6400. Exercise and Sport Psychology. 3 hours.
Prerequisite: Undergraduate level only: PSYC 1101 and CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Effects of participating in exercise and sport on psychological traits and states. Cognitive and neurobiological mechanisms and psychological limitations to athletic performance.

EXRS 4630/6630-4630L/6630L. Exercise Physiology I. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: CBIO 2200-2200L and CBIO 2210-2210L and permission of school; Graduate level only: Permission of school.
Physiological effects of human physical activity. Neuromuscular, cardiovascular, respiratory, metabolic, hormonal, and thermal responses and adaptations to exercise.

EXRS 4640-4640L. Scientific Principles of Conditioning and Fitness. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 4630/6630-4630L/6630L and permission of school.
Designing and implementing individualized exercise prescriptions for athletic conditioning or physical fitness development. Development of skills required in conducting physical fitness tests for aerobic power, body composition, flexibility, and muscular strength and endurance.

EXRS 4690/6690-4690L/6690L. Exercise Physiology II. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Undergraduate level only: EXRS 4630/6630-4630L/6630L and permission of school; Graduate level only: Permission of school.
Mechanics, energetics, and motor unit recruitment during skeletal muscle contraction; regulation of energy metabolism during exercise; mechanisms underlying oxygen delivery to muscle during exercise.

EXRS 4800-4800L. Biomechanics II. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EXRS 4200/6200-4200L/6200L and permission of school.
Effects of mechanical forces on bones, muscles, and connective tissue. The biomechanics of specific regions of the body and mechanically-induced injuries are studied.

EXRS 5450. Internship in Exercise and Sport Science. 3-15 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of school.
Practical experience in an off-campus sports medicine or health/fitness program.
Non-Traditional Format: Contact hours established by supervisor.

(FDNS) Foods and Nutrition

College of Family and Consumer Sciences, Department of Foods and Nutrition

FDNS 2000. Introduction to Family and Consumer Sciences. 1 hour.
The specialties and professions comprising the fields in family and consumer sciences. Systems perspective is emphasized in examining quality of life issues. Discussions include the personal, professional, and technical elements involved in career development.

FDNS 2100. Human Nutrition and Food. 3 hours.
Nutritional needs and food choices for the optimal health of the individual during the life cycle.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

FDNS 2400. Introduction to Nutrition Science. 1 hour.
Orientation for new students in nutrition science. Problem-based discussions concerning the basic sciences relating to nutrition research.

FDNS 3010. Special Problems in Foods and Nutrition. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Independent study and research.
Non-Traditional Format: Directed study.

FDNS 3100. Macronutrients and Energy Balance. 3 hours.
Prerequisite: FDNS 2100 and BCMB(BIOL)(CHEM) 3100 and (CBIO 2210-2210L or VPHY 3100).
Human nutrition related to carbohydrates, lipids, protein, and energy with special emphasis on diet and performance under varying conditions of health. Topics include food sources, biochemical functions, and metabolism.

FDNS 3600-3600L. Food Principles. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FDNS 2100 and (BIOL 1103-1103L or BIOL 1107-1107L) and [(CHEM 1110 and CHEM 1110L) or (CHEM 1211 and CHEM 1211L)].
Food selection, preparation, evaluation, and composition.

FDNS 3610-3610L. Quantity Food Production. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FDNS 3600-3600L.
Principles of food preparation in large quantities; institutional equipment and procedures.

FDNS 4050/6050. Optimal Nutrition for the Life Span. 3 hours.
Not open to students with credit in FDNS 4510/6510.
Prerequisite: FDNS 2100.
Nutritional needs of infants, young children, adolescents, pregnant and lactating women, and middle-aged and elderly people.

FDNS 4100/6100. Micronutrient Nutrition. 4 hours.
Prerequisite: FDNS 3100 and BCMB(BIOL)(CHEM) 3100 and (CBIO 2210-2210L or VPHY 3100).
Human needs for vitamins, minerals, and electrolytes with emphasis on biochemistry, physiology, epidemiology, food sources, and their role in performance under varying conditions of age and health.

FDNS 4510/6510. Nutrition Related to the Human Life Cycle. 3 hours.
Prerequisite: FDNS 3100.
Nutritional health needs related to specific stages of the human life cycle. Special emphasis will be given to physiological changes and nutrition needs during pregnancy, lactation, infancy, childhood, adolescence, and adulthood.

FDNS 4520/6520. Dietetic Practice and Nutrition Support. 2 hours.
Corequisite: FDNS 4530/6530.
Specialized nutrition practice in the clinical setting including nutrition assessment, enteral and parentera nutrition, and nutrition care documentation.

FDNS 4530/6530. Medical Nutrition Therapy. 4 hours.
Prerequisite: FDNS 4100/6100.
Diet modifications for disease prevention and treat

ment. Special emphasis is given to the study of gastrointestinal disease and metabolic, cardiovascular, and renal disorders.

FDNS 4540/6540. Public Health Dietetics. 3 hours.
Prerequisite: FDNS 4050/6050 or FDNS 4510/6510.
Nutrition in public health care and tools for successful management and delivery of nutrition services, including knowledge of community assessment, planning, implementation, and evaluation as related to nutritional care.

FDNS 4550/6550. Nutritional Biodynamics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDNS 3100.
Nutrients as precursors for organ and cell components and energy stores, emphasizing processes of turnover, growth, biosynthesis, and metabolism. Students will explore quantitative and dynamic issues using interactive computer modeling.

FDNS 4560/6560. Nutrition and Aging. 3 hours.
Prerequisite: (FDNS 3100 or FDNS 4050/6050) and (CBIO 2210-2210L or VPHY 3100).
Foods and nutrients in the health and well-being of the elderly; effects of aging on macro and micronutrient needs; influence of disease, medications, economics, and culture; nutritional assessment, support, and services; health promotion and disease prevention; future directions for research.

FDNS 4580. Undergraduate Special Topics in Foods and Nutrition. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FDNS 3100 or FDNS 4050/6050.
Selected topics from the field of foods and nutrition.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

FDNS 4600/6600. Food and the Consumer. 3 hours.
Prerequisite: FDNS 3600-3600L.
Health, safety, and policy issues related to food consumption trends; nutrient composition of foods, food additives, food allergies and hypersensitivities, naturally occurring toxins, pathogens, pesticides, biotechnology-derived foods, irradiated foods, and food laws and regulations.

FDNS 4610/6610. Foodservice Procurement and Financial Management. 2 hours.
Prerequisite: FDNS 3610-3610L.
Purchasing methods, specifications, storage and issuing procedures, inventory systems. Cost control, budgets, and financial statements used in foodservice organizations.

FDNS 4620/6620. Management of Foodservice Organizations. 3 hours.
Prerequisite: FDNS 4610/6610.
Management, staffing, and delivery systems as they pertain to the resources and organization of public and private foodservice institutions.

FDNS 4630/6630. Cultural Aspects of Foods and Nutrition. 3 hours.
Prerequisite: FDNS 2100.
Foodways, food habits, and food-related behavior of various population groups and their influences on the nutritional status of group members.

FDNS 4640/6640. Food Sanitation and Safety. 3 hours.
Prerequisite: FDNS 3600-3600L.
Safe food handling for foodservice and the consumer, with emphasis on causes and prevention of foodborne illness.

FDNS 4650/6650. Experimental Study of Food. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: [(FDNS 2100 and FDNS 3600-3600L and STAT 2000 or STAT 2210] or permission of department.
Prerequisite or corequisite: CHEM 2200 and CHEM 2200L.
Functional and nutritional properties of components in food products; techniques to evaluate food products for consumer acceptability including individual and group laboratory experimentation; computer applications.

FDNS 4660/6660. Delivery Systems for Food and Nutrition Information. 3 hours.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and one course in Speech.
Transfer of food and nutrition information to consumers using various media.

FDNS 4710/6710-4710L/6710L. Catering. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDNS 3610-3610L or permission of department.
Types of catering; establishing catering businesses; principles and practice of menu planning, work planning, food preparation, styles of service, cost accounting, and resource management.

FDNS 4720/6720. Menu Management and Service. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Meal planning and service styles for individuals, families, and institutions; cultural, nutritional, marketing, and social aspects of foods; government regulations related to meal planning.

FDNS 4730/6730. Food Sales and Service. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Effective sales and service techniques; market research and strategies specific to the foodservice industry.

FDNS 4740/6740. Food Service Facilities Planning and Development. 3 hours.
Prerequisite: FDNS 3610-3610L or permission of department.
Concepts, strategies, and skills needed in planning, designing, and equipping food service facilities.

FDNS 4750/6750. Foodservice Cost Controls and Systems. 3 hours.
Prerequisite: FDNS 4620/6620 or permission of department.
Cost control and accounting principles for the foodservice industry; manual and computer information systems for foodservice inventory and cost control.

FDNS 4900. Seminar in Foods and Nutrition. 1 hour.
Prerequisite: FDNS 3100.
Survey of current literature on selected topics in foods and nutrition.

FDNS 4960H. Directed Honors Research. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: FDNS 2100 and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

FDNS 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed research with a faculty member.

FDNS 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Individual research with a faculty member.

FDNS 4990H. Honors Research. 3 hours.
Prerequisite: Permission of Honors.
Individual research in Foods and Nutrition or a closely related field.
Non-Traditional Format: Directed study.

FDNS 5010. Directed Research in Nutrition Science. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FDNS 3100 or BCMB(BIOL)(CHEM) 3100.
Independent research designed for the nutrition science major. Literature review, laboratory work, experimental design, and interpretation of the results will be required.
Non-Traditional Format: Directed research.

FDNS 5020. Directed Research in Consumer Foods. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: FDNS 3600-3600L and (STAT 2000 or STAT 2210) and permission of department.
Independent research in consumer foods, including literature review, laboratory work, experimental design, and interpretation of the results.
Non-Traditional Format: Directed study.

FDNS 5030. Directed Research in Dietetics. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FDNS 3100.
Independent research designed for the dietetics major. Literature review, laboratory work, experimental design, and interpretation of the results will be required.
Non-Traditional Format: Directed research with format appropriate for research project. Variable hours.

FDNS 5300. Senior Thesis. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FDNS 3100.
Research project and thesis writing.
Non-Traditional Format: Thesis.

FDNS 5300H. Honors Thesis. 1-3 hours. Repeatable for maximum 9 hours credit.
Not open to students with credit in FDNS 5300.
Prerequisite: FDNS 2100 and permission of Honors.
Individual research in the major field or in a closely related field to write a thesis.
Non-Traditional Format: Honors thesis.

FDNS 5800. Dietetics Practicum. 3 hours.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and permission of department.
Work experience under the direction of a dietitian in a health care or foodservice facility.
Non-Traditional Format: Supervised work experience with a dietitian or other professional in the field of foods and nutrition.

FDNS 5910/7910. Foods and Nutrition Internship. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and permission of department.
Supervised experience in dietetics, foodservice management, or a foods and nutrition related industry.
Non-Traditional Format: Supervised practice experience only. Variable hours.

FDNS 5930. Consumer Foods Internship. 3-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: FDNS 2100 and FDNS 3600-3600L and permission of department.
Work in a public or private institution to obtain practical professional experience.
Non-Traditional Format: Internship.

(FDST) Food Science and Technology

College of Agricultural and Environmental Sciences, Department of Food Science and Technology

FDST 2010. Food Issues and Choices. 3 hours.
Not open to students with credit in FDST 3000.
Scientific preservation of foods. Commercial food products will be viewed from historical, cultural, nutritional, chemical, microbiological, gustatory, and regulatory perspectives. Particular emphasis will be placed on food processes and packages designed to ensure safety and enhance quality.

FDST 2020. Art, Science, and the History of Beer. 1 hour.
Not open to students with credit in FDST(MIBO) 4120/6120-4120L/6120L.
Beer history, folklore, and science. Beer and brewing from the dawn of mankind through ancient Sumaria, Pharoahs Egypt, Medieval Europe, Colonial America to today. Beer and society; religion, festivals, and prohibition. Beer and science; biochemistry, chemistry, food science, nutrition, microbiology, and engineering.

FDST 3000. Introduction to Food Science and Technology. 3 hours.
The sources of raw materials; the processing, storage, and handling of processed foods; and the problems involved in the processing of these products.

(FDST)ADSC 3650-3650L. Introductory Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Meat science focusing on the meat industry, role of muscle foods in the human diet, meat inspection, muscle structure and function, conversion of muscle to meat, anatomy, factors influencing meat quality, meat processing, and meat safety and quality control.

(FDST)POUL 3860. Poultry Processing. 3 hours.
Prerequisite: POUL 3600 or FDST 2010 or FDST 3000 or permission of department.
Basic principles and methods of processing poultry and eggs. Broiler harvesting, slaughter, evisceration, plant sanitation, microbiology, inspection, grading, regulations, water and waste water handling, quality control and HACCP plans, further processing, and shell egg handling and processing.

FDST 3910. Food Science Internship. 3 hours.
Provides a practical educational experience while working in an operational food industry plant or laboratory. Non-Traditional Format: At least ten weeks of full-time employment in a food processing plant or laboratory is required.

FDST 4000. Food Science Seminar. 1 hour.
Seminar on topics in Food Science.

FDST 4010/6010. Principles of Food Processing. 3 hours.
Prerequisite: MIBO 3500 and CHEM 2100 and CHEM 2100L and (FDST 2010 or FDST 3000).
Principles of food preservation by chilling, freezing, dehydration, fermentation, and thermal processing.

FDST 4020/6020. Processing Methods in Food Science. 2 hours. 2 lab periods of 3 hours each per week.
Prerequisite: FDST 4010/6010.
Processing methods to control microbial and enzymatic activity and to minimize chemical and physical deterioration of foods.

FDST(MIBO) 4030/6030-4030L/6030L. Food Microbiology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Interactions of microorganisms with food and the implications of these interactions for food preservation, safety, and fermentations. Pathogenic microorganisms associated with food. Analysis of foods for the presence of microorganisms.

FDST 4040/6040-4040L/6040L. Food Chemistry. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and (FDST 3000 or FDST 4010/6010).
Chemical, physical, and functional properties of food constituents and ingredients.

FDST 4050/6050-4050L/6050L. Food Engineering Fundamentals. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PHYS 1111-1111L and MATH 2210 and MATH 2210L.
Prerequisite or corequisite: FDST 4010/6010.
Mass and energy balance, fluid flow, heat transfer, and refrigeration in food plant operations. The theory, calculations and design practices, and equipment used in these operations, as well as the physical, chemical, and microbial changes that can occur in foods in processes employing these operations.

FDST 4060/6060-4060L/6060L. Food Engineering Fundamentals. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FDST 4050/6050-4050L/6050L or permission of department.
Phase equilibria in foods, psychrometrics, water activity, freezing, dehydration, evaporation, membrane separations, extrusion, and process control.

FDST 4070/6070. Nutritional Quality and the Effect of Technology. 3 hours.
Prerequisite: FDST 4040/6040-4040L/6040L or BCMB (BIOL)(CHEM) 3100.
The nutritional properties of food and the effects of modern technology on nutritional quality.

FDST 4080/6080-4080L/6080L. Instrumental Methods of Food Analysis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 2100 and CHEM 2100L.
Spectrophotometric, colormetric, chromatographic, and potentiometric methods of analysis as applied to food. Emphasis will be placed upon correlation and interpretation of results.

FDST 4090/6090-4090L/6090L. Food Quality Control. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: [FDST 2010 or FDST 3000] and STAT 2000.
Designing and implementing food quality and process control programs. Monitoring and controlling process specifications and capabilities. Developing food attribute and variable control charts. Examining food sampling plans and verifying HACCP food safety plans.

FDST 4100/6100. Governmental Regulation of Food Safety and Quality. 2 hours.
Role of mandatory and optional food laws and regulations exercised by state, federal and international agencies on food quality, safety, wholesomeness, and nutrition.

FDST 4110/6110-4110L/6110L. Food Packaging. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST 3000.
Raw materials, processes, and machinery used in the transportation, storage, and marketing of packaged food products. The relationship between packaging materials, food processing operations, and product quality. Evaluation of chemical and physical properties of food package materials.

FDST(MIBO) 4120/6120-4120L/6120L. Food Fermentations. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Microbial and technical aspects of dairy, vegetable, meat, grain, and fruit fermentations. Products studied include cheese, sausage, beer, wine, and soy sauce.

FDST 4130/6130. Food Biotechnology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 or permission of department.
Recombinant DNA in food and enzyme biotechnology, tissue culture, and microbial transformations. Applications and regulations of biotechnology in the fats and oils industry.

FDST(ADSC) 4140/6140-4140L/6140L. Advanced Meat Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FDST(MIBO) 4030/6030-4030L/6030L and FDST 4040/6040-4040L/6040L.
Meat processing and technology, scientific basis for meat as a food, USDA and FDA regulations governing meat processing, and the latest innovations in commercial meat processing.

FDST 4250/6250-4250L/6250L. New Food Product Development. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (FDST 4010/6010 and FDST 4040/6040-4040L/6040L) or permission of department.
New food product development, food constituents and functionality, ingredient functions and selection, sensory evaluation/application, dietary guidelines and food regulations affecting product development, new product development project management, protecting innovations, market testing.

FDST(EHSC)(MIBO) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

FDST(EHSC)(MIBO) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

FDST 4800. Special Problems in Food Science. 1-3 hours.
Prerequisite: Permission of department.
Undergraduate research problems in food science.
Non-Traditional Format: Individual study, reading, and/or laboratory projects under the direction of a project director.

FDST 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, and/or projects under the direction of a faculty member.
Non-Traditional Format: Students will complete the requirements for this course under the direction of a faculty member.

FDST 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, and/or projects under the direction of a faculty member.
Non-Traditional Format: Students will complete the requirements for this course under the direction of a faculty member.

FDST 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.

Individual research in the field of the major or in a closely related field.
Non-Traditional Format: Students will complete the requirements for this course under the direction of a faculty member.

FDST 5010/7010-5010D/7010D. Food Formulation and Preservation. 3 hours. 1 hour lecture and 1 discussion period of 4 hours each per week.
Not open to students with credit in FDST 4010/6010.
Food preservation by chilling, freezing, fermentation, canning, and dehydration. Formulation of food products and interactions of food ingredients. Applications of principles to experiments in food science.

(FINA) Banking and Finance

Terry College of Business, Department of Banking and Finance

FINA 3000. Financial Management. 3 hours.
Not open to students with credit in FINA 3000H.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L.
The basic concepts and analytical tools of finance in both corporate finance and investments. Topics include risk and return, financial institutions, efficient markets, valuation theory, capital budgeting, portfolio theory, cost of capital, and international finance.

FINA 3000H. Financial Management (Honors). 3 hours.
Not open to students with credit in FINA 3000.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L and permission of Honors.
The basic concepts and analytical tools of finance in both corporate finance and investments. Topics include risk and return, financial institutions, efficient markets, valuation theory, capital budgeting, portfolio theory, cost of capital, and international finance. Discussion and analysis of specific applications of these topics.

FINA 4000. Money and Capital Markets. 3 hours.
Prerequisite: FINA 3000.
The operations and functions of domestic and international finance markets and institutions. The determinants of bond prices and the level and structure of interest rates. Techniques for measuring and managing risk in financial markets.

FINA 4150. Investment and Portfolio Management. 3 hours.
The fundamental principles of finance as applied to investment, portfolio management, and firms. Emphasis on risk, return, and valuation of securities, other investments, and general cash flows. This is a business elective for business majors (not open to finance majors) and is available for non-business majors.

FINA 4200. Corporate Finance Theory. 3 hours.
Prerequisite: FINA 3000.
Development of a framework that is useful for understanding a broad range of important corporate financial decisions. Substantial emphasis will be placed on discussion of the determinants of corporate financing and payout policies, alternative methods of security issuance, and mergers and acquisitions.

FINA 4210. Applied Corporate Finance. 3 hours.
Prerequisite: FINA 3000.
Corporate financial decision making by applying the tools, techniques, and theories of finance to actual business decisions.

FINA 4280/6280. Small Business Finance. 3 hours.
Prerequisite: FINA 3000.
Principles of small business finance and the raising and management of venture capital, financial planning, forecasting, capital budgeting, working capital management, and sources of capital. This course is aimed at students planning careers in either small business management or in small business consulting.

FINA 4310. Survey of Investments. 3 hours.
Prerequisite: FINA 3000.
The securities markets, investor objectives, introduction to portfolio theory and the analytical tools of portfolio management, and an examination of investment alternatives.

FINA 4320. Derivative Security Markets. 3 hours.
Prerequisite: FINA 4310 and MATH 2200 and MATH 2200L.
The markets for futures, options, and other derivative securities. The mechanics of trading, regulation, pricing, hedging, and risk management using derivatives.

FINA 4380. Security Analysis. 3 hours.
Prerequisite: FINA 4310.
The determinants of values for individual securities with the emphasis on common stocks. Financial statement analysis, forecasting techniques, and financial modeling.

FINA 4420. Management of Financial Institutions. 3 hours.
Prerequisite: FINA 3000.
Asset, liability, and capital management for firms operating in the dynamic environment of the financial-services industry. The acceptance, measurement, and management of risk, both on and off the firm's balance sheet, arising from unexpected changes in interest rates, exchange rates, and commodity prices. Financial-firm simulation game.

FINA 4600. Public Finance. 3 hours.
Prerequisite: FINA 3000.
Public finance at the federal, state, and local levels. Governmental revenues and expenditures, inter-governmental fiscal relations, public debt, and fiscal policy

FINA 4800. Internship and/or Cooperative Education. 3 hours.
Prerequisite: FINA 3000.
Students are permitted to enter business establishments or governmental agencies for the purpose of obtaining practical and applied business experience. An in-depth paper based on an approved banking or finance topic is required.
Non-Traditional Format: Internship not involving formal lecture or laboratory.

FINA 4810/6810. International Finance. 3 hours.
Prerequisite: FINA 3000.
International business decision making emphasizing the effects of internationalized financial and non-financial markets. Exchange rate analysis, hedged costs of funds, economic exposure and management, capital budgeting, financial and corporate strategy, and the evaluation of international risks and returns.

(FINA)AAEC 4870/6870. Futures and Option Markets. 3 hours.
Prerequisite: Undergraduate level only: AAEC 2580 or ECON 2106.
Development, functions, and importance of futures and option markets. Futures and option contracts; issues such as speculation, the roles of commission houses, commodity exchanges, and clearinghouses; and the use of future contracts as instruments for financing business activities. Technical and fundamental trading theories.

FINA 4920. Special Topics in Finance. 3-9 hours.
Repeatable for maximum 9 hours credit.
Prerequisite: FINA 3000.
Individual, advance study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study not involving lecture or laboratory.

(FINA)REAL 5100. Real Estate Finance. 3 hours.
Prerequisite: REAL 4000.
The instruments, techniques, and institutions of real estate finance; sources of funds; mortgage risk analysis: emphasis on typical policies and procedures used in financing of residential, industrial, and commercial properties.

(FORS) Forest Resources

Warnell School of Forest Resources

FORS 3000-3000L. Field Orientation and Measurements in Forest Resources. 4 hours. 2 hours lecture and 2 lab periods of 4 hours each per week.
Prerequisite: (Enrollment in Professional Program of WSFR).
Land measurements and mapping; forest, wildlife, fisheries, and environmental resource observation and measurement. Use of School computer facilities for the analysis of measurement data and the development of summary descriptions of forest resources systems.

FORS 3010-3010L. Dendrology. 3 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite or corequisite: BIOL 1108-1108L.
Identification, classification, silvical characteristics and distribution of trees, shrubs, and other plants of importance to the management of forest resources.

FORS 3020-3020L. Forest Ecology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (Enrollment in Professional Program of WSFR) or permission of school.
Corequisite: FORS 3010-3010L or BTNY 4650/6650-4650L/6650L.
Individual, population, community and ecosystem processes regulating forest structure and function; interactions and functions of forest plants, animals, and microbes; effects of site, environmental factors, and disturbance on forest composition and dynamics.

FORS 3040. Tree Physiology. 2 hours.
Prerequisite: (Enrollment in Professional Program of WSFR) or [(BIOL 1108-1108L or BTNY 1210-1210L) and permission of school].
The vital processes and structures of woody plants: photosynthesis, respiration, carbon allocation, water relations, mineral nutrition, intrinsic and environmental factors controlling growth, reproduction, and plant morphology and wood anatomy. Human efforts to improve forest trees, including breeding, in vitro propagation, and genetic engineering.

(FORS)CRSS 3060-3060L. Soils and Hydrology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in CRSS 3050-3050L.
Prerequisite: CHEM 1212 and CHEM 1212L.
Soil formation and morphology, physical and chemical properties, soil-water interactions, hydrologic processes and water balance in the landscape, and soil and water quality. Emphasis on landscape management of soil and water resources for both productivity and environmental quality.

(FORS)ECOL 3260-3260L. Vertebrate Diversity and Evolution. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Not open to students with credit in CBIO 3000-3000L.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or permission of department.
The evolution, diversity, and higher order relationships of vertebrate animals and their principal adaptations to life.

FORS 3300. Introduction to Fish and Wildlife Management. 2 hours.
Prerequisite: BIOL 1108-1108L.
Principles governing conservation and management of fish and wildlife. The interrelations of wildlife management and other forest resource uses.

(FORS)RLST 3310. Outdoor Recreation and Environmental Awareness. 3 hours.
Prerequisite: Permission of major.
Environmental policies and land ethics of natural resource management agencies. Emphasis will be placed on understanding outdoor recreation behavior and issues arising from human-environment interactions, including carrying capacities and human-wildlife conflicts.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

FORS 3500. Wood Properties and Utilization. 2 hours.
Prerequisite: (Enrollment in Professional Program of WSFR).
Corequisite: FORS 3040.
Major uses of wood, characteristics of major wood products, processes involved in their manufacture and marketing, and properties of the wood raw material affecting its quality and use.

FORS(MARS) 3570. The Law of Earth Protection and Resource Use. 3 hours.
Not open to students with credit in AAEC 4930/6930 or FORS 5820/7820.
A first course in legal studies, and an introduction to environmental and natural resources law. Basics of the legal system; selected major protection and resource statutes, regulations, roles and methods of agencies; significant judicial opinions.

FORS(ECOL) 3580-3580L. Vertebrate Natural History. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Life history strategies of vertebrates with emphasis on ecology, behavior, taxonomy, and systematics.

FORS 3610-3610L. Forest Biometrics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Corequisite: FORS 3000-3000L.
Basic parametric statistical methods and concepts, including linear models, sample survey design and analysis, and applications to problems in forest resources. Analysis of forest resources data using standard statistical software.

FORS 3710-3710D. Forest Resource Economics and Management. 3 hours. 2 hours lecture and 1 discussion period of 2 hours each per week.
Prerequisite: (Enrollment in Professional Program of WSFR).
Theory and analytical tools used in forest resource management decision making. Topics include the role of economics in forest resource decision making, microeconomic principles, price formation and valuation of non-market outputs.

FORS 3910-3910L. Spatial Information in Forest Resources. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 3000-3000L.
Interpretation and use of maps, aerial photographs, and satellite imagery in forest resources; production of maps from field measurements; determination of land area and ownership; interpretation of contour maps. Spatial data bases: concepts and use.

FORS 3950. Forest Operations Study Tour. 2 hours.
Prerequisite: FORS 3500 or FORS 4010-4010L or permission of school.
Visits to active forestry operations in the Southeast. Forest management operations, harvesting and transportation operations, and conversion facilities such as pulp/paper mills, sawmills, and other processing plants will be emphasized. Students are expected to pay for room and board.
Non-Traditional Format: Class involves a week-long field trip before the beginning of fall semester.

FORS 3960. Forest Resources Internship. 2 hours.
Repeatable for maximum 8 hours credit.
Prerequisite: Permission of major.
Work for sixty to ninety days on at least three different professional-level assignments with a business, government agency or other professional organization. Repeatable for maximum eight hours credit, but no more than two hours may be counted toward graduation.
Non-Traditional Format: Internship.

FORS 4000/6000-4000L/6000L. Forest Soil Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS 3050-3050L or CRSS(FORS) 3060-3060L.
Corequisite: FORS 4010-4010L.
Morphological, physical, and chemical soil properties affecting tree growth and forest productivity; evaluation of soils and site quality; preparation of forest sites for planting, diagnosis, and correction of nutrient limitations; use of forest soil systems for waste treatment.
Non-Traditional Format: One Friday and one Friday-Saturday field trip are required.

FORS 4010-4010L. Silviculture. 4 hours. 3 hours lecture and 1 lab period of 5 hours each per week.
Prerequisite: FORS 3000-3000L and FORS 3020-3020L.
Theory and techniques of controlling regeneration, density, species composition, health, and quality of forest stands. Treatments studied include seeding and planting of tree species; thinning and regeneration cuts; and appropriate use of fire, pesticides, and fertilizers.

FORS 4020/6020. Genetics and Breeding of Forest Trees. 3 hours.
Prerequisite: BIOL 1108-1108L.
Genetic variation in forest trees; harnessing natural variation and creating new variation to meet breeding

objectives; biological and economic consequences of tree domestication; conservation of genetic resources.

FORS 4030/6030. Regional Silviculture. 3 hours.
Prerequisite: FORS 4010-4010L.
Identification of the major forest regions of the United States and discussion of their silvicultural management.

FORS 4060/6060-4060L/6060L. Field Ornithology. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS(ECOL) 3580-3580L or permission of school.
Bird identification, also emphasizing ecology, evolution, behavior, and field techniques.
Non-Traditional Format: Overnight field trip required.

FORS 4110/6110. Forest Hydrology. 3 hours.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Multidisciplinary examination of the terrestrial components of the hydrologic cycle focusing on the qualitative analysis of precipitation, snowmelt, runoff generation, routing, infiltration, and subsurface flow and transport. Emphasis is on the definition of hydrologic processes, identification of hydrologic resources, development of environmental monitoring techniques, and application to hydrologic resources management.

FORS 4120/6120. Quantitative Methods in Hydrology. 3 hours.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L or permission of school.
Advanced analysis of hydrologic processes to provide a theoretical understanding of precipitation, evapotranspiration, streamflow, groundwater occurrence and movement, and soil zone flow and transport. Emphasis is upon quantitative methods used in conjunction with field and laboratory data to identify flow and transport dynamics in hydrologic systems.

FORS 4130L/6130L. Field Methods in Hydrology. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: ENGR 3410 or CRSS(FORS) 3060-3060L or FORS 4110/6110 or GEOL 4220/6220 or GEOG 4030/6030 or CRSS 4600/6600-4600L/6600L.
Field data acquisition methods to hydrologic systems are used to determine precipitation quantity and quality, evapotranspiration, streamflow, groundwater occurrence and movement, and soil zone transport processes. Physical and chemical measurements are coupled to determine flow paths, mass balances, and the environmental fate of solutes.

FORS 4150. Environmental Systems. 2 hours.
Prerequisite: FORS 4120/6120 or permission of school.
Use of systems theory for environmental problems. Linear and nonlinear response to inputs using convolution and deconvolution. Applications include surface- and ground-water hydrologic and solute transport behavior. Problems related to land application of wastes and wetland processes will be addressed.

FORS 4160/6160-4160L/6160L. Environmental Monitoring. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CRSS(FORS) 3060-3060L and STAT 2000.
Design, implementation, and interpretation of sampling programs for environmental systems (especially aquatic systems) for monitoring, regulatory activities, quality control, scientific study, and impact assessment.

FORS 4300/6300-4300L/6300L. Management of Wildlife Habitat. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: [FORS 3020-3020L and FORS 3300] or permission of school.
Principles and practices related to the management of forested ecosystems for wildlife and biological diversity, with emphasis on habitat management at the stand and landscape level. Habitat management through use of appropriate silvicultural practices, wildlife enhancement techniques, and regulations is evaluated.

(FORS)ECOL 4310/6310-4310L/6310L. Limnology. 4 hours. 3 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: ECOL(BIOL) 3500-3500L or FORS 3300.
Aquatic ecosystems (lakes and streams) and their biota. Linkages between terrestrial and aquatic ecosystems.

FORS 4320/6320. Wildlife Physiology and Nutrition. 3 hours.
Prerequisite or corequisite: FORS 3300 or permission of school.
An advanced course relating animal physiology and nutrition to wildlife ecology and management.

FORS 4330/6330-4330L/6330L. Water Quality Management in Fisheries and Aquaculture. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L.
Chemical and biological aspects of water quality, with emphasis upon relationships between water quality and fish production. Practical information on water quality management and related fields.

FORS 4340/6340. Endangered Species Management. 3 hours.
Prerequisite: FORS(ECOL) 3580-3580L or FORS 3010-3010L or BTNY 4650/6650-4650L/6650L or permission of school.
Factors affecting extinctions and declines in biodiversity, including laws, policies, and management activities designed to protect species and critical habitats.

FORS 4370/6370-4370L/6370L. Fish Physiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ECOL(FORS) 3260-3260L or permission of school.
Basic fish physiology with an emphasis on the effects of environmental stresses on physiological functions of fish.

(FORS)MARS 4380/6380-4380L/6380L. Marine Fisheries Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L and permission of department.
Interaction of oceanographic processes with the life histories and productivity of marine fisheries species, and the human interactions with major marine fisheries.

FORS 4500-4500L. Introduction to Wood Technology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 3500.
Material science of wood, including wood structure, physical/mechanical properties, and how wood products are affected by the material characteristics.

FORS 4510-4510L. Processes in Wood Products Manufacturing. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Corequisite: FORS 4500-4500L.
Wood machining, drying, gluing, grading, and finishing.

FORS 4570L/6570L. Practical Wood Identification. 2 hours. 2 lab periods of 2 hours each per week.
Identification of domestic and commercial tropical woods.

FORS 4610/6610-4610L/6610L. Forest Mensuration. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 3000-3000L and FORS 3610-3610L.
Direct measurement and indirect estimation of primary and secondary forest products. Measures of stand productivity, density, and growth.

FORS 4620/6620. Timber Management. 3 hours.
Prerequisite: FORS 4610/6610-4610L/6610L.
Organization and management of forest properties for the production of commercial forest products.

FORS 4630L/6630L. Computational Methods and Computer Models in Forestry. 2 hours. 0 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: FORS 4610/6610-4610L/6610L.
Spreadsheets and forestry software packages to solve inventory and growth prediction problems.

FORS 4640/6640-4640L/6640L. Forest Inventory. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 4610/6610-4610L/6610L.
Planning forest inventories and comparison of various equal and unequal probability sampling concepts; permanent and temporary forest sampling procedures; current stand and future growth estimation principles.

FORS 4710/6710-4710L/6710L. Quantitative Decision Methods for Forest Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: FORS 3610-3610L and FORS 3710-3710D.
Analysis methods applicable to forest management planning and decision making in forestry. Particular emphasis on optimization procedures and financial analysis.

FORS 4730. Senior Project in Forest Resources Management. 4 hours. 1 hour lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in FORS 4750.
Prerequisite: FORS 3710-3710D.
Advanced problems in forest resources management integrating all courses to date.
Non-Traditional Format: Remaining hours are scheduled by students to fulfill project requirements. Includes substantial field work.

FORS 4750. Senior Thesis in Forest Resources. 4 hours.
Not open to students with credit in FORS 4730.
Prerequisite: Permission of school.
Supervised research integrating material from courses in the student's field of study. Written and oral presentation of research results and their significance.
Non-Traditional Format: Students may attend some lectures offered in Senior Project in Forest Resources Management. Students meet with thesis advisor on arranged basis. Students schedule own laboratory and field work.

FORS 4800/6800-4800D/6800D. Forest Resources Policy. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Prerequisite: FORS 3710-3710D or permission of school.
Forest policy as a process, establishing forestry agendas, political decision models, political institutions and interest groups, policy in organizations, current issues.

FORS 4900/6900-4900L/6900L. Wildlife Damage Management. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 3300 or FORS(ECOL) 3580-3580L or permission of school.
Theory and practice of assessing and controlling damage done by wild and feral vertebrate animals, especially mammals and birds. Emphasis is on protecting agricultural and forest crops and property.

FORS 4910. Wildlife Management Issues. 3 hours.
Prerequisite: FORS 3300 or FORS(ECOL) 3580-3580L or permission of school.
Biological, social, and political aspects of wildlife management issues and their solutions.

FORS 4920H. Honors Seminar in Natural Resources Ecology. 3 hours.
Prerequisite: [ECOL(BIOL) 3500-3500L or FORS 3020-3020L] and permission of school and permission of Honors.
Basic and applied ecological research, including scientific methodology, similarities and differences between basic and applied research, and specific topics (e.g., the relationship between environmental variation and biodiversity, population regulation in disturbed and undisturbed systems). Theoretical approaches to nature reserve design, randomness and pattern in natural systems.

FORS 5010/7010. Urban Tree Management. 3 hours.
Prerequisite: BTNY 1210-1210L or BIOL 1104-1104L or BIOL 1108-1108L.
Establishment and maintenance of trees in urban environments. Nature and benefits of trees, planting, and soil management; pruning, repair, and protection; stress management; values of urban trees.

FORS 5310/7310-5310L/7310L. Techniques in Wildlife Population Management. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: [FORS(ECOL) 3580-3580L and PGEN 3580-3580L] or permission of school.
Field and laboratory methods commonly used by professional wildlife ecologists to analyze and manipulate animal populations.

FORS 5360/7360-5360L/7360L. Fisheries Management. 3 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Principles, methods, and techniques used in the management of freshwater and marine fisheries resources. Practical, theoretical, and ethical questions are addressed.

FORS 5380/7380-5380L/7380L. Fish Culture. 3 hours. 2 hours lecture and 1 lab period of 4 hours each per week.
Prerequisite: BIOL 1108-1108L.
Biological and abiological aspects of extensive and intensive culture of freshwater fishes. Emphasis is on species and methods utilized in the eastern United States.

(FORS)RLST 5400/7400-5400L/7400L. Park Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Management of public lands and open spaces, including management tools, type and nature of physical effects, visitor management principles, and site development. Use of maps, aerial photos, and compass in recreation area development.

FORS 5410/7410. Wilderness Management. 3 hours.
Origins of the wilderness movement; wilderness values; scope of wilderness management as limited by laws and philosophy; principles of wilderness management; and review status and management of non-roaded natural areas.

FORS 5720/7720-5720L/7720L. Forest Harvesting and Roads. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: FORS 3000-3000L.
Prerequisite or corequisite: FORS 4010-4010L.
Techniques and systems for harvesting and roading forests. Production, cost, quality, safety, and environmental protection measures. Field exercises stress planning of harvesting and road construction operations to achieve desired objectives.

FORS 5730/7730. Principles of Forest Management. 3 hours.
Prerequisite: BIOL 1104-1104L or BTNY 1210-1210L or permission of school.
Practical forestry in the South with emphasis on the management of private forest land. Topics include forest regeneration, tree identification and growth, basic measurements of tree crops. Not open to FRS majors.

FORS 5740/7740. Forest Operational Planning. 3 hours.
Prerequisite: (FORS 3710-3710D and FORS 4010-4010L and FORS 4620/6620) or permission of school.
Integration of silviculture, finance, forest engineering, biometrics, and ecology to analyze industrial problems.

FORS 5750/7750. Procurement and Management of Wood Fiber Supply. 3 hours.
Prerequisite: (Enrollment in Professional Program of WSFR) or permission of school.
Management of the wood fiber supply, program management functions, legal aspects and analysis of current issues in raw material management.

FORS 5760/7760. Forest Products Marketing. 3 hours.
Prerequisite: (Enrollment in Professional Program of WSFR) or permission of school.
Planning, organizing, and managing forest products marketing programs, domestically and internationally. Focus on developing marketing strategies and implementation of marketing plans in the context of forest industry structures and distribution channels.

FORS 5770/7770-5770L/7770L. Applied Population Dynamics. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Senior standing or graduate student.
Foundations of population dynamics from an applied perspective. Exponential and logistic population growth, life tables, multiple species interactions, and basic population models. Sampling design and analytical methods for estimating abundance and demographic parameters. Application of population models to harvest management and small population management. Integrative student project required.

FORS 5820/7820. Natural Resources Law for Managers and Administrators. 4 hours.
Statutory, case law, and regulations concerning resource conservation, allocation, and development. Modern, systems-sensitive regulatory programs affecting natural resources administration analyzed. Examination of the division and nature of the functions of the judicial and executive branches of government.
Non-Traditional Format: Law library exercise requiring sixty or more hours per semester.

FORS 5850/7850. Forest Policy Issues. 2 hours.
Prerequisite: POLS 1101-1101D or FORS 4800/6800-4800D/6800D.
Forestry issues and political processes. A general framework for analyzing current issues is developed and specific issues are analyzed each year.

FORS 5920. Directed Readings or Projects in Forest Resources. 1-5 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of school.
Individual study, including readings, research, or other projects, in a specialized area of forest resources, under the supervision of a faculty mentor.
Non-Traditional Format: All work is done outside of a classroom setting.

FORS 5930. Special Topics in Forest Resources. 1-4 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of school.
Special-interest or experimental courses offered on a one-time basis. Course content will vary with each offering.
Non-Traditional Format: Lecture/lab hours will be determined by course instructor as appropriate to topic and credit hours assigned.

(FREN) French

College of Arts and Sciences, Department of Romance Languages

Certain courses in French are not open to native speakers. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was French.

FREN 1001. Elementary French. 4 hours.
Not open to students with credit in FREN 1002 or two or more years of French in high school.
The French language and French-speaking cultures. Open only to students who have fewer than two units of high school French. Emphasis is on conversational skills with attention to reading, writing, and listening comprehension. Work in the language laboratory.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

FREN 1002. Elementary French. 4 hours.
Not open to students with credit in FREN 1110.
Prerequisite: FREN 1001.
A continuation of Elementary French. Emphasis is on conversational skills with attention to reading, writing, and listening comprehension. Work in the language laboratory.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

FREN 1110. Accelerated Elementary French. 4 hours.
Not open to students with credit in FREN 1001 or FREN 1002 or college credit in French.
Prerequisite: Placement Test.
Accelerated course reviewing basic principles of the French language for students with some background of high school French.

FREN 2001. Intermediate French. 3 hours.
Not open to students with credit in FREN 2002.
Prerequisite: FREN 1002 or FREN 1110.
Speaking, listening, reading, and writing French at the intermediate level. Pronunciation, conversation, grammar review, reading of texts and compositions. Not open to native speakers.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

FREN 2002. Intermediate French. 3 hours.
Not open to students with credit in FREN 2120H.
Prerequisite: FREN 2001.
Continuation of the basic curriculum of Intermediate French, with an emphasis on strengthening the speaking, listening, reading, and writing skills of the intermediate student. Pronunciation, conversation, grammar review, reading of texts and compositions. Not open to native speakers.

FREN 2120H. Accelerated Intermediate French (Honors). 3 hours.
Not open to students with credit in FREN 2001 or FREN 2002.
Prerequisite: FREN 1002 and permission of Honors.
Course covers materials studied in Intermediate French. Emphasis on advanced readings and grammar review. Also prepares students to enter French Conversation and Composition, Introduction to French Literature, and Introduction to French Linguistics. Not open to native speakers.

FREN 2500. French for Reading Knowledge. 3 hours.
Grammar, idioms, and vocabulary; practice in translating moderately difficult technical and non-technical French. Intended to assist graduate students to satisfy reading knowledge requirement but does not carry graduate credit. Not to be used to satisfy undergraduate language requirement. Not open to French majors.

FREN 2950. Study Abroad in French. 3 hours.
Prerequisite: Permission of department.
French language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

FREN 2960. Study Abroad in French. 3 hours.
Prerequisite: Permission of department.
French language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

FREN 2970. Study Abroad in French. 3 hours.
Prerequisite: Permission of department.
French language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

FREN 3010. French Conversation and Composition. 3 hours.
Prerequisite: FREN 2002 or permission of department.
The emphasis is divided between oral and written expression. Composition and conversation are integrated into the context of French and Francophone culture. Given in French. Not open to native speakers.

FREN 3010H. French Conversation and Composition (Honors). 3 hours.
Not open to students with credit in FREN 3010.
Prerequisite: FREN 2002 and permission of Honors.
Practice in composition and conversation skills in French, beyond French Conversation and Composition. Emphasis is divided equally between composition and conversation. Not open to native speakers. Given in French.

FREN 3030. Introduction to French Literature. 3 hours.
Not open to students with credit in FREN 3030H.
Prerequisite: FREN 3010.
Selected French and Francophone texts in their social and linguistic contexts. Given in French.

FREN 3030H. Introduction to French Literature (Honors). 3 hours.
Not open to students with credit in FREN 3030.
Prerequisite: FREN 2120H and permission of Honors.
Selected French and Francophone texts in their social and linguistic context. Given in French.

FREN(LING) 3090. Introduction to French Linguistics. 3 hours.
Prerequisite: FREN 3010.
The field of French linguistics, emphasizing such topics as the internal and external history of French; the sounds, forms, and vocabulary of modern French; and the linguistic variation within France and the French-speaking world.

FREN 4010. Advanced Conversation and Composition. 3 hours.
Not open to students with credit in FREN 3010H.
Prerequisite: FREN 3010.
Practice in composition and conversation skills in French, beyond French Conversation and Composition. Emphasis is divided equally between composition and conversation. Given in French. Not open to native speakers.

FREN 4050. French Literature and Culture to 1700. 3 hours.
Prerequisite: FREN 3030 and FREN(LING) 3090.
French literature and culture from the Middle Ages through the seventeenth century. Topics include representations of feudal society; courtly texts and contexts; the rise of the nation-state; Renaissance humanism; the culture of absolute monarchy; the emergence of the French novel. Given in French.

FREN 4060. French Literature and Culture 1700-1900. 3 hours.
Prerequisite: FREN 3030 and FREN(LING) 3090.
French literature and culture of the period covering the Enlightenment, the French Revolution, Romanticism, Realism, Naturalism, and "Belle Époque." Given in French.

FREN 4070. French and Francophone Literature and Culture Since 1900. 3 hours.
Prerequisite: FREN 3030 and FREN(LING) 3090.
Major works, literary movements, and cultural background of the modern and contemporary periods, including the relationship between mainland France and other areas of the French-speaking world. Texts will include examples of poetry, prose, and drama. Given in French.

FREN 4080. Studies in French Literature and Culture. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FREN 3030 and FREN(LING) 3090.
Topics in French and Francophone studies: themes, movements, problems, artistic and cultural manifestations and their relationship to literary and intellectual developments. Topics can cover individual periods or several centuries, depending on instructor. Given in French.

FREN 4120/6120. Topics in French Culture, Language, and Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: FREN 3030 and FREN(LING) 3090.
Selected topics in French and Francophone culture, civilization, language, linguistics, literature, or literary theory. Given in French.

FREN 4150. Business French. 3 hours.
Prerequisite: FREN 3010 and (FREN 3030 or FREN(LING) 3090 or ACCT 2101).
French business and its environment. Topics might include creation of a business, banking, economic geography, interviewing, letter writing, advertising, communications, import-export, politics, the European Union. Given in French. Business students should check with their advisor for prerequisites.

FREN(LING) 4630. French Phonetics. 3 hours.
Prerequisite: FREN(LING) 3090.
The French sound system in theory and practice. How French sounds are formed and how they reflect social class and geographical origin. Work on pronunciation in class and the language laboratory. Given in French.

FREN 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

FREN 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

FREN 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

FREN 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors and senior standing.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(FRES) Freshman Seminars

College of Arts and Sciences

FRES 1010. Freshman Seminar. 1-3 hours.
Prerequisite: Freshman standing.
Seminar for first-year students with faculty members in topics of interest pertinent to research, academic life, and higher education at the University of Georgia.

FRES 1020. Freshman Seminar. 1-3 hours.
Prerequisite: Freshman standing.
Seminar for first-year students with faculty members in topics of interest pertinent to research, academic life, and higher education at the University of Georgia.

(FRES)HONS 1990H. Honors Colloquia Seminar. 1 hour. Repeatable for maximum 4 hours credit. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of Honors.
Attendance at University-sponsored lectures, symposia, colloquia, distinguished speaker series, and follow-up seminar meetings. Students will present written reports on lectures and discuss in seminars.

(GENE) Genetics

College of Arts and Sciences, Department of Genetics

GENE(BIOL) 3200. Genetics. 3 hours.
Prerequisite or corequisite: (BIOL 1104-1104L or BIOL 1108-1108L) and BCMB(BIOL)(CHEM) 3100.
Genetic mechanisms in viruses, bacteria, and eukaryotic cells in a comparative sense. Topics include molecular genetics and gene action, transfer systems and mapping, cytological, quantitative, and population genetics.

GENE(BIOL) 3210. Experimental Genetics. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite or corequisite: GENE(BIOL) 3200.
Drosophila, bacteria, phage and fungal systems for the analysis of mutation, transfer systems, mapping, complementation, population studies, and other genetic principles.

GENE(BIOL) 4200/6200. Advanced Genetics. 3 hours.
Prerequisite: GENE(BIOL) 3200.
Prokaryotic, fungal, and mammalian genetic systems which form the basis of our understanding of molecular genetics. Techniques used in the analysis of the structure and function of viral and eukaryotic genomes.

GENE(BIOL) 4210L. Molecular Genetics Laboratory. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: GENE(BIOL) 3200.
Lab techniques in molecular genetics for advanced undergraduate students. Basic genetic and recombinant DNA approaches in contemporary molecular biology: use of computers for database searches, DNA sequence analysis, and molecular modeling.

GENE 4220. Computers in Experimental Genetics. 1 hour. Repeatable for maximum 10 hours credit.
Undergraduate computer course in Experimental Genetics.

GENE(BIOL) 4600/6600. Evolutionary Biology. 3 hours.
Prerequisite: BIOL 1108-1108L.
An introduction to the processes of evolution. Topics include population genetics, speciation, systematics, coevolution, chemical origin of life, history of life, geological record, and evolution of humans.

GENE 4950. Senior Seminar in Genetics. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: GENE(BIOL) 3200.
Undergraduate senior seminar class in Genetics.
Non-Traditional Format. Students will meet with faculty members on a regular basis.

GENE 4960. Directed Reading and/or Projects. 4 hours. Repeatable for maximum 16 hours credit.
Individual study, reading, or projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

GENE 4960H. Honors Readings Genetics. 4 hours.
Not open to students with credit in GENE 4960.
Prerequisite: GENE(BIOL) 3200 and permission of Honors.
Individual study, reading, or research projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

GENE 4970H. Directed Readings and/or Projects (Honors). 4 hours.
Prerequisite: GENE 4960H and permission of Honors.
Individual study, reading, or research projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

GENE 4980H. Directed Readings and/or Projects (Honors). 4 hours.
Prerequisite: GENE 4970H and permission of Honors.
Individual study, reading, or research projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

GENE 4990H. Honors Thesis. 3 hours.
Prerequisite: GENE 4970H and permission of Honors.
Thesis describing research performed in faculty laboratory.
Non-Traditional Format: Directed study.

(GEOG) Geography

College of Arts and Sciences, Department of Geography

GEOG 1101-1101D. Introduction to Human Geography. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 2010H-2010D.
Global patterns of resources, population, culture, and economic systems. Factors contributing to these patterns and distinctions between the technologically advanced and less advanced regions of the world.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOG 1103-1103D. Cultural Geography of the United States. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 2130H-2130D.
Geographic factors underlying multiculturalism and ethnic relationships in the United States. Spatial development and organization of culture; population growth, migration, and urbanization; and the spatial dimensions of political, economic, and social processes.

GEOG 1111. Introduction to Physical Geography. 3 hours.
Not open to students with credit in GEOG 1112 or GEOG 1113 or GEOG 2110H.
Spatial patterns and underlying processes of the physical environment and biosphere, including climate, vegetation, soils, landforms, and water resources.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOG 1111L. Introduction to Physical Geography Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOG 1112L or GEOG 1113L or GEOG 2110L.
Prerequisite or corequisite: GEOG 1111.
Optional laboratory for Introduction to Physical Geography.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOG 1112. Introduction to Weather and Climate. 3 hours.
Not open to students with credit in GEOG 1111 or GEOG 2110H.
Atmospheric composition and structure, clouds, precipitation, and atmospheric motion and winds. Organized weather systems, including air masses, fronts, and severe weather. Discussion of global climates includes circulation, wind systems, climate classification, and climate change.

GEOG 1112L. Introduction to Weather and Climate Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOG 1111L or GEOG 2110L.
Prerequisite or corequisite: GEOG 1112.
Optional laboratory for Introduction to Weather and Climate.

GEOG 1113. Introduction to Landforms. 3 hours.
Not open to students with credit in GEOG 1111 or GEOG 2110H.
Analysis and classification of major types of land surfaces, stressing geographic characteristics. Interpretation of relationships between landforms and other phenomena through maps, air photos, and field observations. World coverage with emphasis on North America.

GEOG 1113L. Introduction to Landforms Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOG 1111L or GEOG 2110L.
Prerequisite or corequisite: GEOG 1113.
Optional laboratory for Introduction to Landforms.

GEOG 1125-1125D. Resources, Society, and the Environment. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 2250H-2250D.
Interactions between physical systems and human activities, and their effects on environmental quality and sustainability. Geography of population and resource consumption, food production, water and air quality, energy policy, land/biotic resource management.

GEOG 2010H-2010D. Introduction to Human Geography (Honors). 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 1101-1101D.
Prerequisite: Permission of Honors.
Global patterns of resources, population, culture, and economic systems. Factors contributing to these patterns and distinctions between the technologically advanced and less advanced regions of the world.

GEOG(ANTH)(CMLT)(HIST)(SOCI) 2100. Introduction to Africa. 3 hours.
The history, physical environment (landforms, vegetation, and climate), and sociocultural environment (artistic, political, and social development) of Africa.

GEOG 2110L. Introduction to Physical Geography Laboratory (Honors). 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOG 1111L or GEOG 1112L or GEOG 1113L.
Prerequisite or corequisite: GEOG 2110H.
Optional laboratory for Introduction to Physical Geography (Honors).

GEOG 2110H. Introduction to Physical Geography (Honors). 3 hours.
Not open to students with credit in GEOG 1111 or GEOG 1112 or GEOG 1113.
Prerequisite: Permission of Honors.
Spatial patterns and underlying processes of the physical environment and biosphere, including climate, vegetation, soils, landforms, and water resources.

GEOG 2130H-2130D. Cultural Geography of the United States (Honors). 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 1103-1103D.
Prerequisite: Permission of Honors.
Geographic factors underlying multiculturalism and ethnic relationships in the United States. Spatial development and organization of culture; population growth, migration, and urbanization; and the spatial dimensions of political, economic, and social processes.

GEOG 2250H-2250D. Resources, Society, and the Environment (Honors). 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in GEOG 1125-1125D.
Prerequisite: Permission of Honors.
Interactions between physical systems and human activities and their effects on environmental quality and sustainability. Geography of population and resource consumption, food production, water and air quality, energy policy, land/biotic resource management.

GEOG 2300. Geographic Data Analysis. 3 hours.
Methods and techniques required at various stages of geographic data analysis, including the collection, manipulation, description, presentation, analysis, and interpretation of data. Exercises using statistical and GIS software packages on microcomputers integrate data analysis with geographic information systems.

GEOG 2610. Geography of Georgia. 3 hours.
Physical, cultural, economic, historical, and biological landscapes of Georgia, explored through videos, music, and computerized data sets, such as the Interactive Atlas of Georgia and the Georgia 100 GIS.

GEOG 3010. General Geomorphology. 3 hours.
Prerequisite: (GEOG 1111 and GEOG 1111L) or (GEOG 1113 and GEOG 1113L) or (GEOG 2110H and GEOG 2110L) or GEOL 1250-1250D.
Earth surface processes and landforms, including tectonic, volcanic, weathering, soil, hillslope, karst, fluvial, glacial, periglacial, eolian, and coastal geomorphic systems. Relevance to environmental change is stressed. Field trip required.

GEOG 3110. Climatology. 3 hours.
Prerequisite: (GEOG 1111 and GEOG 1111L) or (GEOG 1112 and GEOG 1112L) or (GEOG 2110H and GEOG 2110L).
Climatology from local to global scales. Topics include radiation/heat exchanges, the hydrologic cycle, global climate patterns, climate change, measurement and data sources, relationships of climate with ecosystem processes and human activities, climate forecasting and use of the Internet.

GEOG 3210. Biogeography. 3 hours.
Prerequisite: (GEOG 1111 and GEOG 1111L) or (GEOG 1112 and GEOG 1112L) or (GEOG 2110H and GEOG 2110L).
Factors affecting plant and animal distributions at scales from organisms to biomes. Influence of ecological factors and human activity on distributions, historical biogeography, and patterns of earth's biomes.

GEOG 3510-3510L. Cartography and Graphics. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 2300.
Map design techniques including cartographic theory and principles, map interpretation, map database preparation, compilation, symbolization, computer mapping, map reproduction techniques, color, and thematic map design.

GEOG 3620. Introduction to Economic Geography. 3 hours.
Prerequisite: GEOG 1101-1101D or ECON 2105.
Location factors and principles utilizing theoretical and empirical studies. Focus upon the spatial organization of economic production, consumption, and exchange systems.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOG 3630. Introduction to Urban Geography. 3 hours.
Prerequisite: GEOG 1101-1101D.
Theories of inter- and intraurban locations. Procedures in geographical analysis of agglomerated settlements, including demographic, economic, and social attributes.

GEOG 3990. Internship in Geography. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Placement of students in an outside private or governmental agency where they will utilize geographic techniques in approaching practical problems relevant to the agency's mission. An initial orientation and a postinternship evaluation with the internship committee are required.
Non-Traditional Format: Internship.

GEOG 4020/6020. Fluvial Geomorphology. 3 hours.
Prerequisite: GEOG 3010.
Landforming effects of surface-water movement with emphasis on surface-water hydrology, streamflow mechanics, floods, sediment transport and storage, and landform evolution. Field trips included.

GEOG 4030/6030. Geomorphology and Environmental Change in Karst and Arid Environments. 3 hours.
Prerequisite: GEOG 3010 or (GEOG 1113 and GEOG 1113L) or GEOL 1250-1250D.
Weathering, erosional and depositional processes, and landforms in karst and arid areas. Formation of sinkholes, sinking streams, caves, springs, sand dunes, playas, and yardangs. Geoarchaeological and other evidence on the nature of past environments, including dating cave and aeolian sediments. Field trips included.

GEOG 4040/6040. Global Environmental Change During the Quaternary. 3 hours.
Prerequisite: GEOG 3010.
Chronology and geomorphic, isotopic, and palynological evidence of Quaternary paleoclimates. The effects of past climatic changes upon present landscapes, historic short-term fluctuations in temperature and precipitation, and possible explanations for climatic change are emphasized.

GEOG 4060/6060. Field and Laboratory Methods in Physical Geography. 3 hours.
Prerequisite: GEOG 3010 or GEOG 3110 or GEOG 3210.
Methods in measurement, observation, recording and synthesis of field data in physical geography. Students conduct field research and present oral and written reports (with maps) of findings.

GEOG 4120/6120. Synoptic Meteorology/Climatology. 3 hours.
Prerequisite: GEOG 3110.
Theory and observations to understand mid-latitude weather systems. Focus is on application of quasi-geostrophic theory in weather forecasting. Analysis and interpretation of weather maps and numerical models will be used to examine atmospheric dynamics and thermodynamics.

GEOG 4140/6140. Satellite Climatology. 3 hours.
Prerequisite: (GEOG 1111 and GEOG 1111L) or (GEOG 1112 and GEOG 1112L) or (GEOG 2110H and GEOG 2110L).
Satellite remote sensing in climatology, including climatologies of clouds, atmospheric water vapor and precipitation, the Earth's radiation budget, sea and land surface temperatures, and the cryosphere and vegetation.

GEOG 4160/6160. Applied Climatology. 3 hours.
Prerequisite: GEOG 3110.
The interaction of climate with organisms, communities, and ecosystems. Mechanisms of heat flow, radiation exchanges and water vapor flux; statistical methods used with climatic data; bioclimatic methods used to improve environmental impact assessment; and case studies that demonstrate the role of climate in ecosystem function.

GEOG(BTNY) 4220/6220. Ecological Biogeography. 3 hours.
Prerequisite: GEOG 3210 or ECOL(BIOL) 3500-3500L.
Patterns of plant distribution in contemporary landscapes and underlying processes, including vegetation dynamics, disturbance ecology, biogeomorphology, dendrochronology, and environmental history.

GEOG(BTNY) 4240/6240. Plant Geography. 3 hours.
Prerequisite: BIOL 1104-1104L and (GEOG 1112 and GEOG 1112L) and [GEOG 3210 or ECOL(BIOL) 3500-3500L].
Phytogeographical zonation, plant-geographic processes, and current potential natural vegetation. Includes physical and environmental factors, plant-environment relationships, plant roles and types, vegetation dynamics, geographic responses to disturbance, and vegetation of main world biomes. Emphasis on global-scale patterns and relationships.

GEOG 4300/6300. Introductory Spatial Analysis. 3 hours.
Prerequisite: GEOG 2300.
Descriptive and inferential techniques used in quantitative geographic analysis. Probability distributions,

sampling techniques, parametric and nonparametric inference, analysis of variance, spatial autocorrelation measures and regression procedures. Applications of statistical methods to spatial analysis and geographic research design. Exercises develop knowledge of statistical programming with computer software.

GEOG 4310/6310-4310L/6310L. Cartographic Design and Reproduction. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 3510-3510L or permission of department.
Design, examination of cartographic literature, map production methods, and their effects on design. Practical applications of desktop publishing, page layout with specific emphasis on state atlas design, map-narrative interactions, four color map reproduction, and photo-cartographic techniques.

GEOG 4330/6330-4330L/6330L. The Use and Interpretation of Aerial Photographs. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Principles and techniques of extracting descriptive and metric information about the environment from aerial photographs acquired in analog and digital forms. Applications emphasize planimetric mapping and interpretation of physical and cultural landscapes. A term project using the techniques is required.

GEOG 4350/6350-4350L/6350L. Remote Sensing of Environment. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4330/6330-4330L/6330L.
Remote sensing with emphasis on aerospace applications in the natural sciences. Fundamental properties of the electromagnetic spectrum and remote sensing devices such as multispectral cameras, thermal infrared line scanners, and television and radar imaging systems.

GEOG 4370/6370-4370L/6370L. Introduction to Geographic Information Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CSCI 1301-1301L or sophomore standing or permission of department.
Principles and applications of geographic information systems (GIS). Examines the nature and accuracy of spatially referenced data, as well as methods of data capture, storage, retrieval, visualization, modeling, and output using one or more GIS software packages.

GEOG 4410/6410-4410L/6410L. Cartographic Visualization Methods. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 3510-3510L.
Theory and application of computer technology in the preparation of thematic maps and graphics. Emphasis on the creation, analysis, and display of statistical surfaces. Students explore trends in cartographic visualization methods, including interactive and animated mapping techniques.

GEOG 4430/6430-4430L/6430L. Advanced Photogrammetry. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4330/6330-4330L/6330L.
Theories of analytical and digital (soft copy) photogrammetry as applied to topographic mapping. Topics include refinement of photographic measurements, coordinate transformations, stereoscopic parallax, collinearity equations, aerial triangulation, orthophotography, and digital image correlation.

GEOG 4470/6470-4470L/6470L. Geographic Analysis and Geographic Information Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOG 4300/6300 and GEOG 4370/6370-4370/6370L and CSCI 1302.
Geographic analytical methods and implementation. Theory and concepts of spatial analysis. Description, reduction, and comparison of point, line, area, and volumetric geographic data sets. Implementation and limitation of geographic information systems.

GEOG 4610/6610. Location Analysis. 3 hours.
Prerequisite: GEOG 3620.
The geography of retail activity and consumer demand. Principles of locational decision-making for retail and service firms.

GEOG 4620/6620. Advanced Economic Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 3620.
Advanced theoretical and empirical issues in economic geography, such as impacts of globalization, regional development, trade patterns, and labor issues. Topics will vary.

GEOG 4630/6630. Advanced Urban Geography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GEOG 3630.
Urban growth and approaches to urban analysis. Urbanization processes within urban systems, including economic, demographic, social, and technological change.

GEOG 4640/6640. Population Geography. 3 hours
Prerequisite: GEOG 3620 or GEOG 3630.
The distribution of world population and an introduction to population data and to basic demographic techniques. Topics include theories of population change, fertility, mortality, migration, population policy, and population-environment relationships.

GEOG 4650/6650. Industrial Geography. 3 hours
Prerequisite: GEOG 3620.
The regional basis of economic growth and industry case studies. The impact of product and process innovation, entrepreneurship, globalization, and the service economy on the spatial distribution of industry.

GEOG 4660/6660. Urban and Regional Development. 3 hours.
Prerequisite: GEOG 3620.
Regional development and the implications of globalization to regional economies of the industrialized countries. Discussions on the changing dynamics of international competition and the reorganization of production. Contemporary trends in regional economic development policy, including high technology and service-sector development.

GEOG 4670/6670. Geography of Development. 3 hours.
Prerequisite: GEOG 3620.
Geographical aspects of Third World development, including population growth, migration, industrialization, trade, and foreign aid. The spatial characteristics of economic development are viewed at the conceptual level and implications for policy discussed.

GEOG 4680/6680. Gender and Geography. 3 hours.
Prerequisite: GEOG 1101-1101D or WMST 1110-1110D.
Relationships between gender and globalization. Women and development, industrialization, and third world regions.

GEOG 4710/6710. Geography of Sub-Saharan Africa. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
Geographic and socio-economic issues that face sub-Saharan economies into the twenty-first century. Emphasis on the physical landscape, environmental conditions, social and cultural distributions, and strategies and theories of economic development.

GEOG 4720/6720. Geography of Latin America. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
The geography of Latin America, including physical, cultural, and economic characteristics of different regions. Prospects for expansion of settlement, development of resources, and growth of industries.

GEOG 4730/6730. Geography of China. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630 or permission of department.
The physical and human geography of contemporary China. Emphasis is on modernization and development of agriculture, industry, and transportation within the context of China's resource base and large population.

GEOG 4740/6740. Geography of East and Southeast Asia. 3 hours.
Prerequisite: GEOG 3620 or GEOG 3630.
The physical and human geography of East and Southeast Asia. Major focus on resources, land utilization, population characteristics and distributions as they relate to economic and political problems. Emphasis is on Japan, Korea, Indonesia, Philippines, and Indo-China.

GEOG 4810/6810. Conservation Ecology and Resource Management. 3 hours.
Prerequisite: GEOG 1125-1125D.
Ecological and economic analysis of human use of global and regional resources, emphasizing ecological requirements, sustainable use, and holistic decision-making. Topics include ecosystem dynamics, functional biodiversity, landscape management, socioeconomic traps, global change, and ecological restoration.

GEOG 4920/6920. Special Problems in Area Analysis. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent research and readings on geographical topics by arrangement with specific faculty.
Non-Traditional Format: Class hours are by arrangement with the relevant faculty and vary depending on credit hours.

GEOG 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director for senior Honors students.
Non-Traditional Format: Directed study.

GEOG 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director for senior Honors students.
Non-Traditional Format: Directed study.

GEOG 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major or related field for a senior Honors student.
Non-Traditional Format: Directed study.

(GEOL) Geology

College of Arts and Sciences, Department of Geology

GEOL 1121. Earth Processes and Environments. 3 hours.
Not open to students with credit in GEOL 1121H or GEOL 1250-1250L or GEOL 2350H.
Earth processes and utilization of geological materials (plate tectonics, earthquakes, volcanism, hydrology, erosion). Earth hazards, pollution, and energy resources in the context of environmental geology.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOL 1121L. Earth Processes and Environments Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOL 1250-1250L or GEOL 2350H.

Prerequisite or corequisite: GEOL 1121 or GEOL 1121H.
Corequisite: None.
Description and identification of minerals and rocks. Interpretation of topographic and geological maps. Identification and interpretation of surficial and structural geologic features. Quantitative evaluation of hydrologic and environmental problems.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GEOL 1121H. Earth Processes and Environments (Honors). 3 hours.
Not open to students with credit in GEOL 1121 or GEOL 1250-1250L or GEOL 2350H.
Prerequisite: Permission of Honors.
Earth processes and utilization of geological materials (plate tectonics, earthquakes, volcanism, hydrology, erosion). Earth hazards, pollution, and energy resources in the context of environmental geology.

GEOL 1122. Earth's History of Global Change. 3 hours.
Not open to students with credit in GEOL 1122H or GEOL 1260-1260L or GEOL 2360H.
Geologic record of global change, including measurement of geologic time, global geochemical cycles, sea-level and climate change, biodiversity, evolution, ecological changes and extinctions.

GEOL 1122L. Earth's History of Global Change Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Not open to students with credit in GEOL 1260-1260L or GEOL 2360H.
Corequisite: GEOL 1122 or GEOL 1122H.
Description, identification, and interpretation of sedimentary structures and the fossil remains of organisms. The physical evidence of evolution and climatic change throughout geologic time. Interpretation of geologic features and processes.

GEOL 1122H. Earth's History of Global Change (Honors). 3 hours.
Not open to students with credit in GEOL 1122 or GEOL 2360H or GEOL 1260-1260L.
Prerequisite: Permission of Honors.
Geologic record of global change, including geologic time, global geochemical cycles, sea-level and climate change, biodiversity, evolution, ecological changes and extinction.

GEOL 1250-1250L. Physical Geology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Not open to students with credit in GEOL 1121 or GEOL 2350H.
Physical geology; characteristics and origins of rocks and minerals; mechanism and processes of volcanism, plutonism, metamorphism, weathering, erosion, sedimentation, and lithification; evolution of landforms. Tectonic processes of continental drift, sea-floor spreading, and plate tectonics. Emphasis on scientific methods.

GEOL 1260-1260L. Historical Geology. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in GEOL 1122 or GEOL 1122H or GEOL 2360H.
Prerequisite or corequisite: GEOL 1121 or GEOL 1121H or GEOL 1250-1250L.
Methods and concepts by which Earth history is interpreted. The geologic time scale; interactions of physical, chemical, and biological processes through time. Origin of life; evolution and distribution of plants and animals through time. Geologic history of North America. Emphasis on interpretation of the rock record.

(GEOL)HONS(BIOL)(CHEM)(PHYS) 2070H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in PHYS 1010 or CHEM 1110.
Prerequisite: (ENGL 1101 or MATH 1101) and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Occasional weekend field trips required.

(GEOL)HONS(BIOL)(CHEM)(PHYS) 2080H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or GEOL 1121.
Prerequisite: HON 2070H and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Weekend field trips required.

GEOL 2120. Introduction to Environmental Geology. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L.
Environmental geology focusing on understanding global and current environmental problems and their relationships with geological processes. Emphasis on case histories of geologic hazards and environmental impact of resources extraction and use. Requirements for a sustainable society analyzed.
Non-Traditional Format: During discussion period students will discuss readings, discuss environmental situations and their solution, and give presentations on subjects they have researched. Emphasis is on research, analysis, and problem solving.

GEOL 2350H. Physical Geology (Honors). 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in GEOL 1121 or GEOL 1121H or GEOL 1250-1250L.
Prerequisite: Permission of Honors.
Characteristics and origins of minerals and rocks. Plate tectonics and structure of the Earth's interior. Geologic processes that affect the Earth's surface: volcanism, earthquakes, coastal erosion, and global climate changes. Natural Earth resources and human interaction.
Non-Traditional Format: During Summer semester this course will be taught in the field as part of the Geology, Anthropology Summer Field Program. Extensive field observations and projects will be included in addition to organized lecture and laboratory work.

GEOL 2360H. Historical Geology (Honors). 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in GEOL 1260-1260L.
Prerequisite: GEOL 2350H and Permission of Honors.
Measurement of geologic time. Physical and biological history of Earth as recorded in rocks and fossils. Development of the major features of the Earth, with particular emphasis on North America.
Non-Traditional Format: Course taught during summer session in the field. Traditional methods are combined with field exercises and problems, interpretive exercises, and extensive field discussions.

GEOL 3010-3010L. Earth Materials. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: CHEM 1211 and CHEM 1211L.
Physical and chemical properties, identification, and modes of occurrence of minerals and mineral assemblages. Mineral crystallography, determinations of optical properties with the petrographic microscope, x-ray diffraction and structural formula determinations. Introduction to mineral thermodynamic phase relations.

GEOL 3020-3020L. Surficial and Near-Surficial Processes. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (GEOL 1121 and GEOL 1121L and GEOL 1122 and GEOL 1122L) or GEOL 1260-1260L.
Surface processes; geohydrological, geochemical cycles; and surface geological structures of the Earth.
Non-Traditional Format: Field Trips Required

GEOL 3030. Elementary Oceanography. 3 hours.
Basic aspects of oceanography: ocean basins and plate tectonics, shallow and deep ocean circulation, waves and tides, marine biology and ecology, marine sediments, chemistry of seawater, paleoceanography, and environmental oceanography.

(GEOL)HONS 3070H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the natural sciences to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held as daily seminars during the May session.

GEOL 3090. Gems and Gem Materials. 3 hours.
Gem materials, historical, cultural, mineralogical, technological, and scientific aspects. The identification and evaluation of gems.

GEOL 3120-3120L. Geological Hazards. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Consequences of potentially hazardous geologic processes, including volcanic activity, earthquakes, landslides, flooding, shoreline erosion, and ground failure. Emphasis on developing understanding of the underlying geologic processes that result in hazards and delineating risk potential. Evaluation of methods of prediction and methods of damage control through laboratory analysis of case studies.

GEOL 3130. Geology of the National Parks. 3 hours.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Geological features of selected national parks used as type examples for understanding rock forming processes (igneous, sedimentary, and metamorphic) and orogenic processes. Exploitation of mineral resources in and around national parks and conflicts that ensue.

GEOL 3150. Coastal Processes and Conservation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
The major physical and biological processes which characterize marine coastal habitats. Emphasis is on developing an understanding of the complex interdependency within various environments, and evaluating the responses to natural and human-induced disturbances. Discussion of stabilization vs. conservation issues and environmental effects of private and governmental attempts at risk mitigation.

GEOL 3200. Rocks and Minerals. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: [(GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L] and CHEM 1211 and CHEM 1211L.
Basic properties, origins, and methods of describing and classifying the common minerals and rocks. Emphasis on identifying and describing samples on the hand specimen and outcrop scale.
Non-Traditional Format: Field trips required.

GEOL 3250. Earth Resources and the Environment. 3 hours.
Distribution of mineral and energy resources; present and future problems of mineral supply; conservation of

minerals; mineral resources in relation to national and international policy; environmental impact of mineral/energy resource extraction and use.

GEOL 3300. Paleobiotas. 3 hours.
The earth's major biotas throughout geologic history. Emphasis on paleoecology, paleoenvironmental change, and mass extinction events.

GEOL 3350. Dinosaurs - Lifestyles of the Big and Famous in the Mesozoic. 3 hours.
Dinosaur dinners, dates, dallying, and domiciles (or dinosaur habitats and eating, reproductive, and social behavior). Warm-bloodedness versus cold-bloodedness. Relationship to birds, reptiles, and mammals. Evolutionary patterns. Extinction and asteroids. Climate, sea level, and continents during the Mesozoic Era.

GEOL 4010-4010L. Life, Environment, and Ecologies of the Past. 4 hours. 2 hours lecture and 2 lab periods of 3 hours each per week.
Prerequisite: (GEOL 1122 and GEOL 1122L) or GEOL 1260-1260L or GEOL 1122H.
Prerequisite or corequisite: GEOL 3010-3010L.
Principles of paleobiology and stratigraphy, including sedimentary structures, facies models, sequence stratigraphy, biostratigraphy, paleoecology, taphonomy, and macroevolutionary dynamics.

GEOL 4020-4020L. Internal Earth Processes. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 3010-3010L.
Internal processes which are responsible for the formation and deformation of the earth. Study of the basic tools of igneous and metamorphic petrology, structural geology, and geophysics and their application in field and laboratory investigations.

GEOL 4050/6050. Facies Models and Stratigraphy. 3 hours.
Prerequisite: GEOL 4010-4010L.
Sedimentary processes in major siliciclastic and carbonate depositional environments. Factors affecting deposition and erosion of sediments on time scales of hundreds of years to hundreds of thousands of years.

GEOL 4060/6060. Structural Geology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 3010-3010L.
Stress and strain within the earth, and the mechanical properties and behavior of earth materials. Geologic structures, their recognition and interpretation in the field, and solution of structural problems. Framework of the earth's crust; evolution of mountain belts, continents, and basins. Relation between structures, deformation, and plate tectonics.

(GEOL)HONS 4070H. Special Problems Seminar in the Natural Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the natural sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

(GEOL)HONS 4080H. Special Problems Seminar in Natural Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the natural sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

GEOL 4090/6090. Marine Geology. 3 hours.
Prerequisite: [(GEOL 1121 and GEOL 1121L) and (GEOL 1122 and GEOL 1122L)] or GEOL 1260-1260L.
The geologic aspects of ocean basins, including morphology, sedimentation processes, and mode of origin.

GEOL 4110/6110. Principles of Geochemistry. 3 hours.
Prerequisite: (CHEM 1212 and CHEM 1212L and GEOL 3010-3010L) or permission of department.
Distribution of elements and isotopes in minerals, rocks, and waters. Principles governing the migration and behavior of elements and isotopes.

GEOL 4220/6220. Hydrogeology. 3 hours.
Groundwater in the hydrologic cycle. Examination of flow through porous media, regional flow, influence of wells, water chemistry, and contaminant transport. Emphasis on practical environmental problems.

GEOL 4250/6250. Field Methods in Geology. 2 hours. 1 hour lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 3010-3010L.
Prerequisite or corequisite: GEOL 3020-3020L.
Field measurement of geologic parameters, accurate recording of observations, production and interpretation of geologic maps and cross sections, and the recognition of structures and lithologies in the field.
Non-Traditional Format: Two day weekend field trips are required.

GEOL 4270/6270. Geology Field School. 6 hours.
Prerequisite: GEOL 3020-3020L or GEOL 4010-4010L or GEOL 4020-4020L or GEOL 4250/6250.

Theory and practice of field measurement, large scale planimetric and topographic mapping, and grid surveying. Graphic presentation of field data. Geologic mapping projects, including interpretation of observed geologic features. Summary maps and reports must be prepared and defended in the field. Student must demonstrate mastery of the knowledge and skills taught in the required on-campus major courses.
Non-Traditional Format: Taught in the field during the summer term. Instructional methods include lectures, demonstrations, field trips, as well as supervised field study.

GEOL 4300/6300. Igneous and Metamorphic Petrology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4020-4020L.
Textures, mineralogy, and classification of the common igneous and metamorphic rocks. Origin of magmas and volcanoes and their impact on civilizations; evolutions of continental and oceanic crusts; metamorphic rocks as probes of crustal processes.

GEOL 4310/6310. Economic Geology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: GEOL 4020-4020L.
Classification and origin of base and precious metal ore deposits; relationships between ore deposits, host rocks, and plate tectonics; principles of ore deposit exploration and evaluation.

GEOL 4330/6330. Geology of North America. 3 hours.
Prerequisite: GEOL 1260-1260L.
Evolution of North American continent through time. Stratigraphic, sedimentary, and magmatic history and tectonic development of various regions since the early Precambrian. Paleontological record of environmental and biological changes. Origin of energy, mineral, soil, and water resources. History of human habitation and resource utilization. Current environmental hazards and challenges.
Non-Traditional Format: May be taught during summer session in the field as part of the Geology/Anthropology Summer Field Program.

GEOL(ANTH) 4340/6340. Archaeometry. 3 hours.
Prerequisite: GEOL(ANTH) 4700/6700.
Methods of archaeometric analysis including chronometric and instrumental techniques. Absolute age dating and characterization of archaeological materials by physico-chemical analysis.

GEOL 4350/6350. Geology of the Planets and Moons. 3 hours.
Prerequisite: GEOL 3020-3020L and GEOL 4020-4020L.
Geology of the planets, moons, and asteroids, including internal, surficial, and atmospheric processes. Studies in comparative planetology aimed at showing how unique the current life-supporting environment of the Earth is, and why other planets have undergone such dramatically different evolutions.

GEOL 4370/6370. Data Analysis in the Geosciences. 3 hours.
The principles of data analysis, including data collection methods, graphical presentation, and basic statistics.

GEOL 4410/6410. Introduction to Research in Archeogeology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to archeogeology.
Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4420/6420. Introduction to Research in Geochemistry. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to geochemistry.
Non-Traditional Format: Taught as a directed study, although traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4430/6430. Introduction to Research in Geophysics. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to geophysics.
Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4440/6440. Introduction to Research in Hydrogeology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to hydrogeology.
Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4450/6450. Introduction to Research in Mineralogy. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to mineralogy.
Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be employed when appropriate.

GEOL 4460/6460. Introduction to Research in Paleontology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to paleontology.
Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4470/6470. Introduction to Research in Petrology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to petrology.
Non-Traditional Format: Taught as a directed study, but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4480/6480. Introduction to Research in Sedimentary Geology. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques appropriate to sedimentation and stratigraphy.
Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4490/6490. Introduction to Research in Structure/Tectonics. 1-3 hours. Repeatable for maximum 9 hours credit.
The literature, research procedures, and instrumental techniques applicable to structural geology and/or tectonics.
Non-Traditional Format: Taught as a directed study but traditional lecture and lab exercises may be utilized when appropriate.

GEOL 4500/6500. Sedimentary Petrology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L.
Mineralogical, petrological, and geochemical study of sedimentary rocks (shales, sandstones, limestones, dolostones, cherts, evaporites, phosphorites, etc.) to interpret origins of sedimentary grains and to understand porosity and permeability of water/rock interaction in and diagenesis of sedimentary rocks.

GEOL 4510/6510. Marine Micropaleontology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 4010-4010L.
Geologic history and applications of marine microfossils, especially foraminifera, calcareous nannoplankton, radiolaria, and diatoms.

GEOL 4520/6520. Paleoecology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: (GEOL 1260-1260L and GEOL 3300) or permission of department.
The ecological factors affecting the distribution and abundance of fossil organisms, with emphasis on marine invertebrates. Invertebrates as a guide to environments of the past and as indicators of environmental change. Taphonomy of invertebrates.

GEOL 4550/6550. Clay Mineralogy and Geochemistry. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: GEOL 3010-3010L.
Clay minerals with emphasis on x-ray diffraction analysis and identification of mixed layer systems. Geochemical factors for clay origin and uses including applications to soils, petroleum, archeological, environmental and economic ore deposit studies.

GEOL 4560/6560. Weathering and Diagenesis. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: CHEM 1211 and CHEM 1211L and GEOL 3020-3020L.
Global cycling of major elements. Rock-water interactions. Kinetics of mineral dissolution and growth in soil, marine, freshwater, sedimentary basins and hydrothermal systems. Geochemical models for estimating reaction rates and reservoir capacities/fluxes are considered.

GEOL 4600/6600. Solid Earth Geophysics. 3 hours.
Prerequisite: GEOL 4020-4020L and MATH 2200 and MATH 2200L.
Analysis of Earth's gravity, magnetic, and seismic wave fields applied to the investigation of structure and dynamics of the Earth's interior. Course will cover theory, methods of analysis, and results of geophysical investigations. Emphasis on major new initiatives in satellite geodesy and digital seismic array studies.

GEOL 4620/6620. Exploration Geophysics. 3 hours.
Prerequisite: GEOL 4020-4020L and MATH 2200 and MATH 2200L.
Geophysical methods for imaging the subsurface. Course will focus on gravity, magnetic, resistivity, seismic refraction, and seismic reflection surveys. Applications discussed include exploration for hydrocarbons and characterization of the shallow subsurface for engineering/groundwater studies. Laboratory will include field experiments and computer modeling studies.

GEOL 4640/6640. Geochemical and Geophysical Surveys. 3 hours.
Prerequisite: GEOL 3010-3010L.
Prerequisite or corequisite: GEOL 4020-4020L.
Geochemical dispersion and survey of common pathfinder elements; methods of instrumental analysis used in geochemical exploration. Background theory of gravity, magnetic, electromagnetic, and electrical techniques used in resource exploration. Field based projects.

GEOL 4660/6660. Field School in Shallow Geophysics. 6 hours. 6 hours lecture and 6-7 lab periods of 8 hours each per week
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Techniques for the geophysical propsection of near-surface geology, geohydrology, and geomorphology. Techniques include electro-magnetic, radar, sonar, and magnetism.
Non-Traditional Format. Course taught during summer

semester utilizing applied field exercises in addition to traditional lecture/lab methods.

GEOL 4670/6670. Environmental Instrumental Analysis. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: CHEM 1212 and CHEM 1212L.
Lecture and laboratory course emphasizing principles and practical experience in chemical analysis of sediments, rocks and water, with particular emphasis on environmentally important organic and inorganic contaminants.
Non-Traditional Format: Field trip participation required.

GEOL(ANTH) 4700/6700. Archaeological Geology. 3 hours.
Prerequisite: (GEOL 1121 and GEOL 1121L) or GEOL 1250-1250L or permission of department.
Archaeological geology examines the use of earth science methods and theories in the study of archaeological sites and their contents. The four major areas covered include: (1) the archaeological site and geology; (2) age determination techniques; (3) exploration techniques; (4) artifact characterization.

GEOL 4750/6750. Earth Sciences for Middle School Teachers. 4 hours.
Fundamentals of earth sciences for middle school teachers. Map interpretation; minerals and rocks; principles of astronomy, meteorology and oceanography. Processes at the surface and inside the Earth. Emphasis on plate tectonics; geologic time scale, evolution of life, and a study of fossils. Geology and resources of Georgia.

GEOL 4900/6900. Seminar in Geohydrology. 1 hour.
Repeatable for maximum 6 hours credit.
Current and classical studies in geohydrology.

GEOL 4910/6910. Seminar in Geochemistry. 1 hour.
Repeatable for maximum 6 hours credit.
Current and classical studies in geochemistry.

GEOL 4920/6920. Seminar for Geology Teaching Assistants. 1 hour.
Discussion of the delivery of geology laboratory material, including presentation techniques, attendance policy, grading, and support systems.

GEOL 4950/6950. Geology Seminar. 1 hour. Repeatable for maximum 6 hours credit.
Reviews and discussions of current research topics.

GEOL 4960H. Directed Reading and/or Projects (Honors). 3-4 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

GEOL 4970H. Directed Reading and/or Projects (Honors). 3-4 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

GEOL 4980H. Directed Reading and/or Projects (Honors). 3-4 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

GEOL 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

(GREK) Greek

College of Arts and Sciences, Department of Classics

GREK 1001. Elementary Greek I. 4 hours.
Not open to students with credit in GREK 2050.
The grammar, reading, and translation of Classical Attic Greek.

GREK 1002. Elementary Greek II. 4 hours.
Not open to students with credit in GREK 2060.
Prerequisite: GREK 1001.
The grammar, reading, and translation of Classical Attic Greek, continued from Elementary Greek I.

GREK 2001. Intermediate Greek I. 3 hours.
Prerequisite: GREK 1002 or GREK 2060.
Review of Classical Attic Greek grammar, as needed, plus selected readings in Herodotus and Euripides.

GREK 2002. Intermediate Greek II. 3 hours.
Prerequisite: GREK 2001 or permission of department.
Selected readings in Homer and Plato.

GREK 2050. Intensive Elementary Greek I. 4 hours.
Not open to students with credit in GREK 1001.
Corequisite: GREK 2060.
The pronunciation, grammar, reading, and translation of Classical Attic Greek.

GREK 2060. Intensive Elementary Greek II. 4 hours.
Not open to students with credit in GREK 1002.
Prerequisite: GREK 2050.
A continuation of Intensive Elementary Greek I.

GREK 3000. Intermediate Greek III. 3 hours.
Prerequisite: GREK 2002.
Selected readings in Homer and Plato.

GREK 4010/6010. Homer. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selections from the *Iliad* and/or the *Odyssey*.

GREK 4020/6020. Hesiod. 3 hours.
Prerequisite: GREK 2002 or permission of department.
Study of Hesiod's two surviving poems, the *Theogony* and the *Works and Days*, with special attention to the relationship of his language and religious thinking to that of Homer.

GREK 4030/6030. Greek Lyric Poets. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected Greek elegy and lyric, with attention to its political and social background, and to the relation of these literary types to epic and dramatic poetry.

GREK 4040/6040. Thucydides. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
The Peloponnesian War through selected readings.

GREK 4050/6050. Aeschylus. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Aeschylus' plays, with emphasis on his theology and special uses of the Greek language.

GREK 4060/6060. Sophocles. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Sophocles' plays, with emphasis on the poet's religious and humanistic values and his dramatic style.

GREK 4070/6070. Euripides. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Euripides' plays, with emphasis on the poet's dramatic style and his treatment of social, political, and religious themes.

GREK 4080/6080. Aristophanes. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected comedies of Aristophanes. Emphasis is placed on language, style, and thought, and on the generic characteristics of Greek Old Comedy.

GREK 4090/6090. Advanced Readings: Plato. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
The dialogues of Plato. Emphasis is placed on the language, style, and philosophical thought of Plato.

GREK 4100/6100. Attic Orators. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GREK 2002 or permission of department.
Orations drawn from the works of Demosthenes, Lysias, and Aeschines, with emphasis on the function and techniques of persuasion in oratory and on the political and social contexts of these orations.

GREK(LATN)(LING) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo-European.

GREK 4200/6200. Readings in Selected Greek Authors. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: GREK 2002 or permission of department.
Selected Greek authors to be chosen according to the interests of students and instructor.

(GRMN) German

College of Arts and Sciences, Department of Germanic and Slavic Languages

GRMN 1001. Elementary German I. 4 hours.
Fundamentals of grammar, pronunciation, conversation, reading, and translation. Additional language laboratory work required.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GRMN 1002. Elementary German II. 4 hours.
Prerequisite: GRMN 1001.
A continuation of Elementary German I.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GRMN 1140H. Elementary German (Honors). 4 hours.
Not open to students with credit in GRMN 1001 or GRMN 1002.
Prerequisite: Permission of Honors.
A combination of Elementary German I and Elementary German II.

GRMN 2001. Intermediate German I. 3 hours.
Prerequisite: GRMN 1002.
Grammar, reading, and translation of intermediate texts, composition, and conversation. Additional language laboratory work may be required.

GRMN 2002. Intermediate German II. 3 hours.
Prerequisite: GRMN 2001.
Readings in modern German prose, composition, and conversation. Additional language laboratory work may be required.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

GRMN 2140H. Intermediate German (Honors). 3 hours.
Not open to students with credit in GRMN 2001 or GRMN 2002.
Prerequisite: GRMN 1002 and permission of Honors.
Intensive readings in modern German literature and culture, composition, and conversation. Additional language laboratory work may be required.

GRMN 3001. German Conversation and Composition I. 3 hours.
Prerequisite: GRMN 2002.
Broad and deep coverage of syntax and vocabulary in both the spoken and written language. Oral and written practice, original compositions, and selected readings in German culture and literature.

GRMN 3002. German Conversation and Composition II. 3 hours.
Prerequisite: GRMN 3001.
Increasingly advanced coverage of syntax and vocabulary in both spoken and written language. Oral and written reports, original compositions, and selected readings in German culture and literature.

GRMN 3060. Business German. 3 hours.
Prerequisite: GRMN 2002.
Introduces business students to the German language through an approach that emphasizes conversational skills and business terms. Acquaints students with the German environment as it relates to business.

GRMN 3100. German Culture and Literature. 3 hours.
Prerequisite: GRMN 3001.
The interrelationship between German culture (history, art, philosophy, music) and literature from the eighteenth century to the present.

GRMN 3200. German Landeskunde. 3 hours.
Prerequisite: GRMN 3001.
The Federal Republic of Germany since reunification, with emphasis on geography, political, social, education and cultural institutions, within the framework of recent change from a homogeneous to a multicultural society.

GRMN 3250. Survey of German Literature from the Beginnings to the Enlightenment. 3 hours.
Prerequisite: GRMN 3001.
Reading and analysis of representative German works from the Old High German and Middle High German periods, Humanism, the Reformation, the Renaissance, and the Baroque.

GRMN 3260. Survey of German Literature from the Enlightenment to the Present. 3 hours.
Prerequisite: GRMN 3001.
Reading and analysis of representative German works of the Enlightenment, Storm and Stress, Classicism, Romanticism, Realism and the major literary movements of the twentieth century.

GRMN(LING) 3380. Contrastive Grammar of English and German. 3 hours.
Prerequisite: GRMN 2002.
Contrastive analysis of German and English phonology and grammar. Prepares future teachers of German to identify pedagogically important structural differences between English and German.

GRMN 3500. Techniques of Translation. 3 hours.
Review of grammar, idioms, and vocabulary; practice in translating moderately difficult technical and non-technical German texts into correct English. Does not apply to the major or minor in German or language certificates. Satisfies language requirement for graduate students.

GRMN 3600H. Heroic Literature (Honors). 3 hours.
Prerequisite: Permission of Honors.
The oldest northern European medieval literary movements studied as historical remnants from the Age of Migrations to the Viking period, with influences from mythology and folklore. Taught in English.

GRMN 3990. Directed Study in German. 1-3 hours.
Repeatable for maximum 3 hours credit.
Prerequisite: GRMN 3001 or GRMN 3002.
Independent study and research under the direction of individual faculty members.
Non-Traditional Format: Directed study.

GRMN 4001/6001. Advanced German Conversation and Composition. 3 hours.
Prerequisite: GRMN 3002.
Vocabulary building and review of grammar. Emphasis on common errors of English speakers and on distinctions in meaning.

GRMN 4300/6300. German Literature from the Enlightenment through Classicism. 3 hours.
Prerequisite: GRMN 3001.
Eighteenth-century German literature and culture from approximately 1740-1806. Representative readings from Enlightenment, Empfindsamkeit, Storm and Stress, and Classicism. Includes texts that provide background on eighteenth-century political, social, and cultural developments.

GRMN 4400/6400. German Literature from Romanticism through Realism. 3 hours.
Prerequisite: GRMN 3001.
Nineteenth-century German literature and culture from approximately 1795-1900. Representative readings from early to late Romanticism, Junges Deutschland, Vormaerz, Biedermeier, and Realism. Includes texts that provide background on nineteenth-century political, social, and cultural developments.

GRMN(LING) 4460/6460. Structure of Modern German. 3 hours.
Prerequisite: GRMN 3001.
Linguistic and sociolinguistic structure of modern German with relevant linguistic terminology. Emphasis on phonology, morphology, and syntax. Taught in English.

GRMN 4500/6500. German Literature from Naturalism to the Present. 3 hours.
Prerequisite: GRMN 3001.
Twentieth-century German literature from approximately 1895 to the present. Representative readings from Naturalism, Impressionism, Expressionism, wartime and postwar literature, literature of the GDR, and contemporary literature through post-unification. Includes texts that provide background on twentieth-century political, social, and cultural developments.

GRMN 4510. Special Topics in German Literature or Linguistics. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GRMN 3001.
Intensive reading and study of a genre (poetry, drama, Novelle), period, movement, theme, or topic.

GRMN 4520. Senior Seminar. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: GRMN 3002 and permission of department.
Capstone course for German majors, minors, and advanced students. Selected topics in German literature and culture. Required for German majors.

GRMN 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: GRMN 3001 and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

GRMN 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: GRMN 3001 and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

GRMN 4990H. Honors Thesis. 3 hours.
Prerequisite: GRMN 3001 and permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Directed study.

(HACE) Housing and Consumer Economics

College of Family and Consumer Sciences, Department of Housing and Consumer Economics

HACE 2000. Introduction to Family and Consumer Sciences. 1 hour.
The specialties and professions comprising the fields in family and consumer sciences. Systems perspective is emphasized in examining quality of life issues. Discussions include the personal, professional, and technical elements involved in career development.

HACE 2100. Family Economic Environment. 3 hours.
The family as a producing and consuming unit, including the decision-making processes involved and the special role of housing. Emphasis is on interrelationships among decisions and the links between economic and social issues.

HACE 3000. Family Resource Management. 3 hours.
Individual and family management, including value orientation, decision-making, and creation and utilization of resources. Special emphasis placed on application of concepts to unique managerial situations encountered in day-to-day living.

HACE 3010. Directed Study in Housing and Consumer Economics. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Designed for the senior major to permit independent study and research.
Non-Traditional Format: Directed study.

HACE 3100. Introductory Consumer Economics. 3 hours.
Concepts underlying consumer economics. Emphasis is on the consumer in the marketplace, consumer choice, information search, consumer protection, including redress and consumer affairs as a profession.

HACE 3150. Consumer Decisions: Home and Market. 3 hours.
Prerequisite: ECON 2106.
Theories of consumer and household decision making. Applications of economic theories to basic issues confronting consumers in the marketplace. Family economic models and theories of household time allocation.

HACE 3200. Intermediate Family Financial Management. 3 hours.
Prerequisite: HACE 2100.
Cash flow management and consumption expenditures, credit and debt, simple applications of personal income taxes, risk management, property and health insurance, and employee benefits. A variety of case studies with different household compositions will be used to provide practical applications on each topic. Computer applications will be used with some topics.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HACE 3300. Housing in a Contemporary Society. 3 hours.
Present-day family housing needs from the standpoint of health, safety, environment, finance, ownership, types of dwellings, and minimum standards. Basic terms and concepts to establish a foundation for other Housing and Consumer Economics housing classes.

HACE 4100/6100. Family Economic Behavior and Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 3150.
The family as an income producing and time allocating unit. Theory and applications of the economics of household decision making. The family as the supplier and demander of economic inputs and outputs. The interrelationship between demographic and economic family characteristics and well-being.

HACE 4200/6200. Advanced Family Financial Management. 3 hours.
Prerequisite: Undergraduate level only: HACE 3200.
Personal income taxes, life insurance, disability insurance, liability insurance, savings and investment, retirement planning, and estate planning.

HACE 4300/6300. Advanced Housing Theories. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Sociological and economic theories of housing consumption and production in housing markets, including basic concepts of housing needs, quality, norms and satisfaction. Economic theories relating to characteristics of housing and capital markets, including primary and secondary mortgage markets and alternative financing.

HACE 4310/6310. Housing Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Housing policies at the federal, state, and local levels as they relate to current housing markets. Barriers and incentives for housing development activities created by regulations, finance, and taxation. The role of public/private initiatives in the provision of housing.

HACE 4350/6350. Household Technology and Systems. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Technological devices and their use within the household, including mechanical and electrical systems, home automation, universal design, regulation, and national appliance standards.

HACE 4400/6400. Family Demographics and Policy. 3 hours.
Prerequisite: Undergraduate level only: HACE 2100 or SOCI 1101.
Basic concepts and measurement issues of family demography, including migration, income, marriage, and divorce; implications of family structural characteristics for public policies.

(HACE)CHFD 4500/6500. Second Half of Life. 3 hours.
Prerequisite: Junior standing or permission of department.
Second half of life; resource management, living patterns, and housing, sexuality, roles, family relationships, community and organization involvement, and career opportunities.

HACE 4900/6900. Seminar in Housing and Consume Economics. 3 hours. Repeatable for maximum 9 hou credit.
Prerequisite: Permission of department.
Selected topics and problems in housing and consume economics.

HACE 4960H. Directed Reading and/or Projec (Honors). 3-9 hours. Repeatable for maximum 9 hou credit.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direc tion of a project director.
Non-Traditional Format: Directed study.

HACE 4970H. Directed Reading and/or Project (Honors). 3-9 hours. Repeatable for maximum 9 hour credit.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direc tion of a project director.
Non-Traditional Format: Directed study.

HACE 4980H. Directed Reading and/or Project (Honors). 3-9 hours. Repeatable for maximum 9 hour credit.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direc tion of a project director.
Non-Traditional Format: Directed study.

HACE 4990H. Honors Thesis. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of Honors.
Individual research in the major field.
Non-Traditional Format: Directed study.

HACE 5100/7100. Consumer Protection. 3 hours.
Prerequisite: Undergraduate level only: HACE 3150.
Consumer rights and responsibilities in the private and public sector of the economy. Relationship of government, nonprofit, and corporate response to consumer problems, legislation concerning consumer information, product safety, and choice of goods and channels of appeal for the consumer.

HACE 5150/7150. Consumers' Market Environment. 3 hours.
Prerequisite: HACE 3100 and HACE 3150.
The consumer marketplace in terms of the welfare of the consumer. Actions of consumers with changing marketplace, institutions, and government policies.

HACE 5200/7200. Family Financial Counseling. 3 hours.
Prerequisite: Undergraduate level only: HACE 3200.
Indicators, causes, and impact of family financial problems on the family's well-being. Topics covered include credit difficulties, repossessions, liens, garnishments, and bankruptcy.
Non-Traditional Format: Students are required to work on a regular basis with families in financial difficulty.

HACE 5250/7250. Family Financial Planning. 3 hours.
Prerequisite: HACE 4200/6200.
Advanced financial topics and development of a comprehensive financial plan. Regulation, certification, and legal and ethical requirements for financial planners.

HACE 5350/7350. Housing Counseling. 3 hours.
Prerequisite: Undergraduate level only: HACE 3300.
Basic information for certification as a Professional Housing Counselor. Includes basic techniques for housing, budget, and tenancy counseling.

HACE 5710/7710. Study Tour in Housing and Consumer Economics. 3-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Topics relating to housing or consumer economics, with site visits to relevant locations. Combines in-depth study with first-hand experience gained on site.
Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

HACE 5900/7900. Professional Seminar and Internship Orientation. 1 hour.
Orientation to an internship experience.

HACE 5910/7910. Housing and Consumer Economics Internship. 3-9 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department.
Supervised work experience in housing, consumer economics, or consumer journalism.
Non-Traditional Format: Internship.

(HEBR) Hebrew

College of Arts and Sciences, Department of Religion

HEBR 1001. Elementary Biblical Hebrew I. 4 hours.
A study of classical Hebrew grammar.

HEBR 1002. Elementary Biblical Hebrew II. 4 hours.
Prerequisite: HEBR 1001.
A continuation of Elementary Biblical Hebrew I.

HEBR 2003. Intermediate Biblical Hebrew I. 3 hours.
Prerequisite: HEBR 1002.
Classical Hebrew grammar with reading of selected texts from the Hebrew Bible/Old Testament.

HEBR 2004. Intermediate Biblical Hebrew II. 3 hours.
Prerequisite: HEBR 2003.
Readings of Hebrew texts selected from the Hebrew Bible/Old Testament, Dead Sea Scrolls, or early rabbinic literature.

HEBR 4100/6100. Reading and Research in Hebrew Literature. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: HEBR 2004 or permission of department.
Directed study in reading and research in classical Hebrew literature.
Non-Traditional Format: Directed study.

HEBR 4960H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HEBR 4970H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HEBR 4980H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HEBR 4990H. Honors Thesis. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Directed study.

(HIPR) Historic Preservation

School of Environmental Design

HIPR 4000/6000. Introduction to Historic Preservation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of school.
Historic preservation theory, its evolution and practice, and its relationship to the concept of environmental quality.

(HIST) History

College of Arts and Sciences, Department of History

HIST 2050H. Multicultural America (Honors). 3 hours.
Not open to students with credit in HIST 2051 or HIST 2052.
Prerequisite: Permission of Honors.
United States history from a multicultural and multiethnic

perspective. Examines the roles Native Americans, European Americans, African Americans, Hispanic Americans, and Asian Americans have played in the making of America. The course begins in seventeenth-century Virginia and continues to the present.

HIST 2051. Multiculturalism in Early America. 3 hours.
The multicultural reality of the American experience from the 1600s through the 1800s by examining the complex interactions of people of diverse races, ethnicities, classes, and gender in forging the American nation.

HIST 2052. Multiculturalism in Modern America. 3 hours.
United States history since 1865 from a multicultural and multiethnic perspective. The course will emphasize social, cultural, and political dimensions of the American experience, paying particular attention to issues of race and ethnicity. Highlights the contributions of the many different peoples who make up America.

(HIST)GEOG(ANTH)(CMLT)(SOCI) 2100. Introduction to Africa. 3 hours.
The history, physical environment (landforms, vegetation, and climate), and sociocultural environment (artistic, political, and social development) of Africa.

HIST 2111. American History to 1865. 3 hours.
American society, politics, thought, institutions, and economic life from the first settlements to the end of the Civil War.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HIST 2111H. United States Survey to 1865 (Honors). 3 hours.
Not open to students with credit in HIST 2111.
Prerequisite: Permission of Honors.
United States survey at the honors level will deal more thematically than the regular survey with a variety of issues in American history from its founding through the Civil War. Emphasis on primary sources and research and writing, often with a seminar format.

HIST 2112. American History Since 1865. 3 hours.
Not open to students with credit in HIST 2112H.
Development of the American nation from 1865 to the present.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HIST 2112H. History of the United States 1865 to Present (Honors). 3 hours.
Not open to students with credit in HIST 2112.
Prerequisite: Permission of Honors.
The major political, economic, social, and cultural changes in the United States from reconstruction to the present.

HIST 2221. Latin American Civilization to 1800. 3 hours.
Amerindian, Iberoamerican, and Caribbean history and culture from pre-encounter times to 1800.

HIST 2222. Latin American Civilization Since 1800. 3 hours.
Latin American and Caribbean history and culture from 1800 to the present.

HIST 2301. History of Western Society to 1500. 3 hours.
The major ideas and images that make up the foundation of modern western society. The origin and formation of Judaism, Christianity, and Islam. The growth of ideas of law and political philosophy.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HIST 2302. History of Western Society Since 1500. 3 hours.
Western society from the Renaissance to the present day, emphasizing ideas, culture, and social change.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HIST 2311H. Western Society to 1500 (Honors). 3 hours.
Not open to students with credit in HIST 2301.
Prerequisite: Permission of Honors.
The social, political and economic developments in the west to 1500 A.D.

HIST 2312H. Western Society Since 1500 (Honors). 3 hours.
Not open to students with credit in HIST 2302.
Prerequisite: Permission of Honors.
Integrating social, cultural, and political history, this course includes such topics as religion, changing social structures and gender identities, industrialization, revolution and the rise of nationalism, Europe and the world, modern wars and mass political movements.
Non-Traditional Format: Taught as a seminar with extensive readings in primary and secondary sources.

HIST 2501. Introduction of African History to Sixteenth Century. 3 hours.
Cultural history of Africa to sixteenth century. Origins of agriculture, rise and growth of complex societies and states, spread and importance of Islam, slavery and diaspora issues.

HIST 2502. Survey of African History After 1600. 3 hours.
The social, political, and economic development of Sub-Saharan African societies and their assimilation of non-African peoples, their ideas, and materials culture after 1600. African and European objectives intertwined and contradicted. Transformations after 1600 were a con-

tinuation of those precipitated by trade, migration, conquest, religion, and innovation.

HIST 2560. The Middle East Since 1914. 3 hours.
Not open to students with credit in HIST 3570H.
History of the Middle East from World War I to the present, focusing on political, religious, cultural, and economic circumstances.

HIST 2601. East Asian Civilizations I. 3 hours.
Historical, religious, political, economic, and social traditions of East Asia, from prehistory to the seventeenth century, emphasizing political and cultural interaction within the region.

HIST 2602. East Asian Civilizations II. 3 hours.
Historical, religious, political, economic, and social traditions of East Asia, from the seventeenth century to the present, emphasizing political and cultural interaction within the region.

HIST 2701. World Civilizations I. 3 hours.
The human community from ancient times to A.D. 1500, focusing on the interrelations of societies and cultures and comparing the experiences of peoples and civilizations with one another.

HIST 2702. World Civilizations II. 3 hours.
The human community from A.D. 1500 to the present, focusing on the interrelations of societies and cultures and comparing the experiences of peoples and civilizations with one another.

HIST 3020. United States Foreign Relations Since 1914. 3 hours.
A survey of American foreign relations since 1914.

HIST 3030. History of Canada. 3 hours.
The history of Canada from European settlement to the present day. Special attention will be given to political, constitutional, and economic developments.

HIST 3060. Colonial and Revolutionary America. 3 hours.
Native American, African, and European interactions; warfare, labor systems, cultures, and societies; empire building and colonial political structures; the American Revolution and the formation of the United States.

HIST 3071. Origins of Modern America. 3 hours.
Economic, social, diplomatic, and political trends in the United States, 1877-1917.

HIST 3072. The United States Between the Wars, 1914-1945. 3 hours.
The shifting patterns of political, economic, cultural, and social development in the United States as the nation confronted prosperity, depression, and war.

HIST 3073. Modern America, 1945 to Present. 3 hours.
Social, economic, diplomatic, and political trends in the United States during the post-World War II era.

HIST 3080H. America and the World (Honors). 3 hours.
Prerequisite: Permission of Honors.
Selected aspects of United States relations with the world in the twentieth century.

HIST 3085. United States Women's History. 3 hours.
Not open to students with credit in HIST 4080/6080.
Women's experiences in the United States since the arrival of Europeans on the North American continent. Women's life experiences within the context of larger historical changes in the United States. Women's history as an integral part of American social history and as a unique subject of historical investigation.

HIST 3090. The American South. 3 hours.
Major themes and issues in southern history from Jamestown through the 1980s. Topics will include colonial settlement, frontier expansion, slavery, the Civil War and Reconstruction, Populism, Jim Crow, the New South, the civil rights movement, and Sunbelt development.

HIST 3095H. Multicultural Georgia (Honors). 3 hours.
Prerequisite: Permission of Honors.
Racial, ethnic, and regional diversity of Georgia's past, from initial Spanish-Native American contacts through the civil rights movement and recent Latino migration into the state. Chronological and thematic approaches in exploring interactions of Georgians — Indians, European, African-American, Jewish, Appalachian, Latino — at various points in the state's history.

(HIST)ENGL 3100. Introduction to British Culture I. 3 hours.
Prerequisite or corequisite: CMLT 2210 or CMLT 2220 or CMLT 2250H or CMLT 2260H or ENGL 2310 or ENGL 2320 or ENGL 2340 or ENGL 2350H or ENGL 2360H or ENGL 2370H or ENGL 2380H or ENGL 2390H or ENGL 2400.
Corequisite: ENGL(HIST) 3110.
Interdisciplinary, writing-intensive course in British literature and history for University of Georgia at Oxford students. Readings organized around geographical sites in Britain using newest Web technologies.
Non-Traditional Format: Web-based remote delivery course that students will take from their hometowns during the "downtime" between the start of the spring semester at the University of Georgia and the beginning of the Oxford Trinity term.

HIST 3101. The Early African American Experience. 3 hours.
The African background of African Americans, the institution of slavery, the development of the African American community institutions, and African American participation in and impact on the Civil War and Reconstruction.

HIST 3102. Modern African American Experience. 3 hours.
The twentieth-century struggle for civil rights, black identity, and self-determination. The response to industrialism and urbanization. The role of black institutions and political organizations. The philosophy and tactics of accommodation, integration, and separatism.

(HIST)ENGL 3110. Introduction to British Culture II. 3 hours.
Prerequisite or corequisite: CMLT 2210 or CMLT 2220 or CMLT 2250H or CMLT 2260H or ENGL 2310 or ENGL 2320 or ENGL 2340 or ENGL 2350H or ENGL 2360H or ENGL 2370H or ENGL 2380H or ENGL 2390H or ENGL 2400.
Corequisite: ENGL(HIST) 3100.
Interdisciplinary, writing-intensive course in British literature and history for University of Georgia at Oxford students. Readings organized around geographical sites in Britain using newest Web technologies.
Non-Traditional Format: Web-based remote-delivery course. Course will be offered via the Web during "downtime" between start of the University of Georgia's spring semester and Oxford term.

(HIST)RELI 3150. Religion in the United States. 3 hours.
Prerequisite: Junior standing or permission of department.
The significant developments in American religious history and thought from Puritanism to the present with attention to the social and cultural contexts in which various religious movements arose.

HIST 3220. History of Mexico. 3 hours.
Mexican history and culture from pre-Columbian times to the present.

HIST 3230. History of Brazil. 3 hours.
Brazilian history and culture from pre-Columbian times to the present.

HIST 3240. The Caribbean Area. 3 hours.
The islands and Caribbean periphery from pre-Columbian times to the present. European intrusion and settlement, plantation societies and economies, slavery and slave rebellion, nineteenth- and twentieth-century political and economic developments, and United States policy. Approximately one-third of the course will focus on the period after World War II.

HIST 3250. History of the Americas. 3 hours.
The Western hemisphere from pre-Columbian times, with emphasis on social and economic development and the evolution of political cultures from the American Revolution to the present.

HIST(CLAS) 3310. Ancient History. 3 hours.
The political and economic world from the Stone Age to the end of the Western Roman Empire in 476 A.D.

HIST(CLAS) 3321. History of Women in the Ancient World. 3 hours.
The history of women in many of the ancient civilizations of the Mediterranean and Middle East. The social, religious, and political roles played by women of different classes within the patriarchal framework of these societies. Emphasis will be placed on the reading and discussion of primary sources.

HIST 3323. History of Women in Early Modern Europe. 3 hours.
The experiences, challenges, and achievements of women in early modern Europe. Perceptions of women—religious, literary, political, and social. Through such study, we can learn more both about women and about how society functioned and responded to change.

HIST 3324. History of Women in Modern Europe. 3 hours.
The experiences, challenges, and achievements of women in modern Europe. Perceptions of women—religious, literary, political, and social. Through such study, we can learn more both about women and about how society functioned and responded to change.

HIST 3330. The Medieval World. 3 hours.
Medieval Europe from 476 to the fall of Constantinople in 1453. The rise of the Catholic Church to its dominance of thirteenth- century Europe and the struggle of kings with their feudal values will be discussed against the backdrop vs. ravages of the Inquisition and the Black Death.

HIST 3332. Wenches, Witches, Damsels and Nuns: Women in Medieval Europe. 3 hours.
The ideas about and images of women throughout the medieval period. The issues of political, economic, and social rights of women of different classes. The presence of misogyny will be questioned.

HIST 3340. The Age of Renaissance and Reformation. 3 hours.
The two great intellectual movements of early modern Europe: the Renaissance and the Reformation. The religious and social context in which the developments associated with these movements took place, as well as their impact on European society.

HIST 3350. The Age of Absolutism: Rulers, Subjects, Citizens. 3 hours.
The rise of the modern European state and its impact on society and culture from 1600 to 1789. Themes include kingship and state formation, popular revolt, aristocratic culture, Enlightenment social thought, and the collapse of the Old Regime.

HIST 3361. Europe's Revolutionary Century, 1789-1900. 3 hours.
The history of Europe from 1789 to 1900, emphasizing political and social change, the spread of revolutionary ideas, and the rise of nation states.

HIST 3362. Twentieth-Century Europe. 3 hours.
Major political, economic, social, and cultural developments.

HIST 3371. Tudor-Stuart England. 3 hours.
English history in the sixteenth and seventeenth centuries.

HIST 3372. English History Since 1660. 3 hours.
English history from the Restoration to the present. Emphasis will be on political and cultural change as well as economic and imperial development.

HIST 3381. Old Regime and Revolutionary France. 3 hours.
French history from the sixteenth to the late eighteenth century. Peasant life, social hierarchy, religious conflict, the politics and culture of Absolutism, the Enlightenment, the fall of the Old Regime, and the French Revolution.

HIST 3382. Modern France Since 1799. 3 hours.
French social and political history in the nineteenth and twentieth centuries. Processes of urbanization and industrialization in the nineteenth century and French political and cultural development in the twentieth century.

HIST 3390. Germany Since 1789. 3 hours.
Germany from 1789 through the Revolutions of 1848, German unification, the Wilhelminian Reich, World War I, the Weimar Republic, the Third Reich, World War II, division, and reunification.

HIST 3400. Modern Italy. 3 hours.
The eighteenth-century beginnings of the movement for unification to the present, with particular emphasis on the distinctiveness of the Italian experience in culture, society, and politics.

HIST 3411. Russia to the Great Reforms. 3 hours.
Traces rise of Russian state from Kievan Rus through Tsardom of Nicholas I. High points include Mongol legacy, rise of Muscovy, the "Time of Troubles," and creation of modern state structure by Peter I (The Great). Final focus is on nineteenth-century reform beginnings and rise of revolutionary movement.

HIST 3412. Modern Russia: Revolution, the USSR, and Aftermath. 3 hours.
Stresses Alexander II's reforms and subsequent Tsarist policies plus parallel advance of the revolutionary movement to the 1917 Bolshevik takeover. Post-1917 coverage emphasizes Leninist-Stalinist contributions and subsequent modifications culminating with Gorbachev period. Ends with 1991 Communist downfall and emergence of a new Russia.

HIST 3421. History of Western Science to the Scientific Revolution. 3 hours.
The history of early science beginning with some major ancient and medieval natural philosophers and historians, and ending with the Scientific Revolution of the 1500s and 1600s, which decisively shaped western civilization.

HIST 3432. History of Western Science Since the Scientific Revolution. 3 hours.
A continuation of the survey of the history of science, from the culmination of the Scientific Revolution in the 1600s to the twentieth century, considering science and scientific ideas in relation to broader social, religious, and intellectual issues.

HIST 3433. History of Medicine. 3 hours.
The history of medicine in Western society. The impact of epidemic disease, concepts of illness, medical therapies, types of practitioners and their education, and public health.

HIST 3500. Seventeenth Through Nineteenth-Century Southern Africa. 3 hours.
Social, political, and economic changes in southern African societies (South Africa, Namibia, Lesotho, Botswana, Swaziland, Zimbabwe, and Mozambique) as they assimilated non-African peoples, their ideas, and material culture. Independent, viable and adaptable, Africans engaged Portuguese, British, Boers, and Germans as they competed for land, cattle, and trade.

HIST 3511. East Africa to the Nineteenth Century. 3 hours.
Economic, political, and cultural history of East Africa to the nineteenth century. Growth of agricultural systems, forms and functions of states and kingdoms, the world of the Indian Ocean, slavery and rebellion.

HIST 3512. East Africa in the Nineteenth and Twentieth Centuries. 3 hours.
Economic and cultural history of East Africa in the nineteenth and twentieth centuries. Food, trade, commodification, slavery, rage, missionary and colonial interests, nationalisms, independence, art and literature.

HIST 3530. Women in Sub-Saharan Africa. 3 hours.
Women's social, economic, spiritual, and political contributions to African history from precolonial to contemporary times. Emphasizing African women, it also addresses European and Asian women immigration. Women's interpretations of their identities, social worlds, and experiences, recognizing their essential role in African societies.

HIST 3562. The Middle East From 1453 to 1918. 3 hours.
The history of the Middle East from 1453 to 1918, focusing on the Ottoman Empire and its provinces.

HIST 3570H. Religion, Nationalism, and Revolution in the Middle East, 1900 to the Present (Honors). 3 hours.
Not open to students with credit in HIST 3560.
Prerequisite: Permission of Honors.

Evolution of religious, nationalist, and cultural identities in the region of the Modern Middle East and their contribution to political revolutions throughout the twentieth century.

HIST 3580. Egypt: Mother of Civilization. 3 hours.
Political and cultural history of Egypt from the medieval era up to the present. Examining the history of education in Egypt, Egyptian women, the growth of feminism, and Cairo as an international metropolis, with a look at Egypt's experiences with colonialism and relationship with the rest of Africa, particularly Sudan.

HIST 3601. Premodern Japan: Foundations of Culture and State. 3 hours.
Ancient and medieval Japan, focusing on the institutional and cultural foundations of the Japanese state.

HIST 3602. Modern Japan: From Shogun to Superpower. 3 hours.
Early modern and modern Japan: the transformation of Japan from an isolationist, agrarian country to a military giant, to a broken and defeated nation, to an economic superpower.

HIST 3661. History of China I: Traditional China. 3 hours.
Traditional, intellectual, political, economic, social, literary, religious, and diplomatic developments up to Sung dynasty. Influences of Confucianism, Daoism, and Buddhism on identity; development and influence of "Zhung-Guo" (Central Kingdom); trade-tribute concepts on political and economic institutions; the importance of growth of family system/gender views on social institutions.

HIST 3662. History of China II: Transitional China. 3 hours.
Internal/external influences that challenge traditions and cause important changes. Influences of nomadic invaders— Mongols/Manchus, on social and political history, of Buddhist/Daoist influences on Neo-Confucianism; of impact of Christian missionaries/western merchants on modifications of political and economic institutions.

HIST 3663. History of China III: Revolutionary China. 3 hours.
End of nineteenth through the twentieth century; focusing on the Republic of China, its establishment, development, and troubles; rise of Nationalism/Communism; establishment, development, and troubles of the People's Republic of China. Revolutions; the leaders of them, and their important ideas and impact.

HIST 3670H. Introduction to Chinese Civilization (Honors). 3 hours.
Prerequisite: Permission of Honors.
Major sources, ideas, and institutions of Chinese tradition.

HIST 3680H. Communist China (Honors). 3 hours.
Prerequisite: Permission of Honors.
The rise of Communism in China. The collapse of the "old order," Marxism and Maoism, the Chinese Civil War, the establishment of the PRC, the Great Leap Forward, the Great Proletarian Revolution, the Deng Xiaoping era, among other topics.

HIST 3720H. Seminar in Comparative History (Honors). 3 hours.
Prerequisite: Permission of Honors.
An undergraduate research seminar focusing on topics from a comparative perspective.

HIST 3751. War and Society to 1600. 3 hours.
The history of warfare in the ancient and medieval worlds. Focuses on the interdependent, causal relationship between the structures and sources of political power, the objectives and purposes of warfare, the composition and organization of military forces, and the tactics and equipment of war.

HIST 3752. War and Society Since 1500. 3 hours.
The history of warfare in the context of the warring societies from 1500 to the present in world history.

HIST 4000/6000. Studies in American History. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Junior or senior standing.
A special subject not otherwise offered in the history curriculum. Topics, methodology, and instructors vary from semester to semester. Normally, no more than two such courses may be counted toward the major or the minor in history, exceptions being made only by the Coordinator of Instruction.

HIST 4030/6030. Politics of Morality in the United States. 3 hours.
Origin of selected political and moral dilemmas in American multicultural contexts from the Colonial to the Contemporary period.

HIST 4040/6040. Working Class America. 3 hours.
Using fiction and film as well as traditional texts, the history of working-class women and men in the United States. The emphasis will be on the everyday lives of the laborers—what they did at work and at home, in the union hall, and on the picket line.

HIST 4050/6050. American Lives. 3 hours. Repeatable for maximum 6 hours credit.
Biographies and autobiographies to explore a variety of themes and issues in American history. Emphases will differ depending on instructor: focus may be nineteenth century, twentieth century, women, race, southern autobiography, etc.

HIST(AFAM) 4055/6055. Historical Survey of African American Thought. 3 hours.
This course examines representative works of such nineteenth- and twentieth-century social, cultural, and

political thinkers as Frederick Douglass, Cornel West, Anna J. Cooper, and Angela Davis among other outstanding women and men who have contributed significantly to the intellectual life of the African American community.

HIST 4060/6060. American Legal History. 3 hours.
American legal thought, institutions, and education, focusing on the impact of social, political, and economic forces on the legal system. The English background, colonial period, legal foundations of the new nation, and the nineteenth and twentieth centuries.

HIST 4070/6070. Jeffersonian and Jacksonian America. 3.0 hours.
History of the U.S. from the early republic through the antebellum period, with emphasis on territorial expansion, industrialization, the first and second political systems, and the emergence of the sectional crisis.

HIST 4071/6071. Antebellum South. 3 hours.
A chronological and thematic history of the South from Spanish exploration and Jamestown's settlement through the secession crisis of 1860-1861, with an emphasis on the social, cultural, economic, and political aspects of southern life in the colonial and antebellum periods.

HIST 4072/6072. The Civil War Period of American History. 3 hours.
The origin, conduct, and legacy of the war and the impact of the conflict upon peoples and institutions.

HIST 4073/6073. The Era of Reconstruction, 1865-1877. 3 hours.
The process of reunion, especially in the American South, with emphasis upon the experience of African Americans.

HIST 4074/6074. The South Since Reconstruction. 3 hours.
Economic, social, cultural, and political developments in the South since Reconstruction.

HIST 4075/6075. Scientific Interests in the South. 3 hours.
Scientific inquiry in the southeastern region of the United States. Stresses cultural and intellectual milieu, examines special role of natural history, and compares inquiries of southern scientists with those of other contemporary United States scientists.

HIST 4080/6080. Politics of Gender in United States History. 3 hours.
Representations of women's power historically, evaluated critically in terms of gender, race, and class.

HIST 4091/6091. Problems in American Foreign Policy, 1776-Present. 3 hours.
Selected problems related to United States foreign policy.

HIST 4092/6092. The United States in the Era of the Cold War. 3 hours.
The political, diplomatic, military, and social history of the United States during the era of the Cold War (1946-1992).

HIST 4100/6100. History of Georgia. 3 hours.
Using historical scholarship, biography, and film, the Georgia past from pre-history to the present. Themes of race, class, and modernization in the development of Georgia; special emphasis on the lives of everyday Georgians at various points in history.

HIST 4110/6110. Multicultural Georgia. 3 hours.
The history of the state, with an emphasis on its racial, ethnic, religious, gender, and regional diversity, to be examined through historical documents, novels, short stories, folklore, memoirs, music, and film.

(HIST)ESOC 4150/6150. Teaching United States History. 3 hours.
Classic historiography and current debates among historians over major themes and events in United States history. Examination of ways in which this historical scholarship can be incorporated into social studies teaching. Evaluation of materials and methods used to teach United States history in secondary and middle schools.

HIST 4200/6200. Studies in Latin American History. 3 hours. Repeatable for maximum 9 hours credit.
Special issues or topics in Latin American history not covered in a regular history course. Topics, methodology, and instructor vary from semester to semester. Representative topics include the Latin American revolutionary tradition, the wars of independence in the Americas, and Latin American wars.

HIST 4210/6210. Latin America: A Socioeconomic History Since 1930. 3 hours.
Latin American social and economic development from the onset of the Depression until the present. The role of the state in economic development; the impact of modernization on traditional social systems; persistence of social inequity amidst development; and the liberal and revolutionary responses to social needs.

HIST 4220/6220. The United States and Latin America. 3 hours.
The political, economic, and cultural relations between the United States and Latin America from 1776 to the present. Spanish-American revolutions, the Monroe doctrine, United States expansionism, the Pan American system, United States intervention, the Good Neighbor policy, Latin America in the Cold War, and United States and Latin American revolutions.

HIST 4300/6300. Studies in European History. 3 hours.
Topical studies that vary by year and instructor. Topics might include "Art and Society in the Age of the

Reformation," "War and Gender in Twentieth-Century Europe," "Society and Culture in the Medieval European City," and "Imperialism and Anti-imperialism in Modern Europe."

HIST(CLAS) 4311/6311. Greek History. 3 hours.
Greek history to the time of Alexander the Great.

HIST(CLAS) 4312/6312. The Hellenistic World. 3 hours.
Problems in Hellenistic history from 330 B.C. to the Roman conquest with emphasis on the Antigonid, Seleucid, and Ptolemaic dynasties.

HIST(CLAS) 4321/6321. The Roman Republic. 3 hours.
Roman history to the end of the republic.

HIST(CLAS) 4322/6322. The Roman Empire. 3 hours.
History of the Roman Empire from 27 B.C. to A.D. 337 with special emphasis on the government of Augustus, reasons for its decline, and the final attempt at unification of the empire under Constantine.

HIST 4330/6330. Institutions of the Medieval West. 3 hours.
A variety of specific topics in medieval history, such as law and justice, Anglo-Saxon England, politics of the family, and attitudes toward gender and sexuality.

HIST 4340/6340. Rebirth and Reinvention in Early Modern Europe. 3 hours.
European society in the context of pivotal social, political, and intellectual moments, from the growth of the Humanist movement to the military revolution. The goal is a better understanding of "turning points" in history, and their creation and definition.

HIST 4350/6350. Material Culture and Consumer Society in Early Modern Europe. 3 hours.
Examines the origins of modern consumerism by looking at production and consumption in pre-industrial Europe. Treats the circulation, possession, and meaning of goods such as clothes, food, books, and objects of art. Themes include consumption as a sign of social status, popular and learned attitudes toward markets, and luxury.

HIST 4360/6360. European Popular Culture. 3 hours.
The symbols, expressions, and entertainments that all Europeans drew upon from the wealthiest and best educated to the poorest and illiterate. Themes may include material culture, gender identities, folktales, reading practices, religion and worship, music and theatre. Taught as a seminar with extensive readings in primary and secondary sources.

HIST 4371/6371. The Medieval Mind. 3 hours.
The intellectual history of medieval Europe. The nature of Christian behavior will be examined in the development of premodern ideas on the human body, politics, law, and religion.

HIST 4372/6372. Intellectual History in Early Modern Europe. 3 hours.
The intellectual heritage of early modern Europe. Students will study the works of humanists, theologians, and philosophers, as well as evaluate the social context in which those works were produced.

HIST 4373/6373. Nineteenth-Century European Intellectual History. 3 hours.
European thought from 1815-1914, with emphasis on the relationship between ideas and their political and social context.

HIST 4374/6374. Intellectual History of Twentieth-Century Europe. 3 hours.
Major trends and innovations in European intellectual life, from the fin-de-si'ecle revolt against positivism to post-structuralism and its critics. Coverage will include such thinkers as Freud, Weber, and Foucault, as well as such wider cultural movements as futurism, surrealism, and existentialism.

HIST 4375. The Golden Age of European Natural History. 3 hours.
Prerequisite: BIOL 1104-1104L or BIOL 1108-1108L or BTNY 1220-1220L.
The discoveries, controversies, and speculation in eighteenth and nineteenth-century zoology, botany, and paleontology that profoundly shaped western thought about humans and nature.

HIST 4381/6381. Politics, Culture, and Society in Stuart England. 3 hours.
Religious, political, and cultural upheavals under the Stuart monarchs, 1603-1704.

HIST 4382/6382. Britain from the Age of Revolution to the Age of Victoria 1780-1900. 3 hours.
Britain in the age of the American War of Independence, the French Revolution, and the Industrial Revolution. Special attention will be paid to political culture, intellectual change, and economic development.

HIST 4383/6383. Britain 1901 to the Present. 3 hours.
Political culture, intellectual change, and economic/imperial readjustment in twentieth-century Britain and beyond.

HIST 4391/6391. The French Revolution and the First Empire. 3 hours.
The causes and course of Europe's first modern revolution and its reconfiguration by Napoleon Bonaparte. Students will read primary sources and a rich contemporary historiography which illuminate official and popular efforts to reshape government, society, and culture. Taught as a seminar with extensive readings.

HIST 4392/6392. Twentieth-Century France. 3 hours.
The history of France in the twentieth century, with an emphasis on politics and social change.

HIST 4400/6400. The Age of World Wars I and II. 3 hours.
The origins, course, nature, and consequences of World Wars I and II in Europe, 1870-1950.

HIST 4410/6410. Nazism and Fascism in Europe, 1919-1945. 3 hours.
The two totalitarian movements, Italian Fascism and German National Socialism (Nazism), emphasizing the intellectual origins of antidemocratic impulses before and after 1919, the unique social and political factors present in each nation, the personalities of Hitler and Mussolini, and the growth of the totalitarian one-party state.

HIST 4420/6420. Holocausts in History. 3 hours.
The Jewish Holocaust 1933-1945, emphasizing historical precedents and consequences. Traditional religious anti-Semitism, biologically-based racism, and extreme nationalism will be investigated as sources of modern genocidal behavior.

(HIST)ANTH 4470. The Rise and Fall of the Southeastern Chiefdoms. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Development of the native societies of the southeastern United States, the exploration of the area by Spain in the sixteenth century, and the consequences of the meeting of the two peoples.

(HIST)ANTH 4480. The Indians of the Old South. 3 hours.
Prerequisite: ANTH 1102 or permission of department.
Social history of the native peoples of the southern United States from the beginnings of the Spanish missions and the English deerskin and slave trade through Indian removal.

HIST 4500/6500. Studies in African or Middle Eastern History. 3 hours.
Topics in modern and ancient Middle Eastern or African history. Non-traditional methodologies and sources are combined to introduce students to emerging issues in African or Middle Eastern history.

HIST 4510/6510. History of Famine and Food Systems in Africa. 3 hours.
African agricultural achievement, theories of production and famine systems, and attempts by colonial and international capital to control African food systems. Literature is a major source.

HIST 4530/6530. The History of Orientalism. 3 hours.
Images and symbolism used by Europeans and Americans to define the Islamic Middle East. The history of the Middle East through representation—stereotypes, myths, fairy tales, novels, films, and news coverage—particularly the ramifications of these images on Western foreign policy towards the Islamic Middle East.

HIST 4540/6540. Conflict in Twentieth-Century Southern Africa. 3 hours.
South Africa's economic, political and military might has shaped other southern African societies (Namibia, Lesotho, Botswana, Swaziland, Zimbabwe, and Mozambique) in the twentieth century. Reform and revolution which Africans and Europeans employed to regain and maintain African independence in the region.

HIST 4550/6550. Christianity and Colonialism in Africa. 3 hours.
Christianity was both ally and adversary to colonialism, threatening African "tradition" and aiding a vocal westernized elite which shaped independent African nations. African initiatives in Christian conversion, colonial Christianity, Africans in mission communities, mission education and westernized elites, independent African religious movements, and Christianity and African nationalism.

HIST 4600/6600. Studies in Asian History. 3 hours. Repeatable for maximum 9 hours credit.
A special issue or topic not otherwise offered in the history curriculum. Topics, methodology, and instructors will vary from semester to semester. Representative topics include "Japan and the Samurai," "Women, Gender and Family in Traditional Japan," and "Court and Countryside in Japan's Golden Age."

HIST 4700/6700. Themes in Comparative History. 3 hours.
A special subject not otherwise offered in the history curriculum. Topics, methodology, and instructors vary from semester to semester.

HIST 4750/6750. History and Film. 3 hours.
We are living in a post-literate age. Most people now get their history from films instead of books. How film, using a different vocabulary than that of books, recreates the past.

HIST(PHIL) 4860/6860. History, History of Philosophy, Philosophy. 3 hours.
Historians and philosophers differ in the source of evidence and arguments they use and in the standards to which they appeal. Nonetheless, works in each of these fields raise questions relevant to the other field. The purpose of this course is to explore the main relationships between these two fields.

(HIST)EDHI 4900/6900. History of American College and University. 3 hours.
Prerequisite: HIST 2111 and HIST 2112
History of American colleges and universities from 1619 to the present. Major topics include student life, European antecedents, the nature of the university, the impact of religion, the rise of athletics, the culture of collegiate life, and the influence of society.

HIST 4960H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HIST 4960/6960. Directed Readings in History. 3 hours. Repeatable for maximum 6 hours credit.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HIST 4970H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HIST 4980H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

HIST 4990. Senior Seminar in History. 3 hours.
The methods of historical research and writing as well as a brief study of the philosophy of history and historiography. The student must write a satisfactory formal paper.

HIST 4990H. Honors Thesis. 3 hours.
Not open to students with credit in HIST 4990.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Thesis course.

(HONS) Honors

Honors Program

HONS(FRES) 1990H. Honors Colloquia Seminar. 1 hour. Repeatable for maximum 4 hours credit. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of Honors.
Attendance at University-sponsored lectures, symposia, colloquia, distinguished speaker series, and follow-up seminar meetings. Students will present written reports on lectures and discuss in seminars.

HONS(CMLT) 2010H. Honors Humanities. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of Honors.
Concepts integrating literature and the fine arts through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion sections will include writing and critiquing papers, and student presentations. May be offered daily during May session, or as part of a Study Abroad program.

HONS(CMLT) 2020H. Honors Humanities. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of Honors.
Concepts integrating literature and the fine arts through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and students presentations.

HONS(ANTH) 2040H. Honors Social Sciences. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGL 1101 and permission of Honors.
Concepts integrating history, government, and the social and behavioral sciences through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and student presentations.

HONS(ANTH) 2050H. Honors Social Science. 6 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: ENGL 1101 and permission of Honors.
Concepts integrating history, government, and the social and behavioral sciences through lectures, seminars, individual research or projects, and writing.
Non-Traditional Format: Discussion periods include writing and critiquing papers, and student presentations. May be offered daily during May session, or as part of a Study Abroad program.

HONS(BIOL)(CHEM)(GEOL)(PHYS) 2070H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in PHYS 1010 or CHEM 1110.
Prerequisite: (ENGL 1101 or MATH 1101) and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Occasional weekend field trips required.

HONS(BIOL)(CHEM)(GEOL)(PHYS) 2080H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or GEOL 1121.
Prerequisite: HON 2070H and permission of Honors.

Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Weekend field trips required.

HONS(CMLT) 3010H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the Arts and Humanities to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held during May session as daily seminars.

HONS(PSYC) 3040H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the Social and Behavioral Sciences to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held as daily seminars during May session.

HONS(GEOL) 3070H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the natural sciences to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held as daily seminars during the May session.

HONS(CMLT) 4010H. Special Problems Seminar in Humanities. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the Humanities which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

HONS(CMLT) 4020H. Special Problems Seminar in Humanities. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the Humanities which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

HONS(ANTH) 4040H. Special Problems Seminar in Social and Behavioral Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the social and behavioral sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during the May session, or as part of a Study Abroad program.

HONS(ANTH) 4050H. Special Problems Seminar in Social and Behavioral Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the social and behavioral sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

HONS(GEOL) 4070H. Special Problems Seminar in the Natural Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the natural sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format: Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

HONS(GEOL) 4080H. Special Problems Seminar in Natural Sciences. 3 hours. 2 lab periods of 1.5 hours each per week.
Prerequisite: Permission of Honors.
Selected problems in the natural sciences which have special or current relevance to members of the University community. Topics will vary to meet interest and demand.
Non-Traditional Format. Discussions include student presentations of material researched for the course. May be held daily during May session, or as part of a Study Abroad program.

(HORT) Horticulture

College of Agricultural and Environmental Sciences, Department of Horticulture

HORT 2000. Horticultural Science. 3 hours.
Horticultural science, the biology of horticulture, the technology of crop production and marketing, production systems, aesthetics, and crop types.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HORT 3010. Introduction to Vegetable Crops. 3 hours.
Prerequisite: BIOL 1103-1103L or BTNY 1210-1210L.
Botany, general culture, and use of major vegetable crops.

HORT 3020. Introduction to Fruit Crops. 2 hours.
Prerequisite: (BIOL 1103-1103L and BIOL 1104-1104L) or (BIOL 1107-1107L and BIOL 1108-1108L) or (BTNY 1210-1210L and BTNY 1220-1220L).
Botanical description, geographic distribution, general culture, and culinary uses of the world's major fruit crops.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HORT 3140. Interior Plantscapes. 2 hours.
Growth, installation, care, and use of indoor plants.

HORT(BTNY)(ANTH) 3440. Herbs, Spices, and Medicinal Plants. 2 hours.
Historical and contemporary significance of herbs, spices, and medicinal plants in human culture and commerce; chemical and biological characteristics; commercial production techniques; application in modern and traditional medical systems.

HORT(LAND) 3450. Plants in the Cultural Environment. 2 hours.
Use and selection of plants for environmental design.

HORT(LAND) 3450L. Plant Selection Laboratory. 2 hours. 2 lab periods of 2 hours each per week.
Corequisite: HORT(LAND) 3450.
Use and selection of plants for environmental designs.

HORT 3500-3500L. Herbaceous Perennials I. 1 hour. 2 hours lecture and 1 lab period of 2 hours each per week.
Identification and environmental needs of herbaceous perennials.
Non-Traditional Format: Class taught for first half of fall semester.

HORT 3510-3510L. Herbaceous Perennials II. 1 hour. 2 hours lecture and 1 lab period of 2 hours each per week.
Identification and environmental needs of herbaceous ornamental perennials.
Non-Traditional Format: Course will be taught during last seven weeks of spring semester.

HORT 3620-3620L. Plant Propagation. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1103-1103L or BTNY 1210-1210L.
Principles and practices for increasing plant numbers with emphasis on the anatomical and physiological basis for various methods.

HORT 3630-3630L. Nursery Management. 5 hours. 4 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1103-1103L or BTNY 1210-1210L.
Locating, operating, and managing retail and wholesale nurseries.

HORT 3700. Systematics of Woody Landscape Plants I. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Identification, ornamental characteristics, culture, propagation, and landscape uses of woody ornamental plants. Emphasis on shade trees and needled evergreens.

HORT 3710. Systematics of Woody Landscape Plants II. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Identification, ornamental characteristics, culture, propagation, and landscape uses of woody ornamental plants. Emphasis on broadleaf evergreens, vines, small flowering trees and shrubs.

HORT 3910. Horticulture Internship. 3 hours.
Practical work experience in the operations and management of horticultural enterprises.
Non-Traditional Format: At least twenty hours of work per week for ten weeks.

HORT 4000. Horticultural Professionalism. 1 hour.
Professional behavior, resume writing, interviewing, and student oral presentations on horticultural topics.

HORT 4010/6010-4010L/6010L. Olericulture. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HORT 3010.
Current cultural practice of and environmental influence on vegetable crop production.

HORT 4020/6020-4020L/6020L. Pomology. 3 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: HORT 3020 or permission of department.
Culture and management of orchard crops, including site selection, cultivar and rootstock selection, pruning and training, propagation, integrated pest management, physiology of flowering and fruiting, harvest and postharvest procedures. Laboratory provides hands-on experience pruning, training, and budding trees, and using/calibrating equipment needed for managing orchards.

HORT 4050/6050. Greenhouse Management. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1103-1103L or BTNY 1210-1210L.
Commercial greenhouse crop production practice with emphasis on plant nutrition, growth regulators, pest control, and postharvest handling.

HORT 4070/6070. Special Problems in Horticulture I. 1-5 hours.
Research on special problem under direction of faculty.
Non-Traditional Format: As arranged under the direction of faculty.

HORT 4080/6080. Special Problems in Horticulture II. 1-5 hours.
Advanced research on problem of special interest under direction of faculty.
Non-Traditional Format: As arranged under the direction of faculty.

HORT 4090. Landscape Management. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Landscape installation, maintenance, estimating, and contracts.

HORT 4110/6110. Plant Nutrition. 3 hours.
Prerequisite: CRSS 3050-3050L.
Mineral nutrition of higher green plants.

HORT 4210/6210. Postharvest Physiology of Horticultural and Agronomic Crops. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1107-1107L or BTNY 1210-1210L or (CHEM 1212 and CHEM 1212L).
Catabolic and anabolic metabolism, and anatomical and pathological responses of harvested fruits, vegetables, nuts, seeds, cut flowers, and intact plants. Transportation, refrigeration, controlled atmospheric storage, drying, and packaging of harvested products.

HORT 4440/6440-4440L/6440L. Environmental Physiology in Horticulture. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in BTNY 4850/6850-4850L/6850L or BTNY 8890-8890L or CRSS 3300.
Prerequisite: (BIOL 1103-1103L and BIOL 1104-1104L) or (BIOL 1107-1107L and BIOL 1108-1108L) or (BTNY 1210-1210L and BTNY 1220-1220L).
Effects of environmental factors on growth and physiology of horticultural plants and modification of the plant's environment to improve crop production.

HORT 4890/6890. Biodiversity and the World's Food Crops. 3 hours.
Molecular, organismal, ecological, and sociocultural aspects of biodiversity. Independent research project required.

(HORT)CRSS(ANTH) 4930/6930. Agriculture and Ecology in Tropical America. 3 hours.
Prerequisite: Permission of department.
Crops and cropping systems in tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture, on the ecosystems of the region.

(HORT)CRSS(ANTH) 4940/6940. Agriculture and Ecology in Tropical America Field Trip. 3 hours.
Repeatable for maximum 9 hours credit. 6 lab periods of 8 hours each per week.
Prerequisite: CRSS(HORT)(ANTH) 4930/6930.
Intensive field study in a tropical Latin American country; crops and cropping systems of tropical America; influences of geography, climate, and socioeconomic factors, as well as the impact of agriculture on the ecosystems of the region. Conducted in a tropical Latin American country.
Non-Traditional Format: Students will tour a tropical country and receive on-site instruction at a series of different farms and ecological preserves over a period of 18 days.

HORT 4990-4990D. Environmental Issues in Horticulture. 1 hour. 0-1 hour lecture and 0-1 discussion period of 1 hour each per week.
Prerequisite: Senior standing.
Environmental issues of concern to the horticulture industry. Discussion topics include water quality, water conservation practices, pesticides and pest management practices, solid waste disposal and usage, the role of agriculture in global climate change.
Non-Traditional Format: One lecture or discussion per week.

(HPRB) Health Promotion and Behavior

College of Education, Department of Health Promotion and Behavior

HPRB 1190. Fundamentals of First Aid and Emergency Response. 2 hours.
Fundamentals of first aid, cardiopulmonary resuscitation (CPR), and general emergency response.

HPRB 1710. Health and Wellness. 3 hours.
Factors affecting the level of wellness of the individual are considered. Topics include mental health, nutrition, diet and weight control, physical fitness, smoking, human sexuality, consumer health, alcohol and other drugs, disease, environmental health, and injury prevention.

HPRB 1850. Contemporary Issues in Health. 2 hours.
Contemporary health problems facing individuals and society. Readings, classroom discussions, and activities challenge students' perspectives on health-related attitudes and practices within political, ethical, and economic contexts.

HPRB 2420. Health Education in Early Childhood Education. 2 hours.
Health education content, methods, and resources for early childhood teachers. Emphasis is on comprehensive school health education programs.

HPRB 3020. Introduction to Health Promotion and Education. 3 hours.
The philosophy and principles underlying the field of health promotion and education. Includes literature, research, organizations, scientific foundations, and employment potential.

HPRB 3150. Issues in Women's Health. 3 hours.
Contemporary issues that affect the health of women, including health status perspectives, preventive measures, health care alternatives, and special health concerns.

HPRB 3190. Advanced First Aid. 3 hours.
Problems and training in the aspects of comprehensive emergency medical care required at the scene of an injury or sudden illness.

HPRB 3210. Issues in Health Consumerism and Self-Care. 3 hours.
Health products and services and the factors that influence personal choices in the health marketplace. Includes a discussion of the philosophy, theory, and practice of self-care and health activism.

HPRB 3400. Basic Curriculum and Teaching Procedures in School Health Education. 4 hours.
Prerequisite: HPRB 1710.
Curriculum development within the preschool through 12th grade comprehensive school health education program; review of scope and sequence, content, resources, and materials; development of lesson plans including concepts and objectives; examination and application of various teaching methods; utilization of media, community resources, and assessment techniques.

HPRB 3450. Practicum in Health Education. 1-2 hours. Repeatable for maximum 2 hours credit.
Individual practical experience in health education within the school setting.
Non-Traditional Format: Observation and practical experience in the health education classroom. Most of the time is spent observing; however, the student may teach all or part of a class. Students also observe classroom and school management strategies. A written report of the experience is required.

HPRB 3460. Practicum in Health Promotion. 1-2 hours. Repeatable for maximum 2 hours credit.
Individual practical experience in health promotion and education in a community or worksite setting.
Non-Traditional Format: Observation and practical experience in a setting in the community such as a health department, hospital wellness center, or a corporate health promotion program. A written report of the experience is required.

HPRB 3700. Community Health. 4 hours.
Community health programs, including organizational structure of federal, state, and local health-related agencies. Also analysis of the interrelationship of political, social, and economic dimensions of community health including epidemiology.

HPRB 3750. Foundations of Injury Prevention. 3 hours.
The significance of injury as a health problem and the nature of injury prevention programs.

HPRB 4000/6000. Special Problems in Health Promotion and Behavior. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study of selected topics.
Non-Traditional Format: Students develop a proposal for a learning experience that is not normally available to them in a regular department course. The amount of work and/or the depth of inquiry depends on the number of credits the student desires. The proposal must be approved by the faculty member who is directing the project and by either the undergraduate or graduate coordinator.

HPRB 4400. Health Promotion Program Development. 4 hours.
Prerequisite: (HPRB 1710 and HPRB 3020) or permission of department.
Health promotion program development in community, worksite, and hospital settings. Emphasis given to program content, strategies, overall planning, and implementation. Topics include leadership, conflict resolution, communication, funding, marketing, and related professional issues pertaining to health promotion.

HPRB 4450/6450. Occupational Safety. 3 hours.
The specific areas and the broad scope in methods, materials, and problems in occupational safety programming with special emphasis on organization and implementation of injury prevention and control techniques.

(HPRB)SPCM 4610/6610. Health Communication. 3 hours.
Communication about health with physicians and other providers, within support groups and health care organizations, and by public figures, groups, and organizations.

HPRB 5060/7060. Educational Strategies in Human Sexuality. 3 hours.
Theory and practice of sexuality education; basic issues, philosophy, and guiding principles; legal implications; needs, justification, and objectives; curriculum critique for school and community programs; content knowledge, resource materials; acceptable methods to approach controversial topics.

HPRB 5160/7160. Special Topics in Health Promotion and Behavior. 1-3 hours. Repeatable for maximum 6 hours credit.
Selected health problems or issues, with emphasis on epidemiology, etiology, and the development and evaluation of prevention measures.
Non-Traditional Format: Format will generally be lecture and discussion.

HPRB 5210/7210. The Effects of Drug Use and Abuse. 3 hours.
Social, moral, psychological, and physiological causes and effects of drug use and abuse. Individual, family, and community factors related to prevention and treatment.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

HPRB 5460. Student Teaching in Health Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: HPRB 3400 and permission of department.
Practical experience in school health education through placement in a public school setting.
Non-Traditional Format: Undergraduate student teaching under the supervision of a certified teacher who has been approved by the department. Students meet with the student teaching coordinator on campus at least twice during the semester. Students develop a final professional portfolio as a result of their teaching experience.

HPRB 5560. Field Experience in Health Promotion. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: HPRB 4400 and permission of department.
Practical experience in health education/promotion through placement in an appropriate community or worksite setting.
Non-Traditional Format: Community health field experience/internship under the supervision of a health professional who has been approved by the department. Student compiles a work "diary" and a portfolio of professional activities, and submits a final written report about the experience.

(INTB) International Business

Terry College of Business, International Business Programs

INTB 4800. Internship and/or Cooperative Education in International Business. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Internship or studies abroad program in the field of international business.
Non-Traditional Format: This course is designated as an internship and does not meet formally.

(INTS) Interdisciplinary Studies

College of Arts and Sciences

INTS 4990. Interdisciplinary Studies. 3 hours.
Prerequisite: Senior standing and permission of department.
Individual research or project in the major area of study. Required of all Interdisciplinary Studies majors.
Non-Traditional Format: Directed study.

(ITAL) Italian

College of Arts and Sciences, Department of Romance Languages

Certain courses in Italian are not open to native speakers. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was Italian.

ITAL 1001. Elementary Italian. 4 hours.
Not open to students with credit in ITAL 1002.
The Italian language and Italian speaking cultures. Emphasis is on conversational skills with attention to reading, writing, and listening comprehension. Fundamentals of Italian pronunciation and grammar. Work in the language laboratory.

ITAL 1002. Elementary Italian. 4 hours.
Not open to students with credit in ITAL 2001.
Prerequisite: ITAL 1001.
A continuation of Elementary Italian. Open only to students who took Elementary Italian or who have an appropriate placement score. Emphasis is on conversational skills with attention to reading, writing, and listening comprehension. Fundamentals of Italian pronunciation and grammar; study of Italian culture. Work in the language laboratory.

ITAL 2001. Intermediate Italian. 3 hours.
Not open to students with credit in ITAL 2002.
Prerequisite: ITAL 1002.
Practice in speaking, listening, reading, and writing Italian at the intermediate level. Study of Italian language and culture.

ITAL 2002. Intermediate Italian. 3 hours.
Not open to students with credit in ITAL 3010.
Prerequisite: ITAL 2001.
A continuation of Intermediate Italian. Emphasis on strengthening the students' speaking, listening, reading, and writing skills at the intermediate level. Conversation, compositions, reading of texts, and grammar review.

ITAL 2500. Italian Culture. 3 hours.
Italian culture through literature, sociopolitical history, and the arts. Italian history in a specific period as seen through a study of these three areas. Development of

an integrated approach to culture, literature, and language. Given in English. Course may be taken through UGA Studies Abroad program in Cortona.

ITAL 2600. Intensive Italian. 3 hours.
Prerequisite: Permission of department.
Conversational skills, reading, writing, and listening comprehension. Not open to native speakers. Not to be used to satisfy the undergraduate language requirement.

ITAL 2950. Study Abroad in Italian. 3 hours.
Prerequisite: Permission of department.
Italian language, literature, and culture course taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

ITAL 2960. Study Abroad in Italian. 3 hours.
Prerequisite: Permission of department.
Italian language, literature, and culture course taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

ITAL 2970. Study Abroad in Italian. 3 hours.
Prerequisite: Permission of department.
Italian language, literature, and culture course taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

ITAL 3010. Italian Conversation and Composition. 3 hours.
Not open to students with credit in ITAL 4010.
Prerequisite: ITAL 2002.
The emphasis is divided between oral and written expression. Composition and conversation are integrated into the context of Italian culture. Given in Italian. Not open to native speakers.

ITAL 4010. Advanced Conversation and Composition. 3 hours.
Prerequisite: ITAL 3010.
The emphasis is divided between conversation and composition in order to promote students' abilities to express themselves accurately in both oral and written Italian. Activities are integrated into the context of Italian culture. Given in Italian. Not open to native speakers.

ITAL 4040/6040. Topics in Italian Cinema, Culture, and Literature. 3 hours.
Specific aspects of Italian cinema, culture, and literature. Topics to be selected according to the needs and interests of the students. Taught in seminar fashion with extensive outside readings of primary and secondary sources. Given in English.

ITAL 4050. Italian Literature and Culture from its Origins to 1400. 3 hours.
Prerequisite: ITAL 3010.
Selected poetry and prose from the Italian Middle Ages. Works include Dante's *Vita Nuova*, religious works by Umbrian writers, love poetry of the Scuola Siciliana and the Dolce Stil Novo, and narrative prose by Boccaccio, Marco Polo, et al. Given in Italian.

ITAL 4060. Italian Literature and Culture from 1400 to 1700. 3 hours.
Prerequisite: ITAL 3010.
Italian Renaissance and Baroque texts, selected from lyric poetry, the epic, the pastoral, the theater, treatises, scientific prose, family writings and letters. Works by Ariosto, Poliziano, Boiardo, Tasso, Lorenzo, Alberti, Machiavelli, Castiglione, Sannazaro, Marino, Michelangelo, Leonardo da Vinci, Galileo, Stampa, Firenzuola, et al. Given in Italian.

ITAL 4070. Italian Literature and Culture from 1700 to the Present. 3 hours.
Prerequisite: ITAL 3010.
Intensive reading and analysis of the major works of representative Italian writers and study of main literary movements in Italian literature from the eighteenth to the twentieth century. Given in Italian.

ITAL 4120/6120. Topics in Italian Culture, Language, and Literature. 3 hours. Repeatable for maximum 45 hours credit.
Prerequisite: ITAL 4010 or ITAL 4050 or ITAL 4060 or ITAL 4070.
Selected topics in Italian culture, civilization, language, literature, or literary theory. Given in Italian.

ITAL 4950. Directed Reading and/or Projects. 3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department and junior or senior standing.
Individual study, reading, or projects under the guidance of a faculty member.
Non-Traditional Format: Directed study.

ITAL 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

ITAL 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

ITAL 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

ITAL 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors and senior standing.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Directed study.

(JOUR) Journalism

College of Journalism and Mass Communication, Department of Journalism

JOUR 3310. Introduction to Print Media. 3 hours.
Structure, operation, responsibilities, and influence of printed mass media from historical and descriptive perspectives. Attention is given to newspapers, magazines, books, news services, photojournalism, and new media technology and their relations to other mass media, government, and society.

JOUR 3410. News Writing and Reporting. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of department.
Techniques of basic news reporting and writing and an introduction to advanced practices, with practical assignments in the media.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

JOUR 3410H. Introduction to Writing for Print Media (Honors). 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Techniques and problems in news gathering and writing for the print media, with special emphasis on legal, ethical, and societal responsibilities.

JOUR 3510. Editing and Makeup. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 3410 and permission of department.
Selection and preparation of written and pictorial material for newspapers and related media.

JOUR 3610. Introduction to Photojournalism. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: Permission of department.
Mass media photography, including camera use and digital image production.

JOUR 3710. Advanced Photojournalism. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: JOUR 3610 and permission of department.
Techniques, methods, and procedures in photojournalism that are used by newspapers, magazines, and other print media. Media photo assignments, picture editing, digital imaging, and publication techniques are used to create portfolios.

JOUR 5010. Media Internship. 3 hours.
Prerequisite: (JOUR 5300 or JOUR 5580/7580) and permission of department.
Supervised experience in print or electronic publishing.
Non-Traditional Format: Supervised experience forty hours a week.

JOUR 5170. Advanced Studies in Journalism. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: JOUR 3310 and permission of department.
Independent study or special projects in journalism for majors in journalism. Written proposal outlining the work to be undertaken must be submitted and receive the instructor's approval before the student will be permitted to register for the course. Students will be responsible for ensuring the funding of their projects.
Non-Traditional Format: This course is an independent study and has no lecture/lab hours.

JOUR 5300. Public Affairs Reporting. 3 hours.
Prerequisite: JOUR 3310 and JOUR 3510 and permission of department.
Advanced techniques in news reporting and writing, with special emphasis on practical assignments outside of class covering local government and specialized issues in such areas as business, science, the environment, and health.

JOUR 5350/7350. Advanced Newspaper Editing and Design. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 3510 and permission of department.
Techniques of advanced newspaper editing and design, with emphasis on the visual aspects of newspaper editing.

JOUR 5360/7360. Advanced Magazine Editing and Design. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 3510 and permission of department.
Planning, processing, and production of a magazine.

JOUR 5370. Documentary Photojournalism. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: JOUR 3710 and permission of department.
Documentary photojournalism and multi-picture reporting on in-depth subjects. Picture editing and management of visual departments are discussed and students are provided with practical experience in all of these areas.

JOUR 5410/7410. Journalism Ethics. 3 hours.
Prerequisite: JOUR 3310 and JOUR 3510.
Issues of journalistic ethics and social responsibility confronting contemporary American print media and students planning journalism careers.

JOUR 5530/7530. Editorial Writing and Issues. 3 hours.
Prerequisite: JOUR 3410 and permission of department.
Creation, production, and analysis of editorials and

editorial pages. Methods of identifying and researching issues and organizing, writing, and editing editorials will be stressed along with methods of analyzing editorials and editorial pages.

JOUR 5580/7580. Magazine Article Writing. 3 hours.
Prerequisite: JOUR 3310 and JOUR 3510 and permission of department.
Methods and procedures in writing various types of articles and features for magazines, magazine sections of newspapers, and other periodicals.

JOUR 5590/7590. Critical Writing and Reviewing. 3 hours.
Prerequisite: JOUR 3510 and permission of department.
Criticizing and reviewing popular culture and fine arts offerings, such as films, television, pop music and theatre, dance and classical music—for newspapers, magazines, and broadcast media.

JOUR 5600/7600. Investigative Reporting. 3 hours.
Prerequisite: JOUR 5300 and permission of department.
Techniques, methods, and practices of investigative, interpretive, and in-depth reporting for print media. Projects in public affairs reporting are developed.

JOUR 5620/7620. Magazine Management. 3 hours.
Prerequisite: JOUR 3310.
Finance and planning skills required to manage the business side of a magazine. Attention will be given to the various systems used in the magazine industry to produce a finished product.

JOUR 5640/7640. Newspaper Management. 3 hours.
Prerequisite: JOUR 3310.
Business and editorial management of newspapers, including newsroom, circulation, advertising, and promotion strategies.

JOUR 5660/7660. Journalism in the Secondary School. 3 hours.
News gathering, news writing, media law and ethics, copy editing, typography, photography, design, desktop publishing, broadcast news, and business practices of newspapers, with specific emphasis on advising staffs of high school newspapers and other media and editing public relations publications for schools.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

JOUR 5670/7670. Contemporary American Newspapers. 3 hours.
Prerequisite: JOUR 3310.
The newspaper and its role in America today. Concentration is on content, policy, influence, social responsibility and ethics, economics, marketing strategies, and technology. Leading newspapers in various regions are examined closely.

JOUR 5700/7700. Advanced Magazine Article Writing. 3 hours.
Prerequisite: JOUR 5580/7580 and permission of department.
An advanced professional course utilizing research and writing techniques to produce articles and features for specific magazine audiences.

JOUR 5800/7800. Computer Assisted Reporting. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: JOUR 5300 and permission of department.
Use of computers in journalism to gather, analyze, and present information. Subjects include spreadsheets, databases, and electronic searches in public and commercial sources.

JOUR 5990. Seminar in Journalism. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: JOUR 3510 and permission of department.
Variable topics seminar to analyze processes and effects of journalism and to acquire specialized knowledge of specific journalism modes of presentation and production.
Non-Traditional Format: Varies with the topic and approach.

(JPNS) Japanese

College of Arts and Sciences, Department of Comparative Literature

JPNS 1001. Elementary Japanese I. 4 hours.
Emphasis on listening, speaking, reading, and writing. Students will learn grammar, Hiragana and Katakana characters, and about 80 Kanji characters. All lessons include Japanese culture notes. Course also includes conversation sessions and character recognition and pronunciation exercise sessions on computers.

JPNS 1002. Elementary Japanese II. 4 hours.
Prerequisite: JPNS 1001.
Equal emphasis on listening, speaking, reading, and writing. Students will learn grammar and 120 Kanji characters. Lessons include Japanese culture notes as well. The course also includes conversation sessions and character recognition and pronunciation exercise sessions on computers.

JPNS 1100. Intensive Japanese. 3 hours.
Prerequisite: JPNS 1002.
Japanese language course with focus on reading, writing, speaking, and understanding Japanese for students beyond the beginning level.

JPNS 2001. Intermediate Japanese I. 3 hours.
Prerequisite: JPNS 1002.
Equal emphasis on listening, speaking, reading, and writing. Students will learn grammar and about 140 Kanji characters. All lessons include Japanese culture notes as well. The course also includes character recognition and pronunciation exercise sessions on computers.

JPNS 2002. Intermediate Japanese II. 3 hours.
Prerequisite: JPNS 2001.
Equal emphasis on listening, speaking, reading, and writing. Students will learn grammar and about 160 Kanji characters. All lessons include Japanese culture notes as well. The course also includes character recognition and pronunciation exercise sessions on computers.

JPNS 3010. Advanced Japanese I. 3 hours.
Prerequisite: JPNS 2002 or permission of department.
Equal emphasis on listening, speaking, reading, and writing. Students will learn grammar and about 220 Kanji characters. All lessons include Japanese culture notes as well. The course also includes character recognition and pronunciation exercise sessions on computers.

JPNS 3020. Advanced Japanese II. 3 hours.
Prerequisite: JPNS 3010 or permission of department.
Equal emphasis on listening, speaking, reading, and writing. Students will learn grammar and about 270 Kanji characters. All lessons include Japanese culture notes as well.

JPNS 3990. Directed Study in Japanese Language and Literature. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent study and research under the direction of individual faculty members.
Non-Traditional Format: Directed study.

JPNS 4110. Advanced Japanese III. 3 hours.
Prerequisite: JPNS 3020 or permission of department.
A continuation of Advanced Japanese II, with emphasis on improved proficiency in the four language skills of reading, writing, speaking, and listening, and concentration on the reading of literary texts in Japanese.

JPNS 4120. Advanced Japanese IV. 3 hours.
Prerequisite: JPNS 4110 or permission of department.
A continuation of Advanced Japanese III, including the introduction of basic concepts of translating and interpreting from English into Japanese and from Japanese into English and the reading of literary texts in Japanese.

JPNS 4500/6500. Readings in Japanese Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: JPNS 3020.
Selected readings of Japanese literature in the original language. Texts will vary, with focus on readings of works of literature and discussion of issues in literary criticism in Japanese.

(JRLC) Journalism Core

College of Journalism and Mass Communication, Department of Journalism

JRLC 5040/7040. Law of Mass Communication. 3 hours.
Prerequisite: (ADPR 3100 or ADPR 3850 or JOUR 3410 or TELE 3010) and permission of school.
First Amendment principles and communication law affecting print, telecommunications, advertising, and public relations.

JRLC 5080. International Mass Communication. 3 hours.
Mass media of the world—what they are like, how they operate, and what impact they have. Philosophies of different systems will be compared, as well as efforts at development or regulation of these systems. Attention will be given to print and electronic media and to international news agencies.

JRLC 5210. Social Effects of Mass Communication. 3 hours.
Patterns of influence among mass communication and the individuals, organizations, and institutions in society. Current research and critical literature are analyzed in reviewing debates about claims of media effects, including socialization of children, formation of attitudes and values, promotion of social behaviors, and legitimation of power structures.

JRLC 5400. Race, Gender, and the Media. 3 hours.
Prerequisite: Junior standing.
Relationship between men, women, and racial and ethnic minorities in the United States and the media. Includes discussions of representations in mass media (television, print media, advertising, and film); impact of representations on audiences; inequities in media professions and institutions; and alternative, feminist, and minority media.

JRLC 5490/7490. History of the Mass Media in the United States. 3 hours.
Mass media in the United States from the colonial period to the present. Special attention is given to newspapers, magazines, radio, and television and their relationship to the history and development of the nation.

(KREN) Korean

College of Arts and Sciences, Department of Comparative Literature

KREN 1001. Elementary Korean I. 4 hours.
Pronunciation, grammar, particles, basic sentence construction and sentence patterns. Reading and writing in Hangul, the national writing system.

KREN 1002. Elementary Korean II. 4 hours.
Prerequisite: KREN 1001.
A continuation of Elementary Korean I.

KREN 2001. Intermediate Korean I. 3 hours.
Prerequisite: KREN 1002.
Pronunciation, grammar, particles, sentence construction, and sentence patterns. Declarative, interrogative, propositive, and imperative speech styles. Reading and writing in Hangul, the national writing system.

KREN 2002. Intermediate Korean II. 3 hours.
Prerequisite: KREN 2001.
A continuation of Intermediate Korean I.

KREN 3001. Advanced Korean I. 3 hours.
Prerequisite: KREN 2002.
This course focuses on building an advanced-level vocabulary and grammar knowledge in Korean for a variety of verbal and written communications.

KREN 3002. Advanced Korean II. 3 hours.
Prerequisite: KREN 3001.
As a continuation of Advanced Korean I, this course focuses on building an advanced-level vocabulary and grammar knowledge in Korean for a variety of verbal and written communications.

(LAND) Landscape Architecture

School of Environmental Design

LAND 1600. Reading the Landscape. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Approaches to perceiving and interpreting the landscape. Topics include the landscape in art and literature, visual assessment techniques, use of maps, field sketching, and photography.

LAND 2010. Landscape Architecture Design Studio I. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: EDES 1500 and LAND 1600.
Corequisite: EDES 2210.
The elements, principles, and processes of visual design as a foundation for environmental design. Emphasis is on the development of creativity and skills through the application of theory and techniques in a series of two and three dimensional design projects.

LAND 2020. Landscape Architecture Design Studio II. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 2010.
Corequisite: EDES 2220.
A continuation of Landscape Architecture Design Studio I. The integration of the range of design determinants in landscape architecture. Further exploration of the design process.

LAND 2310. Landscape Ecology Processes and Materials. 3 hours.
The range of natural processes and materials relevant to landscape architecture (e.g., climate, geomorphology, geology, hydrology, soils, and vegetation communities.) The relationship between these materials and natural processes. Exercises will include some conceptual manipulation of these materials.

LAND 2320. Landscape Construction Processes and Materials. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: EDES 2210.
The range of materials used in the built environment by landscape architects: metals, concrete masonry, glass, plastics, wood. Emphasis on understanding the properties of these materials and the implications for design.

LAND 3030. Landscape Architecture Design Studio III. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 2020.
Corequisite: LAND 3530 and EDES 3230.
Planning and resource analysis. Projects will focus on examining the application principles of sustainable design principles at a variety of scales.

LAND 3040. Landscape Architecture Design Studio IV. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 3030.
Corequisite: LAND 3540.
The design of housing and mixed-use projects which focus on the issues of community and privacy at a variety of scales from single family dwellings to new towns.

LAND 3330. Landscape Engineering Processes and Materials. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 2020 and EDES 2210.
The forming and building of landscapes with emphasis on the values of "sustainability." Includes introduction to landscape engineering: grading, drainage, and roadway alignment.

LAND 3340. Applied Landscape Engineering. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 3330.
Applied grading, drainage, and road alignment.

LAND 3410. Plants of the South. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Plant materials of the southern United States with an

emphasis upon the ornamental attributes, cultural requirements and tolerances, historical origins, and ecological characteristics of plants used in landscape architecture. The course will cover both native and introduced species.

LAND 3420. Plants of Georgia. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
A continuation of Plants of the South. Native and introduced species; including trees, shrubs, grasses, herbaceous annual and perennial plants, and commonly used indoor plants.

(LAND)HORT 3450. Plants in the Cultural Environment. 2 hours.
Use and selection of plants for environmental design.

(LAND)HORT 3450L. Plant Selection Laboratory. 2 hours. 2 lab periods of 2 hours each per week.
Corequisite: HORT(LAND) 3450.
Use and selection of plants for environmental designs.

LAND 3530. Planning and Design. 2 hours.
Prerequisite: EDES 2520.
Corequisite: LAND 3030.
Approaches to planning and design in landscape architecture. The relationship between applied theories and methods and the environmental, social, and cultural context of projects.

LAND 3540. Dwelling and Community. 2 hours.
Prerequisite: LAND 3530.
Corequisite: LAND 3040.
Concepts and theories of residential and neighborhood form.

LAND 4050. Landscape Architecture Design Studio V. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 3040.
Corequisite: LAND 4550.
Projects of regional significance, with special emphasis on the role of ecology and the sense of the region. May include recreational facilities and regional park systems. Projects will be developed through a variety of scales to a design development level.

LAND 4060. Landscape Architecture Design Studio VI. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4050.
Corequisite: LAND 4560.
Urban design and architecture. Projects will be developed through a variety of scales to a design development level. The relationship between landscape architecture, architecture, and urban design.

LAND 4070/6070. Garden Design in America. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6020.
Design traditions which have shaped American gardens over the past 200 years with emphasis on the twentieth century, and plants, uses, design forms, and environmental conditions through which these traditions have been expressed. Designing gardens informed by traditional models.

LAND 4080/6080. Gardens as Nurturing Environments. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6020.
Physical, psychological, perceptual, and cultural influences of garden design, with an emphasis on gardens for healing, play, discovery/learning, and other sensory/therapeutic stimuli.

LAND 4150/6150. Land Development Studio. 4 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4060 or LAND 6340.
Land development process. Landscape architecture and real estate students prepare a report that includes absorption, targeted market, estimates, financial feasibility, site planning, design, and building types to be reviewed by a visiting jury of developers, designers, planners, and brokers.

LAND 4250. Portfolio Development. 2 hours. 2 lab periods of 2 hours each per week.
Prerequisite: EDES 4240.
Portfolio/resume preparation and interviewing techniques. Landscape architecture registration exam preview and preparation of design competition packages.

LAND 4360. Applied Landscape Ecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 2310.
The concept and functioning of ecosystems and how this understanding can be applied in environmental design. Review of adverse impacts that can result from failure to apply sound ecological principles. Exercises will include some conceptual manipulation of ecological processes and materials.

LAND 4370. Applied Landscape Construction. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 2320.
Detailing of architectural and planting elements in the landscape with an emphasis on appropriate detailing for sustainability and longevity in urban contexts.

LAND 4380. Landscape Architecture Implementation Documents. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 3340 and LAND 4060 and LAND 4370.
Construction, engineering, and planting documents for implementing landscape architecture projects.

LAND 4390. Landscape Architecture Post-Construction Documents and Processes. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: LAND 4060.
Post-construction processes and documents relevant to the implementation and management of designed and natural landscapes. Includes development of landscape management plans, and post-construction evaluation.

LAND 4400/6400. Plant Communities of the Southeast. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: LAND 4360 or LAND 6320.
The plant communities of the southeastern United States, with emphasis on botanical and aesthetic characteristics, factors affecting community composition, and community dynamics.

LAND 4550. Region, Site and Place. 2 hours.
Prerequisite: LAND 3540.
Corequisite: LAND 4050.
Physical and cultural determinants of landscape character from regional to site-specific scales.

LAND 4560. Urban Design and Architecture: Ideas and Theories. 2 hours.
Prerequisite: LAND 4550.
Corequisite: LAND 4060.
Urban design and architecture including analysis of various theories used as a framework for the development of architectural and urban form.

LAND 4570. Contemporary Landscape Architecture Theory. 2 hours.
Prerequisite: LAND 4560.
Contemporary issues and theories in landscape architecture. Emphasis is on the relationship between theoretical approaches and built form.

LAND 4580/6580. Landscapes in Painting, Poetry, Literature, and Design. 2 hours.
Prerequisite: EDES 1500 or EDES 6520.
The appreciation and understanding of nature, landscape, and garden in painting, poetry, and literature. Study of how changing attitudes to the environment affect aesthetic appreciation of landscape and are reflected in the design of gardens and the description of landscapes in art and literature.

LAND 4700. Landscape Architecture Internship. 8 hours.
Prerequisite: Permission of school.
Professional office experience under the supervision of licensed landscape architect or related practitioner.
Non-Traditional Format: Internship conducted off-site in professional offices. A minimum of two-months full-time supervised employment for eight credits.

LAND 4710/6710. Professional Practice. 2 hours.
Prerequisite: Junior standing.
The legal environment of business focusing on public and private law. Professional relations during project management, resolution of disputes, the court system, torts, real property/liens, contract law, specification writing, insurance bonds, business organizations, ethics, and professional registration.

LAND 4720. Senior Project Proposal. 1 hour.
Prerequisite: LAND 4060.
The preparation of a proposal for a senior project.

LAND 4800/6800. Field Study in Contemporary Landscape Architecture. 3 hours. 1 lab period of 3 hours each per week.
Prerequisite: (LAND 2020 and EDES 2520) or permission of school.
Current and historic works and individuals in the fields of landscape architecture, architecture, historic preservation, and urban design in the United States. The class will visit significant projects, offices, national parks, and landmarks during a ten to fourteen-day trip to another region of the country.
Non-Traditional Format: Field study.

LAND 4810/6810. Field Study in American Garden Design. 2 hours.
Prerequisite: LAND 4070/6070.
Recognized professional firms, garden designers, and gardens central to the evolution and current culture of garden design in America.
Non-Traditional Format: Course consists of a 10-11 day field trip to earn two hours credit.

LAND 4900. Senior Project. 8 hours. 2 lab periods of 4 hours each per week.
Prerequisite: LAND 4720.
A comprehensive design or research project in which the student is able to demonstrate the proficiency acquired in the professional program of study.

LAND 4910/6910. Independent Project. 1-6 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: Permission of school.
Special study or project under the direction of faculty.

LAND 4911/6911. Independent Project. 1-6 hours.
Prerequisite: Permission of school.
Special study or project under the direction of faculty.
Non-Traditional Format: Directed study.

LAND 4912/6912. Independent Project. 1-6 hours.
Special study or project under the direction of faculty.
Non-Traditional Format: Directed study.

LAND 4960H. Directed Projects in Landscape Architecture (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LAND 4970H. Directed Projects in Landscape Architecture (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LAND 4980H. Directed Projects in Landscape Architecture (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LAND 4990H. Honors Thesis in Landscape Architecture. 8 hours. 2 lab periods of 4 hours each per week.
Prerequisite: Permission of Honors.
Individual research in major field or in a closely related field.

(LATN) Latin

College of Arts and Sciences, Department of Classics

LATN 1001. Elementary Latin I. 4 hours.
The Latin language; pronunciation, fundamentals of grammar, reading, and translation.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 1002. Elementary Latin II. 4 hours.
Prerequisite: LATN 1001.
Completion of study of Latin grammar and syntax begun in Elementary Latin I, with continuation of reading and translation.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 2001. Intermediate Latin I. 3 hours.
Prerequisite: LATN 1002.
Translating continuous Latin passages through readings from Cicero's orations, with brief selections from Caesar's Gallic Wars and from Latin poetry. Systematic review of Latin grammar and syntax.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 2002. Intermediate Latin II: Golden Age Latin Literature. 3 hours.
Prerequisite: LATN 2001.
Golden Age Latin prose and poetry. Prose readings selected from Livy or Cicero; verse readings from Catullus, Vergil, or Ovid.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 3010. Vergil's *Aeneid*. 3 hours.
Prerequisite: LATN 2002.
Latin poetry, poetic syntax, meter, and style through readings from Vergil's *Aeneid*, including selections from *Aeneid* books 3, 5, or 7-12, and others.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 4010/6010. Roman Rhetoric. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the orations and rhetorical writings of Cicero, Quintilian, Seneca Rhetor, and others.

LATN 4020/6020. Roman Epic Poetry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the Latin epic poets Ennius, Vergil, Lucan, and others.

LATN 4030/6030. Roman Historians. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Roman historical writers such as Caesar, Sallust, Ammianus Marcellinus, and others.

LATN 4040/6040. Roman Elegy. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the elegiac works of Tibullus/Sulpicia, Propertius, and Ovid, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4050/6050. Roman Epistles. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the letters of Cicero, Seneca, Pliny the Younger, and others.

LATN 4060/6060. Roman Satire. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from such satirists as Horace, Juvenal, and others.

LATN 4070/6070. Roman Drama. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the comedies of Plautus and Terence, and the tragedies of Seneca, and others.

LATN 4080/6080. Roman Didactic Poetry. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Lucretius' *De Rerum Natura*, Vergil's *Georgics*, and others. The poet as teacher; the manner in which poetic form and imagery express philosophy.

LATN 4090/6090. Latin of Later Antiquity and the Middle Ages. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Latin authors of late antiquity and the Middle Ages. Study of Latin vocabulary and style during late antiquity and the Middle Ages.

LATN 4100/6100. Roman Biography. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from Latin biographical authors such as Nepos, Suetonius, Tacitus, the Scriptores Historiae Augustae, and Einhard.

(LATN)GREK(LING) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo-European.

LATN 4200/6200. Catullus. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the *Carmina* of Catullus, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4210/6210. Horace. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the works of Horace, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.

LATN 4220/6220. Ovid. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the *Metamorphoses* and non-elegiac works of Ovid, including studies in the cultural context of Roman poetry, as well as the development of Latin poetic form, meter, and diction.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

LATN 4300/6300. Cicero and the Roman Republic. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the orations and other works of Cicero, and from the works of Caesar, Sallust, and other contemporary writers.

LATN 4310/6310. Livy. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the *Ab Urbe Condita* of Livy, with attention to literary and historical issues surrounding the author and his works.

LATN 4320/6320. Tacitus. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings from the *Annales*, *Historiae*, and/or minor works of Tacitus, with attention to literary and historical issues surrounding the author and his works.

LATN 4400/6400. Advanced Readings in Latin. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Undergraduate level only: LATN 3010; Graduate level only: Permission of department.
Readings in one or more Latin authors or genres. Topics to be selected on the basis of student needs.

(LEGL) Legal Studies

Terry College of Business, Department of Insurance, Legal Studies, Real Estate and Management Science

LEGL 2700. Legal and Regulatory Environment of Business. 3 hours.
Not open to students with credit in LEGL 2800H.
The legal and regulatory environment of business, emphasizing why legal duties are placed on the business community and how managers should appropriately respond to them. Covers legal institutions, constitutional law, common law, and public law.

LEGL 2800H. Legal and Regulatory Environment of Business (Honors). 3 hours.
Not open to students with credit in LEGL 2700.
Prerequisite: Permission of Honors.
The legal and regulatory environment of business, emphasizing why legal duties are placed on the business community and how managers should appropriately respond to them. Covers legal institutions, constitutional law, common law, and public law.

LEGL 4100H. Current Issues in Legal Studies (Honors). 3 hours.
Prerequisite: LEGL 2700 and permission of Honors.
Legal issues of current importance to business managers designed to develop critical legal thinking skills.

LEGL 4300/6300. Law of Business Organizations. 3 hours.
Prerequisite: LEGL 2700.
A managerial, entrepreneurial focus on the law applicable to forming partnerships, corporations and other business entities, raising capital and structuring relationships with agents, employees, partners, officers, and directors.

LEGL 4400/6400. Business Law. 3 hours.
Prerequisite: LEGL 2700.
Debtor-creditor relations, commercial paper, contracts, securities, agency, partnership, joint ventures, corporations, professional and legal responsibility, sales, secured transactions, bankruptcy.

LEGL 4500/6500. Employment Law. 3 hours.
Laws prohibiting employment discrimination based on race, gender (including sexual harassment), religion,

national origin, age, and disability, with an emphasis on avoiding unnecessary liability.

LEGL 4600. Negotiation and Alternative Dispute Resolution Systems. 3 hours.
Styles of negotiation as a tool used to resolve and reduce conflicts and disputes. Also studied are ADR systems, such as arbitration and mediation.

LEGL 4900. International Legal Transactions for Business. 3 hours.
Prerequisite: LEGL 2700.
Laws, agreements, and institutions that affect international business transactions with particular emphasis on licensing, exporting, contract formation, dispute resolution, intellectual property rights, and cultural, political, and ethical problems.

LEGL(REAL) 5200. Real Estate Law. 3 hours.
Prerequisite: REAL 4000.
How law impacts real estate, its ownership, conveyance, and development. Real property ownership interests, restrictions on such interest, methods of transferring such interest, private and public land-use controls, and legal transactions involving real estate, such as gifts, sales, and leases.

(LING) Linguistics

College of Arts and Sciences, Linguistics Program

LING 1810. Elementary Biblical Hebrew I. 4 hours.
Not open to students with credit in HEBR 1001.
A study of classical Hebrew grammar.

LING 1820. Elementary Biblical Hebrew II. 4 hours.
Not open to students with credit in HEBR 1002.
Prerequisite: HEBR 1001 or LING 1810.
A study of classical Hebrew grammar.

LING 1910. Elementary Standard Arabic I. 4 hours.
Not open to students with credit in ARAB 1001.
Fundamentals of grammar, pronunciation, reading, composition, and conversation of standard (including classical) Arabic.

LING 1920. Elementary Standard Arabic II. 4 hours.
Not open to students with credit in ARAB 1002.
Prerequisite: ARAB 1001 or LING 1910.
Fundamentals of grammar, pronunciation, reading, composition, and conversation of standard (including classical) Arabic.

(LING)CLAS 2010. The Nature of the English Vocabulary. 3 hours.
The nature and composition of the English vocabulary, with particular attention to Greek and Latin elements, and its development among diverse cultures and societies; techniques of morphological analysis, allomorphy, derivational morphology, formal and semantic change, and Indo-European etymology.

LING 2100. The Study of Language. 3 hours.
The scientific study of language, emphasizing such topics as the organization of grammar, language in space and time, and the relationship between the study of language and other disciplines.

LING 2100H. The Study of Language (Honors). 3 hours.
Not open to students with credit in LING 2100.
Prerequisite: Permission of Honors.
The scientific study of language, emphasizing such topics as the organization of grammar, language in space and time, and the relationship between the study of language and other disciplines.

LING 2830. Intermediate Biblical Hebrew I. 3 hours.
Not open to students with credit in HEBR 2003.
Prerequisite: HEBR 1002 or LING 1820.
Classical Hebrew grammar, with reading of selected texts from the Hebrew Bible/Old Testament.

LING 2840. Intermediate Biblical Hebrew II. 3 hours.
Not open to students with credit in HEBR 2004.
Prerequisite: HEBR 2003 or LING 2830.
Readings of Hebrew texts selected from the Hebrew Bible/Old Testament, Dead Sea Scrolls, or early rabbinic literature.

LING 2930. Intermediate Standard Arabic I. 3 hours.
Not open to students with credit in ARAB 2003.
Prerequisite: ARAB 1002 or LING 1920.
Intermediate grammar, reading, conversation, and composition in standard (including classical) Arabic. Particular attention will be given to readings in Islamic literature.

LING 2940. Intermediate Standard Arabic II. 3 hours.
Not open to students with credit in ARAB 2004.
Prerequisite: ARAB 2003 or LING 2930.
Intermediate grammar, reading, conversation, and composition in standard (including classical) Arabic. Particular attention will be given to readings in Islamic literature.

LING(ENGL) 3020. Language Variation. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Theory and assessment of regional and social language variation within one language, including the relationship of variation to language change. Historical and present-day illustrations come primarily from English, with consideration of the significance of language variation in our modern social context.

(LING)ENGL 3030. Introduction to the English Language. 3 hours.
Prerequisite: ENGL 1102 or ENGL 1030.
The history, structure, and modern varieties of the English language.

(LING)SPAN 3050. Introduction to Spanish Linguistics. 3 hours.
Prerequisite: SPAN 3010.
Fundamentals of language in general and Spanish in particular. Linguistic knowledge, language variation, and language contact phenomena. Representative Spanish sound systems, syllabic structure, sentence patterns, structure and meaning of words. Analysis of data from oral and written registers. Given in Spanish.

LING 3060. Phonetics and Phonology. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Phonetic transcription of various languages dictated by native and non-native speakers; understanding of the phonetic principle by the solution of selected problems which consist of phonetically transcribed data.

(LING)ANTH 3080. Anthropology of Language. 3 hours.
Prerequisite: ANTH 1102 or LING 2100 or permission of department.
Anthropological studies in language, including origins and evolution, prehistory, geographical distribution, typology and classification, language and speech communities. Relationships between language and culture, language and society, and language and environment will be emphasized.

(LING)FREN 3090. Introduction to French Linguistics. 3 hours.
Prerequisite: FREN 3010.
The field of French linguistics, emphasizing such topics as the internal and external history of French; the sounds, forms, and vocabulary of modern French; and the linguistic variation within France and the French-speaking world.

LING(ENGL) 3150. Generative Syntax. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Techniques and formalisms for analyzing syntactic phenomena of human languages within the framework of generative grammar. Examples will be drawn primarily from English.

(LING)GRMN 3380. Contrastive Grammar of English and German. 3 hours.
Prerequisite: GRMN 2002.
Contrastive analysis of German and English phonology and grammar. Prepares future teachers of German to identify pedagogically important structural differences between English and German.

LING 3830. Languages of the World. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The classification and distribution of languages of the world and a survey of linguistic structures as exemplified by selected languages.

(LING)ENGL 4000/6000. History of the English Language. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The development of present English through the stages of Old English, Middle English, and early Modern English. Study of elementary phonetics, phonemics, sound change, and dialect variation.

(LING)ENGL 4010/6010. American English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The history, present status, and future prospects of American English, including standards and internal variation.

(LING)ENGL(AFAM) 4040. Language Use in the African American Community. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
History and structure of the speech and language styles used in the African American community; examination of linguistic and cultural issues that confront the majority of African Americans; the role of the vernacular language of African Americans in society.

(LING)ENGL 4060/6060. Old English. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
The language and literature of England before the Norman Conquest, with reading of selected texts.

(LING)ANTH 4090/6090. Cognitive Anthropology. 3 hours.
Prerequisite: ANTH 1102 or permission of major.
Folk systems of knowledge, with an emphasis on how people in different societies culturally identify, define, label, and classify phenomena such as color terms, plants, animals, and other environmental resources.

(LING)ENGL 4110/6110. English Grammar. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or CMLT 2111 or CMLT 2210 or CMLT 2212 or CMLT 2220 or CMLT 2400 or ENGL 2310 or ENGL 2320 or ENGL 2330 or ENGL 2340 or ENGL 2400.
English grammar in the scholarly tradition of Curme and Jespersen.

(LING)CMSD 4120/6120. Anatomy and Physiology of Speech, Voice, and Hearing. 3 hours.
Prerequisite: Permission of department.
Anatomical structures and basic physiological functions underlying audition, respiration, phonation, articulation, resonance, and swallowing.

(LING)CMSD 4140/6140. Introduction to Speech and Voice Science. 3 hours.
Prerequisite: CMSD 4090/6090 and CMSD(LING) 4120/6120 and PSYC 1101 and (MATH 1101 or PHYS 1010 or permission of department).
Application of basic physical principles to production and perception of speech and voice. Biomechanics of vocal fold oscillation; acoustics of voice source; resonance; acoustic phonetics; psychoacoustics of speech and voice. Interpretation of objective measures and outputs of computational models.

(LING)GREK(LATN) 4150/6150. Comparative Grammar of Greek and Latin. 3 hours.
Prerequisite: Undergraduate level only: LATN 3010 or GREK 2002 or permission of department Graduate level only: Pass on Classics Department Greek or Latin proficiency exam or permission of department.
The positions of Greek and Latin within the Indo-European language family with special attention to the phonological evolution of both Greek and Latin from Proto-Indo-European.

(LING)ENGL 4170/6170. Second Language Acquisition. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Linguistic theories of second language acquisition, with emphasis on the acquisition of English. Topics include order of acquisition, sociocultural factors with linguistic bases, and neurolinguistic models.

(LING)ENGL 4180/6180. ESL Error Analysis. 3 hours.
Prerequisite: ENGL(LING) 4110/6110 or permission of department.
Psycholinguistic theory applied to problems in second language learning, and the prediction of language behavior through the use of contrastive analysis.

LING 4210/6210. Introduction to Indo-European Studies. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The Indo-European language family: the various early Indo-European dialects, their grammatical structures, and the evolution of those structures from the proto-language.

(LING)PHIL 4300/6300. Philosophy of Language. 3 hours.
Prerequisite: Permission of department.
Topics such as formal and ordinary languages, meaning, reference, truth, definition, analyticity, ambiguity, metaphor, symbolism, and the uses of language.

(LING)GRMN 4460/6460. Structure of Modern German. 3 hours.
Prerequisite: GRMN 3001.
Linguistic and sociolinguistic structure of modern German with relevant linguistic terminology. Emphasis on phonology, morphology, and syntax. Taught in English.

(LING)CMSD 4500/6500. Study of Language Development. 3 hours.
Prerequisite: CMSD 4130/6130 or permission of department.
Normal development of children's reception, integration, and expression of linguistic information; cultural, gender, socioeconomic, cognitive, and prelinguistic influences on language development.

(LING)PHIL 4510/6510. Deductive Systems. 3 hours.
Prerequisite: PHIL 2500.
Symbolic-mathematical logic, examining the propositional and predicate calculi, with emphasis on problems in translation and formalization and topics in the philosophy of logic and mathematics.

(LING)PHIL 4520/6520. Model Theory. 3 hours.
Prerequisite: PHIL(LING) 4510/6510.
Formal semantics for sentential and first-order predicate logic, including both soundness and completeness results for first-order logic. Additional topics may include Goedel's incompleteness results, the Skolem-Lowenheim theorem, or possible world semantics for modal logics.

LING(CLAS) 4610/6610. Sanskrit I. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The phonology, morphology, and syntax of the classical Sanskrit language, emphasizing the position of Sanskrit within the Indo-European language family and its importance for Indo-European linguistics.

LING(CLAS) 4620/6620. Sanskrit II. 3 hours.
Prerequisite: LING(CLAS) 4610/6610.
Continued studies in both the synchronic and diachronic grammar of classical Sanskrit.

(LING)FREN 4630. French Phonetics. 3 hours.
Prerequisite: FREN(LING) 3090.
The French sound system in theory and practice. How French sounds are formed and how they reflect social class and geographical origin. Work on pronunciation in class and the language laboratory. Given in French.

(LING)SPAN 4650. Spanish Phonetics and Language Variation. 3 hours.
Prerequisite: SPAN(LING) 3050.
Speech organs and systematic description of Spanish sounds. Comparison of English and Spanish patterns of stress, pronunciation, and intonation. Examination of recurrent pronunciation errors. Description of major geographical and social dialects. Practice in pronunciation and transcription of sounds. Given in Spanish.

LING 4690/6690. Historical Linguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
Traditional methods of historical linguistics are re-

viewed, with examples from several different language families. Various kinds of possible phonological and syntactic changes are investigated in relation to modern linguistic theory.

LING 4710/6710. Languages in Contact. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The influence of languages on other languages spoken in the same or neighboring areas, including pidgins and creoles, with consideration of relationships in phonology, morphology, syntax, semantics, and vocabulary.

LING(CMLT) 4740/6740. Discourse Analysis. 3 hours.
Prerequisite: LING 2100 or permission of department.
An interdisciplinary study of language use, text analysis, and evaluation. The course will provide students with the ability to investigate and evaluate structural features of language and to identify the strategies used by different writers based on style and cultural backgrounds.

LING 4850. Elementary Aramaic/Syriac. 3 hours.
Not open to students with credit in SEMI 4001.
Prerequisite: HEBR 2004 or LING 2840 or permission of department.
Aramaic and/or Syriac grammar, especially as related to Hebrew, along with simple readings from religious texts.

LING(ANTH) 4860/6860. Sociolinguistics. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The study of language as a cultural and social phenomenon. Topics include language and meaning, language and world view, language and social behavior, and language and social issues.

LING(CMLT) 4870/6870. Language, Gender, and Culture. 3 hours.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The role of language and culture in the formation of philosophical assumptions about gender differentiation in society.

LING 4900/6900. Topics in Indo-European Linguistics. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: LING 2100 or ENGL(LING) 3030 or permission of department.
The synchronic and diachronic grammar of an older Indo-European language. Possible offerings include Avestan, Hittite, Lithuanian, Old Church, Slavic, and Old Irish or topics such as Indo-European phonology, morphology, or syntax.

LING 4910. Special Topics in Linguistics. 3-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: [LING 2100 or ENGL(LING) 3030] and permission of department.
Reading and discussions of current developments and issues in linguistics.

LING 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: [LING 2100 or ENGL(LING) 3030] and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LING 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: [LING 2100 or ENGL(LING) 3030] and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LING 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: [LING 2100 or ENGL(LING) 3030] and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

LING 4990H. Honors Thesis. 3 hours.
Prerequisite: [LING 2100 or ENGL(LING) 3030] and permission of Honors.
Individual research for preparation of a thesis.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(MARK) Marketing

Terry College of Business, Department of Marketing and Distribution

MARK 3000. Principles of Marketing. 3 hours.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L.
The ways organizations satisfy consumer and organizational needs and wants for products and services. Markets; buyer behavior; marketing research; segmenting targeting and positioning; and product, place, price, and promotional strategies. Concepts, strategies, applications, and marketing methods used to generate revenues in domestic and global settings.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MARK 3000H. Principles of Marketing (Honors). 3 hours.
Not open to students with credit in MARK 3000.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L and permission of Honors.
The ways organizations satisfy consumer and organizational needs and wants for products and services. Markets, buyer behavior, market research, segmenta-

tion, and positioning with product, place, price, and promotional strategies. Concepts, strategies, applications, and marketing methods used to generate revenues in domestic and global settings.

MARK 4000. Marketing Research for Business Decisions. 3 hours.
Prerequisite: MARK 3000.
The value of marketing research in the context of business decision making. The course first stresses the process of obtaining information, and then emphasizes the use of this information to develop new products, market to specific segments, monitor the business environment, perform competitive analyses, etc.

MARK 4100. Consumer and Organizational Buyer Behavior. 3 hours.
Prerequisite: MARK 3000.
Consumer and organizational buyer behavior processes. Internal and external influences on decision making, as well as similarities and differences between consumer and organizational choice processes. Concepts from economics and the behavioral sciences will be used to help explain purchase and consumption behavior.

MARK 4200. Sales Force Strategy and Management. 3 hours.
Prerequisite: MARK 4000 or MARK 4100.
Managing the marketing-driven sales force, including customer relationship and interfacing strategies, cross-functional issues relevant to sales, sales force organization strategies and systems, and customer-focused teams. Human resource issues, such as compensation systems, salesperson development, sales team leadership, and sales training and coaching.

MARK 4250. Account Management and Professional Selling. 3 hours.
Prerequisite: MARK 4200.
Developing and managing a relationship or partnership with a key or national account. Professional selling, including customer opportunity analysis, problem identification, needs assessment, value analysis, and value-based selling. Contact manager systems and role-plays are used to teach selling competencies.

MARK 4300. Information Technology and Marketing. 3 hours.
Prerequisite: MARK 4000 or MARK 4100.
How marketers have utilized advances in information technology. Converting information provided by electronic scanning, emerging media such as the World Wide Web, and conventional record-keeping into actionable knowledge. The emergence of database marketing, frequency and relationship marketing programs, and direct marketing provide the context.

MARK 4400. Logistics and Channel Strategy. 3 hours.
Prerequisite: MARK 4000 or MARK 4100.
Logistical practices associated with integrated supply chain management. Identifying logistical support needed as well as strategies for effectively managing distribution channel relationships; e.g., interactions between channel participants, including manufacturers, various intermediaries such as wholesalers or retailers, and external service providers.

MARK 4500. Product and Service Marketing. 3 hours.
Prerequisite: MARK 4000 or MARK 4100.
This course describes product and service options and compares and contrasts how product and service ideas are developed, priced, promoted, branded, and distributed.

MARK 4600. Advertising and Sales Promotion. 3 hours.
Prerequisite: MARK 4000 or MARK 4100.
Advertising and promotion management. Emphasizes advertising and sales promotion in an organization's marketing communications program. Strategic integration and coordination of all elements of the promotion mix and the legal, ethical, and moral implications of promotion.

MARK 4700. International Marketing. 3 hours.
Prerequisite: MARK 3000.
The scope and challenge of international marketing. Emphasizes the cultural dimensions of world markets. Marketing variables will be discussed in terms of developing and executing strategies in different countries.

MARK 4800. Marketing Internship Cooperative. 3 hours.
Prerequisite: MARK 3000.
Students are permitted to enter business organizations to obtain practical and applied marketing experience. A paper describing and analyzing this experience is required.
Non-Traditional Format: This course is designated for undergraduate internship and does not meet formally.

MARK 4900. Marketing Strategies and Decision Making. 3 hours.
Prerequisite: MARK 4000 or MARK 4100 or permission of department.
This course serves as the capstone marketing course. It builds on knowledge gained from previous courses to solve marketing problems in a global environment. The course seeks to develop skills in integrating the functions of marketing toward forming strategy decisions.

(MARS) Marine Sciences

College of Arts and Sciences, Department of Marine Sciences

MARS 1010-1010L. The Marine Environment. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Physical, chemical, and geological characteristics of the marine environment. The effects of human activity on marine environments and resources.

MARS 1010H. The Marine Environment (Honors). 4 hours.
Prerequisite: Permission of Honors.
Physical, chemical, and geological characteristics of the marine environment. The effects of human activity on marine environments and resources.

MARS 1020-1020L. Biology of the Marine Environment. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Fundamental biological principles in marine organisms and ecosystems; diversity of marine life; structure and function of marine biological communities; biological processes in marine environments; the role of the oceans in global cycles, the effects of human activity on life in the sea.

MARS 1020H. Biology of the Marine Environment (Honors). 4 hours.
Prerequisite: Permission of Honors.
Fundamental biological principles in marine organisms and ecosystems; diversity of marine life; structure and function of marine biological communities; biological processes in marine environments; the role of the oceans in global cycles, the effects of human activity on life in the sea.

MARS 3000. Coastal Zone and Marine Law. 3 hours.
Not open to students with credit in FORS 5820/7820.
Prerequisite: Junior or senior standing.
The major statutes, regulations, and litigation histories of the coastal margins and near-shore marine waters. Source and status of rights, preservation, and allocation of resources; cooperative management, pollution control, current systems perspective, and law of the sea.

MARS 3450-3450L. Marine Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L or (CHEM 2212 and CHEM 2212L).
The origin and distribution of life in the sea, marine primary and secondary production, with focus on the ecological dynamics of population growth and maintenance in the world's oceans. Comparison of marine biological systems with terrestrial biological systems to elucidate their common or unique physiological and ecological processes.

(MARS)FORS 3570. The Law of Earth Protection and Resource Use. 3 hours.
Not open to students with credit in AAEC 4930/6930 or FORS 5820/7820.
A first course in legal studies, and an introduction to environmental and natural resources law. Basics of the legal system; selected major protection and resource statutes, regulations, roles and methods of agencies; significant judicial opinions.

MARS 3900. Introduction to Experimental Marine Sciences. 1-4 hours. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Investigation of a defined problem in marine science under the direction of a faculty member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

MARS 4100/6100. General Oceanography I. 3 hours.
Prerequisite: PHYS 1112-1112L.
Oceanographic principles of the geological and physical structure, composition, and processes of the ocean with emphasis on general oceanic circulation, water properties, waves and tides, coastal physical processes, turbulent mixing, sediment transport.

MARS 4110/6110. General Oceanography II. 3 hours.
Prerequisite: BIOL 1108-1108L and CHEM 1211 and CHEM 2211.
Chemical composition, dynamics, and processes of life in the oceans and the role the life of the oceans plays in global processes.

MARS(FORS) 4380/6380-4380L/6380L. Marine Fisheries Biology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L and permission of department.
Interaction of oceanographic processes with the life histories and productivity of marine fisheries species, and the human interactions with major marine fisheries.

MARS 4450/6450. Introduction to Marine Chemistry. 3 hours.
Not open to students with credit in MARS 8020-8020L.
Prerequisite: CHEM 1212 and CHEM 1212L and PHYS 1212-1212L and MATH 2200 and MATH 2200L and MARS 4110/6110.
Chemical properties of oceanic systems, oceanic acid base equilibrium, redox chemistry, nutrient cycling, and radioactive processes.

MARS 4500/6500. Field Study in Oceanography and Marine Methods. 5 hours. 15 hours lecture and 5 lab periods of 5 hours each per week.
Prerequisite: Permission of department.
Laboratory and fieldwork in chemical, biological, sedimentological, and physical oceanographic processes

and methods in southeast esturaine, coastal, and shelf environments.
Non-Traditional Format: A field study course taught off-campus.

MARS 4510/6510. Field Study in Oceanography and Marine Methods: Independent Research. 3-7 hours. Repeatable for maximum 7 hours credit. 5 lab periods of 8 hours each per week.
Prerequisite: Permission of department.
Independent field research on oceanographic processes.
Non-Traditional Format: A field study course taught off-campus.

MARS(MIBO) 4620/6620-4620L/6620L. Microbial Ecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500 or permission of department.
Emphasizes the roles of microorganisms in ecosystems. Nutrient cycles, methods of microbial analysis, and the functional roles of microorganisms.

MARS 4810/6810. Microbial Biogeochemistry. 3 hours.
Prerequisite: [MIBO 3500 and BCMB(BIOL)(CHEM) 3100] or permission of department.
The microbial processes which are or have been important in modifying the earth's lithosphere, hydrosphere, and atmosphere. Microbially mediated precipitation and solubilization of minerals, cycling of dissolved and particulate organic matter in natural waters, and the physiological ecology of microorganisms adapted to extreme environments.

MARS 4960. Undergraduate Research. 5-15 hours. Repeatable for maximum 15 hours credit. 1-3 lab periods of 5 hours each per week.
Prerequisite: Permission of department.
Research project directed by a faculty member independent of scheduled classes.

MARS 4990. Senior Thesis. 5 hours. 3 lab periods of 5 hours each per week.
Prerequisite: Permission of department.
Individual research under the direction of a faculty member and presenting the results of the research as a thesis and as an oral presentation.

(MATH) Mathematics

College of Arts and Sciences, Department of Mathematics

(MATH)ACAM 0097. Intermediate Algebra I. 3 hours.
Concepts of fractions, decimals, percents, and signed numbers. Methods for solving first degree equations, systems, and related applications, and graphing linear equations.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(MATH)ACAM 0098. Intermediate Algebra II. 3 hours.
Concepts of factoring, functions, polynomials. Methods for solving second degree and rational equations and related applications. Operations regarding polynomials, exponents, and radicals.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(MATH)ACAM 0099. Introduction to College Algebra. 3 hours.
Concepts of factoring, exponents, polynomials, radicals, fractions, and graphing. Methods for solving equations: rational, first and second degree, absolute value, inequalities, and systems and their related applications.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

MATH 1060. Mathematics of Decision Making. 3 hours.
Applications of modern mathematics to management and decision making including the solution of optimization problems using network theory, methods for optimal scheduling, voting methods, game theory, and related strategies. Applications include planning of postal delivery routes, placement of cable television lines, United States Congressional apportionment, and dispute resolution.

MATH 1090. Trigonometry. 3 hours.
Not open to students with credit in MATH 1113.
Trigonometry with an emphasis on geometric applications.

MATH 1101. Mathematical Modeling. 3 hours.
Mathematical modeling using graphical, numerical, symbolic, and verbal techniques to describe and explore real-world data and phenomena. The investigation and analysis of applied problems and questions, and of effective communication of quantitative concepts and results.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MATH 1113. Precalculus. 3 hours.
Preparation for calculus, including an intensive study of algebraic, exponential, logarithmic, and trigonometric functions and their graphs. Applications include simple maximum/minimum problems, exponential growth and decay, and surveying problems.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MATH 1700. Arithmetic and Problem Solving. 3 hours.
Prerequisite: MATH 1101
Problem solving and critical thinking involving mathematics particularly appropriate for prospective elementary school teachers. Emphasis will be placed on

properties of number systems, basic geometric concepts, and challenging problems involving elementary mathematics.

MATH 2110. Calculus for Economics. 3 hours.
Not open to students with credit in MATH 2210 or MATH 2210L or MATH 2310H or MATH 2410H.
Prerequisite: MATH 2200 and MATH 2200L.
Topics specifically chosen to meet the needs of the student of economics: the definite integral, functions of several variables, partial derivatives, Lagrange multipliers, and matrices.

MATH 2200. Analytic Geometry and Calculus. 3 hours.
Not open to students with credit in MATH 2300H or MATH 2400H.
Prerequisite: MATH 1113.
Corequisite: MATH 2200L.
Introductory differential calculus and its applications. Topics include limits, continuity, differentiability, derivatives of trigonometric, exponential and logarithmic functions, maximum-minimum problems, curve sketching, Newton's method, and antiderivatives.

MATH 2200L. Differential Calculus Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Corequisite: MATH 2200 or MATH 2300H.
Computer projects exploring topics related to the course content of Analytic Geometry and Calculus.

MATH 2210. Integral Calculus. 3 hours.
Not open to students with credit in MATH 2110 or MATH 2310H or MATH 2410H.
Prerequisite: MATH 2200.
Corequisite: MATH 2210L.
Introductory integral calculus and its applications. Topics include Riemann sums, the Riemann integral, the Fundamental Theorem of calculus, techniques of integration, arc length, surface area, volumes, force, work, and an introduction to differential equations.

MATH 2210L. Integral Calculus Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Corequisite: MATH 2210 or MATH 2310H.
Computer projects exploring topics related to the course content of Integral Calculus.

MATH 2300H. Differential Calculus (Honors). 3 hours.
Not open to students with credit in MATH 2200.
Prerequisite: MATH 1113 and permission of Honors.
Corequisite: MATH 2200L.
Honors differential calculus and its applications.

MATH 2310H. Integral Calculus (Honors). 3 hours.
Not open to students with credit in MATH 2110 or MATH 2210 or MATH 2410H.
Prerequisite: MATH 2200 or MATH 2300H and permission of Honors.
Corequisite: MATH 2210L.
Honors integral calculus.

MATH 2400H. Differential Calculus with Theory (Honors). 4 hours.
Not open to students with credit in MATH 2110 or MATH 2210 or MATH 2310H.
Prerequisite: Permission of Honors.
A more rigorous and extensive treatment of differential calculus. Topics include the real numbers, the least upper bound property, limits, continuity, differentiability, and applications. Students with a strong background and interest in mathematics are encouraged to take this course; prior experience with calculus is not required.

MATH 2410H. Integral Calculus with Theory (Honors). 4 hours.
Not open to students with credit in MATH 2110 or MATH 2210 or MATH 2310H.
Prerequisite: MATH 2400H and permission of Honors.
A more rigorous and extensive treatment of integral calculus. Topics include the Fundamental Theorem of calculus, applications of integration, logarithms and exponentials, Taylor polynomials, sequences, series, and uniform convergence.

MATH 2500. Multivariable Calculus. 3 hours.
Not open to students with credit in MATH 3510.
Prerequisite: MATH 2210.
Calculus of functions of two and three variables including vectors in two and three dimensions, parametric curves, continuity and differentiability of functions of several variables, directional derivatives, Lagrange multipliers, multiple integration, polar coordinates, Green's theorem, and Stokes' theorem.

(MATH)CSCI 2610. Discrete Mathematics for Computer Science. 4 hours.
Prerequisite: CSCI 1301-1301L.
The fundamental mathematical tools used in computer science: sets, relations, and functions; propositional logic, predicate logic, and inductive proofs; summations, recurrences, and elementary asymptotics; counting and discrete probability; undirected and directed graphs; introductory linear algebra, with applications in computer science.

MATH 2700. Elementary Differential Equations. 3 hours.
Prerequisite: MATH 2210.
First and second order ordinary differential equations, including physical and biological applications, numerical solutions, and mathematical modeling.

MATH 3000. Introduction to Linear Algebra. 3 hours.
Not open to students with credit in MATH 3500.
Prerequisite: MATH 2210.
Theory and applications of systems of linear equations, vector spaces, and linear transformations. Fundamental concepts include: linear independence, basis, and dimension; orthogonality, projections, and least squares solutions of inconsistent systems; eigenvalues, eigenvectors, and applications to Markov chains, difference equations, and quadratic forms.

MATH 3100. Sequences and Series. 3 hours.
Prerequisite: MATH 2210.
Precise definitions of limit and convergence concepts; practical tests for convergence of infinite series; power series representations and numerical error estimates; applications to calculus and explicit summation formulae; trigonometric series.

MATH 3200. Introduction to Higher Mathematics. 3 hours.
Prerequisite: MATH 2210.
Preparation in mathematical reasoning and proof-writing necessary for upper division course work in mathematics. Topics include logic, integers and induction, sets and relations, equivalence relations and partitions, and functions (including injectivity and surjectivity).

MATH 3500. Multivariable Mathematics I. 3 hours.
Not open to students with credit in MATH 3000.
Prerequisite: MATH 2210.
Prerequisite or corequisite: MATH 3200.
Vector algebra and geometry; fundamental concepts of linear algebra; linear transformations; differential calculus of functions of several variables; eigenvalues and applications. The sequence of Multivariable Mathematics gives an integrated and more conceptual treatment of the material in Multivariable Calculus and Introduction to Linear Algebra.

MATH 3510. Multivariable Mathematics II. 3 hours.
Not open to students with credit in MATH 2500.
Prerequisite: MATH 3500.
Inverse function theorem and Jacobians; integration in several variables, the change of variables theorem; line integrals, surface integrals, and Stokes' Theorem; applications to physics.

MATH 4000/6000. Modern Algebra and Geometry I. 3 hours.
Prerequisite: (MATH 3000 and MATH 3200) or permission of department.
Abstract algebra, emphasizing geometric motivation and applications. Beginning with a careful study of integers, modular arithmetic, and the Euclidean algorithm, the course moves on to fields, isometries of the complex plane, polynomials, splitting fields, rings, homomorphisms, field extensions, and compass and straightedge constructions.

MATH 4010/6010. Modern Algebra and Geometry II. 3 hours.
Prerequisite: MATH 4000/6000.
More advanced abstract algebraic structures and concepts, such as groups, symmetry, group actions, counting principles, symmetry groups of the regular polyhedra, Burnside's Theorem, isometries of R^3, Galois Theory, and affine and projective geometry.

MATH 4050/6050. Advanced Linear Algebra. 3 hours.
Prerequisite: MATH 4000/6000.
Orthogonal and unitary groups, spectral theorem; infinite dimensional vector spaces; Jordan and rational canonical forms and applications.

MATH 4080/6080. Advanced Algebra. 3 hours.
Prerequisite: MATH 4010/6010 or permission of department.
Linear algebra, groups, rings, and modules, intermediate in level between Modern Algebra and Geometry II and Algebra. Topics include the finite-dimensional spectral theorem, group actions, classification of finitely generated modules over principal ideal domains, and canonical forms of linear operators.

MATH 4100/6100. Real Analysis. 3 hours.
Prerequisite: (MATH 3100 and MATH 3200) or permission of department.
Metric spaces and continuity; differentiable and integrable functions of one variable; sequences and series of functions.

MATH 4110/6110. The Lebesgue Integral and Applications. 3 hours.
Prerequisite: MATH 4100/6100 or MATH 4200/6200 or permission of department.
The Lebesgue integral with applications to Fourier analysis and probability.

MATH 4120/6120. Multivariable Analysis. 3 hours.
Prerequisite: MATH 3510 or MATH 4100/6100 or MATH 4200/6200.
The derivative as a linear map, inverse and implicit function theorems, change of variables in multiple integrals; manifolds, differential forms, and the generalized Stokes' Theorem.

MATH 4150/6150. Complex Variables. 3 hours.
Prerequisite: (MATH 2500 and MATH 3100) or MATH 3510.
Differential and integral calculus of functions of a complex variable, with applications. Topics include the Cauchy integral formula, power series and Laurent series, and the residue theorem.

MATH 4200/6200. Point Set Topology. 3 hours.
Prerequisite: MATH 3100 and MATH 3200.
Topological spaces, continuity; connectedness, compactness; separation axioms and Tietze extension theorem; function spaces.

MATH 4220/6220. Differential Topology. 3 hours.
Prerequisite: MATH 4120/6120 and (MATH 4100/6100 or MATH 4200/6200).
Manifolds in Euclidean space: fundamental ideas of transversality, homotopy, and intersection theory; differential forms, Stokes' Theorem, deRham cohomology, and degree theory.

MATH 4250/6250. Differential Geometry. 3 hours.
Prerequisite: (MATH 2500 and MATH 3000) or MATH 3510.
The geometry of curves and surfaces in Euclidean

space: Frenet formulas for curves, notions of curvature for surfaces; Gauss-Bonnet Theorem; discussion of non-Euclidean geometries.

MATH 4300/6300. Introduction to Algebraic Curves. 3 hours.
Prerequisite: MATH 4000/6000 or permission of department.
Polynomials and resultants, projective spaces. The focus is on plane algebraic curves: intersection, Bezout's theorem, linear systems, rational curves, singularities, blowing up.

MATH 4400/6400. Number Theory. 3 hours.
Prerequisite: MATH 4000/6000.
Euler's theorem, public key cryptology, pseudoprimes, multiplicative functions, primitive roots, quadratic reciprocity, continued fractions, sums of two squares and Gaussian integers.

MATH 4450/6450. Cryptology and Computational Number Theory. 3 hours.
Prerequisite: MATH 4000/6000.
Recognizing prime numbers, factoring composite numbers, finite fields, elliptic curves, discrete logarithms, private key cryptology, key exchange systems, signature authentication, public key cryptology.

MATH 4500/6500. Numerical Analysis I. 3 hours.
Prerequisite: MATH 3000.
Prerequisite or corequisite: MATH 3100.
Methods for finding approximate numerical solutions to a variety of mathematical problems, featuring careful error analysis. A mathematical software package will be used to implement iterative techniques for nonlinear equations, polynomial interpolation, integration, and problems in linear algebra such as matrix inversion, eigenvalues and eigenvectors.

MATH 4510/6510. Numerical Analysis II. 3 hours.
Prerequisite: (MATH 2500 or MATH 3510) and MATH 2700 and MATH 4500/6500.
Numerical solutions of ordinary and partial differential equations, higher-dimensional Newton's method, and splines.

MATH 4600/6600. Probability. 3 hours.
Prerequisite: (MATH 2500 and MATH 3100) or MATH 3510.
Discrete and continuous random variables, expectation, independence and conditional probability; binomial, Bernoulli, normal, and Poisson distributions; law of large numbers and central limit theorem.

MATH(CSCI) 4630/6630. Mathematical Analysis of Computer Algorithms. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Discrete algorithms (number-theoretic, graph-theoretic, combinatorial, and algebraic) with an emphasis on techniques for their mathematical analysis.

MATH(CSCI) 4670/6670. Combinatorics. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Basic counting principles: permutations, combinations, probability, occupancy problems, and binomial coefficients. More sophisticated methods include generating functions, recurrence relations, inclusion/exclusion principle, and the pigeonhole principle. Additional topics include asymptotic enumeration, Polya counting theory, combinatorial designs, coding theory, and combinatorial optimization.

MATH(CSCI) 4690/6690. Graph Theory. 3 hours.
Prerequisite: MATH 3000 and (MATH 3200 or CSCI(MATH) 2610).
Elementary theory of graphs and digraphs. Topics include connectivity, reconstruction, trees, Euler's problem, hamiltonicity, network flows, planarity, node and edge colorings, tournaments, matchings, and extremal graphs. A number of algorithms and applications are included.

MATH 4700/6700. Qualitative Ordinary Differential Equations. 3 hours.
Prerequisite: MATH 2700 and (MATH 3000 or MATH 3500).
Transform methods, linear and nonlinear systems of ordinary differential equations, stability, and chaos.

MATH 4720/6720. Introduction to Partial Differential Equations. 3 hours.
Prerequisite: MATH 2700 and (MATH 2500 or MATH 3510).
The basic partial differential equations of mathematical physics: Laplace's equation, the wave equation, and the heat equation. Separation of variables and Fourier series techniques are featured.

MATH 4760/6760. Mathematics and Music. 3 hours.
Prerequisite: MATH 2210 or MATH 2310H or MATH 2410H.
This course is intended for undergraduates (math majors, music majors, and others) interested in the mathematical aspects of music. At least some familiarity with musical notation is a prerequisite. Topics to be discussed include the structure of sound, the construction of scales, and synthesis.

MATH 4780/6780. Mathematical Biology. 3 hours.
Prerequisite: MATH 2700 and (MATH 3000 or MATH 3500).
Mathematical models in the biological sciences: compartmental flow models, dynamic system models, discrete and continuous models, deterministic and stochastic models.

MATH 4850/6850. History of Mathematics. 3 hours.
Prerequisite: Senior standing.
The development of mathematical thought from ancient times to the present, paying particular attention to the context of today's mathematics curriculum.

MATH 4900/6900. Topics in Mathematics. 3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: Senior standing.
A special topic not otherwise offered in the mathematics curriculum.

MATH 4960H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

MATH 4970H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

MATH 5020/7020. Arithmetic for Middle School Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Operations of arithmetic for middle school teachers; number systems; set theory to study mappings, functions, and equivalence relations.

MATH 5030/7030. Geometry and Measurement for Middle School Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Principles of geometry and measurement for middle school teachers.

MATH 5070/7070. Calculus for Advanced Placement Teachers. 3 hours.
Prerequisite: MATH 2500.
Variable calculus designed to prepare in-service secondary school teachers for effective instruction of advanced placement students. Emphasizes concepts and principles underlying differential and integral calculus of a single variable.

MATH 5200/7200. Foundations of Geometry I. 3 hours.
Prerequisite: MATH 3000 and MATH 3200.
Advanced elementary geometry for prospective teachers of secondary school mathematics: axiom systems and models; the parallel postulate; neutral, Euclidean, and non-Euclidean geometries.

MATH 5210/7210. Foundations of Geometry II. 3 hours.
Prerequisite: MATH 5200/7200.
Further development of the axioms and models for Euclidean and non-Euclidean geometry; transformation geometry.

MATH 5560/7560. Probability and Statistics for Teachers. 3 hours.
Prerequisite: MATH 2200 and MATH 2200L.
Fundamental ideas of probability with particular emphasis on their applications in statistics.

(MGMT) Management

Terry College of Business, Department of Management

MGMT 2090. Introduction to Information Systems in Business. 3 hours.
Not open to students with credit in CSCI 1100-1100L or MGMT 2190H.
Computer concepts and information technology in business, including hardware and software concepts, fundamentals of information systems, telecommunications, and business-related software packages.

MGMT 2190H. Introduction to Information Systems in Business (Honors). 3 hours.
Not open to students with credit in MGMT 2090.
Prerequisite: Permission of Honors.
Computer concepts and information technology in business, including hardware and software concepts, fundamentals of information systems, telecommunications, and business-related software packages.

MGMT 3000. Management of Organizations and Individuals. 3 hours.
Not open to students with credit in MGMT 3000H.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L.
Management functions and processes as applied to organizations and to individuals in organizations. Topics to be covered include strategy, job and organization design, ethics and social responsibility, diversity, global influences, leadership, motivation, human resource management, and organizational change. Other emerging managerial issues may be introduced.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MGMT 3000H. Management of Organizations and Individuals (Honors). 3 hours.
Not open to students with credit in MGMT 3000.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L and permission of Honors.
Management functions and processes as applied to organizations and to individuals in organizations. Topics to be covered include strategy, job and organization design, ethics and social responsibility, diversity, global influences, leadership, motivation, human resource management, and organizational change. Other emerging managerial issues may be introduced

MGMT 4000. Integrated Resource Management. 3 hours.
Not open to students with credit in MGMT 4000H

Prerequisite: ACCT 2102 and junior standing.
Traditional management, total quality management, just-in-time and constraints management philosophies applied to services and manufacturing. Resource management (the integration of these philosophies) focuses on designing, planning, scheduling, executing, controlling, and measuring operations and their relationships with other functions in providing effective business processes to achieve organizational goals.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MGMT 4000H. Integrated Resource Management (Honors). 3 hours.
Not open to students with credit in MGMT 4000.
Prerequisite: ACCT 2102 and junior standing and permission of Honors.
Traditional management, total quality management, just-in-time and constraints management philosophies applied to services and manufacturing. Resource management (the integration of these philosophies) focuses on designing, planning, scheduling, executing, controlling, and measuring operations and their relationships with other functions in providing effective business processes to achieve organizational goals.

MGMT 4240. Quality Management. 3 hours.
Prerequisite: MGMT 3000.
Managerial, behavioral, technological, and statistical concepts as related to Total Quality Management (TQM). Quality, continuous improvement and productivity are discussed. Focus is on understanding and being able to apply all the concepts throughout any organization (i.e., service, manufacturing, not-for-profit, and governmental).

MGMT 4250. Productivity Management. 3 hours.
Prerequisite: MGMT 3000.
Personal, process, white collar, and organizational productivity concepts, issues, and measurements. Emphasizes combining these new management philosophies in achieving a competitive advantage of time, quality, and price and their impact on organizational profit. Constraint management and process management concepts are applied to support cross-functional problem identification, analysis, solution, and implementation.

MGMT 4260. Service Operations Management. 3 hours.
Prerequisite: MGMT 3000.
Service sector performance and methods designed to improve service sector competitiveness. The operations management decisions in service businesses in relation to productivity, quality, work force management, location, capacity, the effect of new technologies, and international issues.

MGMT 4270. Applications in Operations Management. 3 hours.
Prerequisite: MGMT 4240 or MGMT 4250 or MGMT 5210 or permission of department.
Analysis of organizational problems using traditional, quality, just-in-time, constraint, and process management tools in service and manufacturing case studies and projects. Constraint management logic-based tools are utilized as a framework to identify the core business problem, develop a solution, and construct an implementation plan.

MGMT 4600. Computer Programming in Business. 3 hours.
Prerequisite: MGMT 2090.
Introduction to computer programming. Fundamentals of systems analysis and program development using top-down design; structured programming; and debugging, testing and implementation; elementary data structures.

MGMT 4610. Data Management. 3 hours.
Prerequisite: MGMT 2090.
Data management, including database development, access, and administration. The focus is on issues and principles of managing organizational data. Students will get extensive experience in developing data models, creating relational databases, and formulating and executing complex queries.

MGMT 4620. Systems Analysis and Design. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Structured systems analysis and design with emphasis on the development of business application systems. Methods of systems documentation are examined through the use of tools and techniques for describing process flows, data flows, data structures, system objects, file designs, input and output designs, and program specifications.

MGMT 4800. Internship or Cooperative Education. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MGMT 3000 or permission of department.
Students are permitted to enter businesses, governmental agencies, or other organizations for the purposes of obtaining practical and applied managerial experience. A paper or suitable project associated with a description and analysis of this experience is required. Only 3 credit hours may be applied toward the fulfillment of major requirements.
Non-Traditional Format: Internship.

MGMT 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field.
Non-Traditional Format: Honors thesis.

MGMT 5000. Special Topics in Management. 3 hours.
Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Individual study, readings, or projects under the direction of a faculty member in Management or Management Information Systems.
Non-Traditional Format: Directed study.

MGMT 5210. Materials Management. 3 hours.
Prerequisite: MGMT 3000.
The management of dependent and independent demand inventory items within a manufacturing environment and the examination of the management of finished goods items within a distribution environment. Emphasis is placed on a systems perspective.

MGMT 5220. Project Management. 3 hours.
Prerequisite: MGMT 3000.
The planning, scheduling, organizing, implementing, and controlling of single and multiple projects. Project management is an increasing area of concern and requires significantly different approaches to these traditional activities. This course explores traditional and new techniques for this dynamic environment.

MGMT 5230. Purchasing Management. 3 hours.
Prerequisite: MGMT 3000.
The purchasing function and related functions (traffic, receiving, and surplus material). The relationships among price, quality, and delivery service are illustrated. Japanese purchasing philosophy is contrasted to the United States philosophy in conjunction with techniques of negotiation, sourcing, value analysis, and engineering.

MGMT 5400. Strategic Management. 3 hours.
Not open to students with credit in MGMT 5400H.
Prerequisite: (MGMT 3000 and MARK 3000 and FINA 3000) or permission of department.
The processes by which managers formulate and implement corporate and business strategies in order to achieve the economic and non-economic objectives of their organizations. The course will integrate the students' knowledge of the basic functional disciplines into a general strategic perspective for managing the whole organization.

MGMT 5400H. Strategic Management (Honors). 3 hours.
Not open to students with credit in MGMT 5400.
Prerequisite: (MGMT 3000 and MARK 3000 and FINA 3000) or permission of Honors.
The strategic management processes by which managers formulate and implement corporate and business strategies in order to achieve the economic and non-economic objectives of their organizations. The course will integrate the students' knowledge of the basic functional disciplines into a general strategic perspective for managing the organization as a whole.

MGMT 5420. Business, Society, and Stakeholder Management. 3 hours.
Prerequisite: MGMT 3000.
Explores all aspects of the business and society relationship, including a study of corporate social performance. Focuses on businesses' interactions with key stakeholders, including governments, community, consumers, employees, and the natural environment. Examines corporate public policy from a strategic management perspective.

MGMT 5440. Business Ethics. 3 hours.
Prerequisite: MGMT 3000.
Designed to help students deal with the ethical implications of an increasingly complex business world. Covers methods for analyzing and applying personal values, recognizing organizational and environmental forces that influence ethical behavior, and heightening the student's abilities to recognize ethical issues and engage in effective moral debate in a business setting.

MGMT 5500. Entrepreneurship and New Venture Formation. 3 hours.
Prerequisite: (MGMT 3000 and MARK 3000 and FINA 3000) or permission of department.
The contributions that new ventures and small businesses make to the economy and society as a whole, the characteristics of successful entrepreneurs, the process of starting up new businesses, and the primary determinants of new venture performance. The primary course activity involves the preparation of a Business Plan for a "prospective" new venture.

MGMT 5530. Small Business Management. 3 hours.
Prerequisite: MGMT 3000.
The special challenges facing small businesses in today's society. Integrates from a general management perspective the functional knowledge gained in the areas of finance, economics, human resource management, marketing, and operations in order to help prepare the student to manage such businesses.

MGMT 5560. International Strategic Management. 3 hours.
Prerequisite: MGMT 3000.
The major problems that confront managers who operate across international boundaries from a base in a single country or who maintain affiliates and subsidiaries in several national jurisdictions. Major emphasis is given to the problems involved in crossing national boundaries.

MGMT 5580. Strategic Management of Nonprofit Organizations. 3 hours.
Prerequisite: MGMT 3000.
Strategic management of nonprofit organizations, from the entrepreneurship of start-up ventures to the evolving missions of established nonprofits. Specific attention is given to board roles, resource development, and fundraising, as well as to the history and legal basis of the nonprofit sector.

MGMT 5600. Special Topics in Management Information Systems. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: MGMT 4600 and MGMT 4610.
The management information systems field evolves rapidly and covers many topic areas. Recent developments in areas such as office automation, data communications, and the implementation of management information systems.

MGMT 5620. Building Decision Support Systems. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Decision support systems are the highest level of information support systems which aid the manager in the decision-making process. This course provides the student with the skills necessary to conceptualize, build, and implement decision support systems in organizations.

MGMT 5630. Building Knowledge-Based Systems. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Provides the student with knowledge engineering skills required to elicit and represent human knowledge, and to build, implement, and maintain knowledge-based systems in organizations.

MGMT 5640. Business Telecommunications and Networking. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Telecommunications concepts, communications architectures and protocols, commercial offerings, equipment, software, network design, and network management.

MGMT 5660. Rapid Application Development. 3 hours.
Prerequisite: MGMT 4620.
The use of rapid application development (RAD), prototyping, and end user development. Students use appropriate software tools to quickly build applications.

MGMT 5670. Managing the Information System Resource. 3 hours.
Prerequisite: MGMT 4620.
The issues and management techniques involved in administering the Information System/Resource activities in an organization. The focus is on computer-based resources and IS development activities. Management of IS professionals, development and management of project teams, user-professional relationships, emerging technologies, and planning processes. A sociotechnical perspective is emphasized.

MGMT 5680. Building Executive Support Systems. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Executive Information Systems (EIS) provide support to executives who have special information requirements to perform their job responsibilities. Organizational and technical concepts, development approaches, technologies, applications, and impacts are discussed. Hands-on experience is provided with several state-of-the-art EIS.

MGMT 5700. Using Business Application Software. 3 hours.
Not open to students with credit in MGMT 5710.
Prerequisite: MGMT 2090 and permission of department.
Using a variety of types of business application software to enable the student to be personally productive in the workplace by being able to gather data, analyze it, and present it to others. Popular software suites are covered as is the use of Internet software. (Cannot be taken for credit by MIS majors.)

MGMT 5710. Advanced Business Application Software. 3 hours.
Not open to students with credit in MGMT 5700.
Prerequisite: MGMT 4600 and MGMT 4610.
A variety of types of business application software that enable the student to be personally productive in the workplace by being able to gather data, analyze it, and present it to others. Students are expected to use programming and database skills to carry out these activities.

MGMT 5720. Collaborative Work Systems. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
People work in groups on common tasks. Collaborative computing, in particular, group support systems (GSS), provides support to groups of people. Organizational and technical concepts, development approaches, technologies, applications, and impacts are discussed. Hands-on experience is provided with several state-of-the-art GSS.

MGMT 5770. Advanced Software Development in Business. 3 hours.
Prerequisite: MGMT 4600 and MGMT 4610.
Multi-user operating systems and a leading personal computer programming language are used to create advanced software applications. The use of computers in networks are emphasized.

MGMT 5820. Human Resource Management. 3 hours.
Prerequisite: MGMT 3000.
An introduction to human resource management. Human resource planning, staffing, training and development, compensation, safety and health, and labor relations.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

MGMT 5860. Compensation and Performance Management. 3 hours.
Prerequisite: MGMT 3000 or permission of department.
The internal and external determinants of compensation within an organization. Job evaluation, pay structure, employee benefits, and the measurement of employee performance. The total compensation package, including monetary and nonmonetary rewards,will be analyzed as will problems encountered in managing the compensation system.

MGMT 5870. Recruitment, Selection, and Socialization. 3 hours.
Prerequisite: MGMT 3000 or permission of department.
Employee recruitment, selection, and socialization in-

struments and procedures. Effects of these instruments and procedures on individual and organizational effectiveness are emphasized. Exercises and projects will be used.

MGMT 5920. Organizational Behavior. 3 hours.
Prerequisite: MGMT 3000.
The interpersonal skills that promote individual, group, and organizational effectiveness. Basic concepts, theories, and practices needed to understand human behavior within work organizations. The class activities are varied and interactive, including experiential exercises, discussions, case analyses, and collaborative learning.

MGMT(SPCM) 5960. Organizational Communication. 3 hours.
Prerequisite: MGMT 3000 or permission of department.
Communication policies, procedures, and practices in administration. Students will have the opportunity to develop both written and oral communication skills and to identify philosophies, methods, and characteristics of management communication.

MGMT 5970. Organizational Change and Innovation Management. 3 hours.
Prerequisite: MGMT 3000.
Key concepts and theories in organizational change and development. The focus is on the student's development of diagnostic skills necessary for the identification of organizational problems and opportunities and the effective management of organizational change.

MGMT 5980. Leadership. 3 hours.
Prerequisite: MGMT 3000.
This course focuses on managerial leadership. A broad survey of theory, research, and practice on leadership in formal organizations. The topic of leadership effectiveness is at the core of this class. Case analyses, experiential exercises, and discussions are used to develop the personal and interpersonal skills needed in leadership roles.

(MIBO) Microbiology

College of Arts and Sciences, Department of Microbiology

MIBO 2500-2500L. Microbiology and Health Care. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (BIOL 1104-1104L and PHYS 1112-1112L) or (CHEM 1110 and CHEM 1110L).
Infectious diseases emphasizing the nature of the organisms, the interrelationship of microorganisms and human hosts, the prevention and control of infectious diseases, and a description of the important infectious diseases of humans.

MIBO 3500. Introductory Microbiology. 3 hours.
Prerequisite: BIOL 1108-1108L and CHEM 2211 and CHEM 2211L.
Prerequisite or corequisite: BCMB(BIOL)(CHEM) 3100.
Microorganisms, with special emphasis on bacteria, their structure, function, diversity, and importance to man.

MIBO 3510L. Introductory Microbiology Laboratory. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: BIOL 1108-1108L and CHEM 2211 and CHEM 2211L.
Prerequisite or corequisite: MIBO 3500 and BCMB(BIOL)(CHEM) 3100.
General laboratory techniques in experimental microbiology with emphasis on microscopic, morphological, and biochemical analysis.

MIBO 3510H. Introductory Microbiology Laboratory (Honors). 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MIBO 3500 and BCMB(BIOL)(CHEM) 3100 and permission of Honors.
General laboratory techniques in experimental microbiology with an emphasis on the isolation, identification, and characterization of bacteria.

MIBO 3900. Directed Study. 3 hours.
Prerequisite: Permission of department.
Independent research in the primary literature in selected areas of microbiology.
Non-Traditional Format: Directed study.

MIBO 4010/6010. Critical Review of Research in Microbiology. 2 hours. Repeatable for maximum 6 hours credit.
Prerequisite: MIBO 3500 and permission of department.
Corequisite: MIBO 4900L or MIBO 4960H or MIBO 4970H or MIBO 4980H or MIBO 4990H.
Critical analysis and discussion of recent advances in microbiology research through oral presentation. Specific topics may vary but will emphasize molecular biology, physiology, and ecology of prokaryotes.

(MIBO)FDST 4030/6030-4030L/6030L. Food Microbiology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Interactions of microorganisms with food and the implications of these interactions for food preservation, safety, and fermentations. Pathogenic microorganisms associated with food. Analysis of foods for the presence of microorganisms.

MIBO 4090/6090. Prokaryotic Biology. 3 hours
Prerequisite: MIBO 3500
Ultrastructure, physiology, genetics, ecology, and phylogeny of bacteria and archaea.

(MIBO)CBIO 4100/6100. Immunology. 3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and GENE (BIOL) 3200.

Immunology from an experimental perspective. Anatomy, development, and function of the immune system. Immune system in infectious diseases. Mechanisms and pathogenesis of immunological disorders. Evolution of immunological concepts.

(MIBO)FDST 4120/6120-4120L/6120L. Food Fermentations. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500.
Microbial and technical aspects of dairy, vegetable, meat, grain, and fruit fermentations. Products studied include cheese, sausage, beer, wine, and soy sauce.

MIBO 4220/6220. Pathogenic Bacteriology. 3 hours.
Prerequisite: MIBO 3500.
Molecular basis of bacterial virulence: identification of virulence factors, genetic regulation of virulence, and the complex interactions between bacterial pathogens and their hosts.

MIBO 4300/6300. Environmental Microbiology and Biotechnology. 3 hours.
Prerequisite: MIBO 3500.
Microorganisms used in biotechnology, agriculture, bioremediation, and industry; distribution, taxonomy, and physiology of environmentally significant microorganisms.

(MIBO)FDST(EHSC) 4310/6310-4310L/6310L. Environmental Microbiology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Types of microorganisms in the environment; effect of environmental conditions on microbial existence; public health aspects of environmental microbiology; applications of microorganisms to solve environmental problems.

(MIBO)FDST(EHSC) 4320/6320-4320L/6320L. Microbiology of Food Sanitation. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: MIBO 3500.
Microorganisms and practices important in food industry sanitation and safety; microorganisms involved and control measures taken to prevent food borne illness, with emphasis on food process operations.

MIBO 4400L/6400L. Experimental Pathogenic Bacteriology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MIBO 4220/6220 and GENE(BIOL) 3200 and BCMB(BIOL)(CHEM) 3100.
Bacterial virulence factors and dynamic interactions between bacteria and their hosts.

MIBO 4600L/6600L. Microbial Physiology Laboratory. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: (MIBO 3500 and MIBO 3510L) or permission of department.
Prerequisite or corequisite: MIBO 4220/6220.
Experimental design, execution, and interpretation as applied to microbial growth, metabolism, and diversity.

(MIBO)CRSS 4610/6610-4610L/6610L. Soil Microbiology. 3 hours. 1 hour lecture and 2 lab periods of 2 hours each per week.
Microorganisms in soil and their effect on nutrient recycling, especially as it relates to environmental quality and crop production.

(MIBO)MARS 4620/6620-4620L/6620L. Microbial Ecology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: MIBO 3500 or permission of department.
Emphasizes the roles of microorganisms in ecosystems. Nutrient cycles, methods of microbial analysis, and the functional roles of microorganisms.

MIBO 4700/6700-4700L/6700L. Medical Mycology. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MIBO 3500.
The yeasts, molds, and actinomycetes most likely to be encountered by a medical mycologist in a diagnostic laboratory, with special emphasis on the organisms which are pathogenic for man and other animals.

MIBO 4800L/6800L. Microbial Genetics Laboratory. 3 hours. 3 lab periods of 2 hours each per week.
Prerequisite: (MIBO 3510L and GENE(BIOL) 3200) or permission of department.
Genetic analysis of bacteria, with emphasis on isolating mutants and mapping, characterizing, and cloning genes.

MIBO 4900L. Directed Research. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent laboratory research in microbiology under the direction of a faculty member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

MIBO 4960H. Honors Research. 3 hours.
Prerequisite: MIBO 3510L and permission of Honors.
Independent laboratory research for students in microbiology, under the direction of a faculty member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

MIBO 4970H. Honors Research. 3 hours.
Prerequisite: MIBO 4960H and permission of Honors.
Independent laboratory research for students in microbiology, under the direction of a faculty member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

MIBO 4980H. Honors Research. 3 hours.
Prerequisite: MIBO 4970H and permission of Honors.
Independent laboratory research for students in Microbiology, under the direction of a faculty member.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

MIBO 4990H. Honors Thesis. 3 hours.
Prerequisite: MIBO 4090/6090 and MIBO 4960H and permission of Honors.
Preparation of Honors thesis in microbiology under the direction of a faculty member. The final course in Honors research.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(MILS) Military Science

Division of the Armed Services, Department of Military Science

MILS 1010. Introduction to the Army I. 2 hours.
The study of the organization, constitutional basis, and interrelationships of the United States Army, Army Reserves, and National Guard. An introduction of United States military weapon systems, task force organization, and the conduct of military operations. Familiarization of basic military skills such as first aid, drill and ceremonies, and radio communications.

MILS 1020. Introduction to the Army II. 2 hours.
The further study of basic military skills with special emphasis on basic rifle marksmanship and small unit tactics. Introduction to threat-nation weapons systems, equipment, and organizations. Analysis of recent or ongoing military operations worldwide.

MILS 2010. Advanced Military Skills I. 2 hours.
Advanced first aid skills and an introduction to the art of basic map reading and land navigation including the study of topographic maps, terrain evaluation and the use of a lensatic compass. Students will also receive preliminary instruction on orienteering and associated skills.

MILS 2020. Advanced Military Skills II. 2 hours.
Small unit tactics, operations, and troop leading procedures to include the combined arms teams to the platoon with primary emphasis on the rifle squad; a study of military leadership and leadership assessment, with an emphasis on the role of officers and non-commissioned officers in the United States Army.

MILS 3010. Applied Leadership and Management I. 3 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: MILS 1010 and MILS 1020 and MILS 2010 and MILS 2020 and permission of department.
Psychological, physiological, and sociological factors which affect human behavior. Analysis of leadership and management processes. Techniques in planning, presenting, and evaluating performance instruction, to include practical application.

MILS 3020. Applied Leadership and Management II. 3 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: MILS 1010 and MILS 1020 and MILS 2010 and MILS 2020 and permission of department.
Tactics applied at the platoon and company level to include a study of the modern battlefield and current military tactical doctrine. Planning, directing, and coordinating the efforts of individuals and small units in the execution of offensive and defensive tactical missions.

MILS 4010. Seminar in Leadership and Management I. 3 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: MILS 3010 and MILS 3020 and permission of department.
Analysis of selected leadership and management problems. Responsibilities of the commander and staff in areas of personnel, intelligence, operations, logistics, and administration of military law. Also a study of the inter-relationships of the military team.

MILS 4020. Seminar in Leadership and Management II. 3 hours. 3 hours lecture and 2 lab periods of 1 hour each per week.
Prerequisite: MILS 3010 and MILS 3020 and permission of department.
Practical applications of duties and responsibilities of United States Army second lieutenants, with an emphasis on ethics and personnel actions. Analysis of military principles and doctrine by studying an actual battle and conducting a battle staff ride.

MILS 5010. Directed Studies in Military Science I. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: MILS 4010 and MILS 4020 and permission of department.
Special projects designed to develop skills beyond those taught in the standard ROTC program.

MILS 5020. Directed Studies in Military Science II. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: MILS 4010 and MILS 4020 and permission of department.
Special projects designed to develop skills beyond those taught in the standard ROTC program.

(MMIB) Medical Microbiology

College of Veterinary Medicine, Department of Medical Microbiology

MMIB 4100/6100-4100L/6100L. Medical Immunology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in CBIO(MIBO) 4100/6100.
Prerequisite: MIBO 3500 and BCMB(BIOL/CHEM) 3100.
The mechanism of the immune response, host resistance to infection, serologic testing methods, and in vitro cellular testing procedures.

MMIB 4220/6220. Pathogenic Bacteriology. 3.3 hours.
The morphological, physiological, and pathogenic mechanisms of the important pathogenic bacterial agents; their relation to health and disease.

MMIB 4390/6390-4390L/6390L. Clinical Diagnostic Microbiology. 3 hours. 3 hours lecture and 2 lab periods of 2 hours each per week.
Prerequisite: MMIB 4220/6220.
The application of basic diagnostic problems associated with the recovery of disease organisms from clinical material. Methodology and problems involved in laboratory isolation and identification. Methods will also include molecular and automated applications.

MMIB 4450/6450. Molecular Bacteriology. 3 hours.
Not open to students with credit in MIBO 4800L/6800L.
Prerequisite: MIBO 3500.
Techniques involved in identifying bacterial genes and discerning their function. The general principles behind cloning, nucleic acid hybridizations, and PCR. Issues concerning scientific integrity and patent issues.

MMIB 4500/6500-4500L/6500L. Virology. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: [MIBO 3500 and BCMB(BIOL)(CHEM) 3100] or permission of department.
The basic principles and concepts of virology. The major emphasis will be on vertebrate viruses. Subjects covered in this course include classification, replication, diagnosis, quantification, pathogenesis, epidemiology, and viral neoplasia.

MMIB 4800/6800. Environmental Epidemiology. 3 hours.
Prerequisite: Permission of department.
The basics of epidemiology, relying on the Principles of Epidemiology Homestudy Manual from the Centers for Disease Control and Prevention. Utilizing this manual and lecture material, the students will understand how to incorporate epidemiologic tools into handling environmental health related concerns; topical infectious diseases.

(MSIT) Management Sciences and Information Technology

Terry College of Business, Department of Insurance, Legal Studies, Real Estate and Management Science

MSIT 3000. Statistical Analysis for Business I. 3 hours.
Not open to students with credit in STAT 4210 or MSIT 3000H.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L.
Application of statistics to business. Descriptive statistics, sampling procedures, random variables, sampling distributions of the means and proportions, estimation and inference, simple linear regression, an introduction to multiple regression, and categorical data models are emphasized. A current statistical software package for microcomputers is utilized to analyze business data.

MSIT 3000H. Statistical Analysis for Business I (Honors). 3 hours.
Not open to students with credit in STAT 4210 or MSIT 3000.
Prerequisite: ACCT 2101 and MGMT 2090 or CSCI 1100-1100L and permission of Honors.
Application of statistics to business. Descriptive statistics, sampling procedures, random variables, sampling distributions of the means and proportions, estimation and inference, simple linear regression, an introduction to multiple regression, and categorical data models are emphasized. A current statistical software package for microcomputers is utilized to analyze business data.

MSIT 4130. Statistical Analysis for Business II. 3 hours.
Prerequisite: MSIT 3000.
Application of statistics to business. Inference and estimation of parameters from two populations. Multiple regression, forecasting and time series and analysis of categorical data. A current statistical software package for microcomputers is utilized to analyze business data.

MSIT 4900H. Internet Connectivity and the Corporate Computer Resource (Honors). 3 hours.
Prerequisite: Permission of Honors.
Large-corporation computing resource model consisting of a mission critical mainframe or supercomputing core, Sun-type workstations for the technical staff, networks of PCs and Macs, and Internet usage across the rest of the organization. Hands-on usage of prominent software packages at each level and the sharing of files across platforms.

MSIT 5130. Spreadsheets as a Management Science Tool. 3 hours.
Prerequisite: MSIT 3000.
The formulation and application of management science models, and their implementation via spreadsheets, to problems in business. Linear, integer and nonlinear optimization models; network flow, and multicriteria models; waiting line, inventory and other stochastic models; simulation analysis.

MSIT 5470. Artificial Intelligence in Business. 3 hours.
Prerequisite: MSIT 5130.

Role of artificial intelligence and expert systems in business. Emphasis is on artificial intelligence and on the design, testing, validation, and use of expert systems. Computer-based projects and the study of existing systems will be employed to reinforce concepts.

MSIT 5990. Directed Study in Management Science. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Field study projects or individually investigated specialized areas in management science under faculty direction.
Non-Traditional Format: Individually directed research projects outside of traditional classroom environment.

(MUSI) Music

College of Arts and Sciences, School of Music

MUSI 1100. Music Theory I. 3 hours.
Prerequisite: Permission of department.
Corequisite: MUSI 1110.
Music fundamentals and the beginning of diatonic harmony, part-writing, and analysis. Includes survey of music literature involving European, World, and American traditions.

MUSI 1110. Aural Skills I. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: MUSI 1100.
Fundamentals of ear training involving aural perception of materials of Music Theory I. Laboratory in aural skills drill and keyboard harmony included.

MUSI 1120. Music Theory II. 3 hours.
Prerequisite: MUSI 1100 and MUSI 1110.
A continuation of the material of Music Theory I through more complex diatonic part-writing and analysis through beginning chromatic harmony and analysis. Keyboard harmony work is included.

MUSI 1130. Aural Skills II. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: MUSI 1100 and MUSI 1110.
Ear training involving diatonic and beginning chromatic materials.

MUSI 1810. Applied Music Instruction. 1-3 hours.
Prerequisite: Permission of department.
Applied instruction in a musical instrument or voice for the first semester of the freshman year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 1820. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 1810 or permission of department.
Applied instruction in a musical instrument or voice for the second semester of the freshman year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 2020. Introduction to Music. 3 hours.
The art of music listening involving study of the evolution of a wide range of musical styles from both western and non-western traditions. The course's approach is substantially chronological with elements of music also being covered.

MUSI 2040. History of Popular Music. 3 hours. Repeatable for maximum 6 hours credit.
Rotating subjects in popular music, drawing upon a wide variety of influences and ethnicities. Course content will be drawn from such topics as jazz, Hispanic styles and influences, folksong, and American musical theatre.

MUSI 2060. History of Rock and Roll. 3 hours.
Rock and roll music from its origins to the present. The sociology and origins from African American Blues to present styles and the role of Georgia and Athens in the current music scene.

MUSI 2080. African American Music. 3 hours.
African American music and musical influences involving serious and popular styles and approaches. Jazz and blues influences, slave traditions, and early vaudeville and other music for the stage, sacred and secular vocal/choral traditions ranging from European influences to concert spirituals.

MUSI 2100. Music Theory III. 3 hours.
Prerequisite: MUSI 1120 and MUSI 1130.
Chromatic harmony involving part-writing, composition, and analysis.

MUSI 2110. Aural Skills III. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: MUSI 1130 or permission of department.
Corequisite: MUSI 2100.
Ear training involving chromatic melodic and harmonic materials.

MUSI 2120. Music Theory IV. 3 hours.
Prerequisite: (MUSI 2100 and MUSI 2110) or permission of department.
Advanced chromatic harmony and contemporary compositional methods and materials.

MUSI 2130. Aural Skills IV. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.

Prerequisite: (MUSI 2100 and MUSI 2110) or permission of department.
Ear training involving advanced chromatic harmony and contemporary materials.

MUSI 2200H. History and Analysis of Music (Honors). 3 hours.
Not open to students with credit in MUSI 2020.
Prerequisite: Permission of Honors.
Elements of music and the broad evolution of musical styles from both western and non-western traditions. After learning a basic vocabulary and surveying major periods in music history, students will explore individual musical topics and participate in class discussions on the creation, performance, and reception of music.

MUSI 2400. Voice Class I. 1 hour.
Prerequisite: Permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2410. Voice Class II. 1 hour.
Prerequisite: MUSI 2400 or permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2420. Voice Class III. 1 hour.
Prerequisite: MUSI 2410 or permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2430. Voice Class IV. 1 hour.
Prerequisite: MUSI 2420 or permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2440. Voice Class V. 1 hour.
Prerequisite: MUSI 2430 or permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2450. Voice Class VI. 1 hour.
Prerequisite: MUSI 2440 or permission of department.
Basic principles and methods of vocal performance and pedagogy.

MUSI 2460. Voice Class for the Non-Music Major. 1 hour. Repeatable for maximum 2 hours credit.
Basic principles and methods of vocal performance and pedagogy for the non-music major.

MUSI 2500. Piano Class I. 1 hour.
Prerequisite: Permission of department.
Functional keyboard skills for satisfying the piano proficiency requirement.

MUSI 2510. Piano Class II. 1 hour.
Prerequisite: MUSI 2500 or permission of department.
Functional keyboard skills for satisfying the piano proficiency requirement.

MUSI 2520. Piano Class III. 1 hour.
Prerequisite: MUSI 2510 or permission of department.
Functional keyboard skills for satisfying the piano proficiency requirement.

MUSI 2530. Piano Class IV. 1 hour.
Prerequisite: MUSI 2520 or permission of department.
Functional keyboard skills for satisfying the piano proficiency requirement. The exam for this semester is the piano proficiency.

MUSI 2540. Piano Class V. 1 hour.
Prerequisite: MUSI 2530 or permission of department.
Functional keyboard skills for students who have completed the piano proficiency requirement.

MUSI 2550. Piano Class VI. 1 hour.
Prerequisite: MUSI 2540 or permission of department.
Functional keyboard skills for students who have completed the piano proficiency requirement.

MUSI 2700. Men's Glee Club. 1 hour. Repeatable for maximum 4 hours credit.
Concentration on choral literature for men's voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 2710. Women's Glee Club. 1 hour. Repeatable for maximum 4 hours credit.
Concentration on choral literature for women's voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 2720. Concert Band. 1 hour. Repeatable for maximum 4 hours credit.
A concert band open to all students who have had previous experience in instrumental music.

MUSI 2730. African American Choral Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
A choral ensemble performing traditional and contemporary black gospel, spiritual, and popular music, and music by contemporary black composers.

MUSI 2740. University Symphony Orchestra. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
A course for instrumentalists who can qualify.

MUSI 2750. University Chorus. 1 hour. Repeatable for maximum 4 hours credit.
Concentration on choral literature for mixed voices from all periods of music history, including sacred, secular, and popular music.

MUSI 2760. Concert Choir. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Concentration on choral literature for mixed voices from all periods of music history, including sacred, secular, and popular music. Audition is required.

MUSI 2770. University Band. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Instrumental performance organization open to students who can qualify by audition.

MUSI 2780. Jazz Bands. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Jazz ensemble with improvisation laboratory. Audition is required.

MUSI 2800. Contemporary Chamber Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Concentration on modern literature for small and large ensembles. Open to students who can qualify by audition.

MUSI 2810. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 1820 or permission of department.
Applied instruction for music majors in a musical instrument, voice, or composition for the first semester of the sophomore year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 2820. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 2810 or permission of department.
Applied instruction for music majors in a musical instrument, voice, or composition for the second semester of the sophomore year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 2840. Symphonic Wind Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Mixed woodwind-brass-percussion ensemble for the study and performance of wind chamber compositions with concentration on advanced scores. Professional level experience.

MUSI 2850. Opera Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Performance of operatic literature.
Non-Traditional Format: This is a performance group that requires additional rehearsal time to function. The additional time will account for what would ordinarily be homework in regular courses. This format is typical of institutions of our size that offer this class.

MUSI(AFAM) 2960. African American Percussive Music: From Africa to the Americas. 3 hours. Repeatable for maximum 6 hours credit.
Traditional and contemporary African American percussion music beginning with its African heritage and tracking its development throughout the Americas, with particular emphasis on the United States. Teaching/learning strategies include in-class performance, demonstrations, audiovisuals, and lectures. No previous music performance background is required.

MUSI 3020. World Music Survey. 3 hours.
The full spectrum of music traditions in non-western high cultures and non-literate societies and an exploration of their structural and symbolic relations to western music.

MUSI 3050. Music Skills and Fundamentals for Elementary School Teachers. 3 hours.
Prerequisite: Permission of department.
The basic skills and fundamentals of music for the elementary and early childhood classroom teacher.

MUSI 3110. Music Techniques and Experiences for Children. 3 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or permission of department.
Corequisite: MUSI 3120.
Methods and field experience for music education majors. Course consists of a survey of effective teaching techniques, research in learning, and materials, including use of technology and multicultural materials.

MUSI 3120. Music Literature for Children. 2 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or permission of department.
Music literature available for use in public school at all levels of instruction for band, orchestra, and/or chorus.

MUSI 3130. Choral Techniques and Field Experience. 3 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or permission of department.
Methods and field experience for music education majors with specialization in choral music. Course involves effective teaching techniques, research in teaching/learning, and materials, including technology and multicultural materials.

MUSI 3140. Choral Literature. 2 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or permission of department.
Music literature available for use in public school at all levels of instruction for chorus. This course is for music education majors with choral emphasis.

MUSI 3150. Instrumental Techniques and Field Experience. 3 hours.
Prerequisite: MUSI 3110 and MUSI 3120 and permission of department.
Methods and field experience for instrumental music

education majors. Course involves effective teaching techniques, research in teaching/learning, and materials, including technology and multicultural materials.

MUSI 3160. Instrumental Literature. 2 hours.
Prerequisite: MUSI 3110 and MUSI 3120 and permission of department.
Prerequisite or corequisite: MUSI 3150.
Instrumental music literature available for use in public school at all levels of instruction. This course is for music education majors with instrumental emphasis.

MUSI 3190. Composition Lab. 1 hour. Repeatable for maximum 6 hours credit.
Not open to students with credit in MUSI 1810.
Elementary exercises and study of composition for non-music majors and music majors not majoring in composition.

MUSI 3210. Music History I. 3 hours.
Prerequisite: MUSI 2120 and MUSI 2130.
History of western music from its beginnings through the Baroque era.

MUSI 3220. Music History II. 3 hours.
Prerequisite: MUSI 2120 and MUSI 2130.
The history of western music from the Classical style period to the present day.

MUSI 3240. Instrumentation and Arranging. 1 hour.
Prerequisite: MUSI 2120 and MUSI 2130.
Basic instrumentation for all instruments (including basic vocal types) involving ranges, characteristics, and basic arranging.

MUSI 3400. Guitar Techniques. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Basic principles and methods of guitar performance and pedagogy.

MUSI 3410. String Instrumental Techniques. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Basic principles and methods of string performance and pedagogy.

MUSI 3420. Woodwind Instrumental Techniques. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Basic principles and methods of woodwind performance and pedagogy.

MUSI 3430. Brass Instrumental Techniques. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Basic principles and methods of brass instrument performance and pedagogy.

MUSI 3440. Percussion Techniques. 1 hour. Repeatable for maximum 2 hours credit.
Prerequisite: Permission of department.
Basic principles and methods of percussion performance and pedagogy.

MUSI 3450. Vocal Pedagogy. 2 hours.
Prerequisite: Permission of department.
Survey course in the study of vocal pedagogy, taught in conjunction with Vocal Pedagogy.

MUSI 3460. Piano Pedagogy I. 1-2 hours.
Prerequisite: Permission of department.
Piano teaching, surveying elementary methods and materials for teaching beginners.

MUSI 3470. Keyboard Musicianship. 1 hour.
Prerequisite: Permission of department.
Functional keyboard skills for satisfying the piano proficiency for piano majors with special focus on sight-reading skills.

MUSI 3480. Introduction to Conducting. 2 hours.
Prerequisite: Permission of department.
Basic principles, techniques, and methods of conducting and interpretation.

MUSI 3490. Choral Conducting. 2 hours.
Prerequisite: MUSI 3480.
Rehearsal, interpretive and conducting techniques, and methods for choral organizations.

MUSI 3500. Band Conducting. 2 hours.
Prerequisite: MUSI 3480.
Rehearsals, interpretive and conducting techniques, and methods for band organizations.

MUSI 3510. Orchestra Conducting. 2 hours.
Prerequisite: MUSI 3480.
Rehearsal, interpretive and conducting techniques, and methods for orchestra.

MUSI 3520. Piano Accompanying. 1 hour.
Prerequisite: MUSI 3470.
Practical experience in chamber music, piano duets, and accompanying.

MUSI 3550. Music Theory for Non-Majors. 3 hours.
Not open to students with credit in MUSI 1100 or MUSI 1110.
The fundamentals of music and their application in composition and analysis.

MUSI 3800. Applied Music Instruction for Music Minors. 1-2 hours. Repeatable for maximum 16 hours credit.
Not open to students with credit in MUSI 3810 or MUSI 3820.
Prerequisite: Permission of department.
Applied instruction for music minors in a musical instrument or voice.
Non-Traditional Format: One-hour or thirty minute weekly lessons in a major or secondary applied instrument, voice, or composition. Credit hours vary according to student ability and reflect differing performance expectations and literature difficulty.

MUSI 3810. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 2820.
Applied instruction for music majors in a musical instrument, voice, or composition for the first semester of the junior year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 3820. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 3810.
Applied instruction for music majors in a musical instrument, voice, or composition for the second semester of the junior year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 3830. String Pedagogy. 2 hours.
Prerequisite: Permission of department.
Instruction in pedagogy for all bowed string instruments. Class and studio teaching methods will be explored.

MUSI 3910. Junior Recital in Music. 1 hour.
Prerequisite: MUSI 2820 or MUSI 3810.
Corequisite: MUSI 3810 or MUSI 3820.
Required recital for music majors in a musical instrument, voice, or composition.

MUSI 4000. Directed Independent Study in Music. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent research topics in any field of music directed by a faculty member.
Non-Traditional Format: Directed independent study.

MUSI 4050. Music Theory Review. 2 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Visual and aural skills for entering graduate students in need of remediation.

MUSI 4100/6100. Tonal Theory and Analysis. 2 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Chromatic harmonic analysis and analytical methods.

MUSI 4110/6110. Introduction to Counterpoint. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Analysis and composition using sixteenth and eighteenth-century compositional techniques.

MUSI 4120/6120. Form and Analysis. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Analysis of form focusing on music from the seventeenth, eighteenth, and nineteenth centuries.

MUSI 4130/6130. Electronic Music Composition I. 3 hours.
Prerequisite: (MUSI 2120 and MUSI 2130) or MUSI 4050.
Electronic music techniques, focusing on classical and MIDI applications.

MUSI 4200/6200. Ancient, Medieval, and Renaissance Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Music from Greek and Roman society to ca. 1600.

MUSI 4210/6210. Music in the Baroque Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Musical styles and forms from Monteverdi through Bach and Handel.

MUSI 4220/6220. Music in the Classic Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Chamber, orchestral, keyboard, and operatic works from the middle and late eighteenth century.

MUSI 4230/6230. Music in the Romantic Period. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Emphasis on the development of song, symphony, chamber music, and opera.

MUSI 4240/6240. Modern Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Modern trends in music from Schoenberg, Stravinsky, Hindemith, and Bartok to the present.

MUSI 4250/6250. Women and Music. 3 hours.
Prerequisite: (MUSI 3210 and MUSI 3220) or permission of department.
Roles of women in music, including the history of women musicians in western art music, world cultures, and popular music; gender studies in music.

MUSI 4260/6260. Opera Literature. 2 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Representative operas from the Baroque era to the twentieth century.

MUSI 4270/6270. Non-Western Music. 3 hours.
Prerequisite: MUSI 3210 and MUSI 3220.
Music of non-European cultures, including those of the Far East, Near East, and Africa.

MUSI 4280/6280. Instrumental/Vocal/Choral Literature. 2 hours.
Prerequisite: (MUSI 3210 and MUSI 3220) or permission of department.
Solo, sonata, and ensemble music composed for winds, brass, strings, piano and harpsichord, organ or voice, dating from the earliest appropriate period to the present.

MUSI 4460. Piano Pedagogy II. 1-2 hours.
Prerequisite: MUSI 3460.
Survey of supplementary teaching materials for elementary and intermediate level piano students.

MUSI 4700. Men's Glee Club. 1 hour. Repeatable for maximum 4 hours credit.
Concentration on choral literature for men's voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4710. Women's Glee Club. 1 hour. Repeatable for maximum 4 hours credit.
Concentration on choral literature for women's voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4720. Concert Band. 1 hour. Repeatable for maximum 4 hours credit.
A concert band open to all students who have previous instrumental experience.

MUSI 4730/6730. African American Choral Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Performance of traditional and contemporary black gospel, spiritual, and popular music.

MUSI 4740/6740. University Symphony Orchestra. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of orchestral literature of various styles and genres.

MUSI 4750/6750. University Chorus. 1 hour. Repeatable for maximum 8 hours credit.
Performance of choral literature for mixed voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4760/6760. Concert Choir. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of choral literature for mixed voices from all periods of music history, including sacred, secular, folk, and popular music.

MUSI 4770. University Band. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Instrumental group open to students who can qualify.

MUSI 4780/6780. Jazz Bands. 1 hour. Repeatable for maximum 8 hours credit.
Performance of works in a variety of jazz idioms and styles with emphasis on big band jazz.

MUSI 4790/6790. Chamber Music Ensemble. 1 hour
Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Chamber music experiences in variable instrumental categories (percussion, clarinet, trombone, etc.)

MUSI 4800/6800. Contemporary Chamber Ensemble. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of modern literature for small and large ensembles.

MUSI 4810. Applied Music Instruction. 1-3 hours.
Prerequisite: (MUSI 3820 and MUSI 3910) or permission of department.
Applied instruction for music majors in a musical instrument, voice, or composition for the first semester of the senior year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 4820. Applied Music Instruction. 1-3 hours.
Prerequisite: MUSI 4810 or permission of department.
Applied instruction for music majors in a musical instrument, voice, or composition for the second semester of the senior year.
Non-Traditional Format: One-hour weekly lessons in a major or secondary applied instrument, voice, or composition for two and three credit hour students; thirty minute lessons for one credit hour students. Credit hours vary according to degree program and reflect differing performance expectations and literature difficulty.

MUSI 4830/6830. Collegium Musicum. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of early music through the Baroque.

MUSI 4840/6840. Symphonic Wind Ensemble. 1 hour. Repeatable for maximum 8 hours credit.
Prerequisite: Permission of department.
Performance of wind chamber compositions with concentration on advanced scores.

MUSI 4850/6850. Opera Ensemble. 1 hour. Repeatable for maximum 4 hours credit.
Prerequisite: Permission of department.
Performance of operatic literature.
Non-Traditional Format: This is a performance group that requires additional rehearsal time to function. The additional time will account for what would ordinarily be homework in regular courses.

MUSI 4960H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and senior standing.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

MUSI 4970H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: MUSI 4960H and permission of Honors and senior standing.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

MUSI 4980H. Directed Readings and/or Projects (Honors). 3 hours.
Prerequisite: MUSI 4970H and permission of Honors and senior standing.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

MUSI 4990H. Honors Thesis. 3 hours.
Prerequisite: MUSI 4980H and permission of Honors.
Honors thesis based upon independent research in music or closely related field carried out under the direction of a faculty member.
Non-Traditional Format: Honors thesis.

MUSI 5110/7110. Music for Childhood. 3 hours.
Prerequisite: MUSI 3110 and MUSI 3120.
Literature, techniques, and methodologies for teaching children music in a diverse society; a study of children's musical development.

MUSI 5120/7120. Teaching Music for Early Childhood Teachers. 3 hours.
Prerequisite: MUSI 3050.
Music teaching techniques, methods, and materials for the early childhood teacher. For education majors only.

MUSI 5130/7130. Early Childhood Musical Development. 3 hours.
Prerequisite: MUSI 3110 and MUSI 3120.
Musical development of children from birth through age eight years emphasizing auditory perception, auditory discrimination, responses of children to music, modes of learning music, and children's acquisition of musical performance skills, and understandings.

MUSI 5140/7140. Computer-Assisted Instruction in Music. 2 hours.
Prerequisite: MUSI 2120 and MUSI 2130.
Programming and testing CAI music lessons.

MUSI 5260/7260. Marching Band Techniques. 2 hours.
Methods and techniques for organizing and training marching bands; planning music, drills, formations, and shows.

MUSI 5270/7270. Advanced Conducting. 2 hours.
Prerequisite: MUSI 3490 or MUSI 3500 or MUSI 3510.
Choral and instrumental conducting methods and techniques with application in laboratory situations.

MUSI 5280/7280. Instrumental Techniques. 1 hour.
Repeatable for maximum 4 hours credit.
Performance techniques and teaching methods for wind, string, and percussion instruments.

MUSI 5290/7290. Jazz Piano Improvisation Class. 2 hours.
Skills and techniques in keyboard jazz playing based upon a knowledge of modern popular harmonic and notational practices.

MUSI 5340/7340. Choral Literature and Performance Practice. 2 hours.
Prerequisite: MUSI 3130 and MUSI 3140.
Choral music, including multicultural materials, suitable for all levels and voices.

MUSI 5350/7350. Instrumental Literature and Performance Practice. 2 hours.
Prerequisite: MUSI 3150 and MUSI 3160.
Instrumental music, including multicultural materials, suitable for all levels of instruction for band, orchestra, and chamber music.

MUSI 5400/7400. Principles of Music Therapy. 3 hours.
Music as human behavior and its uses as therapeutic intervention with various populations.

MUSI 5410/7410. Psychology of Music. 3 hours.
Prerequisite: MUSI 5400/7400.
Acoustical and psychological aspects of music with emphasis upon problems of perception, experimental aesthetics, musical function, measurement and diagnosis of musical ability.

MUSI 5420/7420. Influence of Music on Behavior. 3 hours.
Prerequisite: MUSI 5410/7410.
Physiological effects of music, the relation of music to health, and the place of music in the habilitative and rehabilitative process.

MUSI 5430/7430. Clinical Experience. 2 hours.
Prerequisite: MUSI 5400/7400 or MUSI 5420/7420 or MUSI 5440/7440.
Practical application of music therapy in an assigned clinic, along with seminars to analyze effectiveness, in-depth interactions, intervention strategies, and accountability measures.

MUSI 5440/7440. Music in Recreation. 2 hours.
Prerequisite: MUSI 2120 or MUSI 2130 or MUSI 2530 or MUSI 3480.
Methods of song leading and accompanying on the autoharp, guitar, and piano.

MUSI 5450/7450. Music for Exceptional Children. 3 hours.
Prerequisite: Junior standing and permission of department.
Trends in special education, characteristics and needs of those classified as exceptional, curriculum development, and intervention strategies. Mainstreamed and self-contained settings will be discussed.

MUSI 5730/7730. Electronic Music Composition II. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: MUSI 4130/6130.
Electronic music compositional techniques, focusing on digital sound recording, sampling, and editing. Students will use highly advanced recording and editing software on a high-speed computer.

MUSI 5910. Senior Recital in Music. 1-2 hours.
Prerequisite: MUSI 3820 or MUSI 4810.
Corequisite: MUSI 4810 or MUSI 4820.
Required recital for music majors in a musical instrument, voice, or composition, normally taken during the first or second semester of the senior year.
Non-Traditional Format: Credit varies according to degree program, reflective of difficulty of literature and level of performance expectations.

(PATH) Plant Pathology

College of Agricultural and Environmental Sciences, Department of Plant Pathology

PATH(ANTH)(BTNY) 3010. Fungi: Friends and Foes. 3 hours.
Impact of fungi on human affairs. Historical and current uses of fungi by humans as well as the roles of fungi in various ecosystems.

(PATH)CRSS(ENTO) 3500. Turfgrass Pest Management. 3 hours.
Prerequisite: CRSS 2830 or CRSS 3270-3270L.
Identification and control of turfgrass weeds, insects, and diseases. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests.

PATH 3530-3530L. Introductory Plant Pathology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Principles and concepts of plant pathology, including disease development, environmental interactions, microbial biology and life cycles, and disease control strategies. Broad concepts rather than diagnosis and control of specific diseases.

PATH 3830-3830L. Forest Pathology. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Identification of forest diseases, assessment of their potential impacts, and management strategies.

PATH 3910. Plant Pathology Internship. 3 hours.
Practical experience on the application of plant pathological principles and procedures learned outside of a formal classroom setting.
Non-Traditional Format: The student will spend the semester in either a university or industry setting obtaining hands-on experience in plant pathology.

PATH 3990. Special Problems in Plant Pathology. 1-3 hours. Repeatable for maximum 6 hours credit.
Research or intensive study in a special area of plant pathology, including forest pathology, mycology, nematology, virology, bacteriology, and host-pathogen interactions.
Non-Traditional Format: The student will spend the semester conducting a special problem under the direction of a faculty member.

PATH(BTNY) 4200/6200-4200L/6200L. Introductory Mycology. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Morphology, biology, and taxonomy of fungi. Representatives of all major groups of fungi are considered.

PATH 4280/6280-4280L/6280L. Diagnosis and Management of Plant Diseases. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: PATH 3530-3530L.
Development of fundamental and practical knowledge for identification and management of plant diseases.

(PEDB) Physical Education Basic

College of Education, Department of Physical Education and Sport Studies

PEDB 1010. Adapted Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in adapted physical education.

PEDB 1020. Beginning Badminton. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in badminton.

PEDB 1040. Beginning Basketball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basketball.

PEDB 1060. Beginning Canoeing. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in canoeing.

PEDB 1080. Beginning Bowling. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in bowling.

PEDB 1100. Beginning Backpacking-Hiking. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning backpacking-hiking.

PEDB 1110. Wilderness Backpacking. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate wilderness backpacking.

PEDB 1120. Beginning Golf. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning golf.

PEDB 1130. Intermediate Golf. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate golf.

PEDB 1140. Advanced Golf. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in advanced golf.

PEDB 1150. Self Defense. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in self defense.

PEDB 1160. Judo. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in judo.

PEDB 1170. Beginning Karate. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning karate.

PEDB 1180. Intermediate Karate. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate karate.

PEDB 1200. Beginning Snow Skiing. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning snow skiing.

PEDB 1210. Intermediate Snow Skiing. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate snow skiing.

PEDB 1230. Beginning Racquetball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning racquetball.

PEDB 1240. Intermediate Racquetball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate racquetball.

PEDB 1260. Softball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in softball.

PEDB 1270. Soccer. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in soccer.

PEDB 1300. Beginning Swimming. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning swimming.

PEDB 1310. Intermediate Swimming. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate swimming.

PEDB 1330. Scuba Diving. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in scuba diving.

PEDB 1340. Advanced Scuba Diving. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in advanced scuba diving.

PEDB 1350. Beginning Tennis. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning tennis.

PEDB 1360. Intermediate Tennis. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate tennis.

PEDB 1370. Advanced Tennis. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in advanced tennis.

PEDB 1380. Beginning Volleyball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning volleyball.

PEDB 1390. Intermediate Volleyball. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate volleyball.

PEDB 1400. Introduction to Weight Training. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in an introduction to weight training.

PEDB 1410. Advanced Weight Training. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in advanced weight training.

PEDB 1430. Wrestling. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in wrestling.

PEDB 1450. Beginning Horseback Riding. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning horseback riding.

PEDB 1460. Intermediate Horseback Riding. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate horseback riding.

PEDB 1600. Ballet I. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning ballet.

PEDB 1610. Ballet II. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate ballet.

PEDB 1620. Ballet III. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in advanced ballet.

PEDB 1630. Ballroom/Folk/Square Dance. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in ballroom/folk/square dance.

PEDB 1640. Ballroom Dance I. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning ballroom dance.

PEDB 1650. Ballroom Dance II. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate ballroom dance.

PEDB 1660. Folk Dance. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in folk dance.

PEDB 1680. Jazz Dance I. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning jazz dance.

PEDB 1690. Jazz Dance II. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate jazz dance.

PEDB 1710. Modern Dance I. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning modern dance.

PEDB 1720. Modern Dance II. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate modern dance.

PEDB 1730. Modern Dance III. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in advanced modern dance.

PEDB 1740. Tap Dance I. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in beginning tap dance.

PEDB 1750. Tap Dance II. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intermediate tap dance.

PEDB 1760. Performance Company. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in a performance company.

PEDB 1770. Pre-Professional Performance Company. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in a pre-professional performance company.

PEDB 1800. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1810. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1820. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1830. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1840. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1850. Basic Physical Education. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in basic physical education.

PEDB 1900. Fitness for Life Aerobic Dance. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in fitness for life aerobic dance.

PEDB 1920. Fitness for Life Body Conditioning. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in fitness for life body conditioning.

PEDB 1930. Fitness for Life Jogging. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in fitness for life jogging.

PEDB 1940. Fitness for Life Swimming. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in fitness for life swimming.

PEDB 1950. Fitness for Life Walking. 1 hour. 3 lab periods of 1 hour each per week.
Development of skills and strategy in fitness for life walking.

PEDB 1990. Directed Study. 1 hour. 2 lab periods of 1 hour each per week.
Development of skills and strategy in intercollegiate athletics.

(PEDS) Physical Education and Sport Studies

College of Education, Department of Physical Education and Sport Studies

PEDS 2420-2420L. Physical Education in Early Childhood Education. 2 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Developmentally appropriate movement skills and activities for use with children in early childhood. Field experiences in local elementary schools included.

PEDS 2920. Sports Officiating. 1 hour. Repeatable for maximum 3 hours credit. 1 hour lecture and 1 lab period of 1 hour each per week.
Competencies necessary for officiating sports, including knowledge of rules and officiating techniques.

PEDS 3100. Teaching Methods for Fitness. 2 hours. 1 hour lecture and 3 lab periods of 1 hour each per week.
Prerequisite: EXRS 3700.
Methods of teaching of health-related fitness. Concepts and directed laboratory experiences will enable the student to assess fitness programs and implement them in a physical education program.

PEDS 3110. Teaching Methods for Team Activities I. 2 hours. 2 lab periods of 2 hours each per week.
Teaching methods and strategies, including organization, management, and assessment of skills in soccer, speedball, field hockey, basketball, and team handball.

PEDS 3120. Teaching Methods for Team Activities II. 2 hours. 2 lab periods of 2 hours each per week.
Teaching methods and strategies, including organization, management, and assessment of skills in softball, flag football, volleyball, and floor hockey.

PEDS 3210. Teaching Methods for Individual Activities I. 2 hours. 2 lab periods of 2 hours each per week.
Teaching methods and strategies, including organization, management, and assessment of skills in badminton, tennis, and bowling.

PEDS 3220. Teaching Methods for Individual Activities II. 2 hours. 2 lab periods of 2 hours each per week.
Teaching methods and strategies, including organization, management, and assessment of skills in golf, tumbling, and track and field.

PEDS 3301. Physical Education and Sport Studies Practicum I. 1 hour. 1 lab period of 3 hours each per week.
Individual practical experience within a physical education or sport setting.

PEDS 3302. Physical Education and Sport Studies Practicum II. 1 hour. 1 lab period of 3 hours each per week.
Individual practical experience within a physical education or sport setting.

PEDS 3303. Physical Education and Sport Studies Practicum III. 1 hour. 1 lab period of 3 hours each per week.
Individual practical experience within a physical education or sport setting.

PEDS 3360. Curriculum Design/Administration in Physical Education. 3 hours.
Prerequisite: Permission of department.
Physical education curriculum development (prekindergarten through grade 12) and administration of instructional and extracurricular programs.

PEDS 3400. Sport and the Arts. 2 hours.
Relationship between sport and the arts. Description of how the arts have depicted sports performance throughout history and how sports influence the various art forms today.

PEDS 3410. Ethics in Sport. 2 hours.
Concepts of morality and ethics in a sports context. Development of a code of ethics and its application to decisions made by individuals and organizations in sport.

PEDS 3420. Managing the Legal Aspects of Sport. 3 hours.
Management of the legal principles and problems that directly affect sport.

PEDS 3430. Sports Business Practice. 3 hours.
Business opportunities in sport, including sporting goods manufacturing, retail sporting goods, sport facility and event management, sports marketing and promotions, and sports communication.

PEDS 3440. History of Sport. 3 hours.
The historical forces that have led to the modern development of sport. Investigation of the forces that led to the transition of sport from its premodern to its modern form.

PEDS 3450. Contemporary Issues in Sport. 3 hours.
Contemporary issues that are facing sport and the people who manage or participate in it.

PEDS 3460. Governance in Sport. 1 hour.
Structure, function, and influence that various governing bodies have on the conduct of sport at various levels.

PEDS 3470. Philosophy of Sport. 2 hours.
The philosophical forces that led to the modern development of sport.

PEDS 3500. Administrative Foundations of Coaching. 3 hours.
Role of the coach in dealing with the psychological and administrative issues in coaching.

PEDS 3720. Foundations of Physical Education. 3 hours.
Historical, philosophical, sociological, and psychological factors which influence the nature, evolution, and maintenance of physical education and sport in the schools.

PEDS 3901. Coaching Principles and Strategies of Golf. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching golf.

PEDS 3902. Coaching Principles and Strategies of Gymnastics. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching gymnastics.

PEDS 3903. Coaching Principles and Strategies of Swimming. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching swimming.

PEDS 3904. Coaching Principles and Strategies of Tennis. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching tennis.

PEDS 3905. Coaching Principles and Strategies of Track. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching track.

PEDS 3911. Coaching Principles and Strategies of Baseball. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching baseball.

PEDS 3912. Coaching Principles and Strategies of Basketball. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching basketball.

PEDS 3913. Coaching Principles and Strategies of Football. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching football.

PEDS 3914. Coaching Principles and Strategies of Soccer. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching soccer.

PEDS 3915. Coaching Principles and Strategies of Softball. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching softball.

PEDS 3916. Coaching Principles and Strategies of Volleyball. 2 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Principles, strategies, and methods of coaching volleyball.

PEDS 4000. Directed Study in Physical Education and Sport Studies. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Directed study in physical education and sport studies.
Non-Traditional Format: Directed study.

PEDS 4300/6300-4300L/6300L. Physical Education for the Elementary School. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Curriculum, methods, and evaluation strategies for teaching physical activities in kindergarten through 6th grade. Students will plan lessons and teach groups of students in elementary school physical education classes.

PEDS 4330/6330-4330L/6330L. Physical Education for the Middle/Secondary School. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Curriculum, methods, and evaluation strategies for teaching physical activities in grades 7 through 12. Students will plan lessons and teach groups of students in both middle and high school physical education classes.

PEDS 4610/6610-4610L/6610L. Adapted Physical Education. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
The nature, behavioral characteristics, and motor limitations of various exceptional populations with methods of preparing meaningful individualized movement experiences in an integrated, segregated, or hospital/home bound setting. Includes planning lessons and teaching individuals in a clinic setting.

PEDS 4750. Motor Skill Behavior. 3 hours.
Motor development and acquisition of motor skill behavior from birth to advanced age. Combines knowledge of motor development and motor learning in development of efficient teaching methods and strategies.

PEDS 4820. Social Aspects of Sport. 3 hours.
Influence of social forces and psychological factors affecting an individual's involvement in sport.

PEDS 4900. Professional Socialization in Physical Education. 1 hour.
Social and political dynamics of the teaching profession in physical education. Professional organizations, teacher education, staff development, and institutional organizations will be examined with the benefits and responsibilities of each.

PEDS 5050/7050. Problems of Teaching in Physical Education. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Contemporary problems and issues facing the physical education teaching profession.
Non-Traditional Format: Normally a school district contacts a faculty member about being a consultant on some problem being encountered in a school. The faculty member elicits assistance from an individual student to study the problem and provide solutions.

PEDS 5140/7140. Current Problems in Physical Education and Sport Studies. 1-3 hours. Repeatable for maximum 3 hours credit.
Seminars on issues and problems in Physical Education and Sport Studies.
Non-Traditional Format: Class may be lecture, a course transmitted by satellite, or a series of speakers on a topic.

PEDS 5250/7250. Women and Sport. 3 hours.
Political, social, and cultural factors which have influenced the participation of women in sport and physical activity.

PEDS 5460. Student Teaching in Physical Education. 1-12 hours. Repeatable for maximum 12 hours credit.
Full-time teaching experience in the public schools under an experienced cooperating teacher.
Non-Traditional Format: Student is assigned to a supervising teacher in a public school for twelve weeks of a semester. The student prepares units, teaches lessons, and evaluates the learning of the students in the classes. The student is observed by the supervising teacher daily and a faculty member periodically to evaluate the student's performance as a teacher.

(PGEN) Plant Genetics

College of Agricultural and Environmental Sciences

PGEN 3580-3580L. Principles of Genetics. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (BTNY 1210-1210L and BTNY 1220-1220L) or (BIOL 1103-1103L and BIOL 1104-1104L).
Principles of heredity and variation as related to all organisms. Emphasis on the application of genetic knowledge and on genetic experimentation.

(PHIL) Philosophy

College of Arts and Sciences, Department of Philosophy

PHIL 1000. Introduction to Philosophy. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in PHIL 1000H.
A critical exploration of such topics as knowledge and belief, God and the problem of evil, freedom and determinism, the right and the good, language and meaning, mind and body, appearance and reality, and man and the world. Course may be taken through UGA Studies Abroad program in Cortona.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PHIL 1000H. Introduction to Philosophy (Honors). 3 hours.
Not open to students with credit in PHIL 1000.
Prerequisite: Permission of Honors.
A critical exploration of such topics as knowledge and belief, God and the problem of evil, freedom and determinism, the right and the good, language and meaning, mind and body, appearance and reality, and man and the world.

PHIL 1500. Logic and Critical Thinking. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in PHIL 1500H.
The principles and standards for thinking and communicating clearly and effectively. Topics include theories of meaning, uses of language, common causes of confusion and error in thought and argument, and evaluation of arguments.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PHIL 1500H. Logic and Critical Thinking (Honors). 3 hours.
Not open to students with credit in PHIL 1500.
Prerequisite: Permission of Honors.
The principles and standards for thinking and communicating clearly and effectively. Topics include theories

of meaning, uses of language, common causes of confusion and error in thought and argument, and evaluation of arguments.

PHIL 2200. Introduction to Ethics. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in PHIL 2200H.
The major philosophical positions concerning right and wrong, ethical values, and moral responsibility. The relevance of moral philosophy to current issues of personal and social ethics.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PHIL 2200H. Introduction to Ethics (Honors). 3 hours.
Not open to students with credit in PHIL 2200.
Prerequisite: Permission of Honors.
The major philosophical positions concerning right and wrong, ethical values, and moral responsibility. The relevance of moral philosophy to current issues of personal and social ethics.

PHIL 2400. Philosophy, Science, and Nature. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
The philosophy of science and the philosophy of nature, including such issues as standards governing scientific reasoning and the philosophical implications of contemporary and past scientific theories.

PHIL 2500. Symbolic Logic. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in PHIL 2500H.
The methods and principles used to distinguish correct from incorrect deductive arguments, with emphasis on contemporary techniques of analysis.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PHIL 2500H. Symbolic Logic (Honors). 3 hours.
Not open to students with credit in PHIL 2500.
Prerequisite: Permission of Honors.
The methods and principles used to distinguish correct from incorrect deductive arguments, with emphasis on contemporary techniques of analysis.

PHIL 3000. Classics of Ancient Western Philosophy. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Ancient Greek philosophy focusing particularly on works of Plato and Aristotle.

PHIL 3010. Classics of Modern Western Philosophy. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Philosophers from the "modern period" of philosophy focusing on those writing in the seventeenth and eighteenth centuries, such as Descartes, Spinoza, Locke, Hume, and Kant.

PHIL 3020. Nineteenth-Century Western Philosophy. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Works of major nineteenth-century philosophers such as Kant, Hegel, Fichte, Schopenhauer, Mill, Frege, and Nietzsche.

PHIL 3030. Existentialism. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
European existentialism, as initiated by Kierkegaard and developed in this century by such figures as Sartre, Camus, Marcel, Jaspers, and Buber.

PHIL 3200. Ethical Theory. 3 hours.
Prerequisite: PHIL 2200.
The nature and justification of fundamental ethical concepts and moral principles.

PHIL 3210. Feminist Philosophy. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Philosophical investigation and evaluation of feminist philosophy, examining such approaches as liberal feminism, socialist feminism, radical feminism, ecofeminism, and other feminist approaches.

PHIL 3600. Metaphysics. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Philosophical works that address problems such as: What is substance? What is causality? Is mind distinct from matter? Does God exist?

PHIL 3610. Theory of Knowledge. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Basic problems and issues in the theory of knowledge, such as: What is truth? Can we acquire knowledge independently of experience? How can we justify our beliefs? Are inductive generalizations justified?

PHIL 4000/6000. Plato. 3 hours.
Prerequisite: PHIL 3000.
The major writings of Plato.

PHIL 4010/6010. Aristotle. 3 hours.
Prerequisite: PHIL 3000.
The major writings of Aristotle.

PHIL 4020/6020. Medieval Philosophy. 3 hours.
Prerequisite: PHIL 3000.
The major figures of the medieval period in western philosophy, including Augustine and Aquinas.

PHIL 4030/6030. Continental Rationalism. 3 hours.
Prerequisite: PHIL 3010.
Continental Rationalism, focusing on evaluating the principal writings of Descartes, Spinoza, and Leibniz.

PHIL 4040/6040. British Empiricism. 3 hours.
Prerequisite: PHIL 3010.
British Empiricism, focusing on evaluating the principal writings of Locke, Berkeley, and Hume.

PHIL 4050/6050. Kant. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
The major writings of Immanuel Kant.

PHIL 4060/6060. Hegel. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
The major writings of G.W.F. Hegel.

PHIL 4070/6070. Nineteenth-Century European Philosophy. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3020.
Works of some major nineteenth-century philosophers, typically organized around a theme. Philosophers to be studied may include Mill, Bentham, Frege, Brentano, Schopenhauer, Fichte, Schelling, and Nietzsche.

PHIL 4080/6080. Classical American Philosophy. 3 hours.
Prerequisite: Permission of department.
The major writings of C.S. Pierce, William James, and John Dewey and their influence on the development of contemporary philosophy.

PHIL 4090/6090. Contemporary Continental Tradition. 3 hours.
Prerequisite: PHIL 3000 or PHIL 3010 or PHIL 3030.
Writings from the early phenomenologists, existentialists, contemporary Marxists and their successors, such as Husserl, Heidegger, Merleau-Ponty, Camus, Sartre, Marcuse, and Habermas.

PHIL 4100/6100. Contemporary Analytic Tradition. 3 hours.
Prerequisite: PHIL 3010 or PHIL 3600 or PHIL 3610.
The development of contemporary analytical philosophy from the turn of the century to the present. Readings will be from philosophers such as Russell, Moore, Wittgenstein, Carnap, Ryle, Austin, Quine, and Strawson.

PHIL 4210/6210. Social and Political Philosophy. 3 hours.
Prerequisite: PHIL 2200.
The nature and function of society and the state, human freedom and rights, and the bases of social and political obligations.

PHIL(EETH) 4220/6220. Environmental Ethics. 3 hours.
Prerequisite: PHIL 2200 or permission of department.
Major professional and nonprofessional writings in the field of environmental ethics.

PHIL 4230/6230. Aesthetics. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
Philosophical theories about the arts; for example, painting, literature, and music. Questions to be addressed include: what makes art art? and what are appropriate criteria of good art? Attention may also be given to such topics as the function of art in society. Course may be taken through UGA Studies Abroad program in Cortona.

PHIL 4240/6240. Philosophy of Law. 3 hours.
Prerequisite: Permission of department.
The nature and function of law, with emphasis on the interpretation and application of the law in the judicial process. Readings in classical and contemporary schools of the philosophy of law.

PHIL(EETH) 4250/6250. Technology and Values. 3 hours.
Prerequisite: Permission of department.
Technology in its broadest human context, with emphasis on the mutual influence between means and ends and the impact of technology on shaping the beliefs and attitudes of a civilization. Includes alternative assessments of technology and illustrates with specific crucial issues of our time.

PHIL(LING) 4300/6300. Philosophy of Language. 3 hours.
Prerequisite: Permission of department.
Topics such as formal and ordinary languages, meaning, reference, truth, definition, analyticity, ambiguity, metaphor, symbolism, and the uses of language.

PHIL 4310/6310. Philosophy of Mind. 3 hours.
Prerequisite: PHIL 3000 or PHIL 3010 or PHIL 3020 or PHIL 3610.
The philosophical implications of alternative approaches to psychology such as the behavioral, the psychoanalytic, the phenomenological, with particular attention to such problematic areas as the nature and validation of psychological concepts, law, and theories, and the knowledge of other minds.

PHIL 4400/6400. History of Natural Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2400.
Major physical, biological, and cosmological theories and their philosophic import, sixth century B.C. to the present.

PHIL 4410/6410. Philosophy of Natural Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2400.
The logical structure of scientific hypotheses and/or laws, and the problems of their meaning and confirmation; the general patterns of scientific explanation; and the ideals of prediction and control.

PHIL 4420/6420. Philosophy of Social Science. 3 hours.
Prerequisite: PHIL 1000 or PHIL 2200 or PHIL 2400.
The methods and problems of inductive reasoning, including the nature of probable inference, techniques of verification, and the structure of scientific explanation, with special reference to the social sciences.

(PHIL)RELI 4500/6500. Philosophy of Religion. 3 hours.
Prerequisite: RELI 1003 or PHIL 1000 or PHIL 2200 or PHIL 2400.
The meaning, nature, and validity of religious dis-

course, beliefs, and practices, involving theories concerning the existence and nature of God and humanity's relation to God.

PHIL(LING) 4510/6510. Deductive Systems. 3 hours.
Prerequisite: PHIL 2500.
Symbolic-mathematical logic, examining the propositional and predicate calculi, with emphasis on problems in translation and formalization and topics in the philosophy of logic and mathematics.

PHIL(LING) 4520/6520. Model Theory. 3 hours.
Prerequisite: PHIL(LING) 4510/6510.
Formal semantics for sentential and first-order predicate logic, including both soundness and completeness results for first-order logic. Additional topics may include Goedel's incompleteness results, the Skolem-Lowenheim theorem, or possible world semantics for modal logics.

PHIL 4530/6530. Philosophy of Mathematics. 3 hours.
Prerequisite: (PHIL 1000 or PHIL 2400) and PHIL 2500.
The philosophical issues associated with mathematical inquiry, including, perhaps, the existence and nature of mathematical objects, the epistemology of mathematical truths, the character of mathematical proof, and the foundations of mathematics.

(PHIL)CSCI 4550/6550. Artificial Intelligence. 3 hours.
Prerequisite: CSCI 1302 or [PHIL 2500 and (PHIL 3010 or PHIL 3020 or PHIL 3610)] or permission of department.
Prerequisite or corequisite: CSCI(ARTI) 4540/6540.
The artificial intelligence approach to modeling cognitive processes. Topics include an introduction to heuristic methods, problem representation and search methods, classic AI techniques, and a review of the controversial issues of the AI paradigm of cognition as computation.

(PHIL)HIST 4860/6860. History, History of Philosophy, Philosophy. 3 hours.
Historians and philosophers differ in the source of evidence and arguments they use and in the standards to which they appeal. Nonetheless, works in each of these fields raise questions relevant to the other field. The purpose of this course is to explore the main relationships between these two fields.

PHIL 4900. Problems in Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Investigation of a philosophical problem or group of related problems with emphasis upon extensive reading in primary sources. Selection of topics will vary with instructor and interests of students.

PHIL 4950. Directed Readings in Philosophy. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Reading and independent research on a specified topic beyond normal course offerings and closely supervised by the tutor. Application should be made in advance of registration to the department head. Open only to students prepared to pursue advanced material.
Non-Traditional Format: Directed study.

PHIL 4960H. Directed Reading and/or Projects (Honors). 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

PHIL 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

PHIL 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

PHIL 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: An independent research course. Each student meets individually with a faculty supervisor on a weekly basis to discuss the progress of his/her research project.

(PHYS) Physics

College of Arts and Sciences, Department of Physics

PHYS 1010. Physical Science. 3 hours.
Not open to students with credit in PHYS 1111-1111L or PHYS 1211-1211L.
Elementary knowledge of fundamental laws and concepts in physics and astronomy and the understanding of how the scientific method as exemplified by physical science has contributed to man's thinking.

PHYS 1050. Physics of Music and Sound. 3 hours.
Prerequisite: MATH 1090 or MATH 1113.
Wave motion, particularly as applied to sound, will be studied. This knowledge of sound will then be applied to understanding the selected topics in music.

PHYS 1111-1111L. Introductory Physics-Mechanics, Waves, Thermodynamics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.

Prerequisite: MATH 1090 or MATH 1113.
Fundamental laws of mechanics, waves, and thermodynamics.

PHYS 1112-1112L. Introductory Physics-Electricity and Magnetism, Optics, Modern Physics. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: PHYS 1111-1111L or 1211-1211L.
Fundamental laws of electricity and magnetism, optics, and nuclear physics.

PHYS 1211-1211L. Introductory Physics for Science and Engineering Students-Mechanics, Waves, Thermodynamics. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in PHYS 1111-1111L.
Prerequisite or corequisite: MATH 2200 and MATH 2200L.
Fundamental laws of mechanics, waves, and thermodynamics.

PHYS 1212-1212L. Introductory Physics for Science and Engineering Students-Electricity and Magnetism, Optics, Modern Physics. 4 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Not open to students with credit in PHYS 1112-1112L.
Prerequisite: PHYS 1111-1111L or PHYS 1211-1211L.
Prerequisite or corequisite: MATH 2210 and MATH 2210L.
Fundamental laws of electricity and magnetism, optics, and nuclear physics.

PHYS 1990. Introductory Physics Seminar. 1 hour. Repeatable for maximum 2 hours credit.
Topics in physics and astronomy presented by faculty and visitors. Topics will vary from year to year, and several topics will be considered weekly.

(PHYS)HONS(BIOL)(CHEM)(GEOL) 2070H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in PHYS 1010 or CHEM 1110.
Prerequisite: (ENGL 1101 or MATH 1101) and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Occasional weekend field trips required.

(PHYS)HONS(BIOL)(CHEM)(GEOL) 2080H. Honors Science. 6 hours. 3 hours lecture and 2 lab periods of 1.5 hours each per week.
Not open to students with credit in BIOL 1103-1103L or GEOL 1121.
Prerequisite: HON 2070H and permission of Honors.
Concepts of physics, chemistry, geology, and biology in an integrated fashion. The evolution of the universe from the primordial state to the present time, and considers human interaction with the environment.
Non-Traditional Format: Weekend field trips required.

PHYS 3320-3320L. Introductory Electronics. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L) and MATH 2500.
Electric circuits and electronics. DC and AC circuit analysis, diode and transistor circuits, integrated circuits, and digital electronics.

PHYS 3330-3330L. Modern Optics. 3 hours. 2 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L) and MATH 2500.
The properties of light with emphasis on physical optics: diffraction, polarization, lasers, holography.

PHYS 3700. Modern Physics. 3 hours.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L).
Prerequisite or corequisite: MATH 2500.
Special relativity, the early development of quantum physics, wave mechanics applied to simple systems.

PHYS 3900. Mathematical Methods in Physics. 3 hours.
Prerequisite: PHYS 1112-1112L or PHYS 1212-1212L.
Special topics in mathematics with direct applications to problems in physics.

PHYS 3990. Directed Study. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L) and permission of department.
Students have the opportunity for intensive study, with one or more faculty members, of topics not normally taught in other courses.
Non-Traditional Format: Outside reading and one-on-one discussion periods.

PHYS 4000/6000. Physics Seminar. 1 hour. Repeatable for maximum 3 hours credit.
Discussion of contemporary topics in physics.

PHYS 4101/6101. Theoretical Mechanics I. 3 hours.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L).
Prerequisite or corequisite: MATH 2700.
Kinematics and dynamics of a particle and of systems of particles.

PHYS 4102/6102. Theoretical Mechanics II. 3 hours.
Prerequisite: PHYS 4101/6101.
Mechanics of continuous media. Formal developments in mechanics including the formulations of Lagrange and Hamilton.

PHYS 4201/6201. Electricity and Magnetism I. 3 hours.
Prerequisite: PHYS 4101/6101.
Experimental foundations, including development of Maxwell's equations.

PHYS 4202/6202. Electricity and Magnetism II. 3 hours.
Prerequisite: PHYS 4201/6201.
Applications of Maxwell's equations.

PHYS 4300/6300. Thermodynamics and Kinetic Theory. 3 hours.
Prerequisite: (PHYS 1112-1112L or PHYS 1212-1212L) and MATH 2700.
The laws of thermodynamics and their application to physical systems. Kinetic theory.

PHYS 4650L. Experimental Physics. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: PHYS 3320-3320L.
Laboratory course in which the student uses modern experimental techniques to investigate phenomena in atomic and molecular, nuclear, and condensed matter physics.

PHYS 4701/6701. Introductory Quantum Mechanics I. 3 hours.
Prerequisite: PHYS 3700 and PHYS 4101/6101.
Fundamental principles of quantum mechanics. Solutions of the Schroedinger equation and their properties for simple systems are discussed.

PHYS 4702/6702. Introductory Quantum Mechanics II. 3 hours.
Prerequisite: PHYS 4701/6701.
Perturbation theory and applications of quantum mechanics.

PHYS 4750/6750. Nuclear and Particle Physics. 3 hours.
Prerequisite: PHYS 3700.
Properties of nuclear and subnuclear systems. Fundamental interactions between particles are treated. An introduction to the theory of the structure of baryons, mesons, and nuclei is presented along with quarks and the standard model.

PHYS 4820/6820. Condensed Matter Physics. 3 hours.
Prerequisite: PHYS 3700 and PHYS 4300/6300.
Elastic, thermal, electrical, magnetic and optical properties of condensed matter. Covers such topics as crystal structure, symmetry operators, X-ray and neutron diffraction, lattice vibrations, thermal properties, electrons in metals and semiconductors, dielectric and optical properties, magnetism and magnetic resonance, superconductivity, and quantum fluids.

PHYS 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Meetings with project director.

PHYS 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Meetings with project director.

PHYS 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Meetings with thesis advisor.

(POLS) Political Science

College of Arts and Sciences, Department of Political Science

POLS 1101-1101D. American Government. 3 hours. 2-3 hours lecture and 0-1 discussion period of 0-1 hour each per week.
Not open to students with credit in POLS 1105H.
Government and politics in the United States, including the philosophical and constitutional foundations, political institutions such as Congress and the presidency, political practices such as voting, and civil rights and liberties.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

POLS 1105H. American Government (Honors). 3 hours.
Not open to students with credit in POLS 1101-1101D.
Prerequisite: Permission of Honors.
Government and politics in the United States, including the philosophical and constitutional foundations, political institutions such as Congress and the presidency, political practices such as voting, and civil rights and liberties.

POLS 3000. Introduction to Political Theory. 3 hours.
Prerequisite: POLS 1101-1101D.
Political theory for students with little or no previous course work in the area. Focuses on one or more important political concepts or phenomena (e.g., power, freedom, or political ambition) and as entry-point into various approaches and literatures within the field.

POLS 3100H. Issues in Political Philosophy (Honors). 3 hours.
Prerequisite: POLS 1101-1101D and permission of Honors.
Basic questions in political philosophy, e.g., purposes of government, forms of government, relationships of government and the individual, and the limits of political authority.

POLS 3200. Introduction to International Relations. 3 hours.
Not open to students with credit in POLS 3200H.
Prerequisite: POLS 1101-1101D.
Practices and problems of international politics in a global context, e.g., power, ideology, diplomacy, war, international organization and law, international economics, and the nature of independence in an interdependent world.

POLS 3200H. Introduction to International Relations (Honors). 3 hours.
Prerequisite: POLS 1101-1101D and permission of Honors.
Practices and problems of international politics in global context, e.g., power, ideology, diplomacy, war, international organization and law, international economics, and the nature of independence in an interdependent world.

POLS 3300. Comparative Political Analysis. 3 hours.
Prerequisite: POLS 1101-1101D.
Comparative political themes in political science. The transition from feudalism to capitalism, state building, democracy, and the interaction between political institutions and cultures in various politics. Examples will be drawn from developed, communist/post-communist, and developing political systems.

POLS 3350H. Problems of Post-Communism (Honors). 3 hours.
Prerequisite: POLS 1101-1101D and permission of Honors.
Selected problems and challenges of domestic and international politics in Russia and other selected post-communist states.

(POLS)SOCI(ANTH) 3450. Sociopolitical Ecology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The relationship between humans and their environment; ecological and social theories about environmental policies and problems.

POLS 3600. Criminal Justice Administration. 3 hours.
Prerequisite: POLS 1101-1101D.
The actors and agencies in the administration of criminal law in the United States. Surveys processes critical to criminal punishment: arrest, bail, prosecution, conviction, sentencing, and corrections.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

POLS(SOCI) 3700. Research Methods in Criminal Justice. 3 hours.
Not open to students with credit in POLS 4150.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS(SOCI) 3700L.
Fundamental principles of social science research and related research design. Structured to develop students' abilities to think clearly, critically, and logically about social science issues through the scientific evaluation of empirical issues and evidence.

POLS(SOCI) 3700L. Research Methods in Criminal Justice Laboratory. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in POLS 4150L.
Corequisite: POLS(SOCI) 3700.
Fundamental principles of social science research and related research design. Structured to develop students' abilities to think clearly, critically, and logically about social science issues through the scientific evaluation of empirical issues and evidence.

POLS 4010. Political Philosophy to Machiavelli. 3 hours.
Prerequisite: POLS 1101-1101D.
Selected works of such writers as Plato, Aristotle, Cicero, St. Augustine, and St. Thomas, concluding with the rejection of classical thought by Machiavelli. .

POLS 4020. Political Philosophy: Hobbes to Nietzsche. 3 hours.
Prerequisite: POLS 1101-1101D.
The development of modern political philosophy through the analysis of selected works of such writers as Hobbes, Locke, Hume, Rousseau, Mill, Marx, and Nietzsche.

POLS 4030. Contemporary Political Thought. 3 hours.
Prerequisite: POLS 1101-1101D.
Major issues in contemporary political thought with attention to the theoretical roots of major contemporary ideologies.

POLS 4040. American Political Thought. 3 hours.
Prerequisite: POLS 1101-1101D.
The ideas about human nature and government that have shaped political practice and debate in America. The principles of the Declaration of Independence and the Constitution, as developed by Jefferson, Madison, and Hamilton, and the interpretation of these principles by such statesmen as Lincoln and Wilson. Other topics include black political thought and current liberal-conservative debates.

POLS 4050. African American Political Thought. 3 hours.
Prerequisite: POLS 1101-1101D.
African American political thought since the nineteenth century, ranging from early emigrationist sentiments to the nationalist exhortations of contemporary African American youth culture, including African American feminist and socialist thought.

POLS 4060. Problems in Democratic Theory. 3 hours.
Prerequisite: POLS 1101-1101D.

Major issues in theoretical discussions of democracy, such as the nature of democratic government, its purposes, its justification, its limitations, and the conditions necessary for its maintenance.

POLS 4070. Theories of Political Choice. 3 hours.
Prerequisite: POLS 1101-1101D.
Methods for individual choice in the face of political alternatives. The role of individual decision making in orienting political behavior and determining how and when political actors come into conflict or behave cooperatively.

POLS 4150. Research Methods in Political Science. 2-3 hours.
Not open to students with credit in POLS(SOCI) 3700.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS 4150L.
The qualitative and quantitative techniques for measurement, analysis, and inference of political data. Recommended for majors, especially those planning to attend graduate school.

POLS 4150L. Research Methods in Political Science Laboratory. 1 hour.
Not open to students with credit in POLS(SOCI) 3700L.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS 4150.
The qualitative and quantitative techniques for measurement, analysis, and inference of political data. Recommended for majors, especially those planning to attend graduate school.

POLS 4190. Special Topics in Political Theory/ Methods. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: POLS 1101-1101D.
Selected writers, themes, or methodologies in political theory.

(POLS)AFAM 4200. African American Social Change. 3 hours.
Prerequisite: POLS 1101-1101D and AFAM 2000.
African American social movements, principally those in the United States, such as the convention and colonizing movements of the nineteenth century and the Civil Rights and Black Power movements of the twentieth century.

POLS 4210. International Law. 3 hours.
Prerequisite: POLS 1101-1101D.
Legal structures in the international system.

POLS 4220. International Conflict. 3 hours.
Prerequisite: POLS 1101-1101D.
The major approaches to the study of international conflict, with special emphasis on the logical and empirical foundations for key hypotheses regarding war and peace. These subjects are addressed by considering the incentives and constraints on decision making that arise from systemic, coalitional, national, and individual factors.

POLS 4230. Politics of International Economic Relations. 3 hours.
Prerequisite: POLS 1101-1101D.
The political foundations in international economic relations, including foreign investment, international monetary relations, trade issues, and economic sanctions.

POLS 4240. International Organization. 3 hours.
Prerequisite: POLS 1101-1101D.
The role of international institutions in overcoming obstacles to international cooperation, with emphasis on international regimes, formal as well as informal, and their capacity to induce international cooperation.

POLS 4250. American Foreign Policy. 3 hours.
Prerequisite: POLS 1101-1101D.
The history and content of American foreign policy as well as the foreign policy-making process. The role of individuals and nongovernmental organizations in making foreign policy in a mature democracy.

POLS 4300. United Nations Practicum. 3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: AFAM(POLS) 4200.
Issues coming before the United Nations organization in the upcoming session from the standpoint of assigned countries, culminating in participation in the national Model United Nations in New York in early spring. Research papers and practicum at United Nations headquarters in New York.

POLS 4360. Political Development. 3 hours.
Prerequisite: POLS 1101-1101D.
The sociopolitical dynamics of social change involving institutional development, industrialization, and modernization.

POLS 4370H. Politics of Industrialized Democracies (Honors). 3 hours.
Not open to students with credit in POLS 4370/6370.
Prerequisite: POLS 1101-1101D and permission of Honors.
The political economy, institutions, and cultures of the major capitalist countries in Europe, East Asia, and North America. State-society relations and formal and informal political institutions, such as political parties, interest groups, electoral systems, and democratic representation.

POLS 4370/6370. Politics of Industrialized Democracies. 3 hours.
Not open to students with credit in POLS 4370H.
Prerequisite: POLS 1101-1101D.
The political economy, institutions, and cultures of the major capitalist countries in Europe, East Asia, and North America. State-society relations and formal and informal political institutions, such as political parties, interest groups, electoral systems, and democratic representation.

POLS 4380. Politics of Post-Communist Systems. 3 hours.
Prerequisite: POLS 1101-1101D.
Domestic and international politics in Russia and other selected post-communist states.

POLS 4390. Far Eastern Political Systems. 3 hours.
Prerequisite: POLS 1101-1101D.
The social, cultural, economic, and political processes in Asia Pacific systems, including Japan, China, and Korea.

POLS 4480. Special Topics in International Relations. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: POLS 1101-1101D.
Theoretical, analytical, and empirical approaches to international relations.

POLS 4490. Special Topics in Comparative Politics. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: POLS 1101-1101D.
Theoretical, analytical, and empirical approaches to comparative politics.

POLS 4510. Public Opinion and American Democracy. 2-3 hours.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS 4510L.
Major methods and findings of survey research, with particular attention to attitudes and beliefs and their implications for the role of citizens in a representative democracy.

POLS 4510L. Public Opinion and American Democracy Laboratory. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS 4510.
Major methods and findings of survey research with particular attention to attitudes and beliefs and their implications for the role of citizens in a representative democracy.

POLS 4520/6520. Electoral Behavior. 3 hours.
Prerequisite: POLS 1101-1101D.
Factors which contribute to electoral choice and the dynamics of voting in the American political system.

POLS 4530. American Political Parties. 3 hours.
Prerequisite: POLS 1101-1101D.
Political organizations that contest elections and seek to control government in the United States. Particular emphasis will be placed on the two major political parties, as well as the future of the American party system.

POLS 4540. Interest Group Politics. 3 hours.
Prerequisite: POLS 1101-1101D.
The role of organized groups in the United States political system. Special attention given to interest group formation and maintenance, legislative and executive branch lobbying, and the impact of interest groups on legislative behavior in light of theories of representation.

POLS 4550. Government and the Mass Media. 3 hours.
Prerequisite: POLS 1101-1101D.
The mass media and its relationship to campaigns and elections, the exercise of political leadership, the formation of public policy, and the development of democratic governance.

POLS 4560. African American Politics. 3 hours.
Prerequisite: POLS 1101-1101D.
African American political behavior, including the theoretical underpinnings of political action, the electoral preferences of African Americans, and the role of African Americans in United States political institutions.

POLS 4570. African American Social Change. 3 hours.
Prerequisite: POLS 1101-1101D.
African American social movements, principally those in the United States, such as the convention and colonizing movements of the nineteenth century and the civil rights and black power movements of the twentieth century.

POLS 4600. The Legislative Process. 3 hours.
Prerequisite: POLS 1101-1101D.
The United States Congress with emphasis on leadership, procedures, and the role of parties and interest groups. Recent changes in Congress will be examined in light of theories of representation.

POLS 4610/6610. The United States Presidency. 3 hours.
Prerequisite: POLS 1101-1101D.
The president of the United States, including the president's constitutional position, theories of executive dominance and executive privilege, the president's attempt to control the executive branch, and presidential-congressional relations.

POLS 4620. Public Administration and Democracy. 3 hours.
Prerequisite: POLS 1101-1101D.
Major issues of administration and public agencies, such as personnel, finance, administrative law, and the growth and significance of governmental bureaucracy.

POLS 4630. Government Budgeting and Finance. 3 hours.
Prerequisite: POLS 1101-1101D
Public revenue and expenditure policies, financial administration, and politics of the budgetary process

POLS 4640. Urban Politics. 3 hours
Prerequisite: POLS 1101-1101D.
Local politics in the United States, including the development of cities, local government organization, participation of individuals and groups in urban politics, and policy making at the local level

POLS 4650. State Politics. 3 hours.
Prerequisite: POLS 1101-1101D.
Politics in the American states. Similarities and differences in state constitutions, government structure, political participation, and public policies.

POLS 4660. Southern Politics. 3 hours.
Not open to students with credit in POLS 4190.
Prerequisite: POLS 1101-1101D.
Politics of individual states, emergence of the Republican party, political mobilization, consequences of reapportionment, and selected civil rights topics.

POLS 4700. Constitutional Law: Powers. 3 hours.
Prerequisite: POLS 1101-1101D.
Supreme court cases on the separation of powers, national and state regulatory powers, the federal system, and the role of the courts.

POLS 4710. Constitutional Law: Rights and Liberties. 3 hours.
Prerequisite: POLS 1101-1101D.
Individual rights and liberties, with emphasis on the First Amendment, other parts of the Bill of Rights, and the Fourteenth Amendment.

POLS 4720. Criminal Procedure. 3 hours.
Prerequisite: POLS 1101-1101D.
The Fourth, Fifth, Sixth and Eighth Amendments to the United States Constitution, with specific attention to the law governing criminal arrest, trial, and punishment.

POLS 4730. Criminal Law. 3 hours.
Prerequisite: POLS 1101-1101D.
Substantive criminal law in the United States. State and federal statutes and selected cases, with particular focus on the definition and classification of crime, the elements of crime, types of crime, and justifications and excuses related to criminal liability.

POLS 4740. Judicial Process and Behavior. 3 hours.
Prerequisite: POLS 1101-1101D.
The relationship between law and society, types of law, and the operation of the judicial branch of government, particularly in the United States.

POLS 4780H. Special Topics in Law and Judicial Processes (Honors). 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: POLS 1101-1101D and permission of Honors.
Selected major issues related to law and/or judicial processes.

POLS 4790. Special Topics in American Politics. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: POLS 1101-1101D.
Theories and practices of political institutions, behavior, or policy making in the United States.

POLS 4790H. Special Topics in American Politics (Honors). 3 hours. Repeatable for maximum 6 hours credit.
Not open to students with credit in POLS 4790.
Prerequisite: POLS 1101-1101D and permission of Honors.
Theories and practices of political institutions, behavior, or policy making in the United States.

POLS 4900. Law Enforcement Administration. 3 hours.
Prerequisite: POLS 1101-1101D.
The history, development, and function of police agencies in American government and society, and a critical evaluation of administrative policies and practices in police organizations.

POLS 4960. Directed Readings and/or Projects. 3 hours.
Not open to students with credit in POLS 4960H.
Prerequisite: POLS 1101-1101D.
Individual study, reading, or projects under the supervision of a project director.
Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS 4960H. Directed Readings and/or Projects (Honors). 3 hours.
Not open to students with credit in POLS 4960.
Prerequisite: POLS 1101-1101D and permission of Honors.
Individual study, reading, or projects, under the supervision of a project director.
Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS 4990H. Honors Thesis. 3 hours.
Prerequisite: POLS 1101-1101D and permission of Honors.
Individual research in the major or a closely related field.
Non-Traditional Format: Thesis course.

POLS 5000. Political Science Internship. 3 hours.
Prerequisite: POLS 1101-1101D and permission of department.
Covers the academic portion of internships. May include seminars, readings, and research to supplement experience gained by interns with their assigned organizations.
Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS(SOCI) 5500. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.

An internship specifically designed for and required of students pursuing a degree in criminal justice. Centers on regular and systematic analysis of experimental learning under direct faculty supervision.
Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

POLS(SOCI) 5510. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.
An internship specifically designed for and required of students pursuing a degree in criminal justice. Centers on the design, execution, and reporting of original research related to the specific placement or internship.
Non-Traditional Format: Internship.

POLS(SOCI) 5520. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.
An internship specifically designed for and required of students pursuing a degree in criminal justice. Criminal justice students are required to intern in an approved agency full time over the semester.
Non-Traditional Format: Internship.

(PORT) Portuguese

College of Arts and Sciences, Department of Romance Languages

Certain courses in Portuguese are not open to native speakers. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was Portuguese.

PORT 1001. Elementary Portuguese. 4 hours.
Not open to students with credit in PORT 1002.
Conversation, fundamentals of grammar, pronunciation, reading, and writing.

PORT 1002. Elementary Portuguese. 4 hours.
Prerequisite: PORT 1001.
A continuation of Elementary Portuguese. Teaches conversation, fundamentals of grammar, pronunciation, reading, and writing.

PORT 2001. Intermediate Portuguese. 3 hours.
Not open to students with credit in PORT 2002.
Prerequisite: PORT 1002 or permission of department.
Extensive reading of texts of literary and cultural merit. Grammar review, conversation, and pronunciation. Not open to native speakers.

PORT 2002. Intermediate Portuguese. 3 hours.
Not open to students with credit in PORT 3010.
Prerequisite: PORT 2001 or permission of department.
A continuation of Intermediate Portuguese. Content based review of Portuguese grammar and systematic vocabulary and skill development. Integration of language, culture, and literature

PORT 2600. Intensive Portuguese. 3 hours.
Prerequisite: Permission of department.
Emphasizes conversational skills, reading, writing, and listening comprehension. Not open to native speakers. Not to be used to satisfy the undergraduate language requirement.

PORT 2950. Study Abroad in Portuguese. 3 hours.
Prerequisite: Permission of department.
Portuguese language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

PORT 2960. Study Abroad in Portuguese. 3 hours.
Prerequisite: Permission of department.
Portuguese language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

PORT 2970. Study Abroad in Portuguese. 3 hours.
Prerequisite: Permission of department.
Portuguese language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

PORT 3010. Introduction to Language, Literature, and Culture of the Portuguese-Speaking World. 3 hours.
Prerequisite: PORT 2002 or permission of department.
Emphasis is divided between linguistic, literary and cultural skills to promote student's ability to read and analyze literary and non-literary texts, while concentrating on expressing themselves accurately in both oral and written Portuguese. Given in Portuguese.

PORT 4010/6010. Advanced Language, Literature, and Culture of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or permission of department.
Linguistic, cultural, and literary structures in Portuguese-speaking societies. Emphasis is divided between students' abilities to express themselves fluently in oral and written Portuguese and to identify and contextualize main literary genres and movements. Given in Portuguese.

PORT 4050/6050. Prose of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative prose texts from Portugal, Brazil, and Lusophone Africa analyzed in their cultural, social, and political contexts. Given in Portuguese.

PORT 4060/6060. Poetry of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.

Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative poetic texts from Portugal, Brazil, and Lusophone Africa analyzed in their cultural, social, and political contexts. Given in Portuguese.

PORT 4070/6070. Theater of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Representative plays from Portugal and Brazil analyzed with emphasis on drama as a literary genre, specific aspects of staging and performance, and socio-political context of theatrical production. Given in Portuguese.

PORT 4080/6080. Studies in Culture and Literature of the Portuguese-Speaking World. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PORT 3010 or PORT 4010/6010 or permission of department.
Studies in culture and literature of the Portuguese-speaking world. Selected topics of special interest in their cultural, social, and political context.

PORT 4950. Directed Reading and/or Projects. 3 hours. Repeatable for maximum 15 hours credit.
Prerequisite: Permission of department and junior or senior standing.
Individual study, reading, or projects under the guidance of a faculty member.
Non-Traditional Format: Directed study.

PORT 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Junior or senior standing and permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

PORT 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Junior or senior standing and permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

PORT 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Junior or senior standing and permission of Honors.
Individual study, reading, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

PORT 4990H. Honors Thesis. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Honors students have the opportunity to undertake individual research in the field of their major or in a closely related field.
Non-Traditional Format: Directed study.

(POUL) Poultry Science

College of Agricultural and Environmental Sciences, Department of Poultry Science

POUL 2020-2020L. Introductory Poultry Science. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
The biology of the domestic fowl, basic nutrition, genetics, reproduction, embryology, processing, and management as they pertain to commercial poultry production.

POUL 2040. Poultry Evaluation. 1 hour. 1 lab period of 2 hours each per week.
Evaluation of live poultry for production and breeder stock potential and poultry product quality evaluation and selection standards.

POUL 2050. Poultry Judging. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: POUL 2040.
Judging of live poultry and poultry products.

POUL 3600. Poultry Production. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 2020-2020L.
Application of the principles of poultry science to the practice of poultry production.

POUL 3710. Commercial Poultry Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 3600.
Management practices and principles used in the business of producing eggs and poultry meat. Emphasis is placed on factors influencing costs and returns in poultry operations.

POUL 3720. Poultry Breeding. 3 hours.
Inheritance of morphological and physiological characters with emphasis on the development of criteria for selection and development of genetically sound poultry breeding programs.

POUL 3750. Poultry Nutrition. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 3600.
Biochemical aspects of the individual nutrients, their supply in terms of feedstuffs, and the formulation of practical poultry diets.

POUL 3790. Poultry Seminar. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: POUL 3600.
Current problems and papers of scientific work in poultry presented by students.

POUL 3800-3800L. Avian Anatomy and Physiology. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Avian anatomy at both the gross and microscopic level. A basis for studying the systematic physiology of the bird. Unique characteristics of avian physiology and morphology using the chicken as a model animal.

POUL(FDST) 3860. Poultry Processing. 3 hours.
Prerequisite: POUL 3600 or FDST 2010 or FDST 3000 or permission of department.
Basic principles and methods of processing poultry and eggs. Broiler harvesting, slaughter, evisceration, plant sanitation, microbiology, inspection, grading, regulations, water and waste water handling, quality control and HACCP plans, further processing, and shell egg handling and processing.

POUL 3910. Poultry Business Internship. 3 hours.
Prerequisite: Permission of department.
Poultry business firms provide the student with practical work experience in the daily operation and management of commercial poultry businesses.
Non-Traditional Format: Internship.

POUL 3990. Special Problems in Poultry Science. 2-5 hours. Repeatable for maximum 5 hours credit.
Prerequisite: Permission of department.
Research or intensive study in a specialized area of poultry science.
Non-Traditional Format: Independent study.

POUL 4010. Advanced Broiler Production. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 3600.
Current practices of broiler production encompassing nutrition, management, poultry health, and related areas.

POUL 4020. Advanced Table Egg Production. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 3600.
Current practices in the commercial egg industry encompassing production, management, economics, and integration of commercial laying hen and egg operations.

POUL 4030. Advanced Breeder Production/Hatchery Management. 2 hours. 1 hour lecture and 1 lab period of 2 hours each per week.
Prerequisite: POUL 3600.
Current practices in broiler breeder management and current practices in incubation technology and hatchery management.

POUL 4050/6050. Advanced Poultry Breeding. 3 hours.
Prerequisite: POUL 3720.
The development of practical poultry breeding programs. The mode of inheritance and relative heritability of various characteristics of economic importance and criteria for effective selection toward their improvement.

POUL 4060/6060-4060L/6060L. Physiology of Avian Reproduction. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Prerequisite: BIOL 1108-1108L.
Lectures emphasize the reproductive physiology of poultry and integrate this information into management programs directed toward maximizing reproductive efficiency. Laboratories will emphasize the acquisition of skills and techniques in reproductive management, including the collection, preservation, and evaluation of semen, fertility evaluation, and proper incubation practices.

POUL 4330/6330. Basic Mycotoxicology. 3 hours.
Prerequisite: BIOL 1108-1108L and CHEM 2100 and CHEM 2100L.
Various mycotoxins which occur in feedstuffs as they relate to agricultural production. Fungal producers, chemical and physical properties of the toxins, prevalence and distribution in nature, biological effects and mode(s) of action, and means of control.

(POUL)ANNU(ADSC) 4370/6370. Monogastric Nutrition. 3 hours.
Prerequisite: [ADSC 3300-3300L or POUL 3750] and BCMB(BIOL)(CHEM) 3100.
Comparative nutrition of monogastric animals, with special but not exclusive, consideration of poultry and swine.

(PSYC) Psychology

College of Arts and Sciences, Department of Psychology

PSYC 1030H. General Psychology (Honors). 3 hours.
Not open to students with credit in PSYC 1101.
Prerequisite: Permission of Honors.
A survey of psychology, with emphasis on theoretical and methodological issues.

PSYC 1101. Elementary Psychology. 3 hours.
Not open to students with credit in PSYC 1030H.
The phenomena, laws, theories, and history of psychology. Topics include animal and human learning, motivation, perception, individual differences, social behavior, and biopsychology. Emphasis is on fundamental principles rather than on application. Students are given the opportunity to participate in ongoing research.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC 2100. Survey of Black Psychology. 3 hours.
Not open to students with credit in PSYC 4130 or AFAM 4250.
Black people as psychologists and as subjects of psychological inquiry. The history of Black psychology and African philosophy as a basis for Black psychology will be discussed. Other topics include self-concept and identity, intelligence and school achievement, the Black family, and Black speech and language.

PSYC 2101. The Psychology of Adjustment. 3 hours.
Psychological adjustment, including appropriate and inappropriate reactions to frustration and stress; solutions to conflict, fear, and anxiety; building self-concept and improving interpersonal relations.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC(AFAM) 2150. Understanding Cultural Diversity. 3 hours.
Cross-cultural psychology, including an examination of issues such as conformity, leadership, and attributional style as they vary across different cultures, with consideration of their implications for the emerging world.

PSYC 2520. Comparative Animal Behavior. 3 hours.
Prerequisite: PSYC 1101.
Methods, principles, and findings of the study of animal behavior. The value of conservation of natural populations of animals and how their behavior and the behavior of coexisting species, including humans, affects conservation.

PSYC 2530. Mental Processes. 3 hours.
Prerequisite: PSYC 1101.
Mental processes such as perception, imagery, memory, attention, problem solving, decision making, and thinking.

PSYC 2540. Basic Learning and Motivation. 3 hours.
Prerequisite: PSYC 1101.
The study of learning, including acquisition, extinction, generalization/discrimination, reinforcement, punishment, and motivation.

PSYC 2560. Interpersonal Behavior. 3 hours.
Prerequisite: PSYC 1101.
The social behavior of adults from a psychological perspective, including aggression, interpersonal attraction, leadership, conformity, and persuasion.

PSYC 2570. Applications of Psychology. 3 hours.
Prerequisite: PSYC 1101.
The applications of psychology to humans, especially for understanding, measuring, changing, and improving behavior. An introduction to personality, abnormal behavior, clinical psychology, and human relations.

PSYC 2980. Research Design in Psychology. 3 hours.
Prerequisite: PSYC 1101 and (BIOL 1103-1103L or BIOL 1107-1107L) and STAT 2000.
Design of research in psychology. Experimental and quasi-experimental design, as well as the general principles of the scientific method. Direct experience with the formulation of hypotheses, collection of data, and description of research findings is required.

PSYC 2990. Research Analysis in Psychology. 3 hours.
Prerequisite: PSYC 2980.
Basic concepts and quantitative methods used to describe, analyze, and draw logical conclusions from data collected in psychological research. Direct experience with data analysis and description of research findings is required.

(PSYC)EPSY(ARTI) 3020. Introduction to Cognitive Science. 3 hours.
Prerequisite: PSYC 1101 or PHIL 1000 or EPSY 2020.
Interdisciplinary study of mind and intelligent activity that forms cognitive sciences. Contributions of psychology, philosophy, linguistics, biology, anthropology, computer science, and education toward uncovering important aspects of the mind and intelligent activity are discussed.

(PSYC)HONS 3040H. Honors Research Methods. 2 hours. 1 lab period of 2 hours each per week.
Prerequisite: Permission of Honors.
Research methods in the Social and Behavioral Sciences to enhance directed study participation and Honors thesis/project preparation.
Non-Traditional Format: Weekly seminars focus on individual student research designs. May be held as daily seminars during May session.

(PSYC)AFAM 3150. Introduction to Black Psychology. 3 hours.
Prerequisite: Permission of department.
Deconstruction of traditional thought, behavior, and development as well as reconstruction of the same on contemporary terms; testing of nuances and varieties of multicultural and indigenous models. The designs and projected future of the Black Psychology Movement.

PSYC 3230. Abnormal Psychology. 3 hours.
Prerequisite: PSYC 1101.
The varieties of abnormal behavior: their explanation, assessment, and treatment.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC 3260. Psychology of Sex and Sexual Deviation. 3 hours.
Prerequisite: PSYC 1101.
Research in human sexual behavior. Emphasis is given to empirical findings and current personal and social

implications. Topics include variations in sexual behavior, deviance, social patterns, assessment, and treatment.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC 3300. Social and Personality Development. 3 hours.
Prerequisite: PSYC 1101.
Factors that influence children's social behavior as they are integrated into adult society. Included are basic theories and research on the development of sex roles, aggression, altruism, moral standards, dependency, independence, achievement, and peer relations.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC 3510. Theories of Personality. 3 hours.
Prerequisite: PSYC 1101.
The major theories of personality with attention given to current research and methodological issues in the field.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

PSYC 3810. Psychology of Health. 3 hours.
Prerequisite: PSYC 1101.
Psychological influences on health, illness, and responses to those states, as well as psychological origins and outcomes of health policy and health interventions.

PSYC 4100. Cognitive Psychology. 4 hours.
Not open to students with credit in PSYC 2530.
Prerequisite or corequisite: PSYC 2990.
Contemporary theories of human information processing. Major topics include attention, mental representations, categorization, short-term and long-term memory, psycholinguistics, reasoning, problem-solving, judgment, and decision making. Laboratory/research experience is included.

PSYC 4110. Learning. 4 hours.
Not open to students with credit in PSYC 2540.
Prerequisite or corequisite: PSYC 2990.
The phenomena and theories of animal and human learning, including Pavlovian conditioning, operant conditioning, discrimination learning and verbal learning, and organization and processing in memory. Laboratory/research experience is included.

PSYC 4120. Sensation and Perception. 4 hours.
Prerequisite or corequisite: PSYC 2990.
How organisms sense and perceive the environment. Topics discussed: anatomy and physiology of the sensory systems, types of stimuli affecting sensory systems, and current knowledge and theories of our perceptual abilities. Laboratory/research experience is included.

PSYC 4130. Physiological and Comparative Psychology. 4 hours.
Not open to students with credit in PSYC 2520.
Prerequisite or corequisite: PSYC 2990.
The biological bases of human and nonhuman behavior, with emphasis on underlying physiological mechanisms, and on the development, evolution, and function of behavior. Laboratory/research experience is included.

PSYC 4200. Social Psychology. 4 hours.
Not open to students with credit in PSYC 2560.
Prerequisite or corequisite: PSYC 2990.
Research and theory on social behavior, including attitudes, social influence, group dynamics, and person perception. Laboratory/research experience is included.

PSYC 4210. Psychological Testing. 4 hours.
Prerequisite or corequisite: PSYC 2990.
The measurement of individual and group differences in abilities, interests, achievement, and traits. Laboratory/research experience is included.

PSYC 4220. Developmental Psychology. 4 hours.
Prerequisite or corequisite: PSYC 2990.
Research and theory on the psychological development of the maturing human, including social/emotional and cognitive development. Laboratory/research experience is included.

PSYC 4230. Psychology of the Workplace. 4 hours.
Prerequisite or corequisite: PSYC 2990.
Major topics in industrial-organizational psychology, with emphasis on organizational and personnel psychology applied to business, industry, and government. Laboratory/research experience is included.

(PSYC)AFAM 4500/6500. Psychology of Prejudice. 3 hours.
Prerequisite: (PSYC 1101 or SOCI 1101) and senior standing.
Motivational, cognitive, social, and cultural factors that lead to discrimination in our society and various perspectives found in the research on discrimination.

(PSYC)AFAM 4550/6550. Classic Studies in Black Psychology. 3 hours.
Prerequisite: AFAM(PSYC) 3150 or permission of department.
Studies which have had major social or scientific impact on the lives of Black Americans and the way black people have been viewed within psychology. Approach is historical and interdisciplinary.

PSYC 4600/6600. Psychology of Women. 3 hours.
Prerequisite: PSYC 3230 or PSYC 4200 or PSYC 4220.
Women as the subject of psychological inquiry. Topics include personality theory, psychopathology, psychological aspects of reproductive health, psychological reaction to being victimized, and life crises.

PSYC 4650. Cognitive Development. 3 hours.
Prerequisite: PSYC 4220.
Theory and research in cognitive development from infancy to adolescence, with emphasis on symbolic thought, memory, intelligence, and individual differences.

PSYC 4700/6700. Psychology of Aging. 3 hours.
Research in gerontology, with emphasis on learning, personality, attitudes, perception, ability, and adjustment in the aged.

PSYC 4800. Special Problems. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: PSYC 2990 and permission of department.
A course for the advanced undergraduate who wishes to participate in supervised research.
Non-Traditional Format: Directed study.

PSYC 4850. Directed Readings in Psychology. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: PSYC 2990 and permission of department.
A course for the student who wishes to read comprehensively in a particular content area under the direction of a faculty member.
Non-Traditional Format: Directed study.

PSYC 4910. Advanced General Psychology. 3 hours.
Prerequisite: Permission of department.
Review, summary, and integration of psychology as a whole. Attention will be given both to content and to psychology as a profession.

PSYC 4920. History of Psychology. 3 hours.
Prerequisite: Permission of department.
The history of psychology and its antecedents, both classical and modern.

PSYC 4930/6930. Systems of Psychology. 3 hours.
Prerequisite: Permission of department.
Major theoretical systems in psychology, with special emphasis on developments of the last half-century, especially behaviorism and cognitivism.

PSYC 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: PSYC 1101 and senior standing and permission of Honors.
Supervised research, reading, or other projects.
Non-Traditional Format: Directed study.

PSYC 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: PSYC 1101 and senior standing and permission of Honors.
Supervised research, reading, or other projects.
Non-Traditional Format: Directed study.

PSYC 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: PSYC 1101 and senior standing and permission of Honors.
Supervised research, reading, or other projects.
Non-Traditional Format: Directed study.

PSYC 4990H. Honors Thesis. 3 hours.
Prerequisite: PSYC 1101 and senior standing and permission of Honors.
Individual research in his or her major or in a closely related field.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

PSYC 5100. Seminar in Psychology. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Current topics and new developments in areas of psychology which are not covered in other courses.

PSYC 5750/7750. Principles of Primate Phylogeny. 3 hours.
Prerequisite: Junior or senior standing.
Interrelationships among morphology, behavior, and systematics for students studying primate behavior.

PSYC 5760/7760. Comparative Physical and Psychological Development of the Primates. 3 hours.
Prerequisite: Junior or senior standing.
Influence of species and developmental environment on normal and abnormal behavioral development.

PSYC 5770/7770. Organization of Primate Social Groups. 3 hours.
Prerequisite: Junior or senior standing.
The interaction of ecology, phylogeny, individual behavior, and group organization from a comparative perspective.

PSYC 5850. Psychopharmacology - Drugs and Behavior. 3 hours.
Prerequisite: PSYC 4130 or permission of department.
The effects of psychoactive drugs on consciousness and behavior. The mechanisms of drug action on neurotransmitter systems are emphasized. Topics include the relationship between behavior and endogenous neurochemical activity, therapeutic agents in psychopathology, and drugs of abuse.

(READ) Reading Education

College of Education, Department of Reading Education

(READ)ACAR 0097. Academic Assistance Reading. 3 hours.
College reading and vocabulary skills.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(READ)ACAR 0098. Developing Reading and Studying Fluency. 4 hours.
Critical reading and thinking skills, reading fluency, and

vocabulary development.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(READ)ACAR 0099. Reading and Studying in College. 3 hours.
Study strategies needed to be successful in college using content from a variety of disciplines, includes reading rate and vocabulary development.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(READ)ACAR 0099L. Preparation for the Collegiate Placement Exam (CPE). 1 hour. 1 lab period of 1 hour each per week.
Computer instruction on reading rate and test preparation for Collegiate Placement Exam (CPE).
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(READ)RGTR 0198. Reading Improvement. 1 hour.
Preparation for the reading portion of the Regent's exam.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

READ 3420. Reading Instruction for Young Children. 3 hours.
Principles and methods for teaching reading in the elementary school.

READ 3430. Reading Assessment and Teaching Young Children. 3 hours.
Formal and informal methods for assessing children's reading ability and planning instruction.

READ 3520. Teaching Reading in the Middle School. 3 hours.
Principles and methods for teaching reading in the middle school.

READ 3530. Content Area Reading in the Middle School. 3 hours.
Fostering middle grade students' reading and studying in various subject areas; strategies for effective use of textual materials across the curriculum.

READ 4000. Special Problems in Reading Education. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Approved independent project pertaining to Reading Education.
Non-Traditional Format: Independent study.

READ 4010. The Teaching of Reading. 3 hours.
Methods, materials, and issues relevant to teaching reading from kindergarten through the twelfth grade.

READ 4020. The Teaching of Reading in Pre-Kindergarten. 3 hours.
For students enrolled in the pre-kindergarten education program, focusing on methods, materials and issues for the teaching of reading in pre-K classrooms.

READ 4030. Teaching Reading in the Secondary Schools. 3 hours.
The concepts and strategies for developing reading and study skills needed by students in secondary schools.

(REAL) Real Estate

Terry College of Business, Department of Insurance, Legal Studies, Real Estate and Management Science

REAL 4000. Real Estate. 3 hours.
Real estate law, markets, valuation, and finance. Designed for non-real estate majors as well as a basis for more advanced courses.

REAL 4800. Internship in Real Estate. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: REAL 4000 and permission of department.
Practical and applied experience in real estate. Student must be sponsored by a business or government agency.
Non-Traditional Format: Internship.

REAL 5070. Real Estate Development. 3 hours.
Prerequisite: REAL 4000.
Development process with particular emphasis on analyzing the feasibility of design, location, and construction.

REAL 5080. Principles of Valuation. 3 hours.
Prerequisite: REAL 4000.
Valuation of real property rights. Provides an in-depth look at conventional valuation techniques in addition to modern valuation methods based on statistical inference and industry-based computer software. A broad understanding of the role of real estate valuation within the real estate field.

REAL 5090. Real Estate Asset Management. 3 hours.
Prerequisite: REAL 4000.
Asset management decisions of individuals and corporations engaged in the real estate decision making process. Topics in real estate asset management include site selection, acquisition (lease or purchase), development, financing, management, and disposition. This is an intensive case study course intended for real estate majors.

REAL(FINA) 5100. Real Estate Finance. 3 hours.
Prerequisite: REAL 4000.
The instruments, techniques, and institutions of real estate finance; sources of funds, mortgage risk analysis; emphasis on typical policies and procedures used in financing of residential, industrial, and commercial properties.

(REAL)LEGL 5200. Real Estate Law. 3 hours.
Prerequisite: REAL 4000.
How law impacts real estate, its ownership, conveyance, and development. Real property ownership interests, restrictions on such interest, methods of transferring such interest, private and public land-use controls, and legal transactions involving real estate, such as gifts, sales, and leases.

(RELI) Religion

College of Arts and Sciences, Department of Religion

RELI 1001. Introduction to Judaism, Christianity, and Islam. 3 hours.
Judaism, Christianity, Islam, and background religions, such as those of Mesopotamia, Egypt, Greece, and Rome.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

RELI 1002. Introduction to the Religions of India, China, and Japan. 3 hours.
The religions of India, China, and Japan, such as Hinduism, Buddhism, Confucianism, Taoism, and Shinto.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

RELI 1003. Introduction to Religious Thought. 3 hours.
Religion including various theological perspectives and the philosophy of religion.

RELI 2001H. Introduction to Judaism, Christianity, and Islam (Honors). 3 hours.
Not open to students with credit in RELI 1001.
Prerequisite: Permission of Honors.
Judaism, Christianity, Islam and background religions, such as those of Mesopotamia, Egypt, Greece, and Rome.

RELI 2002H. Introduction to the Religions of India, China, and Japan (Honors). 3 hours.
Not open to students with credit in RELI 1002.
Prerequisite: Permission of Honors.
The religions of India, China, and Japan, such as Hinduism, Buddhism, Confucianism, Taoism, and Shinto.

RELI 2003H. Introduction to Religious Thought (Honors). 3 hours.
Not open to students with credit in RELI 1003.
Prerequisite: Permission of Honors.
Religion including various theological perspectives and the philosophy of religion.

RELI 2004. Introduction to Religion in Native American Cultures. 3 hours.
Native religious traditions of selected cultures of North America, with special attention to cultures of the Southeast, Great Plains, and Southwest.

RELI(AFAM) 2005. African American Religions: An Introduction. 3 hours.
Major and selected contemporary religious groups and movements among African Americans.

RELI(AFAM) 3000. The Bible in the Third World. 3 hours.
Prerequisite: RELI 1001 or RELI 1002 or permission of department.
Interpretations of the Bible in Africa, Asia, Central and South America and the influence upon minority communities in the United States.

RELI 3030. Religion and the Media. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Religion in the mass media. Topics may include the coverage of religious issues or events by the news media and the presentation of religious themes or concepts in the entertainment media.

RELI(HIST) 3150. Religion in the United States. 3 hours.
Prerequisite: Junior standing or permission of department.
The significant developments in American religious history and thought from Puritanism to the present with attention to the social and cultural contexts in which various religious movements arose.

RELI 3300. Introduction to East Asian Religions. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The history, beliefs, and practices of major traditions of China and Japan, particularly Confucianism, Taoism, and Buddhism. Special attention will be paid to the evolution of diverse forms within each tradition, and to the interactions of the different traditions.

RELI 4001/6001. Old Testament/Hebrew Bible Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature, content, and problems of the Old Testament/Hebrew Bible, with attention given to historical data, literary forms, and ancient Near Eastern cultural backgrounds.

RELI 4002/6002. Prophetic Literature of the Old Testament/Hebrew Bible. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The origin and development of the phenomenon of prophecy as it existed throughout the history of ancient Israel.

RELI 4003/6003. Ancient Israelite Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Origins of the religion of ancient Israel, its emergence from and continuities with ancient West Semitic religion and culture. Historical and comparative methods, emphasizing current knowledge of Near Eastern history and religions contemporary with ancient Israel.

RELI 4040/6040. Apocalyptic Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Apocalyptic literature from its origins in the sixth and fifth centuries BCE down to its flourishing in Hellenistic and Roman times. Texts to be studied include Isaiah 24-27, 40-66, Zechariah 9-14, Joel, Malachi, Daniel, I Enoch, IV Ezra, Baruch, Qumran material, Mark 13 and the Book of Revelation. Questions bearing on contemporary theological significance will also be discussed.

RELI 4070/6070. Judaism. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The interaction of Jewish history and Western civilization, with emphasis upon the development of Jewish religion in the biblical, rabbinic, and modern periods.

RELI 4071/6071. The Holocaust. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The background and legacy of the destruction of European Jewry from 1933 to 1945. Topics include: the historical context, Holocaust art, literature, and film, the reactions of rescuers and bystanders, and theological issues raised by the Holocaust.

RELI 4072/6072. American Judaism. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
An examination of what it means, and has meant, to be a Jew in the United States, with emphasis upon the historical experience and religious expressions of American Jews.

RELI 4080/6080. New Testament Literature. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature, content, and problems of New Testament literature, with particular attention given to its canonization and textual transmission.

RELI 4081/6081. Jesus. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Although primarily a study of what Jesus taught, attention is given to the literary and environmental background of his teaching, the historical life of the teacher, and the contemporary validity of what he taught.

RELI 4082/6082. Life and Letters of Paul. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
An historical-exegetical study of the life and letters of Paul, the relation between Acts and the Pauline epistles, early non-Pauline Gentile Christianity, Pauline theology, and its lasting impression on Christianity.

RELI 4083/6083. The New Testament World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The political, social and religious influences on the New Testament writings. Special attention is given to intertestamental Judaism and Hellenistic and Roman religion as background to New Testament Christianity.

RELI 4101/6101. History of Christian Theology (Ancient-Medieval). 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The development of Christian thought from the first through the fourteenth century as expressed in the writings and practices of the Christian community and its leading thinkers.

RELI 4102/6102. History of Christian Theology (Modern-Contemporary). 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The development of Christian thought from the fifteenth century to the present as expressed in the writings and practices of the Christian community and its leading thinkers.

RELI 4105/6105. Women in Christian History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The relationship between women and Christianity, particularly concerning matters involving gender equality in church and society.

RELI 4107/6107. American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Major and innovative religious organizations, ideas, movements, and personalities as they express themselves in particular religious settings as well as the manner in which they have influenced other aspects of American culture.

RELI(AFAM) 4201/6201. African American Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The religious traditions of African Americans from Colonial times to the present; major religious movements, personalities, and ideas and their relationship to various aspects of American culture.

RELI(AFAM) 4202/6202. Southern Religious History. 3 hours.
Prerequisite: Junior or senior standing or permission of department.

The origins, growth, and current practices of religion in the American South. The interaction between religion and other aspects of Southern culture, such as racial and gender concerns, education, Darwinian science, temperance, and politics.

RELI(AFAM) 4203/6203. The Bible in the Black Church. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Biblical interpretation in black America from 1865 to the present.

RELI 4300/6300. Islam and Its World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islam as a religious and sociocultural phenomenon. The fundamental principles of the Islamic faith, Qu'ran, the Sunna of Muhammad, Islamic sectarianism, Islamic law, theology, and mysticism, and themes in Islamic art. The course will also survey Islam in its various forms throughout the world.

RELI 4301/6301. Islamic Thought in the Caliphal Age. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic scholarship from the eighth through the fourteenth centuries. Principal topics covered will include the Qur'an and Qur'anic exegesis, the Hadith tradition, Islamic law, theology, philosophy, and Sufi mysticism.

RELI 4302/6302. Islam and the Modern World. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic modernism and revivalism as a response to Western cultural penetration since the eighteenth century. Subjects covered will include Sufi reformism, Wahhabism, the Salafiyya movement, Islamic "Fundamentalism," the Iranian Revolution, women's rights, and Western perceptions of Islam.

RELI 4303/6303. The Sufi Way. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Islamic mysticism, both as a set of metaphysical doctrines and as it is expressed in religious practices. Particular attention will be given to the doctrinal development of Sufism, its literature, major figures, and the process of consciousness transformation.

RELI 4400/6400. The History of Religions. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The nature of early primitive religions and the main outlines of the chief living religions of the world. The method will be both historical and analytical.

RELI 4401/6401. The Buddhist Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Buddhism from its origin in the life and teachings of the Buddha through the period of philosophical ferment in India, and its thought and institutions in the East and the West up to the present.

RELI 4402/6402. Confucianism and Chinese Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Confucianism and its place in traditional Chinese religion, thought, and culture. Emphasis on the teachings of foundational thinkers such as Confucius, Mencius, and Hsun-tzu.

RELI 4403/6403. The Taoist Tradition. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Taoism and its place in traditional Chinese religion, thought, and culture. Emphasis on the classical texts, Lao-tzu and Chuang-tzu; the evolution of the later Taoist religion; and the many varieties of Taoist spirituality.

RELI 4404/6404. Japanese Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Religion in Japan from earliest times to the present, with emphasis upon Shinto, the domestication of Buddhism, and the relationship of religion to the Japanese state and "national identity." Particular attention given to the development of Zen in Japan.

RELI(PHIL) 4500/6500. Philosophy of Religion. 3 hours.
Prerequisite: RELI 1003 or PHIL 1000 or PHIL 2200 or PHIL 2400.
The meaning, nature, and validity of religious discourse, beliefs, and practices, involving theories concerning the existence and nature of God and humanity's relation to God.

RELI 4510/6510. Indian Philosophy and Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Traces the path of India's religious and philosophical thought from the Indus civilization to the present. Attention will be given to interpreting the orthodox Hindu systems as well as Buddhism and their related religious practices, ethics, castes, and sects.

RELI 4520/6520. Constructive Theology. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The aims, methods, and content of theology as related to the theistic religions of humanity.

RELI 4530/6530. Theology and Culture. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
The relation of theology to philosophy, science, technology, and the arts, with special attention to the

theological attempts to deal with the impact of science and technology upon culture and civilization.

RELI(ANTH) 4640/6640. Anthropology of Religion. 3 hours.
Prerequisite: Junior or senior standing or permission of department.
Anthropological approaches to the world's major religions as they relate to complex societies.

RELI 4800. Reading and Research in Religion. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Directed study in reading and research in religion.
Non-Traditional Format: Directed study.

RELI 4900. Topics and Problems. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of department.
Topics and problems in religion with emphasis upon extensive reading in primary sources and individual and/or group research projects. Selection of topics will vary with instructor and interest of students.
Non-Traditional Format: Directed study.

RELI 4910/6910. Topics in Asian Religions. 3 hours. Repeatable for maximum 9 hours credit. 3 lab periods of 3 hours each per week.
Prerequisite: RELI 3300 or permission of department.
Selected topics in the study of one or more of the religions of Asia.

RELI 4960H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

RELI 4970H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading or projects under the direction of a project director.
Non-Traditional Format: Directed study.

RELI 4980H. Directed Reading and/or Projects (Honors). 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

RELI 4990H. Honors Thesis. 3 hours. 3 lab periods of 3 hours each per week.
Prerequisite: Permission of Honors.
Individual research in the field of his/her major or in a closely related field.
Non-Traditional Format: Directed study.

(RLST) Recreation and Leisure Studies

College of Education, Department of Recreation and Leisure Studies

RLST 1030. Professional Opportunities in Recreation and Leisure Services. 1 hour.
Not open to students with credit in RLST 2030.
Professional opportunities in recreation, parks, and leisure services.

RLST 2030. Introduction to Recreation and Leisure Studies. 3 hours.
Not open to students with credit in RLST 1030.
Prerequisite: Permission of major.
The history and development of the organized park and recreation movement, the theoretical underpinnings of recreation and leisure studies, and contemporary recreation and leisure services.

RLST 2800. Programming in Leisure Services. 3 hours.
Prerequisite: RLST 2030 or permission of department.
A comprehensive approach to leisure programming. Emphasis on elements of program planning and organization, leadership, and supervision.

RLST 2800L. Laboratory in Recreation Leadership. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: RLST 2030 or permission of department.
Corequisite: RLST 2800.
Techniques of leadership in recreation and leisure settings.

RLST(FORS) 3310. Outdoor Recreation and Environmental Awareness. 3 hours.
Prerequisite: Permission of major.
Environmental policies and land ethics of natural resource management agencies. Emphasis will be placed on understanding outdoor recreation behavior and issues arising from human-environment interactions, including carrying capacities and human-wildlife conflicts.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

RLST 3450. Practicum in Recreation and Leisure Services. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: (RLST 2800 and RLST 2800L) or permission of department.
Volunteer work in a local leisure service agency.
Non-Traditional Format: Student performs forty five hours of volunteer service work in an area leisure service agency.

RLST 3850. Recreation for Special Populations. 3 hours.
Prerequisite or corequisite: RLST 2030.

Recreation service delivery to special populations. Solutions to barriers to full leisure participation placed before the developmentally disabled and physically impaired.

RLST 4000. Special Problems in Recreation and Leisure Studies. 1-6 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of major.
Specialized study in recreation and leisure studies. May involve intensive library investigation, the collection and analysis of original data pertinent to a given problem, or course work on a new topic with other students.
Non-Traditional Format: Student does directed reading with faculty member or group of students meet with faculty member on special topics course.

RLST 4020. Introduction to Therapeutic Recreation. 3 hours.
Prerequisite or corequisite: RLST 2800 and RLST 2800L and RLST 3850.
Historical, philosophical, and professional foundations of therapeutic recreation. Topics include the continuum of service and settings, terminology used, interrelationships in allied health, participant characteristics, and professional issues.

RLST 4030. Therapeutic Recreation Facilitation Techniques. 3 hours.
Prerequisite or corequisite: RLST 4020.
Facilitation techniques employed in therapeutic recreation. Topics include leisure education, life management skills, and therapeutic activity skills.

RLST 4040. Therapeutic Recreation Processes. 3 hours.
Prerequisite: (RLST 2800 and RLST 2800L and RLST 3850) or permission of department.
Programming, leadership strategies, and professional issues.

RLST 4270. Outdoor Recreation Field Laboratory. 3 hours.
Prerequisite: RLST 2030 or permission of department.
Field trip to study experimental campground design and construction, energy alternatives, environmental education programs, and interpretation programs. Various state and federal recreation professionals meet with the group to discuss intensive recreation resource management techniques.
Non-Traditional Format: Intensive eight-day field trip.

RLST 4840. Environmental Interpretation for Recreation. 3 hours.
Prerequisite: RLST 2030 or permission of department.
Methods, principles, and philosophies of environmental interpretation in natural systems, with specific reference to natural resource recreation contexts. The roles of environmental education and persuasive communication in promoting environmental attitudes and behaviors will be emphasized.

RLST 4870. Organization and Administration of Leisure Services. 3 hours.
Prerequisite: RLST 2030 or permission of department.
Prerequisite or corequisite: RLST 2800 and RLST 2800L.
Management principles, concepts, and practices applied to organizing and administering recreation and park services.

RLST 4890. Seminar in Recreation as a Profession. 1 hour.
Prerequisite or corequisite: RLST 2800.
Current aspects of the field of recreation as a profession. Trends and problems of concern to graduating recreation majors preparing for internships.

RLST 4900. Research and Evaluation in Leisure Services. 3 hours.
Prerequisite: RLST 2800 and RLST 2800L.
The nature and value of research in leisure services. Understanding and using research, including needs assessment and program evaluation, in management, planning, and administration of leisure facilities and programs.

RLST 5130/7130. Leisure Education. 3 hours.
Prerequisite: (RLST 2800 and RLST 2800L) or permission of department.
Principles of educating for leisure. Review of techniques for enhancing leisure awareness, leisure attitudes, decision-making skills, and resource utilization. Emphasis is on the recreation professional's facilitative role in assisting individuals and groups to achieve satisfying lifestyles.

RLST 5320/7320. Women and Leisure. 3 hours.
Prerequisite: Permission of department.
Feminist critique of leisure traditions, including women's representation in leisure theories and services. Examines leisure as a context for hegemonic relationships.

RLST 5340/7340. Advanced Administrative Practices in Leisure Services. 3 hours.
Prerequisite: RLST 4870 or permission of department.
Techniques in budgeting and finance, personnel management, facility management, and public relations, as well as organizational theory and legislative issues.

RLST(FORS) 5400/7400-5400L/7400L. Park Management. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Management of public lands and open spaces, including management tools, type and nature of physical effects, visitor management principles, and site development. Use of maps, aerial photos, and compass in recreation area development.

RLST 5430/7430. Camping Administration. 3 hours.
Prerequisite: RLST 4870 or permission of department.
Camps with particular emphasis on program planning, selection and training of staff, campsite selection and development, health and safety, accessibility, and program evaluation.

RLST 5700. Internship in Recreation and Leisure Services. 15 hours.
Prerequisite: Permission of major.
Field placement in leisure service agency for entire semester. Training in provision and management of leisure programs and/or resources with agency and faculty supervisor.
Non-Traditional Format: Full time (forty hours/week) supervised field work.

(RMIN) Risk Management and Insurance

Terry College of Business, Department of Insurance, Legal Studies, Real Estate and Management Science

RMIN 4000. Risk Management and Insurance. 3 hours.
Risk identification, risk evaluation, and risk treatment methods. Consideration is given to both business and personal risks, with an emphasis on insurance as a risk management tool. Designed for non-majors as well as a basis for more advanced courses.

RMIN 4000H. Risk Management and Insurance (Honors). 3 hours.
Not open to students with credit in RMIN 4000.
Risk identification, risk evaluation, and risk treatment methods for Honors students. Consideration is given to both business and personal risks, with an emphasis on insurance as a risk management tool. Designed for non-majors as well as a basis for more advanced courses.

RMIN 4800. Internship in Risk Management and Insurance. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: RMIN 4000 and permission of department.
Practical and applied experience in risk management and insurance. Student must be sponsored by a business or government agency.
Non-Traditional Format: Internship.

RMIN 5100. Commercial Property and Liability Insurance. 3 hours.
Prerequisite: RMIN 4000.
Property and liability risks and the effective management of these risks with insurance. Application of property insurance to pure risk exposures including direct and indirect property. Application of liability insurance to general business liability and catastrophic liability risks. Current topics in the field of commercial property and liability insurance. Group case study.

RMIN 5110. Employee Benefits. 3 hours.
Prerequisite: RMIN 4000.
Approaches to problems of employee security from the perspective of businesses. Topics include pensions, profit-sharing plans, 401(k) plans, group life and health plans, and flexible benefit programs.

RMIN 5510. Life Insurance. 3 hours.
Prerequisite: RMIN 4000.
Individual life, health, and annuity contracts within a financial planning context.

RMIN 5530/7530. Advanced Property Insurance. 3 hours.
Prerequisite: RMIN 5100 or permission of department.
Property risks facing businesses and the effective management of these risks with insurance. Practical application of property insurance to pure risk exposures, including direct and indirect property, inland marine, crime, boiler and machinery, and catastrophic property risks.

RMIN 5540/7540. Advanced Liability Insurance. 3 hours.
Prerequisite: RMIN 5100 or permission of department.
Liability risks facing businesses and the effective management of these risks with insurance. Practical application of liability insurance to pure risk exposures, including motor vehicle liability, professional and general liability, environmental liability, employment practices and workers' compensation, and fiduciary liability.

RMIN 5570. Insurer Operations and Policy. 3 hours.
Prerequisite: RMIN 4000.
Analysis of insurer operations and the issues facing managers of such operations. Topics covered include regulation, accounting, finance, marketing, underwriting, reinsurance, ratemaking, and claims.

RMIN 5950. Corporate Risk Management. 3 hours.
Prerequisite: RMIN 5100.
The operational and financial risks faced by firms and the study of various methods of handling these risks, including loss prevention, risk retention, self-insurance, corporate insurance programs, and capital markets.

(ROML) Romance Languages

College of Arts and Sciences, Department of Romance Languages

ROML 2550. Latino Literature, Language, and Culture. 3 hours.
Not open to students with credit in SPAN 2550.
Critical analysis of the literary, socio-linguistic, and cultural presence of representative Hispanic groups in the United States. Designed for non-speakers of Spanish. Given in English.

ROML 3000. Topics in Romance Languages. 3 hours
Selected topics in the Romance Languages. Taught in English. No credit allowed to majors and minors in the Romance Languages.

(ROML)AFAM 4860/6860. Topics in Afro-Hispanic Identity. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Representations of Africa and African American culture in Hispanic Literature by writers of African descent. By covering a variety of genres, the course will provide discussion about a cultural identity that is constantly in dialogue with dominant discourses. The course will incorporate critical texts.

(RUSS) Russian

College of Arts and Sciences, Department of Germanic and Slavic Languages

RUSS 1001. Elementary Russian I. 4 hours.
Fundamentals of Russian grammar, conversation, pronunciation, and reading, with an emphasis on oral proficiency and comprehension.

RUSS 1002. Elementary Russian II. 4 hours.
Prerequisite: RUSS 1001.
A continuation of Elementary Russian I.

RUSS 2001. Intermediate Russian I. 3 hours.
Prerequisite: RUSS 1002.
Review of basic grammar and study of more advanced grammatical topics. Oral proficiency, comprehension, and vocabulary building are emphasized. Includes reading and discussion of various Russian texts.

RUSS 2002. Intermediate Russian II. 3 hours.
Prerequisite: RUSS 2001.
A continuation of Intermediate Russian I.

RUSS 2050. Modern Russian Culture. 3 hours.
Russian culture in the twentieth century. Examines both high culture (literature, art, architecture, classical music) and low or popular culture (film, popular music, various aspects of daily life) within the framework of the historical and political development of the period. No knowledge of Russian required.

RUSS 3000. Business Russian. 3 hours.
Prerequisite: RUSS 2002.
Further development of communicative competence and cultural knowledge with a focus on practical application in business contexts. Study of various aspects of Russian business, including business correspondence and other types of documents.

RUSS 3001. Russian Conversation and Composition I. 3 hours.
Prerequisite: RUSS 2002.
Development of students' abilities to express themselves accurately in spoken and written Russian and to comprehend normal Russian speech.

RUSS 3002. Russian Conversation and Composition II. 3 hours.
Prerequisite: RUSS 3001.
A continuation of Russian Conversation and Composition I.

RUSS 3200. Russian Culture. 3 hours.
Prerequisite: RUSS 2002.
Russian culture from the period of Kievan Rus' to the 1917 Revolution. Designed to increase the student's proficiency in all language skills and to build vocabulary. Conducted in Russian.

RUSS 3990. Directed Study in Russian. 1-3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
Independent study and research under the direction of individual faculty members.
Non-Traditional Format: Directed study.

RUSS 4001. Advanced Russian Conversation and Composition. 3 hours.
Prerequisite: RUSS 3002.
Advanced language study, combining instruction in grammar, composition, and stylistics with practice in spoken Russian.

RUSS 4050. Nineteenth-Century Russian Prose in English Translation. 3 hours.
Representative works of nineteenth-century Russian literature. The class is conducted in English and all readings are in English translation.

RUSS 4060. Twentieth-Century Russian Prose in English Translation. 3 hours.
Representative works, including authors from the Silver Age, Soviet, and post-Soviet periods. The class is conducted in English and all readings are in translation.

RUSS 4250. Pushkin. 3 hours.
Prerequisite: RUSS 3001 or RUSS 3200.
Alexander Pushkin's major works in poetry and prose, and his role in the development of the Russian literary language. Conducted in Russian.

RUSS 4260. Introduction to Nineteenth-Century Russian Literature. 3 hours.
Prerequisite: RUSS 3001 or RUSS 3200.
Representative works in the original language. Conducted in Russian.

RUSS 4270. Introduction to Twentieth-Century Russian Literature. 3 hours.
Prerequisite: RUSS 3001 or RUSS 3200.
Representative works in the original language. Conducted in Russian.

RUSS 4510. Special Topics. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: RUSS 3002 or permission of department.
Seminar focusing on specific topics in Russian literature and culture or Russian and Slavic linguistics.

RUSS 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: RUSS 3001 and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

RUSS 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: RUSS 3001 and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

RUSS 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Thesis for Honors students.
Non-Traditional Format: Thesis course.

(SEMI) Semitic

College of Arts and Sciences, Department of Religion

SEMI 4001/6001. Elementary Aramaic/Syriac. 3 hours.
Prerequisite: HEBR 2004 or permission of department.
Aramaic and/or Syriac grammar, especially as related to Hebrew, along with simple readings from religious texts.

(SOCI) Sociology

College of Arts and Sciences, Department of Sociology

SOCI 1101. Introductory Sociology. 3 hours.
Basic concepts, theoretical approaches, and methods of sociology, with an emphasis on culture, socialization, social organizations, and major institutions.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 1101H. Introductory Sociology (Honors). 3 hours.
Not open to students with credit in SOCI 1101.
Prerequisite: Permission of Honors.
Basic concepts, theoretical approaches, and methods of sociology, with an emphasis on culture, socialization, social organization, and major institutions.

SOCI 1600. Social Problems. 3 hours.
The causes, consequences, and social construction of American social problems, including poverty, crime and delinquency, environmental degradation, and race and ethnic relations.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI(AFAM) 2020. African American Society. 3 hours.
The class, status, and power relations of African Americans as part of both the United States social structure and the African diaspora.

SOCI 2090. Social Change. 3 hours.
The causes, nature, and consequences of changes in social structure and institutions.

(SOCI)GEOG(ANTH)(CMLT)(HIST) 2100. Introduction to Africa. 3 hours.
The history, physical environment (landforms, vegetation, and climate), and sociocultural environment (artistic, political, and social development) of Africa.

SOCI 2400. Environmental Sociology. 3 hours.
The social causes and consequences of resource scarcity and environmental depletion. Topics include world population growth, pollution, depletion of energy sources, species extinction, and environmental movements.

SOCI 2420. Class, Status, and Power. 3 hours.
Modern social status systems, with a focus on the United States. The use of prestige, occupational skills, and economic assets to create classes; the impact of class on life chances; and the interaction of class with race, gender, and belief systems to shape individual earnings, wealth, and power.

SOCI 2470. Deviance and Social Control. 3 hours.
The nature, extent, and correlates of deviance and its control by social institutions and agencies; theories of deviance and societal reactions to deviance.

SOCI 2500. Culture and Social Institutions. 3 hours.
Social institutions that are the foundation of social and cultural continuity from one generation to the next, including family and kinship, education, religion, work, and politics.

SOCI 2730. Social Interaction. 3 hours.
The relationship between individuals and groups, as it shapes the development of social competence, personality, self-concept, motivation, attitudes and cognition.

SOCI 2750. Sociology of Work and Industry. 3 hours.
The structure of work and industry with an emphasis on the rise of management and the modern corporation, the growth and decline of labor unions, and the emergence of service industries.

SOCI(AFAM) 2820. Race and Ethnicity in America. 3 hours.
The causes and consequences of race and ethnic discrimination in America, with a focus on ethnic competition and conflict.

SOCI 2850. Sociology of Poverty. 3 hours.
The origins and social construction of poverty; theories of the origin and perpetuation of poverty.

SOCI 3000. Sociology in Film. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Popular Hollywood films as they illustrate culture, social class, race, gender, identity, and other sociological concepts. The ideological and utopian aspects of film are emphasized.

SOCI 3010. Sociology of Culture. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Recent trends in American culture, focusing on traditions, practices, and products, including books, music, and film. Organizing themes are culture as both a source of social integration and an arena of strife, and the reciprocal effects of culture and human agency.

SOCI 3060. Sociology of Education. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Mainstream and critical theories of how society shapes the purposes, processes, and organization of schools; current policy issues and sources of national education data, with primary focus on United States elementary and secondary schools.

SOCI 3070. Juvenile Delinquency. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The juvenile justice system, including the measurement of delinquency, contexts of adolescent socialization, and techniques of evaluation research.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 3100. Sociology of Medicine. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Social factors in health and illness, with an emphasis on United States society. Topics include the socialization of health professionals; the organization and finance of health care systems; and ethical and political issues related to health.

SOCI 3140. Social Control of Crime. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The nature of responses to crime by victims, criminal justice agencies, and other institutions; theories explaining reactions to crime.

SOCI 3150. Criminal Punishment and Society. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The relationship between society and the nature and extent of American punishment over time; theories of and justifications for punishment.

SOCI 3220. Development of Sociological Theory. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Pivotal sociological theorists from classic theorists such as Marx, Weber, and Durkheim to the present.

SOCI 3230. Sociological Theory: The German Tradition. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The German theoretical tradition, beginning with Marx and continuing with Wilhelmine-era sociologists, particularly Simmel and Weber; the Weimer and Nazi periods; and postwar critical theorists, notably Habermas.

SOCI 3250. Social Movements and Collective Behavior. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The origin, nature, and processes of crowd behavior and social change movements.

SOCI 3270. Personality and Social Structure. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The social factors that shape behavior and self-concept; theories such as behaviorism, symbolic interactionism, Freudian psychology, cognitive social psychology, and critical approaches. Topics include emotions, human development, and authenticity and sincerity in the postmodern age.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 3280. Sociology of Gender. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Feminist theories and methodologies on gender, with an emphasis on contemporary American society and the intersection of gender, race, and class. Topics include socialization, sexual orientation, reproduction, violence, family and household, work and global restructuring, and politics.

SOCI(AFAM) 3300. Global Perspectives on Racism and Sexism. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Race and gender relations and discrimination around the globe; the origins and practice of race and gender domination and empowerment in the Americas, Africa, Asia, Europe, the Middle East, and the Pacific Rim.

SOCI(AFAM) 3310. Race and Culture. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.

Evolution of cultures among racial groups as part of, and in contrast to, Western civilization. Particular attention is given to the ways race and culture intersect to provide styles, practices, and patterns of living for individuals in contemporary society.

SOCI 3320. Sociology of Urban Life. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The use of urban areas by individuals and institutions. Topics include urban ecology, crime, residential segregation, and poverty.

SOCI(POLS)(ANTH) 3450. Sociopolitical Ecology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The relationship between humans and their environment; ecological and social theories about environmental policies and problems.

SOCI 3460. Political Sociology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Theoretical approaches to the state; the formation and legitimation of nations; collective action, social movements, and revolutions. Focus will be on issues of class, gender, and race.

SOCI 3500. Sociology of the Political Economy. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The balance of political power between classes, races, and nations, and how it shapes the economic forces that determine social order and the success or failure of social change.

SOCI 3590. Qualitative Methods of Social Research. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Qualitative sociological analysis that emphasizes participant observation, intensive interviewing, and analysis of text; examples of field work studies; the design and completion of an independent field research project.

SOCI 3600. Logic and Practice of Sociological Research. 3 hours.
Prerequisite: [(SOCI 1101 or SOCI 1600) and STAT 2000] or permission of department.
The basic ideas and techniques used to conduct and evaluate research. Topics include the purposes and types of social research; the logic and interpretation of bivariate and multivariate data analysis; and the use of microcomputers to analyze evidence commonly used in social research.

(SOCI)POLS 3700. Research Methods in Criminal Justice. 3 hours.
Not open to students with credit in POLS 4150.
Prerequisite: POLS 1101-1101D.
Corequisite: POLS(SOCI) 3700L.
Fundamental principles of social science research and related research design. Structured to develop students' abilities to think clearly, critically, and logically about social science issues through the scientific evaluation of empirical issues and evidence.

(SOCI)POLS 3700L. Research Methods in Criminal Justice Laboratory. 1 hour. 1 hour lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in POLS 4150L.
Corequisite: POLS(SOCI) 3700.
Fundamental principles of social science research and related research design. Structured to develop students' abilities to think clearly, critically, and logically about social science issues through the scientific evaluation of empirical issues and evidence.

SOCI 3730. Social Psychology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The relationship between individuals and groups, as it shapes the development of social competence, personality, self-concept, motivation, attitudes, and cognition.

SOCI 3740. Sociology of Sport. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The structural and cultural relationship of sport to society; contemporary issues in sport.

SOCI 3810. Criminology. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The nature, extent, and correlates of crime; theories of criminal behavior and victimization.

SOCI 3820. Communities and Crime. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Theory and research on urban crime and spatial variation in crime rates; the impact of crime on the structure of communities and its role in neighborhood decline.

SOCI 3830. Violence and Society. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Theory and research on the relationship between criminal violence and social structure and processes.

SOCI 3850. Sociology of Occupations. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Major processes including occupational choice, socialization, careers, and professionalization; contemporary issues concerning women and work, minorities and work, the consequences of bureaucratic and technological changes, and the impact of work on non-work behavior.

Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 3860. Sociology of Alcohol and Drug Use. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Sociohistorical analysis of cultural and policy changes regarding alcohol and psychoactive drugs; theoretical approaches to defining abuse and addiction; causes of substance abuse; treatment strategies, especially Alcoholics Anonymous; and intervention strategies, especially those based in the workplace.

SOCI 3950. Sociology of Organizations. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Research and theories emphasizing organizational structures and cultures; bureaucracies and their alternatives; the control of workers; and the role of gender in organizations.

SOCI 4010. Seminar in Culture. 3 hours.
Prerequisite: SOCI 3010 or permission of department.
Special topics in culture for advanced undergraduates.

SOCI 4240/6240. Sociology of War and the Military. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
War as a phenomenon with social causes and consequences; the military as an occupation and organization. Topics include conscription; the historical experiences of women and minorities in the military; and war as a source of collective memory for generations, ethnic groups, and nations.

SOCI 4260. Seminar in Sociological Theory. 3 hours.
Repeatable for maximum 9 hours credit.
Prerequisite: SOCI 3220 or permission of department.
Selected topics in classic and contemporary theory for advanced undergraduates.

SOCI 4270. Gender and Work. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Research and theories on the role of gender in shaping labor market opportunities, experiences, and rewards; remedies for enduring problems, including those applied in United States workplaces; and new research directions.

SOCI 4280. Global Perspectives on Gender. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The diverse social and cultural manifestations of gender located within an economic, social, and political context. Case studies drawn from Africa, Asia, the Middle East, Latin America, and the Caribbean.

SOCI 4350. Seminar in Work and Occupations. 3 hours.
Prerequisite: SOCI 2750 or SOCI 3850 or SOCI 3950 or permission of department.
The organization of work and occupational processes, such as the emergence of temporary and contract work, the decline of manufacturing jobs and the rise of the service sector, and the impact of technology on the structure of work and the experiences of workers.

SOCI(AFAM) 4370. Seminar in Race and Ethnicity. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
Special topics in race and ethnicity for advanced undergraduates.

SOCI 4470. Seminar in Deviance and Social Control. 3 hours.
Prerequisite: [SOCI 1101 or SOCI 1600] and SOCI 2470.
Special topics in deviance and responses to deviance, with an emphasis on theoretical perspectives.

(SOCI)CHFD 4610/6610. The Family. 3 hours.
Prerequisite: Undergraduate level only: CHFD 2100.
Family study utilizing data from the fields of anthropology, individual and social psychology, history, sociology, economics, and psychiatry.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SOCI 4650/6650. Sociology of Aging. 3 hours.
Prerequisite: SOCI 1101 or SOCI 1600 or permission of department.
The status, roles, and demographic aspects of the aging population and its relationship with social institutions.

SOCI 4730. Seminar in Social Psychology. 3 hours.
Prerequisite: SOCI 3270 or SOCI 3730 or permission of department.
Special topics in social psychology for advanced undergraduates.

SOCI 4830. Sociology of Law. 3 hours.
Prerequisite: (SOCI 1101 or SOCI 1600) and SOCI 2470.
The nature of law, and the ways the legal system reflects its broader social context.

SOCI 4900. Supervised Research in Sociology. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Research conducted under the direction of a faculty member; includes a review of the literature, data collection and analysis, and interpretation of research findings.
Non-Traditional Format: Weekly meetings arranged between instructor and student.

SOCI 4960H. Supervised Research in Sociology (Honors). 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of Honors.
Research conducted under the direction of a faculty member, including a review of the literature, data collection and analysis, and interpretation of research findings.
Non-Traditional Format: Weekly meetings arranged between instructor and student.

(SOCI)POLS 5500. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.
An internship specifically designed for and required of students pursuing a degree in criminal justice. Centers on regular and systematic analysis of experimental learning under direct faculty supervision.
Non-Traditional Format: Student works independently and meets with project director several times during the semester to monitor progress and discuss requirements for written paper.

(SOCI)POLS 5510. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.
An internship specifically designed for and required of students pursuing a degree in criminal justice. Centers on the design, execution, and reporting of original research related to the specific placement or internship.
Non-Traditional Format: Internship.

(SOCI)POLS 5520. Criminal Justice Internship. 4 hours.
Prerequisite: POLS 1101-1101D.
An internship specifically designed for and required of students pursuing a degree in criminal justice. Criminal justice students are required to intern in an approved agency full time over the semester.
Non-Traditional Format: Internship.

(SOWK) Social Work

School of Social Work

SOWK 2101. The Social Welfare Institution. 3 hours. Not open to students with credit in SOWK 2107H.
History and current status of social welfare programs and services in the United States. Philosophical, religious, economic, and political perspectives on social welfare. A comparison of approaches to social welfare in the United States and other developed nations.

SOWK 2107H. The Social Welfare Institution (Honors). 3 hours. 1.5 lab periods of 4 hours each per week. Not open to students with credit in SOWK 2101.
Prerequisite: Permission of Honors.
History and current status of social welfare programs and services in the United States. Philosophical, religious, economic, and political perspectives on social welfare. A comparison of approaches to social welfare in the United States and other developed nations.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing, and discussion skills, and which require extensive work out of class, will be the primary delivery method.

SOWK 2154. The Profession of Social Work. 4 hours. 3 hours lecture and 1 lab period of 1 hour each per week.
History and current status of the profession of social work. The role of the social worker in various fields of practice. The profession's commitment to social and economic justice for vulnerable and oppressed populations. The person-in-environment perspective. Communication and interviewing skills lab.

SOWK 5326. Foundations of Social Work Research. 3 hours. 1 lab period of 1.5 hours each per week.
Prerequisite: SOWK 5524.
Corequisite: SOWK 5534 and SOWK 5757 and SOWK 5835.
Basic principles of social science research based on the scientific method. Analytical and evaluative methods of knowledge building and application in social work and social welfare settings. Empirically based practice and the evaluation of the individual social worker's own practice interventions.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing, and discussion skills, and which require extensive work out of class, will be used.

SOWK 5524. General Practice of Social Work I. 8 hours. 4 hours lecture and 4 lab periods of 1 hour each per week.
Prerequisite: SOWK 2101 and SOWK 2154.
Theory and practice of generalist social work. Knowledge, skills, and ethical principles needed for beginning social work practice. Problem identification, assessment, intervention, and evaluation of practice with individuals from a person-in-environment perspective. Lab emphasizes application of theory to cases involving individuals as clients.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing and discussion skills, and which require extensive work out of class, will be used.

SOWK 5534. General Practice of Social Work II. 3 hours. 1 lab period of 1.5 hours each per week.
Prerequisite: SOWK 5524.
Corequisite: SOWK 5326 and SOWK 5757 and SOWK 5835.
A continuation of General Practice of Social Work I. Generalist practice principles applied to groups, organizations, and communities. Lab will emphasize application of theory to group and organizational settings and use of management information technology in social work practice.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing and discussion

skills, and which require extensive work out of class, will be used.

SOWK 5544. General Practice of Social Work III. 3 hours. 1.5 lab periods of 1.5 hours each per week.
Prerequisite: SOWK 5534.
Corequisite: SOWK 5701 and SOWK 5767 and SOWK 5845.
A continuation of General Practice of Social Work II. Generalist practice principles applied to various family types. Issues related to gender, race, ethnicity, sexual orientation, and age as they affect family functioning over time and in community contexts. Lab will emphasize application of theory regarding family centered practice to cases.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing and discussion skills, and which require extensive work out of class, will be used.

SOWK 5701. Social Welfare Policy and Services. 3 hours. 1 lab period of 1.5 hours each per week.
Prerequisite: SOWK 5524.
Corequisite: SOWK 5544 and SOWK 5767 and SOWK 5845.
Social insurance, public assistance, and social service programs in the United States. Social welfare within a capitalist economy and an individualistic, democratic society. The influences of American economics and politics on social services and social work practice. Introduction to models of policy analysis.
Non-Traditional Format: Learning teams, which promote critical thinking, research, writing and discussion skills, and which require extensive work out of class, will be used.

SOWK 5757. Current Issues in Social Work I. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: SOWK 5524.
Corequisite: SOWK 5326 and SOWK 5534 and SOWK 5835.
Current problems and issues in social work and social welfare specifically drawn from interests and experiences of students enrolled.

SOWK 5767. Current Issues in Social Work II. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: SOWK 5534.
Corequisite: SOWK 5544 and SOWK 5701 and SOWK 5845.
A continuation of Current Issues in Social Work I.

SOWK 5835. Practicum in Social Work I. 5 hours.
Prerequisite: SOWK 5524.
Corequisite: SOWK 5326 and SOWK 5534 and SOWK 5757.
A minimum of twenty hours per week of supervised social work practice in a social agency.
Non-Traditional Format: Practicum. Twenty hours per week under supervision in an approved social agency.

SOWK 5845. Practicum in Social Work II. 5 hours.
Prerequisite: SOWK 5534.
Corequisite: SOWK 5544 and SOWK 5701 and SOWK 5767.
A continuation of Practicum in Social Work I.
Non-Traditional Format: Twenty hours per week under supervision in an approved social agency.

SOWK 5908. Directed Readings in Social Work. 1-9 hours. Repeatable for maximum 9 hours credit.
Individual study, reading, or projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

SOWK 5908H. Directed Readings in Social Work (Honors). 1-9 hours. Repeatable for maximum 9 hours credit.
Not open to students with credit in SOWK 5908.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a faculty member.
Non-Traditional Format: Directed study.

SOWK 5998H. Honors Thesis. 1-9 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of Honors.
Individual research under the direction of a faculty member.
Non-Traditional Format: Thesis.

(SPAN) Spanish

College of Arts and Sciences, Department of Romance Languages

Certain courses in Spanish are not open to native speakers. A native speaker is defined as a person who graduated from a secondary school in which the language of instruction was Spanish.

SPAN 1001. Elementary Spanish. 4 hours.
Not open to students with credit in SPAN 1002 or two or more years of Spanish in high school.
Open only to students who have had fewer than two years of high school Spanish. Emphasis on conversational Spanish. Development of listening comprehension, speaking, reading, and writing skills. Fundamentals of Spanish grammar and pronunciation. Introduction to Spanish-speaking cultures. Work in the language laboratory. Given in Spanish.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPAN 1002. Elementary Spanish. 4 hours.
Not open to students with credit in SPAN 1110.
Prerequisite: SPAN 1001.
A continuation of Elementary Spanish. Emphasis on conversational Spanish. Development of listening comprehension, speaking, reading, and writing skills.

Fundamentals of Spanish grammar and pronunciation. Study of Spanish-speaking cultures. Work in the language laboratory. Given in Spanish.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPAN 1110. Accelerated Elementary Spanish. 4 hours.
Not open to students with credit in SPAN 1001 or SPAN 1002 or college credit in Spanish.
Prerequisite: Placement Test.
Accelerated course reviewing basic principles of the Spanish language for students with some background of high school Spanish. Given in Spanish.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPAN 2001. Intermediate Spanish. 3 hours.
Not open to students with credit in SPAN 2002.
Prerequisite: SPAN 1002 or SPAN 1110 or permission of department.
Content-based review of Spanish grammar and systematic vocabulary and skill development. Integration of language, culture, and literature. Given in Spanish.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPAN 2002. Intermediate Spanish. 3 hours.
Not open to students with credit in SPAN 2120H or SPAN 3010.
Prerequisite: SPAN 2001 or permission of department.
A continuation of Intermediate Spanish. Context-based review of Spanish grammar and systematic vocabulary and skill development. Integration of language, culture, and literature. Given in Spanish.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPAN 2120H. Accelerated Intermediate Spanish (Honors). 3 hours.
Not open to students with credit in SPAN 2001 or SPAN 2002.
Prerequisite: SPAN 1002 and permission of Honors.
Covers materials studied in Intermediate Spanish. Emphasis on advanced readings and grammar review. Also prepares students to enter Spanish Conversation and Composition, Introduction to Literature, and Introduction to Spanish Linguistics.

SPAN 2500. Spanish for Reading Knowledge. 3 hours.
Grammar, idioms, and vocabulary; practice in translating moderately difficult technical and non-technical Spanish. Intended to assist graduate students to satisfy reading knowledge requirement but does not carry graduate credit. Not to be used to satisfy undergraduate language requirement. Not open to Spanish majors.

SPAN 2550. Latino Literature, Language, and Culture. 3 hours.
Not open to students with credit in ROML 2550.
The literary, socio-linguistic, and cultural presence of representative Hispanic groups in the United States. Intended for Spanish speakers. Given in Spanish.

SPAN 2950. Study Abroad in Spanish. 3 hours.
Prerequisite: Permission of department.
Spanish language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

SPAN 2960. Study Abroad in Spanish. 3 hours.
Prerequisite: Permission of department.
Spanish language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

SPAN 2970. Study Abroad in Spanish. 3 hours.
Prerequisite: Permission of department.
Spanish language, literature, and culture courses taught at study abroad programs of the University System of Georgia and non-University of Georgia programs.

SPAN 3010. Spanish Conversation and Composition. 3 hours.
Not open to students with credit in SPAN 3030.
Prerequisite: SPAN 2002 or SPAN 2120H or permission of department.
Primary emphasis is divided between conversation and composition skills. The two phases of the course are correlated to include the skills of reading and listening comprehension. Given in Spanish. Not open to native speakers.

SPAN 3010H. Spanish Conversation and Composition (Honors). 3 hours.
Not open to students with credit in SPAN 3010.
Prerequisite: SPAN 2002 and permission of Honors.
Practice in composition and conversation skills in Spanish, beyond Spanish Conversation and Composition. Emphasis is divided equally between composition and conversation. Not open to native speakers. Given in Spanish.

SPAN 3030. Introduction to Literature. 3 hours.
Not open to students with credit in SPAN 3030H
Prerequisite: SPAN 3010.
Critical reading and interpretation of Spanish and Spanish-American literature through the study of representative texts in the various genres. Basic vocabulary and techniques of literary analysis and criticism. Given in Spanish.

SPAN 3030H. Introduction to Literature (Honors). 3 hours.
Not open to students with credit in SPAN 3030.
Prerequisite: SPAN 2120H and permission of Honors.
Critical reading and interpretation of Spanish and Spanish-American literature through the study of representative texts in the various genres. Basic vocabulary and

techniques of literary analysis and criticism. May be substituted by Spanish majors or minors for Introduction to Literature. Given in Spanish.

SPAN(LING) 3050. Introduction to Spanish Linguistics. 3 hours.
Prerequisite: SPAN 3010.
Fundamentals of language in general and Spanish in particular. Linguistic knowledge, language variation, and language contact phenomena. Representative Spanish sound systems, syllabic structure, sentence patterns, structure and meaning of words. Analysis of data from oral and written registers. Given in Spanish.

SPAN 4010. Advanced Conversation and Composition. 3 hours.
Not open to students with credit in SPAN 3010H.
Prerequisite: SPAN 3010.
Practice in composition and conversation skills in Spanish, beyond Spanish Conversation and Composition. Emphasis is divided equally between composition and conversation. Given in Spanish. Not open to native speakers.

SPAN 4040. Spanish Literature and Culture from the Middle Ages through the Baroque. 3 hours.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Major works, literary movements, and cultural background of Spanish literature from the Middle Ages to the end of the seventeenth century. Texts will include examples of poetry, prose, and drama. Given in Spanish.

SPAN 4050. Spanish Literature and Culture from the Enlightenment through the Present. 3 hours.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Major works, literary movements, and cultural background of Spanish literature from 1700 to the present. Texts will include examples of poetry, prose, and drama. Given in Spanish.

SPAN 4060. Spanish-American Literature and Culture from the Colonial Period through the Independence Period. 3 hours.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Major works, literary movements, and cultural background of Spanish-American literature from the Colonial period through Independence. Texts will include examples of poetry, prose, and drama. Given in Spanish.

SPAN 4070. Spanish-American Literature and Culture from Modernism through the Present. 3 hours.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Intensive reading and analysis of significant writers and the literary movements of which they are representative. Given in Spanish.

SPAN 4080. Studies in Spanish Literature and Culture. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Specific areas of major importance in the cultural and literary developments in Spain and Spanish America. The approach will contextualize relevant literary examples within historical, philosophical, linguistic, political, and ideological issues. Given in Spanish.

SPAN 4120/6120. Topics in Spanish Culture, Language, and Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: SPAN 3030 and SPAN(LING) 3050.
Selected topics in Hispanic culture, civilization, language, linguistics, literature, or literary theory. Given in Spanish.

SPAN 4150. Business Spanish. 3 hours.
Prerequisite: SPAN 3010 and (SPAN 3030 or SPAN(LING) 3050 or ACCT 2101).
Commercial Spanish and the environment of the Spanish-speaking business world. Business vocabulary, basic business and cultural concepts, and situational practice. Topics include economic geography of Spanish-speaking countries, company organization, management, banking, investment, personnel, office systems, goods and services, marketing, and letter writing. Given in Spanish. Business students should check with their advisor for prerequisites.

SPAN(LING) 4650. Spanish Phonetics and Language Variation. 3 hours.
Prerequisite: SPAN(LING) 3050.
Speech organs and systematic description of Spanish sounds. Comparison of English and Spanish patterns of stress, pronunciation, and intonation. Examination of recurrent pronunciation errors. Description of major geographical and social dialects. Practice in pronunciation and transcription of sounds. Given in Spanish.

SPAN 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, readings, or projects under the supervision of a project director.
Non-Traditional Format: Directed study.

SPAN 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, readings, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

SPAN 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors and junior or senior standing.
Individual study, readings, or projects under the guidance of a project director.
Non-Traditional Format: Directed study.

SPAN 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors and senior standing.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Students will meet with faculty members on a regular basis.

(SPCM) Speech Communication

College of Arts and Sciences, Department of Speech Communication

SPCM 1010. Communication in Human Society. 3 hours.
The role of speech in the constitution of human beings and their interrelationships. Exploration of the general character of speech as communication and its variations in public, group, and interpersonal settings.

SPCM 1100. Introduction to Public Speaking. 3 hours.
The fundamental principles and practices of public speaking, including systematic library research, creative analysis and synthesis of topics, organization, language, delivery, audience adaptation, reasoning, arguments, and supporting materials.

SPCM 1500. Introduction to Interpersonal Communication. 3 hours.
Communication as it occurs in two-person and small group settings. Primary concern is given to understanding how an individual can use verbal and nonverbal communication to improve relationships and derive maximum social rewards.

SPCM 1800. Cultural Diversity in Communication. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in SPCM 4800.
Patterns of public and interpersonal communication among and between ethnic groups, especially North American minority cultures, strategies for fostering group identity, difficulties in inter-group communication, and skills for improving the quality of those interactions.

SPCM 2100. Advanced Public Communication. 3 hours.
Prerequisite: SPCM 1100 or permission of department.
Advanced practice in varied public communication contexts such as community presentations, press conferences, media interviews, and persuasive speaking to hostile audiences. In addition to developing platform speaking skills, emphasis is placed on interactional skills and providing communication assistance to organizations and individuals.

SPCM 2150H. Perspective on Public Communication (Honors). 3 hours.
Not open to students with credit in SPCM 1100.
Prerequisite: Permission of Honors.
Practice in delivery and criticism of speeches, employing models from great speakers and speeches in history.

SPCM 2300. Business and Professional Communication. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in MGMT(SPCM) 5960.
The principles and skills for making effective business presentations. Students will learn to manage communication in a variety of professional and organizational contexts. Emphasis is on clarity and persuasiveness in communicating with clients, associates, and other decision-makers.

SPCM 2310. Scientific Communication. 3 hours.
The theory and practice of communicating scientific learning to nonscientists. The course is designed to equip science students with the skills necessary to bring scientific information to professional audiences and to the general public through the spoken word.

SPCM 2400. Oral Decision Making. 3 hours.
The theory and practice of democratic decision making, from researching a topic systematically in specialized library sources to reaching a workable solution through group discussion. Second phase will involve theory and practice of debating and implementing decisions through parliamentary procedure.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPCM 2510. Introduction to Small Group Communication. 3 hours.
Not open to students with credit in SPCM 4510.
Emphasizes student involvement in groups working on socially significant projects of their own choice. Examines factors which affect quality of communication and group outcomes: interpersonal and task behaviors, leadership, norms, conflict resolution, and creativity.

SPCM 2520. Introduction to Interviewing. 3 hours.
Not open to students with credit in MGMT(SPCM) 5870.
Information gathering, problem solving, and persuasive communication skills in dyadic settings. Survey, journalistic, job seeking, and employee appraisal interview forms. Students gain experience conducting interviews across a variety of situations.

SPCM 2550H. Perspective on Interpersonal Communication (Honors). 3 hours.
Not open to students with credit in SPCM 1500.
Prerequisite: Permission of Honors.
Through lectures and class discussion, students will critically examine theory and research in interpersonal

communication. Emphasis is placed both on learning about the communication process and on becoming a more effective participant in it.

SPCM(AFAM) 2810. Communication in African American Communities. 3 hours.
Not open to students with credit in SPCM(AFAM) 4810.
Rhetorical strategies and patterns of orality in African American communication, communication styles in conflict, and skill development for cultural interaction.

SPCM 3300. Introduction to Rhetorical Criticism. 3 hours.
Prerequisite: SPCM 1100.
Rhetorical approaches to the criticism of public communication. Intensive practice in writing rhetorical analyses will be provided.

SPCM 3310. Case Studies in Public Communication. 3 hours. Repeatable for maximum 6 hours credit.
3 lab periods of 2 hours each per week.
Application of rhetorical theory and criticism to one or more case studies, ranging from recurring persuasive strategies in the Lincoln-Douglas debates of 1858, to the role, function, and impact of public discourse in the Montgomery boycott of the 1950s.

SPCM 3500. Interpersonal Communication Theory. 3 hours.
Prerequisite: SPCM 1010 or SPCM 1100 or SPCM 1500.
Major theories of human communication, with special emphasis upon interpersonal communication. The role, function, and assumptions of theoretical approaches will be discussed.

SPCM 3700. Empirical Research Methods In Communication. 3 hours.
Prerequisite or corequisite: STAT 2000 or STAT 2210.
Social science research methods in interpersonal communication. Covers formalizing research questions, conceptual and operational definitions, hypothesis testing, measurement, sampling, research design, and computer analysis.

SPCM 4200. Introduction to Rhetorical Theory. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
Rhetorical theory in classical, modern, and contemporary times.

SPCM 4210. Classical Rhetoric. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
The theory and practice of rhetoric in the classical period. The course focuses principally upon Plato, Aristotle, Cicero, and Augustine.

SPCM 4220. Theories of Argumentation. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
Process by which people give reason to justify their acts, beliefs, attitudes, and values and to influence the thought and action of others. Traditional and contemporary theories of argumentation and critical analysis of public argument.

SPCM 4310/6310. Communication Strategies in Government. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
Communication strategies and activities in the executive and legislative branches of local, state, and national government. Case study approach incorporated into the class.

SPCM 4320. Communication Strategies in Political Campaigns. 3 hours.
The role communication plays in deciding which candidate will run for office, the nomination of candidates, and the election of candidates to office.

SPCM 4330. Communication Strategies in the Courtroom. 3 hours.
Prerequisite: SPCM 3300.
How verbal communication skills and strategies of persuasion are used in a variety of legal settings. Includes interviewing, courtroom speeches, witness examination, jury selection and deliberation, as well as issues of judicial argumentation and reasoning and effects of media on litigation outcomes.

SPCM 4340/6340. Communication and Religion. 3 hours.
The nature and practice of communication in a variety of religious traditions. Notions of sacred symbolism, myth, revelation, hermeneutics, and apologetics are especially emphasized.

SPCM 4360. Communication Strategies in Social Movements. 3 hours.
Prerequisite: SPCM 3300.
The rhetorical nature, function, development, and impact of social movements as applied to one or more case studies.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPCM 4370/6370. Women and United States Public Discourse. 3 hours.
Prerequisite: SPCM 3300 or permission of department.
History and criticism of speeches by United States women in nineteenth- and twentieth-century social reform movements, especially woman's rights and feminism.

SPCM 4500. Advanced Interpersonal Communication. 3 hours.
Prerequisite: SPCM 3700.
Communication in personal relationships from periods of relational development through relational disengagement. Emphasis on understanding and applying social scientific theories of communication.

SPCM 4510. Nonverbal Communication. 3 hours.
The functional potential of each type of nonverbal communication. Primary emphasis is given to demonstrating the value of specific kinds of nonverbal cues in communicating successfully in such real world settings as the job interview, male-female interaction, and the courtroom.

SPCM 4520. Persuasion. 3 hours.
Prerequisite: SPCM 3700.
The impact of persuasive communication is studied with emphasis on source, message, medium of presentation, and audience effects. Theoretical approaches to persuasion and persuasive communication.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

SPCM 4530. Advanced Small Group Communication. 3 hours.
Prerequisite: SPCM 3700.
Theory and techniques of small group discussion, with emphasis on current experimentation and research. Course content includes the ways in which communication influences and is influenced by group formation, development of group norms, group performance, and other topics.

SPCM(HPRB) 4610/6610. Health Communication. 3 hours.
Communication about health with physicians and other providers, within support groups and health care organizations, and by public figures, groups, and organizations.

SPCM 4800. Intercultural Communication. 3 hours.
Prerequisite: SPCM 3700 or permission of department.
Factors that facilitate or impede effective communication between members of different cultural groups. Considers interactions between people from different nations as well as co-cultures within the same nation. Effects of differing world-views, value systems, language varieties, nonverbal codes, and relational norms. Skills for disseminating ideas across cultures and for building intercultural competence.

SPCM(AFAM) 4810. African American Rhetoric and Communication. 3 hours.
The history and criticism of the communication of African American speakers, with emphasis upon oral rhetoric relating to social-political development since 1860.

SPCM 4900. Special Topics in Communication. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: SPCM 3300 and SPCM 3700.
Selected and rotating topics such as humor and communication, visual communication, or communication training in business and industry.

SPCM 4910. Internship in Communication. 3 hours.
Prerequisite: [(SPCM 1010 or SPCM 1100 or SPCM 1500) and (SPCM 3300 and SPCM 3700)] or permission of department.
Communication theory and research to public or private sector enterprise. Emphasis on observation and analysis of communication behaviors in workplace contexts.
Non-Traditional Format: Field-based internship.

SPCM 4920. Debate Practicum. 1-3 hours. Repeatable for maximum 6 hours credit. 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Concentration on the practice of intercollegiate debate. Open to students who travel to debate tournaments.
Non-Traditional Format: Practicum.

SPCM 4930. Directed Study in Communication. 3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: SPCM 3300 and SPCM 3700.
Independent, intensive, and extended research conducted under the supervision of a faculty member.
Non-Traditional Format: Individual student/professor interaction.

SPCM 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a professor.

SPCM 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a professor.

SPCM 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a professor.

(SPCM)MGMT 5960. Organizational Communication. 3 hours.
Prerequisite: MGMT 3000 or permission of department.
Communication policies, procedures, and practices in administration. Students will have the opportunity to develop both written and oral communication skills and to identify philosophies, methods, and characteristics of management communication.

(SPED) Special Education

College of Education, Department of Special Education

SPED 2000. Survey of Special Education. 3 hours.
Prerequisite: Permission of department.
Corequisite: SPED 2000L only for Special Education.
Individuals with special needs, including possible impact, causes, and characteristics of specific needs across life spans and cultural diversity. Topics include legal requirements, ethical implications, education strategies, collaboration between regular and special educators, inclusion, family involvement, and current issues relating to individuals with special needs.

SPED 2000L. Survey of Special Education Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: SPED 2000.
Students examine a variety of settings which provide services to individuals with disabilities to gain an overview of the issues of exceptionality in society. Private transportation will be necessary.

SPED 3030. Introduction to Assessing Individuals with Disabilities. 3 hours.
Prerequisite: SPED 2000 and permission of department.
Corequisite: SPED 3030L.
Educational and adaptive behavior assessment of individuals with disabilities. Basic measurement concepts and procedures for administering standardized, informal, and curriculum-based tests.

SPED 3030L. Introduction to Assessing Individuals with Disabilities Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: SPED 3030.
Laboratory to be taken with Introduction to Assessing Individuals with Disabilities.

SPED 3040. Introduction to Individuals with Special Needs. 4 hours.
Prerequisite: SPED 2000 and permission of department.
The characteristics of individuals with special needs, including mental retardation, behavior disorders, and learning disabilities. Emphasis is on school-related issues, such as the eligibility and placement of students in appropriate programs, including the development of individualized education programs; and life-long adjustment problems.

SPED 3050. Classroom and Behavior Management for Individuals with Disabilities. 3 hours.
Prerequisite: Permission of department.
Corequisite: SPED 3050L.
Classroom and behavior management program design based on the principles and procedures of applied behavior analysis. Emphasis is on proactive strategies that promote learning and prosocial behavior.

SPED 3050L. Classroom and Behavior Management for Individuals with Disabilities Laboratory. 1 hour. 1 lab period of 1-5 hours each per week.
Prerequisite: Permission of department.
Corequisite: SPED 3050.
Laboratory to be taken with Classroom and Behavior Management for Individuals with Disabilities.

SPED 4000/6000. Directed Study in Special Education. 1-10 hours. Repeatable for maximum 10 hours credit.
Prerequisite: Permission of department.
Specialized training appropriate to the needs of selected individuals.
Non-Traditional Format: Directed study.

SPED 4040. Special Education Technology. 3 hours.
Prerequisite: SPED 2000 and permission of department.
Corequisite: SPED 4040L.
Technology for managing, assessing, and teaching across multiple computer operating systems. The use of assistive technology devices that allow access to computers for those individuals with physical challenges. Multicultural issues relating to technology access will be addressed in readings, lecture, and practicum experiences.

SPED 4040L. Special Education Technology Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: SPED 2000 and permission of department.
Corequisite: SPED 4040.
Laboratory to be taken with Special Education Technology.

SPED 4100. Instruction of Individuals with Mild Disabilities. 3 hours.
Prerequisite: SPED 2000 and SPED 3040 and permission of department.
Corequisite: SPED 4100L.
The practical application of research-based instructional methods for students with high incidence disabilities.

SPED 4100L. Instruction of Individuals with Mild Disabilities Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: SPED 4100.
Laboratory to be taken with Instruction of Individuals with Mild Disabilities.

SPED 4120. Instruction of Individuals with Moderate to Severe Disabilities. 3 hours.
Prerequisite: Permission of department.
Corequisite: SPED 4120L.
Preferred practices for teaching individuals with moderate to severe disabilities. Emphasis of curricula,

curriculum-based assessment, interventions, diversity, collaboration, instructional planning, and curriculum adaptations.

SPED 4120L. Instruction of Individuals with Moderate to Severe Disabilities Laboratory. 1 hour. 1 lab period of 1 hour each per week.
Prerequisite: Permission of department.
Corequisite: SPED 4120.
Laboratory to be taken with Instruction of Individuals with Moderate to Severe Disabilities.

SPED(EDEC) 5100. Introduction to Early Childhood Special Education. 3 hours.
Prerequisite: Permission of department.
Meeting individual needs of children with disabilities in early childhood education environments. Emphases on methods for including young children with disabilities in typical environments. Topics include history and rationale for ECSE, family focused intervention, methods for teaming, embedding developmentally appropriate objectives in natural contexts.

SPED 5400. Collaboration Among Families and Professionals. 3 hours.
Prerequisite: Permission of department.
Models for collaborating with families of individuals with disabilities and other professionals and paraprofessionals. Emphasis on family systems, teaming, consultation, and diversity.

SPED 5450. Student Teaching Seminar. 3 hours.
Prerequisite: Permission of department.
Corequisite: SPED 5460.
Discussion of student teaching experiences and current topics.

SPED 5460. Student Teaching in Special Education. 12 hours.
Prerequisite: Permission of department.
Corequisite: SPED 5450.
Supervised full-time field experience in teaching individuals with mild disabilities.
Non-Traditional Format: Field-based student teaching in schools.

(STAT) Statistics

College of Arts and Sciences, Department of Statistics

STAT 2000. Elementary Statistics. 4 hours. 2 hours lecture and 2 lab periods of 2 hours each per week.
Not open to students with credit in STAT 2100H or STAT 2210 or MSIT 3000.
Statistics at a level which assumes knowledge of high school algebra. Descriptive statistics, random variables, probability distributions, sampling distributions, confidence interval estimation and hypothesis testing. Simple linear regression and correlation.

STAT 2100H. Introduction to Statistics and Computing (Honors). 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in STAT 2000 or STAT 2210 or MSIT 3000.
Prerequisite: Permission of Honors.
Sampling theory including sample survey design; descriptive statistics; statistical distributions and their uses; estimation; introductory statistical inference including z-test and t-test for one sample (hypothesis testing); analysis of differences in two means; simple linear regression and correlation; goodness of fit tests and contingency tables.

STAT 2210. Introduction to Statistics and Computing. 4 hours. 3 hours lecture and 1 lab period of 2 hours each per week.
Not open to students with credit in STAT 2100H or STAT 2000 or MSIT 3000.
Sampling theory including sample survey design; descriptive statistics; statistical distributions and their uses; estimation; introductory statistical inference including z-test and t-test for one sample (hypothesis testing); analysis of differences in two means; simple linear regression and correlation; goodness of fit tests and contingency tables.

STAT 4070/6070. Probability and Statistics for Secondary Teachers. 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in STAT 2100H or STAT 4210 or STAT 6210.
Prerequisite: STAT 2000.
Sampling and statistical studies; basic probability; random variables and their distributions; exploring data using graphical techniques and numerical summaries; exploring relationships between two variables: chi-sq. test of independence; correlation, linear regression; confidence intervals and hypothesis testing for means and proportions. Group projects and activities illustrating concepts will be utilized.

STAT 4100/6100. Applied Stochastic Processes. 3 hours.
Not open to students with credit in STAT 4720/6720 or STAT 8700.
Prerequisite: MATH 2500.
Stochastic processes including discrete, continuous and conditional probability concepts. Definitions and properties of stochastic processes. Markov processes and chains, basic properties, transition matrices and steady state properties. Reliability renewal and queueing processes, expected waiting times, single and multiserver queues.

STAT 4110. Applied Statistics. 3 hours.
Not open to students with credit in STAT 4110H or STAT 4210.
Prerequisite: STAT 2210.
Analysis of variance including completely randomized design, randomized block design, factorial designs, and

interaction; regression analysis including linear regression and multiple regression, model checking and analysis of residuals, and model building; nonparametric statistics; power of a test. Computer application by use of a statistical package with programming capabilities.

STAT 4110H. Honors Applied Statistics. 3 hours.
Not open to students with credit in STAT 4110 or STAT 4210.
Prerequisite: STAT 2100H and permission of Honors.
Analysis of variance including completely randomized design, randomized block design, factorial designs, and interaction; regression analysis including linear regression and multiple regression, model checking and analysis of residuals, and model building; nonparametric statistics; power of a test. Computer application by use of a statistical package with programming capabilities. Major project required.

STAT 4210. Statistical Methods. 3 hours.
Not open to students with credit in STAT 4110H or STAT 4110.
Prerequisite: STAT 2000.
Statistical distributions; one- and two-population tests about means, including t-tests and paired-difference tests; one- and two-population tests about the variance; contingency tables and goodness-of-fit tests; non-parametric tests; analysis of variance and simple experimental designs; linear regression and residual diagnostics.

STAT 4220. Applied Experimental Designs. 3 hours.
Prerequisite: STAT 4210.
Constructing and analyzing statistical experimental designs; blocking, randomization, replication and interaction; complete and incomplete block designs; factorial experiments; repeated measures; confounding effects.

STAT 4230/6230. Applied Regression Analysis. 3 hours.
Prerequisite: STAT 4210 or STAT 6220 or permission of department.
Applied methods in regression analysis. Topics include univariate linear regression, techniques of multiple regression and model building, ANOVA as regression analysis, analysis of covariance, model selection and diagnostic checking techniques, nonlinear regression, and logistic regression.

STAT 4240/6240. Sampling and Survey Methods. 3 hours.
Prerequisite: STAT 4210 or STAT 6210.
Design of finite population sample surveys. Stratified, systematic, and multistage cluster sampling designs. Sampling with probability proportional to size. Auxiliary variables, ratio and regression estimators, nonresponse bias.

STAT 4260/6260. Statistical Quality Assurance. 4 hours.
Prerequisite: STAT 4210 or STAT 6220.
Basic graphical techniques and control charts. Experimentation in quality assurance. Sampling issues. Other topics include process capability studies, error analysis, SPRT, estimation and reliability.

STAT 4270/6270. Least Squares Methods. 3 hours.
Prerequisite: STAT 4210 and MATH 2500.
Least squares techniques using matrices. Techniques of matrix algebra and calculus applied to regression and experimental designs.

STAT 4280/6280. Applied Time Series Analysis. 3 hours.
Prerequisite: STAT 4510/6510.
Autoregressive, moving average, autoregressive-moving average, and integrated autoregressive-moving average processes, seasonal models, autocorrelation function, estimation, model checking, forecasting, spectrum, spectral estimators.

STAT 4290/6290. Nonparametric Methods. 3 hours.
Prerequisite: STAT 4210 or STAT 6220.
Techniques and applications of nonparametric statistical methods, estimates, confidence intervals, one sample tests, two sample tests, several sample tests, tests of fit, nonparametric analysis of variance, correlation tests, chi-square test of independence and homogeneity, sample size determination for some nonparametric tests.

STAT 4360/6360. Statistical Programming in SAS. 3 hours.
Prerequisite: STAT 4210 or STAT 4230/6230 or STAT 6220.
Statistical programming techniques, data manipulation, and presentation of analyses using SAS software package.

STAT 4380/6380. Survival Analysis. 3 hours.
Prerequisite: [(STAT 4210 or STAT 6220) and STAT 4510/6510] or permission of department.
Methods for comparing time-to-event data, including univariate parametric and nonparametric procedures, regression models, diagnostics, group comparisons, and use of relevant statistical computing packages.

STAT 4510/6510. Mathematical Statistics I. 3 hours.
Prerequisite: MATH 2500.
Concepts and basic properties of some special probability distributions, independence, moment generating functions, sampling distributions of statistics, limiting distributions.

STAT 4520/6520. Mathematical Statistics II. 3 hours.
Prerequisite: STAT 4510/6510.
Methods and properties of point estimation, confidence intervals, minimum variance unbiased estimators, hypothesis testing, analysis of variance, linear regression.

STAT 4710/6710. Introduction to Probability Theory I. 3 hours.
Prerequisite: MATH 2500.
Probability axioms, combinatorial analysis, random variables, univariate and multivariate distributions, expectations, conditional distributions, independence, and laws of large numbers.

STAT 4720/6720. Introduction to Probability Theory II. 3 hours.
Prerequisite: STAT 4710/6710.
Central limit theorems, random walks, Markov chains and processes, Brownian motion, branching and renewal processes, diffusion processes and queueing processes and applications.

(SWAH) Swahili

College of Arts and Sciences, Department of Comparative Literature

SWAH 1010. Elementary Swahili I. 4 hours.
Fundamentals of the Swahili language and culture. Emphasis on grammar, pronunciation, reading, writing, and conversational skills. Additional laboratory work required.

SWAH 1020. Elementary Swahili II. 4 hours.
Prerequisite: SWAH 1010.
A continuation of Elementary Swahili I. Emphasis on register variation, advanced grammar, and culture.

SWAH 2010. Intermediate Swahili I. 3 hours.
Prerequisite: SWAH 1020 or permission of department.
Introduction to complex linguistic and cultural structures, role of culture in language learning, reading and writing of literary texts, social history of the language.

SWAH 2020. Intermediate Swahili II. 3 hours.
Prerequisite: SWAH 2010.
A continuation of Intermediate Swahili I. Introduction to literary texts, poetry, newspapers and magazines, and everyday language use.

SWAH 3010. Advanced Swahili I. 3 hours.
Prerequisite: SWAH 2020.
Preparation for study or research using authentic Swahili material. Provides additional knowledge of East Africa through geography, history, political, and economic structures. Focus on critical reading and the interpretation of standard and colloquial Swahili.

SWAH 3020. Advanced Swahili II. 3 hours.
Prerequisite: SWAH 3010.
A continuation of Advanced Swahili I. Focus on advanced reading and comprehension of novels, thematic texts, rhetoric, scientific materials, documents, and other archival materials. Substantial attention paid to historical and cultural aspects of the language.

SWAH(YORB) 3030. Introduction to African Languages, Cultures, and Folklore. 3 hours.
The languages, cultures, folklore, orature, and literature of East Africa and West Africa. While texts will be available in English, students with proficiency in Swahili or Yoruba will examine the literature in its original language.

SWAH 3990. Directed Study in Swahili Language and Literature. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent study and research in Swahili language and literature under the direction of individual faculty members. Focus on reading and analysis of Swahili literary writings (including works in translation).
Non-Traditional Format: Directed study.

(TELE) Telecommunications

College of Journalism and Mass Communication, Department of Telecommunications

TELE 3010. Introduction to Telecommunications. 3 hours.
The structure of world telecommunication systems with emphasis on the United States. Special attention is given to the regulatory features of the systems, the impact of technology, the economic dynamics, and the range of career possibilities.

TELE 3010H. Introduction to Telecommunications (Honors). 3 hours.
Not open to students with credit in TELE 3010.
Prerequisite: Permission of Honors.
Global telecommunication systems, the evolution of broadcast technologies, and the production processes and audience research techniques of rapidly converging industries. The course also encompasses the regulatory, legal, and economic mechanisms influencing the marketplace. Class projects will emphasize strategies to affect social change via media channels.

TELE 3110. Writing for Electronic Media. 3 hours.
Prerequisite: Permission of department.
The problems of writing for the telecommunications industry. Introduction to special scripting requirements of radio, television, film, recording, and cable formats. Emphasis will be upon working from the creation of the idea to final script.

TELE 3210. Introduction to Production Basics. 3 hours.
Prerequisite: Permission of department.
Basic methods of pre-production, production, and post-production of radio, television, and electronic field production with additional emphasis on the creative, persuasive, and ethical application of these media in today's society.

TELE 3310. Media Programming and Management. 3 hours.
Prerequisite or corequisite: TELE 3010 and permission of department.
The methods by which radio and television program schedules are developed, tested, implemented, and revised. Topics include program budgeting and finance, syndication, local origination, automation, ratings, and qualitative program research, program strategies, formats, and adapting radio/television programs for alternative distribution systems.

TELE 3410. Media Research and Theory. 3 hours.
Prerequisite: TELE 3010 and permission of department.
Major contemporary theories and research techniques relevant to the electronic media. Includes quantitative, qualitative, and critical approaches to media studies.

TELE 4250-4250L. Video Production. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: TELE 3210 and permission of department.
The theory and techniques of informational video production. A studio production course with emphasis on video cameras, production switchers, character generators, microphones, audio mixers, lighting instruments and dimmers, basic set construction, lighting design, and program blocking. Extensive in-class production projects.

TELE 4270. Audio Production. 3 hours.
Prerequisite: TELE 3210 and permission of department.
Sound design, editing, and recording. Creative editing, sound layering, multi-track mixing of dialogue, music, and sound effects to achieve a sonic styling for radio, television, or film.

TELE 4290-4290L. Digital Media Production. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: Permission of department.
Production of digital audio and video materials. Topics will include the technology of digitization, compression techniques for digital media, the manipulation of digital content, delivery methods for digital media, applications for digital media.

TELE 4350. Broadcast Management. 3 hours.
Prerequisite: TELE 3310 and permission of department.
Theory and application of management practices in the administration of telecommunication businesses. Cost and revenue management, use of research, rate setting, capital and operations budgeting, personnel management, and program syndication.

TELE 4420. Telecommunications Research. 3 hours.
Prerequisite: TELE 3410 and permission of department.
Major analysis techniques commonly found in telecommunications research, including basic audience research techniques (such as ratings research, audience profiling, concept and program testing) and studies of the impact of production economics. Student participation in laboratory and field studies may be required.

TELE 4450. Emerging Media Technologies. 3 hours.
New and proposed telecommunication technologies, including theoretical perspectives, techniques of analysis, and management strategies. Investigation of the social and psychological factors influencing the adoption and impact of these new technologies.

TELE 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

TELE 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

TELE 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

TELE 4990H. Honors Thesis. 3 hours.
Prerequisite: Senior standing and permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Students in this course meet with their supervising professor as needed to successfully complete assignments and readings.

TELE 5010. Mass Communication Internship. 1-3 hours.
Prerequisite: TELE 3010 and TELE 3210 and permission of department.
Supervised experience in mass communication.

TELE 5170. Advanced Studies in Mass Communication. 3 hours.
Prerequisite: Senior standing and permission of department.
Independent study or special project in any area of mass communication. Written proposal outlining the work to be undertaken must be submitted and receive the

instructor's approval before registration for the course. Students will be responsible for insuring the funding of their projects. Course may be taken through the University of Georgia Studies Abroad Program in Parma, Italy, and London, England.

TELE 5250. Electronic Field Production. 3 hours.
Prerequisite: TELE 3110 and TELE 3210 and permission of department.
The creative challenge in shooting film style, involving directional creativity, theory, and application of production techniques from idea through to the complete project. This course requires a project which demonstrates creativity and production techniques.

TELE 5260. Advanced Production. 3 hours.
Prerequisite: (TELE 4250 or TELE 5250) and permission of department.
A capstone course that demonstrates the student's knowledge and abilities in production, with emphasis given to directional creativity, production techniques from the conception of idea through scripting, editing, and sound track for a completed project that demonstrates knowledge in these areas.

TELE 5440. History and Analysis of Electronic Programming. 3 hours.
Radio and television entertainment and informational programs are traced from their roots to the present through socio-cultural, technical, legal, and economic influences.

TELE 5560. Electronic News Gathering Production. 3 hours.
Prerequisite: TELE 3210 and permission of department.
Production of telecommunications for news using portable videotape equipment and both analog linear and digital nonlinear editing equipment. Students will participate in field exercises involving the videotaping and editing of information messages intended for inclusion in television newscasts.

TELE 5570-5570L. Broadcast News Writing and Producing. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: TELE 3210 and permission of department.
The gathering of information and writing of broadcast news copy as well as the processing of that information into radio and television news programs under deadline discipline, including the responsibilities and ethics of the broadcast news reporter.

TELE 5580-5580L. Advanced Television News Reporting. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: TELE 5560 and TELE 5570 and permission of department.
Corequisite: TELE 5590.
Advanced methodology in the gathering of television news. Students will write, edit, produce, shoot, report, anchor under deadline pressure. Analysis of news sources and problems unique to broadcast journalists is emphasized in this intensive practicum.

TELE 5590-5590L. Advanced Television News Producing. 3 hours. 3 hours lecture and 1 lab period of 3 hours each per week.
Prerequisite: TELE 5560 and TELE 5570 and permission of department.
Corequisite: TELE 5580.
Advanced methodology in the production of television news. Student will manage an ongoing television news production under deadline pressure. Intensive practicum.

TELE 5990. Seminar in Telecommunication. 3 hours.
Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
A seminar designed to synthesize and integrate many of the theoretical and practical approaches of the study of mass communication, giving opportunity through a variable topics seminar to analyze processes and effects of mass communication and to acquire specialized knowledge of specific mass media modes of presentation and production.

(TXMI) Textiles, Merchandising and Interiors

College of Family and Consumer Sciences, Department of Textiles, Merchandising and Interiors

TXMI 2000. Introduction to Family and Consumer Sciences. 1 hour.
The specialties and professions comprising the fields in family and consumer sciences. Systems perspective is emphasized in examining quality of life issues. Discussions include the personal, professional, and technical elements involved in career development.

TXMI 2100. Textiles for Consumers. 3 hours.
Textile study with emphasis on selection, use, performance, and care of textile products in the consumer's environment.

TXMI 2520. Principles of Creative Clothing. 3 hours.
Application of art principles to clothing selection. Basic principles of clothing construction related to fabric, fit, and design of the garment.

TXMI 3010. Directed Research. 1-12 hours. Repeatable for maximum 12 hours credit.
Prerequisite: Permission of department.
Designed for the senior major to permit independent study and research.
Non-Traditional Format: Independent study under the direction of a faculty member.

TXMI 3210. Fundamentals of Fashion Merchandising. 3 hours.
Fashion with an emphasis on various product categories. Innovative processes in the fashion business. Concentration on fashion innovation, role of designers and other influentials. Domestic and international fashion centers, trends in fashion, and the power of fashion in society.

TXMI 3240. Retail Planning and Buying. 3 hours.
Prerequisite: ACCT 2101.
Accounting concepts in relation to specific applications in merchandising; use of computers in merchandising.

TXMI 3350. Residential Interiors and Furnishings. 3 hours.
Prerequisite: Sophomore standing.
Furnishing the home for contemporary living. Students apply design principles in planning furnishings for the home.

TXMI 3360. Residential Design. 3 hours.
Prerequisite: Sophomore standing or permission of department.
Design communication by two-dimensional drawings of floor plans, sections, elevations, and axonometrics in traditional and contemporary residences.

TXMI 3380. Interior Perspective and Media. 3 hours.
Prerequisite: TXMI 3360.
Methods for design communication through manipulation of two- and three-dimensional drawings.

TXMI 3500. Textiles. 3 hours.
Prerequisite: (CHEM 1110 and CHEM 1110L) or (CHEM 1212 and CHEM 1212L).
Corequisite: TXMI 3500L.
Production and properties of textile fibers, yarns, and fabrics; study of dyeing and finishing processes.

TXMI 3500L. Textiles Laboratory. 1 hour. 1 lab period of 2 hours each per week.
Prerequisite: (CHEM 1110 and CHEM 1110L) or (CHEM 1212 and CHEM 1212L).
Corequisite: TXMI 3500.
Laboratory experiments on fibers, yarns, fabrics, dyeing, and finishing.

TXMI 3520. Textile Testing. 3 hours. 2 lab periods of 3 hours each per week.
Prerequisite: (TXMI 3500 and TXMI 3500L) and (STAT 2000 or STAT 4210 or MSIT 3000).
Basic textile testing for end-use performance.

TXMI 3530. Apparel Quality Analysis. 3 hours.
Structural approach to evaluating apparel quality. Identification of components in apparel structures.
Non-Traditional Format: Field trips.

TXMI 3550. Environment, Science, and Technology 3 hours.
Application of chemical and scientific principles t environmental problems. Chemical processes in pollu tion and environmental degradation; basics of environ mental legislation and regulations; technological de velopments and strategies in waste reduction and pol lution prevention; effects of pollutants and hazardou substances; current environmental issues.

TXMI 3570. Color Science. 3 hours.
Basic color theory; analysis of the use of color and colo communication, with applications to the areas of ap parel, interiors, textiles, and merchandising.

TXMI 4100/6100. Advanced Textiles. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Fibers and finishes; emphasis on man-made fibers, new fiber, and finish developments and technology.

TXMI 4110/6110. Textile Dyeing. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L and permission of department.
Textile dyeing processes with emphasis on fiber-dye association. Analysis of dyeing techniques and properties of dyes and dyed materials.

TXMI 4120/6120. Product Standards and Quality Analysis. 3 hours.
Prerequisite: (STAT 2000 and TXMI 3520) or permission of department.
Developing, maintaining, and assessing product standards from the initial design process to end uses of textile and apparel products. Quality assurance and certification programs; governmental regulations; statistical analysis and control of benefits offered through standards.

TXMI 4130/6130. Chemical and Instrumental Analysis of Polymers and Textiles. 3 hours.
Prerequisite: TXMI 3520 and TXMI 4100/6100 and CHEM 2211 and CHEM 2211L.
Theory and application of instrumental analysis to polymers, fibers, fabrics, dyes, and finishes.

TXMI 4140/6140. Textile Finishing Processes. 3 hours.
Prerequisite: TXMI 3520 and TXMI 4100/6100.
Theory, application, evaluation, and identification of textile finishes and textile auxiliary processes. Examination of the role of finishing and types of finishes used in manufacturing fibers, yarns, and fabrics.

TXMI 4150/6150. Nonwovens Science and Technology. 3 hours.
Prerequisite: TXMI 4100/6100 and permission of department.
Manufacture and conversion of nonwoven webs with examination of interrelationships involving raw materials, bonding systems, manufacturing processes, product properties, and end uses.

TXMI 4220. Fashion Image Development and Promotion. 3 hours.
Prerequisite: MARK 3000 or permission of department.
Techniques of image development in the merchandising of fashion goods. The development of displays and promotions appropriate to various store images.

TXMI 4230/6230. Clothing and Human Behavior. 3 hours.
Prerequisite: PSYC 1101 or SOCI 1101.
The study of clothing with particular emphasis on psychological, sociological, and economic aspects of clothing.

TXMI(DRAM) 4270/6270. History of Costume: Antiquity to Nineteenth Century. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationships of costume and social, cultural, political, and economic environments from antiquity to the nineteenth century.

TXMI 4290/6290. History of Costume from the Nineteenth Century to Present. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Interrelationship of costume and social, cultural, political, and economic environments from the nineteenth century to present day.

TXMI 4330/6330. American Interiors and Furnishings. 3 hours.
American interior design and furnishings from the seventeenth to the twentieth centuries. Identification of styles as well as social, cultural, and historic influences.

TXMI 4340/6340. Historic Interior Materials. 3 hours.
Prerequisite: Permission of department.
Ceiling, wall, and floor coverings, window treatments, upholstery, and lighting in historic American interior design, with emphasis on analysis and selection.

TXMI 4350/6350. Historical Homes and Furnishings. 3 hours.
Prerequisite: [TXMI 3350 and ARST 2000]or permission of department.
The architecture, interiors, and furnishings in the western world from the ancient Egyptian era through 1850.

TXMI 4360/6360. Decorative Accessories for the Home. 3 hours.
Prerequisite: TXMI 3350 or permission of department.
Historical and cultural development of accessories used in the home including ceramics, metals, and textiles. Design and characteristics of materials in these accessories will be covered.

TXMI 4370/6370. Contemporary Homes and Furnishings. 3 hours.
Prerequisite: (TXMI 3350 and ARST 2000) or permission of department.
Contemporary developments in architecture, interiors, and furniture from 1850 to the present day.

TXMI 4380/6380. Interior Fabrics and Materials: Specifications and Estimations. 3 hours.
Prerequisite: (TXMI 3520 and senior standing) or permission of department.
Construction, fibers, and finishes for fabrics with emphasis on quality, durability, and utilization of current materials for soft floor coverings, window treatments, and upholstery. Estimations and specifications.

TXMI 4520/6520. Apparel and Textile Economics. 3 hours.
Prerequisite: [TXMI 3500 and TXMI 3500L and (ECON 2106 or ECON 2105)] or permission of department.
Organization and functions of apparel and textile industries. Factors related to production, distribution, and consumption of apparel and household textiles.

TXMI 4530. International Textiles and Apparel: Europe. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L.
Textile and apparel production and distribution in relation to the culture, politics, and policies of major textile and apparel industries in Europe. Emphasis placed on impact of global issues on marketability and availability of textile and apparel products.

TXMI 4540/6540. International Textiles and Apparel: Asia. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L.
Textile and apparel production and distribution in relation to the culture, politics, and policies of major textile and apparel industries in Asia. Emphasis placed on impact of global issues on marketability and availability of textile and apparel products.

TXMI 4550. International Textiles and Apparel: Americas. 3 hours.
Prerequisite: TXMI 3500 and TXMI 3500L.
Textile and apparel production and distribution in relation to the culture, politics, and policies of Canada, Latin America, and the Caribbean. Emphasis on global issues impacting on marketability and availability of textile and apparel products.

TXMI 4580/6580. History of Textiles in Europe and America. 3 hours.
Prerequisite: (TXMI 3500 and TXMI 3500L) or permission of department.
Textiles and the textile industry in prehistoric, ancient, medieval, and modern eras, with special emphasis on Western European and American textiles.

TXMI 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

TXMI 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

TXMI 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

TXMI 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field.
Non-Traditional Format: Honors thesis.

TXMI 5240/7240. Retailing Apparel and Textiles. 3 hours.
Prerequisite: Permission of department.
Retailing, retail organizational structures, merchandising, and organization of market resources in apparel and textiles. Emphasizes concepts applicable to the apparel and textile industry.

TXMI 5310/7310. Residential Interiors and Economic Resources. 3 hours.
Prerequisite: [TXMI 3380 and TXMI 4380/6380] or permission of department.
Residential space planning and selection of fabrics, finishes, and furnishings using specified amounts of economic resources.

TXMI 5320/7320. Residential Design Practices. 3 hours.
Prerequisite: Senior standing and permission of department.
Relationships between the designer, wholesaler, and retailer in the home furnishing industry. Designer and client relationships with emphasis on retailing practices and economic resources in the residential design firm.

TXMI 5330. Computer-Aided Residential Design. 3 hours.
Prerequisite: TXMI 3360 and junior standing.
Drawing tools and editing in the CAD program. Creation, modification, storage, retrieval, and management of AutoCAD drawings.

TXMI 5710/7710. Study Tour in Textiles, Merchandising and Interiors. 1-6 hours. Repeatable for maximum 6 hours credit.
Prerequisite: Permission of department.
An on-location study of clothing, textiles, fashion merchandising, and residential interiors and furnishings. Includes lectures by recognized leaders in the fields; meetings with designers, manufacturers, merchants and field trips to designers' showrooms or studios, manufacturing plants, distribution centers, retail stores, and museums.
Non-Traditional Format: Lecture, tour, and other activities for the length of the program.

TXMI 5900. Internship Orientation. 1 hour.
Internship orientation for Fashion Merchandising majors.

TXMI 5910. Textiles, Merchandising and Interiors Internship. 3-9 hours.
Prerequisite: Permission of department.
Supervised work experience in textiles, clothing, interiors, and furnishings in a business firm off campus.
Non-Traditional Format: Internship.

(UNIV) University Orientation

Division of Academic Assistance

UNIV 1101. Topics in Academic Assistance. 1-3 hours. Repeatable for maximum 9 hours credit.
Opportunity for students throughout the University to study significant topics in a particular area on a non-recurring basis, to address topics needed only periodically by a select group, and/or to consider emerging topics on a pilot basis.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1102. Learning to Learn. 3 hours.
Focuses on learning strategies that lead to success in college, including studying in a variety of disciplines, note taking skills, critical reading, and test preparation strategies.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1103. Strategies for Academic Success. 2-3 hours.
Provides students with a better understanding of their personal abilities, interests, and competencies and to ascertain how these aspects of one's self enhance or hinder academic performance. Students will develop effective plans to overcome barriers to academic success.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1104. Topics in Problem Solving. 2-3 hours.
Problem solving, critical and analytical thinking skills, logical thought development, probability, spacial relationships.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1105. Improving Grammar, Usage, and Style. 3 hours.
Reviews conventions of grammar, usage, punctuation, and sentence structure in order to help students edit

their papers more effectively and to write in a clearer style.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1106. Basic Report Writing for College and Beyond. 3 hours.
Not open to students with credit in ENGL 3590.
Prerequisite: ENGL 1101.
Practice in composing short technical and business documents. Attention to the essentials of effective writing, including audience analysis; concise, readable style; and correct grammar and mechanics.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1107. Enhancing Thinking Skills. 2-3 hours.
To assist students in developing higher level thinking skills. Students will be active participants in the class, engaging in creative problem solving, small group discussions and response writing. A variety of media will be used to elicit student ideas and opinions.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1108. Preparation for Statistics-Based Courses. 3 hours.
The algebra of statistics and basic statistical concepts. These concepts will be used in analyzing and interpreting real data.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1109. Resources for Research. 3 hours.
Students investigate their selected topic through library resources (reference books, GALIN, GALILEO, and hardcopy indexes), the World Wide Web, and a personal research project (interview, survey, or observation). Students critically assess both the research tools and the information they find, as shown in oral and written reports.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1110. Preparation for Pre-Calculus. 3 hours.
A complete review of algebra and a brief review of trigonometry to prepare the student for the credit precalculus course. Topics include factoring; solving equations and inequalities; rational, radical, exponential, and logarithmic functions; graphing; and basic trigonometry.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1111. Text Comprehension and Vocabulary Improvement. 2 hours.
Strategies to better comprehend and remember text information; emphasizes the processes of identifying key information, understanding organizational patterns, monitoring, higher-level thinking, and fixing-up comprehension difficulties; vocabulary and the role it plays in text comprehension.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1112. Improving Reading Rate. 2 hours.
Strategies to improve reading rate and fluency; strategies include prereading, eye movements, phrasing, and computerized pacing activities; students will learn how to transfer rate improvement strategies to their own text reading.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1113. University Success for Freshmen. 2-3 hours.
To assist first semester freshmen in adapting to the University. Course topics include the purpose of higher education, time and stress management, learning styles, goals and objectives, the core curriculum, career exploration, diversity issues, and critical thinking and problem solving.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1114. Strategies for Success for Nontraditional Students. 2-3 hours.
Not open to students with credit in UNIV 1103.
An opportunity for nontraditional-age students to further develop academic, psychological, and social life skills needed for achieving success in a university setting. Topics related to critical thinking, learning styles, diversity, time management, communication, and motivation will be taught using self-assessments, lectures, discussions, and experiential exercises.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1115. Introduction to Academic Writing. 3 hours.
Reviews essentials of students' understanding and practicing rhetorical features of clear, affective academic prose.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1116. Study Strategies Adjunct. 1 hour. Repeatable for maximum 3 hours credit.
Designed to assist students in undergraduate core courses by providing weekly seminars focusing on study strategies for specific courses or areas such as history or the sciences; students will learn skills such as notetaking, text reading, and test preparation strategies.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 1117. Basic Composition for Multilingual Writers. 3 hours.
Fundamentals of English grammar, vocabulary development, and organization and development of expository and persuasive essays for non-native undergradu-

ates. Emphasis on problems multilingual students typically experience with proofreading, revision, and writing for an American audience. Class will be small and students will receive much individualized help.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 2201. Introduction to the Research Paper. 3 hours.
Prerequisite: ENGL 1102.
Basics of writing the academic research paper: using resources of the University libraries, gathering sources, taking notes, avoiding plagiarism, documenting sources, organizing the paper, and creating a voice and style suitable to audience and purpose.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

UNIV 2202. Academic Writing for Multilingual Students. 3 hours.
Offers grammar review, vocabulary development, and writing instruction for multilingual students from any discipline who need to further develop their writing skills for class papers, theses, dissertations, or for publication. Academic style guidelines to the student's field of study will be used.
Non-Traditional Format: This course carries institutional credit and will not count toward graduation.

(VETM) Veterinary Medicine

College of Veterinary Medicine

VETM 4960H. Directed Readings and/or Projects (Honors). 3.3 hours.
Prerequisite: BCMB(BIOL)(CHEM) 3100 and permission of Honors.
A directed study in one of the basic sciences in the College of Veterinary Medicine. Includes library and laboratory learning experiences not otherwise available to undergraduate students.
Non-Traditional Format: Course is taught in a research format. Hours per week vary depending on stage of project.

VETM 4970H. Directed Readings and/or Projects (Honors). 3.3 hours.
Prerequisite: Permission of Honors.
A directed study in one of the basic sciences in the College of Veterinary Medicine. Includes library and laboratory learning experiences not otherwise available to undergraduate students.
Non-Traditional Format: Course is taught in a research format. Hours per week vary depending on stage of project.

VETM 4990H. Honors Thesis. 3.3 hours.
Prerequisite: Permission of Honors.
Guidance by a faculty member in writing an honors thesis.
Non-Traditional Format: Course is taught in a research format. Hours per week vary depending on stage of project.

(VPHY) Physiology and Pharmacology

College of Veterinary Medicine, Department of Physiology and Pharmacology

VPHY 3100. Elements of Physiology. 3.3 hours.
The mammalian body as a single functional unit; studies include nervous, muscular, respiratory, circulatory, digestive, renal, endocrine, and reproductive systems.

(WMST) Women's Studies

College of Arts and Sciences

WMST 1110-1110D. Multicultural Perspectives on Women in the United States. 3 hours. 2 hours lecture and 1 discussion period of 1 hour each per week.
Not open to students with credit in WMST 1110H.
Experiences of women in selected racial and ethnic communities: Latinas/Chicanas, African Americans, Native Americans, Asian Americans, and other women in contemporary United States.

WMST 1110H. Multicultural Perspectives on Women in the United States (Honors). 3 hours. 2 hours lecture and 1 lab period of 1 hour each per week.
Not open to students with credit in WMST 1110.
Prerequisite: Permission of Honors.
Experiences of women in selected racial and ethnic communities: Latinas/Chicanas, African Americans, Native Americans, Asian Americans, and other women in contemporary United States.

WMST 2010. Introduction to Women's Studies. 3 hours.
Not open to students with credit in WMST 2010H.
Prerequisite: Sophomore standing.
The study of women of diverse racial, ethnic, and class backgrounds. Topics include contemporary concerns within women's studies: labor markets, health, reproduction, socialization, language, media representations, law, and public policy.
Non-Traditional Format: This course is also offered through University System of Georgia Independent Study (USGIS).

WMST 2010H. Introduction to Women's Studies (Honors). 3 hours.
Not open to students with credit in WMST 2010.
Prerequisite: Permission of Honors.
The study of women of diverse racial, ethnic, and class backgrounds. Topics include contemporary concerns within women's studies: labor markets, health, repro-

duction, socialization, language, media representations, law, and public policy.

WMST(CSCI) 2040-2040L. Gender and Computing: Information Systems Design. 3 hours. 2 hours lecture and 1 lab period of 2 hours each per week.
Computers and the Internet as tools of knowledge to empower the user. Issues raised will be from gender and technology literature. Laboratory sessions will provide hands-on experience with information systems design and computer programming culminating in the creation of a community-based information system.

WMST 3100. Lesbian and Gay Studies. 3 hours.
Prerequisite: Permission of department or one WMST course.
Investigation of same-sex desire, heterosexuality, homosexuality, and the regulation of sexual identities across different racial/ethnic and class/regional communities. Focusing on Native American, African American, Latino, Asian American, and international studies, with texts from law, anthropology, history, film, fiction, and theory.

WMST 3110. Gender, Race, and Class. 3 hours.
Prerequisite: WMST 1110 or WMST 2010 or permission of department.
Issues of gender, race, and class intersecting in the lives of women in the United States. Historical and social construction of gender, race, and class which have shaped the productive, political, and cultural experiences of women of diverse backgrounds will be examined.

WMST 4010/6010. Introduction to Feminist Theories. 3 hours.
Prerequisite or corequisite: Undergraduate level only: WMST 1110-1110D or WMST 1110H or WMST 2010 or WMST 2010H or permission of department.
The historical origins, philosophical assumptions, and political implications of contemporary feminist theories, including conservative, liberal, radical and ecological feminist theories.

WMST 4020. Seminar in Advanced Feminist Studies. 1-3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: WMST 4010/6010 or permission of department.
Topics of scholarly interest in advanced feminist theory.

WMST 4120/6120. Biology and Politics of Women's Reproduction. 3 hours.
Prerequisite: Undergraduate level only: Permission of department.
Women's reproductive life cycles from the perspective of evolutionary biology and the political theory of radical feminism. Topics include puberty, sexual cycling, menarche, pregnancy, childbirth, and menopause. Feminist critiques of science are explored.

WMST 4130/6130. Border Women: Postcolonialism, Gender, and Identity. 3 hours.
Prerequisite: WMST 4010/6010 or permission of department.
Gender construction and identity formation in multicultural, postcolonial societies using theories from the social sciences and humanities. Experiences of women of color and Third World women from, for example, the Indian sub-continent, Hawaii, and Chicana United States. Topics include processes of marginalization, strategies of resistance, and transformation of oppressive power relations.

WMST 4250/6250. Special Topics in Women's Studies. 3 hours. Repeatable for maximum 12 hours credit.
Prerequisite: WMST 4010/6010 or permission of department.
Ongoing and current topics of scholarly interest in women's studies.

WMST 4950. Directed Studies in Women's Studies. 1-3 hours. Repeatable for maximum 6 hours credit.
Prerequisite: WMST 4010/6010 and permission of department.
Readings and independent research closely supervised by a faculty member on a specific interdisciplinary topic in women's studies.
Non-Traditional Format: Directed study.

WMST 4960H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

WMST 4970H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

WMST 4980H. Directed Reading and/or Projects (Honors). 3 hours.
Prerequisite: Permission of Honors.
Individual study, reading, or projects under the direction of a project director.
Non-Traditional Format: Directed study.

WMST 4990H. Honors Thesis. 3 hours.
Prerequisite: Permission of Honors.
Individual research in the major field or in a closely related field.
Non-Traditional Format: Directed study.

(YORB) Yoruba

College of Arts and Sciences, Department of Comparative Literature

YORB 1010. Elementary Yoruba I. 4 hours.
Foundation in spoken and written Yoruba. Focus on oral and aural skills, basic grammar. Additional laboratory work required. Introduction to Yoruban culture.

YORB 1020. Elementary Yoruba II. 4 hours.
Prerequisite: YORB 1010.
A continuation of Elementary Yoruba I. Increased focus on grammar and culture, reading and conversation.

YORB 2010. Intermediate Yoruba I. 3 hours.
Prerequisite: YORB 1020.
Focus on developing fluency in spoken and written Yoruba. Oral work geared towards building effective communication in day-to-day situations and functional tasks. Readings in authentic Yoruban texts of increasing complexity. Advanced cultural discussion.

YORB 2020. Intermediate Yoruba II. 3 hours.
Prerequisite: YORB 2010.
A continuation of Intermediate Yoruba I. Introduction to additional literary texts, including poetry, newspapers, magazines.

YORB 3010. Advanced Yoruba I. 3 hours.
Prerequisite: YORB 2020.
Designed to prepare students to travel to Nigeria and for research using authentic research materials. Study of geography and of political and economic structures of Nigeria and West Africa. Focus on reading Yoruban texts.

YORB 3020. Advanced Yoruba II. 3 hours.
Prerequisite: YORB 3010.
Advanced readings, novels, thematic texts, and rhetoric. Focus on developing comprehension of textual materials. Introduction to scientific and other specialized materials.

(YORB)SWAH 3030. Introduction to African Languages, Cultures, and Folklore. 3 hours.
The languages, cultures, folklore, orature, and literature of East Africa and West Africa. While texts will be available in English, students with proficiency in Swahili or Yoruba will examine the literature in its original language.

YORB 3990. Directed Study in Yoruban Language and Literature. 1-3 hours. Repeatable for maximum 3 hours credit.
Prerequisite: Permission of department.
Independent study and research in Yoruban language and literature under the direction of individual faculty. Focus is on reading and analysis of Yoruban literary texts (including works in translation from Yoruba-speaking communities in Africa and the Diaspora).
Non-Traditional Format: Directed study.

(ZULU) Zulu

College of Arts and Sciences, Department of Comparative Literature

ZULU 1001. Elementary Zulu I. 3 hours.
Fundamentals of the Zulu language and culture which has spread to cover communities in South Africa as well as outside of South African borders to the Southern parts of Zimbabwe, and parts of Botswana, Lesotho, and Swaziland. Emphasis will be placed on grammar, pronunciation, reading, writing, and conversational skills. Course may be taken through UGA Studies Abroad program in African Studies, Sociology, Language Ed..

ZULU 1002. Elementary Zulu II. 3 hours.
Prerequisite: ZULU 1001.
The course is intended to build cultural knowledge, structural and conversational knowledge acquired in Elementary Zulu I. Intensive training and practice in speaking, listening, reading/comprehension, and writing in Zulu. There will be continued emphasis on speaking and understanding the culture of the Zulu speaking communities. Course may be taken through UGA Studies Abroad program in African Studies Program.

ZULU 3990. Directed Study in Zulu Language and Literature. 3 hours. Repeatable for maximum 9 hours credit.
Prerequisite: Permission of department.
Independent study and research under the direction of individual faculty members. Course may be taken through UGA Studies Abroad program in African Studies Program.
Non-Traditional Format: Directed study.
